

Relationships explanation for Archaeological Fish Bone Images Tables 1-4

Tables 1-4 contain data which extend the metadata for images of biological taxa (Family, genus, species etc.) in the Archaeological Fish Bone Images archive May 2010. The key field **FishTaxonCode** can link data in the archive (attached to each image) and information in Tables 1, 2 and 4. The key field **FishAnatomyCode** (Table 3) links to the same field in the Archaeological Fish Bone Images archive and provides further explanation. Data indexes for Tables 1-4 are stored in the repository.
