Science
University semester and vacation dates for 2007

**Summer School lectures**
- **December program**: Monday 11 December to Friday 28 February
- **Main program**: Thursday 4 January to Friday 28 February
- **Late January program**: Friday 12 January to Friday 28 February

**Winter School lectures**
For the latest dates please refer to [http://www.summer.usyd.edu.au/winter/](http://www.summer.usyd.edu.au/winter/)

**Semester One**
- **International student orientation (Semester One)**: Monday 12 February to Thursday 15 February
- **Lectures begin**: Monday 5 March
- **AVCC Common Week/non-teaching Easter period**: Friday 6 April to Friday 13 April
- **International Application Deadline (Semester Two)**: Monday 30 April
- **Last day of lectures**: Friday 8 June
- **Study vacation**: Monday 11 June to Friday 15 June
- **Examination period**: Monday 16 June to Saturday 30 June
- **Semester ends**: Saturday 30 June
- **AVCC Common Week/non-teaching period**: Monday 2 July to Friday 6 July

**Semester Two**
- **International student orientation (Semester Two)**: Monday 16 July to Thursday 19 July
- **Lectures begin**: Monday 23 July
- **AVCC Common Week/non-teaching period**: Monday 24 September to Friday 28 September
- **International application deadline (Semester One 2008)**: Wednesday 31 October
- **Last day of lectures**: Friday 26 October
- **Study vacation**: Monday 29 October to Friday 2 November
- **Examination period**: Monday 5 November to Saturday 17 November
- **Semester ends**: Saturday 17 November

*Deadlines for application to the USydMP and BDent are different. Please see: [www.acer.edu.au/tests/universit/gamsat](http://www.acer.edu.au/tests/universit/gamsat)*

Last dates for withdrawal or discontinuation for 2007

**Semester One units of study**
- **Last day to add a unit**: Friday 16 March
- **Last day for withdrawal**: Saturday 31 March
- **Last day to discontinue without failure (DNF)**: Friday 27 April
- **Last to discontinue (Discontinued – Fail)**: Friday 8 June

**Semester Two units of study**
- **Last day to add a unit**: Friday 3 August
- **Last day for withdrawal**: Friday 31 August
- **Last day to discontinue without failure (DNF)**: Friday 7 September
- **Last day to discontinue (Discontinued – Fail)**: Friday 26 October
- **Last day to withdraw from a non-standard unit of study**: Census date of the unit, which must not be earlier than 20 per cent of the way through the period of time during which the unit is undertaken

**Public holidays**
- **Australia Day**: Friday 26 January
- **Good Friday**: Friday 6 April
- **Easter Monday**: Monday 9 April
- **Anzac Day**: Wednesday 25 April
- **Queen’s Birthday**: Monday 11 June
- **Labour Day**: Monday 1 October

For the latest updates, visit Handbooks online.
What is a handbook?
The handbook is an official publication and an essential guide for every student who studies at the University of Sydney. It is an important source of enrolment information. It can also help you with more than just planning your course of study.

As a student at the University of Sydney you need to be aware of course structures and content, who your lecturers are, as well as examination procedures. You should also become familiar with University policies and faculty rules and regulations. The handbook will supply a lot of this information.

It will also point you to places and people around the University who can help you with enquiries about library loans, childcare, fees, casual employment, places to eat and stay, support groups and much, much more.

What new students need to know

- terminology used for courses and programs of study
- semester dates and examination periods
- important contact details
- how to plan your study program
- rules and policies on assessment, satisfactory progression, honours etc.
- what University services are available and where to find them
- how to get around your campus

At the beginning of many of these chapters there will be explanations to help you proceed further.

Where to find what

Course terminology
University terminology – like ‘credit point’, ‘unit of study’, ‘WAM’ etc – can be found at the back of all handbooks.

Definitions of all terminology are located in the General University information section under Abbreviations and Glossary, at the back of this handbook.

Dates
The start and finish dates of semester can be found in the front section of the handbook. Summer School dates are in the General University section at the back of the book.

Contents and index
The comprehensive contents section at the front of the handbook explains the details you’ll find within each chapter. You’ll find information like:

- how and where to contact Faculty staff
- how to select your units of study and programs
- a list of degrees
- detailed information on all units of study – classified by unit identifiers (a four-alpha, four-digit code and a title)
- electives and streams
- scholarships and prizes
- information specific to faculties

The index lists units of study only. It allows you to check every reference which refers to your unit of study within the handbook.

Colour-coded sections
- Ivory – for undergraduate courses
- Blue – for postgraduate courses

Faculty rules and regulations
Faculty resolutions are the rules and regulations pertaining to a specific faculty. They can generally be found in their own chapter, or next to the relevant units of study.

These should be read along with the University’s own Coursework Rule 2000 (as amended) which can be found in the general University information towards the back of the book. Together they outline the agreement between student and faculty, and student and University. Senate resolutions are located in the University Calendar.

General University information
This is information about the University in general, rather than information specific to the faculty. This information is at the back of the book and includes, among other things:

- the University Coursework Rule
- the PhD Rule
- University terminology and abbreviations
- campus maps to help you find your way around
- Summer School information
- international student information
- student services

Course planner
You might like to plot the course of your degree as you read about your units of study. This planner can be found at the back of the handbook.

Timetables
For information about personal timetables, centrally timetabled units of study, and venue bookings, see http://www.usyd.edu.au/studentcentre/timetabling.shtml.

For the session calendar, see http://web.timetable.usyd.edu.au/calendar.jsp

Students with a disability
Accessible versions of this document, including word, pdf and html versions are available at http://www.usyd.edu.au/handbooks/handbooks_disability/.

You can find information on Disability Services in the General University information section of the handbook. The Service can provide information regarding assistance with enrolment and course requirement modifications where appropriate.

For details on registering with the Service and online resources see the Disability Services website http://www.usyd.edu.au/disability.

Handbook updates
The information in the handbook is current at the time of publication. Updated information to handbooks and references to University policies such as plagiarism and special consideration, among others can be found in the University’s website.

Message from the Dean

This is a particularly fascinating time to study science. Major technological advances are opening up many new areas, from ecosystems to nano-technology, and the boundaries between traditional areas are blurring as inter-disciplinary research leads to rapid progress on a wide range of issues in environmental, health and technology related industries that underpin the future prosperity and quality of life in Australia. These issues include: protection of biodiversity; environmental remediation; control of industrial pollution; energy production; new manufacturing technologies; genetically modified organisms; stem cells and other new genetic advances in health and medicine; data management and new computing developments; and understanding human behaviour. The comprehensive scope of the Faculty of Science at the University Sydney allows us to offer courses in all of these areas and the many joint degree options provide the opportunity to study social, moral and commercial consequences of science.

A degree in Science is a first step towards an exciting career, one that stimulates, challenges, and rewards you. It can take you from the microscopic to the cosmic level, into physical and biological processes and from order to chaos. A Science degree develops your investigative skills and teaches you the tools of critical analysis and communication skills for lifelong learning. Employers in government, industry and education need graduates who are trained to think, analyse and communicate. Science graduates have a unique blend of generic and discipline-related skills that give them the capacity to tackle problems with initiative and resourcefulness, to plan and execute projects and to work as part of a team. Studying Science gives you the innovative skills for an ever-changing workforce environment and makes you a valuable and sought-after resource for employers. And if you become really excited by a particular area, our honours and postgraduate courses provide you with the training to become a practicing scientist in that field.

The degree programs at the University of Sydney are of exceptional quality. Many of our academic staff have won teaching awards and our research programs are world class. Our degree programs are designed to offer challenges and excitement at a range of different levels, including the Talented Students' Program, Advanced Science degree and specialist streams within the BSc that provide more directed science training, and in some cases, opportunities for industry placements. The Faculty has close links with industry and a wide range of employers, and will provide opportunities throughout your degree to explore career options. The degree programs have been designed so that you can specialise if you wish, but you don't have to make that decision until you have completed a general first year. The first year experience in Science is designed to help you settle into University, to meet other students, and to decide on or confirm your interest in a specialised area of study. We use a variety of teaching methods to help you develop sound generic computing skills, interpersonal and communication skills, and an ability to work in teams and groups. Most importantly, you will learn how to analyse problems, work out solutions, and communicate these clearly to others. We will help to discover how things function, develop lifelong strategies for learning new approaches, and gain skills to explore and use information in different contexts.

David Day
Dean
Introduction

This is the Faculty of Science handbook. In it you will find a store of information about things you need to know about the Faculty and the University. In particular, it will help you to find out who are the people in your Faculty, the requirements for degrees in the Faculty and the ways that these can be satisfied.

Chapter 1 is the 'who and where' of the Faculty, names and locations of people and offices you are likely to need to contact during the year. It also contains information on some important University policies. It is essential that students become familiar with these policies.

In chapter 2 you will find the fine print, the undergraduate degree resolutions (rules) covering your degree. The information in this chapter takes precedence over all other information in later chapters. You should definitely read the relevant parts of this chapter, and refer to them from time to time during your studies to make sure you are on track to satisfy the requirements of your degree.

Chapters 3–9 contain information on undergraduate degrees offered by the Faculty of Science. These chapters contain enrolment advice for undergraduates as well as frequently asked questions and important policy affecting students in the Faculty. You will find enrolment guides and a degree planner to assist you to plan your degree. You should read the particular chapter devoted to your degree in conjunction with the resolutions in chapter 2.

Chapter 10 contains degree tables and unit of study descriptions for undergraduates. If you want to know what a unit of study is and how it fits into your degree plan, this is the best place to look. You should read this chapter in conjunction with chapters 2 and your degree chapter.

Chapter 11 introduces the Faculty’s Talented Student Program and gives contact details for coordinators in participating departments and schools.

Chapter 12 has information for Honours students.

Chapter 13 is for all Science students considering taking up the opportunity to study on exchange overseas at a partner institution.

Chapters 14–31 are for postgraduate students. Each chapter contains enrolment advice, unit of study descriptions and resolutions for specific postgraduate degrees offered by the Faculty.

The staff of the Faculty are listed under their School or Department in chapter 32.

Chapter 33 contains summary scholarships and prizes information for both undergraduate and postgraduate students.

The General University Information and the Glossary are handy reference pages for all sorts of services on campus or to explain that obscure term.

The unit of study index is a useful reference tool for students who want to locate information on a particular unit.

University dates

Please see the University Dates page for a listing of all current semester, holiday and examination dates within the University of Sydney.
1. Contact information and policies

This chapter is intended to give School and Department staff contact details. Following these details, you will some key policies. Students enrolled in units of study offered by the faculty of Science must familiarise themselves with these policies. Towards the end of the chapter, you find information on Faculty life and representation, and employment for graduates in science. Information in this section is accurate as at 2 September 2006.

**Key policies for students**

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following five key policies:

**Special Arrangements**

Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

**Special Consideration**

Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

**Code of Conduct for students**

The University has clear expectations of students in respect of academic matters and personal behaviour.

**Student Plagiarism: Coursework policy and procedure**

The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

**Intellectual property**

Students and staff should be familiar with University of Sydney policies on intellectual property. The relevant policy is the *University of Sydney (Intellectual Property) Rule* 2002 as found at:

and the Intellectual Property Guide at:

**Additional important policies**

The *University of Sydney (Coursework Rule)* contains important policies for all students. A faculty has authority to determine what constitutes satisfactory progress for all students enrolled in award courses in that faculty, in accordance with the policies and directions of the Academic Board.

You may need to refer to the *Coursework Rule* from time to time, particularly in relation to:

- Discontinuation of enrolment and suspension of candidature
- Unsatisfactory progress and exclusion

Refer to relevant sections of the *Coursework Rule at the back of this handbook*.

**Special Arrangements and Special Consideration**

The University’s assessment practices are designed to ensure that conditions are as consistent as possible and that individual students are not disadvantaged.

**Special Arrangements**

The Special Arrangements for Examination and Assessment policies are designed to support and assist students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments.

Special Arrangements may be made available to any student enrolled within a Faculty of Science unit of study, who is unable to meet assessment requirements or attend examinations, because of one or more of the following situations:

- Essential religious commitments or essential beliefs;
- Compulsory legal absence (e.g. jury duty, court summons, etc);
- Sporting or cultural commitments, including political and union commitments, where the student is representing the University, state or nation;
- Australian Defence Force commitments (including Army Reserve)

Special Arrangements may only be considered in the above circumstances if the commitment falls on the same day as an assessment task or examination. Special Arrangements will not be made if the commitment falls before or after the assessment task or examination.

The Application for Special Arrangements must be submitted no later than seven (7) days prior to the due date of the assessment or examination for which alternative arrangements are being sought.

Students may elect to include details on preparation time required for the essential commitment (for example, travel time, training camps etc) but the Faculty of Science is under no obligation to make additional arrangements for preparation time.

This information should be noted on the Application Form, and supporting documentation detailing the tasks and time required to prepare must be submitted (in addition to the documents listed above).

In cases of an extended absence, the relevant School should discuss the option of withdrawal without failure with students. An ‘Extended Absence’ is defined, for the purposes of Special Arrangements, as being a period of more than two weeks.

To apply for Special Arrangements the student must:
1. Principles
This Code of Conduct has been formulated to provide a clear statement of the University's expectations of students in respect of academic matters and personal behaviour.

Study at the University presents opportunities for interacting with other members of the University community. The University recognises and values the diversity of student experiences and expectations, and is committed to treating students, both academically and personally, in a fair and transparent manner. All students, in return, are required to comply with the requirements set down in this Code of Conduct.

The University reaffirms its commitment to:

- high academic standards, intellectual rigour and a high quality education;
- intellectual freedom and social responsibility;
- recognition of the importance of ideas and the pursuit of critical and open enquiry;
- tolerance, honesty and respect as the hallmarks of relationships throughout the University community; and
- high standards of ethical behaviour.

All students are required to be aware of and act consistently with these values.

2. Coverage
This Code of Conduct applies to all students of the University of Sydney, in respect of all actions and activities (including inaction or inactivity) relating to or impacting on the University or its students and employees. It must be read in conjunction with the statutes, rules, and resolutions of the University.

Definitions
In this Code of Conduct:

**Student** means all students of the University of Sydney, including but not limited to fee paying students, HECS-HELP students, FEE-HELP students, audit students, Centre for Continuing Education Students, Centre for English Teaching students, exchange students, Study Abroad students, Summer School students and Winter School students.

**Employee** means all staff of the University of Sydney, including full-time, part-time and casual staff.

4. Personal conduct
All students must:

- treat all employees, honorary appointees, consultants, contractors, volunteers, any other members of the public, and other students with respect, dignity, impartiality, courtesy and sensitivity;
- maintain a cooperative and collaborative approach to inter-personal relationships;
- act honestly and ethically in their dealings with University employees, honorary appointees, consultants, contractors, volunteers, any other members of the public and other students;
- respect the privacy of University employees, honorary appointees, consultants, contractors, volunteers, any other members of the public and other students;
- ensure that they do not act in a manner that unnecessarily or unreasonably impedes the ability of University employees, honorary appointees, consultants, contractors, volunteers, any other members of the public and other students to carry out their study, research or work at the University, including in the University of Sydney Library, lecture theatres and laboratories;
- ensure that they do not act in a manner that unnecessarily or unreasonably impedes the ability of University employees, honorary appointees, consultants, contractors, volunteers, any other members of the public and other students to access or use the resources of the University, including in the University Library resources, lecture theatres and laboratories; and
- ensure that they do not become involved in or encourage discrimination against or harassment or bullying of University employees, honorary appointees, consultants, contractors, volunteers, any other members of the public or other students.

5. Academic conduct
All students must:

- ensure that their enrolment and progress in their award course is lawful and consistent with the statutes, rule and resolutions of the University of Sydney.
- Students must not enrol in additional units of study outside the degree resolutions even if the student information system allows it when enrolling online.
- It is a student's responsibility to maintain current information in the student information system, and observe key dates and deadlines.
1. Contact information and policies

- read all official correspondence from the University, including email;
- act ethically and honestly in the preparation, conduct, submission and publication of academic work, and during all forms of assessment, including formal examinations and informal tests;
- avoid any activity or behaviour that would unfairly advantage or disadvantage another student academically;
- conform to the University’s requirements for working with humans, animals and biohazards;
- behave professionally, ethically and respectfully in all dealings with the University’s learning partners during extramural placements and practicums; and
- use the University’s resources, including information and communication technology resources, in a lawful and ethical manner and for University purposes only, unless express permission has been granted for non-University or private usage.

6. Authority

This Code of Conduct was approved by the Academic Board pursuant to the University of Sydney (Academic Governance) Rule 2003 on 2 February 2005.

For further details on the Code of Conduct for Students, students should consult the Academic Board Policies website: http://www.usyd.edu.au/ab/policies/

Student plagiarism: Coursework policy and procedures

Part A – Purpose

1. Academic honesty and prohibition on plagiarism

(1) The role of the University of Sydney is to create, preserve and apply knowledge through teaching, research, creative works and other forms of scholarship. The University is committed to academic excellence and high standards of ethical behaviour as the cornerstones of scholastic achievement and quality assurance. The University requires all students to act honestly, ethically and with integrity in their dealings with the University, its employees, members of the public and other students.

(2) The University of Sydney is opposed to and will not tolerate Plagiarism. It is the responsibility of all students to:

- (a) ensure that they do not commit or collude with another person to commit Plagiarism;
- (b) report possible instances of Plagiarism; and
- (c) comply with this Policy and Procedure.

(3) The University will treat all identified cases of student Plagiarism seriously, in accordance with this Policy and Procedure, and with Chapter 8 of the University of Sydney By-Law 1999 (as amended) which deals with Student Discipline.

Part B – Preliminary

2. Commencement and coverage

This Policy and Procedure commences on 4 April 2005. It replaces all previous policies and procedures relating to Plagiarism by students enrolled in course work degrees, to the extent that any such previous policies and procedures are inconsistent with this Policy and Procedure. The University’s Code of Conduct for Responsible Research Practice and Guidelines for dealing with Allegations of Research Misconduct are accessible on the University's website at: http://www.usyd.edu.au/policy.

3. Authority

The Policy and Procedures were approved by the Vice-Chancellor on 15 February 2005.

4. Definitions

In this Policy and Procedure: Acknowledgement of the Source means identifying at least:

- the author or person who owns the Work; and
- the place from which the Work or part of the Work was sourced.

Dishonest Plagiarism is defined by Part B Clause 7.

Examiner means the person responsible for assessing the Work. Legitimate Cooperation means any constructive educational and intellectual practice that aims to facilitate optimal learning outcomes through interaction between students, including:

1. researching, writing and/or presenting joint Work;
2. discussion of general themes and concepts;
3. interpretation of assessment criteria;
4. informal study/discussion groups; and
5. strengthening and development of academic writing skills through peer assistance.

Negligent Plagiarism is defined by Part B Clause 6.

Nominated Academic means the relevant Heads of School and/or Associate Deans responsible for handling Plagiarism, as nominated by the Dean of the Faculty in accordance with the University's Delegations of Authority.

Plagiarism is defined by Part B Clause 7.

Written Warning means a warning issued under Part D Clauses 11(2)(b) or 12(4)(b).

5. Plagiarism

(1) Plagiarism for the purpose of this Policy and Procedure (which applies to students enrolled in course work degrees) means presenting another person’s Work as one’s own Work by presenting, copying or reproducing it without Acknowledgement of the Source.

(2) Plagiarism includes presenting Work for assessment, publication, or otherwise, that includes:

- (a) sentences, paragraphs or longer extracts from published or unpublished Work (including from the Internet) without Acknowledgement of the Source; or
- (b) the Work of another person, without Acknowledgement of the Source and presented in a way that exceeds the boundaries of Legitimate Cooperation.

(3) Plagiarism can be negligent (Negligent Plagiarism) or dishonest (Dishonest Plagiarism).

6. Negligent Plagiarism

(1) Negligent Plagiarism means innocently, recklessly or carelessly presenting another person’s Work as one’s own Work without Acknowledgement of the Source.

(2) Negligent Plagiarism often arises from a student’s fear of paraphrasing or writing in their own words, and/or ignorance of this Policy and Procedure. It arises from:

- (a) failure to follow appropriate referencing practices;
- (b) failure to determine or verify and acknowledge the source of the Work.

7. Dishonest plagiarism

(1) Dishonest Plagiarism means knowingly presenting another person’s Work as one’s own Work without Acknowledgement of the Source.

(2) Alleged Plagiarism will be deemed to be alleged Dishonest Plagiarism where:

- (a) substantial proportions of a student’s Work have been copied from the Work of another person, in a manner that clearly exceeds the boundaries of Legitimate Cooperation;
- (b) a student’s Work contains a substantial body of copied material (including from the Internet) without Acknowledgement of the Source, and in a manner that cannot be explained as Negligent Plagiarism;
- (c) there is evidence that the student engaged another person to produce or conduct research for the Work, either partly or wholly, for payment or other consideration; or
- (d) the student has previously received a Written Warning.
Part C – Preventing plagiarism

8. Compliance statements
All students are required to submit a signed statement of compliance with all Work submitted to the University for assessment, presentation or publication. A statement of compliance must be in the form of:

1. a University assignment cover sheet;
2. a University electronic form; or
3. a University written statement; certifying that no part of the Work constitutes a breach of this Policy.

Part D – Procedure for dealing with plagiarism

9. Procedural fairness
The University is committed to dealing with student Plagiarism in accordance with the principles of procedural fairness, including the right of a student to:

1. be informed of the allegations against them in sufficient detail to enable them to understand the precise nature of the allegations and to properly consider and respond;
2. have a reasonable period of time within which to respond to the allegations against them;
3. have the matter resolved in a timely manner;
4. be informed of their rights under this Policy and Procedure and under Chapter 8 of the University of Sydney By-Law 1999 (as amended);
5. invoke a support person or student representative to any meeting regarding alleged Plagiarism;
6. impartiality in any investigation process; and
7. an absence of bias in any decision-maker.

10. Identification and assessment of alleged Plagiarism
(1) Where an Examiner detects or is made aware of alleged Plagiarism by a student, the Examiner must report the alleged Plagiarism to a Nominated Academic.

(2) Where:

• (a) an Examiner reports alleged Plagiarism to a Nominated Academic;
• (b) a Nominated Academic otherwise becomes aware of alleged Plagiarism;

the Nominated Academic must, in consultation with the Examiner, make a preliminary assessment of whether the alleged Plagiarism would, if proven, constitute Negligent Plagiarism or Dishonest Plagiarism.

(3) The Nominated Academic and the Examiner will make a preliminary assessment of whether the alleged Plagiarism would, if proven, constitute Negligent Plagiarism or Dishonest Plagiarism on a case by case basis, taking into account factors such as:

• (a) the extent of the alleged Plagiarism measured against the student's original contribution to the Work;
• (b) the percentage value of the Work in the unit of study or course;
• (c) the student's overall academic performance in the unit of study or course; and
• (d) the circumstances in which the Plagiarism is alleged to have occurred.

11. Negligent plagiarism
(1) Cases of alleged Negligent Plagiarism will be handled by the Nominated Academic in accordance with this clause and with Part D Clause 9 (Procedural Fairness) above.

(2) Where, following discussion with the student, a Nominated Academic forms the view that the Student is guilty of Negligent Plagiarism, the Nominated Academic will:

• (a) counsel the student by explaining referencing guidelines, providing a copy of this Policy and Procedure, and referring the student to services for assistance; and
• (b) issue a Written Warning about the consequences of any subsequent breaches of this Policy.

(3) A copy of a Written Warning issued under Clause 11(2)(b) above must be:

• (a) signed and dated by the Nominated Academic and the student;
• (b) retained by the student; and
• (c) placed on a central file maintained by the Registrar.

(4) Where, following discussion with the student, the Nominated Academic forms the view that the student is guilty of Negligent Plagiarism, the Nominated Academic may also take other appropriate action, including:

• (a) requiring the student to resubmit the Work for assessment;
• (b) requiring the student to undertake another form of assessment;
• (c) requiring the student to undertake other remedial action; or
• (d) applying a fail grade to the Work or part thereof.

12. Dishonest Plagiarism
(1) Cases of alleged Dishonest Plagiarism will be handled in accordance with this clause and with Part D Clause 9 (Procedural Fairness) above.

(2) The Nominated Academic will make a preliminary assessment of whether the alleged Dishonest Plagiarism is serious enough, if proven, to constitute potential student misconduct under Chapter 8 of the University of Sydney By-Law 1999 (as amended).

(3) In making his or her assessment under Part D Clause 12(2) above, the Nominated Academic will take into account:

• (a) whether the student has previously received a Written Warning;
• (b) the extent of the alleged Dishonest Plagiarism measured against the student's original contribution to the Work;
• (c) the percentage value of the Work in the unit of study or course;
• (d) the capacity of the alleged Dishonest Plagiarism to adversely affect the student's peers and/or teachers; and
• (e) the capacity of the alleged Dishonest Plagiarism to impact adversely on the actual or perceived academic standards of the University.

(4) Where the Nominated Academic assesses that the alleged Dishonest Plagiarism is not serious enough, if proven, to constitute potential student misconduct under Chapter 8 of the University of Sydney By-Law 1999 (as amended), the Nominated Academic will, following discussion with the student:

• (a) counsel the student by explaining referencing guidelines, providing a copy of this Policy and Procedure, and referring the student to services for assistance; and
• (b) issue a Written Warning about the consequences of any subsequent breaches of this Policy.

(5) A copy of a Written Warning issued under Part D Clause 12(4)(b) above must be:

• (a) signed and dated by the Nominated Academic and the student;
• (b) retained by the student; and
• (c) placed on a central file maintained by the Registrar.

(6) Where the Nominated Academic assesses that the alleged Dishonest Plagiarism is not serious enough, if proven, to constitute potential student misconduct under Chapter 8 of the University of Sydney By-Law 1999 (as amended), the Nominated Academic may also, following discussion with the student, take other appropriate action, including:

• (a) requiring the student to resubmit the Work for assessment;
• (b) requiring the student to undertake another form of assessment;
• (c) requiring the student to undertake other remedial action; or
• (d) applying a fail grade to the Work or part thereof; or
• (e) applying a fail grade to the unit of study.

(7) Where the Nominated Academic assesses that the alleged Dishonest Plagiarism is serious enough, if proven, to constitute potential student misconduct under Chapter 8 of the University of Sydney By-Law 1999 (as amended), the Nominated Academic may also, following discussion with the student, take other appropriate action, including:

• (a) requiring the student to resubmit the Work for assessment;
• (b) requiring the student to undertake another form of assessment;
• (c) requiring the student to undertake other remedial action; or
• (d) applying a fail grade to the Work or part thereof; or
• (e) applying a fail grade to the unit of study.
Faculty life and representation

Student membership of the Faculty

The Constitution of the Faculty of Science provides that, in addition to the ex officio and academic staff members of the Faculty, there shall be the following categories of membership:

1. not more than three persons distinguished in the field of Science and its teaching, appointed by the Faculty on the nomination of the Dean;
2. not more than six students, undergraduate or postgraduate, enrolled as candidates for a degree or diploma in the Faculty of Science elected in the manner prescribed by resolution of the Senate; and
3. not more than five persons, who have teaching, research or offer appropriate associations with the work of the Faculty, appointed by the Faculty on the nomination of the Dean.

Two of the six students are elected annually by the undergraduate students in the faculty, two are elected by the postgraduate students and one each is nominated by each of the Sydney University Science Society and the Sydney University Postgraduate Representative Association.

The Senate resolutions for the student membership of the Faculty of Science are set out in full in The University of Sydney Calendar.

Students may request permission to attend Faculty meetings as observers. Details are available from the Faculty office.

Sydney University Science Society (SCISOC)

As a student in the Faculty of Science you are a member of the Sydney University Science Society (SCISOC), the Faculty society. Part of the fee you pay to the SRC is allocated to your Faculty society; SCISOC uses this money to promote activities of both an educational and a social nature.

The Society holds a number of activities throughout the year, including barbecues every two weeks and the Annual Science ‘Bucky’ Ball. The Society appoints sports directors who help organise interfaculty sport.

The society runs a stall during orientation week, where T-shirts are sold and you can find out more about what the SCISOC does. The Aqua Regia (official publication of SCISOC) which heralds information concerning the activities of SCISOC and Science departmental societies, is produced weekly and can be found on official departmental noticeboards. The postal address is Faculty of Science, Carslaw Building F07, University of Sydney, 2006.

The affairs of the society are governed by a council consisting of office bearers, delegate members from member societies, student members of Faculty and nine members elected at the annual general meeting, at least three of whom are first year students. You are encouraged to attend the AGM (held in Semester 1) and to take an active part in the society and on council. Council meets regularly during term and all members are invited to attend the meetings. These are advertised in the Daily Bull. Your attendance will ensure that SCISOC effectively meets the needs of science students on campus. Visit the website.

Member societies

A number of the departments within the Faculty of Science have departmental societies, for example the Alchemist’s Society, Biochemical Society, Biological Society, School of Geosciences Society (includes Geography, Geology, Environmental Science and Marine Science), Mathematical Society, Medical Science Society, Microbiology Society, Physics Society, and Psychological Society. These societies organise talks, films, field trips and other activities relating to their particular discipline, as well as parties, wine and cheese evenings and other social activities. Most departmental societies have a stall during the orientation period.

Employment for graduates in Science

The field of employment for science graduates is extraordinarily wide, ranging from the dedicated research scientist in a university or research laboratory to the managing director of a large corporation, the school teacher, the technical representative, the laboratory bench worker, the production superintendent, the consultant geologist, the bird banding biologist, the actuary, the computer sales representative, the beachcomber... the list is endless and will depend on a students subject choices and interests. Many science graduates choose to undertake further study to prepare for employment. There is a wide range of graduate diplomas and coursework masters degrees available. Some of these are: molecular biotechnology, bioinformatics, nutrition and dietetics, information technology, environmental science, marine ecology and psychology.

Some science graduates complete a Bachelor of Engineering degree after an additional two years’ study. This qualifies them as professional engineers, with a wide range of additional job opportunities in chemical, civil, electrical, mechanical and mining engineering. If you wish to consider this option, it is important to make sure that you choose the appropriate prerequisite subjects in your science degree.

It is prudent to plan your course with a career in mind, or a couple of careers if possible. For example, even though you might be sure you want to teach mathematics, you might include some computer science in your course so that if you did not like teaching you would have another choice of career. Alternatively, you might have your heart set on being a biologist, but as an insurance policy in case you could not get a job as a biologist, you might consider also majoring in biochemistry, microbiology or chemistry to widen the scope. This is not to say you should give up too easily if you want to be a biologist. In areas where jobs are not too plentiful you have to start right at the beginning of your course to prepare to secure that job on graduation. Some suggestions are to learn scuba-diving, join the bush-walking or speleological clubs, work in the vacation for one of the national parks—for nothing if necessary—and make as many personal contacts as you can. Such evidence of keenness and initiative impresses an employer. As you will have understood, it is not only your academic ability an employer looks at but also your personality, evidence of a sense of responsibility and activities beyond the set curriculum.

Similarly, if you want a job related to chemistry, physics, geology, computer science, biochemistry, etc, do your best to obtain a vacation job that will enable you to claim relevant experience when applying for your first job. These vacation jobs are hard to get, admittedly, but the extra legwork and initiative involved in finding one will pay off in the long run. Some undergraduate degrees, such as the BSc (Molecular Biotechnology) feature industry or industry-related experience as part of the requirements for the degree. Such placements occur during semester teaching periods. Other departments can organise industry placements for their students, which do not count to the degree but provide valuable experience for a new graduate.
2. Undergraduate degree regulations

Undergraduate Resolutions

This chapter contains the regulations governing undergraduate degrees throughout the University and the regulations governing undergraduate degrees offered by the Faculty of Science.

1. The degrees in the Faculty of Science shall be:
   1.1 Bachelor of Science (BSc), which shall also incorporate the specially designated streams:
      1.1.1 Bachelor of Science (Advanced) (BSc(Advanced))
      1.1.2 Bachelor of Science (Advanced Mathematics) (BSc(Advanced Mathematics))
      1.1.3 Bachelor of Science (Marine Science) (BSc(Marine Science))
      1.1.4 Bachelor of Science (Molecular Biology & Genetics) (BSc(Molecular Biology & Genetics))
      1.1.5 Bachelor of Science (Molecular Biotechnology) (BSc(Molecular Biotechnology))
      1.1.6 Bachelor of Science (Nutrition) (BSc (Nutrition))
      1.2 Bachelor of Medical Science (BMedSc), which is offered in the following designated combined degree courses:
      1.2.1 Bachelor of Medical Science/Bachelor of Medicine and Surgery (BMedSc/BMedSc)
      1.2.2 Bachelor of Engineering/Bachelor of Medical Science (BE/BMedSc)
      1.3 Bachelor of Psychology (BPsych)
      1.4 Bachelor of Science and Technology (BST)
      1.5 Bachelor of Information Technology (BIT)
      1.6 Bachelor of Computer Science and Technology (BCST), which shall also incorporate the stream:
      1.6.1 Bachelor of Computer Science and Technology (Advanced) (BCST(Advanced))
      2. The Bachelor of Science is offered in the following designated combined degree courses:
      2.1 Bachelor of Science (Advanced)/Bachelor of Medicine and Surgery (BSc(Adv)/BMedSc)
      2.2 Bachelor of Science/Bachelor of Laws (BSc(LLB))
      2.3 Bachelor of Science and Bachelor of Arts (BSc/BA)
      2.4 Bachelor of Commerce and Bachelor of Science (BComm/BSc)
      2.5 Bachelor of Science and Bachelor of Engineering (BSc/BE)
      2.6 Bachelor of Engineering and Bachelor of Science (BE/BSc)
      2.7 Bachelor of Education (Secondary/Science) and Bachelor of Science (BED(Secondary/Science)/BSc)
      2.8 Bachelor of Education (Secondary/Mathematics) and Bachelor of Science (BED(Secondary/Mathematics)/BSc)
      2.9 Bachelor of Education (Secondary/Science) and Bachelor of Science (BED/Secondary/BSc)
      2.10 Bachelor of Nursing and Bachelor of Science (BN/BSc)
      2.11 Bachelor of Science/Master of Nursing Practice (BSc/MNP)
      2.12 Bachelor of Applied Science (Exercise and Sport Science)/Bachelor of Science (Nutrition)
   3. The degrees in the Faculty of Science offered in conjunction with other faculties shall be:
      3.1 Bachelor of Liberal Studies (BLibStud), which shall incorporate the streams:
      3.1.1 Bachelor of Liberal Studies (International) (BLibStud(International))
      3.1.2 Bachelor of Liberal Studies (Advanced) (BLibStud(Advanced))
      3.2 Bachelor of Arts and Science (BAS)
   Note the specific glossaries attached to each degree, and the generic glossary common to all degrees.

The regulations governing postgraduate award courses can be found at the end of each postgraduate degree chapter.

University of Sydney (Coursework) Rule 2000 (as amended)

The Resolutions in this chapter must be read in conjunction with the University of Sydney (Coursework) Rule 2000 (as amended) which sets out the requirements for all coursework courses, and the relevant Senate Resolutions, which are available in the University Calendar.

The Calendar can also be viewed on the Web at www.usyd.edu.au/publications/calendar/

The University Coursework Rule can be found at the back of this handbook.

Bachelor of Science

[Section 1]

1. Admission
   1.1 All applications for admission to candidature to an undergraduate degree or combined undergraduate degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.
   1.2 A candidate for the BSc degree in any stream may apply to the Dean for permission to transfer candidature to any other stream.

2. Units of study
   2.1 The units of study for the Bachelor of Science are set out under subject areas in Table I and Table VI, together with:
   2.1.1 designation as junior, intermediate, senior or honours and, where appropriate, as advanced units of study
   2.1.2 credit point values
   2.1.3 assumed knowledge, corequisites and prerequisites
   2.1.4 the semesters in which they are offered; and
   2.1.5 the units of study with which they are mutually exclusive.
   2.2 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table I.
   2.3 A student who enrols, in accordance with these resolutions, in a unit or units of study prescribed for a degree other than the Bachelor of Science, shall satisfy the prerequisites, corequisites and other requirements prescribed for such units of study.

3. Requirements for the pass degree
   3.1 Bachelor of Science
   3.1.1 To qualify for the award of the Bachelor of Science, a student shall complete units of study having a total value of at least 144 credit points, including:
   3.1.1.1 at least 96 credit points from Science subject areas;
   3.1.1.2 at least one major from those included in Table I;
   3.1.1.3 at least 12 credit points from the Science subject areas of Mathematics and Statistics;
   3.1.1.4 at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
   3.1.1.5 no more than 60 credit points from Junior units of study.
   3.1.2 A major in the BSc normally requires the completion of a minimum of 24 credit points of senior units of study in one Science area, including any units of study specified in the Table of undergraduate units of study as compulsory for that major.
   3.1.3 A major in Psychology requires 48 credit points across intermediate and senior Psychology subject areas of study including PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or 2013) and PSYC(2114 or 2014). No other intermediate Psychology units can be counted towards the major.
   3.1.3.1 The senior units must include at least one of PSYC3011, 2012, 3013 and 3014.* Note: HPSC3032 Psychology and Psychiatry History and Phil is available for Senior
3.3.4 Students who have completed at least 48 credit points may be permitted to transfer to the BSc (Advanced Mathematics) stream from the BSc or other degree programs if:

3.3.4.1 their mark averaged over all attempted units of study is 75 or greater; and

3.3.4.2 they are able to enrol in the required number of Advanced level units or TSP units.

3.3.5 The testamur for the degree of Bachelor of Science (Advanced Mathematics) shall specify the major(s) completed in order to qualify for the award.

3.4 Other streams of the Bachelor of Science

3.4.1 In order to qualify for the award of the pass degree in the following streams, a student shall, except with the permission of the Dean, complete the requirements for the BSc degree in subsection 3.1 with the exception of 3.1.1.2 and complete the units of study set out in the respective Tables of undergraduate units of study:

3.4.1.1 Marine Science Table IC

3.4.1.2 Molecular Biology and Genetics Table ID

3.4.1.3 Molecular Biotechnology Table IE: or

3.4.1.4 in order to qualify for the award of honours degree in the Nutritional Science, Psychology, or the BSc (Advanced Mathematics) stream from the BSc or other degree programs if:

3.4.2 To qualify to enrol in an honours course, students shall:

3.4.2.1 have qualified for the award of a pass degree; or

3.4.2.2 be a graduate of the Faculty of Science, or

3.4.2.3 be a graduate holding a Bachelor of Science degree or an equivalent qualification from another institution;

3.4.2.4 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course (or equivalent at another institution);

3.4.2.5 have achieved either:

3.4.2.5.1 a credit average in the relevant senior Science units of study; or

3.4.2.5.2 a SCIWAM of at least 60 (or equivalent at another institution); and

3.4.2.6 satisfy any additional criteria set by the Head of Department concerned.

3.5 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in Table VI of undergraduate units of study, as prescribed by the Head of Department concerned.

3.6 The grade of honours and the honours mark are determined by performance in the honours course.

4. Requirements for the honours degree

4.1 There shall be courses in all Science subject areas listed in Table VI (Honours units of study).

4.2 To qualify to enrol in an honours course, students shall:

4.2.1 have qualified for the award of a pass degree; or

4.2.2 be a graduate of the Faculty of Science, or

4.2.3 be a graduate holding a Bachelor of Science degree or an equivalent qualification from another institution;

4.2.4 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course (or equivalent at another institution);

4.2.5 have achieved either:

4.2.5.1 a credit average in the relevant senior Science units of study; or

4.2.5.2 a SCIWAM of at least 60 (or equivalent at another institution); and

4.2.6 satisfy any additional criteria set by the Head of Department concerned.

4.3 Students shall complete the requirements for the honours course full-time over two consecutive semesters.

4.4 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

4.5 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in Table VI of undergraduate units of study, as prescribed by the Head of Department concerned.

4.6 The grade of honours and the honours mark are determined by performance in the honours course.

4.7 Honours in the Bachelor of Science may be awarded in four classes as follows:

4.7.1 Class I (mark range: 80 and above)

4.7.2 Class II(1) (mark range: 75-79)

4.7.3 Class II(2) (mark range: 70-74)

4.7.4 Class III (mark range: 65-69)

4.8 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed by the Dean to be of sufficient merit by the Dean, receive a bronze medal.

4.9 A student may not re-attempt an honours course in a single subject area.

4.10 A student who is qualified to enrol in two honours courses may either:

4.10.1 complete the honours courses in the two subject areas separately and in succession; or

4.10.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas.

4.11 A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

5. Transfer from the Bachelor of Engineering degree

5.1 Bachelor of Science/Bachelor of Engineering double degree

5.1.1 A student enrolled for a Bachelor of Engineering degree may be permitted to transfer to the Faculty of Science to complete...
a BSc degree at the end of Second Year or Third Year in the BE degree if:

5.1.1.1 except as provided in section 4.1.2 of the resolutions of the Bachelor of Engineering degree, all units of study attempted in the BE degree have been completed with a grade of pass or better;

5.1.1.2 at least 96 credit points from units of study in the BE degree have been completed;

5.1.1.3 the student is qualified to enrol in a major in a Science area; and

5.1.1.4 for admission to the Advanced streams, the student satisfies the requirements in subsections 3.2 and 3.3 of the Resolutions of the Faculty of Science relating to the BSc Degree.

5.1.2 Students will be under the supervision of the Faculty of Engineering for the period of BE degree enrolment and under the Faculty of Science for the BSc enrolment and completion.

5.1.3 Units of study must be selected as shown in the Engineering Specialisation Tables for the core components of the chosen Engineering specialisation.

5.1.4 Undergraduate Faculty must be chosen from Table 1 of the Bachelor of Science as shown in the Science Faculty handbook to meet requirements of a Science major.

5.1.5 The Faculty Resolutions (which are reproduced in the Engineering and Science Handbooks, as the case may be) specify:

5.1.5.1 credit point values;

5.1.5.2 corequisites/prerequisites/assumed learning/assumed knowledge; and

5.1.5.3 any special conditions.

5.1.6 To qualify for the award of the pass BSc degree a student shall complete units of study to a value of at least 48 credit points including:

5.1.6.1 42 credit points of intermediate/senior units of study in Science subject areas; and

5.1.6.2 a major in a Science area.

5.1.7 To qualify for the award of the pass degree in the Advanced stream of the BSc a student shall meet the requirements in subsection 3.2.

5.1.7.1 To qualify for the award of the pass degree in the Advanced Mathematics stream of the BSc a student shall meet the requirements in subsection 3.3.

5.1.8 The requirements of subsection 5 must be completed in one year of full-time study or two years of part-time study.

5.1.9 Students who complete at least 42 but less than 48 credit points in the prescribed time limits may in the following year of enrolment in the BE complete the remaining units to satisfy the requirements of the Faculty of Science.

5.1.10 Students who complete less than 42 credit points may apply to be readmitted to the degree, subject to subsections 7.9 of the Resolutions of the Faculty of Science relating to the BSc degree.

5.1.11 Students who are so qualified may undertake an honours course in the BSc in accordance with subsection 4 relating to the BSc degree.

5.1.12 On completion of the requirements of the BSc degree or BSc Honours course, students will be eligible to resubmit their enrolment toward the BE degree according to the Faculty of Engineering resolutions for that degree.

5.1.13 Students may abandon the BSc degree enrolment at any stage and resume their enrolment in the BE degree.

5.1.14 Resolutions covering admission, enrolment restrictions, progression requirements, satisfactory progress, cross-institutional study and assessment criteria for the Engineering component of the double degree are equivalent to those for the BE degree and specialisations, as shown in the Faculty Handbook.

5.1.15 The Deans of the Faculties of Engineering and Science shall jointly exercise authority in any matter concerning the double degree not otherwise dealt with in these resolutions.

[Section 2]

6. Details of units of study

6.1 The units of study for the Bachelor of Science are listed in Table 1 and Table VI of these resolutions.

6.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

6.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

6.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

6.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

6.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

6.4.3 to pass any other examination of the unit of study that may apply.

6.5 All units of study for a particular subject area may not be available every semester.

6.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other undergraduate programs in the Faculty or elsewhere in the University.

7. Enrolment in more/less than minimum load

7.1 A candidate may not enrol in additional units of study once the degree requirements of 144 credit points have been satisfied, without first obtaining permission from the Dean.

7.2 Students may enrol on either a full-time or part-time basis.

8. Cross-institutional study

8.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either:

8.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or

8.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.

9. Restrictions on enrolment

9.1 Units of study which overlap substantially in content are noted in the Tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.

9.2 Where a student enrolls in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.

9.3 A student may not enrol in a unit of study which they have completed previously with a grade of Pass or better.

9.4 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.

10. Discontinuation of enrolment

10.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidacy will be deemed to have discontinued enrolment in the course.

10.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

11. Suspension of candidacy

11.1 A student may seek written permission from the Dean to suspend candidacy in the course.

11.2 Suspension may be granted for a maximum of one year on any one application.

12. Re-enrolment after an absence

12.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

13. Satisfactory progress

13.1 If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

14. Time limit

14.1 A candidate must complete all the requirements for the award of the degree within ten calendar years of admission to candidacy or readmission without credit.

14.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.

14.2 Students shall complete the requirements for the honours course full-time over two consecutive semesters.
14.2.1 If the Faculty is satisfied that a student is unable to attempt the
honours course on a full-time basis and if the Head of
Department concerned so recommends, permission may be
granted to undertake honours half-time over four consecutive
semesters.

15. Assessment policy.
15.1 Students may be tested by written and oral examinations,
exercises, essays or practical work or any combination of these
as the Faculty may determine.

15.2 Where a unit of study is offered at different levels of difficulty,
the performance of students will be matched so that a grade
obtained at one level indicates a quality of work comparable
with that required for the same grade at the other level(s).

15.3 Heads of Department may arrange for further testing in cases
of special consideration, in accordance with Academic Board
policy governing illness and misadventure.

16. Credit.
16.1 Credit will not be granted for units of study completed ten years
or more prior to application, except with the permission of the
Dean.

16.2 Credit may be granted as specific credit if the unit of study is
considered to be directly equivalent to a unit of study in Table I,
or as non-specific credit.

16.3 The total amount of credit granted may not be greater than 96
credit points and may not include more than 48 credit points
of units of study from other degrees for which credit is
therefore not available.

16.4 All students, notwithstanding any credit transfer, must complete
at least 24 credit points of senior Science units of study towards
a major taken at the University of Sydney.

17.1 These resolutions apply to all candidates for the degree
enrolling in units of study after 1 January 2005.

17.2 With the permission of the Faculty of Science, candidates who
first enrolled for the degree prior to 2005 and have not had a
period of suspension or exclusion may until 31 March 2008
choose to qualify for the degree under the old resolutions.

17.3 With the permission of the Faculty of Science, candidates who
first enrolled for the degree as part-time candidates prior to
2005 and have not had a period of suspension or exclusion
may until 31 March 2010 choose to qualify for the degree under
the old resolutions.

18. Glossary for the BSc.
18.1 Completion of a unit of study means that the assessment
requirements have been satisfied and a grade of Pass or better
has been achieved.

18.2 Junior unit of study is a 1000 or first-year stage unit. Its
prerequisites or assumed knowledge are non-tertiary
qualifications and corequisites are other Junior units of study.

18.3 Intermediate unit of study is a 2000 or second-year stage unit. Its
prerequisites or assumed knowledge are Junior or
Intermediate units of study and corequisites are other
intermediate units of study. (Specific to the Faculty of Science).

18.4 Senior unit of study is a 3000 or third-year stage unit. Its
prerequisites or assumed knowledge are Junior, Intermediate
or Senior units of study and corequisites are other Senior units
of study. (Specific to the Faculty of Science.)

18.5 Honours unit of study is a 4000 or fourth-year stage unit offered
within an honours course.

18.6 Advanced unit which generally parallels a
normal unit of study but which provides added breadth of
material and/or sophistication of approach.

18.7 Major in the BSc normally requires the completion of a minimum
of 24 credit points of Senior units of study in one Science area,
including any units of study specified in the Table of
undergraduate units of study as compulsory for that major. A
student may not count a unit of study toward more than one
major. (A major in Psychology requires 48 credit points of
intermediate and senior Psychology units of study including
PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or
2013) and PSYC(2114 or 2014). No other Intermediate
Psychology units can be counted towards the major).

18.8 Dean means the Dean of Science.

18.9 Faculty means the Faculty of Science.

18.10 Science subject area means a defined field of study in science.

18.11 Degree means the degree of Bachelor of Science.

18.12 Requirements means coursework requirements for the award
of the degree of Bachelor of Science.

18.13 Student means a person enrolled as a candidate for the degree
of Bachelor of Science.

18.14 TSP means the Talented Student Program in the Faculty of
Science.

18.15 SCIWAM means the weighted average mark calculated by the
Faculty from the results for all Intermediate and Senior units
of study with a weighting of 2 for intermediate units and 3 for
senior units.

Bachelor of Medical Science

[Section 1]

1. Admission.
1.1 All applications for admission to candidature to an
undergraduate degree or combined undergraduate degree in
the Faculty of Science will be subject to the Undergraduate
Admissions policy of the University of Sydney.

2. Units of study.
2.1 The units of study for the Bachelor of Medical Science are set
out in Table IV together with:

2.1.1 designation as junior, intermediate, senior or honours and,
where appropriate, as advanced units of study
2.1.2 credit point values
2.1.3 assumed knowledge, corequisites and prerequisites
2.1.4 the semesters in which they are offered; and
2.1.5 the units of study with which they are mutually exclusive.

2.2 A student may enrol, in accordance with subsection 3.1.5, in
a unit of study prescribed for a degree other than the Bachelor
of Medical Science and shall satisfy the prerequisites,
corequisites, qualifications and all other requirements prescribed
for such units of study for that other degree.

2.3 The Dean may permit a student of exceptional merit who is
admitted to the Talented Student Program to undertake a unit
or units of study within the Faculty other than those specified
in Table IV.

2.4 There shall be honours units of study in Science subject areas
listed in Table IV D.

3. Requirements for the pass degree.
3.1 In order to qualify for the award of the Bachelor of Medical
Science degree a student shall complete units of study having
a total value of at least 144 credit points, including:

3.1.1 at least 48 credit points from junior units of study, comprising
MBLG1001 and 12 credit points each from Chemistry,
Mathematics and Physics or Computational Science and 6
credit points from Biology;

3.1.2 no more than 60 credit points from junior units of study;

3.1.3 48 credit points of Intermediate core units of study listed in
Table IV;

3.1.4 at least 36 credit points of senior units of study taken from
the subject areas of Anatomy/Histology, Biology (Genetics),
Biochemistry, Cell Pathology, Immunology, Infectious
Diseases, Microbiology, Pharmacology and Physiology;

3.1.5 no more than 12 credit points from units of study other than
Senior units of study.

3.1.6 Units of study taken at the University of Sydney Summer
School which correspond to units of study specified in
subsection 3 may be credited towards the course
requirements.

4. Requirements for the honours degree.
4.1 Students may proceed to an honours course in the Bachelor of
Medical Science.

4.2 In order to qualify to enrol in an honours course, students shall
either:

4.2.1 have qualified for the award of the pass degree; or
4.2.2 be a pass graduate in Medical Science of the Faculty of
Science; or
4.2.3 be a pass graduate holding a Bachelor of Medical Science
degree or an equivalent qualification from another institution;
4.2.4 have completed a minimum of 24 credit points of senior units
of study relating to the intended honours course (or
equivalent at another institution);

4.2.5 have achieved either:
4.2.5.1 a credit average in the relevant Senior Science units
of study; or
4.2.5.2 a SCIWAM of at least 60 (or equivalent at another
institution); and
4.2.5.3 satisfy any additional criteria set by the Head of
Department concerned.

14
8.2.1 until they have gained credit for at least 42 credit points from

8.2.6 Students shall complete the requirements for the course
time full-time over two consecutive semesters.

8.2.6.1 If the Faculty is satisfied that a student is unable to attempt
the honours course on a full-time basis and if the Head of
Department concerned so recommends, permission may be
granted to undertake honours half-time for four
consecutive semesters.

8.3 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in one
subject area from those listed in Table IV D.

8.4 The grade of honours and the honours mark are determined
by performance in the honours course.

4.1 Honours in the Bachelor of Science may be awarded in four
courses as follows:

4.1.1 Class I (mark range: 80 and above)
4.1.2 Class II(1) (mark range: 75-79)
4.1.3 Class II(2) (mark range: 70-74)
4.1.4 Class III (mark range: 65-69)

4.2 A student with an honours mark of 90 or greater in an
honours subject area and a minimum SCIWAM of 80 shall,
deemed to be of sufficient merit by the Dean, receive a
bronze medal.

4.5 A student who is qualified to enrol in two honours courses may either:

4.5.1 complete the honours courses in the two subject areas
separately and in succession; or

4.5.2 complete a joint honours course, equivalent to an honours
course in a single subject area, in the two subject areas.

4.6 A student may not re-attempt an honours course in a single
subject area.

5. Details of units of study

5.1 The units of study for the Bachelor of Medical Science are listed
in Table IV of these resolutions.

5.2 A candidate for the course shall proceed by completing units
of study as prescribed by the Faculty.

5.3 A unit of study shall consist of such lectures, seminars, tutorial
instruction, essays, exercises, practical work, or project work
as may be prescribed.

5.4 In these resolutions, 'to complete a unit of study' or any
derivative expression means:

5.4.1 to attend the lectures and the meetings, if any, for seminars
or tutorial instruction;

5.4.2 to complete satisfactorily the essays, exercises, practical
and project work if any; and

5.4.3 to pass any other examination of the unit of study that may
apply.

5.5 All units of study for a particular subject area may not be
available every semester.

5.6 The Dean may allow substitution of any unit of study by another
unit of study from other undergraduate
programs in the Faculty or elsewhere in the University.

5.7 Cross-institutional study

7.1 Provided that permission has been obtained in advance, the
Dean may permit a student to complete a unit of study at
another institution and have that unit credited to his/her course
requirements if satisfied that either:

7.1.1 the unit of study content is material not taught in any
corresponding unit of study in the University; or

7.1.2 the student is unable for good reason to attend a

7.2 Except with the permission of the Dean, candidates may not

8. Restrictions on enrolment

8.1 Except with the permission of the Dean, candidates may not
enrol in an intermediate core unit of study until they have completed
42 credit points of junior units of study prescribed by
the Faculty.

8.2.1 until they have gained credit for at least 42 credit points from

8.2.2 until they have completed the intermediate units of study
prescribed as prerequisites for the senior unit of study, as
set out in Table IV.

8.2.3 Enrolment in some senior units of study may be subject to
a quota.

8.3 Where a student enrols in a unit of study which is the same as,
or has a substantial amount in common with, a unit of study
previously attempted but not completed satisfactorily, the Head of
Department concerned may exempt the student from certain
requirements of the unit of study requirements if satisfied that
the relevant competence has been demonstrated.

8.4 A student may not enrol in a unit of study which they have
completed previously with a grade of pass or better.

8.5 A candidate may not enrol in units of study having a total value
of more than 30 credit points in a semester.

8.6 In satisfying the requirements of subsection 3.1.3 a student
may not enrol in units of study which overlap substantially in
content with units of study listed in subsection 3.1.4.

8.7 A student may not enrol without first obtaining permission from the
Dean in:

8.7.1 additional units of study once the degree requirements of
144 credit points have been satisfied;

8.7.2 units of study which may not be counted towards the course
requirements.

9. Discontinuation of enrolment

9.1 A student who does not enrol in any semester without first
obtaining written permission from the Dean to suspend
enrolment will be deemed to have discontinued enrolment in the
course.

9.2 Students who have discontinued from the course will be
required to apply for admission to the course and be subject
to admission requirements pertaining at that time.

10. Suspension of candidature

10.1 A student may seek written permission from the Dean to
suspend candidature in the course.

10.2 Suspension may be granted for a maximum of one year on any
one application.

11. Re-enrolment after an absence

11.1 A student who plans to re-enrol after a period of suspension
must advise the Faculty of Science Office in writing of their
intention by no later than the end of October for First Semester of
the following year or the end of May for Second Semester of
the same year.

12. Satisfactory progress

12.1 If a student fails or discontinues enrolment in one unit of study
twice, a warning will be issued that if the unit is failed a third
time, the student may be asked to show good cause why he
or she should be allowed to re-enrol in that unit of study.

13. Time limit

13.1 A candidate must complete all the requirements for the award
of the degree within ten calendar years of admission to
candidature or readmission without credit.

13.1.1 If a candidate is readmitted with credit, the Faculty will
determine a reduced time limit for completion of the degree.

14. Assessment policy

14.1 Students may be tested by written and oral examinations,
exercises, essays or practical work or any combination of these
as the Faculty may determine.

14.2 Where a unit of study is offered at different levels of difficulty,
the performance of students will be matched so that a grade
obtained at one level indicates a quality of work comparable
with that required for the same grade at the other level(s).

14.3 Heads of Department may arrange for further testing in cases
of special consideration, in accordance with Academic Board
policy governing illness and misadventure.

15. Credit transfer policy

15.1 Credit will not be granted for units of study completed nine
years or more prior to application, except with the permission
of the Dean.

15.2 Credit may be granted as specific credit if the unit of study is
considered to be directly equivalent to a unit of study in Tables
I or IV, or as non-specific credit.

15.3 The total amount of credit granted may not be greater than 96
credit points and may not include more than 48 credit points
of units of study from other degrees for which credit is
maintained or a degree has been conferred.

15.4 All students, notwithstanding any credit transfer, must complete
at least 36 credit points of senior Science units of study in accordance
with subsection 3.1.4.
16. Candidates enrolled before 2005

16.1 These Resolutions apply to all candidates for the degree enrolling in units of study after 1 January 2005.

16.2 With the permission of the Faculty of Science, candidates who first enrolled for the degree prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2008 choose to qualify for the degree under the old resolutions.

16.3 With the permission of the Faculty of Science, candidates who first enrolled for the degree as part-time candidates prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2010 choose to qualify for the degree under the old resolutions.

17. Specific glossary for the Bachelor of Medical Science

17.1 AAM means the average mark over all units of study attempted in a given academic year (equivalent to the calendar year).

17.2 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of pass or better has been achieved.

17.3 Intermediate unit of study is of second-year (2000) level. Its prerequisites or assumed knowledge are junior or intermediate units of study and corequisites are other intermediate units of study.

17.4 Senior unit of study is of third-year (3000) level. Its prerequisites or assumed knowledge are junior, intermediate or senior units of study and corequisites are other senior units of study.

17.5 Honours unit of study is a 4000 level unit offered within an honours course.

17.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.

17.7 Dean means the Dean of Science.

17.8 Faculty means the Faculty of Science.

17.9 Degree means the Bachelor of Medical Science.

17.10 Requirements means coursework requirements for the award of the degree of Bachelor of Medical Science.

17.11 Student means a person enrolled as a candidate for the degree of Bachelor of Medical Science.

17.12 TSP means the Talented Student Program in the Faculty of Science.

17.13 SCIWAM means the weighted average mark calculated by the Faculty from the results for all intermediate and senior units of study with a weighting of 2 for intermediate units and 3 for senior units.

Bachelor of Psychology

[Section 1]

1. Admission

1.1 All applications for admission to candidature to an undergraduate degree or combined undergraduate degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.

2. Units of study

2.1 The units of study, which may be taken for the degree, are set out under subject areas in Table 1 together with:

2.1.1 designation as junior, intermediate, senior or honours and, where appropriate, as advanced units of study

2.1.2 credit point values

2.1.3 assumed knowledge, corequisites and prerequisites

2.1.4 the semesters in which they are offered; and

2.1.5 the units of study with which they are mutually exclusive.

2.2 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table I.

2.3 A student who enrols, in accordance with these resolutions, in a unit or units of study prescribed for a degree other than the Bachelor of Psychology, shall satisfy the prerequisites, corequisites and other requirements prescribed for such units of study.

3. Requirements for the degree

3.1 To qualify for the award of the Bachelor of Psychology degree a student shall:

3.1.1 complete units of study having a total value of at least 192 credit points where:

3.1.1.1 at least 12 credit points are from Junior units of study in the Science subject area of Psychology, with an average grade of credit or better;

3.1.1.2 at least 54 credit points are from Intermediate and Senior units of study in the Science subject area of Psychology.

3.1.1.2.1 24 credit points are from Intermediate units of study PSYC2011 or 2111, PSYC2012 or 2112, PSYC3013 or 2113 and PSYC2014 or 2114 with an average grade of Distinction or better.

3.1.1.2.2 At least 30 credit points are from senior units of study in the Science subject area of Psychology which must include PSYC3010 and at least one of PSYC3011, 3012, 3013 and 3014. Except with the permission of the Faculty, the senior units must be completed with an average grade of Distinction or better. Note: HPSC3023 Psychology and Psychiatry; History and Phil is available for Senior Psychology students and will count towards a major in Psychology. Successful completion of this unit of study is essential for students intending to take the Theoretical Thesis option in Psychology Honours.

3.1.1.2.3 Candidates who fail to maintain the required average in Psychology units will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Psychology candidates.

3.1.1.2.4 Candidates who fail to achieve the required average in Psychology units in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science;

3.1.1.3 at least 96 credit points are from Science subject areas;

3.1.1.4 at least 12 credit points are from the Science subject areas of Mathematics and Statistics;

3.1.1.5 at least 12 credit points are Junior units of study from Science subject areas other than Psychology and Mathematics and Statistics; and

3.1.1.6 no more than 60 credit points are from Junior units of study;

3.1.2 complete 48 credit points from fourth year (honours) units of study in the Science subject area of Psychology with a grade of honours.

3.1.3 A maximum of 48 credit points may be counted towards the degree requirements from units of study offered by faculties other than the Faculty of Science.

3.1.4 Units of study completed at the University of Sydney Summer School which correspond to units of study specified in subsections 2 and 3.1.3 may be credited towards the course requirements.

3.2 Students shall complete the requirements for the honours course full-time over two consecutive semesters.

3.3 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

3.4 The grade of honours and the honours mark are determined by performance in the honours course.

3.5 A student with an honours mark of 90 or greater and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.

3.6 A student may not re-attempt the Psychology honours course.

[Section 2]

4. Details of units of study

4.1 The units of study for the Bachelor of Psychology are listed in Table 1 of the resolutions of the Bachelor of Science.

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
to pass any other examination of the unit of study that may apply.

All units of study for a particular subject area may not be available every semester.

The Dean may allow substitution of any unit of study by another unit of study, including units of study from other undergraduate programs in the Faculty or elsewhere in the University.

Enrolment in more/less than minimum load

A candidate may not enrol in additional units of study once the degree requirements of 192 credit points have been satisfied, without first obtaining permission from the Dean.

Students may enrol on either a full-time or part-time basis.

Cross-institutional study

Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either:

the unit of study content is material not taught in any corresponding unit of study in the University; or

the student is unable for good reason to attend a corresponding unit of study at the University.

Restrictions on enrolment

Units of study which overlap substantially in content are noted in the Tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.

Where a student enrolls in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.

A student may not enrol in a unit of study which they have completed previously with a grade of Pass or better.

A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.

Discontinuation of enrolment

A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

Suspension of candidature

A student may seek written permission from the Dean to suspend candidature in the course.

Suspension may be granted for a maximum of one year on any one application.

Re-enrolment after an absence

A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

Satisfactory progress

If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Time limit

A candidate must complete all the requirements for the award of the degree within ten calendar years of admission to candidature or readmission without credit.

If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.

Assessment policy

Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.

Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same grade at the other level(s).

Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.

Credit transfer policy

Credit will not be granted for units of study completed ten years or more prior to application, except with the permission of the Dean.

Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Table I or as non-specific credit.

The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units from other degrees for which credit is maintained or a degree has been conferred.

All students, notwithstanding any credit transfer, must complete at least 30 credit points of Senior Psychology units at the University of Sydney.

Candidates enrolled before 2005

These Resolutions apply to all candidates for the degree requiring enrolment in units of study prior to 2005 and have not had a period of suspension or exclusion until 31 March 2010 choose to qualify for the degree under the old resolutions.

Glossary for the Bachelor of Psychology

Completion of a unit of study means that the assessment requirements have been satisfied and a grade of Pass or better has been achieved.

Junior unit of study is a 1000 or first-year stage unit. Its prerequisites or assumed knowledge are non-tertiary qualifications and corequisites are other Junior units of study.

Intermediate unit of study is a 2000 or second-year stage unit. Its prerequisites or assumed knowledge are Junior or Intermediate Psychology units of study and corequisites are other Intermediate units of study. (Specific to the Faculty of Science.)

Senior unit of study is a 3000 or third-year stage unit. Its prerequisites or assumed knowledge are Junior, intermediate or senior units of study and corequisites are other senior units of the study. (Specific to the Faculty of Science.)

Honours unit of study is a 4000 or fourth-year stage unit offered within an honours course.

Advanced unit of study is a unit which generally parallels a normal unit of study but which provides an added breadth of material and/or sophistication of approach.

Major in the Faculty of Science normally requires the completion of a minimum of 24 credit points of senior units of study in one Science area, including any units of study specified in the Tables of undergraduate units of study as compulsory for that major.

A student may not count a unit of study toward more than one major. (A major in Psychology within the Bachelor of Psychology requires 54 credit points of Intermediate and Senior Psychology units of study including PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or 2013) and PSYC(2114 or 2014). No other Intermediate Psychology units can be counted towards the major).

Dean means the Dean of Science.

Faculty means the Faculty of Science.

Degree means the Bachelor of Psychology.

Requirements means coursework requirements for the award of the degree of Bachelor of Psychology.

Student means a person enrolled as a candidate for the degree of Bachelor of Psychology.

TSP means the Tented Student Program in the Faculty of Science.

SCIWAM means the weighted average mark calculated by the Faculty from the results for all Intermediate and Senior units of study with a weighting of 2 for Intermediate units and 3 for Senior units.

Bachelor of Science and Technology [Section 1]

Admission

All applications for admission to candidature to an undergraduate degree or combined undergraduate degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.
2. Undergraduate degree regulations

2. Units of study

2.1 The units of study available for the Bachelor of Science and Technology are set out together with:

2.1.1 Units of study listed in Table I, Table III and Table VII in the Handbook of the Faculty of Science, excluding all units with INFS codes.

2.1.2 Units of study listed in Table A in the Handbook of the Faculty of Arts.

2.1.3 Units of study in Legal Studies units listed as available for study in the Bachelor of Arts and Sciences offered by the Faculty of Arts.

2.1.4 Units of study completed at the University of Sydney Summer or Winter School which correspond to units of study specified in 2.1.1 and 2.1.2 above.

2.1.5 These units of study are listed as in subsections 2.1.1 to 2.1.3, together with:

2.1.5.1 designation as junior, intermediate, senior or honours; and

2.1.5.2 credit point values

2.1.5.3 assumed knowledge, corequisites and prerequisites

2.1.5.4 the semesters in which they are offered; and

2.1.5.5 the units of study from which they are mutually exclusive.

2.2 With the permission of the Dean of Science, candidates may count towards the degree a maximum of 36 credit points not specified in subsections 3.1 to 3.1.6.1 but from within the University.

2.3 A student who enrols, in accordance with these resolutions, in a unit or units of study prescribed for a degree other than the Bachelor of Science and Technology, shall satisfy the prerequisites, corequisites and other requirements prescribed for such units of study.

3. Requirements for the pass degree

3.1 To qualify for the award of the pass degrees a student shall complete 144 credit points comprising:

3.1.1 a minimum of 12 credit points from the Science subject areas of Mathematics and Statistics;

3.1.2 a minimum of 12 credit points in Experimental Science units of study from those specified in Table VIII in the Handbook of Faculty of Science;

3.1.3 a minimum of 12 credit points in Science/Technology associated Humanities and Social Sciences units of study from those specified in Table VIIc in the Handbook of Faculty of Science;

3.1.4 a minimum of 12 credit points in Technology/Applied Science units of study from those specified in Table VIIId in the Handbook of Faculty of Science;

3.1.5 a minimum of 72 credit points in senior or intermediate units of study, in units of study normally taken at second or third year level or higher;

3.1.6 a major in the Faculty of Science specified in Table I or a major from the list of majors in Table VIIe in the Handbook of Faculty of Science.

3.1.6.1 A major in the BST requires a minimum of 36 credit points at 2000 and 3000 level including a minimum of 12 credit points at 3000 level except in the case of a major in a Science area which normally requires the completion of 24 credit points of senior units of study, in addition to any other units of study specified in the table as compulsory for that major.

3.7 The courses for the degree of Bachelor of Science and Technology shall specify the major(s) completed.

3.8 Notwithstanding 3.1.6 above, where, in exceptional circumstances arising from prerequisites or other restrictions in certain discipline areas, a student is unable to complete the formal requirements of a major in the normal course of the degree but is nevertheless able to demonstrate depth of study in a specified discipline area within a faculty by the completion of a total of 36 intermediate and senior credit points including at least 12 senior credit points in a Faculty of Science, Faculty of Architecture or Faculty of Engineering discipline area, the Dean of Science may, on application from the student and a recommendation from the Head of Department, permit the student to graduate without a major. In such circumstances no major shall be specified on the transcript.

4. Requirements for honours degree

4.1 There shall be honours courses in all Science subject areas listed in Table VI (Honours units of study).

4.2 To qualify to enrol in an honours course, students shall:

4.2.1 have qualified for the award of a pass degree; or

4.2.2 be a pass graduate of the Faculty of Science; or

4.2.3 be a pass graduate holding a Bachelor of Science and Technology degree or an equivalent qualification from another institution.

4.2.4 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course (or equivalent at another institution); and

4.2.5 have achieved either:

4.2.5.1 a credit average in the relevant senior Science units of study; or

4.2.5.2 a SCIWAM of at least 60 (or equivalent at another institution); and

4.2.5.3 satisfy any additional criteria set by the Head of Department concerned.

4.3 Students shall complete the requirements for the honours course full-time over two consecutive semesters.

4.4 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

4.5 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in the Table of undergraduate units of study, as prescribed by the Head of Department concerned.

4.6 The grade of honours and the honours mark are determined by performance in the honours course.

4.7 Honours in the Bachelor of Science may be awarded in four classes as follows:

4.7.1 Class I (mark range: 80 and above)

4.7.2 Class II(1) (mark range: 75-79)

4.7.3 Class II(2) (mark range: 70-74)

4.7.4 Class III (mark range: 65-69)

4.8 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed by the Dean of Science to be of sufficient merit by the Dean, receive a bronze medal.

4.9 A student may not re-attempt an honours course in a single subject area.

4.10 A student who is qualified to enrol in two honours courses may either:

4.10.1 complete the honours courses in the two subject areas separately and in succession; or

4.10.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas.

4.11 A joint honours course shall comprise parts of such two honours courses as may be decided by the Dean.

[Section 2]

5. Details of units of study

5.1 The units of study for the Bachelor of Science and Technology are listed in subsection 2 of these resolutions.

5.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

5.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

5.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

5.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

5.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

5.4.3 to pass any other examination of the unit of study that may apply.

5.5 All units of study for a particular subject area may not be available every semester.

5.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other undergraduate programs in the Faculty or elsewhere in the University.

6. Enrolment in more/less than minimum load

6.1 A student may not enrol without first obtaining permission from the Dean of Science in additional units of study once the degree requirements of 144 credit points have been satisfied.

6.2 A student may not enrol in units of study having a total value of more than 30 credit points in a semester.

6.3 Students may enrol on either a full-time or part-time basis.
1. Admission
1.1 All applications for admission to candidature to an undergraduate degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.

2. Units of study
2.1 The units of study, which may be taken for the degree, are set out in Table I of units of study for the Bachelor of Science, in Table III for Bachelor of Computer Science & Technology and Table VII for the Bachelor of Information Technology and in the Tables of undergraduate units of study for the Bachelor of Arts, Bachelor of Engineering and Bachelor of Architecture.

3. Cross-institutional study
7.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either:
7.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
7.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.

4. Restrictions on enrolment
8.1 Units of study which overlap substantially in content are noted in Table I of units of study for the Bachelor of Science, in Table III for Bachelor of Computer Science & Technology and Table VII for the Bachelor of Information Technology and in the Tables of undergraduate units of study for the Bachelor of Arts, Bachelor of Engineering and Bachelor of Architecture.

8.1.1 Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.

8.2 Where a student enrols in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.

8.3 A student may not enrol in a unit of study which they have completed previously with a grade of Pass or better.

8.4 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.

9. Discontinuation of enrolment
9.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

9.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

10. Suspension of candidature
10.1 A student may, with written permission from the Dean, suspend candidature in the course.

10.2 Suspension may be granted for a maximum of one year on any one application.

11. Re-enrolment after an absence
11.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

12. Satisfactory progress
12.1 If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

13. Time limit
13.1 A candidate must complete all the requirements for the award of the degree within ten calendar years of admission to candidature or readmission without credit.

13.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.

14. Assessment policy
14.1 Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.

14.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same grade at the other level(s).

14.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.

15. Credit transfer policy
15.1 Credit will not be granted for units of study completed more than nine years prior to application, except with the permission of the Dean of Science.

15.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study from Table I, Table III or from Table VII or as non-specific credit.

15.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units from other degrees for which credit is maintained or a degree has been conferred.

15.4 Except as provided by subsection 3.8, all students, notwithstanding any credit transfer, must complete a major at the University of Sydney from the list of majors in Table VII in the Handbook of Faculty of Science.

16. Supervision
16.1 Students shall be under the supervision of the Faculty of Science.

16.2 The Dean of the Faculty of Science shall exercise authority in any matter concerning the degree program not otherwise dealt with in the Resolutions of the Senate or Faculty.

17. Glossary for the BST
17.1 Completion of a unit of study means that the assessment requirements provided for the course have been satisfied and a grade of Pass or better has been achieved.

17.2 Junior unit of study is a 1000 or first-year stage unit. Its prerequisites or assumed knowledge are non-tertiary qualifications and corequisites are other junior units of study.

17.3 Intermediate unit of study is a unit with a weightings of 2 for intermediate units and 3 for senior units of study.

17.4 Major in the BST is a 3000 or third-year stage unit. Its prerequisites or assumed knowledge are junior or intermediate units of study and corequisites are other major units of study.

17.5 Honours unit of study is a 4000 or fourth-year stage unit offered within an honours course.

17.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.

17.7 Major in the BST normally requires a minimum of 36 credit points at 3000 level including a minimum of 12 credit points at 3000 level except in the case of a major in a Science area which normally requires the completion of 24 credit points of senior units of study, in addition to any other units of study specified in the table as compulsory for that major.

17.8 A student may not count a unit of study toward more than one major. (A major in Psychology requires 48 credit points of Intermediate and Senior Psychology units of study including PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or 2013) and PSYC(2114 or 2014). No other Intermediate Psychology units can be counted towards the major).

17.9 Dean means the Dean of Science.

17.10 Faculty means the Faculty of Science.

17.11 Science subject area means a defined field of study in science.

17.12 Degree means the degree of Bachelor of Science and Technology.

17.13 Requirements means coursework requirements for the award of the degree of Bachelor of Science or Bachelor of Arts.

17.14 Student means a person enrolled as a candidate for the degree of Bachelor of Science and Technology.

17.15 SCIWAM means the weighted average mark calculated by the Faculty from the results for all intermediate and senior units of study with a weighting of 2 for intermediate units and 3 for senior units.

Bachelor of Information Technology

[Section 1]

1. Admission
1.1 All applications for admission to candidature to an undergraduate degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.

2. Units of study
2.1 The units of study, which may be taken for the degree, are set out in Table III and the Tables of units of study associated with the degrees of BSc, BA, BEc, and BE, all of which tables indicate:

2.1.1 designation as Junior, Intermediate, Senior or Honours and, where appropriate, as advanced units of study
2. Undergraduate degree regulations

2.1 Requirements for the Bachelor of Information Technology

2.1.1 To qualify for the award of the degree a student shall complete units of study having a total value of at least 180 credit points, of which at least 72 credit points are from units which have codes in Table IIIA.

2.1.2 Credit point values

2.1.3 Assumed knowledge, corequisites and prerequisites

2.1.4 The semesters in which they are offered:

2.1.5 The units of study with which they are mutually exclusive.

2.2 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table IIIA.

2.3 A student who enrolls, in accordance with these resolutions, in a unit or units of study prescribed for a degree other than the Bachelor of Information Technology, shall satisfy the prerequisites, corequisites and other requirements prescribed for such units of study.

3. Requirements for the pass degree

3.1 To qualify for the award of the degree a student shall complete units of study having a total value of at least 180 credit points, of which at least 72 credit points are from units which have codes in Table IIIA.

3.1.1 At least 144 credit points are from Table III, including:

3.1.2 At least 24 credit points from III(i) with average results of credit or better;

3.1.3 At least 72 credit points from III(iv) and/or III(v);

3.1.4 Either INFO4990 or INFO(4991 and 4992); and

3.1.5 At least 18 credit points are from the Science subject areas of Mathematics and/or Statistics;

3.1.6 At least 36 credit points are from units which have codes starting other than INFO, COMP, ISYS, MULT, NETS, SOFT;

3.1.7 At most 72 credit points are from Junior units; and

3.1.8 At least 84 credit points are from Senior and/or Honours units.

3.2 Candidates who fail to maintain the required credit average in Table III(I) units will not be permitted tograduate for the Bachelor of Information Technology degree in the next year of enrolment with full credit for the units of study completed as Bachelor of Information Technology candidates.

3.3 Candidates who fail to achieve the required credit average in Table III(I) units in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Computer Science and Technology.

3.4 A major in the Bachelor of Information Technology normally requires the completion of 24 credit points of Senior and/or honours units of study, together with other Junior and Intermediate units, as specified in Table II(A), except that any unit of study listed may be replaced by another unit which is mutually exclusive with it, for example, an Advanced equivalent:

3.4.1 A major in Computer Science - all units listed in Table IIA(i) as core, and at least 6 credit points from units listed as electives;

3.4.2 A major in Information Systems - all units listed in Table IIA(ii) as core, and at least 6 credit points from units listed as electives;

3.4.3 A major in Multimedia Technology - all units listed in Table IIIA(iii) as core, and at least 12 credit points from units listed as electives;

3.4.4 A major in Networks and Systems - all units listed in Table IIIA(iv) as core, and at least 6 credit points from units listed as electives;

3.4.5 A major in Software Development - all units listed in Table IIIA(v) as core, and at least 6 credit points from units listed as electives;

3.4.6 A major in Digital Design - all units listed in Table IIIA(vi) as core, and at least 12 credit points from units listed as electives;

3.4.7 A major in Computational Science - all units listed in Table IIIA(vii) as core and at least 12 credit points from units listed as electives;

3.4.8 A major in Language Technology - all units listed in Table IIIA(viii) and 4 credit points from units listed as electives.

3.5 It is not necessary to complete the requirements of any major in order to qualify for the award of the degree.

3.6 Units of study completed at the University of Sydney Summer School which correspond to units of study specified in Section 4 may be credited towards the course requirements.

3.7 The testamur for the degree of Bachelor of Information Technology shall specify the major(s) completed in the degree.

4. Requirements for the Bachelor of Information Technology (Honours) degree

4.1 There shall be an honours degree associated with the Bachelor of Information Technology.

4.2 Entry into the honours degree is only by transfer from the BIT.

4.3 To qualify to transfer into the Bachelor of Information Technology (Honours) degree, students shall:

4.3.1 have completed at least 144 credit points from the Bachelor of Information Technology degree or equivalent at another institution;

4.3.2 have completed a minimum of 24 credit points of units of study from Table IIIA(v) and/or IIIA(v) associated with the degree of Bachelor of Information Technology or the equivalent at another institution;

4.3.3 have achieved either a credit average in the relevant units of study used to satisfy 4.3.2 above, or a SCIWAM of at least 60; and

4.3.4 satisfy any additional criteria set by the Head of Department concerned.

4.4 Once enrolled in the BIT (Honours) course, students shall complete the requirements for the honours course full-time, over two consecutive semesters.

4.5 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

4.6 To qualify for the award of the Bachelor of Information Technology (Honours) degree, students shall complete 192 credit points as outlined in sub-section 3, including at least 42 credit points from honours level units, including INFO4991, INFO4992 and INFO4999, with a result of at least 65 in INFO4999.

4.7 The degree of Bachelor of Information Technology (Honours) shall recognise the same majors as the BIT.

4.8 The testamur shall specify the major(s) completed in qualifying for the award. These majors will be noted independently from the grade of honours awarded.

4.9 The grade of honours and the honours mark are determined by performance in all Honours level units attempted.

4.10 Honours in the Bachelor of Information Technology may be awarded in the following four classes as follows:

4.10.1 Class I (mark range: 80 and above)

4.10.2 Class II(1) (mark range: 75-79)

4.10.3 Class II(2) (mark range: 70-74)

4.10.4 Class III (mark range: 65-69)

4.11 A student with an honours mark of 90 or greater and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.

4.12 A student may not re-attempt the Bachelor of Information Technology (Honours) course. However, students who fail to meet the requirements for the award of honours and who have not already satisfied the requirements of the BIT may elect to transfer back to the BIT. A student who does not meet the requirements for the award of honours and who has completed the requirements of the BIT shall graduate with the BIT degree.

4.13 A student who is qualified to enrol in two honours courses may either:

4.13.1 complete the honours courses in the two subject areas separately and in succession;

4.13.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas.

4.13.3 A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

[Section 2]

5. Details of units of study

5.1 The units of study for the Bachelor Information Technology are listed in Table III of these resolutions.

5.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

5.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

5.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

5.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

5.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

5.4.3 to pass any other examination of the unit of study that may apply.
5.5 All units of study for a particular subject area may not be available every semester.
5.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other undergraduate programs in the Faculty or elsewhere in the University.
6. Enrolment in more/less than minimum load
6.1 A candidate may not enrol without first obtaining permission from the Dean in addition of units of study once the degree requirements of 192 credit points have been satisfied.
6.2 Students may enrol on either a full-time or part-time basis.
7. Cross-institutional study
7.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either:
7.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
7.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.
8. Restrictions on enrolment
8.1 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.
8.2 Units of study which overlap substantially in content are noted in the Tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.
8.3 Where a student enrols in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.
8.4 A student may not enrol in a unit of study which they have completed previously with a grade of pass or better.
9. Discontinuation of enrolment
9.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
9.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.
10. Suspension of candidature
10.1 A student may seek written permission from the Dean to suspend enrolment in the course.
10.2 Suspension may be granted for a minimum of one year on any one application.
11. Re-enrolment after an absence
11.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.
12. Satisfactory progress
12.1 If a student fail or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.
13. Time limit
13.1 A candidate must complete all the requirements for the award of the degree within ten calendar years of admission to candidature or readmission without credit.
13.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.
14. Assessment policy
14.1 Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.
14.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same grade at the other level(s).
14.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.
15. Credit transfer policy
15.1 Credit will not be granted for units of study completed more than ten years prior to application, except with the permission of the Dean.
15.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Table III, or as non-specific credit.
15.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units from other degrees for which credit is maintained or a degree has been conferred.
15.4 All students, notwithstanding any credit transfer, must complete at least 48 credit points of units from Table III(v) and/or III(v) at the University of Sydney.
16. Candidates enrolled before 2005
16.1 These Regulations apply to all candidates for the degree of Bachelor of Information Technology, who were enrolled in the Bachelor of Information Technology degree before 2005 and have not had a period of suspension or exclusion may until 31 March 2008 choose to qualify for the degree under the old regulations.
16.2 With the permission of the Faculty of Science, candidates who first enrolled for the degree prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2010 choose to qualify for the degree under the old resolutions.
17. Transfer between the BIT and other degrees
17.1 Students who have completed at least 48 credit points may be permitted to transfer to the Bachelor of Information Technology degree from other degree programs, if their mark averaged over all attempted units of study is 70 or greater.
17.2 A quota may apply to the number of students allowed to transfer into the BIT in a given calendar year.
17.3 Students enrolled in the Bachelor of Information Technology who have satisfied the requirements of the BSc, BSc (Adv), BCST or BCST (Adv) degrees, or with permission of the Dean, may elect to discontinue their enrolment in the Bachelor of Information Technology degree and graduate with the BSc, BSc (Adv), BCST or BCST (Adv) degree, as appropriate.
18. Specific glossary for the BIT
18.1 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of pass or better has been achieved.
18.2 Junior unit of study is a 1000 or first-year stage unit.
18.3 Intermediate unit of study is a 2000 or second-year stage unit.
18.4 Senior unit of study is a 3000 or third-year stage unit.
18.5 Honours unit of study is a 4000 or fourth-year stage unit offered within an honours course.
18.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.
18.7 Dean means the Dean of Science.
18.8 Faculty means the Faculty of Science.
18.9 Science subject area means a defined field of study in science.
18.10 Degree means the Bachelor of Information Technology.
18.11 Requirements means coursework requirements for the award of the degree of Bachelor of Information Technology.
18.12 Student means a person enrolled as a candidate for the degree of Bachelor of Information Technology.
18.13 TSP means the Talented Student Program in the Faculty of Science.
18.14 SCIWAM means the weighted average mark calculated by the Faculty from the results for all intermediate and senior units of study with a weighting of 2 for intermediate units and 3 for senior units.

Bachelor of Computer Science and Technology

[Section 1]

1. Admission
1.1 All applications for admission to candidature to an undergraduate degree or combined degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.
1.2 A candidate for the BCST degree in the advanced stream may apply to the Dean for permission to transfer candidature to the BCST.
2. Undergraduate degree regulations

1.3 The testamur for the degree of BCST shall specify the stream for which it is awarded.

2. Units of study

2.1 The units of study, which may be taken for the degree, are those that may be taken for the degree of Bachelor of Information Technology, the tables for which indicate:

2.1.1 designation as Junior, Intermediate, Senior or Honours and, where appropriate, as advanced units of study
2.1.2 credit point values
2.1.3 assumed knowledge, corequisites and prerequisites
2.1.4 the semesters in which they are offered; and
2.1.5 the units of study with which they are mutually exclusive.

2.2 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table III.

2.3 A student who enrolls, in accordance with these resolutions, in a unit or units of study prescribed for a degree other than the Bachelor of Information Technology, shall satisfy the prerequisites, corequisites and other requirements prescribed for such units of study.

3. Requirements for the pass degree

3.1 Bachelor of Computer Science and Technology

3.1.1 To qualify for the award of the BCST degree a student shall complete units of study having a total value of at least 144 credit points, of which:

3.1.1.1 at least 36 credit points are from Table III associated with the degree of Bachelor of Information Technology, including:
3.1.1.2 at least 24 credit points from III(i)
3.1.1.3 at least 36 credit points from III(v) and/or III(vii); and
3.1.1.4 at least 24 credit points from Table III(v)
3.1.1.5 at least 18 credit points are from the Science subject areas of Mathematics and/or Statistics;
3.1.1.6 at least 36 credit points are from units which have codes starting other than INFO, COMP, ISIS, MULT, NETS, SOFT;
3.1.1.7 at most 72 credit points are from junior units of study.
3.1.2 A major in an Information Technology subject area requires completion of units of study as specified in Table IIIA associated with the degree of Bachelor of Information Technology.
3.1.3 The testamur for the degree of BCST shall specify any majors completed.
3.1.4 Units of study completed at the University of Sydney Summer School which correspond to units of study specified in Section 7 may be credited towards the course requirements.

3.2 Bachelor of Computer Science and Technology (Advanced)

3.2.1 To qualify for the award of the pass degree in the BCST(Advanced) stream, a student shall complete the requirements for the BCST degree in sub-sections 3.1.1 to 3.1.1.7 so that except with the permission of the Dean;
3.2.1.1 they have completed at least 12 credit points of Intermediate units of study from Table III(i) and/or III(ii) which are at either the Advanced level or as TSP units;
3.2.1.2 they have completed at least 24 credit points from Table III(v) and/or III(vii) at either the Advanced level or the Honours level or as TSP units;
3.2.1.3 they have completed at least 48 credit points from senior or honours units of study; and
3.2.1.4 they have maintained in intermediate and senior units of study an average mark of 65 or greater in each year of enrolment;
3.2.2 Candidates who fail to maintain the required credit average will be transferred to candidature for the Bachelor of Computer Science and Technology degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Computer Science and Technology (Advanced) candidates.
3.2.3 Candidates who fail to achieve a credit average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Computer Science and Technology.
3.2.4 Students who have completed at least 48 credit points may be permitted to transfer to the BCST (Advanced) stream from the BCST if:
3.2.4.1 their mark averaged over all attempted units of study is 75 or greater; and
3.2.4.2 they are able to enrol in the required number of Advanced level units or TSP units.

4. Requirements for the Honours degree

4.1 There shall be honours courses in Computer Science and Information Systems. With permission of the Dean, candidates may be allowed to complete an honours course available in the Faculties of Science, Arts or Economics and Business, provided that the candidate's plan of study is appropriate for the degree.

4.2 To qualify to enrol in an honours course, students shall:
4.2.1 have qualified for the award of the BCST degree; or
4.2.2 be a pass graduate of the Faculty of Science; or
4.2.3 be a pass graduate holding a degree equivalent to the BCST degree from another institution;
4.2.4 have completed a minimum of 24 credit points of units of study from Table III(v) and/or III(vii) associated with the degree of Bachelor of Information Technology (or equivalent at another institution);
4.2.5 have achieved either a credit average in the relevant units of study used to satisfy subsection 4.2.4 above, or a SCIWAM of at least 60; and
4.2.6 satisfy any additional criteria set by the Head of Department concerned.

4.3 Students shall complete the requirements for the honours course full-time over two consecutive semesters.

4.4 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

4.5 To qualify for the award of an honours degree, students shall complete while enrolled in an honours course, 48 credit points of units of study at honours level, of which at least 42 credit points must be from honours units listed in Tables III(iii) and III(v), including INFO4991, INFO4992 and INFO4999.

4.6 The grade of honours and the honours mark are determined by performance in the honours course.

4.7 Honours in the Bachelor of Science may be awarded in four classes as follows:
4.7.1 Class I (mark range: 80 and above)
4.7.2 Class II(1) (mark range: 75-79)
4.7.3 Class II(2) (mark range: 70-74)
4.7.4 Class III (mark range: 65-69)
4.8 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.
4.9 A student may not re-attempt an honours course in a single subject area.
4.10 A student who does not meet the requirements for the award of honours, and who entered the honours course under clause 4.2.1, shall graduate with the BCST degree.
4.11 A student who is qualified to enrol in two honours courses may either:
4.11.1 complete the honours courses in the two subject areas separately and in succession; or
4.11.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas.
4.12 A joint honours course shall comprise such parts of the twohonours courses as may be decided by the Dean.

[Section 2]

5. Details of units of study

5.1 The units of study for the Bachelor of Science and Technology are listed in Table III of the resolutions of the Bachelor of Information Technology.

5.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

5.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, exercises, essays, practical work, or project work as may be prescribed.

5.4 In these resolutions to complete a unit of study or any derivative expression means:

5.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
5.4.2 to complete satisfactorily the exercises, practical and project work if any; and
5.4.3 to pass any other examination of the unit of study that may apply.
5.5 All units of study for a particular subject area may not be available every semester.
5.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other undergraduate programs in the Faculty or elsewhere in the University.
6. Enrolment in more than minimum load
6.1 A candidate may not enrol without first obtaining permission from the Dean in additional units of study once the degree requirements of 144 credit points have been satisfied.
6.2 Students may enrol on either a full-time or part-time basis.
7. Cross-institutional study
7.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements if the unit is offered either:
7.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
7.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.
8. Restrictions on enrolment
8.1 Units of study which overlap substantially in content are noted in the Tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.
8.2 Where a student enrolls in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.
8.3 A student may not enrol in a unit of study which they have completed previously with a grade of Pass or better.
8.4 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.
8.5 A student who has been awarded a Pass (Concedional) in a unit of study may repeat that unit, but, if subsequently awarded a grade of pass or better, no further credit points will be gained unless the student previously had not been credited under subsection 3.1.1.7.
9. Discontinuation of enrolment
9.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
9.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.
10. Suspension of candidature
10.1 A student may seek written permission from the Dean to suspend candidature in the course.
10.2 Suspension may be granted for a maximum of one year on any one application.
11. Re-enrolment after an absence
11.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.
12. Satisfactory progress
12.1 If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.
13. Time limit
13.1 A candidate must complete all the requirements for the award of the degree within ten calendar years of admission to that unit of study or readmission without credit.
13.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.
14. Assessment policy
14.1 Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.
14.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same grade at the other level(s).
14.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.
15. Credit transfer policy
15.1 Credit will not be granted for units of study completed more than ten years prior to application, except with the permission of the Dean.
15.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Table III, or as non-specific credit.
15.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units of study from other degrees for which credit is maintained or a degree has been conferred.
15.4 If students, not understanding any credit transfer, must complete at least 24 credit points from Tables III(x) and/or III(y) at the University of Sydney.
16. Candidates enrolled before 2005
16.1 These Resolutions apply to all candidates for the degree of Bachelor of Science and Bachelor of Computer Science and to all students enrolled in the Faculty of Science and the Faculty of Arts and Business in units of study up to and including those of the year of admission.
16.2 With the permission of the Faculty of Science, candidates who first enrolled for the degree prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2008 choose to qualify for the degree under the old resolutions.
16.3 With the permission of the Faculty of Science, candidates who first enrolled for the degree as part-time candidates prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2010 choose to qualify for the degree under the old resolutions.
17. Specific glossary for the BCST
17.1 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of pass or better has been achieved.
17.2 Junior unit of study is a 1000 or first-year stage unit. Its prerequisites or assumed knowledge are non-tertiary qualifications and corequisites are other Junior units of study.
17.3 Intermediate unit of study is a 2000 or second-year stage unit. Its prerequisites or assumed knowledge are Junior or Intermediate units of study and corequisites are other Intermediate units of study.
17.4 Senior unit of study is a 3000 or third-year stage unit. Its prerequisites or assumed knowledge are Junior, Intermediate or Senior units of study and corequisites are other senior units of study.
17.5 Honours unit of study is a 4000 or fourth-year stage unit offered within an honours course.
17.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.
17.7 Major in the Faculty of Science normally requires the completion of a minimum of 24 credit points of Senior units of study in one Science area, including any units of study specified in the Table of undergraduate units of study as compulsory for that major.
17.7.1 A student may not count a unit of study toward more than one major. (A major in Psychology requires 48 credit points of Intermediate and Senior Psychology units of study including PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or 2013) and PSYC(2114 or 2014). No other Intermediate Psychology units can be counted towards the major).
17.8 Major in the Faculty of Arts is normally 36 credit points from Senior units of study in an Arts subject area.
17.9 Major in Finance in the Faculty of Economics and Business is usually a three year sequence of study (in some cases a two year sequence) in a particular Economics and Business subject area.
17.10 Major in the Faculty of Education is 36 credit points from Senior units of study in the subject area of Education.
17.11 Faculty means the Faculty of Science.
17.12 Dean means the Dean of Science.
17.13 Science subject area means a defined field of study in science.
17.14 Degree means the Bachelor of Computer Science and Technology.
17.15 Requirements means coursework requirements for the award of the degree of Bachelor of Computer Science and Technology.
Bachelor of Science combined degrees

Bachelor of Science (Advanced)/MBBS [Section 1]

1. Admission
1.1 All applications for admission to the Bachelor of Science (Advanced)/MBBS course will be subject to the Undergraduate Admissions policies of the Faculty of Science and the Faculty of the Medicine.

2. Units of study
2.1 The units of study for the Bachelor of Science (Advanced) are set out in Table I together with:
2.1.1 designation as Junior, Intermediate, Senior or honours and, where appropriate, as advanced units of study
2.1.2 credit point values
2.1.3 assumed knowledge, corequisites and prerequisites
2.1.4 the semesters in which they are offered; and
2.1.5 the units of study in which the student may enrol.

2.2 A student may enrol in a unit of study prescribed for a degree other than the Bachelor of Science (Advanced) and shall satisfy the prerequisites, corequisites, qualifying and other requirements prescribed for such units of study for that other degree.

2.3 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table I.

2.4 There shall be honours units of study in Science subject areas listed in Table VI.

2.5 Units of study taken at the University of Sydney Summer School shall be counted towards the course requirements.

3. Requirements for the award of the degrees
3.1 To qualify for the award of the Bachelor of Science (Advanced)/MBBS degrees a student shall:
3.1.1 complete units of study having a total value of at least 336 credit points;
3.1.2 maintain an AAM of 80 or above in each of the first three years of the program;
3.1.3 satisfactorily complete five SMTP units in the first three years of the program; and
3.1.4 meet the requirements of the Bachelor of Science (Advanced) degree outlined below.
3.1.5 Students who fail to satisfy subsections 3.1.2 and/or 3.1.3 will be transferred to candidature for the Bachelor of Science (Advanced) degree.

3.1.6 To qualify for the award of the degrees of Bachelor of Medicine and Bachelor of Surgery, a student shall complete units of study having a total value of 192 credit points as required by the Resolutions of the Faculty of Medicine.

3.1.7 Students may abandon the combined degree course and elect to complete the BSc (Advanced) degree.

4. Requirements for the award of the Bachelor of Science (Advanced)
4.1 To qualify for the award of the pass degree in the BSc (Advanced) stream, a student shall complete the requirements for the BSc degree as described below with the exception of 5.1.5 and in addition, except with the permission of the Dean:
4.1.1 include no more than 48 credit points from Intermediate units of study;
4.1.2 include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units;
4.1.3 include at least 48 credit points of Junior units of study of which at least 24 are completed at the Advanced level or as TSP units in a single Science subject area; and
4.1.4 maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment.

4.2 candidates who fail to maintain the required credit average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Advanced) candidates.

4.3 Candidates who fails to achieve a credit average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science.

5. Requirements for the award of the Bachelor of Science
5.1 To qualify for the award of the Bachelor of Science, a student shall complete units of study having a total value of at least 144 credit points, including:
5.1.1 at least 96 credit points from Science subject areas;
5.1.2 at least one major from those included in Table I;
5.1.3 at least 12 credit points from the Science subject areas of Mathematics and Statistics;
5.1.4 at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
5.1.5 no more than 60 credit points from Junior units of study.

5.2 A major in the BSc normally requires the completion of a minimum of 24 credit points of senior units of study in one Science area, including any units of study specified in the Table of undergraduate units of study as compulsory for that major.

5.3 A major in Psychology requires 48 credit points across intermediate and senior Psychology units of study including PSYC 2111 or 2112, PSYC 3113 or 3114 and PSYC 4113 or 4114. No other intermediate Psychology units can be counted towards the major.

5.4 The senior units must include at least one of PSYC 3111, 3112, 3113 and 3114. Note: HPS30032 Psychology & Psychiatry History & Phil is available for Senior Psychology students and will count towards a major in Psychology. Successful completion of this unit of study is essential for students intending to take the Theoretical Thesis option in Psychology Honours.

5.5 A maximum of 48 credit points may be counted towards the degree requirements from units of study offered by faculties other than the Faculty of Science.

5.6 The testamur for the degree of Bachelor of Science shall specify the major(s) completed in order to qualify for the award.

6. Requirements for the Honours degree
6.1 Students who qualify to undertake honours in the Bachelor of Science (Advanced) degree may elect to do so either:
6.1.1 by suspending candidature from the MBBS degrees for one year, with the permission of the Faculty of Medicine; or
6.1.2 after completion of the combined course.

6.2 In order to qualify to enrol in an honours course in the Bachelor of Science (Advanced), students shall either:
6.2.1 have qualified for the award of the pass degree; or
6.2.2 be a graduate of the Faculty of Science; or
6.2.3 be a graduate holding a Bachelor of Science degree or an equivalent qualification from another institution;
6.2.4 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course (or equivalent at another institution);
6.2.5 have achieved either:
6.2.5.1 a credit average in the relevant senior Science units of study; or
6.2.5.2 a SCIWAM of at least 60 (or equivalent at another institution); and
6.2.5.3 satisfy any additional criteria set by the Head of Department concerned.

6.3 Students shall complete the requirements for the course full-time over two consecutive semesters.

6.4 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

6.5 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in one subject area from those listed in Table VI.

6.6 The grade of honours and the honours mark are determined by performance in the honours course.
6.6.1 Honours in the Bachelor of Science (Advanced) may be awarded in four classes as follows:

6.6.1.1 Class I (mark range: 80 and above)
6.6.1.2 Class II(1) (mark range: 75-79)
6.6.1.3 Class II(2) (mark range: 70-74)
6.6.1.4 Class III (mark range: 65-69)

6.6.2 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.

6.7 A student who is qualified to enrol in two honours courses may either:

6.7.1 complete the honours courses in the two subject areas separately and in succession; or
6.7.2 complete a jointhonours course, equivalent to an honours course in a single subject area, in the two subject areas.

6.8 A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

6.9 A student may not re-attempt an honours course in a single subject area.

7. Supervision

7.1 Students will be under the general supervision of the Faculty of Science until the end of the semester in which they complete the requirements for the Science degree. After that they will be under the general supervision of the Faculty of Medicine.

7.2 The Deans of the Faculties of Medicine and Science shall jointly exercise authority in any matter concerning the combined degree program not otherwise dealt with in these resolutions.

[Section 2]

8. Details of units of study

8.1 The units of study for the Bachelor Science (Advanced) are listed in Table 1 of the resolutions for the Bachelor of Science.

8.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

8.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

8.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

8.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
8.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
8.4.3 to pass any other examination of the unit of study that may apply.

8.5 All units of study for a particular subject area may not be available every semester.

9. Enrolment in more/less than minimum load

9.1 A candidate may not enrol in additional units of study once the degree requirements of 336 credit points have been satisfied, without first obtaining permission from the Dean.

9.2 Students may enrol on either a full-time or part-time basis.

10. Cross-institutional study

10.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either:

10.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
10.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.

11. Restrictions on enrolment

11.1 Units of study which overlap substantially in content are noted in the tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the course requirements.

12. Discontinuation of enrolment

12.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

12.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

13. Suspension of candidature

13.1 A student may seek written permission from the Dean to suspend candidature in the course.

13.2 Suspension may be granted for a maximum of one year on any one application.

14. Re-enrolment after an absence

14.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

15. Satisfactory progress

15.1 If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

16. Time limit

16.1 A candidate must complete all the requirements for the award of the degrees within ten calendar years of admission to candidature or readmission without credit.

16.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.

17. Assessment policy

17.1 Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.

17.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same grade at the other level(s).

17.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.

18. Credit transfer policy

18.1 Credit will not be granted for units of study completed ten years or more prior to application, except with the permission of the Dean.

18.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Tables I, or as non-specific credit.

18.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units of study from other degrees for which credit is maintained or a degree has been conferred.

18.4 All students, notwithstanding any credit transfer, must complete at least 24 credit points of senior Science units of study towards a major taken at the University of Sydney.

19. Candidates enrolled before 2005

19.1 These Resolutions apply to all candidates for the degree enrolling in units of study after 1 January 2005.

19.2 With the permission of the Faculty of Science, candidates who first enrolled for the degree prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2008 choose to qualify for the degree under the old resolutions.

19.3 With the permission of the Faculty of Science, candidates who first enrolled for the degree as part-time candidates prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2010 choose to qualify for the degree under the old resolutions.

20. Specific glossary for the Bachelor of Science (Advanced)/MBBS

20.1 AAM means the average mark over all units of study attempted in a given academic year (equivalent to the calendar year).

20.2 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of pass or better has been achieved.

20.3 Intermediate unit of study is of second-year (2000) level. Its prerequisites or assumed knowledge are junior or intermediate units of study and corequisites are other intermediate units of study.

20.4 Senior unit of study is of third-year (3000) level. Its prerequisites or assumed knowledge are junior, intermediate or senior units of study and corequisites are other senior units of study.

20.5 Honours unit of study is a 4000 level unit offered within an honours course.

20.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.
20.7 Dean means the Dean of Science for the duration of the candidature for the Bachelor of Science (Advanced), and the Dean of Medicine for the duration of the candidature for the MBBS.

20.8 Faculty means the Faculty of Science for the duration of the candidature in the Bachelor of Science (Advanced) and the Faculty of Medicine for the duration of candidature in the MBBS.

20.9 Degree means the Bachelor of Science (Advanced)/MBBS.

20.10 Requirements means coursework requirements for the award of the degree of Bachelor of Science (Advanced)/MBBS.

20.11 Student means a person enrolled as a candidate for the degree of Bachelor of Science (Advanced)/MBBS.

20.12 TSP means the Talented Student Program in the Faculty of Science.

20.13 SCIWAM means the weighted average mark calculated by the Faculty from the results for all intermediate and senior units of study with a weighting of 2 for intermediate units and 3 for senior units.

Bachelor of Medical Science/MBBS

[Section 1]

1. Admission

1.1 All applications for admission to candidature to the combined Bachelor of Medical Science/MBBS course will be subject to the Undergraduate Admissions policies of the Faculty of Science and of the Faculty of Medicine.

1.2 A candidate may elect to abandon the combined degree course and elect to complete the BMedSc degree.

2. Units of study

2.1 The units of study for the Bachelor of Medical Science are set out in Table IV together with:

2.1.1 designation as junior, intermediate, senior or honours and, where appropriate, as advanced units of study

2.1.2 credit point values

2.1.3 assumed knowledge, corequisites and prerequisites

2.1.4 the semesters in which they are offered; and

2.1.5 the units of study with which they are mutually exclusive.

2.2 A student may enrol, in accordance with subsection 4.1.5, in a unit of study prescribed for a degree other than the Bachelor of Medical Science and shall satisfy the prerequisites, corequisites, qualifying and other requirements prescribed for such units of study for that other degree.

2.3 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table IV.

2.4 There shall be honours units of study in Science subject areas listed in Table IV D.

2.5 Units of study taken at the University of Sydney Summer School which correspond to units of study specified in subsection 4 may be credited towards the course requirements.

3. Requirements for the award of the degrees

3.1 To qualify for the award of the Bachelor of Medical Science/MBBS a student shall:

3.1.1 complete units of study having a total value of at least 336 credit points;

3.1.2 maintain an AAM of 80 or above in each of the first three years of the program; and

3.1.3 satisfactorily complete five SMTP units in the first three years of the program; and

3.1.4 meet the requirements of the Bachelor of Medical Science degree.

3.1.5 Students who fail to satisfy 3.1.2 and/or 3.1.3 will be transferred to candidature for the Bachelor of Medical Science degree.

3.1.6 To qualify for the award of the degrees of Bachelor of Medicine and Bachelor of Surgery a student shall complete units of study having a total value of 192 credit points as required by the Resolutions of the Faculty of Medicine.

3.1.7 Students may abandon the combined degree course and elect to complete the Bachelor of Medical Science.

4. Requirements for the award of the Bachelor of Medical Science

4.1 In order to qualify for the award of the Bachelor of Medical Science degree a student shall complete units of study having a total value of at least 144 credit points, including:

4.1.1 at least 48 credit points from junior units of study, comprising MBLG1001 and 12 credit points each from Mathematics and Physics or Computational Science and 6 credit points from Biology.

4.1.2 no more than 60 credit points from units of study other than those specified in Table IV;

4.1.3 at least 36 credit points of senior units of study taken from the subject areas of Anatomy/Histology, Biology (Genetics), Biochemistry, Cell Pathology, Immunology, Infectious Diseases, Microbiology, Pharmacology and Physiology;

4.1.4 no more than 12 credit points from units of study other than core units of study.

4.1.6 Units of study taken at the University of Sydney Summer School which correspond to units of study specified in subsection 3 may be credited towards the course requirements.

5. Requirements for the honours degree

5.1 Students who qualify to undertake honours in the Bachelor of Medical Science degree may elect to do so either:

5.1.1 by suspending candidature from the MBBS degrees for one year, with the permission of the Faculty of Medicine; or

5.1.2 after completion of the combined course.

5.2 In order to qualify to enrol in an honours course in the BMedSc, students shall either:

5.2.1 have qualified for the award of the Bachelor of Medical Science degree; or

5.2.2 be a pass graduate in Medical Science of the Faculty of Medicine; or

5.2.3 be a pass graduate holding a Bachelor of Medical Science degree or an equivalent qualification from another institution;

5.2.4 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course (or equivalent at another institution);

5.2.5 have achieved either:

5.2.5.1 a credit average in the relevant senior Science units of study;

5.2.5.2 a SCIWAM of at least 60 (or equivalent at another institution); and

5.2.5.3 satisfy any additional criteria set by the Head of Department concerned.

5.3 Students shall complete the requirements for the course full-time over two consecutive semesters.

5.4 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters.

5.5 To qualify for the award of honours in the Bachelor of Medical Science degree, students shall complete 48 credit points of honours units of study in one subject area from those listed in Table IV D.

5.6 The grade of honours and the honours mark are determined by performance in the honours course.

5.6.1 Honours in the Bachelor of Medical Science may be awarded in four classes as follows:

5.6.1.1 Class I (mark range: 80 and above)

5.6.1.2 Class II(1) (mark range: 75-79)

5.6.1.3 Class II(2) (mark range: 70-74)

5.6.1.4 Class III (mark range: 65-69)

5.6.2 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.

5.7 A student who is qualified to enrol in two honours courses may either:

5.7.1 complete the honours courses in the two subject areas separately and in succession; or

5.7.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas.

5.8 A student may not re-attempt an honours course in a single subject area.

6. Supervision

6.1 Students will be under the general supervision of the Faculty of Science until the end of the semester in which they complete the requirements for the BMedSc degree. After that they will be under the general supervision of the Faculty of Medicine.

6.2 The Deans of the Faculties of Medicine and Science shall jointly exercise authority in any matter concerning the combined degree program not otherwise dealt with in these resolutions.
7. Details of units of study
7.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
7.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.
7.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:
7.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
7.4.2 to complete satisfactorily the essays, exercises, practical and project work, if any; and
7.4.3 to pass any other examination of the unit of study that may apply.
7.5 All units of study for a particular subject area may not be available every semester.
8. Enrolment in more/less than minimum load
8.1 A candidate may not enrol in additional units of study once the degree requirements of 336 credit points have been satisfied, without first obtaining permission from the Dean.
8.2 Students may enrol on either a full-time or part-time basis.
9. Cross-institutional study
9.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course.
9.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
9.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.
10. Restrictions on enrolment
10.2 Except with the permission of the Dean, candidates may not enrol in an intermediate core unit of study until they have completed 42 credit points of junior units of study prescribed by the Faculty.
10.2.1 until they have gained credit for at least 42 credit points from core intermediate units of study; and
10.2.2 until they have completed the intermediate units of study prescribed as pre-requisites for the senior unit of study, as set out in Table IV.
10.2.3 Enrolment in some senior units of study may be subject to a quota.
10.3 Where a student enrolls in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed satisfactorily, the Head of Department concerned may exempt the student from certain requirements of the unit of study requirements if satisfied that the relevant competence has been demonstrated.
10.4 A unit of study may not enrol in a unit of study which they have completed previously with a grade of pass or better.
10.5 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.
10.6 In satisfying the requirements of subsection 4.1.3 a student may not enrol in units of study which overlap substantially in content with units of study listed in subsection 4.1.4.
10.7 A student may not enrol without first obtaining permission from the Dean in:
10.7.1 additional units of study once the degree requirements of 144 credit points have been satisfied; or
10.7.2 units of study which may not be counted towards the course requirements.
11. Discontinuation of enrolment
11.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
11.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.
12. Suspension of candidature
12.1 A student may seek written permission from the Dean to suspend candidature in the course.
12.2 Suspension may be granted for a maximum of one year on any one application.
13. Re-enrolment after an absence
13.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.
14. Satisfactory progress
14.1 If a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.
15. Time limit
15.1 A candidate must complete all the requirements for the award of the degrees within ten calendar years of admission to the old resolutions.
15.1.1 If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.
16. Assessment policy
16.1 Students may be tested by written and oral examinations, assignments, exercises, practical work or any combination of these as the Faculty may determine.
16.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be matched so that a grade obtained at one level indicates a quality of work comparable with that required for the same unit at another level(s).
16.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.
17. Credit transfer policy
17.1 Credit will not be granted for units of study completed 10 years or more prior to application, except with the permission of the Dean.
17.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Tables I or IV, or as non-specific credit.
17.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units of study from other degrees for which credit is maintained or for which credit has not been awarded.
17.4 All students, notwithstanding any credit transfer, must complete at least 36 credit points of senior Science units of study in accordance with subsection 3.1.4.
18. Candidates enrolled before 2005
18.1 These Resolutions apply to all candidates for the degree enrolling in units of study after 1 January 2005.
18.2 With the permission of the Faculty of Science, candidates who first enrolled for the degree prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2008 choose to qualify for the degree under the old resolutions.
18.3 With the permission of the Faculty of Science, candidates who first enrolled for the degree as part-time candidates prior to 2005 and have not had a period of suspension or exclusion may until 31 March 2010 choose to qualify for the degree under the old resolutions.
19. Specific glossary for the Bachelor of Medical Science/MBBS
19.1 AAM means the average mark over all units of study attempted.
19.2 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of pass or better has been achieved.
19.3 Intermediate unit of study is at second-year (2000) level. Its prerequisites or assumed knowledge are junior or intermediate units of study and corequisites are other intermediate units of study.
19.4 Senior unit of study is at third-year (3000) level. Its prerequisites or assumed knowledge are junior, intermediate or senior units of study and corequisites are other senior units of study.
19.5 Honours unit of study is a 4000 level unit offered within an honours course.
19.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication as the Faculty may determine.
19.7 Dean means the Dean of Science for the duration of the candidature for the Bachelor of Medical Science, and the Dean of Medicine for the duration of candidature for the MBBS.

2. Undergraduate degree regulations

[Section 2]
4.4 To qualify for the award of the pass degree in the Bachelor of Science (Advanced Mathematics) degree, a student must complete the requirements for the BSc degree in Section 4.2 above (except for 4.2.3) and in addition, except with the permission of the Dean of Science:

4.4.1 include no more than 48 credit points from Junior units of study;

4.4.2 include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics;

4.4.3 include a major in Mathematics, Statistics or Financial Mathematics and Statistics;

4.4.4 include at least 48 credit points of senior units of study of which at least 24 are completed at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and

4.4.5 maintain in Intermediate and senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment;

4.5 Candidates in an Advanced stream of the BSc degree who fail to maintain the required Credit average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed in the Advanced stream.

4.6 Candidates in an Advanced stream of the BSc degree who fail to achieve a Credit average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science.

4.7 To qualify for the degree of Bachelor of Laws (LLB), in the Bachelor of Science and Bachelor of Laws combined degree program, a student must complete units of study to the value of 144 credit points, made up of the following:

4.7.1 96 credit points of the compulsory units of study, which includes the 48 credit points of LAWS units of study listed in subsection 4.8.1 and counted towards the Bachelor of Science;

4.7.2 48 credit points of the optional units of study in Chapter 2 of the Faculty of Law Handbook that must include:

4.7.2.1 a maximum of 40 credit points from the units of study listed in Part 1 of the Undergraduate Units of Study Table, and

4.7.2.2 a minimum of 8 credit points from the units of study listed in Part 2 of the Undergraduate units of study table.

4.8 Candidates in Science/ Law may credit the following subjects to both the Bachelor of Science and Bachelor of Laws (LLB):

4.8.1 Foundations of Law
4.8.2 Torts
4.8.3 Contracts
4.8.4 Torts and Contracts II
4.8.5 Processes of Justice
4.8.6 The Legal Profession
4.8.7 Criminal Law
4.8.8 International Law
4.8.9 Legal Research I
4.8.10 Legal Research II

4.9 Candidates in Combined Law must complete the law units of study in the following sequence:

<table>
<thead>
<tr>
<th>Year</th>
<th>Unit of study</th>

1. Cross-Faculty management of combined degree course

1.1 Students will be under the general supervision of the Faculty of Science until the end of the semester in which they complete the requirements for the Bachelor of Science.

1.2 They will then be under the general supervision of the Faculty of Law.

1.3 The Deans of the Faculty of Science and the Faculty of Law shall jointly exercise authority in any matter concerning the combined award course not otherwise dealt with in these Resolutions.

3. Units of study

3.1 The units of study which may be taken for the Bachelor of Science are set out under Tables of units of study in the Faculty of Science Handbook, together with:

3.1.1 credit point value;

3.1.2 the semesters in which they are offered;

3.1.3 the units of study with which they are mutually exclusive;

3.1.4 any special conditions.

3.2 The units of study which may be taken for the Bachelor of Laws are set out in the Undergraduate units of study table in the Faculty of Law Handbook, together with:

3.2.1 designation as compulsory or optional;

3.2.2 credit point value;

3.2.3 the units of study with which they are mutually exclusive;

3.2.4 any special conditions.

3.2.5 any special conditions.

4. Requirements for the Bachelor of Science and the Bachelor of Laws

4.1 To qualify for the award of the pass degree a student must complete successfully units of study amounting to a total of 240 credit points.

4.2 To qualify for the award of the pass degree of Bachelor of Science (BSc) in the Bachelor of Science and Bachelor of Laws combined degree program a student must complete 144 credit points in total, comprised of 48 credit points of LAWS units of study as listed below in 4.7 and 96 credit points from Science units of study set out under Table I of the Bachelor of Science, including:

4.2.1 at least 12 credit points from the Science subject areas of Mathematics and Statistics;

4.2.2 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics or Statistics;

4.2.3 60 credit points of Intermediate/Senior units of study in Science subject areas; and

4.2.4 a major in a Science area.

4.3 To qualify for the award of the pass degree in the Bachelor of Science (Advanced) degree, a student must complete the requirements for the BSc degree in Section 4.2 above (except for 4.2.3) and in addition, except with the permission of the Dean of Science:

4.3.1 include no more than 48 credit points from Junior units of study;

4.3.2 include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units;

4.3.3 include at least 24 credit points of Senior units of study at the Advanced level or as TSP units in a single Science subject area;

4.3.4 maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment.
4.9.1 On completion of the requirements for the degree of Bachelor of Science a student must then complete the following compulsory units of study towards the degree.

<table>

4.10 Except with the permission of the Dean or Associate Dean (Undergraduate), candidates in a Combined Law program must successfully complete Foundations of Law before enrolling in any other Bachelor of Laws units of study.

4.11 Students must complete the requirements for the Bachelor of Science before proceeding to the Bachelor of Laws (unless they have permission from the Faculty of Law stating otherwise).

4.12 Students may elect to abandon the combined course and elect to complete a Bachelor of Science in accordance with the resolutions governing that degree.

5. Requirements for Award of Honours

5.1 Both the Bachelor of Science and the Bachelor of Laws may be awarded with honours.

5.2 Students who qualify to undertake Honours in the Bachelor of Science degree by completion of an Honours year in accordance with the resolutions of the Bachelor of Science may elect to do so:

5.2.1 by suspending candidature from the Bachelor of Laws degree for one year, with the permission of the Faculty of Law; or

5.2.2 undertake the honours course after completion of both degrees in the combined program.

5.2.3 Honours in the Bachelor of Science may be awarded in four classes: Class I, Class II(1), Class II(2) and Class III in accordance with the resolutions of the Bachelor of Science.

5.2.4 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean, receive a bronze medal.

5.3.1 Honours in the Bachelor of Laws may be awarded in two classes: Class I and Class II.

5.3.2 To qualify for the award of honours in the Bachelor of Laws (Honours) a student must obtain the following WAM across all Law units, including those taken as part of the combined award course and any failures:

5.3.2.1 First class honours are awarded to students who obtain an average mark of 75 per cent or higher (weighted in accordance with the credit points for each unit of study).

5.3.2.2 Second class honours are awarded to students who obtain an average mark of between 70 per cent and 74.9 per cent (weighted in accordance with the credit points for each unit of study).

5.3.3 Students who qualify for the award of first class honours, and whose work is of outstanding merit in the opinion of the Faculty, may be considered for the award of a University medal.

5.3.4 An honours year is not required.

Bachelor of Science and Bachelor of Arts

[Section 1]

1. Admission

1.1 All applications for admission to candidature to an undergraduate degree or combined degree in the Faculty of Science will be subject to the Undergraduate Admissions policy of the University of Sydney.
2. Undergraduate degree regulations

3.2.3.2 They are able to enrol in the required number of Advanced level units or TSP units.

3.2.4 The student in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Advanced) to specify the major(s) completed in order to qualify for the award.

3.3 BSc (Advanced Mathematics)

3.3.1 To qualify for the award of the pass degree in the Advanced Mathematics stream of the BSc degree, a student shall complete the requirements for the BSc degree in subsection 2 and in addition, except with the permission of the Dean:

3.3.1.1 Include no more than 48 credit points from junior Science units of study;

3.3.1.2 Include at least 12 credit points of intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics;

3.3.1.3 Include a major in Mathematics, Statistics or Financial Mathematics and Statistics;

3.3.1.4 Include at least 48 credit points of senior units of study of which at least 24 are completed at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and

3.3.1.5 Maintain in intermediate and senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment.

3.3.2 Candidates who fail to maintain the required Credit average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Advanced Mathematics) candidates. Candidates who fail to achieve a Credit average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science.

3.3.3 Students who have completed at least 48 credit points may be permitted to transfer to the BSc (Advanced Mathematics) stream from the BSc or BSc(Advanced) if:

3.3.3.1 Their mark averaged over all attempted units of study is 75 or greater; and

3.3.3.2 They are able to enrol in the required number of Advanced level units or TSP units.

4. Honours in Science and Arts

4.1 Students who are qualified to do so may undertake honours courses in either or both degrees or a joint honours course in the available subject areas.

4.1.1 Complete the honours courses in the two subject areas separately and in succession; or

4.1.2 Complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean of Science.

4.2 There shall be honours courses in the following Science subject areas:

4.2.1 Agricultural Chemistry

4.2.2 Anatomy and Histology

4.2.3 Biochemistry

4.2.4 Biology

4.2.5 Cell Pathology

4.2.6 Chemistry

4.2.7 Computational Science

4.2.8 Computer Science

4.2.9 Environmental Studies

4.2.10 Geography

4.2.11 Geology

4.2.12 Geophysics

4.2.13 History and Philosophy of Science

4.2.14 Immunology

4.2.15 Information Systems

4.2.16 Marine Science

4.2.17 Applied Mathematics

4.2.18 Pure Mathematics

4.2.19 Microbiology

4.2.20 Molecular Biotechnology

4.2.21 Pharmacology

4.2.22 Physics

4.2.23 Physiology

4.2.24 Psychology

4.2.25 Soil Science

4.2.26 Mathematical Statistics

4.3 To qualify to enrol in an honours course, students shall:

4.3.1 Have qualified for the award of a pass degree;

4.3.2 Have completed a minimum of 24 credit points of Senior units of study relating to the intended honours course;

4.3.3 Have achieved either:

4.3.3.1 A credit average in the relevant Senior Science units of study; or

4.3.3.2 A SCIWAM of at least 60; and

4.3.3.3 Satisfy any additional criteria set by the Head of the Department concerned.

4.4 Students shall complete the requirements for the honours course full-time over two consecutive semesters.

4.5 If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours part-time over four consecutive semesters.

4.6 To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in the Table of undergraduate units of study, as prescribed by the Head of Department concerned.

4.7 The grade of honours and the honours mark are determined by performance in the honours course.

4.8 Honours in the Bachelor of Science may be awarded in four classes as follows:

4.8.1 Class I (mark range: 80 and above)

4.8.2 Class II(1) (mark range: 75-79)

4.8.3 Class II(2) (mark range: 70-74)

4.8.4 Class III (mark range: 65-69)

4.9 A student with an honours mark of 90 or greater in an honours subject area and a minimum SCIWAM of 80 shall, if deemed to be of sufficient merit by the Dean of Science, receive a bronze medal.

4.10 A student may not re-attempt an honours course in a single subject area.

4.11 A student who is qualified to enrol in two honours courses may either:

4.11.1 Complete the honours courses in the two subject areas separately and in succession;

4.11.2 Complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean of Science.

4.12 There shall be honours courses in the following Arts subject areas:

4.12.1 Ancient History

4.12.2 Social Anthropology

4.12.3 Archaeology (Classical)

4.12.4 Archaeology (Near Eastern)

4.12.5 Archaeology (Prehistoric and Historical)

4.12.6 Art History and Theory

4.12.7 Australian Literature

4.12.8 Chinese Studies

4.12.9 Classics

4.12.10 Economics

4.12.11 Education

4.12.12 English

4.12.13 French Studies

4.12.14 Gender Studies

4.12.15 Germanic Studies

4.12.16 Government and International Relations

4.12.17 Greek (Ancient)

4.12.18 Hebrew (Classical)

4.12.19 History

4.12.20 Indonesian and Malay Studies (no guarantee of continuing availability of units)

4.12.21 Industrial Relations and Human Resource Management

4.12.22 Italian Studies

4.12.23 Japanese Studies

4.12.24 Jewish Civilisation, Thought and Culture

4.12.25 Korean Studies

4.12.26 Latin

4.12.27 Linguistics

4.12.28 Medieval Studies

4.12.29 Modern Greek Studies

4.12.30 Music

4.12.31 Performance Studies

4.12.32 Philosophy

4.12.33 Political Economy

4.12.34 Sanskrit

4.12.35 Sociology

4.12.36 Studies in Religion

4.13 To qualify to enrol in an honours course, students shall:

4.13.1 Have qualified for the award of the pass degree; and

4.13.2 Have completed at least 48 senior credit points in the subject area concerned, completed at an average of credit level, or
4.13.3 have completed the requirements of the Faculties of Economics and Business, and Education and Social Work, for subject areas listed in Part B of the table of units of study for the BA, as appropriate; and
4.13.4 have met any other entry requirements as specified in the table of units of study for the BA, except that the entry requirement must not exceed 64 senior credit points in the subject area concerned; and
4.13.5 have the written approval of the Chair of department concerned.
4.14 A student who is qualified to enrol in two honours courses may either:
4.14.1 complete the honours courses in the two subject areas separately and in succession, or
4.14.2 complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean of Arts.
4.15 Candidature is normally full-time. Full-time students must complete the requirements over two consecutive semesters.
4.16 A student may seek permission from the Dean of Arts to undertake the honours course on a part-time basis. Part-time candidature must not exceed four consecutive semesters.
4.17 A student may seek written permission from the Dean of Arts to suspend candidature.
4.18 Suspension may be granted for a maximum period of one semester.
4.19 In the case of a student being granted suspension the student must not exceed five consecutive semesters, including the semester of suspension.
4.20 Students resuming the honours course after a period of suspension must advise the Faculty of Arts office in writing of their intention to re-enrol.
4.21 A student may not:
4.21.1 enrol in any fourth year unit of study without first qualifying for the award of the pass degree,
4.21.2 be awarded the pass degree while enrolled in final year honours, or
4.21.3 enrol concurrently in a fourth year unit of study and any other course or unit of study.
4.22.4 enrol in any two fourth year units per semester.
4.23 Candidates for combined degrees are required to transfer to the single Bachelor of Arts candidature when enrolled in fourth year units of study.
4.24 To qualify for the award of an honours degree, students shall complete at least four, 12 credit point semester length units of study.
4.25 The grade of honours and the honours mark are determined by performance in the honours course.
4.26 The award of honours degrees, the level at which they are awarded and the award of the University Medal shall be determined by the Dean of Arts on the advice of the Faculty Honours Committee.
4.27 A student with an honours mark of 90 and a meritorious record in previous studies may be considered by the Dean of Arts on the advice of the Faculty Honours Committee for the award of the University Medal.
4.28 The testamur for the honours course shall specify the subject area or areas and the grade of honours, and the medal if awarded. It shall not include majors.
4.29 Students who fail or discontinue - fail final year honours may not re-enrol in it.

[Section 2]

5. Units of study
5.1 The units of study which may be taken for the degrees of Bachelor of Science and Bachelor of Arts are set out under subject areas in Tables I and VI for the Bachelor of Science and Table Part A and Part B for the Bachelor of Arts together with:
5.1.1 designation as junior, intermediate (in the case of Science units), senior or Honours, and where appropriate as Advanced, units of study
5.1.2 credit point values
5.1.3 corequisites/prerequisites/assumed learning/assumed knowledge
5.1.4 the semesters in which they are offered
5.1.5 the units of study with which they are mutually exclusive
5.1.6 units of study in Part A of the table of units available to BA students cannot be cross-listed to majors; Part B of the table of units of study available to BA students
5.1.7 the faculty responsible for the unit of study; and
5.1.8 any special conditions.
5.2 The Dean may permit a student of exceptional merit who is admitted to the Talented Student Program to undertake a unit or units of study within the Faculty other than those specified in Table I.
5.3 Units of study completed at the University of Sydney Summer/Winter School which correspond to units of study in the table of units of study for the Bachelor of Arts and the Bachelor of Science may be credited towards the course requirements.

6. Enrolment in more/less than minimum load
6.1 A student may not enrol without first obtaining permission from the Dean in additional units of study once the combined degree requirements of 240 credit points have been satisfied.
6.2 Students may enrol on either a full-time or part-time basis.

7. Cross-institutional enrolment
7.1 Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either
7.1.1 the unit of study content is material not taught in any corresponding unit of study in the University; or
7.1.2 the student is unable for good reason to attend a corresponding unit of study at the University.

8. Restrictions on enrolment
8.1 Units of study in subject areas in the Faculty of Arts which are restricted to a specific degree are as follows:
8.1.1 Bachelor of Arts Informatics - units of study with the prefix ARIN except ARIN2100 Web Tools available to Bachelor of Arts with departmental permission and ARIN3000 Technocultures available to Bachelor of Arts.
8.1.2 Bachelor of Arts (Media and Communications) - units of study with the prefix MECO
8.1.3 Bachelor of Social Sciences - units of study with the prefix SSCI
8.1.4 Bachelor of Arts (Honours), Bachelor of Arts (Asian Studies) (Honours), Bachelor of Arts (Languages) (Honours), Bachelor of Arts (Media and Communications) (Honours), Bachelor of Informatics (Honours), Bachelor of Social Sciences (Honours) - Bachelor of Arts and Sciences (Honours) all Fourth Year Honours (4000 units).
8.1.5 Bachelor of Arts/Bachelor of Laws - units of study with the prefix LAWS
8.1.6 Bachelor of Arts and Sciences degree - units of study with the prefix SLSS
8.2 A student may not enrol in a language based unit of study, if, in the opinion of the Chair of the department involved, on the advice of the teacher of the unit, the student's linguistic knowledge or competence would unfairly advantage them over other students in the unit. If enrolment has already taken place, the Dean may direct that the student be withdrawn without penalty from the unit.
8.3 A candidate may not count a particular unit of study more than once towards the degrees or count two units of study which overlap substantially in content.
8.4 Units of study which overlap substantially in content are noted in the Tables of undergraduate units of study. Such units of study are mutually exclusive and no more than one of the overlapping units of study may be counted towards meeting the combined course requirements.
8.5 A candidate may not enrol in units of study having a total value of more than 30 credit points in a semester.

9. Time limits
9.1 A candidate must complete all the requirements for the award of the degrees within ten calendar years of admission to candidature or readmission without credit. If a candidate is readmitted with credit, the Faculty will determine a reduced time limit for completion of the degrees.

10. Repeating a unit of study
10.1 Where a student enrols in a unit of study which is the same as, or has a substantial amount in common with, a unit of study previously attempted but not completed at the grade of Pass or better, the Head of Department concerned may exempt the
1. Undergraduate degree regulations

student from certain requirements of the unit of study if satisfied that the relevant competence has been demonstrated.

10.2 A student may enrol in a unit of study which they have completed previously with a grade of Pass or better.

11. Discontinuation of enrolment

11.1 Students may abandon the combined degree course and elect to complete either a Bachelor of Science or a Bachelor of Arts in accordance with the resolutions governing these degrees.

11.2 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course. Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

12. Suspension of candidature

12.1 A student may seek written permission from the Dean to suspend candidature in the combined course. Suspension may be granted for a maximum period of one year on any one application.

13. Re-enrolment after an absence

13.1 A student who intends to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First semester of the following year or the end of May for Second semester of the same year.

14. Satisfactory progress

14.1 If a student fails to complete a unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

15. Assessment policy

15.1 Students may be tested by written and oral examinations, exercises, essays or practical work or any combination of these as the Faculty may determine.

15.2 Where a unit of study is offered at different levels of difficulty, the performance of students will be maintained at a grade obtained at one level indicating a quality of work comparable with that required for the same grade at the other level(s).

15.3 Heads of Department may arrange for further testing in cases of special consideration, in accordance with Academic Board policy governing illness and misadventure.

16. Credit Transfer Policy

16.1 Credit will not be granted for units of study completed more than 10 years prior to application, except with the permission of the Dean.

16.2 Credit may be granted as specific credit if the unit of study is considered to be directly equivalent to a unit of study in Table I or as non-specific credit.

16.3 The total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points of units of study from other degrees for which credit is maintained or a degree has been conferred.

16.4 All students, notwithstanding any credit transfer, must complete at least 24 credit points of Senior Science units of study towards a major taken at the University of Sydney.

17. Candidates enrolled before 2006

17.1 These Resolutions apply to all candidates for the degrees enrolling in units of study after 1 January, 2006.

17.2 With the permission of the Faculty of Science, candidates who first enrolled for the degrees prior to 2006 and have not had a period of suspension or exclusion may until 31 March 2009 choose to qualify for the degrees under the old resolutions.

17.3 With the permission of the Faculty of Science, candidates who first enrolled for the degrees as part-time candidates prior to 2006 and have not had a period of suspension or exclusion may until 31 March 2011 choose to qualify for the degrees under the old resolutions.

18. Glossary for the BSc/BA

18.1 Completion of a unit of study means that the assessment requirements have been satisfied and a grade of Pass or better has been achieved.

18.2 Junior unit of study is a 1000 or first-year stage unit. Its prerequisites or assumed knowledge are non-tertiary qualifications and corequisites are Junior units of study.

18.3 Intermediate unit of study is a 2000 or second-year stage unit. Its prerequisites or assumed knowledge are Junior or Intermediate units of study and corequisites are other Intermediate units of study. (Specific to the Faculty of Science).

18.4 Senior unit of study is a 3000 or third-year stage unit. Its prerequisites or assumed knowledge are Junior, Intermediate or Senior units of study and corequisites are other Senior units of study. (Specific to the Faculty of Science.)

18.5 Honours unit of study is a 4000 or fourth-year stage unit offered within an honours course.

18.6 Advanced unit of study is a unit which generally parallels a normal unit of study but which provides added breadth of material and/or sophistication of approach.

18.7 Major in the BSc normally requires the completion of a minimum of 24 credit points of Senior units of study in one Science area, including any units of study specified in the Table of undergraduate units of study as compulsory for that major. A student may not count a unit of study toward more than one major. (A major in Psychology requires 48 credit points of Intermediate and Senior Psychology units of study including PSYC(2111 or 2011), PSYC(2112 or 2012), PSYC(2113 or 2013) and PSYC(2114 or 2014). No other Intermediate Psychology units can be counted towards the major).

18.8 Major in the Faculty of Arts is normally 36 credit points from Senior units of study in an Arts subject area.

18.9 Major in the Faculty of Economics and Business is usually a three year sequence of study (in some cases a two year sequence) in a particular Economics and Business subject area.

18.10 Major in the Faculty of Education is 36 credit points from Senior units of study in the subject area of Education.

18.11 Dean means the Dean of Science.

18.12 Faculty means the Faculty of Science.

18.13 Science subject area means a defined field of study in science.

18.14 Degrees means the degrees of Bachelor of Science and Bachelor of Arts.

18.15 Requirements means coursework requirements for the award of the degree of Bachelor of Science or Bachelor of Arts.

18.16 Student means a person enrolled as a candidate for the degrees of Bachelor of Science and Bachelor of Arts.

18.17 TSP means the Talented Student Program in the Faculty of Science.

18.18 SCIWAM means the weighted average mark calculated by the Faculty from the results for all Intermediate and Senior units of study with a weighting of 2 for Intermediate units and 3 for Senior units.

Bachelor of Commerce and Bachelor of Science

Participating Faculties: Faculty of Economics and Business Faculty of Science

[Section 1]

1. Cross-faculty management of the combined award course

1.1 The Faculty of Economics and Business is the primary Faculty of management for the combined award course.

1.2 The Deans of the Faculty of Economics and Business and the Faculty of Science shall jointly exercise authority in any matter concerning the combined award course not otherwise dealt with in these Resolutions.

2. Units of study

2.1 The units of study which may be taken for the combined award course are set out under the tables of undergraduate units of study in the Faculty of Economics and Business Handbook, and the Undergraduate tables and units of study in the Faculty of Science Handbook together with:

2.1.1 designation as junior, intermediate, senior or honours level;

2.1.2 credit point value;

2.1.3 the units of study with which they are mutually exclusive;

2.1.4 the semester in which they are offered;

2.1.5 corequisites/prerequisites/assumed learning/assumed knowledge;

2.1.6 the faculty responsible for the unit of study; and

2.1.7 any special conditions.

2.2 The Dean of the Faculty of Science may permit a student admitted to the Talented Student Program to undertake Science units of study other than those specified in Table I: Bachelor of Science in the Faculty of Science Handbook (see the tables of undergraduate units of study in the Faculty of Economics and Business Handbook).

32
3. Requirements for the Bachelor of Commerce and Bachelor of Science

3.1 To qualify for the award of the pass degree a student must complete successfully units of study amounting to a total of 240 credit points (but no more than 96 credit points of junior units of study), including:

3.2 In the Faculty of Economics and Business:

3.2.1 at least 56 credit points (minimum of 48 senior credit points) of units of study from the Faculty of Economics and Business, as specified in the Faculty of Economics and Business Handbook, which must include:

3.2.1.1 7 core units of study (comprising 36 junior and 6 senior credit points), as specified in the Faculty of Economics and Business Handbook; and

3.2.1.2 either a major (minimum of 36 senior credit points) or an extended major (minimum of 48 senior credit points), consisting of units of study as specified in the Faculty of Economics and Business Handbook, from one of the following subject areas:

3.2.1.2.1 Accounting;
3.2.1.2.2 Business Information Systems;
3.2.1.2.3 Commercial Law;
3.2.1.2.4 Economics;
3.2.1.2.5 Finance;
3.2.1.2.6 Industrial Relations and Human Resource Management;
3.2.1.2.7 International Business;
3.2.1.2.8 Management;
3.2.1.2.9 Management Decision Sciences; or
3.2.1.2.10 Marketing.

3.3 In the Faculty of Science:

3.3.1 at least 12 credit points of units of study from the Science subject area of Mathematics and Statistics;
3.3.2 24 credit points of junior units of study from at least two Science subject areas (excluding Mathematics and Statistics);
3.3.3 at least 60 credit points of intermediate and senior Science units of study;
3.3.4 a major (normally 24 senior credit points) comprising units of study specified in Table I: Bachelor of Science listed in the Undergraduate tables and units of study in the Faculty of Science Handbook.

3.4 In the Bachelor of Science (Advanced), those requirements specified in 4(2) and in addition, except with the permission of the Dean of the Faculty of Science:

3.4.1 include no more than 48 credit points of junior Science units of study;
3.4.2 include at least 12 credit points of intermediate Science units of study at either the advanced level or as TSP units;
3.4.3 include at least 48 credit points of senior Science units of study of which at least 24 credit points are units of study in a single Science subject area, taken at the advanced level (or as TSP units); and maintain in intermediate and senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment.

3.5 In the Bachelor of Science (Advanced Mathematics), those requirements specified in 4(2) and in addition, except with the permission of the Dean of the Faculty of Science:

3.5.1 include no more than 48 credit points of junior Science units of study;
3.5.2 include at least 12 credit points of intermediate Mathematics and Statistics units of study at either the advanced level or as TSP units;
3.5.3 include at least 48 credit points of senior Science units of study of which at least 24 are completed at the advanced level (or as TSP units); and maintain in intermediate and senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment.

4. Transfer between Bachelor of Science streams

4.1 Students in the Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) streams who fail to maintain a Credit average will be transferred to the Bachelor of Science in the next year of enrolment with full credit for units completed in the Advanced or Advanced Mathematics stream.

4.2 Students in the Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) streams who fall to achieve a Credit average across all units attempted in their final year of the degree will be awarded the Bachelor of Science.

4.3 To transfer to the Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics), a student must satisfy the following:

4.3.1 completion of at least 48 credit points;
4.3.2 an average of 75 or greater over all attempted units of study; and
4.3.3 be able to enrol in the required number of advanced level or TSP units.

5. Requirements for the Honours degrees

5.1 On completion of the Bachelor of Commerce and Bachelor of Science (or equivalent), students who are qualified to do so may undertake an honours year in either or both of the award courses.

5.2 Joint honours courses are also available.

5.3 To qualify for the award of honours in the Bachelor of Commerce a student must complete successfully an additional year of study (the honours year), as specified in the Faculty of Economics and Business Handbook.

5.3.1 The Bachelor of Commerce may be awarded with honours in any of the subject areas where honours units are listed in the Table of undergraduate units of study - Faculty of Economics and Business or, as approved by the Faculty of Economics and Business, with joint honours in two of these subject areas.

5.3.2 Honours may also be awarded in any other area offered by another Faculty of the University, as approved by the Faculty of Economics and Business.

5.3.3 To enrol in the honours year, a student must satisfy the following:

5.3.3.1 confirmation of the student's eligibility for entry to the honours year from the relevant Discipline(s)/Department; and
5.3.3.2 any other requirements for entry into the honours year set by the relevant Discipline(s)/Department and the Faculty of Economics and Business, unless otherwise approved approved by the Faculty of Economics and Business.

5.4 To qualify for the award of honours in the Bachelor of Science a student must complete successfully an additional year of study (the honours year), as specified in the Faculty of Science Handbook.

5.4.1 The Bachelor of Science may be awarded with honours in any of the subject areas in Table VI: Honours units of study listed in Undergraduate tables and units of study of the Faculty of Science Handbook or, as approved by the Faculty of Science, with joint honours in two of these subject areas.

5.4.2 To qualify to enrol in an honours course a student must satisfy the following:

5.4.2.1 have completed a minimum of 24 credit points of senior units of study relating to the intended honours course;
5.4.2.2 have achieved either a Credit average in the relevant senior Science units of study or a SCIWAM of at least 60; and
5.4.2.3 any additional criteria set by the Head of Department concerned.

5.5 The classes for the award of honours are specified in the following table:

<table>
<thead>
<tr>
<th>Description</th>
<th>Mark range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Honours Class I and University Medal</td>
<td>90 to 100*</td>
</tr>
<tr>
<td>Honours Class I</td>
<td>80 to 100</td>
</tr>
<tr>
<td>Honours Class II (Division 1)</td>
<td>75 to 79</td>
</tr>
<tr>
<td>Honours Class II (Division 2)</td>
<td>70 to 74</td>
</tr>
<tr>
<td>Honours Class III</td>
<td>65 to 69</td>
</tr>
<tr>
<td>Pass</td>
<td>50 to 64</td>
</tr>
</tbody>
</table>

*Please note: This is a minimum criterion only, other criteria apply.

6. Award of Bachelor of Commerce and Bachelor of Science

6.1 A student who completes the requirements for the Bachelor of Commerce and the Bachelor of Science shall receive at graduation a separate testamur for each of the degrees.

6.2 The Bachelor of Commerce and the Bachelor of Science may be awarded in two grades, namely pass and honours.

6.2.1 The testamur for the pass degrees shall specify the major(s) completed.
Joint Resolutions with the Faculties of Engineering and Science (BE/BSc) Bachelor of Engineering Bachelor of Science combined degree

1. A student may proceed concurrently to the degrees of Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) and Bachelor of Engineering. Admission, progression and assessment criteria apply and are described in the resolutions for the BE specialisations shown above.

2.1 Students will be under the general supervision of the Faculty of Engineering for administrative matters.

2.2 The Faculty of Science and the Faculty of Engineering shall jointly exercise authority in any academic matter concerning the combined course not otherwise dealt with in these resolutions.

3.1 Units of study must be selected as shown in the Engineering Specialisation Tables for the core components of the chosen Engineering specialisation. Units from the Science Faculty must be chosen as shown in the Science Faculty handbook to meet requirements of a Science major.

3.2 The Faculty Resolutions (which are reproduced in the Engineering and Science Handbooks, as the case may be) specify:

3.2.1 credit point values;

3.2.2 corequisites/prerequisites/assumed knowledge; and

3.2.3 any special conditions.

4. Requirements for the BE/BSc pass degree

4.1 To qualify for the award of the pass degree a student shall complete units of study having a total value of at least 240 credit points including:

4.1.1 96 credit points of units from Science subject areas;

4.1.2 a major in a Science area, and

4.1.3 Units of study as prescribed in the Tables of BE Specialisation Requirements for the specialisation that the student is pursuing.

4.2 To qualify for the award of the pass degree in the Advanced or Advanced Mathematics stream of the BSc a student shall in addition to the requirements of resolution 4.1:

4.2.1 complete at least 54 credit points of Intermediate/Senior Science units of study of which at least 36 shall be completed at the Advanced level or as TSP units;

4.2.2 complete at least 24 credit points of Senior Science units of study at the Advanced level or as TSP units in a single Science subject area; and

4.2.3 maintain in Intermediate and Senior Science units of study an average mark of 65 or greater in each year of enrolment.

5. Requirements for honours degrees

5.1 BE with Honours

5.1.1 On completion of the requirements for the combined degrees, a student may qualify for the award of BE degree with Honours in accordance with the requirements set out in the Resolutions of the Faculty of Engineering relating to the BE degree.

5.2 BSc with Honours

5.2.1 On completion of the requirements for the combined degrees, a student may be qualified to enrol in Honours in the Bachelor of Science.

5.2.2 To qualify for the award of the BSc with Honours, a student must complete successfully an additional year of study (the Honours year), as specified in the Faculty of Science Handbook.

6. Students may at any stage abandon the combined degree course and elect to complete either a BSc or a BE in accordance with the resolutions governing those degrees.

7. Resolutions covering admission, enrolment restrictions, progression requirements, satisfactory progress, cross-institutional study and assessment criteria for the combined degree are equivalent to those for the BE degree and specialisations, as shown in the Faculty Handbook.

8. The Deans of the Faculties of Engineering and Science shall jointly exercise authority in any matter concerning the combined degrees not otherwise dealt with in these resolutions.

Bachelor of Engineering Bachelor of Science double degree

1. A student enrolled for a Bachelor of Engineering degree may be permitted to transfer to the Faculty of Science to complete a BSc degree at the end of Second Year or Third Year in the BE degree if:

1.1 except as provided in section 4.1.2, all units of study attempted in the BE degree have been completed with a grade of pass or better;

1.2 at least 96 credit points from units of study in the BE degree have been completed, of which no more than 12 credit points are from units of study with the grade of Pass (Concessional);

1.3 the student is qualified to enrol in a major in a Science area; and

1.4 for admission to the Advanced streams, the student satisfies the requirements in Section 3.2 or 3.3 of the Resolutions of the Faculty of Science relating to the BSc degree.

2. Students will be under the supervision of the Faculty of Engineering for the period of BE degree enrolment and under the supervision of the Faculty of Science for the BSc enrolment and completion.

3.1 Units of study must be selected as shown in the Engineering Specialisation Tables for the core components of the chosen Engineering specialisation.

3.2 Units from the Science Faculty must be chosen as shown in the Science Faculty handbook to meet requirements of a Science major.

3.3 The Faculty Resolutions (which are reproduced in the Engineering and Science Handbooks, as the case may be) specify:

3.3.1 credit point values;

3.3.2 corequisites/prerequisites/assumed knowledge; and

3.3.3 any special conditions.

4. To qualify for the award of the pass BSc degree a student shall complete units of study to a value of at least 46 credit points including:

4.1 42 credit points of Intermediate/Senior units of study in Science subject areas; and

4.2 a major in a Science area.

5. To qualify for the award of the pass degree in the Advanced or Advanced Mathematics stream of the BSc a student shall in addition to the requirements of Section 4:

5.1 include at least 72 credit points of Intermediate/Senior Science units of study,

5.2 include at least 24 credit points of Senior Science units of study at the Advanced level or as TSP units in a single Science subject area; and

5.3 maintain in Intermediate and Senior Science units of study an average mark of 65 or greater in each year of enrolment.

6. The requirements of Sections 5 or 6 must be completed in one year of full-time study or two years of part-time study.

7.1 Students who complete at least 42 but less than 48 credit points in the prescribed time limits may in the following year of enrolment in the BE complete the remaining units to satisfy the requirements of the Faculty of Science.

7.2 Students who complete less than 42 credit points may apply to be readmitted to the degree, subject to Sections 92-95 of the Resolutions of the Faculty of Science relating to the BSc degree.

8. Students who are so qualified may undertake an honours course in the BSc in accordance with Sections 12-20 of the Resolutions of the Faculty of Science relating to the BSc degree.

9.1 On completion of the requirements of the BSc degree or BSc Honours course, students will be eligible to resume their
enrolment toward the BE degree according the Faculty of Engineering resolutions for that degree.

9.2 Students may abandon the BSc degree enrolment at any stage and resume their enrolment in the BE degree.

10. Resolutions covering admission, enrolment restrictions, progression requirements, satisfactory progress, cross-institutional study and assessment criteria for the Engineering component of the double degree are equivalent to those for the BE degree and specialisations, as shown in the Faculty Handbook.

11. The Deans of the Faculties of Engineering and Science shall jointly exercise authority in any matter concerning the double degree not otherwise dealt with in these resolutions.

Joint Resolutions of the Faculties of Engineering and Science (BE/BMedSc)

Bachelor of Engineering/Bachelor of Medical Science

1. Requirements for the BE/BMedSc Course

1.1 To qualify for the award of the BE/BMedSc combined degree a student must:

1.1.1 complete successfully units of study giving credit for a total of 240 credit points; and

1.1.2 satisfy the requirements of all other relevant By-Laws, Rules and Resolutions of the University.

2. Specialisations, streams or majors

2.1 The combined award course, BE/BMedSc, will be awarded in all of the Engineering specialisations that are available for the BE degree and all majors as are applicable under the resolutions of the Faculty of Science.

3. Requirements for the honours degree

3.1 To qualify for the award of the honours degree a student must complete the honours requirements published in the Engineering Faculty Resolutions relating to the combined award course.

3.2.1 A student may proceed concurrently to the degrees of Bachelor of Medical Science, and Bachelor of Engineering.

3.2.2 Admission, progression and assessment criteria apply and are described in the resolutions for the BE specialisations shown above.

3.3 Students will be under the general supervision of the Faculty of Engineering for administrative matters.

3.4 The Faculty of Science and the Faculty of Engineering shall jointly exercise authority in any academic matter concerning the combined course not otherwise dealt with in these resolutions.

3.5.1 Units of study must be selected as shown in the Engineering Specialisation Tables for the core components of the chosen Engineering specialisation.

3.5.2 Units from the Science Faculty must be chosen as shown in the Science Faculty handbook to meet requirements of a Science major.

3.5.3 The Faculty Resolutions (which are reproduced in the Engineering and Science Handbooks, as the case may be) specify:

3.5.3.1 credit point values;

3.5.3.2 corequisites/prerequisites/assumed learning/ assumed knowledge; and

3.5.3.3 any special conditions.

4. Requirements for the BE/BMedSc pass degree

4.1 To qualify for the award of the pass degree a student shall complete units of study having a total value of at least 240 credit points including:

4.1.1 Students may base their choice of units of study in Science on the subject areas of Anatomy/Histology, Biology (Genetics), Biochemistry, Cell Pathology, Immunology, Infectious Diseases, Microbiology, Pharmacology and Physiology;

4.1.5 a 12 credit point interdisciplinary thesis jointly supervised by departments from Engineering and Science.

5. Requirements for honours degrees

5.1 BE with Honours

5.1.1 On completion of the requirements for the combined degrees, a student may qualify for the award of BE degree with Honours in accordance with the requirements set out in the Resolutions of the Faculty of Engineering relating to the BE degree.

5.2 BMedSc with Honours

5.2.1 On completion of the requirements for the combined degrees, a student may be qualified to enrol in Honours in the Bachelor of Medical Science.

5.2.2 To qualify for the award of the BMedSc with Honours, a student must complete successfully an additional year of study (the Honours year), as specified in the Faculty of Science Handbook.

6. Students may at any stage abandon the combined degree course and elect to complete either a BMedSc or a BE in accordance with the resolutions governing those degrees.

7. Resolutions covering admission, enrolment restrictions, progression requirements, satisfactory progress, cross-institutional study and assessment criteria for the combined degree are equivalent to those for the BE degree and specialisations, as shown in the Faculty Handbook.

8. The Deans of the Faculties of Engineering and Science shall jointly exercise authority in any matter concerning the combined degrees not otherwise dealt with in these resolutions.

Bachelor of Education (Secondary): Science/Bachelor of Science or Bachelor of Science (Advanced)

1. Special provisions

1.1 A student may proceed concurrently to the degrees of Bachelor of Education and Bachelor of Science or Bachelor of Science (Advanced). Refer to Section 3 below.

1.2 No more than 100 credit points may be from Junior units of study.

2. Program of study

2.1 Year I

2.1.1 Junior units of study in Education, as specified in the Table of units of study, total of 12 credit points; and

2.1.2 Junior units of study in Mathematics, offered by the School of Mathematics and Statistics in the Faculty of Science, equivalent to 12 credit points; and

2.1.3 Junior units of study in Chemistry, offered by the Faculty of Science, equivalent to 12 credit points, in an approved teaching area, selected from Science Table 1; and

2.1.4 Junior units of study offered by the Faculty of Science in an approved teaching area, equivalent to 12 credit points selected from Science Table 1.

2.2 Year II

2.2.1 Senior, 200 level, units of study in Education, as specified in the Table of units of study, total of 18 credit points; and

2.2.2 Senior units of study, in Curriculum and Professional Studies in Secondary Education, as specified in the Table of units of study, total of 6 credit points; and

2.2.3 Intermediate units of study in the minor sequence, 12 credit points, offered by the Faculty of Science selected from Science Table 1; and

2.2.4 Intermediate units of study in the major sequence, 12 credit points, offered by the Faculty of Science selected from Science Table 1.

2.3 Year III

2.3.1 Senior units of study in Education, selected from the Table of units of study, total of 6 credit points; and

2.3.2 Senior units of study in Curriculum and Professional Studies in Secondary Education, selected from the Table of units of study, including specified units, total of 30 credit points; and

2.3.3 Senior units of study in major sequence, total of 12 credit points, offered by the Faculty of Science, selected from Science Table 1.

2.4 Year IV

2.4.1 Two Senior, 300 level, units of study in Education selected from the Table of units of study, including specified units, total of 12 credit points;
2. Undergraduate degree regulations

2.1.1 Junior units of study in Education, as specified in the Table of units of study, total of 12 credit points; and

2.1.2 Specified Junior units of study in Psychology, 12 credit points; and

2.1.3 Junior units of study in Science, 24 credit points, of which 12 points must be in Mathematics and 12 in Chemistry.

2.2 Specified Intermediate level units of study in Psychology, 18 credit points; and

2.3 Intermediate level units of study selected from Science Table 1, 12 credit points, which must be in the selected Science teaching subject.

2.4 Specified Intermediate level units of study in Psychology, 30 credit points.

2.5 Specified units of study in Psychology, 24 credit points.

3. Requirements for award

3.1 To qualify for the award of the pass degree in an Advanced stream of the BSc degree, a student shall complete the requirements for the BSc degree according to these resolutions and those of the Faculty of Science and in addition, except with the permission of the Dean of the Faculty of Science:

3.1.1 include at least 16 credit points of Intermediate units of study at either the Advanced level or as TSP units;

3.1.2 include at least 24 credit points of Senior units of study at the Advanced level or as TSP units in a single Science subject area; and

3.1.3 maintain in Intermediate and Senior units of study at the Advanced level in Science subject areas an average of 65 or greater in each year of enrolment.

Bachelor of Education (Secondary)/Bachelor of Science (Psychology)

1. Year I

1.1 Junior units of study in Education, as specified in the Table of units of study, total of 12 credit points; and

1.2 Specified Junior units of study in Psychology, 12 credit points; and

1.3 Junior units of study in Science, 24 credit points, of which 12 credit points must be in Mathematics and 12 in Chemistry.

2. Year II

2.1 Units of study in Education, as specified in the Table of units of study, total of 18 credit points; and

2.2 Specified Intermediate level units of study in Psychology, 18 credit points; and

2.3 Intermediate level units of study selected from Science Table 1, 12 credit points, which must be in the selected Science teaching subject.

3. Year III

3.1 Units of study in Education, as specified in the Table of units of study, total of 18 credit points; and

3.2 Specified Senior units of study in Psychology, 30 credit points.

4. Year IV

4.1 Units of study in Education, as specified in the Table of units of study, including professional experience, 24 credit points; and

4.2 Specified units of study in Psychology, 24 credit points.

5. Year V

5.1 Units of study in Education, as specified in the Table of units of study, including professional experience, 16 credit points; and

5.2 Specified units of study in Psychology, 20 credit points; and

5.3 Senior units of study selected from Science Table 1, 12 credit points, to complete study in the Science teaching subject.

Bachelor of Science/Bachelor of Nursing

For course resolutions: refer to the 2006 Faculty of Science handbook.

Bachelor of Applied Science (Exercise and Sport Science)/Bachelor of Science (Nutrition)

For course resolutions: refer to the 2007 Faculty of Health Sciences handbook.
Bachelor of Liberal Studies

1. To qualify for the award of the degree students must be admitted to candidature for the degree and complete 192 credit points in total, including:
   1.1 at least 120 Intermediate or Senior credit points;
   1.2 a major from Part A of the Faculty of Arts Table of units of study, consisting of 36 Senior credit points in a single subject area, or cross-listed between subject areas, as outlined in Section 3 The major and cross-listing in the Arts Undergraduate Resolutions;
   1.3 a major from the Faculty of Science, as defined by that Faculty. The testamur for the degree shall specify all majors;
   1.4 at least 30 credit points, including 18 Senior credit points, from units of study in one language subject area other than English from Part A of the Faculty of Arts Table of units of study;
   1.5 a 6 credit point unit of study in communication and analytical skills, or in other academic skills as may be prescribed by the Faculty of Arts and Faculty of Science from time to time. (In 2007 the prescribed unit is one of ENGL1000, ENGL1007 or LNGS1001);
   1.6 a minimum of 6 credit points in units of study in Mathematics or Statistics.

2. A Bachelor of Liberal Studies student who wishes to transfer to candidature for the Bachelor of Arts or Bachelor of Science degree should make written application to the Faculty of Arts or Faculty of Science, as appropriate.

3. If a Bachelor of Liberal Studies student has completed the requirements for the Bachelor of Arts, Bachelor of Arts (Asian Studies) or Bachelor of Science degree, the student may apply to the Faculty of Arts or Faculty of Science for the award of one of those degrees, on condition that candidature for the Bachelor of Liberal Studies will be abandoned.

Bachelor of Liberal Studies (Honours)

1. An honours course is available in the Faculty of Arts in the following subject areas:
   1.1 Ancient History
   1.2 Anthropology
   1.3 Arabic Language and Literature
   1.4 Arab World, Islam and the Middle East
   1.5 Archaeology (Classical)
   1.6 Archaeology (Near Eastern)
   1.7 Archaeology (Prehistoric and Historical)
   1.8 Art History and Theory
   1.9 Asian Studies
   1.10 Australian Literature
   1.11 Biblical Studies
   1.12 Chinese Studies
   1.13 Cultural Studies
   1.14 English
   1.15 European Studies
   1.16 Film Studies
   1.17 French Studies
   1.18 Gender Studies
   1.19 Germanic Studies
   1.20 Greek (Ancient)
   1.21 Hebrew (Classical)
   1.22 Hebrew (Modern)
   1.23 History
   1.24 Indonesian and Malay Studies
   1.25 Italian Studies
   1.26 Japanese Studies
   1.27 Jewish Civilisation, Thought and Culture
   1.28 Korean Studies
   1.29 Latin
   1.30 Linguistics
   1.31 Medieval Studies
   1.32 Modern Greek Studies
   1.33 Music
   1.34 Performance Studies
   1.35 Philosophy
   1.36 Sanskrit
   1.37 Sociology
   1.38 Studies in Religion

2. An honours course is available in all Faculty of Science subject areas.

3. To qualify for the award of the honours degree in a Faculty of Arts subject area students must complete the requirements outlined in Section 4 Requirements for honours degrees in the Arts Undergraduate Resolutions.

4. To qualify for the award of the honours degree in a Faculty of Science subject area students must complete the requirements as specified by the Faculty of Science.

Bachelor of Liberal Studies (International)

1. To qualify for the award of the degree a student must be admitted to candidature for the degree, complete the requirements for the Bachelor of Liberal Studies, and in addition, include in the required 192 credit points at least the equivalent of 24 credit points from units of study taken over a minimum of one semester while enrolled as an exchange student at an overseas university with which the University of Sydney has an Exchange Agreement.

2. To qualify to participate in an exchange program a student must have:
   2.1 completed at least the equivalent of two semesters of full-time study (normally a minimum of 48 credit points completed towards the Bachelor of Liberal Studies; and
   2.2 maintained an overall mark of 75 or greater over all units of study completed.

3. A student who has completed a minimum of 48 credit points towards a Bachelor of Liberal Studies candidature may, on application to the Faculty of Arts, be permitted to transfer to Bachelor of Liberal Studies (International) candidature if:
   3.1 they have maintained an average of 75 or greater over all units of study attempted; and
   3.2 they are able to qualify to participate in the University of Sydney Exchange program.

4. A Bachelor of Liberal Studies (International) student may, on application to the Faculty of Arts, transfer to Bachelor of Liberal Studies candidature at any time.

4.1 This provision includes those Bachelor of Liberal Studies (International) students who do not qualify, or are unable or unwilling to participate in a University of Sydney Exchange program.

5. A Bachelor of Liberal Studies (International) student who wishes to complete an honours degree must:
   5.1 complete the requirements for the Bachelor of Liberal Studies (International) degree; and
   5.2 be admitted as a Bachelor of Liberal Studies (Honours) candidate, and satisfy the requirements for that degree.

Bachelor of Arts and Sciences

1. To qualify for the award of the degree students must be admitted to candidature for the degree and complete 144 credit points in total, including:
   1.1 a minimum of 24 credit points from Part A of the Faculty of Arts Table of units of study;
   1.2 a minimum of 24 credit points from the Faculty of Science;
   1.3 a minimum of 12 credit points from the Faculty of Economics and Business, in all areas except Accounting, Finance and Marketing;
   1.4 a minimum of 12 credit points in Legal Studies units (units coded SLSS and LAWS1100) including SLSS1001 (Introduction to Socio-Legal Studies);
   1.5 a minimum of 72 Intermediate or Senior credit points; and
   1.6 a major, from either Part A of the Faculty of Arts Table of units of study, or from Table 1 of the Faculty of Science Handbook.

1.6.1 Where, in exceptional circumstances arising from prerequisites or other restrictions in certain discipline areas, a student is unable to complete the formal requirements of a major in the normal course of the degree but is nevertheless able to demonstrate depth of study in a specified discipline area within a faculty by the completion of 24 Senior credit points in a Faculty of Science discipline area or 36 Senior credit points in a Faculty of Arts discipline area, the Dean may, on application from the student and a recommendation from the chair or head of Department, permit the student to graduate without a major from the Faculty of Arts or Science. In such circumstances no major shall be specified on the testamur.

Bachelor of Arts and Sciences (Honours)

1. To qualify for the award of the honours degree students must complete the requirements outlined in Section 4 Requirements for honours degrees in the Arts Undergraduate Resolutions.
This chapter is intended to give enrolment advice to undergraduate students enrolling in the Bachelor of Science degree and its streams – the BSc(Advanced), the BSc (Advanced)/MBBS and the BSc (Advanced Mathematics). You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It should be stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The table of undergraduate units of study available for the Bachelor of Science degree and degree streams is included towards the end of this chapter.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

**Special Arrangements**
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

**Special Consideration**
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

**Code of Conduct for Students**
The University has clear expectations of students in respect of academic matters and personal behaviour.

**Student Plagiarism: Coursework Policy and Procedure**
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided in chapter 1 of this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

**Enrolment day FAQs**

**What is a 'major'?'**
Students enrolled in the Bachelor of Science degree and its streams are required to complete at least one major. A major is a specialisation in the Senior year of your degree. It is useful to have an idea of what major, or group of majors, interest you now, so that you can plan your Junior and Intermediate years properly. The Bachelor of Science majors Neuroscience and Nanoscience and Technology require earlier planning than most others. If you are interested in these then read Table I (Bachelor of Science: at the end of this chapter) carefully and/or seek advice.

A major is usually defined as 24 credit points of study at the Senior level in a single Science Area. Neuroscience and Psychology both have additional requirements. Depending on the majors chosen, it is possible to complete more than one major in your degree.

**How many credit points should I take per semester?**
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

**Do I need to be full-time?**
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students.

International students are required to be full-time.

**Can I take units of study from other faculties?**
Yes – generally you can take any unit of study offered by the Faculty of Arts and the Faculty of Economics. Lists of available units of study will be available on enrolment day, or in each faculty's handbook. Each Faculty website has links to Departmental and unit of study information.

Also available are undergraduate units from any other faculty at the University. The onus is on you to get written permission from the relevant department and bring it to the Faculty of Science.

There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

The Bachelor of Science allows for up to 48 credit points of Non-Science units of study to be included in the 3-year program. Junior Econometrics (ECMT units) and General Statistical Methods (STAT units) are specifically excluded from the BSc. Students in specialist programs and combined degrees may have less flexibility.

**Can I get receive credit for previous tertiary study?**
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.
On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus-outline, and should include the credit point value, learning outcomes, assessment details, texts and references, and contact details for each unit of study. You must bring this information with on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn't take a subject at the HSC or feel they need some revision.

Who can enrol in Advanced units of study?
Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in advanced level subjects in the first year of study. You must obtain special permission to enrol in any advanced unit of study except Software. For Software advanced units of study, you must meet the criteria listed on the permission form for advanced units of study. The departmental advisers have copies of the permission form for advanced units of study.

Students should also consult the unit of study Tables for assumed and prerequisite marks in the HSC required to enrol in advanced units of study.

For students in an Advanced degree it is recommended that you enrol in no more than 24 credit points of advanced units of study in a year. Advanced units of study are very demanding and students are required to perform at a higher standard than in the normal units of study.

What is the Talented Student Program?
The Talented Student Program (TSP) is tailored to meet students' individual needs and is restricted to the very top students.

Students may be able to bypass some first year study and enrol directly in a second year course. If you have outstanding results in any of your HSC science subjects you may wish to negotiate a special program of study with one of the departments in the Faculty of Science.

The Talented Student Program is available in most areas of Science. Students receive special supervision by academic staff and often engage in studies on an individual basis with small numbers of fellow students, all of whom have a special interest in the same subject.

Am I eligible for the Talented Student Program?
Enter to the TSP is by invitation from the Dean which you should have received by the time you enrol. The following guidelines apply generally, although Departments may have additional (and sometimes more stringent) requirements for entry into the program. To get into the program in your first year, you should normally have a UAI (or equivalent) of at least 99.00 and a result in band 6 in at least one HSC Science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. For entry into the program in your second and third years, you should normally have a weighted average mark of 85 or over and a high distinction grade in a relevant subject area.

Enrolment guide by major
The following is a list of recommended combinations of Junior units of study if you are intending to complete a major in a particular Science Subject Area. Students should also consult Table 1 (Bachelor of Science: at the end of this chapter) and school/department advisers for further information on major requirements.

Agricultural Chemistry
Major not offered at the Advanced level.
12 credit points of Junior units of study in each of Biology + Chemistry + Mathematics + 12 credit points from one of Physics, Geology or Geography.

Anatomy and Histology
Major not offered at the Advanced level.
12 credit points of Junior units of study in either Biology or Psychology + 12 credit points of Mathematics + 24 credit points from Junior Chemistry, or Junior Physics, Mathematics or from units of study selected in consultation with an adviser.

Biochemistry
Major offered at the Advanced level.
6 credit points of Junior units of study in each of Biology and Molecular Biology and Genetics (MBLG1001) + 12 credit points of Junior Chemistry + Mathematics +12 credit points from units of study from other areas.

Bioinformatics
Major at advanced level possible
12 credit points of Junior units of study in ordinary or advanced Mathematics including statistics + 6 credit points of Biology + MBLG1001 + 12 credit points of SOFT units + 12 credit points of elective units (from Table 1 or other faculties).

Biology
Major offered at the Advanced level.
Planning for a Biology major
12 credit points of Junior Biology/ Molecular Biology & Genetics are needed to enrol in Intermediate units of study in Biology. Students intending to major in Biology should take at least 12 credit points of Intermediate Biology. The Biology major is also offered at the Advanced level.

Recommended Junior combinations for a Biology major
BIOL(1001 or 1101 or 1901) + BIOL(1002 or 1902) + 12 credit points of Junior units of study in Chemistry + Mathematics + 12 credit points from units of study selected in consultation with an adviser.

Junior Biology Information
BIOL1001 – Concepts in Biology is an introductory unit recommended for students who have not studied HSC biology.
BIOL1101 – Biology – Ecosystems to Genes is recommended for students who have HSC biology.
BIOL1002 – Living Systems is suitable for students who want to go onto plant, animal or molecular biology.
BIOL1003 – Human Biology is suitable for students who specifically want to go onto human related units of study.

Assumed knowledge
A biology bridging course is recommended for students who have not studied HSC biology.
**Advanced Biology**

If you have a UAI of at least 93 and an HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit you are eligible to enrol in Advanced units of study in Junior Biology. It is not necessary to enrol in both Semester 1 and Semester 2 Advanced units of study.

**Related Junior subject areas**

It is recommended that you take 12 Junior credit points of Chemistry, preferably CHEM1101 and CHEM1102, or their equivalent, if you intend to proceed into any Intermediate year Biology, Biochemistry or Molecular Biology and Genetics units of study.

**Cell Pathology**

Major not offered at the Advanced level.

12 credit points of Junior units of study in each of Chemistry + Physics + Mathematics + Biology 1001 or 1101 or 1901 + Biology1002 or 1003 or 1902 or 1903.

**Chemistry**

Major offered at Advanced level.

**Planning for a Chemistry major**

12 credit points of Junior units are needed to enrol in Intermediate units of study in Chemistry. Students intending to major in Chemistry should enrol in CHEM2401 and CHEM2402. Enrolment in CHEM2403 and/or CHEM2404 is also strongly recommended. The Chemistry major is also offered at the Advanced level.

**Recommended Junior combinations for a Chemistry major**

12 credit points of Junior units of study in each of Chemistry + Mathematics + 24 credit points from other areas of study selected in consultation with an adviser.

**Junior Chemistry Information**

CHEM1001 and 1002 are recommended for students whose Chemistry background is weak or non-existent. It is recommended that such students also take the Chemistry Bridging Course.

CHEM1101 and 1102 are recommended for students who have HSC Chemistry. Students intending to enrol in Intermediate and Senior Chemistry should take this level or higher.

**Assumed knowledge**

HSC Chemistry is assumed knowledge for all Chemistry 1 courses except CHEM1001 and CHEM1002. Students without HSC Chemistry, who plan to enrol in Intermediate Chemistry, should discuss their options with the Director of First Year Studies in Chemistry.

**Advanced Chemistry and Special Studies**

If you have a UAI of at least 96.4 and an HSC Chemistry result in the 80th percentile or better, you are eligible to choose Advanced Chemistry units. The Special Studies Program is designed for the truly exceptional Chemistry student and entry is by invitation only. The minimum requirement for entry to CHEM1903 is a UAI of 98.7 and an HSC Chemistry result in the 90th percentile or better.

**Computational Science**

Major offered at the Advanced level.

**Planning for a Computational Science major**

Computational Science is an interdisciplinary major comprising core and elective units of study at the Senior level offered by several Schools and Departments in the Faculty of Science (see Table I). In addition, a variety of Junior and Intermediate units of study offered across the Faculty provide a solid basis for Junior studies and sufficient knowledge to apply Computational Science in specific areas of science. The Computational Science major is also offered at the Advanced level.

**Recommended Junior combinations for a Computational Science major**

COSC1001 + COSC1002 + SOFT1001 + SOFT1002 + 12 credit points of Junior Mathematics + 18 credit points selected in consultation with an adviser.

**Junior Computational Science information**

Junior COSC units of study are useful for later studies in computational science, but are not prerequisites.

**Advanced Computational Science**

Junior COSC units of study are also offered at the Advanced level. To enrol in COSC1901 (Advanced) or COSC1902 (Advanced) you must have a UAI of 90 or more, or have a Distinction or better in another Junior COSC or SOFT unit.

**Assumed knowledge**

See individual units for entry requirements.

**Computer Science**

Major offered at the Advanced level.

SOFT1001 + SOFT1002 + MATH1001 + MATH1002 + MATH1005 + (MATH1003 or MATH1004) + 24 credit points of other Junior units of study. (Each of the above units of study can be replaced by the corresponding Advanced unit of study).

**Environmental Studies**

Major not offered at the Advanced level.

**Recommended Junior combinations for an Environmental Studies major**

For the major, in your first year, you should enrol in 12 credit points of Geosciences units. If you wish to take the second year units ENV1111 and ENV1112 you must include 12 credit points of junior Biology and and 12 credit points of junior Chemistry or Physics units respectively as part of your first year program.

For Bachelor of Science students, to work towards satisfying your degree requirements as well as the requirements for the major, you should enrol as described above, but you should also enrol in 12 credit points of junior mathematics.

**Financial Mathematics and Statistics**

Major offered at the Advanced level.

MATH1001 + MATH1002 + MATH1003 + MATH1005 + 24 credit points of other Junior units of study. Each of the above units of study may be replaced by the corresponding Advanced unit of study.

**Geography**

Major offered at the Advanced level.

Recommended combination for any Geography major stream is GEOS1001 + GEOS1002 12 credit points of Junior units of study in each of Mathematics + either Chemistry or Physics, and other units allowed.

**Geology & Geophysics**

Major offered at the Advanced level.

GEOG1001 + GEOG1003 and 12 cred points of Mathematics + Physics and/or Chemistry. Physics/Chemistry and other units as allowed may be selected in consultation with an adviser.

**History and Philosophy of Science**

Major not offered at the Advanced level.

**Planning for a major in History and Philosophy of Science**

24 credit points of Junior study are needed to enrol in Intermediate units of study in the History and Philosophy of Science. Students intending to major in History and Philosophy of Science must take 6 credit points of Intermediate History and Philosophy of Science. We strongly encourage pursuit of a double major in History and Philosophy
of Science and another area of Science, with completion of the appropriate Junior units of study for that major.

**Recommended Junior combinations**

12 credit points of Junior units of study in Mathematics and Statistics; 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and 12 credit points of elective units of study from History, Philosophy, Gender Studies, Physics, Psychology, or other related areas of study in arts or science in consultation with an History and Philosophy of Science adviser about appropriate combinations of electives to help prepare for an History and Philosophy of Science major.

**Related Junior subject areas**

Students interested in related topics should consider taking the unit Concepts and Issues in Physical Science (PHYS1600) which serves as useful background for further studies in History and Philosophy of Science and counts as an Arts elective

**Immunobiology**

Major not offered at the Advanced level.

Immunology is offered at Intermediate and Senior levels. 24 credit points of Junior units of study from any of the science discipline areas is required for Intermediate study in Immunology. We recommend these include: BIOL1001 or 1101 or 1901 and BIOL1002 or 1902 or 1003 or 1903 and MATH1015 or MATH1005 or 1905 and CHEM1001 and 1002 or CHEM1101/1901/1902. For the Immunobiology major the minimum requirement is 12 credit points of Senior Immunology and 12 credit points from the elective Senior units of study listed in Table I. Intermediate studies must include Introductory Immunology, IMMUL2101. Intermediate Molecular Biology and Genetics units of study are highly recommended and students should note the prerequisites for each elective to determine their choice of concurrent Intermediate study units.

**Information Systems**

Major not offered at the Advanced level.

ISYS1003 + 6 credit points of a language unit (ENGL1005 or LNGL1001 or 1002 or 1005) + 12 credit points of Junior Mathematics units of study + 24 credit points selected in consultation with an adviser.

**Marine Science**

BIO1001 or 1101 or 1901 + BIO1002 or 1902 + 12 credit points of Junior units of study in each of Geosciences + Mathematics + Chemistry or Physics + Mathematics.

**Mathematics**

Major offered at the Advanced level.

**Planning for a Mathematics major**

12 credit points of Junior Mathematics are generally needed to enrol in Intermediate units of study in Mathematics. Students intending to major in Mathematics should take at least 12 credit points of Intermediate Mathematics. The Mathematics major is also offered at the Advanced level.

**Recommended Junior combinations for a Mathematics major**

MATH1001/1901/1906 + MATH1002/1902 + MATH1003/1903/1907 + MATH(1004/1904 or 1005/1905) + 36 other Junior credit points.

**Junior Mathematics information**

If you have HSC Mathematics: MATH1011. 1013, 1014 and 1015.

Note that no progression to later year Mathematics is possible, except in very special circumstances.

If you have HSC Mathematics Extension 1: MATH1001, 1002 and two from MATH1003, 1004 or 1005 (all Normal).

Advanced Mathematics and Special Studies

If you have HSC Mathematics Extension 2, you are eligible to choose MATH1901, 1902, 1903 or 1904.

If you have HSC Mathematics Extension 2, or a result in Band E2 or better of HSC Mathematics Extension 1 you are eligible to choose MATH1905.

If you have a UAI of at least 98.5 and a result in Band E4 of HSC Mathematics Extension 2 you are eligible to apply for: MATH1906 – Mathematics (Special Studies Program) A.

**Assumed knowledge**

Bridging courses in mathematics are recommended for students who do not have the assumed knowledge for their selected level of Mathematics study.

**Mathematics in other majors**

Statistics majors: must include MATH1015/1005/1905 and MATH1003/1903.

Computer Science majors: Should include MATH1005/1905. Biological and other Life Science majors: should include MATH1015/1005/1905.

**Medicinal Chemistry**

Major offered at the Advanced level.

12 credit points of Junior units of study in each of Chemistry + Physics + Mathematics + BIOL1001 or 1101 or 1901 + BIOL1002 or 1003 or 1902 or 1903.

**Microbiology**

Major offered at the Advanced level.

6 credit points of Junior units of study in each of Biology and Molecular Biology and Genetics (MBLG1001) + 12 credit points of Junior Chemistry + Mathematics +12 credit points from units of study from other areas.

**Nanoscience and Technology**

Major offered at the Advanced level.

Physics, Chemistry and Mathematics (including MATH1001/1901 + MATH1002/1902 + MATH1003/1903) + 12 credit points of other Junior units of study selected in consultation with an adviser.

**Neuroscience**

Major possible at the Advanced level.

12 credit points of Junior Mathematics + 24 credit points from Biology, Chemistry, Computer Science, Physics or Psychology + 12 credit points chosen in consultation with an adviser.

**Pharmacology**

Major offered at the Advanced level.

12 credit points of Junior units of study in each of Chemistry + Physics + Mathematics + BIOL1001 or 1101 or 1901 + BIOL1002 or 1003 or 1902 or 1903.

**Physics**

Major offered at the Advanced level.

**Planning for a Physics major**

12 credit points of Junior Physics are needed to enrol in Intermediate units of study in Physics. Students intending to major in Physics should take at least 12 credit points of Intermediate Physics.

**Recommended Junior combinations for a Physics major**

12 credit points of Junior units of study in each of Physics + Mathematics (MATH1001/1901 + MATH1002/1902 + MATH1003/1903 + 1005/1905) + 24 credit points of other Junior units of study selected in consultation with an adviser.

**Junior Physics information**

Your choice of units in Junior Physics in semester 1 is governed by your Physics experience at school.

PHYS1001 (Regular) is for those who scored 65 or more in HSC Physics (or equivalent).
PHYS1002 (Fundamentals) is primarily for those who have not studied physics before, or who scored less than 65 in HSC Physics.

In Semester 2 your choice should be determined by your interests and the direction of your future studies.

Students from any Semester 1 option may move into either PHYS1003 (Technological) or PHYS1004 (Environmental & Life Science). PHYS1003 (Technological) is designed for students interested in the physical sciences and engineering. PHYS1004 (Environmental & Life Science) is designed for students interested in environmental, medical and life sciences.

Advanced Physics
Junior Physics units of study are also offered at the Advanced level.

To enrol in PHYS1901 (Advanced) or PHYS1902 (Advanced) you must have a UAI of 96 or more or a HSC Physics result in Band 6 (or equivalent), or have successfully completed the other Junior Physics (Advanced) unit, or have a Distinction or better in the appropriate non-Advanced Junior Physics unit.

If you have a very high UAI you may be invited to participate in activities of the Physics Talented Student Program (TSP).

Assumed knowledge
A bridging course in Physics is recommended for students who did not study Physics for the HSC.

Other Junior options
Students interested in Astronomy may enrol in PHYS1500 (Semester 2 only). It should be noted that PHYS1500 is a general interest course, has no mathematics or physics requirements and does not count towards the 12 credit points needed for progression to Intermediate Physics (or the BSc (Marine Science) program). Students wishing to pursue careers in Astronomy or Astrophysics should also take other Physics units in order to progress to Intermediate Physics.

Physiology
Major offered at the Advanced level.

6 credit points of Junior Chemistry + 12 credit points of Mathematics + 18 credit points of Junior Chemistry, Biology, Physics, Psychology + 12 credit points from other areas.

Plant Science
Major offered at the Advanced level.

Recommended Junior combinations for a Plant Science major.

12 credit points of Junior Biology are needed to enrol in Intermediate units of study in Plant Science. BIOL(1001 or 1101 or 1901) + BIOL(1002 or 1902) + 12 Junior credit points in Chemistry, Mathematics or Physics.

Psychology
Planning for a Psychology major
12 credit points of Junior Psychology are needed to enrol in Intermediate units of study in Psychology. A major in Psychology requires 24 credit points of Intermediate Psychology plus at least 24 credit points of Senior Psychology. The Psychology major is not offered at the Advanced level.

Recommended Junior combinations for a Psychology major
PSYC1001 + PSYC1002 + 12 credit points of Junior units of study in Mathematics including MATH1015 or 1005 or 1905 (statistics) + 12 credit points of Junior Science electives + 12 credit points of Junior electives.

Junior Psychology Information
PSYC1001 and 1002 provide an introduction to Psychology for all Psychology students.
Bachelor of Science (BSc)

Degree Code: LH000

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
- 12 credit points of elective units of study from Science, Arts, Economics, Engineering or other faculties.

To complete your degree you must gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- at least 96 credit points from Science subject areas;
- at least one major from those included in Table I (see Table I: Bachelor of Science: end of this chapter);
- at least 12 credit points from the Science subject areas of Mathematics and Statistics;
- at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics;
- no more than 60 credit points from Junior units of study;
- all students, notwithstanding any credit transfer, must complete at least 24 credit points of Senior Science units of study towards a major taken at The University of Sydney. A major in the BSc normally requires the completion of 24 credit points of Senior units of study in one Science area, including any units of study specified in the table of undergraduate units of study as compulsory for that major.

You should also note the following:

- a student may not count a unit of study toward more than one major;
- a maximum of 48 credit points may be counted towards the degree requirements from units of study offered by faculties other than the Faculty of Science;
- units of study completed at the University of Sydney Summer School which correspond to units of study permitted to count to this degree may be credited towards the course requirements;
- a standard full time enrolment is 24 credit points per semester; less than 18 credit points per semester is considered to be part time;
- you may not enrol in more than 30 credit points in any one semester without permission;
- you may not enrol in a unit of study, before meeting any prerequisites and corequisites for that unit of study;
- Advanced units of study are indicated by a 9 (or 8) as the second digit of the unit of study code, and usually have higher entry requirements than the equivalent normal units;
- once the award course requirements of 144 credit points have been satisfied a student may not enrol in additional units of study without first obtaining the permission of the Dean; and
- if a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below as well as information about each major and recommended first year combinations of units of study. There is also a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science in this chapter. Unit descriptions follow in Chapter 10. You may also wish to refer to the handbooks of other faculties as the degree resolutions allow.

Honours
There will be Honours courses in all Science subject areas. Please refer to Honours Information and to Table VI: Honours units of study in chapter 12.

Total credit points: 144

Require: 144cp total, one major. 96cp Science, min. 36cp Junior Science incl. 12cp Maths, max. 60cp Junior.

Require: 144 credit points total, one major. Minimum 96 credit points in Science, minimum 36 credit points in Junior Science, including 12 credit points of Maths. Maximum 60 credit points in Junior.
Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Bachelor of Science (Advanced)

Degree Code: LH000 Stream: 4

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
- 12 credit points of elective units of study from Science, Arts, Economics, Engineering or other faculties.
- no more than 48 credit points from Junior units of study;

Advanced students usually take 24 credit points of the above at the Advanced level.

To complete your degree you must satisfy the requirements outlined for the BSc and gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units;
- at least 48 credit points of Senior units of study of which at least 24 credit points are completed at the Advanced level or as TSP units in a single Science subject area; and
- at least 12 credit points from the Science subject areas of Mathematics and Statistics.

Progression requirements
You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the BSc.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is a sample degree program on the next page and a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Honours
There are Honours courses in all Science subject areas. Please refer to Honours Information and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc
Students may transfer into the BSc from any of the streams within the BSc, with the permission of Dean.

Universities Admissions Index (UAI)
The minimum UAI for admission to the course varies from year to year.

Degree resolutions
See chapter 2.

Total credit points: 144

Bachelor of Science (Advanced Mathematics)

Degree Code: LH000 Stream Code: 9

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from Junior Advanced Mathematics and Statistics units of study;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
- 12 credit points of elective units of study from Science, Arts, Economics, Engineering or other faculties.

Advanced students usually take 24 credit points of the above at the Advanced level.

To complete your degree you must satisfy the requirements outlined for the BSc and gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- no more than 48 credit points from Junior units of study;
- at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and
- at least 24 credit points of Senior units of study at which at least 24 credit points are completed at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics. and
- a major in Mathematics or Statistics at advanced level.

Progression requirements
You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the BSc.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about majors in Mathematics and Statistics and recommended first year combinations of units of study. There is a sample degree program below and a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science towards the end of this chapter. Unit descriptions may be found in chapter 10. You may also wish to refer to the handbooks of other faculties as the degree resolutions allow.

Honours
There are Honours courses in Mathematics and Statistics. Please refer to Honours Information and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc (Advanced Mathematics)
Students who have completed at least 48 credit points may, with the permission of the Dean, transfer to the BSc (Advanced Mathematics) from the BSc or any of its streams if their mark averaged over all attempted units of study is 75 or greater, and they are able to enrol in the required number of Advanced level units or TSP units.

Universities Admissions Index (UAI)
The minimum UAI for admission to the Faculty varies from year to year.

Degree resolutions
See chapter 2.

Require: 144cp total, min. 96cp Science, max. 48cp Junior, min 36cp Junior Science incl. 12cp Maths, min. 48cp Senior, min. 12cp Intermediate Advanced and/or TSP, min. 24cp Senior Advanced and/or TSP major.

Combined Science/Medicine degrees

Degree Codes: LH033/LH034

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates.

A student may proceed through the degree of Bachelor of Science (Advanced) or the Bachelor of Medical Science to the degrees of Bachelor of Medicine and Bachelor of Surgery.

Enrolment guide
To qualify for the award of the degrees a student shall complete units of study to a total value of at least 336 credit points including:

- maintaining an AAM of 80 or above in each of the first three years of the program;
- satisfactorily completing five SMTP units in the first three years of the program;
- meeting the requirements of the BSc (Adv) or BMedSc degree outlined above; and
- completing 192 credit points towards the MBBS degree as required by the Resolutions of the Faculty of Medicine.

Progression Requirements
Students are required to maintain a minimum AAM of 80 or above and to satisfactorily complete five SMTP units of study in the first three years of the program. Students who fail to satisfy these requirements will be transferred to the BSc (Adv) or BMedSc.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science (Advanced) or Bachelor of Medical Science entry for information about recommended first year combinations of units of study and the sample degree program. There is a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science in this chapter and Table IV: Bachelor of Medical Science in chapter five. Unit descriptions appear in chapter 10.

Honours
Students who qualify to undertake Honours in the BSc (Adv) or BMedSc degree may elect to do so by either suspending their candidature from the MBBS degree for one year, or after completion of the combined course. Please refer to honours information in chapter 12, and to Table VI: Honours units of study in chapter 12.

Abandoning and discontinuing
Students may abandon the combined degree course and elect to complete the BSc (Adv) or BMedSc degree.

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Supervision
Students will be under the general supervision of the Faculty of Science until the end of the semester in which they complete the requirements for the BSc (Adv) or BMedSc degree. After that they will be under the general supervision of the Faculty of Medicine.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.
### Table 1: Bachelor of Science

Table 1 lists units of study available to students in the Bachelor of Science and combined degrees. The units are available to students enrolled in other degrees in accordance with their degree resolutions.

**ANAT3004 Cranial and Cervical Anatomy**
6 A General knowledge of biology.
P ANAT2002 or ANAT2009 or BMED2803 or BMED2804 or BMED2805 or BMED2806 N ANAT3005 The completion of 6 credit points of MBLG is highly recommended.

**ANAT3008 Musculoskeletal Anatomy**
6 A Some knowledge of basic mammalian biology.
P ANAT2009 or ANAT3002 (for students who completed Intermediate study before 2005) or BMED2803 or BMED2804 or BMED2805 or BMED2806 N ANAT3005

**EMHU3001 Electron Microscopy and Imaging/Theory**
6 A General concepts in Biology and in Biochemistry or in Chemistry.
P At least 12 cp of Intermediate Science units from any of the following: Anatomy & Histology, Biochemistry, Biology, Chemistry, Mathematics, Microbiology, Molecular Biology & Genetics, Pharmacology, Physics, Physiology or Statistics. For BMEdSc students: Credit average in (PHSI(2101 or 2001 or 2005 or 2901) or ANAT(2003 or 2010)) and 6 credit points of MBLG.

**EMHU3002 Electron Microscopy and Imaging/P prac**
6 A General concepts in Biology, Histology and in Biochemistry or in Chemistry.
P 12 cp as follows: 6 cp from ANAT2008 CR 4 cp from ANAT2001 plus at least 6 cp OR 8 cp respectively of Intermediate Science units of study. For BMEdSci: Either 36 credit points of Intermediate units including BMEd(2501, 2503 & 2505) or 42 cp of BMEd Intermediate units including (2801, 2802, 2803 & 2806)
C EMHU3001

**HSTO3002 Cells and Development: Theory**
6 A (i) An understanding of the basic structure of vertebrates; (ii) An understanding of elementary biochemistry and genetics.
P For BSc students: ANAT2008 or ANAT2001 For BMEdSci students: 42 credit points of Intermediate BMED units, including: BMED2801, 2802, 2805. N ANAT3002 The completion of 6 credit points of MBLG is highly recommended.

**HSTO3004 Cells and Development: Practical (Adv)**
6 A Note: This advanced unit of study is only available to select students who have achieved a mark of 65 or above in the following prerequisite units of study. For BMEdSci: ANAT2008 or ANAT2001 and one of the following Intermediate MBLG units (2071, 2871, 2971, 2771, 2801, 2101, 2901).
P For BMEdSci students: 42 credit points of Intermediate BMED units, including: BMED2801, 2802, 2805.
C Emhu3001

**NEUR3003 Cellular and Developmental Neuroscience**
6 A Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain.
P For BMEdSci: 42 credit points of Intermediate BMED units. For others: 18 credit points of Intermediate Science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics
N NEUR3903, PHSI3002, PHSI3902
Enrolment in NEUR3004/3904 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other.

**NEUR3903 Cellular & Developmental Neurosci. (Adv)**
6 A Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain.
P For BMEdSci: 42 credit points of Intermediate BMED units. For others: 18 credit points of Intermediate Science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3901, and NEUR3902.
N NEUR3003, PHSI3002, PHSI3902
Note: Department permission required for enrolment
Enrolment in NEUR3004/3904 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrollment.

**NEUR3004 Integrative Neuroscience**
6 A Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain.
P For BMEdSci: 42 credit points of Intermediate BMED units. For others: 18 credit points of Intermediate Science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3001, and NEUR3902.
N NEUR3004, PHSI3002, PHSI3902
Note: Department permission required for enrolment
Enrolment in NEUR3003/3903 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrollment.

**NEUR3004 Integrative Neuroscience (Advanced)**
6 A Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain.
P For BMEdSci: 42 credit points of Intermediate BMED units. For others: 18 credit points of Intermediate Science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3001, and NEUR3902.
N NEUR3004, PHSI3002, PHSI3902
Note: Department permission required for enrolment
Enrolment in NEUR3003/3903 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrollment.

For other NEUR units, see the Physiology subject area entry in this table.
Bioinformatics

For a major in Bioinformatics, the minimum requirement is 24 credit points from senior units of study in this subject area.

Intermediate units of study

The completion of 6 credit points of MBLG units of study is highly recommended.

Bioinformatics for a major in Bioinformatics, students must complete a minimum of 24 credit points from senior units of study in the Life Sciences, Statistics, and Computer Science including:

- (A) At least one of BIOL3027 or BIOL3927 or BCHM3092 or BCHM3992;
- (B) At least one of STAT3012 or STAT3919 or STAT3014 or STAT3914;
- (C) At least one of SOFT3300 or SOFT3600 or SOFT3301 or SOFT3601;
- (D) At least one additional unit from A or B or C or BINF3101, BINF3101 cannot be credited to the major together with SOFT3300 or SOFT3600

For further information on how to prepare for a major in Bioinformatics, please consult the Faculty of Science’s web page (http://www.science.usyd.edu.au/student/undergrad/course/)

**Bioinformatics major (D) units of study**

At least one unit of study from A or B or C or BINF3101. BINF3101 cannot be credited to the major together with SOFT3300 or SOFT3600.

| BINF3101 Bioinformatics Project | 6             | A 12 credit points from Junior units of study in Software Development (SOFT) and/or Computational Science (COSC) | Semester 2 |

**Biology**

For a major in Biology, the minimum requirement is 24 credit points from senior BIOL units of study listed in this subject area. Senior PLNT units and BIOL3008/3909, 3017/3917 may be counted towards a major in Biology or Plant science, not both.

**Junior units of study**

| BIOL1001 Concepts in Biology | 6             | A No previous knowledge required. Students who have not taken HSC biology are recommended to complete the Biology Bridging Course in February. Students who have completed HSC Biology are advised to enrol in BIOL1101 Ecosystems to Genes rather than BIOL1001. N BIOL1101, BIOL1901, BIOL1101 | Semester 1 |
| BIOL1101 Biology - Ecosystems to Genes | 6             | P HSC 2-unit Biology or equivalent. | N BIOL1001, BIOL1001 | Semester 1 |
| BIOL1901 Biology - Ecosystems to Genes (Advanced) | 6             | P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. | N BIOL1001, BIOL1001 | Semester 1 |
| BIOL1002 Living Systems | 6             | A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are advised to complete a Biology Bridging Course (in February). | N BIOL1002 | Semester 2 |
| BIOL1902 Living Systems (Advanced) | 6             | P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. | N BIOL1002, BIOL1002, BIOL1002 | Semester 2 |
| BIOL1003 Human Biology | 6             | A HSC 2-unit Biology. Students who have not taken HSC biology are recommended to take the Biology Bridging Course in February. | N BIOL1003 | Semester 2 |
### Unit of study | Credit points | A: Assumed knowledge | P: Prerequisites | C: Corequisites | N: Prohibition | Session
---|---|---|---|---|---|---
Biol1903 Human Biology (Advanced) | 6 | P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. | N BIOL1003, BIOL1904, BIOL1905, EDUH1016 | Note: Department permission required for enrolment | Semester 2

### Intermediate units of study
The completion of 6 credit points of MBLG units of study is highly recommended.

**Biol2011 Invertebrate Zoology**
- 6 A The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading.
- P BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBGL1001 or EDUH1016 and 12 credit points of Junior Chemistry.
- For students in BSC (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.
- N BIOL2911, BIOL2001, BIOL2101, BIOL2901

**Biol2911 Invertebrate Zoology (Advanced)**
- 6 A The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading.
- P Distinction average in BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBGL1001 or EDUH1016 and 12 credit points of Junior Chemistry.
- For students in BSC (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.
- N BIOL2911, BIOL2006, BIOL2106, BIOL2906

**Biol2016 Cell Biology**
- 6 P 12 credit points of Junior Biology, or equivalent, e.g. BIOL (1001 or 1101 or 1901) and BIOL (1002 or 1902 or 1003 or 1903) or MBGL1001 or EDUH1016 and 12 credit points of Junior Chemistry.
- For students in BSC (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.
- N BIOL2016, BIOL2006, BIOL2106, BIOL2909

**PLNT2001 Plant Biochemistry and Molecular Biology**
- 6 P 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202)
- N PLNT2001, AGCH2001

**PLNT2001 Plant Biochem & Molecular Biology (Adv)**
- 6 P A Distinction average in 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202)
- N PLNT2001, AGCH2001

**PLNT2002 AUST FLORA: Ecology and Conservation**
- 6 A The contents of BIOL (1002 or 1902) is assumed knowledge. Students wishing to enrol in Intermediate Biology and Plant Science (PLNT) units of study using BIOL (1003 or 1903) will need to do some preparatory reading.
- P 12 credit points from a combination of Junior BIOL or WSCS units of study including two of BIOL (1001, 1901, 1002, 1902, 1003, 1903) WSCS1002, MBGL1001 (or with the Dean's permission BIOL1201 and BIOL1202 may be substituted for the above).
- N PLNT2002, BIOL2004, BIOL2904

- 6 A The contents of BIOL(1002 or 1902) is assumed knowledge. Students wishing to enrol in Intermediate Biology (BIOL) and Plant Science (PLNT) units of study using BIOL(1003 or 1903) will need to do some preparatory reading.
- P Distinction average in 12 credit points from a combination of Junior BIOL or WSCS units of study including two of BIOL (1001, 1901, 1002, 1902, 1003, 1903) WSCS1002, MBGL1001 (or with the Dean's permission BIOL1201 and BIOL1202) These requirements may be varied and students with lower averages should consult the Unit Executive Officer.
- N PLNT2902, BIOL2004, BIOL2904

**ENVI2111 Conservation Biology and Applied Ecology**
- 6 P 24 credit points of Junior Science units, including 12 credit points of Junior Biology
- N ENVI2001, ENVI2911

**ENVI2911 Conservation Biology (Advanced)**
- 6 P Distinction average in BIOL1001 or 1101 or 1901 and either one of BIOL (1002 or 1902 or 1003 or 1903) or EDUH1016. 12 credit points of Junior Chemistry (or for BSC (Marine Science) students 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer.
- N ENVI2001, ENVI2911

**BIOL2012 Vertebrates and their Origins**
- 6 A The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading.
- P Distinction average in BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBGL1001 or EDUH1016 and 12 credit points of Junior Chemistry.
- For students in BSC (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.
- N BIOL2912, BIOL2002, BIOL2102, BIOL2902

**BIOL2912 Vertebrates and their Origins (Advanced)**
- 6 A The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading.
- P Distinction average in BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBGL1001 or EDUH1016 and 12 credit points of Junior Chemistry.
- For students in BSC (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.
- N BIOL2012, BIOL2002, BIOL2102, BIOL2902

The completion of 6 credit points of MBLG units of study is highly recommended.

Chemistry

For a major in chemistry, the minimum requirement is 24 credit points from senior units of study listed in this subject area, which must include the associated laboratory units.

Junior units of study

CHEM1001 Fundamentals of Chemistry 1A
6 A There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence.
N CHEM1101, CHEM1901, CHEM1109, CHEM1903, CHEM1909
Semester 1

CHEM1002 Fundamentals of Chemistry 1B
6 P CHEM(1001 or 1101) or equivalent
N CHEM1102, CHEM1108, CHEM1902, CHEM1904, CHEM1908
Semester 1

CHEM1101 Chemistry 1A
6 A HSC Chemistry and Mathematics
C Recommended concurrent units of study: 6 credit points of Junior Mathematics
N CHEM1001, CHEM1109, CHEM1901, CHEM1903, CHEM1909
Semester 1

CHEM1102 Chemistry 1B
6 P CHEM(1101 or 1109) or a Distinction in CHEM1001 or equivalent
C Recommended concurrent units of study: 6 credit points of Junior Mathematics
N CHEM1002, CHEM1108, CHEM1902, CHEM1904, CHEM1908
Semester 1

CHEM1901 Chemistry 1A (Advanced)
6 P UAI of at least 96.4 and HSC Chemistry result in Band 5 or 6, or Distinction or better in a University level Chemistry unit, or by invitation
C Recommended concurrent unit of study: 6 credit points of Junior Mathematics
N CHEM1001, CHEM1101, CHEM1109, CHEM1903, CHEM1909
Note: Department permission required for enrolment
Semester 1

CHEM1902 Chemistry 1B (Advanced)
6 P CHEM(1901 or 1903) or Distinction in CHEM1101 or equivalent
C Recommended concurrent unit of study: 6 credit points of Junior Mathematics
N CHEM1002, CHEM1102, CHEM1108, CHEM1902, CHEM1904, CHEM1908
Note: Department permission required for enrolment
Semester 1

CHEM1903 Chemistry 1A (Special Studies Program)
6 P UAI of at least 98.7 and HSC Chemistry result in Band 6
C Recommended concurrent unit of study: 6 credit points of Junior Mathematics.
N CHEM (1001 or 1101 or 1109 or 1901 or 1909)
Note: Department permission required for enrolment
Entry is by invitation. This unit of study is deemed to be an Advanced unit of study.
Semester 1

CHEM1904 Chemistry 1B (Special Studies Program)
6 A Distinction in CHEM1903
C Recommended concurrent units of study: 6 credit points of Junior Mathematics.
N CHEM1002, CHEM1102, CHEM1108, CHEM1902, CHEM1908
Note: Department permission required for enrolment
Entry is by invitation. This unit of study is deemed to be an Advanced unit of study.
Semester 1

Intermediate units of study

CHEM2401 Molecular Reactivity and Spectroscopy
6 P CHEM(1102 or 1902 or 1904 or 1909 or 1612); 6 credit points of Junior Mathematics
N CHEM2001, CHEM2101, CHEM2301, CHEM2311, CHEM2502, CHEM2901, CHEM2903, CHEM2911, CHEM2915
Semester 1

CHEM2402 Chemical Structure and Stability
6 P CHEM(1102 or 1902 or 1904 or 1909 or 1612); 6 credit points of Junior Mathematics
N CHEM2002, CHEM2001, CHEM2902, CHEM2906, CHEM2912, CHEM2916
This is the main chemistry unit of study for students expecting to major in chemistry
Semester 2

CHEM2403 Chemistry of Biological Molecules
6 P 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics
N CHEM2001, CHEM2901, CHEM2902, CHEM2903, CHEM2913
To enrol in Senior Chemistry in 2008 it will be a requirement that students complete CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.
Semester 2

CHEM2404 Forensic and Environmental Chemistry
6 P 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics
N CHEM1017, CHEM2917
To enrol in Senior Chemistry in 2008 it will be a requirement that students complete CHEM(2401 or 2911 or 2915) and CHEM(2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.
Semester 1

CHEM2911 Molecular Reactivity & Spectroscopy Adv
6 P Credit average or better in CHEM(1101 or 1901 or 1903 or 1907 or 1908) and CHEM(1102 or 1902 or 1904 or 1909); 6 credit points of Junior Mathematics.

### Computational Science

For a major in Computational Science the minimum requirement is 24 credit points chosen from the core or elective senior units of study listed for this subject area, of which at least 12 credit points must be from the core senior units of study.

#### Junior units of study

| COSC1901 | Computational Science in Matlab | 3 | A HSC Mathematics | N COSC1901 | Semester 2 |
| COSC1901 | Computational Science in Matlab (Adv) | 3 | A HSC Mathematics | P UAI of at least 90, or COSC1902, or a distinction or better in COSC1002, SOFT (1001, 1002, 1901 or 1902), N COSC1001 | Semester 2 |
| COSC1002 | Computational Science in C | 3 | A HSC Mathematics | N COSC1902 | Semester 2 |
| COSC1902 | Computational Science in C (Adv) | 3 | A HSC Mathematics | P UAI of at least 90, or COSC1901, or a distinction or better in COSC1001, SOFT (1001, 1002, 1901 or 1902), N COSC1002 | Semester 2 |

#### Senior core units of study

| COSC3011 | Scientific Computing | 6 | A Programming experience in MATLAB | P 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. | N COSC3911, COSC3901, COSC3901, PHYS3301, PHYS3901 | Semester 1 |
| COSC3911 | Scientific Computing (Advanced) | 6 | A Programming experience in MATLAB | P 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas with a credit average. | N COSC3901, COSC3901, COSC3901, PHYS3301, PHYS3901 | Semester 1 |
| COSC3912 | Parallel Computing & Visualisation | 6 | A Programming experience in C and MATLAB or equivalent. | P 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. | N COSC3912, COSC3902, COSC3902, COSC3901, PHYS3303, PHYS3933 | Semester 2 |
| COSC3912 | Parallel Computing & Visualisation (Adv) | 6 | A Programming experience in C and MATLAB or equivalent. | P 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. | N COSC3912, COSC3902, COSC3902, COSC3901, PHYS3303, PHYS3933 | Semester 2 |
| MATH3076 | Mathematical Computing | 6 | P 12 credit points of Intermediate Mathematics and one of MATH(1001 or 1003 or 1901 or 1903 or 1906 or 1907) | N MATH3976, MATH3016, MATH3916 | Semester 1 |
| MATH3976 | Mathematical Computing (Advanced) | 6 | P 12 credit points of Intermediate Mathematics and one of MATH(1903 or 1907) or Credit in MATH1903 | N MATH3076, MATH3016, MATH3916 | Semester 1 |

#### Senior elective units of study

| BIINF3101 | Bioinformatics Project | 6 | A 12 credit points from Junior units of study in Software Development (SOFT) and/or Computational Science (COSC) | P SOFT (2130 or 2830 or 2004 or 2904) and 12 credit points from Intermediate Biology, Biochemistry, Microbiology, Molecular Biology and Genetics and/or Pharmacology | N COMP3206, BIINF3001 | Semester 2 |
| BIOL3006 | Ecological Methods | 6 | A BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 2902). | P 12 credit points of intermediate level Biology or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. | N BIOL3906, BIOL3023, BIOL3923, MARS3102 | Semester 1 |
| BIOL3906 | Ecological Methods (Advanced) | 6 | A BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 2902). | P Distinction average in 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. | N BIOL3006, BIOL3023, BIOL3923, MARS3102 | Semester 1 |
| BIOL3027 | Bioinformatics and Genomics | 6 | P 12 credit points from MBLG (2001/2901/2071/2971/2771/2871), MBLG (2002/2902/2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate MARS units, including MARS2006 or MARS2007. | N BIOL3927 | Semester 1 |
| BIOL3927 | Bioinformatics and Genomics (Advanced) | 6 | P Distinction average in 12 credit points from MBLG (2001/2901/2071/2971/2771/2871), MBLG (2002/2902/2072/2972) and Intermediate Biology units. For BMedSc students: 36 credit points of Intermediate MARS units, including Distinction in MARS2006 or MARS2007. | N BIOL3027 | Semester 1 |
| GEOS3007 | Dynamics of Continents and Basins | 6 | P (6 credit points of Intermediate Geoscience units) and (6 further credit points of Intermediate Geoscience or 6 credit points of Physics, Mathematics, Information Technology or Engineering units) or (MARS2005 or MARS2905) and (MARS2006 or MARS2906). | N GEOL3101, GEOS3903 | Semester 1 |
For a major in Computational Science the minimum requirement is 24 credit points chosen from the senior units of study listed for this subject area.

For a major in Medicinal chemistry, the minimum requirement is 24 credit points comprising:
(i) PCOL3011/3911 and PCOL3012/3912 and
(ii) 12 credit points from senior Chemistry units of study.
### Microbiology

The completion of MBLG(1000 or 2771 or 2001 or 2101) is highly recommended.

Nanoscience and Technology

A major in Nanoscience and Technology requires 24 credit points of study at senior level taken from the following:

- Materials Chemistry (CHEM3112 or CHEM3912)
- Membranes, Self-Assembly & Surfaces (CHEM3116 or 3916)
- Senior physics units containing the Nanoscience lecture module (PHYS3054/3954, 3055/3955 or 3057/3957)
- Quantum Mechanics, Condensed Matter and Physics Laboratory (PHYS3062/3962)
- Mechanics of Solids 2 (MECH3361)
- Materials (MECH3362)

For a major in Neuroscience, students are required to complete at least 24 credit points of the senior elective units of study listed below.

### Intermediate elective units of study

Intermediate units should be chosen from the following units of study: ANAT2010 is strongly recommended. ANAT2010, MBLG2071/2971 or MBLG2072/2972, PCOL2012, PCOL2013, PHSI2005, PHSI2006/2906, PSYC2012, PSYC2013.

### ANAT2010
**Concepts of Neuroanatomy**
- **6 credit points of Junior Biology and 6 credit points of Junior Chemistry or MBLG1001.**
- **6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics units of study.**
- **A background in basic mammalian biology.**
  - BIO1 (1001 or 1002) and one of: BIO2 (1002 or 1003 or 1003) or PSYC (1001 and 1002).
  - N ANAT2003

### MBLG2071
**Molecular Biology and Genetics A**
- **6 credit points of Junior Chemistry and Distinction in MBLG1001**
  - Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course prior to enrolling in this unit.

### MBLG2971
**Molecular Biology and Genetics A (Adv)**
- **6 credit points of Junior Chemistry and Distinction in MBLG2011**
  - Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course prior to enrolling in this unit.

### MBLG2072
**Molecular Biology and Genetics B**
- **6 credit points of Junior Chemistry and Distinction in MBLG2901**
  - MBLG2072, MBLG2772, MBLG2872, MBLG2902, MBLG2012, MBLG2022, MBLG2902
  - Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course prior to enrolling in this unit.

### MBLG2972
**Molecular Biology and Genetics B (Adv)**
- **6 credit points of Junior Chemistry and Distinction in MBLG2901**
  - MBLG2972, MBLG2772, MBLG2872, MBLG2902, MBLG2012, MBLG2022, MBLG2902

### PCOL2011
**Pharmacology Fundamentals**
- **6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBLG1001.**
- N PCOL2001

### PCOL2012
**Pharmacology: Drugs and People**
- **6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBLG1001.**
- N PCOL2002, PCOL2003

### PHSI2005
**Integrated Physiology A**
- **6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics units of study.**
  - The completion of 6 credit points of MBLG units of study is highly recommended for progression to Senior Physiology. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites.

### PHSI2905
**Integrated Physiology A (Advanced)**
- **6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics units of study.**

### Senior elective units of study

For a major in Neuroscience, 24 credit points must be chosen from any of the following units: PCOL3223/3923, NEUR3001/3901, NEUR3002/3902, NEUR3003/3903, NEUR3004/3904, PSYC3011, PSYC3013, PSYC3014

At least two subject areas must be chosen from NEUR, PSYC and PCOL.

### PCOL3022
**Neuropharmacology**
- **6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBLG1001.**
- N PCOL3002, PCOL3902, PCOL3922

### PCOL3922
**Neuropharmacology (Advanced)**
- **6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBLG1001.**
- N PCOL3002, PCOL3902, PCOL3922
### Pharmacology

For a major in Pharmacology, the minimum requirement is 24 credit points from senior units of study listed in this subject area.
### Intermediate units of study

The completion of MBLG(2001 or 2101 or 2901) is highly recommended.

### Physics

For a major in Physics, the minimum requirement is 24 credit points from senior units of study listed in this subject area which must include:

(i) One semester 1 Core unit (PHYS1001, 1002 or 1003)
(ii) One semester 2 Core unit (PHYS1901, 1902 or 1903)
(iii) Two other non-over-lapping Options units (chosen from PHYS305x, 395x, 307x and 397x)

Note that one Senior Computational Science unit (COSC3011/3911 or 3012/3912) may be included in a Physics major as one of the options.

### Bachelor of Science, BSc(Adv), BSc(Adv Maths), BSc(Adv)/MBBS

Psychology

For a major in Psychology, the minimum requirement is 48 credit points across intermediate and senior psychology* units of study including PSYC (2111 or 2011), PSYC (2112 or 2012), PSYC (2113 or 2013) and PSYC (2114 or 2014). No other intermediate psychology units can be counted towards the major. You must complete at least 24 (30 fo BPsych) credit points of Senior Psychology for a major. The senior units must include at least one of PSYC3011, 3012, 3013 and 3014. Students who want to be eligible for entry to the Honours or GDS 4th year programs must also include PSYC3010.

*Note: HPSC3023 Psychology & Psychiatry: History & Phil is available for senior Psychology students and will count towards a major in Psychology. Successful completion of this unit of study is essential for students intending to take the Theoretical Thesis option in Psychology Honours.

**Study in other Faculties**

A total of 48 credit points of units of study from non-Science discipline areas may be counted towards the Bachelor of Science degree. Students should consult the Handbooks from other faculties to determine any prerequisites, corequisites or other requirements relating to enrolment in units of study offered by departments in these faculties. Students may not enrol in Concepts and Issues in Physical Science (PHYS1600) or General Statistical Methods 1 (STAT1021) or General Statistical Methods 2 (STAT1022) or Econometrics first year units, or any other unit of study deemed mutually exclusive with units of study listed in this Table. Students enrolled in the combined BSc/BCom program may enrol in Econometrics 1A (ECMT1010). Students may not enrol in LAWS units of study, unless enrolled in the combined BSc/Lib degree.
3. Bachelor of Science, BSc(Adv), BSc(Adv Maths), BSc(Adv)/MBBS
4. Bachelor of Science specialist degree programs

This chapter is intended to give enrolment advice to undergraduate students in the Faculty of Science enrolling in specialist Bachelor of Science degrees. You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It should be stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The tables of undergraduate units of study available for each degree and unit descriptions appear in this chapter, and Table 1 of the Bachelor of Science degree in chapter 3.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

Special Arrangements
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

Special Consideration
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

Code of Conduct for Students
The University has clear expectations of students in respect of academic matters and personal behaviour.

Student Plagiarism: Coursework Policy and Procedure
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided elsewhere in this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

Enrolment day FAQs

What is a ‘major’?
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree. Specialist Bachelor of Science degrees have been designed to develop your knowledge and skills in a particular area. Students enrolling in specialist degree programs do not have majors, but do have a specialisation.

How many credit points should I take per semester?
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

Do I need to be full-time?
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students. International students are required to be full-time.

Can I take units of study from other faculties?
Students in specialist degrees may have room for some electives. In some instances, these electives may be taken from other Faculties. Consult your degree resolutions and sample degree table.

Can I receive credit for previous tertiary study?
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.

On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus-outline, and should include the credit point value, learning outcomes, assessment details, texts and references, and contact details for each unit of study. You must bring this information with you on the day that you enrol. On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook. Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year.
Bachelor of Science (Bioinformatics)

Degree Code: LH019
Summary of requirements

Note that this degree is not available to new students in 2007. A new major in Bioinformatics is available to students enrolling in the BSc.

The requirements for the degree are set out in Table IA: Bachelor of Science (Bioinformatics) (see chapter 3) and the Senate and Faculty Resolutions (see chapter 5) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 6 credit points of Junior units of study in the Science subject area of Biology;
- 6 credit points of Junior units of study in the Science subject area of Molecular Biology and Genetics (i.e. MBLG1001);
- 12 credit points of Junior units of study in the Science subject area of Chemistry; and
- 12 credit points of Junior units of study in the Science subject area of Computer Science (i.e. SOFT1001/1901 and SOFT1002/1902).

To complete your degree you must gain credit for at least 144 credit points as specified in Table IA: Bachelor of Science (Bioinformatics).

Plans of study
It is very important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below including information. See the Bachelor of Science entry for information about majors and recommended first year combinations of units of study. There is also a degree planner inside the back cover.

Units of study
The Science units of study available for this degree are set out in Table IA: Bachelor of Science (Bioinformatics) and in Table I: Bachelor of Science in chapter 3. Unit of study descriptions follow the tables.

Honours
There are Honours courses in Science subject areas suitable for Bioinformatics students. Please refer to "Honours in the Faculty of Science" in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc (Bioinformatics)
Students are not permitted to transfer into this degree.

Degree resolutions
See chapter 2.

Bachelor of Science (Environmental)

Degree Code: LH017

Summary of requirements

Note that this degree is not available to new students in 2007. A new major in Environmental Studies is available to students enrolling in the Bachelor of Science degree.

The requirements for the degree are set out in Table IB: Bachelor of Science (Environmental) (see below) and the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide

In your Junior year you should complete:

• ENVI1002 and GEOL1002;
• 12 credit points from the Science subject areas of Mathematics and Statistics;
• 12 credit points of Junior units of study in the Science subject area of Biology;
• 12 credit points of Junior units of study in the Science subject area of Chemistry; and
• The study of some Biology, Chemistry or Mathematics at the Advanced level is recommended but not compulsory.

To complete your degree you must gain credit for at least 144 credit points as specified in Table IB: Bachelor of Science (Environmental). The 144 credit points required for the degree must include:

• the Intermediate Environmental Science units of study, ENVI2111 and ENVI2112;
• the Senior Environmental Science units of study, ENVI3111, ENVI3112, ENVI3113 and ENVI3114.

Plans of study

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for additional information. There is also a degree planner inside the back cover.

Students can also check the Environmental Science website for further information.

Units of study

The Science units of study available for this degree are set out in Table IB: Bachelor of Science (Environmental) and in Table I: Bachelor of Science in chapter 10. Unit descriptions follow the tables.

Honours

There are Honours courses in Science subject areas suitable for Environmental Science students. Please refer to “Honours in the Faculty of Science” in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission

You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc (Environmental)

This degree is not available for transfer in 2007.

Degree resolutions

See chapter 2.

Bachelor of Science (Marine Science)

Degree Code: LH021
Summary of requirements

The requirements for the degree are set out in Table IC: Bachelor of Science (Marine Science) (see this chapter) and the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 12 credit points of Junior units of study in the Science subject area of Biology;
- 12 credit points of Junior units of study in the Science subject areas of Geosciences;
- PHYS1001 or 1002 or 1901; and
- CHEM1001 or 1101 or 1901.

Some study at the Advanced level is recommended but not compulsory.

To complete your degree you must gain credit for at least 144 credit points as specified in Table IC: Bachelor of Science (Marine Science). The 144 credit points required for the degree must include:

- 18 credit points from Intermediate Marine Science units of study;
- 36 credit points from Senior Marine Science units of study; and
- no more than 48 credit points from Junior units of study.

You should also note that a stream of study is available in Tropical Marine Science within this degree program. No more than 12 credit points of Tropical Marine Science (NTMP) can be taken in any one year, and no more than 18 credit points of NTMP can count towards the degree.

The NTMP units of study are offered in block/intensive mode during Easter and July breaks and there is only a limited number of places available in each. Students may enrol in NTMP units of study starting in their Intermediate year (students must contact the Faculty Office for permission to enrol in these units of study) but places are not guaranteed and will be assigned based on merit.

The NTMP units of study are conducted at the following field stations in Queensland: North Stradbroke Island, Heron Island, Lizard Island, Orpheus Island, and One Tree Island, and students are responsible for their own travel and accommodation costs. Consult the University of Sydney Institute for Marine Science (USIMS) for further information.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for additional information. There is also a degree planner inside the back cover. Consultation with a Faculty or USIMS adviser is always recommended. Students can also check the Marine Science website for further information.

Units of study
The Science units of study available for this degree are set out in Table IC: Bachelor of Science (Marine Science), Table IB: Bachelor of Science (Environmental) and in Table I: Bachelor of Science in chapter 3.

Honours
There is an Honours course in Marine Science. Please refer to "Honours in the Faculty of Science" in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring to the BSc (Marine Science)
Students may be permitted to transfer from other courses offered by the Faculty of Science or any of its streams into the BSc (Marine Science) with permission of the Dean.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.

Bachelor of Science (Molecular Biology and Genetics)

Degree Code: LH018

Summary of requirements

The requirements for the degree are set out in Table ID: Bachelor of Science (Molecular Biology and Genetics) (see below) and the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide

In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics (it is recommended that students take units that assume completion of HSC Mathematics Extension 1 or 2 and include some statistics);
- BIOL(1001 or 1101 or 1901) and (1002 or 1003 or 1902 or 1903) (BIOL1901 and BIOL1902/3 is the preferred option);
- 12 credit points of Junior units of study in the Science subject area of Chemistry (CHEM1108 and 1109 is the preferred option); and
- MBLG1001 and MBLG1999; and
- 6 credit points of elective Junior Science units of study: Physics or Computer Science are recommended.

To complete your degree you must gain credit for at least 144 credit points as specified in Table ID: Bachelor of Science (Molecular Biology and Genetics). All students in the Bachelor of Science (Molecular Biology and Genetics) must complete:

- at least 48 credit points of Intermediate units of study; and
- at least 48 credit points of Senior units of study of which at least 24 credit points are in a single Science subject area.

Progression requirements

You should note that you must maintain in units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the BSc.

Plans of study

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for additional information. There is also a degree planner inside the back cover. Consultation with the degree coordinator or a Faculty adviser is always recommended.

Units of study

The Science units of study available for this degree are set out in Table ID: Bachelor of Science (Molecular Biology and Genetics) and in Table I: Bachelor of Science in chapter 10. Unit descriptions follow the tables.

Honours

There are Honours courses in Science subject areas suitable for Molecular Biology and Genetics students. Please refer to "Honours in the Faculty of Science" in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission

You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc (Molecular Biology and Genetics)

Students who have completed at least 48 credit points may, with the permission of the Dean, be permitted to transfer to the BSc (Molecular Biology and Genetics) from the BSc or any of its streams if their mark averaged over all attempted units of study is 75 or greater.

Universities Admissions Index (UAI)

The minimum UAI for admission into the course varies from year to year.

Degree resolutions

See chapter 2.

Bachelor of Science (Molecular Biotechnology)

Degree Code: LH022  
Summary of requirements
This degree program is taught mainly by departments in the Faculty of Science and includes industry participation.

The requirements for the degree are set out in Table IE: Bachelor of Science (Molecular Biotechnology) (see this chapter) and the Senate and Faculty Resolutions (see chapter 12) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 12 credit points of Junior units of study in the Science subject area of Biology;
- 12 credit points of Junior units of study in the Science subject area of Chemistry (preferred combination is CHEM1108 and CHEM1109);
- MBLG1001; and
- 6 credit points of elective units of study from Science, Agriculture, Arts, Economics, Engineering or other faculties.

To complete your degree you must gain credit for at least 144 credit points as specified in Table IE: Bachelor of Science (Molecular Biotechnology).

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for additional information. There is also a degree planner inside the back cover.

Bachelor of Science (Nutrition)

Degree Code: LH020

The requirements for the degree are set out in Table IF: Bachelor of Science (Nutrition) (see this chapter) and the Senate and Faculty Resolutions (see Chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Enrolment guide

In your Junior year you should complete:

- 12 credit points in the Science subject areas of Mathematics and Statistics;
- 12 credit points in the Science subject area of Biology;
- 12 credit points in the Science subject area of Chemistry (CHEM1108 and CHEM1109 preferred option);
- 6 credit points in the Science subject areas of Computer Science, Physics or Psychology; and
- MBLG1001.

To complete your degree you must gain credit for at least 192 credit points in total as specified in Table IF: Bachelor of Science (Nutrition).

Plans of study

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. There is also a degree planner inside the back cover.

Units of study

The Science units of study available for this degree are set out in Table IF: Bachelor of Science (Nutrition) and in Table I: Bachelor of Science in chapter 3.

Progression requirements

A minimum requirement for progression in the BSc (Nutrition) will be set annually and will be based on WAM. Students must achieve a WAM of 60 in Junior year and a WAM of 65 in Intermediate and Senior years, or be transferred to the BSc.

Honours

Please refer to "Honours in the Faculty of Science" in this chapter, and to Table VI: Honours units of study in chapter 12. Candidates for the Honours degree in Nutrition shall complete an Honours program in either (1) clinical strand or (2) by research. Students who enrol in the BSc (Nutrition) in order to achieve accreditation as a dietitian will need to complete the clinical strand.

Discontinuation

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission

You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BSc (Nutrition)

Students may transfer from other courses offered by the Faculty of Science or any of its streams into the BSc (Nutrition) with the permission of the Dean.

Universities Admissions Index (UAI)

The minimum UAI for admission into the course varies from year to year.

Degree resolutions

See chapter 2.

</tbody>
</table>

A. Junior units of study

Candidates are required to enrol in and complete:

(i) BIOI(1001 or 1101 or 1901) and BIOI(1002 or 1002 or 1003 or 1003);
(ii) 12 credit points of Junior Chemistry;
(iii) 12 credit points of Junior units of study from the Science Subject Area of Mathematics;
(iv) 6 credit points of other Junior units of study from the Science Subject Areas of Computer Science, Physics or Psychology; and
(v) MBLG1001.

B. Intermediate units of study

In order to proceed to the Intermediate year, candidates for the BSc (Nutrition) must achieve a WAM of 60 in their Junior year. Candidates who fail to maintain the required average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Nutrition) candidates. Candidates who fail to achieve the required average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science.

In the Intermediate year candidates are required to enrol in and complete:

(i) NUTR2911 and NUTR2912;
(ii) MBLG 2071 or 2971;
(iii) BCHM(2072 or 2972);
(iv) PHSI2005 and PHSI2006; and
(v) MICR2021 and MICR2022 or at least 12 credit points of Intermediate units of study (6 credit points each semester) from the Science Subject Areas of Chemistry or Pharmacology.

NUTR2911 Food Science Introductory (Advanced) 6 P MBLG1001 and CHEM (1001 or 1101 or 1901 or 1903 or 1909) and CHEM (1002 or 1102 or 1902 or 1904 or 1908) and BIOI (1001 or 1101 or 1901 and 1002 or 1902 or 1903); For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course. Semester 1

NUTR2912 Nutritional Science Introductory (Adv) 6 A NUTR2911 P MBLG1001 and CHEM (1001 or 1101 or 1901 or 1903 or 1909) and CHEM (1002 or 1102 or 1902 or 1904 or 1908) and BIOI (1001 or 1101 or 1901 and 1002 or 1902 or 1903); For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course. Semester 2

C. Senior units of study

In order to proceed to the Senior year, candidates for the BSc (Nutrition) must achieve a WAM of 65 in their Intermediate year. Candidates who fail to maintain the required Credit average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Nutrition) candidates.

In the Senior year candidates are required to enrol in and complete:

(i) NUTR3911, 3921, 3912 and 3922;
(ii) BCHM(3082 or 3982) and BCHM(3072 or 3972); and
4. Bachelor of Science specialist degree programs

D. Honours units of study

In order to proceed to the Honours year, candidates must achieve a WAM of at least Credit (65), and results of at least Credit (65) in all of NUTR 3911, 3921, 3912 and 3922.

Candidates who fail to achieve the required results across the Senior units of study will be transferred to candidature for the Bachelor of Science degree, and if they have otherwise completed the requirements for the BSc Pass degree, will be awarded the Bachelor of Science with a major in Nutrition.

Candidates enrol in and complete either:

(i) Bachelor of Science (Nutrition) Nutrition and Dietetics Honours: NUTR4001 and NUTR4002 and NUTR4999; OR

(ii) Bachelor of Science (Nutrition) Nutrition Honours: NUTR4101, NUTR4102, NUTR4103 and NUTR4104.

E. Combined degree program: Bachelor of Applied Science (Exercise and Sport Science)/Bachelor of Science (Nutrition)

Candidates must complete over 10 semesters the following units of study. In order to proceed from Year 1 to Year 2 of the program candidates must achieve a year WAM of at least 60. In order to proceed to the following years of the program a candidate must achieve at least 65 in each of NUTR 2911, NUTR 2912, NUTR 3911, NUTR 3921, NUTR 3912 and NUTR 3922, and a year WAM of at least 65 in Years 2 - 4. Candidates who fail to maintain these results in any year will be transferred to either the BSc(LH000), the BAppSc(ExSpSc)(SH088) or the BAppSc(ExSpSc&Nutr)(SH115).

Candidates are required to enrol in and complete their first year:

(i) 12 credit points of Junior Chemistry;

(ii) BACH1161;

(iii) BIOS1159, 1133 and 1160;

(iv) EXSS1018 and 1033; and

(v) MBLG1001.

Year 2

Candidates are required to enrol in and complete their second year:

(i) BCHM2072 and BIOS 2098;

(ii) EXSS2019, 1029 and 2022;

(iii) MATH1015 and MBLG2071; and

(iv) NUTR2911 and NUTR2912.

Year 3

Candidates are required to enrol in and complete their third year:

(i) EXSS(2016, 2018, 3023, 3024, 2025, 2026 and 3027);

(ii) MATH1011 and STAT2012.

Year 4

Candidates are required to enrol in and complete their fourth year:

(i) NUTR3911, NUTR3921, NUTR3912 and NUTR3922;

(ii) EXSS3037 and EXSS3042;

(iii) BCHM3082 and BCHM3072.

Students can exit here with BAppSc(Exercise, Sports Science and Nutrition).

Year 5 (First offered in 2008)

Honours units of study

Candidates intending to graduate with Honours in Nutrition and Dietetics are required to enrol in and complete in their fifth year:

(i) NUTR4001 and NUTR4002 and NUTR4999

Candidates intending to graduate with Honours in Nutrition are required to enrol in and complete in their fifth year:

(i) NUTR4101 and NUTR4102 and NUTR4103 and NUTR4104.
5. Bachelor of Medical Science and BMedSc/MBBS

This chapter is intended to give enrolment advice to undergraduate Bachelor of Medical Science students in the Faculty of Science. You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It is stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The tables of undergraduate units of study available for each degree appear towards the end of this chapter. Unit of study descriptions may be found in Chapter 10.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

**Special Arrangements**
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

**Special Consideration**
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

**Code of Conduct for Students**
The University has clear expectations of students in respect of academic matters and personal behaviour.

**Student Plagiarism: Coursework Policy and Procedure**
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided in Chapter 1 of this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

**Enrolment day FAQs**

**What is a ‘major’?**
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree.

A major is usually defined as 24 credit points of study at the Senior level in a single Science Area.

The Bachelor of Medical Science does not have majors.

**How many credit points should I take per semester?**
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree.

Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summary and sample program in this chapter assume you will enrol full-time.

**Do I need to be full-time?**
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students.

International students are required to be full-time.

**Can I take units of study from other faculties?**
Yes – generally you can take any unit of study offered by the Faculty of Arts and the Faculty of Economics where you have space for non-Medical Science electives. Lists of available units of study will be available on enrolment day, or in each faculty's handbook. Each Faculty website has links to Departmental and unit of study information.

Also available are undergraduate units from any other faculty at the University. The onus is on you to get written permission from the relevant department and bring it to the Faculty of Science.

There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

**Can I receive credit for previous tertiary study?**
I have been made an offer for the Bachelor of Medical Science (1st year entry) can I apply for credit for previous tertiary study?

Yes. However, students enrolling as new students into the Bachelor of Medical Science award course are advised that credit will not enable you to proceed directly into core Intermediate BMED units of study. Prerequisites for Intermediate BMED units of study are such that anything less than 42 credit points of Junior units of study specified in the resolutions for the degree will not enable students to undertake these units on entry to the award course. Only students admitted into Second-year Entry for the Bachelor of Medical Science (UAC code:512081/522081) will be able to proceed directly into second-year units of study.

No more than 48 credit points of credit can be offered towards the Bachelor of Medical Science. Credit will only be offered at junior level. On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.
The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus/outline, and should include the credit point value, learning outcomes, assessment details, texts and references, and contact details for each unit of study. You must bring this information with on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the application process for credit, including the application form, is available from the Faculty of Science website.

**I have an offer for Bachelor of Medical Science (2nd year entry) do I need to apply for credit?**

NO, credit will be granted upon enrolment. You will enrol in second year units of study on the day of enrolment.

**Are there any bridging courses available?**

There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn’t take a subject at the HSC or feel they need some revision.

**Who can enrol in Advanced units of study?**

Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in Advanced level subjects in the first year of study. You must obtain special permission to enrol in any Advanced unit of study except Software. For Software Advanced units of study, you must meet the criteria listed on the permission form for Advanced units of study. The departmental advisers have copies of the permission form for Advanced units of study.

Students should also consult the unit of study Tables for assumed and prerequisite marks in the HSC required to enrol in Advanced units of study.

It is recommended that you enrol in no more than 24 credit points of Advanced units of study in a year. Advanced units of study are very demanding and students are required to perform at a higher standard than in the normal units of study.

**What is the Talented Student Program?**

The Talented Student Program (TSP) is unique to the University of Sydney. It is tailored to meet students’ individual needs and is restricted to the very top students.

Students may be able to bypass some first year study and enrol directly in a second year course. If you have outstanding results in any of your HSC science subjects you may wish to negotiate a special program of study with one of the departments in the Faculty of Science.

The Talented Student Program is available in most areas of Science. Students receive special supervision by academic staff and often engage in studies on an individual basis with small numbers of fellow students, all of whom have a special interest in the same subject.

**Am I eligible for the Talented Student Program?**

Entry to the TSP is by invitation from the Dean which you should have received by the time you enrol. The following guidelines apply generally, although Departments may have additional (and sometimes more stringent) requirements for entry into the program. To get into the program in your first year, you should normally have a UAI (or equivalent) of at least 99.00 and a result in band 6 in at least one HSC science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. For entry into the program in your second and third years, you should normally have a weighted average mark of 85 or over and a high distinction grade in the relevant subject area.

---

**Bachelor of Medical Science (BMedSc)**

**Degree Code:** LH010

**Summary of requirements**

The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree.

Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

**Enrolment guide**

To complete your degree you must gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- at least 48 credit points from Junior units of study, comprising MBLG1001 and 12 credit points each from Chemistry, Mathematics and Physics or Computational Science and 6 credit points from Biology;
- no more than 60 credit points from Junior units of study;
- 48 credit points of Intermediate core units of study listed in Table IV;
- at least 36 credit points of Senior units of study taken from the subject areas of Anatomy/Histology, Biology (Genetics), Biochemistry, Cell Pathology, Immunology, Infectious Diseases, Microbiology, Pharmacology and Physiology;
- no more than 12 credit points from units of study other than core units of study.

Students are required to have completed at least 32 credit points of the core Intermediate units of study prior to enrolment in any Senior units of study. It is possible for students to ‘carry’ up to 8 credit points of core or elective units from the Intermediate year into the Senior year, provided that these units of study are not prerequisites for electives they may wish to undertake in the Senior Year.

You should also note the following:

- you cannot count any unit of study with the grade Pass (Concessional) toward the degree
- units of study completed at the University of Sydney Summer School which correspond to units of study in the table of undergraduate units of study may be credited towards the course requirements
- a standard full time enrolment is 24 credit points per semester; less than 18 credit points per semester is considered to be part time
- you may not enrol in more than 30 credit points in any one semester without permission
- in order to enrol in a unit of study, you have to meet any prerequisites and corequisites for that unit of study
- Advanced units of study are indicated by a 9 (or 8) as the second digit of the unit of study code. Entry to these units of study is limited (details can be obtained from departments)
- once the award course requirements of 144 credit points have been satisfied a student may not enrol in additional units of study without first obtaining permission from the Dean.
• if a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.
• The combination MATH1003 and 1904 or 1903 and 1904 is not recommended in this degree. Students wishing to study Statistics/Calculus are advised to select from MATH1003, 1005, 1903, 1905, 1013, 1015.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below and there is also a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table IV: Bachelor of Medical Science and in Table I: Bachelor of Science in chapter 3. Unit descriptions follow the tables.

Honours
There will be Honours courses in Anatomy, Biochemistry, Biology (Genetics), Cell Pathology, Histology and Embryology, Immunology, Infectious Diseases, Microbiology, Pharmacology and Physiology. Please refer to ‘Honours in the Faculty of Science’ in this chapter, and Table VI: Honours units of study in chapter 3.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BMedSc degree program
A limited number of students may be permitted to transfer into the BMedSc course at the beginning of the Intermediate year from other degrees offered by the Faculty, from other degrees offered by The University of Sydney or from other institutions. In order to transfer students must achieve a Pass or better in all of the qualifying units of study, or units of study deemed equivalent by the Faculty. Selection is based solely on performance in the first year subjects. Applicants should anticipate a WAM of about 75 would be necessary to gain admission. Students who wish to transfer must apply for admission to the BMedSc course through the Universities Admission Centre.

Universities Admissions Index (UAI)
The minimum UAI for admission to the course varies from year to year.

BMedSc degree resolutions
See chapter 2.

Combined BMedSc/MBBS degree

Degree Codes: LH033/LH034

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates.

A student may proceed through the degree of Bachelor of Science (Advanced) or the Bachelor of Medical Science to the degrees of Bachelor of Medicine and Bachelor of Surgery.

Enrolment guide
To qualify for the award of the degrees a student shall complete units of study to a total value of at least 336 credit points, and

- maintain a AAM of 80 or above in each of the first three years of
- satisfactorily complete five SMTP units in the first three years of
- meet the requirements of the BSc (Adv) or BMedSc degree
- complete 192 credit points towards the MBBS degree as required
- satisfactorily complete five SMTP units of study in the first three

Progression Requirements
Students are required to maintain a minimum AAM of 80 or above and to satisfactorily complete five SMTP units of study in the first three years of the program. Students who fail to satisfy these requirements will be transferred to the BSc (Adv) or BMedSc.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science (Advanced) or Bachelor of Medical Science entry for information about recommended first year combinations of units of study and the sample degree program. There is a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3 and Table IV: Bachelor of Medical Science in this chapter. Unit descriptions appear in chapter 10. The Medicine units of study available for this degree are set out in the Faculty of Medicine handbook.

Honours
Students who qualify to undertake Honours in the BSc (Adv) or BMedSc degree may elect to do so by either suspending their candidature from the MBBS degree for one year, or after completion of the combined course. Please refer to ‘Honours in the Faculty of Science’ in this chapter, and to Table VI: Honours units of study in chapter 12.

Abandoning and discontinuing
Students may abandon the combined degree course and elect to complete the BSc (Adv) or BMedSc degree.

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Supervision
Students will be under the general supervision of the Faculty of Science until the end of the semester in which they complete the requirements for the BSc (Adv) or BMedSc degree. After that they will be under the general supervision of the Faculty of Medicine.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See see chapter 2.

Honours in the BSc (Including all streams and combined degrees), BCST, BMedSc, BST

Admission
To qualify to enrol in an honours course, students shall:

1. (a) have qualified for the award of a relevant pass degree from the Faculty of Science, or
   (b) be a pass graduate of the Faculty of Science, or
   (c) be a pass graduate holding an equivalent qualification from another institution

2. have completed a minimum of 24 credit points of Senior units of study relating to the intended honours course (or equivalent at another institution)

3. have achieved either
   (a) a credit average in the relevant Senior units of study, or
   (b) a SCIWAM of at least 60 (or equivalent at another institution)

4. satisfy any additional criteria set by the Head of Department concerned.

You should also note the following:

- Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters. Not all Departments offer students part time enrolment in honours, or honours enrolment commencing in the July semester. Students considering these types of honours enrolment are urged to contact the Department concerned.

- A student may not re-attempt an honours course in a single subject area. A student who is qualified to enrol in two honours courses may either complete the honours courses in the two subject areas separately and in succession, or complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

- An interdisciplinary honours course shall comprise such parts as determined by the Coordinating Committee for the interdisciplinary course.

6. Bachelor of Psychology

This chapter is intended to give enrolment advice to undergraduate students in the Bachelor of Psychology. You will find answers to frequently asked questions covering all students. Following this is a specific summary of the requirements for the Bachelor of Psychology, including examples of how unit of study choices can be made over the duration of the degree. There is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It should be stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The undergraduate units of study available for the Bachelor of Psychology degree are listed in Table 1, in Chapter 3. They are the same as those offered in the Bachelor of Science degree.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

**Special Arrangements**
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

**Special Consideration**
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

**Code of Conduct for Students**
The University has clear expectations of students in respect of academic matters and personal behaviour.

**Student Plagiarism: Coursework Policy and Procedure**
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided elsewhere in this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

**Enrolment day FAQs**

**What is a 'major'?**
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree. Students enrolled in the Bachelor of Psychology will complete a major in Psychology, and an Honours year in Psychology.

**How many credit points should I take per semester?**
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

**Do I need to be full-time?**
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students.

International students are required to be full-time.

**Can I take units of study from other faculties?**
Yes – generally you can take any unit of study offered by the Faculty of Arts and the Faculty of Economics, up to 48 credit points in accordance with your degree resolutions. Lists of available units of study will be available on enrolment day, or in each faculty's handbook. Each Faculty website has links to Departmental and unit of study information.

Also available are undergraduate units from any other faculty at the University. The onus is on you to get written permission from the relevant department and bring it to the Faculty of Science.

There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

**Can I receive credit for previous tertiary study?**
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.

On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus-outline, and should include the credit point value, learning outcomes, assessment details, texts and references, and contact details for each unit of study. You must bring this information with on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may...
be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn’t take a subject at the HSC or feel they need some revision.

Who can enrol in Advanced units of study?
Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in Advanced level subjects in the first year of study. You must obtain special permission to enrol in any Advanced unit of study except Software. For Software Advanced units of study, you must meet the criteria listed on the permission form for Advanced units of study. The departmental advisers have copies of the permission form for Advanced units of study.

Students should also consult the unit of study Tables for assumed and prerequisite marks in the HSC required to enrol in Advanced units of study.

Bachelor of Psychology (BPsych)

Degree Code: LH013

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 5) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

Enrolment guide
To complete your degree you must gain credit for at least 192 credit points including completing the honours course in Psychology and maintaining the required average grade in each year of study in the Science Subject Area of Psychology. The 192 credit points required for the degree must include:

- PSYC1001 and PSYC1002 at an average of Credit or better
- at least 12 credit points of study in the Science Subject Areas of Mathematics and Statistics
- at least 12 credit points are Junior units of study from Science Subject Areas other than Psychology and Mathematics and Statistics
- At least 30 credit points from Senior units of study in the Science subject area of Psychology* with an average grade of Distinction or better. The Senior units must include PSYC3010 and at least one of PSYC3011, 3012, 3013 and 3014.
- *HPSC3023 be included as a Senior unit within the 24 senior credit points and is required by students who wish to complete the theoretical thesis option in Psychology Honours.
- at least 96 credit points from Science Subject Areas
- 48 credit points of Honours Psychology units of study with a grade of Honours (H3 or better)

For students in an Advanced degree it is recommended that you enrol in no more than 24 credit points of Advanced units of study in a year. Advanced units of study are very demanding and students are required to perform at a higher standard than in the normal units of study.

What is the Talented Student Program?
The Talented Student Program (TSP) is unique to the University of Sydney. It is tailored to meet students’ individual needs and is restricted to the very top students.

Students may be able to bypass some first year study and enrol directly in a second year course. If you have outstanding results in any of your HSC science subjects you may wish to negotiate a special program of study with one of the departments in the Faculty of Science.

The Talented Student Program is available in most areas of Science. Students receive special supervision by academic staff and often engage in studies on an individual basis with small numbers of fellow students, all of whom have a special interest in the same subject.

Am I eligible for the Talented Student Program?
Enter to the TSP is by invitation from the Dean which you should have received by the time you enrol. The following guidelines apply generally, although Departments may have additional (and sometimes more stringent) requirements for entry into the program. To get into the program in your first year, you should normally have a UAI (or equivalent) of at least 99.00 and a result in band 6 in at least one HSC Science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. For entry into the program in your second and third years, you should normally have a weighted average mark of 85 or over and a high distinction grade in the relevant subject area.

You should also note the following:

- a maximum of 48 credit points may be counted towards the degree requirements from units of study offered by faculties other than the Faculty of Science.
- units of study completed at The University of Sydney Summer School which correspond to units of study in the table of undergraduate units of study may be credited towards the course requirements.
- a standard full time enrolment is 24 credit points per semester; less than 18 credit points per semester is considered to be part time.
- you may not enrol in more than 30 credit points in any one semester without permission.
- you may not enrol in more than 60 credit points of Junior units of study.
- before being admitted to enrol in a unit of study, you have to meet any prerequisites and corequisites for that unit of study
- once the award course requirements of 192 credit points have been satisfied a student may not enrol in additional units of study without first obtaining permission from the Dean.
- if a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Progression requirements
A minimum requirement for progression in the BPsych is as follows:

- Credit average in Junior Psychology units of study
- Distinction average in Intermediate and Senior Psychology units of study.

A student who fails to meet progression requirements will be transferred to the BSc.
A student may not enrol in Psychology Honours until they have completed 144 credit points of units of study and have satisfied all requirements for the BPsysch except those related to Honours.

**Plans of study**

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below and there is also a degree planner inside the back cover. Consultation with a Faculty or School adviser is always recommended.

**Units of study**

Units of study for the BPsych are listed in Table I: Bachelor of Science.

**Honours**

Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half–time over four consecutive semesters. A student may not re-attempt the Psychology honours course. Please refer to ‘Honours in the Faculty of Science’ in this chapter, and Table VI: Honours units of study in chapter 12.

**Discontinuation**

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

**Special permission**

You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

**Transferring into the BPsysch**

Students may transfer from any degree into the BPsysch with the permission of the Dean provided that they have completed at least 48 cps and have obtained a High Distinction average in at least 12 credit points of Junior Psychology units of study.

**Universities Admission Index (UAI)**

The minimum UAI for admission to the course varies from year to year.

**Degree UIAI**

See chapter 2.

6. Bachelor of Psychology
7. Bachelor of Science and Technology

This chapter is intended to give enrolment advice to undergraduate students in the Faculty of Science. You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It is stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The unit descriptions appear in chapter 10.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

Special Arrangements
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

Special Consideration
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

Code of Conduct for Students
The University has clear expectations of students in respect of academic matters and personal behaviour.

Student Plagiarism: Coursework Policy and Procedure
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided elsewhere in this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

Enrolment day FAQs

What is a ‘major’?
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree. It is useful to have an idea of what major, or group of majors, interest you now, so that you can plan your Junior and Intermediate years properly. The Bachelor of Science majors Neuroscience, and Nanoscience and Technology require earlier planning than most others. If you are interested in these then read Table I (Bachelor of Science: Chapter 3) carefully and/or seek advice.

A major is usually defined as 24 credit points of study at the Senior level in a single Science Area. Neuroscience and Psychology both have additional requirements. Depending on the majors chosen, it is possible to complete more than one major in your degree.

Degrees where you choose a major are the Bachelor of Science (including the Advanced stream of the BSc), Bachelor of Computer Science and Technology (including the Advanced stream of the BCST), Bachelor of Information Technology and the Bachelor of Liberal Studies (including both the Advanced and International streams of the BLibStud).

How many credit points should I take per semester?
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

Do I need to be full-time?
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students.

International students are required to be full-time.

Can I take units of study from other faculties?
Yes – generally you can take any unit of study offered by the Faculty of Arts and the Faculty of Economics. Lists of available units of study will be available on enrolment day, or in each faculty’s handbook. Each Faculty website has links to Departmental and unit of study information.

Also available are undergraduate units from any other faculty at the University. The onus is on you to get written permission from the relevant department and bring it to the Faculty of Science.

There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

Can I receive credit for previous tertiary study?
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.
On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus/outline, and should include the credit point value, learning outcomes, assessment details, texts and references, and contact details for each unit of study. You must bring this information with you on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn’t take a subject at the HSC or feel they need some revision.

Who can enrol in Advanced units of study?
Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in Advanced level subjects in the first year of study. You must obtain special permission to enrol in any Advanced unit of study except Software. For Software Advanced units of study, you must meet the criteria listed on the permission form for Advanced units of study. The departmental advisers have copies of the permission form for Advanced units of study.

Students should also consult the unit of study Tables for assumed and prerequisite marks in the HSC required to enrol in Advanced units of study.

For students in an Advanced degree it is recommended that you enrol in no more than 24 credit points of Advanced units of study in a year. Advanced units of study are very demanding and students are required to perform at a higher standard than in the normal units of study.

What is the Talented Student Program?
The Talented Student Program (TSP) is unique to the University of Sydney. It is tailored to meet students’ individual needs and is restricted to the very top students.

Students may be able to bypass some first year study and enrol directly in a second year course. If you have outstanding results in any of your HSC science subjects you may wish to negotiate a special program of study with one of the departments in the Faculty of Science.

The Talented Student Program is available in most areas of Science. Students receive special supervision by academic staff and often engage in studies on an individual basis with small numbers of fellow students, all of whom have a special interest in the same subject.

Am I eligible for the Talented Student Program?
Entry to the TSP is by invitation from the Dean which you should have received by the time you enrol. The following guidelines apply generally, although Departments may have additional (and sometimes more stringent) requirements for entry into the program. To get into the program in your first year, you should normally have a UAI (or equivalent) of at least 99.00 and a result in band 6 in at least one HSC Science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. For entry into the program in your second and third years, you should normally have a weighted average mark of 85 or over and a high distinction grade in the relevant subject area.

Bachelor of Science and Technology (BST)

Degree Code: LH035

Summary of Requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see Chapter 2) which should be read by all intending candidates. It is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

Enrolment Guide
In your Junior year, you should complete:
- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 12 credit points of Junior units of study from the subject areas of Experimental Science (from Table VIIb);
- 12 credit points of Junior units of study from Science/Technology associated with Humanities and Social Sciences units of study (from Table VIIc);
- 12 credit points of Junior units of study from Science, Engineering or Architecture (from Table VIIId).

To complete your degree you must gain credit for at least 144 credit points, comprising:
- a minimum of 12 credit points in the subject area of Mathematics and Statistics;
- a minimum of 72 credit points in Senior units of study (from Table VIIId);
- a minimum of 12 credit points in Science/Technology associated with Humanities and Social Sciences units of study (from Table VIIc);
- a minimum of 12 credit points in Technology/Applied Science units of study from those specified in Table VIIId.
- a minimum of 72 credit points in Senior or Intermediate units of study, or in units of study normally taken at second or third year level or higher;
- a major, as specified in Table I of the Bachelor of Science, or as listed in Table VIIe. A major in the BST requires a minimum of 36 credit points at Intermediate (2000) and Senior (3000) levels, including a minimum of 12 credit points at senior level, except in the case of a major in a Science subject area, which normally requires the completion of 24 credit points of senior-level units of study, in addition to any other units of study specified in the table as compulsory for that major.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program in this section. See the Bachelor of Science entry for information about majors.

Units of study
The Science units of study available for this degree are set out in Table VII: Bachelor of Science and Technology, and in Table 1:
Honours

There are Honours courses in the following subject areas:
- Agricultural Chemistry
- Anatomy and Histology
- Biochemistry
- Biology
- Cell Pathology
- Chemistry
- Computational Science
- Computer Science
- Environmental Studies
- Geography
- Geology and Geophysics
- History and Philosophy of Science
- Immunobiology
- Information Systems
- Marine Science
- Mathematics
- Medicinal Chemistry
- Microbiology
- Nanoscience and Technology
- Neuroscience
- Pharmacology
- Physics
- Physiology
- Psychology

Honours in the Faculty of Science

Science subject area.
Consultation with an academic adviser is also recommended.

Combinations of Junior units of study for a major in a Bachelor of Science degree are found in chapter 2 of this handbook.

Students should also consult the "Enrolment Guide by Major" for the Science units of study as required to progress to major(s) of choice.

Degree resolutions
See chapter 2.

*Students intending to major in a Science subject area should enrol in the appropriate junior level of units of study. For more information, refer to the Faculty of Science Handbook, Chapter 3: Enrolment Guide by Major for the Bachelor of Science degree.

Enrolment guide by major

The following is a list of recommended combinations of Junior units of study if you are intending to complete a major in a non-Science subject area.

Majors in Science Subject Areas

12 credit points of Junior units of study in Mathematics + 12 credit points Applied Technology from Table VIc + at least 12 credit points of Experimental Science from Table I + 12 credit points of other Science units of study as required to progress to major(s) of choice.

Students should also consult the "Enrolment Guide by Major" for the Bachelor of Science in chapter 2 of this handbook for the recommended combinations of Junior units of study for a major in a Science subject area. Consultation with an academic adviser is also recommended.

Design Technology

12 credit points of Junior units of study in Mathematics + 12 credit points INFO1003 and SOFT1001 + 12 credit points of Experimental Science from Table I (except Mathematics and Statistics, Computer Science, Computational Science, History and Philosophy of Science and Information Systems) + 12 credit points Applied Technology electives of your choice from Table VIIc. Instead of 12 credit points INFO1003 and SOFT1001 + 12 credit points Applied Technology electives from Table VIIc, students may choose 24 credit points DECO1100 and DECO1200 from Table VIIc. Note: students who wish to undertake a sequence of units of study in 3D Animation should take DECO1100 and DECO1200 in place of INFO1003 and SOFT1001 in their first year of studies.

Electronic Engineering

12 credit points of Junior units of study in Mathematics + 12 credit points of ELEC1601 and ELEC1103 + 12 credit points of Experimental Science from Table I (except Mathematics and Statistics, Computer Science, Computational Science, History and Philosophy of Science and Information Systems) + 12 credit points Applied Technology electives of your choice from units of study offered by the Faculties of Science, Architecture, Engineering and Agriculture, Food and Natural Resources.
7. Bachelor of Science and Technology

General Engineering
12 credit points of Junior units of study in Mathematics + 12 credit points of ENGG1800 and ENGG1803 + 12 credit points of Experimental Science from Table I (except Mathematics and Statistics, Computer Science, Computational Science, History and Philosophy of Science and Information Systems) + 12 credit points of Applied Technology electives of your choice from units of study offered by the Faculties of Science, Architecture, Engineering and Agriculture, Food and Natural Resources.

Information Technology
12 credit points of Junior units of study in Mathematics + 12 credit points of SOFT1001 and SOFT1002 + 12 credit points of Experimental Science from Table I (except Mathematics and Statistics, Computer Science, Computational Science, History and Philosophy of Science and Information Systems) + 12 credit points of Applied Technology electives of your choice from Table I or Table VII.

Progression to Years 2 and 3

In order to proceed to Year 2 and 3 of the degree, candidates for the Bachelor of Sciences and Technology must either have completed 12 credit points of Technology/Applied Science units of study in a single group designated in Table VII(d) or have completed Science units of study that are prerequisite for a chosen 2000 or 3000-level Science subject areas. Candidates who have completed the 12 credit points of Engineering units of study designated in Table VII(d)(iv) and who wish to complete a major in either General Engineering or Electronic Engineering are in addition required to complete 12 credit points of Junior Mathematics including MATH1003 before proceeding to Year 2.

(e) Requirements for a Major

Science major

Candidates are required to complete a major in a Science subject area (Table I) or one of the following majors in Technology/Applied Science.

(i) Design Technology Major

For a major in Design Technology the minimum requirement is the completion of at least 36 credit points from units of study shown in the following Table, including:

(i) a minimum of 12 credit points of DECO units at 3000-level from the Table.

DECO1100 Digital Design Studio 12 N DECO1011 Core unit for Bachelor of Design Computing and BST students only. Semester 1

DECO1200 Interaction Design Studio 12 P DECO (1100 and 2101) or (2101 and 2102) or INFO (1000 and 1003) N DECO1021 Available for BDesComp and BST students only. Semester 2

INFO1003 Foundations of Information Technology 6 A Basic computer operations N INFO1000, INFST1000, ISYS1003, INFO1903 Semester 1 Semester 2

SOFT1001 Software Development 1 6 A HSC Mathematics Extension 1 N SOFT1901, COMP1001, COMP1901, DECO2011 Semester 1 Semester 2

DECO1101 Collaborative Virtual Environments 6 P DECO (1100 and 1200) or (2101 and 2102) or INFO (1000 or 1003) N DECO2005 Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing students will receive preference. Semester 1

DECO2011 Design Programming 6 N SOFT1001 Semester 1

DECO2012 Sound Design and Sonification 6 N DECO2607 Permission required unless enrolled in the Bachelor of Design Computing or the BST. Other students may apply directly to the Faculty of Architecture for a place. Enrolment limited by teaching resources. Semester 2

DECO2013 Generative Design Systems 6 P DECO2011 or SOFT1001 N DECO2601, DECO2602, DECO2603 Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing students will receive preference. Semester 2

DECO2014 Digital Image Design & Representation 6 N DECO1001, DECO1100 Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Architecture students will receive preference. Not available in the Bachelor of Design Computing. Semester 1

DECO2102 Interactive Multimedia Design 6 P DECO2101 N DECO1002, DECO2002, DECO2100 Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Architecture students will receive preference. Not available in the Bachelor of Design Computing. Semester 2

DECO2204 Principles of AutoCAD 6 N DESA1202, DESC9101, DESC9163 Permission required unless enrolled as an undergraduate in the Faculty of Architecture or the BST. Other students must apply directly to the Faculty of Architecture. Semester 2

DESA1202, DESC9101, DESC9163 Permission required unless enrolled as an undergraduate in the Faculty of Architecture or the BST. Other students must apply directly to the Faculty of Architecture.
## 7. Bachelor of Science and Technology

### Unit of study | Credit points | A: Assumed knowledge | P: Prerequisites | C: Corequisites | N: Prohibition  | Session
--- | --- | --- | --- | --- | --- | ---
DECO2205 Principles of ArchiCAD | 6 | N DESA1201, DESC9100, DESC9162 | Permission required unless enrolled as an undergraduate in the Faculty of Architecture or the BST. Other students must apply directly to the Faculty of Architecture. | | | Semester 1

DECO2606 Real Time 3D Multimdia | 6 | P DECO (1008 or 2103) and (SOFT1001 or DECO2011) | Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing and BST students will receive preference. | | | Semester 2

DECO3003 Design Computing Research Opportunity | 6 | A Computer programming. P 96 credit points and minimum WAM of 65. Note: Department permission required for enrolment Non Architecture students may apply directly to the Faculty of Architecture. | | | Semester 2

DECO3005 Advanced Interactive Multimedia Design | 6 | P DECO (1200 or 2102 or 2002) | Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing and BST students will receive preference. | | | Semester 1

DECO3006 Principles of 3D Animation | 6 | P DECO (1003 or 2102) and DESC9019, DESC9141 | Enrolment limited by teaching resources. If your attempt to enrol online is refused please apply directly to the Faculty of Architecture. First preference given to third year students in the Bachelor of Design Computing or the Bachelor of Science & Technology. | | | Semester 1

DECO3007 Designing Tangible Computing | 6 | P DECO (1200 or 2102) and (DECO2011 or SOFT1001) | Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing and BST students will receive preference. | | | Semester 2

DECO3100 Information Visualisation Design Studio | 12 | P DECO (1100 and 1200) or DECO (2101 and 2102) or DECO (2012 and 2013) | N DECO3002 BDesComp and BST students only. | | | Semester 1

DECO3200 Human-Computer Experience Design | 12 | P DECO3100 or DECO (2101 and 2102 and (DECO2011 or SOFT1001)) | N DECO3002 BDesComp and BST students only | | | Semester 2

(ii) General Engineering Major

For a major in General Engineering the minimum requirement is the completion of at least 36 credit points from units of study shown in the following Table, including:

(i) MATH2061; and

(ii) a minimum of 12 credit points at the 3000-level.

MATH2061 Linear Mathematics and Vector Calculus | 6 | P MATH (1111 or 1001 or 1901 or 1906) and MATH (1014 or 1002 or 1902) and MATH (1903 or 1903 or 1907) | MATH2001, MATH2901, MATH2002, MATH2902, MATH2901, MATH2902 | | | Semester 1 Summer Main

AMME2200 Thermodynamics and Fluids Mechanics | 6 | A MATH1001; MATH1002; MATH1003. | | | | Semester 2

AMME2301 Mechanics of Solids | 6 | P MATH1001 or 1901, MATH1002 or 1902, MATH1003 or 1903, ENG1802 or PHYS1001 | or PHYS1901 | | | Semester 2

AMME2302 Materials 1 | 6 | | | | | | Semester 2

AMME2500 Engineering Dynamics | 6 | P MATH1001; MATH1002; ENG1802 or PHYS1001 | | | | Semester 1

CHNG2801 Conservation and Transport Processes | 6 | A Calculus Computations (Matlab, Excel) Mass and Energy Balances | P All core 1st year engineering units of study. | | | Semester 1

CHNG2802 Applied Maths for Chemical Engineers | 6 | A Enrolment in this unit of study assumes that all core science and engineering UoS in first-year have been successfully completed. | P All core 1st year engineering units of study. | C CHNG 2803 (Analysis Practice 1) CHNG 2801 (Conservation and Transport Processes) CHEM 2404 (Forensic and Environmental Chemistry) | | Semester 1

CHNG2804 Chemical & Biological Systems Behaviour | 6 | A Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature Ability to write coherent reports and essays based on qualitative information | P All core 1st year engineering units of study. | C CHNG 2804 (Chemical and Biological Systems Behaviour) CHNG 2806 (Analysis Practice 2 - Treatment, Purification and Recovery Systems) CHEM 2403 (Chemistry of Biological Molecules) | | Semester 2

CHNG2805 Industrial Systems and Sustainability | 6 | A Ability to conduct mass and energy balances, and the integration of these concepts to solve real chemical engineering problems Ability to understand basic principles of physical chemistry, physics and mechanics Ability to use mathematics of calculus (including vector calculus) and linear algebra, and carry out computations with MATLAB and MS EXCEL. Ability to read widely outside of the technical literature, and to synthesise arguments based on such literature Ability to write coherent reports and essays based on qualitative information | P All core 1st year engineering units of study. | C CHNG 2804 (Chemical and Biological Systems Behaviour) CHNG 2806 (Analysis Practice 2 - Treatment, Purification and Recovery Systems) CHEM 2403 (Chemistry of Biological Molecules) | | Semester 2

CIVL2110 Materials | 6 | A CHEM1001 Fundamentals of Chemistry 1A, ENGG1802 Engineering Mechanics | | | | Semester 1

CIVL2210 Structural Mechanics | 6 | A ENGG1802 Engineering Mechanics | | | | Semester 1

CIVL2330 Intro to Structural Concepts and Design | 6 | A ENGG1802 Engineering Mechanics, CIVL2110 Materials CIVL2201 Structural Mechanics | | | | Semester 2

CIVL2410 Soil Mechanics | 6 | A CIVL2201 Structural Mechanics | | | | Semester 2

**Information Technology Major**

For a major in Information Technology, the minimum requirement is the completion of at least 36 credit points at 2000-level and above from Table III (excluding any units which are not available in the BST degree), which must contain:

1. at least 12 credit points from Table III(i) and/or (ii), and must also contain
2. at least 12 credit points from Table III(iv) and/or (v).
This chapter is intended to give enrolment advice to undergraduate students undertaking degrees offered within the School of Information Technologies. You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It should be stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The tables of undergraduate units of study available for each degree and unit descriptions appear in this chapter.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

**Special Arrangements**
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

**Special Consideration**
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

**Code of Conduct for Students**
The University has clear expectations of students in respect of academic matters and personal behaviour.

**Student Plagiarism: Coursework Policy and Procedure**
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided elsewhere in this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

**Enrolment day FAQs**

**What is a ‘major’?**
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree. It is useful to have an idea of what major, or group of majors, interest you now, so that you can plan your Junior and Intermediate years properly.

A major is usually defined as 24 credit points of study at the Senior level in a single area.

Degrees where you choose a major are the Bachelor of Science (including the Advanced stream of the BSc), Bachelor of Computer Science and Technology (including the Advanced stream of the BCST), and the Bachelor of Information Technology.

**How many credit points should I take per semester?**
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

**Do I need to be full-time?**
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

International students and permanent residents who wish to receive a transport concession card must be full-time students.

Can I take units of study from other faculties?
Yes – generally you can take any unit of study offered by the Faculty of Arts and the Faculty of Economics. Lists of available units of study will be available on enrolment day, or in each faculty’s handbook. Each Faculty website has links to Departmental and unit of study information.

Also available are undergraduate units from any other faculty at the University. The onus is on you to get written permission from the relevant department and bring it to the Faculty of Science for units of study not listed in your degree table.

There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

**Can I receive credit for previous tertiary study?**
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.

On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabusoutline, and should include the credit point value, learning outcomes, assessment details, texts
and references, and contact details for each unit of study. You must bring this information with you on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn’t take a subject at the HSC or feel they need some revision.

Who can enrol in Advanced units of study?
Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in Advanced level subjects in the first year of study. You must obtain special permission to enrol in any Advanced unit of study except Software. For Software Advanced units of study, you must meet the criteria listed on the permission form for Advanced units of study. The departmental advisers have copies of the permission form for Advanced units of study.

Students should also consult the unit of study Tables for assumed and prerequisite marks in the HSC required to enrol in Advanced units of study.

For students in an Advanced degree, it is recommended that you enrol in no more than 24 credit points of Advanced units of study in a year. Advanced units of study are very demanding and students are required to perform at a higher standard than in the normal units of study.

What is the Talented Student Program?
The Talented Student Program (TSP) is unique to the University of Sydney. It is tailored to meet students’ individual needs and is restricted to the top students.

Students may be able to bypass some first year study and enrol directly in a second year course. If you have outstanding results in any of your HSC science subjects you may wish to negotiate a special program of study with one of the departments in the Faculty of Science.

The Talented Student Program is available in most areas of Science. Students receive special supervision by academic staff and often engage in studies on an individual basis with small numbers of fellow students, all of whom have a special interest in the same subject.

Am I eligible for the Talented Student Program?
Entry to the TSP is by invitation from the Dean which you should have received by the time you enrol. The following guidelines apply generally, although Departments may have additional (and sometimes more stringent) requirements for entry into the program. To get into the program in your first year, you should normally have a UAI (or equivalent) of at least 99.00 and a result in band 6 in at least one HSC Science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. For entry into the program in your second and third years, you should normally have a weighted average mark of 85 or over and a high distinction grade in the relevant subject area.

Bachelor of Computer Science and Technology (BCST)

Degree Code LH012

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points. Students can also consult the School of Information Technologies Web site.

Enrolment guide
There have been major changes to the curriculum in 2005 and in 2006. Transitional arrangements will be made to enable current students to complete the requirements of the BCST under the rules listed below. These transitional arrangements will be explained in full on the School of Information Technologies web site.

Students should consult this web site to assist them in selecting their units.

To complete your degree you must gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- at least 90 credit points from Table III associated with the degree of Bachelor of Information Technology, including:
  - at least 24 credit points from III (i);
  - at least 36 credit points from III (iv) and/or III (v);
  - at least 6 credit points from III (v);
- at least 18 credit points from the Science subject areas of Mathematics and Statistics;
- at least 36 credit points from units of study which have codes starting other than INFO, COMP, ISYS, MULT, NETS, SOFT;
- at most 72 credit points from Junior units of study.

You should also note the following:

- you can complete majors in Principles of Computer Science, Information Systems, Multimedia Technology, Networks and Systems, Software Development, Digital Design and Computational Science as defined in Table IIIA; Bachelor of Information Technology majors, but it is not necessary to complete a major in order to qualify for the degree;
- units of study completed at The University of Sydney Summer School which correspond to units of study in the table of undergraduate units of study may be credited towards the course requirements;
- a standard full-time enrolment is 24 credit points per semester; less than 18 credit points per semester is considered to be part-time;
- you may not enrol in more than 30 credit points in any one semester without permission;
- before being permitted to enrol in a unit of study, you have to meet any prerequisites and corequisites for that unit of study;
- Advanced units of study are indicated by a 9, 8, 7 or 6 as the second digit of the unit of study code. Entry to these units of study is limited (details can be obtained from departments);
- once the award course requirements of 144 credit points have been satisfied a student may not enrol in additional units of study without first obtaining permission from the Dean;
- if a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Plans of study
It is important when choosing units of study at any stage of your university career that you should consider your overall degree program.
The BCST is designed as a flexible degree program which enables students with a strong interest in computing to combine a core of fundamental computer science topics with a wide range of subjects in other computationally based disciplines. There is a sample degree program and there is also a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The units of study available for this degree are set out in Table III: Bachelor of Information Technology and in Table I: Bachelor of Science in chapter 3. Unit descriptions appear in chapter 10.

Honours
There will be honours in the subject areas of Computer Science and Information Systems. Please refer to ‘Honours in the Faculty of Science’ in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications for special consideration should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BCST
Students may transfer from the Bachelor of Computer Science and Technology (Advanced) or the Bachelor of Information Technology into the Bachelor of Computer Science and Technology with the permission of the Dean.

Universities Admissions Index (UAI)
The minimum UAI for admission to the Faculty varies from year to year.

Degree resolutions
See chapter 2.

Total credit points: 144

Require: 144cp total, min. 90cp Table III, max. 72 Junior, min. 18cp Maths, min. 24cp Table III(i), min. 36cp Table III(iv/v), min. 6cp Table III(v), min 36cp from units other than COMP, INFO, ISYS, MULT, NETS, SOFT.

Bachelor of Computer Science and Technology (Advanced)

Summary of requirements
The Bachelor Computer Science and Technology (Advanced) degree program requires the equivalent of three years of full time study. An Honours program is available and requires the equivalent of a further year of full time study. The Resolutions of the Senate and Faculty governing candidates for the degree of Bachelor of Computer Science and Technology listed in chapter 5 also govern the BCST (Advanced) degree program.

Enrolment guide
There have been major changes to the curriculum in 2005 and 2006. Transitional arrangements will be made to enable current students to complete the requirements of the BCST (Adv) under the rules listed below. These transitional arrangements will be explained in full on the School of Information Technologies web site.

Students should consult this web site to assist them in selecting their units.

To complete your degree you must satisfy the requirements outlined for the BCST and gain credit for at least 144 credit points. The 144 credit points required for the degree must include:

- at least 12 credit points of Intermediate units of study from Table III (i) and/or III (ii) at either the Advanced level or as TSP units
- at least 48 credit points of Senior units of study of which at least 24 are completed at the Advanced level or as TSP units taken from Table III (iv) and/or III (v)

Progression requirements
In order to enrol in the necessary number of Advanced units of study specified, students must achieve at least a Distinction result in the prerequisite units of study.

Universities Admissions Index (UAI)
The minimum UAI for admission to the Faculty varies from year to year.

Transferring into the BCST (Advanced) degree program
Students who have completed at least 48 credit points may be permitted to transfer to the BCST (Advanced) from the BCST or BIT if their mark averaged over all attempted units of study is 75 or greater, and they are able to enrol in the required number of advanced level units or TSP units.

Degree resolutions
See chapter 2.
Bachelor of Information Technology (BIT)

Degree Code LH023

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points. Students can also consult the School of Information Technologies web site.

Enrolment guide
There have been major changes to the curriculum in 2005 and 2006. Transitional arrangements have been made to enable current students to complete the requirements of the BIT under the rules listed below. These transitional arrangements will be explained in full on the School of Information Technologies web site.

Students should consult this web site to assist them in selecting their units.

To complete your degree you must gain credit for at least 192 credit points. The 192 credit points required for the degree must include:

- at least 144 credit points from Table III: Bachelor of Information Technology (in chapter 3), including
  (a) at least 24 credit points from III (i) with average results of Credit or better
  (b) at least 72 credit points from III (iv) and/or III (v)
  (c) either INFO3600 or INFO(4991 or 4992)
- at least 18 credit points are from the Science subject areas of Mathematics and/or Statistics
- at least 36 credit points are from units which have codes starting other than INFO, COMP, ISYS, MULT, NETS, SOFT
- at most 72 credit points from Junior units
- at least 84 credit points from Senior and/or Honours units

You should also note the following:

- you can complete majors in: Principles of Computer Science, Information Systems, Multimedia Technology, Networks and Systems, Software Development, Digital Design, Language Technology and Computational Science as defined in Table IIA: Bachelor of Information Technology majors, but it is not necessary to complete a major in order to qualify for the degree
- you cannot count any unit of study with the grade Pass (Concessional) toward the degree
- units of study completed at The University of Sydney Summer School which correspond to units of study in the table of undergraduate units of study may be credited towards the course requirements
- a standard full time enrolment is 24 credit points per semester; less than 18 credit points per semester is considered to be part time
- you may not enrol in more than 30 credit points in any one semester without permission
- in order to enrol in a unit of study, you have to meet any prerequisites and corequisites for that unit of study
- Advanced units of study are indicated by a 9, 8, 7 or 6 as the second digit of the unit of study code. Entry to these units of study is limited (details can be obtained from departments)
- once the award course requirements of 192 credit points have been satisfied a student may not enrol in additional units of study without first obtaining permission from the Dean
- if a student fails or discontinues enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below and there is also a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The units of study available for this degree are set out in Table III: Bachelor of Information Technology and in Table I: Bachelor of Science in chapter 3.

Honours
The BIT may be awarded as an Honours degree. Students may enrol in the Honours course after completion of 144 credit point, if they meet the specified performance conditions. Please refer to ‘Honours in the Faculty of Science’ in this chapter, and Table VI: Honours units of study in chapter 12.

Discontinuation
If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications for special consideration should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Transferring into the BIT
Students who have completed at least 48 credit points may be permitted to transfer to the Bachelor of Information Technology degree from other degree programs, if their mark averaged over all attempted units of study is 70 or greater. A quota may apply to the number of students allowed to transfer into the BIT in a given calendar year.

Universities Admissions Index (UIA)
The minimum UIA for admission to the Faculty varies from year to year.

This unit of study is recommended for third year students enrolled in the BSc (Biometrics) degree.
### Unit of study | Credit points | A: Assumed knowledge | P: Prerequisites | C: Corequisites | N: Prohibition | Session
---|---|---|---|---|---|---
**COSC3912** Parallel Computing & Visualisation (Adv) | 6 | A Programming experience in C and MATLAB or equivalent. P 12 credit points chosen from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas with a credit average. | N COSC3012, COSC3002, COSC3602, COSC3601, PHYS3303, PHYS3933 | | | Semester 2
**COMP3308** Introduction to Artificial Intelligence | 6 | A Programming skill, as from SOFT2130 or COMP2160 or from Credit level in INFO1903 or SOFT1002. P 18 crpts of 2000-level units. | N COMP(3002 or 3902 or 3608) | | | Semester 1
**COMP3608** Intro. to Artificial Intelligence (Adv) | 6 | A Programming skill, as from SOFT2130 or COMP2160 or from Credit level in INFO1903 or SOFT1002. P 18 crpts of 2000-level units, and Distinction in a COMP, SOFT or MATH unit at 2000-level or above. | N COMP(3002, 3902 or 3308) | | | Semester 1
**COMP3309** Algorithms | 6 | P COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902). N COMP(3111 or 3811), COMP(3001 or 3901) or COMP3609 | | | | Semester 1
**COMP3609** Algorithms (Advanced) | 6 | P COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902), and Distinction in a COMP SOFT or MATH unit at 2000-level or above. | N COMP(3111 or 3811 or 3001 or 3901 or 3309) | | | Semester 2
**COMP3310** Theory of Computation | 6 | P COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902), and Distinction in a COMP SOFT or MATH unit at 2000-level or above. | N COMP(3003 or 3903 or 3610) | | | Semester 2
**COMP3610** Theory of Computation (Advanced) | 6 | P COMP (2160 or 2860 or 2111 or 2811 or 2002 or 2902), and Distinction in a COMP, SOFT, or MATH unit at 2000-level or above. | N COMP (2003 or 3903 or 3310) | | | Semester 2
**DECO3003** Design Computing Research Opportunity | 6 | A Computer programming. P 96 credit points and minimum WAM of 65. Note: Department permission required for enrolment. | | | | Semester 2
**DECO3005** Advanced Interactive Multimedia Design | 6 | P DECO (1200 or 2102 or 2002) and (DECO9142) Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture. | | | | Semester 1
**DECO3006** Principles of 3D Animation | 6 | P DECO (1003 or 1008 or 2103) N DESC9019, DESC9141 Enrolment limited by teaching resources. If your attempt to enrol online is refused please apply directly to the Faculty of Architecture. First preference given to third year students in the Bachelor of Design Computing or the Bachelor of Science & Technology. | | | | Semester 1
**DECO3007** Designing Tangible Computing | 6 | P DECO (1200 or 2102) and (DECO2011 or SOFT1001) Places in this unit are limited by teaching resources. If your attempt to enrol on-line is refused please apply directly to the Faculty of Architecture for a place. Bachelor of Design Computing and BST students will receive preference. | | | | Semester 2
**EBUS3003** e-Business System Design | 6 | A SOFT1002 Software Development 2 and (ISYS 1003 Foundations of Information Technology or ELEC1601 Professional Computer Engineering or ELEC1101 Foundations of Computer Systems). N EBUS3001 Introduction to E-Commerce Systems. | | | | Semester 1
**EBUS3004** e-Business Programming | 6 | A EBUS3001 Introduction to E-Commerce Systems or EBUS3003 E-Business System Design. N EBUS3002 E-Commerce Website Programming. | | | | Semester 2
**ELEC3305** Digital Signal Processing | 6 | A ELEC2101 Signals & Systems or ELEC2302 Signals & Systems. | N ELEC3303 | | | Semester 1
**ELEC3404** Electronic Circuit Design | 6 | A ELEC3401 Introductory Electronics or ELEC2104 Electronic Devices and Basic Circuits. | N ELEC3402 | | | Semester 2
**ELEC3505** Communications Electronics and Photonics | 6 | A ELEC3503 | | | | Semester 1
**ELEC3506** Data Communications and the Internet | 6 | A SOFT2004 Software Development Methods 1 or COMP2004 Programming Practice or SOFT2130 Software Construction. N NETS2150, NETS2009, NETS2909, NETS3007, NETS3907, ELEC3504, ELEC4501 | | | | Semester 2
**ELEC3605** Engineering Software Requirements | 6 | A SOFT2004 Software Development Methods 1 or SOFT2130 Software Construction. N ELEC4604 | | | | Semester 1
**ELEC3606** Software Project Management | 6 | A SOFT2004 Software Development Methods 1 or SOFT2130 Software Construction. N ELEC4704 | | | | Semester 2
**ELEC3607** Embedded Computing | 6 | A ELEC1101 Foundations of Computer Systems or ELEC2602 Digital System Design. N ELEC2601 | | | | Semester 2
**ELEC3702** Management for Engineers | 6 | N ELEC3701, ENGG3005, MECH3661 | | | | Semester 1
**INFO3402** Management of IT Projects and Systems | 6 | P INFO (2000 or 2110 or 2810 or 2900). N ISYS (3000 or 3012) | | | | Semester 1
**INFO3404** Database Systems 2 | 6 | P INFO(2120 or 2820 or 2005 or 2905). N INFO (3005 or 3504 or 3905) or COMP (3005 or 3905) | | | | Semester 2
**INFO3504** Database Systems 2 (Adv) | 6 | P INFO (2005 or 2120 or 2820 or 2905), and Distinction in an INFO, ISYS or SOFTWARE unit at 2000-level or above. N INFO (3005 or 3404 or 3905) or COMP (3005 or 3905) | | | | Semester 2

(ii) Major in Information Systems

Students are required to complete all the core units, or other mutually exclusive units such as their Advanced equivalents.

Core Junior units of study

| ARIN1000 Digital Communication and Culture        | 6             | Available to students enrolled in the BA (Digital Technology and Culture) and BA. |                 |              |                | Semester 1      |
| INFO1003 Foundations of Information Technology    | 6             | A Basic computer operations | INFO1000, IPSYS1003, INFO1000 |                | INFO1000, IPSYS1003, INFO1000 | Semester 2      |
| MATH1005 Statistics                               | 3             | A HSC Mathematics | MATH1905, MATH1905, ECMT Junior units of study, STAT1021, STAT1022 |                |                | Semester 2      |

Core Intermediate units of study

| INFO2110 Systems Analysis and Modelling            | 6             | P INFO1003 or 1903 or 2000 or 2900 |                 |              |                | Semester 1      |
| INFO2120 Database Systems 1                        | 6             | P INFO1003 or 1903 or 2000 or 2900 |                 |              |                | Semester 2      |
| ISYS2140 Information Systems                       | 6             | P INFO1003 or 1903 or 2000 or 2900 |                 |              |                | Semester 1      |

Core Senior units of study

| INFO3402 Management of IT Projects and Systems     | 6             | P INFO1000 or 2000 or 2900 | ISYS1903 |                |                | Semester 1      |
| ISYS3401 Analytical Methods & Information Systems | 6             | P ISYS1000 or 2000 or 2900 |                 |              |                | Semester 1      |
| ISYS3400 Information Systems Project               | 6             | P INFO3402 or ISYS30012 or ISYS3400 |                 |              |                | Semester 2      |

Elective Senior units of study

Students are required to complete 6 credit points from the elective units, or other mutually exclusive units such as their Advanced equivalents.

| INFO3404 Database Systems 2                       | 6             | P INFO2120 or 2900 or 2000 |                 |              |                | Semester 2      |
| ISYS3403 IT Systems in Arts and Humanities        | 6             | P INFO2000 or 2900 or 2000 |                 |              |                | Semester 1      |

Elective Honours units of study

| ISYS4050 Knowledge Management Systems             | 6             | A Information systems concepts, database concepts |                 |              |                | Semester 1      |
| COMP5338 Advanced Data Models                     | 6             | A COMP5318 Relational Database Management Systems |                 |              |                | Semester 2      |

(iii) Major in Multimedia Technology

Students are required to complete all the core units, or other mutually exclusive units such as their Advanced equivalents.

Core Junior units of study

| MATH1001 Differential Calculus                    | 3             | A HSC Mathematics Extension 1 | MATH1001, MATH1002, MATH1003 |              |                | Semester 1      |
| MATH1002 Linear Algebra                           | 3             | A HSC Mathematics Extension 1 | MATH1001, MATH1002, MATH1003 |              |                | Semester 1      |
| MATH1003 Integral Calculus and Modelling          | 3             | A HSC Mathematics Extension 2 | MATH1001, MATH1002, MATH1003 |              |                | Semester 2      |
| SOFT1901 Software Development 1                   | 6             | A HSC Mathematics Extension 1 | SOFT1901, COMP1001, COMP1001, DECO2011 |              |                | Semester 2      |
| SOFT1902 Software Development 2                   | 6             | P SOFT1000 or 1900 or 2000 or 2900 |                 |              |                | Semester 2      |

Core Intermediate units of study

| COMP2160 Data Structures                          | 6             | P SOFT1000 or 1900 or 2000 or 2900 |                 |              |                | Semester 1      |
| INFO2110 Systems Analysis and Modelling           | 6             | P INFO1000 or 2000 or 2900 or 2000 |                 |              |                | Semester 2      |
| SOFT2130 Software Construction 1                  | 6             | P SOFT1000 or 1900 or 2000 or 2900 |                 |              |                | Semester 2      |

8. Bachelor of Computer Science and Technology and Bachelor of Information Technology
This chapter is intended to give enrolment advice to undergraduate students in the Faculty of Science enrolling in combined degrees. You will find answers to frequently asked questions covering all students. Following this are specific summaries of the requirements for each degree including examples of how unit of study choices can be made over the duration of the degree. With some degrees there is information on recommended combinations of units of study, especially in first year, to help guide you to your goals.

It should be stressed that the information in this chapter is intended to be a rough guide only. All students will have to decide for themselves how to plan their degree to suit their own particular interests and situation.

All students are expected to read the degree resolutions for their course before they commence their studies, and from time to time during their studies. Undergraduate degree resolutions appear in chapter 2. The tables of undergraduate units of study available for each degree and unit descriptions appear in chapter 10.

Students enrolled in units of study offered by the Faculty of Science are required to familiarise themselves with the following four key policies:

Special Arrangements
Students who are experiencing difficulty in meeting their assessment requirements due to competing essential community commitments may apply for Special Arrangements for examination and assessment.

Special Consideration
Students who have a serious illness or who have experienced misadventure which may affect their academic performance in a course or unit of study may request that they be given Special Consideration in relation to the determination of their results.

Code of Conduct for Students
The University has clear expectations of students in respect of academic matters and personal behaviour.

Student Plagiarism: Coursework Policy and Procedure
The University of Sydney expects high standards of academic honesty in all student work. In particular, the University is opposed to and will not tolerate plagiarism.

Details on Special Arrangements, Special Consideration, Code of Conduct for Students, and Student Plagiarism Policy are provided elsewhere in this handbook.

Inside the back cover of this handbook you will find a planner to assist you to map out your degree. It is recommended that you plan your studies carefully with an eye to your final years, so that you take the correct prerequisites in the preceding years. It will be useful to revisit this planner during your studies as your interests take more detailed shape.

Enrolment day FAQs
What is a ‘major’?
Some degrees in the Faculty of Science require you to complete a major. A major is a specialisation in the Senior year of your degree. It is useful to have an idea of what major, or group of majors, interest you now, so that you can plan your Junior and Intermediate years properly. The Bachelor of Science majors Neuroscience, and Nanoscience and Technology require earlier planning than most others. If you are interested in these then read Table I (Bachelor of Science: chapter 3) carefully and/or seek advice.

A major is usually defined as 24 credit points of study at the Senior level in a single Science Area. Neuroscience and Psychology both have additional requirements. Depending on the majors chosen, it is possible to complete more than one major in your degree.

Degrees where you choose a major are the Bachelor of Science (including the Advanced stream of the BSc), Bachelor of Computer Science and Technology (including the Advanced stream of the BCST), Bachelor of Information Technology and the Bachelor of Liberal Studies (including both the Advanced and International streams of the BLibStud).

How many credit points should I take per semester?
You should take 24 credit points each semester if you are a full-time student. There is an upper limit of 30 credit points per semester. If you take fewer than 18 credit points in each semester you will automatically become part-time.

To finish your degree in the recommended minimum time you will have to take 48 credit points per year, or 24 per semester. If you enrol part time you can take as few credit points as you like. You must keep in mind however that you have a 10 year limit to finish your degree. Students wishing to accelerate their degree programs may consider undertaking units offered at Summer School or undertaking up to 30 credit points each semester. The degree summaries and sample programs in this chapter assume you will enrol full-time.

Do I need to be full-time?
If you receive any financial support, whether from a University scholarship or from the government, you may well need to enrol as a full-time student. You should check carefully the terms and conditions of that support before going part-time.

Australian citizens and permanent residents who wish to receive a transport concession card must be full-time students.

International students are required to be full-time.

Can I take units of study from other faculties?
It is possible in some combined degrees. There are limits, and exclusions. You should refer to the degree summary sections of this chapter for specific information about your particular degree.

Can I receive credit for previous tertiary study?
Yes. The amount of credit you may receive depends on your individual circumstances, but in general the total amount of credit granted may not be greater than 96 credit points and may not include more than 48 credit points from degrees that have been completed.

On the day that you enrol you must lodge an application for credit from previous study. Because of the large numbers of applications received at enrolment there can be a considerable delay in processing your application, but all credit offers will be sent to students well in advance of the last day to add a unit of study for the semester in which they enrol.

The Faculty must sight originals of your academic transcripts, as well as detailed descriptions of prior units of study completed, as at the time of completion of the units. Descriptions will normally be an extract from a Handbook or a unit of study syllabus/outline, and should include the credit point value, learning outcomes, assessment details, texts...
and references, and contact details for each unit of study. You must bring this information with on the day that you enrol.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Information on the current application process for credit, including the application form, is available from the Faculty of Science website.

Are there any bridging courses available?
There are bridging courses in Biology, Chemistry, Mathematics and Physics, designed to cover the assumed knowledge that students would normally cover in the HSC. They run in February each year after enrolment and are recommended for students who either didn’t take a subject at the HSC or feel they need some revision.

Who can enrol in Advanced units of study?
Advanced units of study are available to those students enrolled in any program in the Faculty of Science who have performed at a high level in science subjects in the HSC or who perform well in their studies at the University.

Consult a departmental adviser about your eligibility to enrol in Advanced level subjects in the first year of study. You must obtain special permission to enrol in any Advanced unit of study except Software. For Software Advanced units of study, you must meet the criteria listed on the permission form for Advanced units of study. The departmental advisers have copies of the permission form for Advanced units of study. Students should also consult the unit of study Academic advisers for each individual unit of study.

On enrolment day you will have to make unit of study choices as if you have had no previous university of study. Alternatively, you may be able to obtain special permission to enrol in Intermediate or Senior units of study by taking a copy of your transcript and unit of study descriptions to Academic advisers for each individual unit of study. Unit of study Academic advisers are listed under unit of study descriptions in this Handbook.

Combined BAppSc (Exercise and Sport Science)/BSc (Nutrition) degrees

See also entry for BSc (Nutrition) and Faculty of Health Sciences Handbook.

Degree Code SH115

Summary of requirements
The requirements for the degrees are set out in the Senate and Faculty Resolutions (see Faculty of Health Sciences 2007 handbook) which should be read by all intending candidates. A student may proceed concurrently to the degrees of Bachelor of Applied Science (Exercise and Sport Science) and Bachelor of Science (Nutrition).

Enrolment guide
To qualify for the award of the degrees a student shall complete at least 240 credit points as specified in Table IF Part E, including:

• at least 138 credit points from Science subject areas including at least 12 credit points from Mathematics and Statistics;
• at least 102 credit points of units of study in Exercise and Sport Science; and
• an Honours year (48 credit points) in Nutrition or Nutrition and Dietetics.

Units of study
Units of study are listed in Table IF; unit prerequisites are listed in Table I and Table IF, and in Table 9.2 of Faculty Resolutions for the degree of BAppSc (Exercise and Sport Science), Faculty of Health Sciences. Unit descriptions are found in chapter 10.

Progression requirements
A minimum requirement for progression is set annually based on WAM and performance in Nutrition units. Students must achieve a WAM of at least 60 in their first year and a WAM of at least 65 in subsequent years and at least a Credit (65) in all Intermediate and Senior NUTR units or be transferred from the Combined program to one of the related degrees.

Abandoning and discontinuing
A student may abandon the combined degree course and elect to complete either a BSc, a BSc (Nutrition), a BAppSc (Exercise and Sport Science) or a BAppSc (Exercise, Sport Science and Nutrition) in accordance with the resolutions governing those degrees. A student who does not qualify to undertake an Honours course in Nutrition or Nutrition and Dietetics or who chooses to exit after completing year 4 of the program may graduate with the degree of Bachelor of Applied Science (Exercise Sport Science and Nutrition) in accordance with the resolutions of the Faculty of Health Sciences.

Alternative Honours in BAppSc
In the fifth year a student may elect to undertake an Honours course in Exercise and Sports Science and graduate with the degree of Bachelor of Applied Science (Exercise Sport Science and Nutrition) Honours in accordance with the resolutions of the Faculty of Health Sciences.

Supervision
Students in years 1–4 of the program will be under the general supervision of the Faculty of Health Sciences; students in the Honours year will be under the supervision of the faculty in which the Honours course is being undertaken.

Universities Admission Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.
The Bachelor of Science (Nutrition) is a 4 year Honours degree. To complete the degree, a candidate must gain Credit for at least 192 credit points including the Honours course in either Nutrition and Dietetics, or Nutrition.

### A. Junior units of study

Candidates are required to enrol in and complete:

(i) BIOL(1001 or 1101 or 1901) and BIOL(1002 or 1902 or 1003 or 1903);

(ii) 12 credit points of Junior Chemistry;

(iii) 12 credit points of Junior units of study from the Science Subject Area of Mathematics;

(iv) 6 credit points of other Junior units of study from the Science Subject Areas of Computer Science, Physics or Psychology; and

(v) MBLG1001.

### B. Intermediate units of study

In order to proceed to the Intermediate year, candidates for the BSc (Nutrition) must achieve a WAM of 60 in their Junior year. Candidates who fail to maintain the required average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Nutrition) candidates. Candidates who fail to achieve the required average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Science.

In the Intermediate year candidates are required to enrol in and complete:

(i) NUTR2911 and NUTR2912;

(ii) BCHM(2072 or 2972);

(iii) PHSI2005 and PHSI2006; and

(iv) MIRC2021 and MIRC2022 or at least 12 credit points of Intermediate units of study (6 credit points each semester) from the Science Subject Areas of Chemistry or Pharmacology.

### C. Senior units of study

In order to proceed to the Senior year, candidates for the BSc (Nutrition) must achieve a WAM of 65 in their Intermediate year. Candidates who fail to maintain the required Credit average will be transferred to candidature for the Bachelor of Science degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Science (Nutrition) candidates.

In the Senior year candidates are required to enrol in and complete:

(i) NUTR3911, 3921, 3912 and 3922;

(ii) BCHM(3082 or 3982) and BCHM(3072 or 3972); and

(iii) AGCH(3025 and 3026) or 12 credit points from the following Senior units of study: BCHM(3071 or 3971), BCHM(3081 or 3981), MIRC(3001 or 3901), VIRO(3001 or 3901), NEUR(3001 or 3901), NEUR(3002 or 3902).

D. Honours units of study

In order to proceed to the Honours year, candidates must achieve a WAM of at least Credit (65), and results of at least Credit (65) in all of NUTR 3911, 3921, 3912 and 3922.

Candidates who fail to achieve the required results across the Senior units of study will be transferred to candidature for the Bachelor of Science degree, and if they have otherwise completed the requirements for the BSc Pass degree, will be awarded the Bachelor of Science with a major in Nutrition.

Candidates enrol in and complete either:

(i) Bachelor of Science (Nutrition) Nutrition and Dietetics Honours: NUTR4001 and NUTR4002 and NUTR4999; OR

(ii) Bachelor of Science (Nutrition) Nutrition Honours: NUTR4101, NUTR4102, NUTR4103 and NUTR4104.

E. Combined degree program: Bachelor of Applied Science (Exercise and Sport Science)/Bachelor of Science (Nutrition)

Candidates must complete over 10 semesters the following units of study. In order to proceed from Year 1 to Year 2 of the program candidates must achieve a year WAM of at least 60. In order to proceed to the following years of the program a candidate must achieve at least 65 in each of NUTR 2911, NUTR 2912, NUTR 3911, NUTR 3921, NUTR 3912 and NUTR 3922, and a year WAM of at least 65 in Years 2 - 4. Candidates who fail to maintain these results in any year will be transferred to either the BSc(LH000), the BAppSc(ExSpSc)(SH088) or the BAppSc(ExSpSc&Nutr)(SH115).

For information on units from the BAppSc (ExSpSc), please refer to the Handbook of the Faculty of Health Sciences.

Year 1

Candidates are required to enrol in and complete in their first year:

(i) 12 credit points of Junior Chemistry;
(ii) BACH1161;
(iii) BIOS1159, 1133 and 1160;
(iv) EXSS1018 and 1033; and
(v) MBLG1001.

Year 2

Candidates are required to enrol in and complete in their second year:

(i) BCHM2072 andBIOS 2098;
(ii) EXSS2019, 1029 and 2022;
(iii) MATH1015 and MBLG2071; and
(iv) NUTR2911 and NUTR2912.

Year 3

Candidates are required to enrol in and complete in their third year:

(i) EXSS(2016, 2018, 3023, 3024, 2025, 2026 and 3027); 
(ii) MATH1011 and STAT2012.

Year 4

Candidates are required to enrol in and complete in their fourth year:

(i) NUTR3911, NUTR3921, NUTR3912 and NUTR3922;
(ii) EXSS3037 and EXSS3042;
(iii) BCHM3082 and BCHM3072.

Students can exit here with BAppSc(Exercise, Sports Science and Nutrition).

Year 5 (First offered in 2008)

Honours units of study

Candidates intending to graduate with Honours in Nutrition and Dietetics are required to enrol in and complete in their fifth year:

(i) NUTR4001 and NUTR4002 and NUTR4999

Candidates intending to graduate with Honours in Nutrition are required to enrol in and complete in their fifth year:

(i) NUTR4101 and NUTR4102 and NUTR4103 and NUTR4104.
Combined Science/Law degrees (BSc/LLB)

**Degree Code:** LH006

**Summary of requirements**
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

A student may proceed concurrently to the degrees of Bachelor of Laws and Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics).

**Enrolment guide**
In your Junior year you should complete:
- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics;
- LAWS1006, LAWS1010 and LAWS1008.

To qualify for the award of the BSc degree a student must complete 96 credit points from Science units of study set out in Table I: Bachelor of Science, and 48 credit points from units set out in Table II: Law units of study, including:
- at least 12 credit points from the Science subject areas of Mathematics and Statistics;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics or Statistics;
- 60 credit points of Intermediate/Senior units of study in Science subject areas;
- a major in a Science area.

The order in which Law units of study are taken is specified in the Resolutions of the Senate and Faculty for the Bachelor of Laws.

For commencing 2007 students, Law units of study are taken in the following sequence:

- in the first year of attendance the student will take LAWS1006, LAWS1013 and LAWS1012;
- in the second year of attendance the student will take LAWS1014, LAWS1015 and LAWS1016 and
- in the third year of attendance the student will take LAWSXXXX Torts and Contracts II and LAWSXXXX International Law and LAWSXXXX the Legal Profession (unit of study codes yet to be determined).

In the combined Science/Law course students will spend the first three years at the Camperdown campus during which time the Science degree will be completed along with the equivalent of one year’s study towards the Law degree. The remainder of the course will be completed at the Law School in the city (St James campus) over a period of two years. Full details of the units of study to be completed during this time are included in the Faculty of Law handbook. General enquiries about the combined Science/Law course can be directed to staff in the Faculty of Science Office.

**Advanced streams**
To qualify for the award of the BSc degree in an Advanced stream, a student shall complete the requirements for the BSc degree outlined above and in addition, except with the permission of the Dean,
- include at least 12 credit points of Intermediate Science units of study at either the Advanced level or as TSP units (for BSc (Advanced Mathematics) at least 12 credit points from the Science subject areas of Mathematics and Statistics at either the Advanced level or as TSP units);
- include at least 24 credit points of Senior Science units of study at the Advanced level or as TSP units in a single Science subject area (for the BSc (Advanced)) or 24 credit points of Senior units of study at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics (for the BSc (Advanced Mathematics))

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the BSc.

Total credit points: 144

Require: 144cp total, min. 96cp Science, min 36cp Junior Science incl. 12cp Maths, min. 60cp Intermediate & Senior Science, one major. Law units as per Table II.
9. Combined degrees

Plans of study
When choosing units of study at any stage of your University career, please consider your overall degree program. See the sample degree program below and the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. A degree plan is inside the back cover.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science, and Table II: Laws units of study in chapter 3. Unit descriptions follow the tables. You may also wish to refer to the Faculty of Law handbook for higher year law options.

Honours
For students interested in graduating with honours:
1. Students in the combined Law course who wish to take an honours year in Science until after the completion of the entire combined degree. It may be possible for students to defer an honours year in Science until after the 3rd year of the Combined course. The Faculty of Law generally permits only 1 year of suspension of candidature from the Bachelor of Laws degree (including the combined degree). It may be possible for students to defer an honours year in Science until after the completion of the entire combined course.

2. There is no separate Honours year for the degree of Bachelor of Laws. Graduation with honours in Law is based on weighted average marks (including failures) and requires a high standard of performance in all units of study for the LLB degree, including units of study taken during the 1st three years of the combined course while the student is completing the Science segment of the course.

Discontinuation
To discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation are on page two of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Universities Admissions Index (UAI)
The minimum UAI for course admission varies from year to year.

Degree resolutions: See chapter 2

</tbody>
</table>

Note: The Faculty of Law is undertaking a curriculum review, anticipated to be completed in 2007. Combined law students are expected to complete 48 credit points of Law units in the first 3 years of the combined degree. Third year combined law students who are not able to accumulate 48 cps of Law units using the unit of study codes in this table must contact the Faculty of Law for alternative unit of study codes for Federal Constitutional Law and Law, Lawyers and Justice.

148
Combined Science/Arts degree

See also Summary of Requirements of the BSc.

Degree code LH011 Science/Arts

Summary of requirements
Note that from 2006 students will be admitted to the Bachelor of Science/Arts course only.

Students who enrolled in DH018 Bachelor of Arts/Science should be aware that the degree is now administered by the Faculty of Science.

The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

A student may proceed concurrently to the degrees of Bachelor of Arts and Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) within the BSc/BA course.

Enrolment guide
To qualify for the award of the pass degrees in the BSc/BA course a student shall complete units of study to a total value of at least 240 credit points including:

• at least 96 credit points from Science subject areas;
• at least 12 credit points from the Science subject areas of Mathematics and Statistics;
• at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics or Statistics;
• no more than 96 credit points from Junior units of study;
• a major in a Science area; and
• at least 72 credit points of Senior units of study in Arts subject areas, including a major from Part A of the table of undergraduate units of study in the Faculty of Arts.

Advanced streams
To qualify for the award of the pass degree in the BSc (Advanced) stream, a student shall complete the requirements for the BSc and in addition:

• at least 12 credit points of Intermediate Science units of study at either the Advanced level or as TSP units; and
• at least 24 credit points of Senior units of study at the Advanced level or as TSP units in a single Science subject area;
• maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the non-Advanced stream.

To qualify for the award of the pass degree in the BSc (Advanced Mathematics) stream, a student shall complete the requirements for the BSc degree as outlined above and in addition:

• include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and
• include at least 24 credit points of Senior units of study at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics.

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the non-Advanced stream.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is also a degree planner inside the back cover. Consultation with a Faculty adviser is always recommended.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3. Unit descriptions follow the tables. The Arts units of study available for this degree are set out in Part A of the table of undergraduate units of study in the Faculty of Arts handbook.

Honours
Students who are qualified to do so may undertake honours courses in either or both degrees or a joint honours course at the completion of the combined degrees. Please refer to "Honours in the Faculty of Science" in this chapter, and to Table VI: Honours units of study in chapter 12.

Abandoning and discontinuing
Students may abandon the combined degree course and elect to complete either a BSc or a BA in accordance with the Resolutions governing those degrees.

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Supervision
Supervision of all students in the combined degrees will be the responsibility of the Faculty of Science and the Faculty of Arts.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.
Advanced Mathematics stream of the BSc a student must:

To qualify for the award of the pass degree in the Advanced stream a student shall complete Enrolment guide

Engineering.

(Advanced Mathematics) and any stream of the Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science

A student may proceed concurrently to the degrees of Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) and any stream of the Bachelor of Engineering.

Enrolment guide

To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 240 credit points including:

• 96 credit points from Science subject areas;
• units of study as prescribed in the BE Specialisation Requirement Tables for the specialisation that the student is pursuing; and
• a major in a Science area.

Advanced streams

To qualify for the award of the pass degree in the Advanced or Advanced Mathematics stream of the BSc a student must:

• complete at least 54 credit points of Intermediate/Senior Science units of study of which at least 36 credit points shall be completed at the Advanced level or as TSP units; and
• complete at least 24 credit points of Senior Science units of study at the Advanced level or as TSP units in a single Science subject area (for the BSc (Advanced)) or 24 credit points of Senior units of study at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics (for the BSc (Advanced Mathematics)).

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be awarded the Bachelor of Science.

Plans of study

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is a degree planner inside the back cover.

Units of study

The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3. Unit descriptions appear in chapter 10. The Engineering units of study available for this degree are set out in tables in the Faculty of Engineering handbook.

Honours

Students who are so qualified may be awarded honours in the BE degree or undertake an honours course in the BSc degree. Please

### Combined Engineering/Science degrees

See also Summary of Requirements of the BSc.

**Degree Code HH015**

**Summary of requirements**

The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

A student may proceed concurrently to the degrees of Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics) and any stream of the Bachelor of Engineering.

**Enrolment guide**

To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 240 credit points including:

- 96 credit points from Science subject areas;
- units of study as prescribed in the BE Specialisation Requirement Tables for the specialisation that the student is pursuing; and
- a major in a Science area.

**Advanced streams**

To qualify for the award of the pass degree in the Advanced or Advanced Mathematics stream of the BSc a student must:

- complete at least 54 credit points of Intermediate/Senior Science units of study of which at least 36 credit points shall be completed at the Advanced level or as TSP units; and
- complete at least 24 credit points of Senior Science units of study at the Advanced level or as TSP units in a single Science subject area (for the BSc (Advanced)) or 24 credit points of Senior units of study at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics (for the BSc (Advanced Mathematics)).

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be awarded the Bachelor of Science.

**Plans of study**

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is a degree planner inside the back cover.

**Units of study**

The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3. Unit descriptions appear in chapter 10. The Engineering units of study available for this degree are set out in tables in the Faculty of Engineering handbook.

**Honours**

Students who are so qualified may be awarded honours in the BE degree or undertake an honours course in the BSc degree. Please
Double degree in Science/Engineering

Degree Code LH000

Admission requirements
A student enrolled for a Bachelor of Engineering degree may be permitted to transfer to a BSc degree if:

- at least 96 credit points from units of study in Engineering have been completed with the grade of Pass or better; and
- the student is qualified to enrol in a major in a Science area.

For admission to the Advanced and Advanced Mathematics streams a student must have completed at least 48 credit points of units of study from the BSc with a mark averaged over all attempted units of study of 75 or greater and have met the prerequisites to be able to enrol in the required number of Advanced level units or TSP units.

Enrolment guide
To qualify for the award of the pass degree a student shall complete units of study to a value of at least 48 credit points including:

- 42 credit points of Intermediate/Senior units of study in Science subject areas; and
- a major in a Science area.

Advanced streams
To qualify for the award of the pass degree in the Advanced or Advanced Mathematics stream of the BSc a student shall in addition:

- include at least 72 credit points of Intermediate/Senior Science units of study; and
- include at least 24 credit points of Senior Science units of study at the advanced level or as TSP units in a single Science subject area (for the BSc (Advanced)) or 24 credit points of Senior units of study at the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics (for the BSc (Advanced Mathematics))

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the Bachelor of Science.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Supervision
Students will be under the general supervision of the Faculty of Engineering however students may refer to the Faculty of Science Office for additional information.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.
Combined Science/Commerce degrees

See also Summary of Requirements of the BSc.

Degree Code: LH014

Summary of requirements
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 5) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

A student may proceed concurrently to the degrees of Bachelor of Commerce and Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics).

Enrolment guide
In your Junior year you should complete:

- 12 credit points from the Science subject areas of Mathematics and Statistics;
- 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
- 12 credit points of Junior units of study from either Economics, Accounting or the combination ECMT 1010 and INFS 1000.

To qualify for the award of the pass degree a student must complete successfully units of study amounting to a total of 240 credit points, comprising:

1. in the first six semesters of enrolment at a grade of Pass or better:
   a) 12 credit points of units of study from the Science subject areas of Mathematics and Statistics listed in Table I: Bachelor of Science;
   b) at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics and Statistics; and
   c) 12 credit points in Junior units of study from each of Accounting and Economics;
   d) ECMT 1010, except that a student shall complete an alternative Junior Economics and Business unit of study other than those in (c) and (e) if MATH1015/1005/1905 has been completed;
   e) INFS 1000; and
   f) a minimum of 60 credit points from Intermediate and Senior units of study from Science subject areas.

2. no more than 100 credit points from Junior units of study;
3. at least 96 credit points of Junior units of study taught by the Faculty of Economics and Business;
4. no more than 48 credit points of Junior units of study taught by the Faculty of Economics and Business; and
5. a major in a Science area, and a major or double major in Economics and Business from the list of approved majors for the Bachelor of Commerce.

Advanced streams
To qualify for the award of the pass degree in the BSc (Advanced Mathematics) stream, a student shall complete the requirements for the BSc degree and in addition:

- include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and
- include at least 24 credit points of Senior units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics.

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the non-Advanced stream.

To qualify for the award of the pass degree in the BSc (Advanced Mathematics) stream, a student shall complete the requirements for the BSc degree and in addition:

- include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and
- include at least 24 credit points of Senior units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics.

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the non-Advanced stream.

Plans of study
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. There is a sample degree program below. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is also a degree planner inside the back cover.

Units of study
The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3. Unit descriptions follow the tables. The Commerce units of study available for this degree are set out in the Faculty of Economics and Business handbook. You may also wish to refer to the handbooks of other faculties as the degree resolutions allow.

Honours
Students who are qualified to do so may undertake honours courses in either or both degrees or a joint honours course on completion of the combined degree. Please refer to “Honours in the Faculty of Science” in this chapter, and to Table VI: Honours units of study in chapter 3.

Abandoning and discontinuing
Students may abandon the combined degree course and elect to complete either a BSc or a BCom in accordance with the Resolutions governing those degrees.

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

Special permission
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

Supervision
The Faculty of Science is the Supervising Faculty for the Bachelor of Science/Commerce. However for student matters related to the Bachelor of Commerce component (eg, credit, graduation and progression advice) students should refer to the Faculty of Economics and Business Student Information Office.

Universities Admissions Index (UAI)
The minimum UAI for admission into the course varies from year to year.

Degree resolutions
See chapter 2.

Total credit points: 240

Require: 240cp total, max. 100cp Junior, min. 96cp Science, min. 96cp Junior Science incl. 12cp Maths, one Science major, min. 96cp Commerce, max. 48cp Junior Commerce units, either a Commerce major (32cp) or a Commerce double major (48cp).

Combined Nursing/Science degrees

See also Summary of Requirements of the BSc.

Degree code GN010

Summary of requirements

The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

A student may proceed concurrently to the degrees of Bachelor of Nursing and Bachelor of Science, Bachelor of Science (Advanced) or Bachelor of Science (Advanced Mathematics).

Enrolment guide

To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 240 credit points including:

- at least 132 credit points of units of study listed in the table of units for the degree of BN; and
- at least 96 credit points of units of study listed in the table of units for the degree of BSc; and
- include at least 12 credit points of Senior units of study at the Advanced level or as TSP units; and
- include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject area; and
- include at least 24 credit points of Senior units of study at either the Advanced level or as TSP units in the Science subject area; and
- maintain an average mark of 65 or greater in each year of enrolment, or be transferred to the Bachelor of Science.

Advanced streams

To qualify for the award of the pass degree in the BSc (Advanced) stream, a student shall complete the requirements for the BSc and in addition:

- include at least 12 credit points of Intermediate Science units of study at either the Advanced level or as TSP units; and
- include at least 24 credit points of Senior units of study at the either the Advanced level or as TSP units in a single Science subject area;
- maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the Bachelor of Science.

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or
greater in each year of enrolment, or be transferred to the Bachelor of Science.

**Plans of study**
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is a degree planner inside the back cover.

**Units of study**
The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 10. Unit descriptions follow the tables. The Nursing units of study available for this degree are set out in the Faculty of Nursing handbook.

**Honours**
Students who are qualified to do so may undertake honours courses in either degree or both degrees or a joint honours course on completion of the combined degree.

**Abandoning and discontinuing**
Students may abandon the combined degree course and elect to complete either a BSc or a BN in accordance with the Resolutions governing those degrees.

---

**Combined Education/Science degrees**

See also Summary of Requirements of the BSc.

**Summary of requirements**
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

*Please note that there is no new intake in the BEd/BSc(Psychology) degree in 2006.*

**Enrolment guide**

*BEd (Secondary: Science)/BSc*
To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 240 credit points including:

- at least 96 credit points from Science subject areas and 132 credit points from prescribed Education units of study;
- at least 12 credit points from the Science subject areas of Mathematics and Statistics;
- at least 24 credit points of Junior units of study from at least two Science subject areas other than Mathematics or Statistics;
- a major in a Science area;
- a major in Education; and
- at least 84 credit points of units of study in Curriculum and Professional Studies in Secondary Education.

*Advanced streams*
To qualify for the award of the pass degree in the BSc (Advanced) stream, a student shall complete the requirements for the BSc and in addition:

- include at least 12 credit points of Intermediate Science units of study at either the Advanced level or as TSP units; and
- include at least 24 credit points of Senior units of study at the either the Advanced level or as TSP units in a single Science subject area;

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the Bachelor of Science.

To qualify for the award of the pass degree in the BSc (Advanced Mathematics) stream, a student shall complete the requirements for the BSc degree and in addition:

- include at least 12 credit points of Intermediate units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics; and
- include at least 24 credit points of Senior units of study at either the Advanced level or as TSP units in the Science subject areas of Mathematics and Statistics.

You should note that you must maintain in Intermediate and Senior units of study in Science subject areas an average mark of 65 or greater in each year of enrolment, or be transferred to the Bachelor of Science.

*BEd (Secondary: Mathematics)/BSc* (Psychology)

*There is no new intake for this degree in 2007*

To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 244 credit points including:

**Year I**

- Junior units of study in Education, as specified in the table of units of study, total of 12 credit points; and
- Specified Junior units of study in Psychology, 12 credit points; and
• Junior units of study in Science, 24 credit points, of which 12 credit points must be in Mathematics and 12 in Chemistry

**Year II**

• Units of study in Education, as specified in the table of units of study, total of 18 credit points; and
• Specified Intermediate level units of study in Psychology, 18 credit points; and
• Intermediate level units of study selected from Science Table 1, 12 credit points, which must be in the selected Science teaching subject.

**Year III**

• Units of study in Education, as specified in the table of units of study, total of 18 credit points; and
• Specified Senior units of study in Psychology, 30 credit points.

**Year IV**

• Units of study in Education, as specified in the table of units of study, including professional experience, 24 credit points; and
• Specified units of study in Psychology, 24 credit points.

**Year V**

• Units of study in Education, as specified in the table of units of study, including professional experience, 18 credit points; and
• Specified units of study in Psychology, 20 credit points; and
• Senior units of study selected from Science Table 1, 12 credit points, to complete study in the Science teaching subject.

The Bachelor of Science (Psychology) is not available at an Advanced level.

**Plans of study**

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each major and recommended first year combinations of units of study. There is a degree planner inside the back cover.

---

**Bachelor of Liberal Studies (BLibStud)**

**Degree Code:** AH010

*Note that this degree is administered by the Faculty of Arts*

**Summary of requirements**

In the Bachelor of Liberal Studies students will undertake a broad liberal education which emphasises communication and problem-solving skills. The degree is available in two streams - the Bachelor of Liberal Studies and the Bachelor of Liberal Studies (International).

The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates. In particular it is important to ensure that any proposed course of study will comply with the basic requirements for the degree. Important aspects of the Resolutions are summarised below. The Resolutions should be consulted for any clarification of the summary points.

**Enrolment guide**

**B Liberal Studies**

To qualify for the award of the degree a student shall complete units of study having a total value of at least 192 credit points, including:

• at least 120 Intermediate or Senior credit points;
• at least one Arts major and one Science major;
• at least 30 credit points, including 18 Intermediate or Senior credit points, from units of study in one language subject area other than English from Part A of the Tables of units of study for the degree of Bachelor of Arts:
  • a 6 credit point unit of study in communication and analytical skills or in other academic skills as may be prescribed from time to time (currently ENGL1000, ENGL1007 and LNGS1001); and
  • a minimum of 6 credit points from units of study in Mathematics and Statistics.

**B Liberal Studies (International)**

**Degree Code:** AH030

The requirements for this stream of the degree are the same as those for the BLibStud except that a minimum of 24 credit points (one semester equivalent) of study must be completed at an overseas university while enrolled as an exchange student as part of The University of Sydney Exchange Program. The Exchange Program is usually undertaken in the second or third year of enrolment, and students will comply with the rules of, and be under the administration of, the Exchange Program during the period of exchange. To qualify for participation in the Exchange Program a student must have completed at least 48 credit points towards the BLibStud and have an average mark of 75 or greater over all units of study completed.

During the period of their exchange program a student must be enrolled as a full-time student in the Bachelor of Liberal Studies (International) at The University of Sydney and take classes at the overseas university that will qualify for a minimum of 24 credit points per semester towards the Bachelor of Liberal Studies (International) degree.
Under the Exchange program a student’s academic fees are covered by normal HECs arrangements based on their enrolment at The University of Sydney. However, students are responsible for their own travel and living expenses during the Exchange Program. The Faculties of Arts and Science will provide a number of travel grants each year on a competitive basis, which assist towards students’ travel costs, and students are also eligible to apply for the scholarships and bursaries provided by the University as part of the Exchange Program. Candidates who fail to maintain the required credit average will be transferred to candidature for the Bachelor of Liberal Studies degree in their next year of enrolment with full credit for the units of study completed as Bachelor of Liberal Studies (Advanced) candidates. Candidates who fail to achieve a credit average across all units of study attempted in the year in which they have otherwise completed the requirements for the degree will be awarded the Bachelor of Liberal Studies.

**Plans of study**

It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Science entry for information about each Science major and recommended first year combinations of units of study. There is a sample degree program below and a degree planner inside the back cover. The Faculty of Arts has a Degree Director for Liberal Studies. The Faculty of Science has an Associate Dean responsible for Liberal Studies.

**Units of study**

The Science units of study available for this degree are set out in Table I: Bachelor of Science in chapter 3. Unit descriptions are contained in chapter 10. The Arts units of study available for this degree are set out in Part A of the table of undergraduate units of study in the Faculty of Arts handbook. You may also wish to refer to the handbooks of other faculties as the degree resolutions allow.

**Honours**

There will be honours courses in most Arts and Science subject areas. To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in Part A of the Table of undergraduate units of study for the Bachelor of Arts or in Table VI: Honours units of study. You may also wish to refer to ‘Honours in the Faculty of Science’ in this chapter, and Table VI: Honours units of study in chapter 12.

**Transfer to the Bachelor of Arts or the Bachelor of Science**

Students who at the end of at least four semesters of candidature have completed at least 96 credit points in total, and who intend to satisfy the requirements for entry to a Fourth Year Honours unit of study or joint Honours unit of study for the Bachelor’s degrees in Arts or Science, may apply to transfer to candidature for one of these degrees.

Students who at the end of at least six semesters of candidature have completed units of study which correspond to the entry requirements for Fourth Year Honours for the Bachelor’s degrees in Arts or Science may apply to transfer to candidature for one of these degrees.

Students for the degree may, with the permission of the Faculty concerned, transfer to candidature for the pass degrees of Bachelor of Arts or Bachelor of Science no later than the end of the fourth semester of candidature.

If a student has completed the normal requirements for the pass degree of Bachelor of Arts, Bachelor of Arts (Asian Studies) or Bachelor of Science, he or she may apply to take one of these degrees provided that candidature for the Bachelor of Liberal Studies is abandoned.

**Transfer between the BLibStud and the BLibStud (International)**

Students who have completed at least 48 credit points may be permitted with the permission of the Deans of Arts and Science to transfer from the Bachelor of Liberal Studies to the Bachelor of Liberal Studies (International) stream if:

1. their marks averaged over all attempted units of study is 75 or greater, and
2. they are able to qualify for participation in the Exchange Program.

Students enrolled in the Bachelor of Liberal Studies (International) stream who do not qualify for, or are unable or unwilling to participate in an Exchange Program may, with the permission of the Deans of Arts and Science, transfer to the Bachelor of Liberal Studies.

**Discontinuation**

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

**Special permission**

You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

**Supervision**

From 2005, this degree will be supervised by the Faculty of Arts only.

**Universities Admissions Index (UAI)**

The minimum UAI for admission to the course varies from year to year.

**Degree Resolutions**

See chapter 2.

*Sample degree table appears next page*
Combined Engineering/Medical Science degrees

**Degree Code HH021**

**Summary of requirements**
The requirements for the degree are set out in the Senate and Faculty Resolutions (see chapter 2) which should be read by all intending candidates.

A student may proceed concurrently to the degrees of Bachelor of Engineering (in any specialisation except Civil Engineering) and Bachelor of Medical Science.

**Enrolment guide**
To qualify for the award of the pass degrees a student shall complete units of study to a total value of at least 240 credit points including:

- at least 160 credit points from prescribed Engineering units of study (this total to include the 12 credit points from the Interdisciplinary Thesis)
- 48 credit points of Intermediate core units of study listed in Table IV: Bachelor of Medical Science
- at least 24 credit points of Senior units of study from the subject areas listed in Table IV: Bachelor of Medical Science
- 12 credit points from the Interdisciplinary Thesis.

Students who are so qualified may be awarded honours in the BE degree or undertake an honours course in the BMedSc degree.

**Plans of study**
It is important when choosing units of study at any stage of your university career that you consider your overall degree program. See the Bachelor of Medical Science entry for information about recommended first year combinations of units of study and the sample degree program. There is a degree planner inside the back cover.

**Units of study**
The Science units of study available for this degree are set out in Table IV: Bachelor of Medical Science in chapter 3. Unit descriptions follow the tables. The Engineering units of study available for this degree are set out in the Faculty of Engineering handbook. by the Faculty of Science from 2004.

**Abandoning and discontinuing**
Students may abandon the combined degree course and elect to complete either a BMedSc or a BE in accordance with the Resolutions governing those degrees.

If you wish to discontinue a unit of study it is important to talk to staff in the Faculty Office. In some circumstances, discontinuation can affect your access to units of study, prizes and scholarships. Deadlines for withdrawal and discontinuation can be found on the second page of this handbook.

**Special permission**
You should note that the Faculty can, in certain circumstances, permit exceptions to the normal requirements for a degree. Applications should be made in writing to the Associate Dean (Undergraduate) after discussion with staff in the Faculty Office.

**Supervision**
Students will be under the general supervision of the Faculty of Engineering.

**Universities Admissions Index (UAI)**
The minimum UAI for admission into the course varies from year to year.

**Degree resolutions**
See chapter 2.
9. Combined degrees
10. Undergraduate units of study

Unit of study descriptions
This chapter provides information on each of the undergraduate units of study offered by the Faculty of Science, as well as additional information on each of the teaching Schools and Departments and interdisciplinary subject areas.

Organisation of unit of study information
The units of study are generally organised alphabetically by School of Departments. EMHU and HSTO units can be found under the entry for anatomy and Histology. NEUR can be found in the Anatomy or Physiology entries, depending on the principle teaching department for the individual unit. COMP, INFO, ISYS, NETS, MULT AND SOFT can be found under the Information Technologies entry. NTMP can be found under the Marine Science entry. STAT can be found under the Mathematics and Statistics entry. VIRO can be found under the Microbiology entry.

Aerospace, Mechanical and Mechatronic Engineering
The School of Aerospace, Mechanical and Mechatronic Engineering is part of the Faculty of Engineering. In addition to providing professional training in aerospace, mechanical, biomedical and mechatronic engineering, units of study in the School are available to students in the Faculty of Science who meet any prerequisite requirements for a particular unit.

Registration
Timetable information on alternative lecture/tutorial/laboratory/practical classes is available in the General Office of the School.

Tutorials and laboratories
All students are required to undertake the tutorial and laboratory work associated with the chosen units of study, details of which are provided in the timetables. The experimental and tutorial work, an integral part of the unit of study, complements the lecture material.

Double degree
Science graduates may obtain up to two years advanced standing towards a Bachelor of Engineering degree in Aerospace, Mechanical, Mechatronic or Biomedical Engineering. Students wishing to undertake this option must apply through UAC and compete on the basis of academic merit. Information about application procedures is available from the Engineering Faculty Office in the Engineering Faculty Building.

Agricultural Chemistry and Soil Science
Study in the discipline of Agricultural Chemistry is offered by the Faculty of Agriculture, Food and Natural Resources. Units of study in Agricultural Chemistry for Science students cover aspects of chemistry and biochemistry which are relevant in basic and applied biological sciences including agriculture, the environment and food science. The unit of study, Introductory Rural Environmental Chemistry (AGCH2003) introduces students to basic analytical and environmental chemistry. Senior units of study include Chemistry and Biochemistry of Foods A and B (AGCH3025 & AGCH3026), and Rural Environmental Chemistry A and B (AGCH3030 & AGCH3031). These Senior units of study introduce students to the applied aspects of food chemistry science or to applied environmental chemistry. Emphasis is placed on the chemistry of both naturally occurring molecules of biological, agricultural and environmental significance (e.g., in foods and natural fibres), and chemically synthesised (e.g., insecticides and herbicides).

Agricultural Chemistry Honours is available to students who wish to further their studies in food chemistry or environmental chemistry.

AGCH2003
Rural Environmental Chemistry (Intro)
Credit points: 6 Teacher/Coordinator: Dr Robert Caldwell Session: Semester 1 Classes: 3 lec/week and 33 hours of lab/semester Prerequisites: 12 credit points of Junior Chemistry Prohibitions: AGCH2001, AGCH2002, CHEM2404 Assessment: One 2 hr exam, prac & quizzes Practical field work: 38 hr prac in semester

This introductory unit of study consists of aspects of chemistry relevant in studies of basic and applied biological sciences including agriculture, food and the rural environment. Lecture topics include an introduction to qualitative aspects of biophysical, environmental and aquatic chemistry with particular reference to protocols for specimen sampling and maintenance of specimen quality; the principles of basic analytical methods such as spectroscopy, chromatography and electrochemistry; environmental aspects of water such as thermal properties and its behaviour as a solvent of hydrophobic solutes, surfactants, neutral hydrophilic solutes, salts and other electrolytes, and gases. The lectures will also include environmental nutrient cycling (C, N, S, O, P, micronutrients) with reference to pesticides, herbicides, organic and inorganic pollutants affecting agricultural produce and the environment, and gases of environmental concern. Eleven laboratory sessions will demonstrate aspects of analytical chemistry including: elemental analysis of foods and natural waters, spectrophotometry, chromatographic techniques, preparation of buffers, fundamentals of pH and conductance measurement, water as a solvent including the effect of surfactants and electrolytes. Students will analyse natural water samples using the skills acquired in earlier laboratory and write an environmental assessment from their findings. The introductory laboratory session for the unit will include a tutorial on safety procedures in a chemistry laboratory.

AGCH3024
Chemistry and Biochemistry of Foods
Credit points: 6 Teacher/Coordinator: Dr Robert Caldwell Session: Semester 1 Classes: 3 lec/wk and 8 x 3 hr prac Prerequisites: 12 credit points of Intermediate units from Molecular Biology and Genetics, Biochemistry or Chemistry Prohibitions: AGCH3016, AGCH3017, AGCH3025 Assessment: One 2hr exam (50%), assignments (20%), laboratory (30%) Note: Department permission required for enrolment.

This unit of study aims to give students an understanding of the constituents of foods and fibres. The lecture topics cover: the chemistry, biochemistry and processing behaviour of major food constituents - oligosaccharides, polysaccharides, lipids and proteins; the relationship between molecular structure of constituents and their functionality in foods; natural fibres and gel-forming biopolymers - uses in foods, importance in dietary fibre and commercial products; enzymes in foods and food processing; wheat flour dough and protein chemistry during baking and cooking; flavour chemistry and the chemistry and biochemistry of anti-nutritional and toxic constituents of plants and foods. The practical exercises in this unit of study will focus on the characterisation of food hydrocolloids in terms of particle size distribution, molecular weight distribution, and molecular structure. Students should emerge with a good understanding of the fundamental basis of hydrocolloid characterisation, some familiarity with a broad range of commonly used techniques, and good skills in assessment and processing of experimental data.
AGCH3025
Chemistry and Biochemistry of Foods A
Credit points: 6
Teacher/Coordinator: Dr Robert Caldwell
Session: Semester 1
Classes: 1 hr lecture, 6 x 3 hr prac. per semester.
Prerequisites: 6 credit points of Intermediate units in Agricultural Chemistry, Chemistry or Biochemistry.
Prohibitions: AGCH3017, AGCH3024
Assessment: One 2 hr theory exam, one 1 hr theory of prac exam, assignment and prac reports

This unit of study aims to give students an understanding of the constituents of foods and fibres. The lecture topics cover the chemistry, biochemistry and processing behaviour of major food constituents - oligosaccharides, polysaccharides, lipids and proteins; the relationship between molecular structure of constituents and their functionality in foods; natural fibres and gel-forming polysaccharides - uses in foods, importance in dietary fibre and commercial products; enzymes in foods and food processing; wheat flour dough and protein chemistry during baking and cooking; anti-nutritional and toxic constituents of plants and foods; and flavour chemistry. The laboratory exercises aim to give students an understanding of the methods used in the analysis of foods and other biological materials, and will include analysis of carbohydrates including starch and dietary fibre; spectroscopic, enzymic, and chromatographic methods.

AGCH3026
Chemistry and Biochemistry of Foods B
Credit points: 6
Teacher/Coordinator: Dr Robert Caldwell
Session: Semester 1
Classes: 2 hr lecture/workshop/wk; 24 hrs of practic/semester; site visits.
Prerequisites: 6 credit points of Intermediate Chemistry, Biochemistry or Agricultural Chemistry.
Corequisites: AGCH3025
Prohibitions: AGCH3003, AGCH3005, AGCH4006
Assessment: Five written assignments, one 1 hr theory of prac exam, prac reports and poster presentation

This unit of study aims to give students an understanding of global food systems and global food security. In the lecture/seminar/workshop component, topics covered will include the sustainable production of major food crops and the role of genetic modification in increasing crop yields and food sustainability and quality; principles and methods in food quality control and assessment; chemical and biochemical aspects of food quality in relation to food processing and nutritional values. The laboratory exercises aim to give students an understanding of the methods used in the analysis of foods and other biological materials, and will include analysis and examination of protein functionality in foods; spectroscopic, enzymic, and chromatographic methods.

AGCH3030
Rural Environmental Chemistry A
Credit points: 6
Teacher/Coordinator: Prof Ivan Kennedy (Coordinator)
Session: Semester 1
Classes: 6 day field trip in orientation week, 21 hr lec & 25 hr prac. 6 credit points of Intermediate Agriculture, Chemistry, Biochemistry, Plant Science or Environmental Science.
Prohibitions: AGCH3020, AGCH3021, AGCH3022
Assessment: One 2 hr exam, field trip and laboratory reports

This unit commences with a field trip to the Namoi and the Macquarie Valleys, where agriculture largely based on irrigation has been developed. Environmental impacts on vegetation, soil and water of agricultural enterprises such as cotton farming and human settlement will be assessed in a professional field trip report. Field observations on pH, nutrient and salt content, pesticide, and microbial content will be made on water, sediment, soils and in constructed wetlands, with samples returned for more detailed laboratory analysis at the University. Lectures will complement the field trip, including environmental chemistry of heavy metals, their effects on organisms; mechanisms of tolerance and phytoremediation; risk assessment of pesticides including herbicides, their mode of action and environmental fate; analysis and monitoring of pesticide residues by GC, GC-MS and immunosay (ELISA); maximum residue limits (MRLS) and residue surveys; remediation of pesticides in ecosystems; design of new pesticides and means of pest control. Laboratory sessions will be related to these lecture topics, including 6-7 sessions on atomic absorption analysis for nutrients and heavy metals, mercury analysis, pesticide analysis by GLC, HPLC, MS and ELISA.

AGCH3031
Rural Environmental Chemistry B
Credit points: 6
Teacher/Coordinator: Prof Ivan Kennedy (Coordinator)
Session: Semester 2
Classes: 5-day field trip in AVCC common break; 21 hr lec and 30 hr prac and project/semester.
Prerequisites: 6 credit points of either Intermediate Agricultural Chemistry, Chemistry, Biochemistry, Plant Science or Environmental Science.
Prohibitions: AGCH3020, AGCH3021, AGCH3022
Assessment: One 2 hr exam, field trip report and laboratory reports

This field-oriented course will (i) provide understanding of chemical and biochemical processes in rural ecosystems and their sustainability, with particular reference to global warming, (ii) include a field trip and professional report to illustrate relevant case studies at several centres in eastern Australia (Canberra, Snowy Mountains, Murray and Murrumbidgee catchments) specialising in research related to global warming, acidification and water quality including salinisation (iii) conduct laboratory sessions and group research project to study a problem in a professional setting. Practical solutions will be sought by students, based on a field theory of action in ecosystems. Lectures will cover the environmental carbon, nitrogen and sulphur cycles, including bioenergetics of autotrophic and heterotrophic action; photosynthesis; nitrification and denitrification; biological nitrogen fixation; sulphur metabolism; production of greenhouse gases; pH balancing and efficient nutrient uptake; acidification of ecosystems and effects on plants and animals; remediation and control of greenhouse emissions; bioremediation of acidification and salinisation.

The laboratory sessions and the group project will illustrate these environmental processes, including greenhouse gas production, methane and NOx, photosynthesis and nitrogen fixation, and monitoring of endocrine-disrupting compounds including pesticides using GLC, HPLC and ELISA.

Agricultural Chemistry Honours
Honours in Agricultural Chemistry aims to: provide students with problem-solving and communication skills required by professional chemists in enterprises concerned with agricultural production and processing, foods and beverages, and environmental science; enable students to develop an understanding of the importance of biological chemistry and to provide a basis for students who wish to proceed to postgraduate research. Candidates should consult the Department as soon as possible after results in Senior units of study are obtained. The unit of study consists of a research project and four 6 credit points of study. The research project component includes oral as well as written forms of assessment. Projects are usually available in one of the following areas of current research interest in the Department: carbohydrate and nitrogen metabolism in plants, biological nitrogen fixation and biofertilisers, greenhouse gas production, the biochemistry and environmental chemistry of pesticides and herbicides, environmental risk assessment, acidification of ecosystems, residue analysis in foods, aspects of food science including oil seed and cereal chemistry and biochemistry.

Soil Science
The Soil Science units of study aim primarily at giving students an introduction to the three major branches of soil science, namely soil physics, soil chemistry, and pedology, and at providing the basis for a professional career in each of these divisions for students wishing to specialise. The introductory unit of study is particularly relevant for students interested in the environmental and geological sciences and in land-use management.

SOIL2003
Soil Properties and Processes
Credit points: 6
Teacher/Coordinator: Dr Cattle, Prof McBratney, Dr Singh
Session: Semester 1
Classes: (3 lec & 3hr prac)/wk
Assessment: One 2hr theory exam, one 2hr prac exam, quizzes and prac book

This unit of study is concerned with the fundamental properties of soil, the factors of soil formation, and the processes that operate in the soil system. The components of the unit of study are: pedology; soil physics and soil chemistry. These components are synthesised by reference to common soil profiles. The study of soil in the field starts
with field description and assessment of essential characteristics. The physics of water and gas movement, temperature, density, swelling and strength are considered. Soil chemistry includes properties of organic matter, cation exchange capacity, nitrogen, phosphorus, potassium and acidity. Common soil types of N.S.W. are studied in relation to their formation, properties and classification.

R.E. White Introduction to the Principles and Practice of Soil Science 3rd edn (Blackwells Scientific, 1997)
A. Wild (ed.) Russell's Soil Conditions and Plant Growth 11th edn (Wiley, 1988)

SOIL2004
The Soil Resource
Credit points: 6
Teacher/Coordinator: A/Prof Balwant Singh (Coordinator), Prof Alex McBratney, Dr Stephen Cattle
Session: Semester 2
Classes: 2 (lec/2hr prac)/wk
Prerequisites: GEO1001 or GEO1002/1902 or ENV1002 or GEOG1001
Assessment: Fieldtrip participation (5%), soil mapping report (25%), laboratory report (15%), examination (55%)

The unit of study is designed to provide a detailed knowledge of the important features and problems of Australian soils. By the end of this unit of study, students will develop skills in describing and interpreting soil profile features in the field. They will become familiar with quantitative soil data handling procedures and be able to quantitative soil mapping; and measure common soil properties in the laboratory. They will also learn to work in a team environment and write a report on soil mapping and laboratory analysis. The lecture topics include: Features, geography and management of Australian soils; Digital soil mapping - concepts and spatial prediction of soil classes; Soil quality, soil health and soil function - physical, biological and chemical indicators of soil sustainability; Soil structure: The elements of soil structure and methods of their assessment; The degradation and amelioration of soil structure and its effect on agriculture; Soil water erosion - detachment, entrainment, runoff and deposition; Soil acidification: effects of soil acidity in soils, forms of soil acidity, sources of soil acidity, buffering mechanisms in soils, soil pH and Al availability, extent of soil acidity in Australia and remediation of soil acidity; Soil salinity: causes, sources of salts, nature of soil salinity, salinity parameters in soil and water, effects of salinity on plant growth, management of soil salinity; Soil contamination: concepts/definitions, sources of contaminants, effects of contaminants, major contaminants in soil, remediation of contaminated soils; soil carbon accounting.

Textbooks

A more comprehensive reading list will be provided in the laboratory manual.

SOIL3005
Field and Laboratory Soil Physics
Credit points: 6
Teacher/Coordinator: Professor Alex McBratney
Session: Semester 1
Classes: 2 (lec/2hr prac)/wk, 5 days in the field (prior to beginning of February semester)
Prerequisites: SOIL2004
Assessment: One 2hr exam, lab report, presentation.

The soil science specialisation trains people for careers in professional soil science and extension. It provides an excellent background for entry into all aspects of soil science research ranging from physics through mineralogy and chemistry to pedology. Increasing emphasis is being given to aspects of soil sustainability and environmental soil science in order that graduates can meet the growing national demands in this area. The emphasis is to examine the quantitative aspects of soil physics particularly in relation to the transfer of energy, gas, water, solids and solutes in soil. Lecture and lab topics include heat flow, gas movement, soil water energetics, saturated and unsaturated flow of soil water, infiltration, solute movement, water and wind erosion as well as the electrical properties of soil and fundamentals of numerical computer modelling of soil physical processes. Five days' field-work, in the week prior to the beginning of February Semester, involves field measurement of soil physical properties such as shear and compressive strength, electrical conductivity, temperature, evaporation, hydraulic conductivity and infiltration rates and moisture content.

Textbooks
Reference books:

SOIL3006
Field and Laboratory Pedology
Credit points: 6
Teacher/Coordinator: Dr Stephen Cattle
Session: Semester 1
Classes: 2 (lec/2hr prac)/wk, 5 days in the field (prior to beginning of February semester)
Prerequisites: SOIL2004
Assessment: One 3hr exam, field report, lab report, presentation.

Note: Department permission required for enrolment.

The soil science specialisation trains people for careers in professional soil science and extension. It provides an excellent background for entry into all aspects of soil science research ranging from physics through mineralogy and chemistry to pedology. Increasing emphasis is being given to aspects of soil sustainability and environmental soil science in order that graduates can meet the growing national demands in this area. The main part of this unit of study is the pedological characterization of a number of contrasting soil profiles sampled during the pre-semester field trip. This 5 day field-trip begins 10 days before the beginning of the February semester and involves the study and sampling of soil through central and northern NSW. Students become acquainted with soil types in a variety of landscape, geologic, climatic and landuse settings and develop an understanding of the importance of different soil parent materials. Linkages are made between soil formation processes and resultant soil properties, and the role of soil in various environmental and agricultural ecosystems. Field skills acquired during this trip include a proficiency in soil profile description and an ability to classify soil type according to the Australian Soil Classification scheme. Laboratory analyses of soil samples collected during the field trip include particle-size analysis and extraction of fine-sand fraction for optical identification andquantification of the mineral species present. X-Ray diffraction is used to identify the clay minerals and elucidate mineralogical transformations in these samples. Scanning electron microscopy is also used to examine surface features and mineral composition. Thin sections of some typical NSW soil types are examined and the main features are identified and quantified. The data from these micromorphological investigations are used to provide an understanding of the pedogenesis of soil profiles in specific locations. The lecture series for this unit of study focuses on the main soil-forming (pedogenetic) processes operating both in Australia and abroad. Rock and soil mineral transformations and mechanisms for soil horizon development are addressed. Case studies and recent pedological research publications are used to highlight these topics. A detailed study, including exercises, is also made of two main international soil classification schemes, Soil Taxonomy and the World Reference Base for Soil Resources (WRB), and the Australian Soil Classification system.

Textbooks
Reference books:
Buol S, Walker M, Southard R. Soil Genes and Classification. Iowa State University, 2003
Isbell R. The Australian Soil Classification. CSIRO, 1996
SOIL3007
Environmental Soil Chemistry

Credit points: 6  
Teacher/Coordinator: Dr Balwant Singh  
Session: Semester 2
Classes: 2 lec, 3 hr prac/wk (wks 1-13).
Prerequisites: SOIL2004

Assessment: One 3 hr exam, 4 lab reports and one oral presentation on a given topic.

Note: Department permission required for enrolment.

The main objective of the unit is to develop an understanding of the common chemical properties and processes in soil environment. By the end of this unit of study, students will become familiar with soil chemical composition and develop skills in describing chemical processes in soil environment. They will be able to measure various chemical properties of soil and soil solution in the laboratory; and perform chemical speciation of ions in soil solution. Students will also learn to work in a team environment and develop communication and writing skills. Syllabus summary: The lecture topics include: the structure and chemistry of inorganic components in soil, surface charge of soil minerals, chemistry and general properties of soil organic matter, important functional groups of soil organic matter, role of organic matter in soil, cation exchange in soil, selectivity of cations on soil colloids, cation exchange reactions and selectivity coefficients, adsorption reactions of environmentally important ions, surface functional groups, adsorption isotherms, equilibrium based adsorption models, point of zero charge, diffuse double layer-theory and models, surface complexation models, soil solution-importance, methods of obtaining soil solutions, models to determine activity coefficients, speciation, dissolution and solubility processes in soil environment, soil chemical equilibria, geochemical speciation models and redox chemistry of soil.

Textbooks
Lindsay WL, Chemical Equilibria in Soils, John Wiley & Sons, New York, 1979

SOIL3008
Rural Spatial Information Systems

Credit points: 6  
Teacher/Coordinator: Dr Odeh  
Session: Semester 2
Classes: 2 lec & 2 hr prac/wk (wks 1-13), four-day field trip in AVCC common break
Assessment: One 2 hr exam, field excursion and lab prac reports, presentation and essay topic

The lecture material will present several themes: i) Principles of Geographical Information Science (GISc): brief history of GISc, ontology and epistemology of spatial phenomena, basic Geographical Information Systems (GIS) structure, coordinate systems and map projections and datums; ii) Fundamentals of remote sensing and geo-image analysis; iii) Geospatial data sources and acquisition methods, including existing maps and their digitisation, remote sensing images, digital elevation models (DEM) and global positioning systems (GPSs); iv) Processing of geospatial data: spatial data in the computer, building and accessing an entity in the database and continuous fields, data analysis using entities and continuous fields for decision support, etc.; v) Spatial statistics: quality of spatial data, spatial analysis of geospatial data, geostatistics, introduction to spatial-temporal modelling. Software packages for geographical information systems will be reviewed. Practical exercises will focus on applications to land-cover assessment, subcatchment and regional hydrology, and soil quality assessment for decisions regarding sustainable rural land use planning and management. Two of the 4 days of the mid-Semester field excursion will be spent in Canberra visiting various government agencies which research and maintain GIS coverages of major rural environments. The remaining fieldwork will be at University farms at Camden or Arthursleigh, and will involve training in the field use of low and high-resolution GPS for geo-rectification, for ground truthing satellite-derived land cover maps and for the creation of digital elevation models and landform attributes.

Textbooks

Soil Science Honours

The honours program consists of several parts: i) supplementary lectures and seminars; ii) topics of study selected from Agricultural Chemistry, Biometry, Botany, Geology, Physical Chemistry, Mathematics, Soil Mechanics, Soil Microbiology, etc; iii) small amount of field work performed under direction; and iv) a project in one branch of soil science.

Anatomy and Histology

The Department of Anatomy and Histology teaches topographical and neuroanatomy, histology and cell biology, developmental biology and physical anthropology to students in the Faculties of Science, Medicine and Dentistry.

Location

The Department is in the Anderson Stuart Building. The Department Office is on the first floor, Room S463.

Noticeboards

The noticeboards are situated near Rooms W225, S431 and S463. Students are advised to consult the noticeboard regularly. Timetables for lectures and practical classes will be posted, where possible, in the week before the beginning of each semester.

Advice on units of study and enrolment

Students wishing to enrol in units of study in Anatomy and Histology must consult the Departmental advisers in the Enrolment Centre during re-enrolment week prior to enrolling in the units of study. Information will be available at this time on the units of study offered by the Department and on the advisability of various combinations of subjects.

Registration

All students should register with the Department. Please consult the Departmental noticeboards for details.

Vaccinations

All students studying gross anatomy or neurosciences who may also be exposed to human tissues or fluids should contact the University Health Service regarding vaccinations.

Protective Clothing

All students studying gross anatomy or neurosciences must wear a laboratory coat or gown in tutorial rooms and a gown in dissection rooms and must wear gloves when handling cadaveric material.

Web-site

The Department's web site is located at http://www.anatomy.usyd.edu.au/.

ANAT2008

Principles of Histology

Credit points: 6  
Teacher/Coordinator: Associate Professor Maria Byrne  
Session: Semester 1
Classes: Two 1 hour lectures and one 2 hour practical per week; on-line and museum exercises (6 hours per week total)
Prerequisites: 12 credit points of Junior Biology or Junior Psychology

Prohibitions: ANAT2001 Assumed knowledge: General concepts in human biology  
Assessment: One 1 hour theory exam, one 1 hour practical exam, four quizzes

This unit of study covers the principles of cell biology and study of the structure of cells, tissues and organ systems at the light and electron microscopic levels. The focus is on human systems. Extension exercises introduce students to the connection between histology and...
anatomy. Modern practical applications of histological techniques and analysis for research are also presented.

Textbooks

ANAT2009
Comparative Primate Anatomy
Credit points: 6 Teacher/Coordinator: Dr Denise Donlon Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical per week. Prerequisites: BIOL (1001 or 1002 or 1003 or 1004) or PSYC (1001 and 1002). Prohibitions: ANAT2002. Assumed knowledge: Knowledge of basic vertebrate biology. Assessment: One 1 hour theory exam, one 30 min prac exam, two quizzes, one 2000 word essay

This unit of study covers the musculo-skeletal anatomy of the human body with particular emphasis on human evolution and comparisons with apes and fossil hominids. The topics covered include the versatility of the human hand, in manipulation and locomotion, bipedalism, climbing and brachiation in apes, and the change in pelvic anatomy associated with bipedalism and obstetric consequences.

Textbooks

ANAT2010
Concepts of Neuroanatomy
Credit points: 6 Teacher/Coordinator: Dr Karen Cullen Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical per week. Prerequisites: BIOL (1001 or 1001) and one of: BIOL (1902 or 1903) or 1003 or 1002) or PSYC (1001 and 1002). Prohibitions: ANAT2003. Assumed knowledge: Background in basic mammalian biology. Assessment: One 1.5 hour theory exam, one 1 hour practical exam, 2000 word essay, practical reports

Students are introduced to the structure and organisation of the central and peripheral nervous system. The course begins with an exploration into the make-up of the individual cells, followed by an examination of the different regions of the nervous system. A final theme of the course touches on the organisation of various systems (sensory and motor), together with aspects of higher-order function (memory). In essence, the course covers general concepts of organisation, structure and function of the brain and its different areas. The practicals offer students the unique opportunity to examine specimens in the Anatomy labs and museum. This course will be of considerable interest to students studying science and related disciplines, as well as those wishing to pursue further study in Neuroscience at senior levels.

Textbooks

ANAT3004
Cranial and Cervical Anatomy
Credit points: 6 Teacher/Coordinator: Dr Robin Arnold Session: Semester 2 Classes: Two 1 hour lectures and one 3-4 hour tutorial per week. Prerequisites: ANAT2002 or ANAT2009 or BMED2803 or BMED2804 or BMED2805 or BMED2806. Prohibitions: ANAT3005. Assumed knowledge: General knowledge of biology. Assessment: One 1.5 hour theory exam, one 1 hour prac exam, one 2500 word essay, continuous assessment (10%) Note: The completion of 6 credit points of MBLG is highly recommended.

This unit of study covers skull, muscles of facial expression, muscles of jaw and neck, ear, eye, nose, oral cavity and larynx and pharynx as well as peripheral distribution of cranial nerves in the head and neck. The functional components of the cranial nerves and their relationship to the special senses and special motor functions such as facial gesture and speech are also studied. Tutorials are designed to encourage students to develop their own approach to the understanding and organisation of subject material. Communication of key concepts and presentation of subject material in an academic context are encouraged and assessed in a major assignment.

Textbooks

ANAT3006
Forensic Osteology
Credit points: 6 Teacher/Coordinator: Dr Denise Donlon Session: Semester 1 Classes: Two 1 hour lectures, one 2 hour tutorial and one 1 hour practical per week. Prerequisites: Credit in ANAT2009 or Credit in ANAT2002 (for students who completed Intermediate study before 2005) or BMED2803 or BMED2804 or BMED2805 or BMED2806. Prohibitions: ANAT3005. Assumed knowledge: An understanding of basic human musculoskeletal anatomy. Assessment: One 1 hour theory exam, one 30 min prac exam, continuous assessment, case study.

Note: The completion of 6 credit points of MBLG is highly recommended.

This unit of study aims to introduce students to the area of forensic osteology, which is the study of human skeletal remains within the legal context. Thus the unit of study aims to help students learn about human morphology and variation through the investigation and identification of human bones. It will also help students gain skills in observation and rigorous record taking and in analysis and interpretation. Production of case reports and practice in acting as ‘expert witness’ will improve students written and oral skills. An additional objective will be to assist students in learning to deal with legal and ethical issues.

Textbooks

ANAT3007
Visceral Anatomy
Credit points: 6 Teacher/Coordinator: Dr Robin Arnold Session: Semester 1 Classes: Two 1 hour lectures and one 3-4 hour practical per week. Prerequisites: ANAT2009 or ANAT2010. Assumed knowledge: General knowledge of biology. Assessment: One 1.5 hour theory exam, one 1 hour prac exam, one 1200 word essay

This unit of study aims to provide an understanding of the anatomy of the viscera of the thorax, abdomen and pelvis. Structures covered include the heart and associated great vessels, lungs, mediastinum and the abdominal viscera, the alimentary organs and the genitourinary system. The structure of anterior thoracic and abdominal walls and pelvis along with the nerve supply to the viscera and relevant endocrine structures is also covered. Emphasis is placed on the relationship of structure to function especially with respect to the important functions of breathing, digestion, excretion and reproduction. Students will also be encouraged to relate their understanding of the structures studied to current research into these structures in related fields such as molecular biology and physiology.

Textbooks

ANAT3008
Musculoskeletal Anatomy
Credit points: 6 Teacher/Coordinator: Dr Rachel Ward Session: Semester 2 Classes: Two 1 hour lectures, two 2 hour tutorial/practical per week. Prerequisites: ANAT2009 or ANAT2002 (for students who completed Intermediate study before 2005) or BMED2803 or BMED2804 or BMED2805 or BMED2806. Prohibitions: ANAT3005. Assumed knowledge: Some knowledge of basic mammalian biology. Assessment: One assignment, one 1 hour prac exam, one 1.5 hour theory exam.

The unit provides an opportunity for students to study the topographical and systems anatomy of the upper limb, lower limb and the back regions. Emphasis is placed upon the identification and description of structures and the correlation of structure with function. This includes for the upper limb, its role in manipulation, for the lower limb standing and walking and for the back flexible support and protection. Emphasis is also given to the innervation of the limbs. The unit also aims to develop the general skills of observation, description, drawing, writing and discussion as applying to biological structure.

EMHU3001
Electron Microscopy and Imaging/Theory
Credit points: 6 Teacher/Coordinator: Dr Anne Swan and Dr Alan Jones Session: Semester 2 Classes: Four 1 hour lectures and one 1 hour tutorial
per week. Prerequisites: At least 12 cp of Intermediate Science units from any of the following: Biochemistry, Biology, Chemistry, Mathematics, Microbiology, Molecular Biology & Genetics, Pharmacology, Physics, Physiology or Statistics. For BMEdSc students: either 36 cp of Intermediate units including BMEd (2501, 2503 & 2505) or 42 cp of BMEd Intermediate units including (2801, 2802, 2803 & 2806). Assumed knowledge: General concepts in Biology, and in Biochemistry or in Chemistry. Assessment: Two 1 hour exams, theoretical research assignment as a PowerPoint (TM) submission and presentation (10 min).

The course is run conjointly by the Department of Anatomy and Histology and the Electron Microscope Unit. The course will focus on the theoretical aspects of transmission and scanning electron microscopy, the preparation of biological samples for electron microscopy, digital imaging, and freeze-fracture. Immunological and other techniques required in modern research and hospital electron microscope laboratories will also be covered. Students will also receive theoretical training in laser scanning confocal microscopy including the use of fluorescent probes to visualize cellular organelles and cellular processes. Students will undertake a theoretical research project of their choice which is of relevance to the course.

Textbooks

EMHU3002
Electron Microscopy and Imaging/Prac
Credit points: 6 Teacher/Coordinator: Dr Anne Swan and Dr Alan Jones Session: Semester 2 Classes: Two 2 hour practicals and one 1 hour tutorial per week. Prerequisites: 12 cp as follows: 6 cp from ANAT2009 or 4 cp from ANAT2001 plus at least 6 cp OR 8 cp respectively of Intermediate Science units of study. For BMEdSci: Either 36 credit points of Intermediate units including BMEd (2501, 2503 & 2505) or 42 credit points of BMEd Intermediate units including BMEd (2801, 2802, 2803 & 2806). Corequisites: EMHU30001 Assumed knowledge: General concepts in Biology, Histology and in Biochemistry or in Chemistry. Assessment: Two 1 hour exams, practical reports, practical project assignment by PowerPoint (TM) submission and presentation (10 min).

The course is run conjointly by the Department of Anatomy & Histology and the Electron Microscope Unit. The course will provide hands-on training in the operation of transmission and scanning electron microscopes, processing biological samples for electron microscopy, ultrathin sectioning, cryo-ultramicrotomy, freeze-fracture, electron diffraction, digital imaging, immunological and other techniques required in modern research and hospital electron microscope laboratories. Students will also learn the operation of laser scanning confocal microscopes, including the use of fluorescent probes to visualize cellular organelles and cellular processes. Students will apply their knowledge to complete a project of their choice on electron microscopy of a biological sample, from fixation of the sample to interpretation of the resulting electron micrographs.

HSTO3001
Microscopy & Histochemistry Theory
Credit points: 6 Teacher/Coordinator: Robin Arnold, Prof. Chris Murphy Session: Semester 1 Classes: Usually 4 hour lectures per week plus some tutorials Prerequisites: (ANAT2008 or ANAT2001) or (BMEd 2803 or 2804 or 2805 or 2806). Corequisites: HSTO3002 Assumed knowledge: Basic understanding of biology. Assessment: One 2 hour theory exam, 1 essay.

The aims of this unit of study are to provide a theoretical understanding of why biological tissues need to be specifically prepared for microscopic examination, to apply different methods to gain different types of morphological information; to allow students to learn to use the different types & modalities of microscopes: to gain first hand experience of how they function & see for themselves the differing information they provide; to learn to stain biological material for microscopic examination; applying their theoretical knowledge & to allow students to develop practical skills in diverse histochemical staining procedures - dyes, enzymes & antibodies.

Textbooks

HSTO3002
Microscopy & Histochemistry Practical
Credit points: 6 Teacher/Coordinator: Robin Arnold, Prof. Chris Murphy Session: Semester 1 Classes: Usually 5.5 hours practical per week Prerequisites: (ANAT2008 or ANAT2001) or (BMEd 2803 or 2804 or 2805 or 2806). Corequisites: HSTO3001 Assumed knowledge: Basic understanding of biology. Assessment: One 1.5 hour practical exam, 1 practical report.

The aims of this unit of study are to provide a practical understanding of why biological tissues need to be specifically prepared for microscopic examination, to apply different methods to gain different types of morphological information; to allow students to learn to use the different types & modalities of microscopes: to gain first hand experience of how they function & see for themselves the differing information they provide; to learn to stain biological material for microscopic examination; applying their theoretical knowledge & to allow students to develop practical skills in diverse histochemical staining procedures - dyes, enzymes & antibodies.

HSTO3003
Cells and Development: Theory
Credit points: 6 Teacher/Coordinator: Dr Frank Lovicu Session: Semester 2 Classes: Four 1 hour theory lectures and one 1 hour tutorial per week. Prerequisites: For BSc students: ANAT2008 or ANAT2001 For BMEdSc students: 42 credit points of Intermediate BMEd units, including: BMED2801, 2802, 2805. Prohibitions: HSTO3002 Assumed knowledge: (i) An understanding of the basic structure of vertebrates; (ii) An understanding of elementary biochemistry and genetics. Assessment: One 2 hour exam, tutorial research papers.

Note: The completion of 6 credit points of MBLG is highly recommended.

The main emphasis of this unit of study concerns the mechanisms that control animal development. Fertilization, cleavage, gastrulation and the formation of the primary germ layers are described in a range of animals, mainly vertebrates. Much of the emphasis will be placed on the parts played by inductive cell and tissue interactions in cell and tissue differentiation, morphogenesis and pattern formation. This will be studied at both cellular and molecular levels.

Textbooks

HSTO3004
Cells and Development: Practical (Adv)
Credit points: 6 Teacher/Coordinator: Dr Frank Lovicu Session: Semester 2 Classes: One 2 hour tutorial and two 2 hour practicals per week. Prerequisites: Note: This advanced unit of study is only available to select students who have achieved a mark of 65 or above in the following prerequisite units of study. For BSc students: ANAT2008 or ANAT2001 and any one of the following intermediate MBLG units (2071, 2971, 2771, 2871, 2001, 2101, 2901). For BMEdSc students: 42 credit points of Intermediate BMEd units, including: BMED2801, 2802, 2805. Prohibitions: HSTO3002 Assumed knowledge: Basic understanding of biology. Assessment: One 1 hour exam, Practical class reports.

Note: The completion of 6 credit points of MBLG is highly recommended.

This advanced unit of study complements HSTO3003 (Cells and Development:Theory) and is catered to provide students with laboratory research experience leading to Honours and higher degrees. It will primarily cover the design and application of experimental procedures involved in cell and developmental biology, using appropriate molecular and cellular techniques to answer developmental questions raised in HSTO3003. This unit of study will promote hands on experience with different animal models, allowing students to observe and examine developing and differentiating tissues at the macroscopic and microscopic level. The main emphasis of this unit of study will concentrate on practical approaches to understanding the mechanisms that control animal development. Fertilization,
NEUR3002
Neuroscience: Motor Systems & Behaviour
Credit points: 6 Teacher/Coordinator: Dr Vladimir Balcar Session: Semester 1 Classes: Two 1 hour lectures per week, one 3 hour practical per fortnight and one 3 hour tutorial per fortnight. Prerequisites: For BMedSc students: BMED/2801 or 2903; and BMED/2806 or 2805; For other students: (PHSI/2101 or 2901 or 2905 or 2909) or (ANAT/2003 or 2010) and 6 credit points of MBLG. Prohibitions: PHSI3001, NEUR3902 Assumed knowledge: It is strongly recommended that students also take unit NEUR3001. ANAT2010 and PHSI2005 is assumed knowledge. Assessment: Two 1 hour exams, one prac report, tutorial papers, 2000 word essay.

The aim of this course is to provide students with an introduction to the structure and function of the nervous system. Our current knowledge of how the brain works is based on the analysis of the normal structure of the nervous system and its pathways, the functional effects of lesions and neurological diseases in different parts of the nervous system, and the way that nerve cells work at the molecular, cellular and integrative level. This course focuses on the neural circuits and the mechanisms that control somatic and autonomic motor systems, motivated behaviours, emotions, and other higher order functions. The lecture series addresses the different topics, each of which offers special insight into the function of the nervous system in health and disease.

Textbooks
NEUR3002
Neuroscience: Motor Systems & Behav. Adv
Credit points: 6 Teacher/Coordinator: Dr Vladimir Balcar Session: Semester 1 Classes: Two 1 hour lectures per week, one 3 hour practical per fortnight and one 3 hour tutorial per fortnight. Advanced students may be exempt from attending some of these classes to permit meetings with supervisor. Prerequisites: For BMEDSc students: Credit average in BMED/2801 or 2903 and BMED/2806 or 2805; For other students: Credit average in (PHSI/2101 or 2901 or 2905 or 2909) or (ANAT/2003 or 2010) and 6 credit points of MBLG. Prohibitions: NEUR3002, PHSI3001 Assumed knowledge: ANAT2010 and PHSI2005 is assumed knowledge. Assessment: Two 1 hour exams, one prac report, tutorial papers, one research or library essay (research essay will replace some other assessment items from regular course).
Note: Permission from the coordinators is required for entry into this course. It is strongly recommended that students also take unit NEUR3001 or NEUR3901.

This unit of study is an extension of NEUR3002 for talented students with an interest in Neuroscience and research in this field. The lecture/practical component of the course is run in conjunction with NEUR3002. The aim of this course is to provide students with an introduction to the structure and function of the nervous system. Our current knowledge of how the brain works is based on the analysis of the normal structure of the nervous system and its pathways, the functional effects of lesions and neurological diseases in different parts of the nervous system, and the way that nerve cells work at the molecular, cellular and integrative level. This course focuses on the neural circuits and the mechanisms that control somatic and autonomic motor systems, motivated behaviours, emotions, and other higher order functions. The lecture series addresses the different topics, each of which offers special insight into the function of the nervous system in health and disease.

molecules, the nature of genetic material and control of its expression and leads to an understanding of the molecular nature of living systems.

**Junior program**
The Junior program has the introductory faculty Unit of Study Molecular Biology & Genetics Intro (MBLG1001).

**Intermediate program**
The comprehensive Intermediate program in Biochemistry and Molecular Biology includes Protein Biochemistry (BCHM2071/2971), Human Biochemistry (BCHM2072/2972) and the faculty Unit of Study Molecular Biology & Genetics A (MBLG2071/2971). Students wishing to progress to the Senior units of study in Biochemistry and Molecular Biology need to have completed MBLG1001 and 12 CP of Intermediate BCHM/MBLG Units of Study.

**Senior program**
The Senior program consists of Molecular Biology & Biochemistry - Genes (BCHM3071/3971), Molecular Biology & Biochemistry - Protein (BCHM3081/3981), Human Molecular Cell Biology (BCHM3072/3972), Medical and Metabolic Biochemistry (BCHM3082/3982), Proteomics and Functional Genomics (BCHM3092/3992). Any four of these units of study constitute a major in Biochemistry. Students seeking further information should consult the relevant Tables in earlier Undergraduate Enrolment Advice chapters.

**BCHM2071**
**Protein Biochemistry**
*Credit points: 6*  
*Teacher/Coordinator: Dr Charles Collyer*  
*Session: Semester 1*  
*Classes: Two 2 hour lectures per week, one 1 hour tutorial and one 4 hour practical per fortnight.*  
*Prerequisites: 12 credit points of Junior Chemistry plus MBLG1001*  
*Corequisites: Recommended concurrent units of study: intermediate MBLG for progression to Senior Biochemistry, and/or Intermediate Chemistry.*  
*Prohibitions: BCHM2011, BCHM2971*  
*Assumed knowledge: CHEM (1101 and 1102)*  
*Assessment: One 2 hour theory and theory of practical exam, two prac reports.*

This unit of study introduces biochemistry by describing the physical and chemical activities of proteins and their functions in cells. The details of protein interactions with other cellular components are presented and the relationship of protein structure and function is discussed. Techniques in protein chemistry and analysis, including proteomics are introduced together with key experiments which reveal the physical basis of the functioning of proteins. This course builds on the protein science presented in MBLG1001 and is ideally suited to students studying intermediate Chemistry together with Biochemistry. The practical course will nurture technical skills in biochemistry and will include protein preparation, the interpretation of protein structure, enzymatic assays and biochemical analysis.

**Textbooks**

**BCHM2072**
**Human Biochemistry**
*Credit points: 6*  
*Teacher/Coordinator: A/Prof Gareth Denyer*  
*Session: Semester 2*  
*Classes: Two 2 hour lectures per week, one 1 hour tutorial and 4 hour practical per fortnight.*  
*Prerequisites: Either MBLG1001 and 12 credit points of Junior Chemistry or either MBLG2071 or MBLG2971*  
*Prohibitions: BCHM2072, BCHM2002, BCHM2102, BCHM2902, BCHM2112*  
*Assessment: One 3 hour exam, practical reports*

This unit of study aims to describe how cells work at the molecular level, with special emphasis on human biochemistry. The chemical reactions which occur inside cells are described in the first series of lectures, Cellular Metabolism. Aspects of the molecular architecture of cells which enable them to transduce messages and communicate are described in the second half of the unit of study. At every stage, there is emphasis on the 'whole body' consequences of reactions, pathways and processes at the cellular level. Cellular Metabolism describes how cells extract energy from fuel molecules like fatty acids and carbohydrates, how the body controls the rate of fuel utilization and how the mix of fuels is regulated (especially under different physiological circumstances such as starvation and exercise). The metabolic inter-relationships of the muscle, brain, adipose tissue and liver and the role of hormones in coordinating tissue metabolic relationships is discussed. The unit also discusses how the body lays down and stores vital fuel reserves such as fat and glycogen, how hormones modulate fuel partitioning between tissues and the strategies involved in digestion and absorption and transport of nutrients. Signal Transduction covers how communication across membranes occurs (i.e. via surface receptors and signaling cascades). This allows detailed molecular discussion of the mechanism of hormone action and intracellular process targeting. The practical component complements the lectures by exposing students to experiments which investigate the measurement of glucose utilization using radioactive tracers and the design of biochemical assay systems. During the unit of study, generic skills will be nurtured by frequent use of computers and problem solving activities. However, student exposure to generic skills will be extended by the introduction of exercises designed to teach oral communication, instruction writing and feedback articulation skills.

**BCHM2972**
**Human Biochemistry (Advanced)**
*Credit points: 6*  
*Teacher/Coordinator: A/Prof Gareth Denyer*  
*Session: Semester 2*  
*Classes: Two 2 hour lectures per week, one 1 hour tutorial and 4 hour practical per fortnight.*  
*Prerequisites: Either (i) Distinction in one of (BCHM (2071 or 2971) or MBLG (2071 or 2971)) or (ii) Distinction in MBLG1001 and Distinction average in all other Junior Science Units of Study undertaken.*  
*Prohibitions: BCHM2072, BCHM2002, BCHM2102, BCHM2902, BCHM2112*  
*Assessment: One 3 hour exam, practical reports*

BCHM3071
Molecular Biology & Biochemistry- Genes
Credit points: 6 Teacher/Coordinator: Mrs Jill Johnston, Prof Merlin Crossley
Session: Semester 1 Classes: Two 1 hour lectures per week and one 6 hour practical per fortnight. Prerequisites: MBLG1001 and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMED2802 and BMED2804. Prohibitions: BCHM3971, BCHM3001, BCHM3901
Assessment: One 2.5 hour exam, prac work.

This unit of study is designed to provide a comprehensive coverage of the activity of genes in living organisms, with a focus on eukaryotic and particularly human systems. The lecture component covers the arrangement and structure of genes, how genes are expressed, promoter activity and enhancer action. This leads into discussions on the biochemical basis of differentiation of eukaryotic cells, the molecular basis of imprinting, epigenetics, and the role of RNA in gene expression. Additionally, the course discusses the effects of damage to the genome and mechanisms of DNA repair. The modern techniques for manipulating and analysing macromolecules such as DNA and proteins and their relevance to medical and biotechnological applications are discussed. Techniques such as the generation of gene knockout and transgenic mice are discussed as well as genomic techniques for manipulating and analysing macromolecules such as DNA and proteins and their relevance to medical and biotechnological applications. Particular emphasis is placed on how modern molecular biology and biochemical methods have led to our current understanding of the structure and functions of proteins. It also covers phosphorylation and medically important aspects of proteins in living systems, including the roles of chaperones in protein folding inside cells, the pathological consequences of misfolding of proteins, how proteins are sorted to different cellular compartments and how the biological activities of proteins can be controlled by regulated protein degradation. The practical course is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in molecular biology and protein biochemistry laboratories.

The practical course is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in molecular biology and protein biochemistry laboratories. The lecture component of this unit of study is the same as BCHM3071. Qualified students will attend seminars/practical classes in which more sophisticated topics in gene expression and manipulation will be covered.

Textbooks
Lesk, A Introduction to Protein Science (Oxford University Press, 2004)
This unit of study will explore the responses of cells to changes in their environment in both health and disease. The lecture course consists of three integrated modules. The first will provide an overview of the role of signalling mechanisms in the control of human cell biology and then focus on cell surface receptors and the downstream signal transduction events that they initiate. The second will examine how cells detect and respond to pathogenic molecular patterns displayed by infectious agents and injured cells by discussing the roles of relevant cell surface receptors, cytokines and signal transduction pathways. The third will consider life, death and differentiation of human cells in response to intra-cellular and extra-cellular signals by discussing the eukaryotic cell cycle under normal and pathological circumstances and programmed cell death in response to abnormal extra-cellular and intra-cellular signals. In all modules emphasis will be placed on the molecular processes involved in human cell biology, how modern molecular and cell biology methods have led to our current understanding of them and the implications of them for pathologies such as cancer. The practical component is designed to complement the lecture course, providing students with experience in a wide range of techniques used in modern molecular cell biology.

**Human Molecular Cell Biology (Advanced)**

**Credit points:** 6  
**Teacher/Coordinator:** Mrs Jill Johnston, Prof Iain Campbell  
**Session:** Semester 2  
**Classes:** Two 1 hour lecture per week and one 6 hour practical per fortnight.  
**Prerequisites:** MBLG1001 and Distinction in 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/MBLG2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMed2802 and BMed2804  
**Prohibitions:** BCHM3982, BCHM3002, BCHM3902, BCHM3904  
**Assessment:** One 2.5 hour exam, prac work.

This unit of study will explore the biochemical processes involved in the operation of cells and how they are integrated in tissues and in the whole human body in normal and diseased states. These concepts will be illustrated by considering whole-body aspects of energy utilization, fat and glycogen storage and their regulation under normal conditions compared to obesity and diabetes. Key concepts that will be discussed include energy balance, regulation of metabolic rate, control of food intake, tissue interactions in fuel selection, the role of adipose tissue and transport of fuel molecules from storage organs and into cells. Particular emphasis will be placed on how the modern concepts of metabolomics, coupled with new methods, including magnetic resonance techniques, molecular biology methods and microarray technologies, as well as studies of the structure and function of enzymes, have led to our current understanding of how metabolic processes are normally integrated and how they become deranged in disease states. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in modern medical and metabolic biochemistry.

**BCHM3092**

**Proteomics and Functional Genomics**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Stuart Cordwell, Mrs Jill Johnston  
**Session:** Semester 2  
**Classes:** Two 1 hour lectures per week and one 3 hour practical per week.  
**Prerequisites:** MBLG1001 and 12 CP of Intermediate BCHM/MBLG units (taken from MBLG2071/2971 or BCHM2071/2971 or BCHM2072/2972) or 42CP of Intermediate BMedSc units, including BMed2802 and BMed2804.  
**Prohibitions:** BCHM3992, BCHM3098  
**Assessment:** One 2.5 hour exam, prac work.

This unit of study will focus on the high throughput methods for the analysis of gene structure and function (genomics) and the analysis
of proteins (proteomics), which are at the forefront of discovery in the biomedical sciences. The course will concentrate on the hierarchy of gene-protein-structure-function through an examination of modern technologies built on the concepts of genomics versus molecular biology, and proteomics versus biochemistry. Technologies to be examined include DNA sequencing, nucleic acid and protein microarrays, two-dimensional gel electrophoresis of proteins, uses of mass spectrometry for high throughput protein identification, isotope tagging for quantitative proteomics, high-performance liquid chromatography, high-throughput functional assays, affinity chromatography and modern methods for database analysis. Particular emphasis will be placed on how these technologies can provide insight into the molecular basis of changes in cellular function under both physiological and pathological conditions as well as how they can be applied to biotechnology for the discovery of biomarkers, diagnostics, and therapeutics. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in proteomics and genomics.

Technologies to be examined include DNA sequencing, nucleic acid and protein microarrays, two-dimensional gel electrophoresis of proteins, uses of mass spectrometry for high throughput protein identification, isotope tagging for quantitative proteomics, high-performance liquid chromatography, high-throughput functional assays, affinity chromatography and modern methods for database analysis. Particular emphasis will be placed on how these technologies can provide insight into the molecular basis of changes in cellular function under both physiological and pathological conditions as well as how they can be applied to biotechnology for the discovery of biomarkers, diagnostics, and therapeutics. The practical component is designed to complement the lecture course and will provide students with experience in a wide range of techniques used in proteomics and genomics. The lecture component of this unit of study is the same as BCHM3092. Qualified students will attend seminars/practical classes in which more sophisticated topics in gene expression and manipulation will be covered.

Liebler, Daniel C. Introduction to proteomics : tools for the new biology (Humana Press, 2002)

**Biochemistry Honours**

An Honours program of study designed for those wishing to enter research or to undertake work leading to a higher degree is conducted in the fourth year. The program runs from early February until mid-November (mid year entry is not normally available). It provides the opportunity for research on a project supervised by a particular staff member, as well as the study of advanced and developing aspects of Biochemistry. During the year each student is required to write one essay, for which there is a choice of topics. Assessment of the year’s work is based largely on the student’s performance on the research project, and a written report on the project. During the second semester of the Senior Biochemistry units of study students are invited to apply for permission to enrol in the Honours units of study and are provided with a list of possible research projects.

**Honours Research Areas**

Potential research topics currently offered to students include: Anticancer drugs: synthesis and mechanism of action; Biochemistry of cellular signal transduction; The causes of diabetes and/or obesity; Chaperones and amyloid formation; X-ray crystallography of proteins and drug DNA complexes; NMR studies of the solution structure of DNA binding proteins; NMR studies of membrane transport and metabolism in cells; Eukaryotic transcription factors; Proteomics; Bioinformatics; Protein structure modeling; Mass Spectroscopy; Genomics; Molecular biology of humans and yeasts; Gene expression in transgenic mice; Glycemic index of foods; oligosaccharides in human milk.

**Applying for admission to Honours**

Students must arrange to speak with potential supervisors. An application form is attached to the list of possible research projects provided to students or is available from the Honours coordinator and they are asked to provide the names of at least four supervisors in order of preference. A decision on the Honours intake is made before Christmas. An attempt is made to assign students to the supervisor of their choice but this will not always be possible. In difficult cases there is further discussion with the student. The usual requirement for acceptance into the Honours program is a pass at the Credit level in 12 credit points of Senior Biochemistry. Additionally, strong students with relevant training (ie. Chemistry, Biology or Medical Sciences) may be admitted by permission of the Head of School. It should be noted that the number of students accepted into the Honours program may be limited because of resource restrictions (eg, availability of a supervisor and/or laboratory space) and that, in the event of there being more applicants than resources will allow, offers will be made on the basis of academic merit. The Honours unit of study codes are listed in the Honours chapter of this Handbook - chapter 12. The Honours year co-ordinator is Dr Easterbrook-Smith

**Bioinformatics**

Bioinformatics is an interdisciplinary area of science, involving Computer Science, Computational Science, Mathematics, Statistics, and the Life Sciences (ie. biology, medicine, etc). It is responsible for the development and use of computer systems, databases, software, networks, and hardware to solve scientific problems in a wide variety of areas ranging from biology to medicine. Due to its interdisciplinary nature, the BSc (Bioinformatics) degree is composed of units of study that are offered also to students enrolled in other degrees, the general aim being to equip the students enrolled in the BSc (Bioinformatics) degree with knowledge in key areas of relevance to Bioinformatics.

**First Year**

In the first year of their study, students devote time to units of study offered by the School of Biological Sciences, School of Chemistry, School of Information Technologies, School of Mathematics and Statistics, and School of Molecular and Microbial Biosciences (see Table 1A in chapter 4).

**Second Year**

In the second and third year of their study, students divide time equally between the Life Sciences and the mathematical, statistical, and computational sciences, choosing units of study from those offered by the School of Biological Sciences, School of Information Technologies, School of Mathematics and Statistics, School of Molecular and Microbial Biosciences, School of Physics, and the Department of Pharmacology (see Table 1A).

**Third Year**

In the third year of their study, the students are highly recommended to enrol in BIOL3027/3927 (Bioinformatics and Genomics) and BCHM3092/3992 (Proteomics and Functional Genomics). Furthermore, the students complete a unit of study - BINF3101 (Bioinformatics Project) - that is designed specifically to give them an opportunity to do real research, supervised by scientists from the bio-medical

169
disciplines. For further information regarding third year requirements see Table 1A.

BINF3101
Bioinformatics Project
Credit points: 6
Teacher/Coordinator: Dr LS Jermin, Dr MA Charleston
Session: Semester 2
Classes: 1 hour meeting with supervisor and 7 hours project work per week. 3-4 introductory lectures given by supervisor
Prerequisites: SOFT (2130 or 2930 or 2904 or 2904) and 12 credit points from Intermediate Biology, Biochemistry, Microbiology, Molecular Biology and Genetics or Pharmacology
Prohibitions: COMP3206, BINF3001
Assumed knowledge: 12 credit points from Junior units of study in Software Development (SOFT) and/or Computational Science (COSC)
Assessment: Quality of proposal (10%), seminar (30%), and report (60%), which includes assessment of the application. The assessment is done at a group level (groups comprise 4 students) for quality of proposal and seminar, and at the individual level for the report.

This unit of study is building on a real-case scenario involving an IT company and its clients, employers and employees. The client (i.e. a university researcher with an interest in bioinformatics) contacts the company with the aim to obtain a bioinformatics application that will assist him/her in the pursuit of new avenues of research and service provision. Terms of reference are drafted with the project managers (i.e. the academics responsible for the unit of study) of the IT company, and are then presented to a small group of employees (i.e. the students), who design and implement a plan of how to write and deliver the software.

Biological Sciences
Advice on units of study
Members of the Biology staff are normally present among Faculty Advisers during enrolment week. Any student needing advice before enrolling should make an appointment to see a Departmental adviser from the School of Biological Sciences.

Assistance during semester
The offices of Junior year Biology staff are on the 5th floor of Carslaw. The School maintains an excellent website that provides access to resources for students: http://www.bio.usyd.edu.au/

Summer School: January-February
The School of Biological Sciences offers some units of study in The Sydney Summer School. Consult The Sydney Summer School website for more information: www.summer.usyd.edu.au

Junior units of study
BION1001
Concepts in Biology
Credit points: 6
Session: Semester 1
Classes: Three 1 hour lectures and one 3 hour practical per week
Prohibitions: BION1101, BION1901
Assumed knowledge: No previous knowledge required. Students who have not taken HSC biology are recommended to take the Biology Bridging Course (February). Students who have completed HSC Biology are advised to enrol in BION1101 Ecosystems to Genes rather than BION1001.
Assessment: One 2.5 hour exam, assignments, quizzes
Note: It is recommended that BION (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.

Concepts in Biology is an introduction to the major themes of modern biology. Starting with interactions between organisms in biological communities, we move on to introductory cell biology, which particularly emphasises how cells obtain and use energy, followed by the diversity and biology of microorganisms. This leads into an introduction to molecular biology through the role of DNA in protein synthesis and development. The genetics of organisms is then discussed, leading to consideration of theories of evolution and the origins of the diversity of modern organisms.

Textbooks

BION1101
Biology - Ecosystems to Genes
Credit points: 6
Session: Semester 1
Classes: Three 1 hour lectures and one 3 hours practical per week
Prerequisites: HSC 2-unit Biology or equivalent.

Prohibitions: BION1001, BION1901
Assessment: One 2.5 hour exam, assignments, quizzes.
Note: It is recommended that BION (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.

Biology - Ecosystems to Genes builds on a satisfactory prior knowledge of the HSC 2-unit biology course. A brief revision of the basic concepts of the high school course is given. Biology - Ecosystems to Genes builds on the main themes introduced in HSC biology to provide a background to the breadth of biology, including genetics of organisms, theories of evolution and the origins of diversity of modern organisms; diversity of microorganisms, cell biology with emphasis on how cells obtain and use energy, modern molecular biology and interactions between organisms in biological communities.

Textbooks

BION1901
Biology - Ecosystems to Genes (Advanced)
Credit points: 6
Session: Semester 1
Classes: Three 1 hour lectures and one 3 hour practical per week.
Prerequisites: UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation.
Prohibitions: BION1001, BION1101
Assessment: One 2.5 hour exam, assignments, quizzes
Note: Department permission required for enrolment.

This unit of study shares lectures and practical classes with BION1101 but also includes more demanding alternative components of Biology - Ecosystems to Genes.

Textbooks
As for BION1101.

BION1002
Living Systems
Credit points: 6
Session: Semester 2
Classes: Three 1 hour lectures and one 2 hour practical per week.
Prerequisites: UAI of at least 93 and HSC Biology course are strongly advised to complete a Biology Bridging Course (in February).
Assessment: One 2.5 hour exam, assignments, quizzes.

Living Systems deals with the biology of organisms, from bacteria to large plants and animals, and emphasises the ways in which they can live in a range of habitats. The importance of energy in living systems, and how elements are used and recycled in biological communities, are described. The unit of study includes lectures and laboratory classes on the physiology of nutrition and growth, basic physiological processes of animals and plants, the ways in which organisms control and integrate their activities, and their reproduction. Finally applications of knowledge of genetics and ecology to practical problems in agriculture and conservation are introduced. It is recommended that BION (1001 or 1101 or 1901) be taken before this unit of study. This unit of study, together with BION (1001 or 1101 or 1901) provides entry to all Intermediate units of study in biology in the School of Biological Sciences.

Textbooks

BION1902
Living Systems (Advanced)
Credit points: 6
Session: Semester 2
Classes: Three 1 hour lectures and one 2 hour practical per week.
Prerequisites: UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation.
Prohibitions: BION1002, BION1904
Assessment: One 2.5 hour exam, assignments, quizzes, independent project
Note: Department permission required for enrolment.

This unit of study shares lectures and practical classes with BION1002 but also includes more demanding alternative components of Living Systems.

Textbooks
As for BION1002.
**Biol1003 Human Biology**

**Credit points:** 6  
**Session:** Semester 2  
**Main Classes:** Two 1 hour lectures per week (3 lectures in weeks 1 and 11) plus 1 hour per lecture of independent study. One 3 hour practical most weeks, plus 6-9 hours Hbonline work every three weeks covering online practical activities, prework and homework.  
**Prohibitions:** Biol1003, Eduh1016.  
**Assumed knowledge:** Hsc 2-unit Biology. Students who have not taken HSC biology are recommended to take the Biology Bridging Course in February.  
**Assessment:** One 2.5 hour exam, assignment, poster and quizzes.

This Unit of Study has three main components: lectures, practicals and Hbonline activities. The unit of study provides an introduction to human evolution and ecology, cell biology, physiology and anatomy, through both lectures and practical work. It begins with human evolution, human population dynamics and the impact of people on the environment. The unit includes human nutrition, distribution of essential requirements to and from cells, control of body functions and defence mechanisms. After discussion of reproduction and development, it concludes with modern studies and research prospects in biotechnology and human genetics. It is recommended that Biol (1001 or 1101 or 1901) be taken before this unit of study. Enrolment may be restricted by the availability of places. This unit of study, together with Biol (1001 or 1101 or 1901), provides entry to Intermediate units of study in Biology, but the content of Biol (1002 or 1902) is assumed knowledge for Biol (2011 or 2012) and Plnt (2002 or 2003) and students entering from Biol (1003 or 1903) will need to do some preparatory reading.

**Textbooks**

**Biol1903 Human Biology (Advanced)**

**Credit points:** 6  
**Session:** Semester 2 Classes: Two 1 hour lectures per week (3 lectures in weeks 1 and 11) plus 1 hour per lecture of independent study. One 3 hour laboratory session most weeks, plus 6-9 hours Hbonline work every three weeks covering online practical activities, prework and homework.  
**Prohibitions:** Uai of at least 93 and Hsc Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation.  
**Prohibitions:** Biol1003, Biol1904, Biol1905, Eduh1016.  
**Assessment:** One 2.5 hour exam, assignment, poster and quizzes  
**Note:** Department permission required for enrolment.

This unit of study is the same as Biol1003 except for the addition of 3 special seminars from guest speakers, a three hour ethics and bioscience component and three student peer group case study presentations.  
**Textbooks**
As for Biol1003

**Intermediate units of study**

Students who wish to take Intermediate Biology units of study should obtain information for Students Considering Intermediate Biology Units of Study from the School Office (Science Rd Cottage, A10). Students should discuss their preferences, together with the other units of study they propose to study, with a Biology staff member before enrolling.

If you are considering going on to study Senior Biology you must satisfy the Intermediate qualifying and prerequisite units of study for the Senior units of study you intend taking. Mblg (2071 or 2971) and Mblg (2072 or 2972) are highly recommended to be taken by science students in combination with all 6 credit point Intermediate Biology units of study, and are qualifying units for Biol (3018, 3025, 3026, 3027). Note that Mblg (2071 or 2971) is a prerequisite for students wishing to enrol in Mblg (2072 or 2972). See entry for Mblg 2071, 2971, 2072, 2972 under the heading Molecular Biology and Genetics. The following eight Intermediate units of study are offered:

**Semester 1 units of study**

**Semester 2 units of study**

**Note:**
Only one component of each of the above listed Intermediate units of study may be credited towards the degree. Qualifying units of study for certain Senior Biology units of study are defined as combinations of 6 credit points of Intermediate Biology units of study (see the Senior unit of study descriptions or Information for Students booklets). For details of Plnt units please refer to the Plant Science entry in this chapter.

**Biol2011 Invertebrate Zoology**

**Credit points:** 6  
**Teacher/Coordinator:** Dr E L May  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week, or three 1 hour lectures and one 2 practicals per week.  
**Prerequisites:** Biol (1001 or 1101 or 1901) and either one of Biol (1002 or 1902 or 1003 or 1903) or Mblg1001 or Eduh1016 and 12 credit points of Junior Chemistry. For students in Scs (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics.  
**Prohibitions:** Biol2911, Biol2901, Biol2101, Biol2901.  
**Assumed knowledge:** The content of Biol (1002 or 1902) is assumed knowledge and students entering without Biol (1002 or 1902) will need to do some preparatory reading.  
**Assessment:** Mid-semester test, one 2 hour theory exam, one 1.5 hour prac exam, one essay, tutorial work.  
**Note:** The completion of 6 credit points of Mblg units of study is highly recommended.

This unit of study provides a thorough grounding in the diversity of animals by lectures and detailed laboratory classes, which include dissections and demonstrations of the functional anatomy of invertebrates. The material is presented within the conceptual framework of evolution and the principles and use of phylogeny and classification. Tutorials further explore concepts of phylogeny, animal structure and function, and provide opportunity to develop oral and written communication skills. The unit of study is designed to be taken in conjunction with Biol2012 Vertebrates and their Origins; the two units of study together provide complete coverage of the diversity of animals at the level of phyllum. This unit of study may be taken alone, but when taken with Biol2012 provides entry into certain Senior Biology units of study.

**Biol2012 Vertebrates and their Origins**

**Credit points:** 6  
**Teacher/Coordinator:** Dr E L May  
**Session:** Semester 2  
**Classes:** Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week, or three 1 hour lectures and one 2 practicals per week; one field trip.  
**Prerequisites:** Biol (1001 or 1101 or 1901) and either one of Biol (1002 or 1902 or 1003 or 1903) or Mblg1001 or Eduh1016 and 12 credit points of
172

Biol 2016 Cell biology

Credit points: 6 Teacher/Coordinator: Dr Murray Thomson, Dr Jan Marc, A/Prof Robyn Overall, Dr Osu Lilje Session: Semester 2 Classes: Three 1 hour lectures and one 3 hour practical per week, (wks 1-9). Prerequisites: BIOL2012, BIOL2006, BIOL2106, BIOL2906 Assessment: One 2 hour theory exam, two practical reports, a presentation, review and an insect collection. Assessment: Two hour theory exam, one project assignment, one prac report

Note: The completion of 6 credit points of MBLG units of study is highly recommended.

This unit of study focuses on contemporary principles in cell biology and development in plant and animals, with emphasis on cellular functions and favouring the molecular perspective. Topics include the structure, function, and evolution of cells and organelles, cellular development and differentiation, and embryonic development. Material covered in lectures is integrated with laboratory classes. The unit of study is designed to complement intermediate Molecular Biology and Genetics units. It leads ideally to various senior units of study in biology, including Plant Growth & Development, Applications of Recombinant DNA Tech, Evolutionary Genetics & Animal Behaviour, Fungal Biology, Animal Physiology, Bioinformatics and Genomics, as well as senior units of study in biochemistry.

Textbooks

Biol 2917 Entomology (Advanced)

Credit points: 6 Teacher/Coordinator: Dr Dieter Hochuli Session: Semester 2 Classes: One 2.5 hour lecture and one 2.5 hour practical per week. Prerequisites: BIOL2012, BIOL2006, BIOL2106, BIOL2906 Assessment: One 3 hour theory exam, one project assignment, one essay, tutorial work

Note: The completion of 6 credit points of MBLG units of study is highly recommended.

This unit of study completes the grounding in the diversity of animals at the level of phylum introduced in BIOL2011 Invertebrate Zoology, building on the lecture and laboratory classes, which include dissections and demonstrations of the functional anatomy of vertebrates and invertebrate phyla not covered in BIOL2011. Tutorials further explore concepts of phylogeny, animal structure and function, and provide opportunity to develop oral and written communication skills. Students may choose to attend an intensive 3.5 day field trip.

Biol 2912 Vertebrates and their Origins (Advanced)

Credit points: 6 Teacher/Coordinator: Dr E May Session: Semester 2 Classes: See BIOL2012. Prerequisites: Distinction average in BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBLG1001 or EDUH1016 and 12 credit points of Junior Chemistry. For students in BSc (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. These requirements may be varied and students with lower averages should consult the Unit Executive Officer. Prohibitions: BIOL2012. Prohibitions: BIOL2012, BIOL2007. BIOL2902 Prerequisites: The content of BIOL (1002 or 1902) is assumed knowledge and students entering without BIOL (1002 or 1902) will need to do some preparatory reading. Assessment: See BIOL2012

Note: The completion of 6 credit points of MBLG units of study is highly recommended.

Qualified students will participate in alternative components of BIOL 2012 Vertebrates and their Origins. The content and nature of these components may vary from year to year.

Biol 2017 Entomology

Credit points: 6 Teacher/Coordinator: Dr Dieter Hochuli Session: Semester 2 Classes: Two 2 hour theory exam, two practical classes, one project assignment, one prac report

Assessment: Two hour theory exam, two practical reports, a presentation, review and an insect collection.

A general but comprehensive introduction to Insect Biology, this unit of study develops understanding of the scientific approach to insect structural diversity, identification, life histories, development, physiology, ecology, biogeography, principles of control, toxicology of insecticides and biology of major economic pests in NSW. Practicals give a working knowledge of major orders of insects, economically important species, their role in conservation, preservation and identification. Entomological data bases are introduced, and students do a library assignment and make and present a small collection of insects. Project work considers the use of insects in forensic investigations, insect-plant interactions and insects as tools for environmental assessment.

Biol 2911 Cell Biology

Credit points: 6 Teacher/Coordinator: Dr Murray Thomson, Dr Jan Marc, A/Prof Robyn Overall, Dr Osu Lilje Session: Semester 1 Classes: Three 1 hour lectures and one 3 hour practical per week, (wks 1-9). Prerequisites: BIOL2011 or 1101 or 1901 and BIOL (1002 or 1902 or 1003 or 1903) or MBLG1001 or EDUH1016 and 12 credit points of Junior Chemistry. For students in BSc (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. These requirements may be varied and students with lower averages should consult the Unit Executive Officer. Prohibitions: BIOL2012, BIOL2007. BIOL2901 Prerequisites: BIOL2012, BIOL2006, BIOL2106, BIOL2906 Assessment: One 3 hour theory exam, one project assignment, one prac report

Assessment: See BIOL2012

Note: The completion of MBLG1001 is highly recommended.

This unit of study focuses on contemporary principles in cell biology and development in plant and animals, with emphasis on cellular functions and favouring the molecular perspective. Topics include the structure, function, and evolution of cells and organelles, cellular development and differentiation, and embryonic development. Material covered in lectures is integrated with laboratory classes. The unit of study is designed to complement intermediate Molecular Biology and Genetics units. It leads ideally to various senior units of study in biology, including Plant Growth & Development, Applications of Recombinant DNA Tech, Evolutionary Genetics & Animal Behaviour, Fungal Biology, Animal Physiology, Bioinformatics and Genomics, as well as senior units of study in biochemistry.

Textbooks

Biol 2916 Cell Biology (Advanced)

Credit points: 6 Teacher/Coordinator: Dr Murray Thomson, Dr Jan Marc, A/Prof Robyn Overall, Dr Osu Lilje Session: Semester 1 Classes: Three 1 hour lectures per week and one 3 hour practical per week (weeks 1-9). Prerequisites: Distinction average in BIOL (1001 or 1101 or 1901) and one of BIOL (1002 or 1902 or 1003 or 1903 or 1904 or 1905) or MBLG1001 and 12 credit points of Junior Chemistry. For students in the BSc (Marine Science) 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. These requirements may be varied and students with lower averages should consult the Unit Executive Officer. Prohibitions: BIOL2016, BIOL2006, BIOL2106, BIOL2906 Assessment: One 3 hour exam, one practical report and one project assignment

Note: The completion of MBLG1001 is highly recommended. This is a core intermediate unit in the BSc (Molecular Biology and Genetics) award course.

Qualified students will participate in alternative components of BIOL2016 Cell Biology.

Textbooks
As for BIOL2016

Biol 2017 Entomology

Credit points: 6 Teacher/Coordinator: Dr Dieter Hochuli Session: Semester 2 Classes: Two 2 hour theory exam, one 2.5 hour practical per week. Prerequisites: 12 credit points of Junior Biology, or equivalent, e.g. BIOL (1001 or 1101 or 1901) and either one of BIOL (1002 or 1902 or 1003 or 1903) or MBLG1001 or EDUH1016 and 12 credit points of Junior Chemistry. For BSc (Marine Science) students 6 credit points of Junior Chemistry and either an additional 6 credit points of Junior Chemistry or 6 credit points of Junior Physics. Prohibitions: BIOL2917, BIOL2007. Assumed knowledge: BIOL (2011 or 2911 or 2001 or 2901) Assessment: Two hour theory exam, two practical reports, a presentation, review and an insect collection.

Students proceeding from Intermediate to Senior Biology

Students who intend to proceed from Intermediate to Senior Biology must:(a) obtain Information for Students Considering Senior Biology Units of Study from the School Office (The Cottage, A10 Science Road). This booklet gives detailed synopses of all Senior Biology units of study, (b) discuss their choice with a Biology Staff member before enrolling.

Senior units of study offered: pre-semester 1

Senior units of study offered: semester 1

Biol 3006 Ecological Methods (MS), BIOL3011 Ecophysiology (MS), BIOL3012 Animal Physiology, BIOL3013 Marine Biology (MS), BIOL3018 Applications of Recombinant DNA Technology, BIOL3027 Bioinformatics and Genomics, PLNT 3003 Systematics & Evolution
of Plants. (Plus Advanced versions of the above - BIOL 39xx, PLNT 39xx)

**Senior units of study offered: pre-semester 2 intensive**

**Senior units of study offered: semester 2**

BIOL3007 Ecology (MS), BIOL3025 Evolutionary Genetics and Animal Behaviour, BIOL3026 Developmental Genetics, PLNT3002 Plant Growth & Development. (Plus Advanced versions of the above - BIOL 39xx, PLNT 39xx)

**Further information**

Details of lectures and practical classes are given in the booklet: Information for Students Considering Senior Biology Units of Study. Any combination of units may be chosen subject to timetable and prerequisite constraints. Units of Study are offered subject to student numbers, availability of staff and resources. Quotas exist on Marine Field Eco., BIOL 3008/3009, and Terrestrial Field Ecology, BIOL 3009/3909. When necessary, selection is based on academic merit. Students majoring in Marine Science must enrol in 24 credit points of Senior Marine Science, including at least 6 credit points of Senior Biology (from those marked MS) and 6 credit points from GEOS units. If these credit points are taken as part of Marine Science they may not be counted towards a Biology major.

**Selecting Units of Study**

Select your unit of study after checking (a) that you have passed the qualifying units of study stated for each unit of study, and (b) checking your timetable. You are strongly advised to check the most up-to-date information (including details of quotas in Marine modules) in the booklet: Information for Students Considering Senior Biology Units of Study, available from the School Office (The Cottage, A10, Science Road).

**Textbooks**

A list of textbooks and reference books is provided in the booklet: Information for Students Considering Senior Biology Units of Study.

**BIOL3006 Ecological Methods**

**Credit points: 6**

Teacher/Coordinator: Dr Clare McArthur (UEO), Dr Dieter Hochuli, A/Prof Ross Coleman. **Session:** Semester 1 Classes: Two 1 hour lectures and one 3 hour laboratory per week. **Prerequisites:** 12 credit points of intermediate level Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3906, BIOL3023, BIOL3923, MARS3102 Assumed knowledge: BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 5922). **Assessment:** One 2 hour exam (40% of assessment), practical assignments (60%; including calculations, reports and reviews)

This unit will consider ecology as a quantitative, experimental and theoretical science. It is concerned with the practical skills and philosophical background required to explore questions and test hypotheses in the real world. Application of ecological methods and theory to practical problems will be integrated throughout the unit of study. Lectures will be on sound philosophical and experimental principles, drawing on real examples for demonstration of concepts, and will be useful as one basis for informed conservation, use and general management of natural populations and habitats. Practical classes will deal with practical methods of determining patterns of distribution and abundance, problems of sampling, estimation of ecological variables, and methods of statistical analysis of field data. Computer simulations and analyses will be used where appropriate.

**Textbooks**

**BIOL3006 Ecological Methods (Advanced)**

**Credit points: 6**

Teacher/Coordinator: Dr Clare McArthur (UEO), Dr Dieter Hochuli, A/Prof Ross Coleman. **Session:** Semester 2 Classes: Two 1 hour lectures and one 3 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology; or MARS2011 or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3007, BIOL3024, BIOL3924, BIOL3940, BIOL3940, BIOL3940, BIOL3940, BIOL3940, BIOL3940, BIOL3940, MARS3102 Assumed knowledge: BIOL (2011 or 2911 or 2012 or 2912) or PLNT (2002 or 2902). **Assessment:** One 2 hour exam (40% of assessment), practical assignments (60%; including calculations, reports and reviews)

This unit has the same objectives as BIOL3006 Ecological Methods, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students in week 1 of semester 1. This unit of study may be taken as part of the BSc (Advanced) program.

**BIOL3007 Ecology**

**Credit points: 6**

Teacher/Coordinator: Prof Christopher Dickman (UEO), Dr Dieter Hochuli, Dr Clare McArthur, Dr Glenda Wardie **Session:** Semester 2 Classes: Two 1 hour lecture and one 3 hour laboratory per week. **Prerequisites:** 12 credit points of Intermediate Biology; or MARS2011 or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. **Prohibitions:** BIOL3907, BIOL3024, BIOL3924, BIOL3940, BIOL3940, BIOL3940, BIOL3940, BIOL3940, MARS3102 Assumed knowledge: Although not prerequisites, knowledge obtained from Ecological Methods (BIOL3006), and Marine Field Ecology (BIOL3008) and/or Terrestrial Field Ecology (BIOL3009), or the associated advanced units (BIOL3006, BIOL3908 and/or BIOL3909), is strongly recommended. **Assessment:** One 2hr exam (40% of assessment), two 1000 word essays (20%), one practical report (25%), and one summary (5%), and one presentation (10%).

This unit explores the dynamics of ecological systems, and considers the interactions between individual organisms and populations, organisms and the environment, and ecological processes. Lectures are grouped around four dominant themes: Interactions, Evolutionary Ecology, The Nature of Communities, and Conservation and Management. Emphasis is placed throughout on the importance of quantitative methods in ecology, including sound planning and experimental designs, and on the role of ecological science in the conservation, management, exploitation and control of populations. Relevant case studies and examples of ecological processes are drawn from marine, freshwater and terrestrial systems, with plants, animals, fungi and other life forms considered as required. Students will have some opportunity to undertake short term ecological projects, and to take part in discussions of important and emerging ideas in the ecological literature.

depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students in week 1 of semester 2. This unit of study may be taken as part of the BSc (Advanced) program.

Textbooks

BIO3008 Marine Field Ecology
Credit points: 6 Teacher/Coordinator: A/Prof Ross Coleman (UEO), Prof Tony Underwood, Dr Gee Chapman Session: S2 Intensive Classes: One 8 day field course. Prerequisites: 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006. Prohibitions: BIOL3908, BIOL3040, BIOL3940, BIOL3024, BIOL3924, MARS3102 Assumed knowledge: Ecological Methods (BIOL3006) or Ecological Methods (advanced) BIOL3906. Prior completion of one of these units is very strongly advised. Assessment: Discussion groups (10%), research project proposal (10%), biodiversity survey report (20%), data analysis and checking (10%), research project report (50%).

Note: Dates: 2 July 2007 - 9 July 2007

This field course provides a practical introduction to the experimental analysis of marine populations and assemblages. Students gain experience using a range of intertidal sampling techniques and develop a detailed understanding of the logical requirements necessary for manipulative ecological field experiments. No particular mathematical or statistical skills are required for this subject. Group experimental research projects in the field are the focus of the unit during the day, with lectures and discussion groups about the analysis of experimental data and current issues in experimental marine ecology occurring in the evening. Note: Successful completion of BIOL 3008/3908 and BIOL3007/3907 is a prerequisite for students wishing to proceed to Honours in Marine Ecology.

Textbooks

BIO3009 Terrestrial Field Ecology
Credit points: 6 Teacher/Coordinator: Dr Glenda Wardle (UEO), Prof Christopher Dickman, Dr Dieter Hochuli, Dr Clare McArthur Session: S2 Intensive Classes: One 6 day field trip held in the pre-semester break (Sunday, July 15 - Friday, July 20) and 4 practical classes during weeks 1-4 in semester 2. Prerequisites: 12 credit points of intermediate level Biology. Prohibitions: BIOL3909, BIOL3041, BIOL3941, BIOL3042, BIOL3924, BIOL3024, BIOL3924 Assumed knowledge: Ecological Methods (BIOL3006) or Ecological Methods (advanced) BIOL3906. Prior completion of one of these units is very strongly recommended. Assessment: Discussions and quiz (10%), research project proposal and brief presentation (10%), sampling project report (20%), specimen collection (10%), research project report (50%).

This field course provides practical experience in the experimental analysis of terrestrial populations and assemblages. Students learn a broad range of ecological sampling techniques and develop a detailed understanding of the logical requirements necessary for manipulative ecological field experiments. The field work incorporates survey techniques for plants, small mammals and invertebrates and thus provides a good background for ecological consulting work. Students attend a week-long field course and participate in a large-scale research project as well as conducting their own research project. Invited experts contribute to the lectures and discussions on issues relating to the ecology, conservation and management of Australia’s terrestrial flora and fauna.

BIO3008 Marine Field Ecology (Advanced)
Credit points: 6 Teacher/Coordinator: A/Prof Ross Coleman (UEO), Prof Tony Underwood, Dr Gee Chapman Session: S2 Intensive Classes: One 8 day field course, four 1 hour tutorials. Prerequisites: Distinction average in 12 credit points of Intermediate Biology. Prohibitions: BIOL3009, BIOL3041, BIOL3042, BIOL3924, BIOL3024, BIOL3924 Assumed knowledge: Ecological Methods (BIOL3006) or Ecological Methods (advanced) BIOL3906. Prior completion of one of these units is very strongly advised. Assessment: Discussion groups (10%), research project proposal (10%), biodiversity report (20%), data analysis and checking (10%), research project report (50%).

Note: Dates: 2 July 2007 - 9 July 2007

This unit has the same objectives as BIO3009 Terrestrial Field Ecology, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students at the beginning of the unit. This unit of study may be taken as part of the BSc (Advanced) program.

BIO3010 Tropical Wildlife Biology and Management
Credit points: 6 Session: S1 Intensive Classes: 5 day Field School, followed by 5 days of classes at Sydney University. Prerequisites: 12 credit points of intermediate level Biology. Prohibitions: BIOL3910 Assumed knowledge: None, although Vertebrates and their Origins would be useful. Assessment: One 2 hour exam, one major practical report (2000wd), one 15 min oral presentation, one 1 hour practical exam.

Note: Department permission required for enrolment.

Note: Dates: 11 February - 16 February 2007 Northern Territory followed by tutorials and practical classes at the University of Sydney 19 February - 23 February 2007.

Due to its isolation from the rest of the world and unique evolutionary history, the Australian terrestrial vertebrate fauna (amphibians, reptiles, birds and mammals) is highly unusual, and hence has a lot to offer in the study of evolutionary processes. The rarity of some species and Australia’s unusual climate and landforms present special challenges for the management of our native wildlife. This unit of study addresses the evolution, ecology and management of Australia’s terrestrial fauna. The subject comprises of a five day field course in the Northern Territory, near Darwin, where students will learn field-based techniques
in wildlife management, combined with lectures given by experts in the evolution, ecology and management of wildlife.

**Biol3910 Tropical Wildlife Biol & Management Adv**

**Credit points:** 6  
**Session:** S1  
**Intensive Classes:** 5 day Field School followed by 5 days of classes at Sydney University.  
**Prerequisites:** Distance average in 12 credit points of intermediate level Biology.  
**Prohibitions:** Biol3010  
**Assumed knowledge:** None, although Vertebrates and their Origins would be useful.  
**Assessment:** One 2 hour exam, one major practical report (2000w), one 15 min oral presentation, one 1 hour practical exam.  
**Note:** Department permission required for enrolment.  
**Dates:** 11 February - 16 February 2007 Northern Territory followed by tutorials and practicals at the University of Sydney  
**Teacher/Coordinator:** Dr P McGee  

This unit has the same objectives as Biol3010 Tropical Wildlife Biology and Management, and is suitable for students who wish to pursue certain aspects in greater depth. Entry is restricted, and selection is made from the applicants on the basis of their previous performance. Students taking this unit of study will participate in alternatives to some elements of the standard course and will be required to pursue the objectives by more independent means. Specific details of this unit of study and assessment will be announced in meetings with students at the beginning of the unit. This unit of study may be taken as part of the BSc(Advanced) program.

**Biol3011 Ecophysiology**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Seebacher  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.  
**Prerequisites:** 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006.  
**Prohibitions:** Biol3911  
**Assumed knowledge:** Biol (2002 or 2006 or 2012 or 2016 or 2902 or 2906 or 2912 or 2906 or 2902 or 2912 or 2916 or 2906 or 2916) or PLNT (2003 or 2903).  
**Assessment:** One 1.5 hour exam, field trip seminar, laboratory report.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

Ecophysiology is a conceptually based unit of study that covers physiological interactions between organisms and their environments. The importance of environmental parameters, such as temperature, water, salt and pH, for biological functions, are investigated. Physiological interactions among animals, plants and fungi are discussed. Examples will have an emphasis on vertebrates and marine organisms. As part of the practical component, students design their own research project to be conducted during the week-end long field trip, and during self-directed laboratory sessions.

**Biol3911 Ecophysiology (Advanced)**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Seebacher  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.  
**Prerequisites:** Distance average in 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006.  
**Prohibitions:** Biol3911  
**Assumed knowledge:** Biol (2002 or 2006 or 2012 or 2016 or 2902 or 2912 or 2906 or 2916) or PLNT (2003 or 2903).  
**Assessment:** One 1.5 hour exam, field trip seminar, independent project report.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

Ecophysiology (Advanced) shares the same lectures as Biol 3011 Ecophysiology, but it includes an independent project in place of the laboratory report (equivalent of 30% of Ecophysiology). The content and nature of the independent project vary and students are encouraged to design their own project.

**Biol3012 Animal Physiology**

**Credit points:** 6  
**Teacher/Coordinator:** Dr M Thomson  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures, one 4 hour laboratory per week.  
**Prerequisites:** 12 credit points of Intermediate Biology including Biol (2012 or 2002 or 2003 or 2016 or 2006 or 2902 or 2903 or 2912 or 2906) or PLNT (2003 or 2903).  
**Prohibitions:** Biol3912  
**Assessment:** One 1.5 hour exam, laboratory/library reports.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

In this unit of study students explores how animals physiology is influenced by environmental factors. There is a strong emphasis on how modern research is expanding the field of physiology throughout a diverse array of vertebrates and invertebrate. The unit is designed to complement Ecophysiology. Particular emphasis will be placed on nutrition, animal behaviour, energy metabolism, respiration, endocrinology and neurobiology.

**Biol3912 Animal Physiology (Advanced)**

**Credit points:** 6  
**Teacher/Coordinator:** Dr M Thomson  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.  
**Prerequisites:** Distance average in 12 credit points of Intermediate Biology including Biol (2012 or 2002 or 2003 or 2006 or 2012 or 2902 or 2903 or 2016 or 2906) or PLNT (2003 or 2903).  
**Prohibitions:** Biol3912  
**Assessment:** One 1.5 hour exam, laboratory reports, independent project report.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

Animal Physiology (Advanced) shares the same lectures as Animal Physiology, but it includes an independent project in place of one or more components of the laboratory classes to the equivalent of 30% of Animal Physiology. The content and nature of the independent project may vary from year to year.

**Biol3013 Marine Biology**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.  
**Prerequisites:** Distance average in 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006.  
**Prohibitions:** Biol3913  
**Assumed knowledge:** MARS2006  
**Assessment:** Practical reports, paper criticisms and other assignments.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

We will examine in detail processes which are important for the establishment and maintenance of marine communities. Lectures will expose students to the key ideas, researchers and methodologies within selected fields of marine biology. Laboratory sessions will complement the lectures by providing students with hands-on experience with the organisms and the processes that affect them. Students will develop critical analysis skills while examining the current literature.

**Biol3913 Marine Biology (Advanced)**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.  
**Prerequisites:** Distance average in 12 credit points of Intermediate Biology; or MARS2006 and 6 credit points of Intermediate Biology; or 12 credit points of Intermediate MARS units, including MARS2006.  
**Prohibitions:** Biol3913  
**Assumed knowledge:** MARS2006  
**Assessment:** Practical reports, paper criticisms and other assignments.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

Qualified students will participate in alternative components of the Biol3103 Marine Biology unit. The content and nature of these components may vary from year to year.

**Biol3017 Fungi in the Environment**

**Credit points:** 6  
**Teacher/Coordinator:** Dr P McGee  
**Session:** S1 Intensive  
**Classes:** 40 hours of practicals in a two week intensive program immediately prior to semester one (labs run from 12 February to 23 February 2007), plus additional sessions.  
**Prerequisites:** 12 credit points of Intermediate Biology; or 6 credit points of Intermediate Biology and 6 Intermediate credit points of either Microbiology or Geography, or their equivalent.  
**Prohibitions:** Biol3917  
**Assessment:** One 2 hour take home exam, laboratory and written assignments.  
**Note:** The completion of 6 credit points of MBGL units is highly recommended.

The unit emphasises use of research techniques in the laboratory to enable deeper understanding of issues in fungal ecology, environmental and rehabilitation biology, biological control and soil microbiology. Benefits provided by fungi in symbiotic interactions with plants, including mycorrhizal fungi and shoot-borne endophytes. Students will be encouraged to develop a deeper understanding of
and quantitative genetics can illuminate the mechanisms by which studies of sex ratios, sexual selection, kin selection, and game theory of traits can be tracked using the comparative method. We will consider how this can lead to speciation. Lectures will cover how the evolution of these skills we will search for population subdivision and discuss the nature of these components may vary from year to year. Some assessment will be in an alternative format.

BIOL3026 Developmental Genetics

Credit points: 6 Teacher/Coordinator: Dr Saleeba, Dr Raphael. Session: Semester 2 Classes: Two 1 hour lectures and up to 4 hours laboratory per week. Prerequisites: Distinction average in 12 credit points from MBLG (2001/2901/2071/2771/2871), MBLG (2002/2902/2072/2972) and Intermediate Biology units. For BMEdsc students: 36 credit points of Intermediate BMED units including BMED 2502/2802. Prohibitions: BIOL3918 Assessment: One 2 hour exam, assignments.

Qualified students will participate in alternative components of BIOL3026 Evolutionary Genetics and Animal Behaviour. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format.

BIOL3027 Bioinformatics and Genomics

Credit points: 6 Teacher/Coordinator: Dr Firth, Dr Jermin Session: Semester 1 Classes: Two 1 hour lectures and up to 4 hours laboratory per week. Prerequisites: 12 credit points from MBLG (2001/2901/2071/2771/2871), MBLG (2002/2902/2072/2972) and Intermediate Biology units. For BMEdsc students: 36 credit points of Intermediate BMED units including BMED 2502/2802. Prohibitions: BIOL3927 Assessment: One 2 hour exam, assignments.

Note: This unit of study is recommended for third year students enrolled in the BSc (Bioinformatics) degree.

A unit of study comprising lectures, practical assignments and tutorials on the application of bioinformatics to the storage, retrieval and analysis of biological information, principally in the form of nucleotide and amino acid sequences. Although the main emphasis is on sequence data, other forms of biological information are considered.

animals have evolved, and explain why they behave as they do. We will then consider if these themes have any relevance to human sociobiology. The unit also covers the role of genetics in conservation. There will be a field trip to collect organisms for population genetic analysis. There will be plenty of opportunity in the student seminars to examine the more controversial aspects of modern evolutionary thought.

BIOL3925 Evolutionary Gen. & Animal Behaviour Adv

Credit points: 6 Teacher/Coordinator: A/Prof Oldroyd, Dr Beekman. Session: Semester 2 Classes: Two 1 hour lectures and up to 4 hours of laboratory per week. Prerequisites: Distinction average in 12 credit points from MBLG (2001/2901/2771/2871/2071/2971), MBLG (2002/2902/2072/2972) and Intermediate Biology units. For BMEdsc students: 36 credit points of Intermediate BMED units including Distinction in BMED2502 or BMED2802. Prohibitions: BIOL3025, BIOL3928 Assessment: One 1.5 hour exam, assignments, seminar.

Qualified students will participate in alternative components of BIOL3025 Evolutionary Genetics and Animal Behaviour. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format.

BIOL3918 Applications of Recombinant DNA Adv

Assessment: One 2 hour exam, assignment, seminar

Qualified students will participate in alternative components of BIOL3018 Applications of Recombinant DNA Technology. The content and nature of these components may vary from year to year.

BIOL3926 Developmental Genetics (Advanced)

Assessment: One 2 hour exam, assignment, seminar

Qualified students will participate in alternative components of BIOL3026 Developmental Genetics. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format.

BIOL3025 Evolutionary Gen. & Animal Behaviour

Assessment: One 2 hour exam, assignments, seminar

The unit of study covers the main themes of modern evolutionary theory including population genetics. In the practicals, students use molecular methods to quantify genetic variation in natural populations. Using these skills we will search for population subdivision and discuss how this can lead to speciation. Lectures will cover how the evolution of traits can be tracked using the comparative method. We will consider how studies of sex ratios, sexual selection, kin selection, game theory and quantitative genetics can illuminate the mechanisms by which

BIOL3018 Applications of Recombinant DNA Tech

Assessment: One 2 hour exam, assignment, seminar

Qualified students will participate in alternative components of BIOL3018 Applications of Recombinant DNA Technology. The content and nature of these components may vary from year to year.

BIOL3026 Developmental Genetics

Assessment: One 2 hour exam, assignment, seminar

Qualified students will participate in alternative components of BIOL3026 Developmental Genetics. The content and nature of these components may vary from year to year. Some assessment will be in an alternative format.

BIOL3927 Bioinformatics and Genomics

Assessment: One 2 hour exam, assignment, seminar

Note: This unit of study is recommended for third year students enrolled in the BSc (Bioinformatics) degree.

A unit of study comprising lectures, practical assignments and tutorials on the application of bioinformatics to the storage, retrieval and analysis of biological information, principally in the form of nucleotide and amino acid sequences. Although the main emphasis is on sequence data, other forms of biological information are considered.
The unit begins with the assembly and management of nucleotide sequence data and an introduction to the databases that are normally used for the storage and retrieval of biological data, and continues with signal detection and analysis of deduced products, sequence alignment, and database search methods. Phylogenetic reconstruction is based on distance-based methods, parsimony methods and maximum-likelihood methods is described and students are introduced to the idea of tree-space, phylogenetic uncertainty, and taught to evaluate phylogenetic trees and identify factors that will confound phylogenetic inference. Finally, whole genome analysis and comparative genomics are considered. The unit gives students an appreciation of the significance of bioinformatics in contemporary biological science by equipping them with skills in the use of a core set of programs and databases for "in silico" biology, and an awareness of the breadth of bioinformatics resources and applications.

**BIOL3927**

Bioinformatics and Genomics (Advanced)

**Credit points:** 6

**Teacher/Coordinator:** Dr Firth, Dr Jermini

**Session:** Semester 1

**Classes:** Two 1 hour lectures and one 4 hour laboratory per week.

**Prerequisites:** Distinction average in 12 credit points from MBLG (2001/2901/2971/2971/2871), MBLG (2002/2902/2972/2972) and Intermediate Biology units. For BMedBioc students, 36 credit points of Intermediate BMED units including Distinction in BMED2502 or BMED2802.

**Prohibitions:** BIOL3027

**Assessment:** One 2 hour exam, assignments

Qualified students will participate in alternative components of BIOL3027 Bioinformatics and Genomics. The content and nature of these components may vary from year to year. Some assessment will be in alternative format.

**Biology Honours**

A single Honours program in Biology accommodates students who have completed 24 credit points of Senior Biology Life Sciences units and have a minimum WAM of 65. Information about qualifications for entry into Honours is available from the School Office (Science Road Cottage, A10), or on the School of Biological Sciences web-site. During the Honours year the principles established in the first three years of the undergraduate award course are further developed, and students are introduced to a wider field of biology and biological techniques. Students may elect to specialise in any of the aspects of biology that are studied in the School. Projects jointly supervised by staff in other Schools or Departments within the University may also be considered. Students who have signified their intention of entering Honours will be notified of acceptance after the publication of the second semester Senior examination results. Honours students start their academic year at the beginning of February or in July.

The Honours year comprises:

1. A project in which the student investigates a problem and presents oral and written accounts of his or her research.2. coursework units - BIOL4009 Communication Research in Biology, BIOL4010 Experiment Design & Analysis Biology,3. instruction in experimental design, and other technical instruction.([ii]) The degree will be awarded on the basis of:([a]) written assignments and essays from coursework units,(b) marks awarded for a thesis on the subject of the project.

**Graduate Diploma in Science (Biology)**

The Graduate Diploma program in Biology is available as a one year full-time or two year part-time course. Information about qualifications for entry into the Graduate Diploma is available from the School Office (Science Road Cottage, A10). The course is intended for students wishing to progress beyond a pass degree but not via the Honours degree, or who are ineligible for admission to Honours. Students enrolled in the one year course will follow the same program as Biology Honours students and be assessed using similar criteria. Students may therefore elect to specialise in any area within the research interests of the School. Projects jointly supervised by staff in other Schools or Departments within the University may also be considered. Students undertaking the two year course (part-time) will follow the same curriculum but will satisfactorily complete the instructed elements of the course before progressing to the project element at the end of the first year. Students who have signified their intention to enter the Graduate Diploma course will be notified of acceptance after the publication of the second semester Senior examination results. Graduate Diploma students are expected to start their academic year at the beginning of February or in July. The composition of the Graduate Diploma course is identical to that for Honours (see Biology Honours).

**Postgraduate study in Biology**

MSc and PhD degrees by research are available in the School. On completion of an Honours degree (at first or second class level), MSc Preliminary course or Graduate Diploma in Science, students may pursue a candidate for MSc degrees by research. The range of research fields offered and the fields of each member of academic staff are listed on the School's web site at www.bio.usyd.edu.au.

**Cell Pathology**

Cell Pathology is taught by the Department of Pathology. The Department of Pathology is located on Level 5 of the Blackburn Building (phone 9351 2414). The Department maintains a website to assist students access information and resources: http://www.pathology.usyd.edu.au/

**CPAT3201**

Pathogenesis of Human Disease 1

**Credit points:** 6

**Teacher/Coordinator:** Dr Bob Bao

**Session:** Semester 2

**Classes:** Three 1 hour lectures and one 1 hour tutorial per week.

**Prerequisites:** At least 5cp intermediate of one of the following: ANAT or BCHM or MBLG or BIOL or HPS or HSCI or MICR or PCDL or PHSI, or as head of department determines.

**Assessment:** One 2 hour exam (60%), one major research essay (1500w) generation of detractors for MCQ stems with referenced support blurs for these (40%).

The Pathological Basis of Human Disease 1 unit of study modules will provide a theoretical background to the scientific basis of the pathogenesis of disease. Areas covered in theoretical modules include: tissue responses to exogenous factors, adaptive responses to foreign agents, cardiovascular/pulmonary/gut responses to disease, forensic science, neuropathology and cancer. The aim of the course is - To give students an overall understanding of the fundamental biological mechanisms governing disease pathogenesis in human beings. - To introduce to students basic concepts of the pathogenesis, natural history and complications of common human diseases. - To demonstrate and exemplify differences between normality and disease. - To explain cellular aspects of certain pathological processes. Together with CPAT3202, the unit of study would be appropriate for those who intend to proceed to Honours research, to professional degrees or to careers in biomedical areas such as hospital science. Together with CPAT3202, it fulfills the Pathology requirements for the Centre for Chiropractic at Macquarie University.

**Textbooks**

**CPAT3202**

Pathogenesis of Human Disease 2

**Credit points:** 6

**Teacher/Coordinator:** Dr Bob Bao

**Session:** Semester 2

**Classes:** One 2 hour practical per week, one 1 hour museum practical and one 1 hour tutorial per week.

**Prerequisites:** At least 5cp intermediate of one of the following: ANAT or BCHM or MBLG or BIOL or HPS or MICR or PCDL or PHSI, or as the head of department determines.

**Corequisites:** CPAT3201 Assessment: One 2 hour exam (70%), Museum Practical Reports (30%).

**Note:** Department permission required for enrolment.

The Pathological Basis of Human Disease 2 unit of study modules will provide a practical background to the scientific basis of the pathogenesis of disease. Areas covered in practical modules include disease specimen evaluation on a macroscopic and microscopic basis. The aim of the course is - To enable students to gain an understanding of how different organ systems react to injury and to apply basic concepts of disease processes. - To equip students with skills appropriate for careers in the biomedical sciences and for further training in research or professional degrees. At the end of the course students will:

- Have acquired practical skills in the use of a light microscope.
- Have an understanding of basic investigative techniques.
Chemical Engineering

The School of Chemical and Biomolecular Engineering is part of the Faculty of Engineering. In addition to providing professional training in this branch of engineering it offers CHNG1103 Introduction to Material and Energy Transformations to students enrolled in the Faculty of Science. Details regarding this unit of study can be obtained from the Faculty of Engineering Handbook. This unit of study is intended to give a science student some insight into the principles which control the design and performance of large scale industrial processing plants. Faculty of Science students are invited to enrol in any other chemical engineering unit of study provided they have the appropriate prerequisites and have consulted with the Head of School.

Advanced standing for Science students transferring to BEng(Chemical Engineering)

Science graduates may obtain up to two years advanced standing towards a Bachelor of Engineering degree in Chemical Engineering. Students wishing to undertake this option must seek academic advice from the School of Chemical and Bio-molecular Engineering. Further details regarding admission to the BE in Chemical Engineering may be obtained from the Engineering Faculty Office.

Chemistry

Junior units of study

The School of Chemistry offers a number of 6 credit point units of study to cater for the differing needs of students. These units of study are: CHEM1001 Fundamentals of Chemistry 1A, CHEM1002 Fundamentals of Chemistry 1B, CHEM1101 Chemistry 1A, CHEM1102 Chemistry 1B, CHEM1108 Chemistry 1 Life Sciences A, CHEM1109 Chemistry 1 Life Sciences B, CHEM1901 Chemistry 1A (Advanced), CHEM1902 Chemistry 1B (Advanced), CHEM1903 Chemistry 1A (Special Studies Program), CHEM1904 Chemistry 1B (Special Studies Program)

Obtaining detailed information about units

Detailed information about all units of study is contained in a booklet, Information for Students, distributed at the time of enrolment, and also available from the First Year Office. Exercises are issued and tutorials are held at regular intervals for all units of study. The School maintains a website to assist current and prospective students: http://www.chem.usyd.edu.au

CHEM1001

Fundamentals of Chemistry 1A

Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. Prohibitions: CHEM1101, CHEM1901, CHEM1109, CHEM1903, CHEM1909 Assumed knowledge: There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.

The aim of the unit of study is to provide those students whose chemical background is weak (or non-existent) with a good grounding in fundamental chemical principles together with an overview of the relevance of chemistry. There is no prerequisite or assumed knowledge for entry to this unit of study. Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklet is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1002

Fundamentals of Chemistry 1B

Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. Prohibitions: CHEM1101, CHEM1109, CHEM1902, CHEM1904, CHEM1908 Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.

CHEM1002 builds on CHEM1001 to provide a sound coverage of inorganic and organic chemistry. Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklet is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1101

Chemistry 1A

Credit points: 6 Session: Semester 1, Semester 2, Summer Main Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. Prohibitions: CHEM (1101 or 1101) or a Distinction in CHEM1001 or equivalent Corequisites: Recommended concurrent units of study: 6 credit points of Junior Mathematics Prohibitions: CHEM1101, CHEM1109, CHEM1901, CHEM1903, CHEM1909 Assumed knowledge: HSC Chemistry and Mathematics Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.

Chemistry 1A is built on a satisfactory prior knowledge of the HSC Chemistry course. A brief revision of basic concepts of the high school course is given. Chemistry 1A covers chemical theory and physical chemistry. Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklet is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1102

Chemistry 1B

Credit points: 6 Session: Semester 1, Semester 2, Summer Main Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. Prohibitions: CHEM (1101 or 1101) or a Distinction in CHEM1001 or equivalent Corequisites: Recommended concurrent units of study: 6 credit points of Junior Mathematics Prohibitions: CHEM1102, CHEM1108, CHEM1902, CHEM1904, CHEM1908 Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.

Chemistry 1B is built on a satisfactory prior knowledge of Chemistry 1A and covers inorganic and organic chemistry. Chemistry 1B is an acceptable prerequisite for entry into Intermediate Chemistry units of study. Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklet is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1108

Chemistry 1A Life Sciences

Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks. Prohibitions: UAI of at least 93 and HSC Chemistry result in band 5 or 6, or Distinction or better in a University level Chemistry unit, or by invitation. Corequisites: Recommended concurrent units of study: 8 credit points of Junior Mathematics Prohibitions: CHEM (1002 or 1102 or 1902 or 1904) Assumed knowledge: HSC Chemistry and Mathematics Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: Practicals (30hr) These will be designed to develop practical skills based on the theory presented in the lectures

Note: This unit of study is available to students enrolled in the Bachelor of Medical Science, the Bachelor of Science (Molecular Biology and Genetics),
the Bachelor of Science (Nutrition) and the Bachelor of Science (Molecular Biotechnology) only.

Lectures (39 hrs): A strong background in junior chemistry is essential for understanding molecular structures and processes. This unit of study provides the basis for understanding fundamental chemical processes and structures at an advanced level, with particular emphasis on how these apply to the life sciences. Topics to be covered include: atomic structure, chemical bonding and organic chemistry of functional groups with applications in life sciences. Tutorials (12 hrs): These will provide aspects of problem solving relevant to the theory.

Textbooks
A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1109
Chemistry 1B Life Sciences
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks.
Prerequisites: CHEM1108 Corequisites: Recommended concurrent units of study: 6 credit points of Junior Mathematics
Prohibitions: CHEM (1001 or 1101 or 1901 or 1903) Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: Practicals (30hrs) These will be designed to develop practical skills based on the theory presented in the lectures.
Note: This unit of study is available to students enrolled in the Bachelor of Medical Science, the Bachelor of Science (Molecular Biology and Genetics), the Bachelor of Science (Nutrition) and the Bachelor of Science (Molecular Biotechnology) only.

Lectures (39 hrs): A strong background in junior chemistry is essential for understanding molecular structures and processes. This unit of study provides the basis for understanding fundamental chemical processes and structures at an advanced level, with particular emphasis on how these apply to the life sciences. Topics to be covered include: chemical equilibria, solutions, acids and bases, ions in solution, redox reactions, colloids and surface chemistry, the biological periodic table, chemical kinetics and radiochemistry with applications to life sciences. Tutorials (12 hrs): These will provide aspects of problem solving relevant to the unit of study.

Textbooks
A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1901
Chemistry 1A (Advanced)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lecture and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks.
Prerequisites: UAI of at least 96.4 and HSC Chemistry result in band 5 or 6, or Distinction or better in a University level Chemistry unit, or by invitation.
Corequisites: Recommended concurrent unit of study: 6 credit points of Junior Mathematics
Prohibitions: CHEM1001, CHEM1101, CHEM1109, CHEM1903, CHEM1909 Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.
Note: Department permission required for enrolment.

Chemistry 1A (Advanced) is available to students with a very good HSC performance as well as a very good school record in chemistry or science. Students in this category are expected to do Chemistry 1A (Advanced) rather than Chemistry 1A. The theory and practical work syllabuses for Chemistry 1A and Chemistry 1A (Advanced) are similar, though the level of treatment in the latter unit of study is more advanced, presupposing a very good grounding in the subject at secondary level. Chemistry 1A (Advanced) covers chemical theory and physical chemistry. Lectures: A series of about 39 lectures, three per week throughout the semester.

Textbooks
A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1902
Chemistry 1B (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week; one 3 hour practical per week for 10 weeks.
Prerequisites: CHEM (1901 or 1903) or Distinction in CHEM1101 or equivalent
Corequisites: Recommended concurrent unit of study: 6 credit points of Junior Mathematics
Prohibitions: CHEM1102, CHEM1102, CHEM1108, CHEM1904, CHEM1908 Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%). Practical field work: A series of 10 three-hour laboratory sessions, one per week for 10 weeks of the semester.
Note: Department permission required for enrolment.

Chemistry 1B (Advanced) is built on a satisfactory prior knowledge of Chemistry 1A (Advanced) and covers inorganic and organic chemistry. Chemistry 1B (Advanced) is an acceptable prerequisite for entry into Intermediate Chemistry units of study. Lectures: A series of about 39 lectures, three per week throughout the semester.

Textbooks
A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM1903
Chemistry 1A (Special Studies Program)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lecture, one 1 hour tutorial per week and one 3 hour practical per week. Prerequisites: UAI of at least 98.7 and HSC Chemistry result in Band 6
Corequisites: Recommended concurrent unit of study: 6 credit points of Junior Mathematics.
Prohibitions: CHEM (1001 or 1101 or 1109 or 1901 or 1909) Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).
Note: Department permission required for enrolment.

Entry to Chemistry 1A (Special Studies Program) is restricted to students with an excellent school record in Chemistry. The practical work syllabus for Chemistry 1A (Special Studies Program) is very different from that for Chemistry 1A and Chemistry 1A (Advanced) and consists of special project-based laboratory exercises. All other unit of study details are the same as those for Chemistry 1A (Advanced). A Distinction in Chemistry 1A (Special Studies Program) is an acceptable prerequisite for entry into Chemistry 1B (Special Studies Program).

CHEM1904
Chemistry 1B (Special Studies Program)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lecture, one 1 hour tutorial per week and one 3 hour practical per week. Prerequisites: Distinction in CHEM1903
Corequisites: Recommended concurrent units of study: 6 credit points of Junior Mathematics.
Prohibitions: CHEM1002, CHEM1102, CHEM1108, CHEM1902, CHEM1908 Assessment: Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).
Note: Department permission required for enrolment.

Entry to Chemistry 1B (Special Studies Program) is restricted to students who have gained a Distinction in Chemistry 1A (Special Studies Program). The practical work syllabus for Chemistry 1B (Special Studies Program) is very different from that for Chemistry 1B and Chemistry 1B (Advanced) and consists of special project-based laboratory exercises. All other unit of study details are the same as those for Chemistry 1B (Advanced). Chemistry 1B (Special Studies Program) is an acceptable prerequisite for entry into Intermediate Chemistry units of study.

Intermediate units of study
The School of Chemistry offers a number of units of study to cater for the differing needs of students. The following 6 credit point units of study are offered: CHEM 2401 Molecular Reactivity and Spectroscopy, CHEM 2402 Chemical Structure and Stability, CHEM 2403 Chemistry of Biological Molecules, CHEM 2404 Forensic and Environmental Chemistry, CHEM 2911 Molecular Reactivity and Spectroscopy (Adv), CHEM 2912 Chemical Structure and Stability (Adv), CHEM 2913 Chemistry of Biological Molecules (Adv), CHEM 2915 Molecular Reactivity and Spectroscopy SSP, CHEM 2916 Chemical Structure and Stability SSP.
180

CHEM2401
Molecular Reactivity and Spectroscopy
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 1 Classes: Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 hour practicals per semester. Prerequisites: CHEM (1102 or 1902 or 1904 or 1909 or 1612); 6 credit points of Junior Mathematics Prohibitions: CHEM2201, CHEM2202, CHEM2301, CHEM2311, CHEM2312, CHEM2320, CHEM2903, CHEM2903, CHEM2915 Assessment: One 3 hour examination, quizzes, lab reports

This is one of two core units of study for students interested in majoring in chemistry. The unit covers fundamental consideration of molecular electronic structure and its role in molecular reactivity and spectroscopy and includes applications of spectroscopy in environmental studies. It also covers the organic chemistry of aromatic systems, aldehydes and ketones, organometallic reagents, carbohydrates and DNA.

CHEM2402
Chemical Structure and Stability
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 2 Classes: Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 practicals per week. Prerequisites: CHEM (1102 or 1902 or 1904 or 1909 or 1612); 6 credit points of Junior Mathematics Prohibitions: CHEM2202, CHEM2302, CHEM2902, CHEM2912, CHEM2916 Assessment: One 3 hour examination, quizzes, lab reports
Note: This is the main chemistry unit of study for students expecting to major in chemistry

The structure, bonding and properties of inorganic compounds and complexes; statistical thermodynamics and thermodynamics; amine chemistry, electrophilic substitution and the chemistry of aromatics, the chemistry of carbonyls, nucleophilic organometallic reagents and organic synthesis and synthetic methods.

CHEM2403
Chemistry of Biological Molecules
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 2 Classes: Three 1 hour lectures per week, six 1 hour tutorials per semester, five 4 hour practical sessions per semester. Prerequisites: 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics Prohibitions: CHEM2001, CHEM2901, CHEM2311, CHEM2903, CHEM2913 Assessment: One 3 hour examination, quizzes, lab reports
Note: To enrol in Senior Chemistry in 2008 it will be a requirement that students complete CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.

This unit of study aims to give students an understanding of the chemistry underlying biological systems. Lectures will cover the mechanisms of organic chemical reactions and their applications to biological systems, the molecular basis of spectroscopic techniques used in biological chemistry, analytical chemistry of biological systems, biopolymers and biocatalysts and topics from inorganic chemistry of relevance to biological systems (metalproteins, biomimatisation, etc.). The practical work will cover experimental investigations of chemical kinetics, organic and inorganic chemical analysis, biopolymer characterisation, and preparation and characterisation of a metal-based anti-inflammatory drug.

CHEM2404
Forensic and Environmental Chemistry
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 1 Classes: Three 1 hour lectures per week, six 1 hour tutorials and five 4 hour practical sessions per semester. Prerequisites: 12 credit points of Junior Chemistry; 6 credit points of Junior Mathematics Prohibitions: CHEM3107, CHEM3197 Assessment: One 3 hour exam plus quizzes, lab reports
Note: To enrol in Senior Chemistry in 2008 it will be a requirement that students complete CHEM (2401 or 2911 or 2915) and CHEM (2402 or 2912 or 2916). Students are advised that combinations of CHEM2 units that do not meet this requirement will generally not allow progression to Senior Chemistry.

Chemical analysis is a fundamental task of a professional chemist. The identification of chemical species and the quantitative determination of how much of each species is present are the essential first steps in solving all chemical puzzles. In this course students learn analytical techniques and chemical problem solving in the context of forensic and environmental chemistry. The lectures on Environmental Chemistry will cover two main topics: (i) atmospheric chemistry, covering topics such as air pollution, global warming and ozone depletion, and (ii) water and soil chemistry, including topics such as bio-geochemical cycling, chemical speciation, pH-pE diagrams, catalysis and Green Chemistry. The Forensic component of the course examines the gathering and analysis of evidence, using a wide variety of chemical techniques, as well as the development of specialized forensic techniques in the analysis of trace evidence. Students will also study forensic analyses of inorganic, organic and biological materials, dust, soil, inks, paints, documents, etc. in police, customs and insurance investigations and learn how techniques such as IR, UV, MS, GC, GC-MS, XRD, XRF, SEM, EDAX ICP, HPLC, trace metals analysis, separation science, DNA analysis, etc., singly and in combination are used to examine forensic evidence.

CHEM2911
Molecular Reactivity & Spectroscopy Adv
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 1 Classes: Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 practicals per semester. Prerequisites: Credit average or better in CHEM (1101 or 1901 or 1903 or 1907 or 1908) and CHEM (1102 or 1902 or 1904 or 1909); 6 credit points of Junior Mathematics Prohibitions: CHEM2201, CHEM2301, CHEM2311, CHEM2901, CHEM2902, CHEM2903, CHEM2915 Assessment: One 3 hour exam plus quizzes, lab reports

The syllabus for this unit is that of CHEM2401 together with special Advanced material presented in the theory and/or practical programs. The lectures cover fundamental consideration of molecular electronic structure and its role in molecular reactivity and spectroscopy and includes applications of spectroscopy in environmental studies. It also covers the organic chemistry of aromatic systems, aldehydes and ketones, organometallic reagents, carbohydrates and DNA.

CHEM2912
Chemical Structure and Stability (Adv)
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 2 Classes: Three 1 hour lectures per week, seven 1 hour tutorials per semester, eight 4 practicals per semester. Prerequisites: Credit average or better in CHEM (1101 or 1901 or 1903 or 1907 or 1908) and CHEM (1102 or 1902 or 1904 or 1909); 6 credit points of Junior Mathematics Prohibitions: CHEM2202, CHEM2302, CHEM2402, CHEM2902, CHEM2916 Assessment: One 3 hour exam plus quizzes, lab reports

The syllabus for this unit is that of CHEM2402 together with special Advanced material presented in the theory and/or practical programs. The lectures include the structure, bonding and properties of inorganic compounds and complexes; statistical thermodynamics and thermodynamics; amine chemistry, electrophilic substitution and the chemistry of aromatics, the chemistry of carbonyls, nucleophilic organometallic reagents and organic synthesis and synthetic methods.

CHEM2913
Chemistry of Biological Molecules (Adv)
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 2 Classes: Three 1 hour lectures per week, one 1 hour tutorial per semester and eight 4 practical sessions per semester. Prerequisites: Credit average or better in CHEM (1100 or 1900 or 1904 or 1907 or 1908) and CHEM (1102 or 1902 or 1904 or 1909); 6 credit points of Junior Mathematics Prohibitions: CHEM2202, CHEM2302, CHEM2402, CHEM2902, CHEM2916 Assessment: One 3 hour exam plus quizzes, lab reports

The syllabus for this unit is that of CHEM2402 together with special Advanced material presented in the theory and/or practical programs. The lectures include the structure, bonding and properties of inorganic compounds and complexes; statistical thermodynamics and thermodynamics; amine chemistry, electrophilic substitution and the chemistry of aromatics, the chemistry of carbonyls, nucleophilic organometallic reagents and organic synthesis and synthetic methods.

CHEM2914
Chemistry of Biological Molecules (Adv)
Credit points: 6 Teacher/Coordinator: Dr R J Clarke Session: Semester 2 Classes: Three 1 hour lectures per week, one 1 hour tutorial per semester and four 4 practical sessions per semester. Prerequisites: CHEM (1902 or 1904 or 1909); 12 credit points of Junior Mathematics. Candidates for the BSc (Molecular Biology & Genetics) must achieve a Credit average in Junior units of study. Candidates for the BSc (Molecular Biotechnology) must achieve a Credit average in Junior units of study. Prohibitions: CHEM2001, CHEM2010, CHEM2301, CHEM2311, CHEM2302, CHEM2901, CHEM2902, CHEM2915 Assessment: One 3 hour exam plus quizzes, lab reports

This unit of study aims to give students an understanding of the chemistry underlying biological systems. Lectures will cover the mechanisms of organic chemical reactions and their application to biological systems, the molecular basis of spectroscopic techniques used in biological chemistry, analytical chemistry of biological systems, biopolymers and biocatalysts and topics from inorganic chemistry of relevance to biological systems (metalproteins, biomimatisation, etc.). The practical work will cover experimental investigations of chemical kinetics, organic and inorganic chemical analysis, biopolymer characterisation, and preparation and characterisation of a metal-based anti-inflammatory drug.
The structure and shape of organic molecules determines their physical properties, their reaction chemistry as well as their biological/medicinal activity. The determination of this structure and understanding its chemical consequences is of fundamental importance in chemistry, biochemistry, medicinal and materials chemistry. This course examines the methods and techniques used to establish the structure of organic molecules as well as the chemistry which dictates the shapes that they adopt. The first part of the course examines the use of modern spectroscopic methods (nuclear magnetic resonance spectroscopy, infrared spectroscopy and mass spectroscopy) which are used routinely to identify organic compounds. The second part of the course examines the chemical consequences of molecular shapes in more depth and looks at how different molecular shapes arise as a consequence of the mechanism of chemical reactions used to synthesize them.

CHEM3112 Materials Chemistry
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 4 hour practical per week. Prerequisites: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3912 Assumed knowledge: CHEM2401 and CHEM2402 Assessment: One 2 hour exam, prac reports

This course concerns the inorganic chemistry of solid-state materials: compounds that possess 'infinite' bonding networks. The extended structures of solid materials rise to a wide range of important chemical, mechanical, electrical, magnetic and optical properties. Consequently, such materials are of enormous technological significance as well as fundamental curiosity. In this course you will learn how chemistry can be used to design and synthesize novel materials with desirable properties. The course will start with familiar molecules such as C60 and examine their solid states to understand how the nature of chemical bonding changes in the solid state, leading to new properties such as electronic character. This will be the basis for a broader examination of how chemistry is related to structure, and how structure is related to properties such as catalytic activity, mechanical strength, magnetism, and superconductivity. The symmetry of solids will be used explain how their structures are classified; how they can transform between related structures when external conditions such as temperature, pressure and electric field are changed; and how this can be exploited in technological applications such as sensors and switches. Key techniques used to characterise solid-state materials will be covered, particularly X-ray diffraction, microscopy, and physical property measurements.
changes are discussed and related to similar phenomena in enzymatic catalysis. In both applications students will also examine the overall process and look at the reasons behind choice of product, catalyst and reaction design with a specific focus on economy and environmental sustainability.

CHEM3114
Metal Complexes: Medicine and Materials
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3914 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports

Coordination compounds, with bonds between a central metal atom and surrounding ligands, play critical roles in biology, biochemistry and medicine, controlling the structure and function of many enzymes and their metabolism. They play similarly vital roles in many industrial processes and in the development of new materials with specifically designed properties. Building on the foundation of crystal field theory, this course offers a comprehensive treatment of the structures and properties of coordination compounds, with a qualitative molecular orbital description of metal-ligand bonds, and their spectroscopic, magnetic and dynamic effects. The exploitation of these properties in medicine and materials will be emphasized.

CHEM3115
Synthetic Medicinal Chemistry
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3915 Assessment: One 2 hour exam, prac reports

The development of new pharmaceuticals fundamentally relies on the ability to design and synthesize new compounds. Synthesis is an enabling discipline for medicinal chemistry - without it, the development of new drugs cannot progress from design to implementation, and ultimately to a cure. This unit will tackle important factors in drug design, and will highlight the current arsenal of methods used in the discovery of new drugs, including rational drug design, high throughput screening and combinatorial chemistry. We will develop a logical approach to planning a synthesis of a particular target structure. The synthesis and chemistry of heterocycles, which comprise some 40% of all known organic compounds and are particularly common in pharmaceuticals, will be outlined. Examples will include important ring systems present in biological systems, such as pyrimidines and purines (DNA and RNA), imidazole and thiazole (amino acids and vitamins) and porphyrins (natural colouring substances and oxygen carrying component of blood). Throughout the course, the utility of synthesis in medicinal chemistry will be illustrated with cases studies such as anti-influenza (Relenza), anaesthetic (benzocaine), anti-inflammatory (Vioxx), antihypertensive (pinacidil) and cholesterol-lowering (Lovastatin) drugs.

CHEM3116
Membranes, Self Assembly and Surfaces
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lecture and one 4 practical per week. Prerequisites: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3916 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports

Away from the covalent and ionic interactions that hold molecules and solids together, is the world of fragile objects - folded polymers, membranes, surface adsorption and stable molecular aggregates - held together by weak forces such as van der Waals and the hydrophobic effect. The use of molecules rather than atoms as the building blocks means that there are an enormous number of possibilities for stable aggregates with interesting chemical, physical and biological properties, many which still wait to be explored. In this course we examine the molecular interactions that drive self assembly and the consequences of these interactions in supramolecular assembly, lipid membrane formations and properties, microemulsions, polymer conformation and dynamics and range of fundamental surface properties including adhesion, wetting and colloidal stability.

CHEM3117
Molecular Spectroscopy & Quantum Theory
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 practical per week. Prerequisites: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3917 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports

This course will cover the fundamentals of molecular spectroscopy as a modern research tool and as a theoretical basis with which to understand everyday phenomena. This course is aimed at the student wishing a rigorous understanding of the interaction between light and matter. This course teaches the quantum theory needed to understand spectroscopic phenomena (such as the absorption of light) without the need for difficult mathematics. This low level theory is used as a tool with which to understand models of everyday phenomena. The course teaches application and theory, with descriptions of applied spectroscopic techniques. Alongside the coverage of modern spectroscopy, the course provides an accessible treatment of the science behind vision, flames, solar cells and photochemical smog.

CHEM3910
Biomolecules: Properties & Reactions Adv
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 4 practical per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3110 Assessment: One 2 hour exam, prac reports

DNA, proteins and carbohydrates represent three classes of essential biomolecules present in all biological systems. This unit will cover the structure, reactivity and properties of biomolecules and the building blocks from which these molecules are assembled, their interactions with metal ions and small molecules, and highlight the chemical tools for studying the behaviour of biomolecules. The final section of the unit illustrates how chemists apply the same principles used by Nature in these systems to produce molecular sensors and switches for applications in medicine and industry. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.

CHEM3911
Organic Structure and Reactivity (Adv)
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 4 practicals per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or ((2403 or 2913) and MOBT2102)). Prohibitions: CHEM3111 Assessment: One 2 hour exam, prac reports

The structure and shape of organic molecules determines their physical properties, their reaction chemistry as well as their biological/medicinal activity. The determination of this structure and understanding its chemical consequences is of fundamental importance in chemistry, biochemistry, medicinal and materials chemistry. This course examines the methods and techniques used to establish the structure of organic molecules as well as the chemistry which dictates the shapes that they adopt. The first part of the course examines the use of modern spectroscopic methods (nuclear magnetic resonance spectroscopy, infrared spectroscopy and mass spectroscopy) which are used routinely to identify organic compounds. The second part of the course examines the chemical consequences of molecular shapes in more depth and looks at how different molecular shapes arise as a consequence of the mechanism of chemical reactions used to synthesize them. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.
CHEM3912
Materials Chemistry (Adv)
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or (2403 or 2913) and MOBT2102)). Prohibitions: CHEM3114 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports
Coordination compounds, with bonds between a central metal atom and surrounding ligands, play critical roles in biology, biochemistry and medicine, controlling the structure and function of many enzymes and their metabolism. If you play similarly vital roles in many industrial processes and in the development of new materials with specifically designed properties. Building on the foundational knowledge of crystal field theory, this course offers a comprehensive treatment of the structures and properties of coordination compounds, with a qualitative molecular orbital description of metal-ligand bonds, and their spectroscopic, magnetic and dynamic effects. The exploitation of these properties in medicine and materials will be emphasized. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.

CHEM3915
Synthetic Medicinal Chemistry (Adv)
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or (2403 or 2913) and MOBT2102)). Prohibitions: CHEM3115 Assessment: One 2 hour exam, prac reports
The development of new pharmaceuticals fundamentally relies on the ability to design and synthesize new compounds. Synthesis is an enabling discipline for medicinal chemistry - without it, the development of new drugs cannot progress from design to prototype and ultimately to a cure. This unit will tackle important tactics in drug design, and will highlight the current arsenal of methods used in the discovery of new drugs, including rational drug design, high throughput screening and combinatorial chemistry. We will develop a logical approach to planning a synthesis of a particular target structure. The synthesis and chemistry of heterocycles, which comprise some 40% of all known organic compounds and are particularly common in pharmaceuticals, will be outlined. Examples will include important ring systems present in biological systems, such as pyrimidines and purines (DNA and RNA), imidazole and thiazole (amino acids and vitamins) and porphyrins (natural colouring substances and oxygen carrying component of blood). Throughout the course, the utility of synthesis in medicinal chemistry will be illustrated with cases studies such as anti-influenza (Relenza), anaesthetic (benzocaine), anti-inflammatory (Vioxx), antihypertensive (pinacidil) and cholesterol-lowering (Lovastatin) drugs. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.

CHEM3916
Membranes, Self Assembly & Surfaces (Adv)
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or (2403 or 2913) and MOBT2102)). Prohibitions: CHEM3116 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports
Away from the covalent and ionic interactions that hold molecules and solids together, is the world of fragile objects - folded polymers, membranes, surface adsorption and stable molecular aggregates - held together by weak forces such as van der Waals and the hydrophobic effect. The use of molecules rather than atoms as the building blocks means that there are an enormous number of possibilities for stable aggregates with interesting chemical, physical and biological properties, many which still wait to be explored. In this course we examine the molecular interactions that drive self assembly and the consequences of these interactions in supramolecular assembly, lipid membrane formations and properties, microemulsions, polymer conformation and dynamics and range of fundamental surface
properties including adhesion, wetting and colloidal stability. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.

CHEM3917
Mol. Spectroscopy & Quantum Theory (Adv)
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 4 hour practical per week. Prerequisites: WAM of 65 or greater and a Credit or better in: CHEM (2001 or 2101 or 2301 or (2311 and 2312) or 2401 or 2901 or 2903 or 2911 or 2915) and CHEM (2302 or 2402 or 2902 or 2912 or 2916 or (2403 or 2913) and MOBT2102). Prohibitions: CHEM3117 Assumed knowledge: CHEM2401 and CHEM2402. Assessment: One 2 hour exam, prac reports

This course will cover the fundamentals of molecular spectroscopy as a modern research tool and as a theoretical basis with which to understand everyday phenomena. This course is aimed at the student wishing a rigorous understanding of the interaction between light and matter. The course teaches the quantum theory needed to understand spectroscopic phenomena (such as the absorption of light) without the need for difficult mathematics. This low level theory is used as a tool with which to understand models of everyday phenomena. The course teaches application and theory, with descriptions of applied spectroscopic techniques. Alongside the coverage of modern spectroscopy, the course provides an accessible treatment of the science behind vision, flames, solar cells and photochemical smog. Advanced students attend the same lectures as the normal-level students but with the addition of a special seminar series comprising one lecture a week for 12 weeks.

Chemistry Honours
The Honours program in the School of Chemistry gives students the opportunity to get involved in a research program in an area that is of interest to them. It provides training in research techniques and experience using modern research instrumentation. The Honours program adds a new dimension to the skills that the students have acquired during their undergraduate years and enhances their immediate employment prospects and, more significantly, their future career potential. All students with a sound record in Chemistry are encouraged to apply for entry to the Honours program. The School of Chemistry offers a wide range of possible projects in all areas of contemporary chemistry including Biological and Medicinal Chemistry, Synthesis and Catalysis, Physical and Theoretical Chemistry, Supramolecular Chemistry, Polymers and Colloids and Chemical Spectroscopy. Details of available projects are contained in the School’s Honours Booklet that is available from the School’s Information Desk. In the Honours year, each student undertakes a research project under the supervision of a member of staff; writes a thesis which explains the problem; outlines the research undertaken and the results obtained; attends advanced lecture courses, normally given by leaders in their field from overseas or Australia; attends research seminars and undertakes additional written assessment. Further information is available from the Honours Coordinator, or at http://www.chem.usyd.edu.au/future/honours.html

Civil Engineering
The School of Civil Engineering is part of the Faculty of Engineering. In addition to providing professional training in this branch of engineering it offers units of study to students enrolled in the Faculty of Science majoring in Mathematics, Physics, Chemistry, Geology, Computer Science or Soil Science. The most relevant units of study are CIVL2201 - Structural Mechanics, CIVL2230 - Introduction to Structural Concepts and Design, CIVL2410 Soil Mechanics, and CIVL2611 Fluid Mechanics. Details regarding these units of study can be obtained from the Faculty of Engineering Handbook. These units of study are intended first to demonstrate the application of scientific principles in an engineering context. The second intention is to introduce the application of this understanding to analysis and design in civil engineering. As well as the above units of study, Faculty of Science students are invited to enrol in other civil engineering units of study, provided they have the appropriate pre-requisites and assumed knowledge.

Double Degree
BSc graduates, who have passed all four of the above four units of study within the School of Civil Engineering, may obtain a Bachelor of Engineering degree in Civil Engineering after an additional two years’ study, following the award of the BSc. Students wishing to undertake this option must apply through UAC and compete on the basis of academic merit. Prospective students are advised to discuss their plans with the School of Civil Engineering before enrolment. Further details regarding admission to the BE in Civil Engineering may be obtained from the Engineering Faculty Office in the Engineering Faculty Building.

Computational Science
Computational Science is an interdisciplinary major offered within the BSc. It focuses on scientific problem solving using computers. It covers the formulation and analysis of problems, the use of software packages and programs to solve these problems computationally, simulations and modelling, mathematical and numerical analysis, high performance supercomputing, graphics, visualisation and programming. Graduates with computational science skills are in strong and increasing demand in scientific research, industry, government and finance, particularly for their analytic and problem solving skills and their specific expertise in computing. The major in Computational Science can include a wide range of electives to suit individual interests, selected from computationally orientated offerings from various departments and schools from across the Faculty. Table 1 lists the core Senior units and electives, as well as Junior options. COSC units are described below. For descriptions of other units see their separate entries under the contributing school or department. The Computational Science unit coordinator is Dr Mike Wheatland

Junior units of study

COSC1001
Computational Science in Matlab
Credit points: 3 Session: Semester 2 Classes: One 1 hour lecture and one 2 hour practical per week. Prohibitions: COSC1901 Assumed knowledge: HSC Mathematics Assessment: Two assignments, practical work, including practical exam, theory exam.

This unit of study focuses on scientific problem solving and data visualisation using computers and is complementary to COSC1002. Students will learn how to solve problems arising in the natural sciences and mathematics using core features of the problem solving environment MATLAB, with a choice of problems from various areas of science at each stage. Emphasis will be placed on graphical display and visualisation of data and solutions to problems. No previous knowledge of programming is assumed.

Textbooks

COSC1901
Computational Science in Matlab (Adv)
Credit points: 3 Session: Semester 2 Classes: One 1 hour lecture and one 2 hour practical per week. Prerequisites: UAI of at least 90, or COSC1902, or a distinction or better in COSC1002, SOFT (1001, 1002, 1901 or 1902). Prohibitions: COSC1001 Assumed knowledge: HSC Mathematics Assessment: Two assignments, practical work, including practical exam, theory exam.

This unit of study is the advanced version of COSC1001 and is complementary to COSC1902. The subject matter is very similar but more challenging problems will be covered and some additional programming and visualisation techniques will be used.

Textbooks
COSC1002
Computational Science in C
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week. 
Prerequisites: [Refer to Mathematics listing in this chapter for descriptions of these units of study] Senior elective units of study for a major in Computational Science are listed in Table 1 in chapter 3

COSC3011
Scientific Computing
Credit points: 12 Teacher/Coordinator: Dr Mike Wheatland Session: Semester 2 Classes: One 1 hour lecture and one 3 hour practical per week. 
Prerequisites: 12 credit points from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. 
Prohibitions: COSC3001, COSC3901, PHYS3001, PHYS3901 Assumed knowledge: Programming experience in MATLAB. Assessment: Lab, written exam 

This unit offers a senior-level treatment of scientific problem-solving using computers and is complementary to COSC1001. Students will learn how to solve problems arising in the natural sciences and mathematics using core features of the language C, with a choice of problems from various areas of science at each stage. No previous knowledge of programming is assumed.

Textbooks

COSC1902
Computational Science in C (Adv)
Credit points: 3 Session: Semester 2 Classes: One 1 hour lecture and one 2 hour practical per week. 
Prerequisites: UAI of at least 90, or COSC1901, or a distinction or better in COSC1001, SOFT (1001, 1002, 1901 or 1902). 
Prohibitions: COSC1002 Assumed knowledge: HSC Mathematics Assessment: Two assignments, practical work, including practical exam, theory exam.

This unit is the Advanced version of COSC1002 and is complementary to COSC1901. The subject matter is very similar, but more challenging problems will be covered and some additional programming techniques will be used.

Textbooks

Senior units of study
For a major in Computational Science, the minimum requirement is 24 credit points chosen from the core or elective senior units of study listed for this subject area, of which at least 12 credit points must be from the following core senior units of study: COSC3011 Scientific Computing; COSC3911 Scientific Computing (Advanced); COSC3012 Parallel Computing & Visualisation; COSC3912 Parallel Computing & Visualisation (Adv); MATH3076 Mathematical Computing*; MATH3976 Mathematical Computing (Advanced)*.

Notes
*[[Refer to Mathematics listing in this chapter for descriptions of these units of study]]

COSC3911
Scientific Computing (Advanced)
Credit points: 6 Teacher/Coordinator: Dr Mike Wheatland Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour practical per week. 
Prerequisites: 12 credit points from Junior Mathematics and Statistics, 12 credit points of Intermediate units in Science subject areas. 
Prohibitions: COSC3011, COSC3001, COSC3901, PHYS3001, PHYS3901 Assumed knowledge: Programming experience in MATLAB. 
Assessment: Lab, written exam 

This unit is the Advanced version of COSC3011. The subject matter is very similar, but more challenging problems will be covered.

Textbooks
draws on a wide range of science-based disciplines and applications, from ecology to solar power, analytical chemistry to geomorphology. Environmental Science is also concerned with the social issues involved, including environmental law and policy, sustainability, resource economics, urban planning, and environmental ethics. Environmental scientists and managers need to have a broad knowledge base and the ability to be flexible and innovative in their application of such knowledge. Consequently, the emphasis of the Environmental Science program is placed upon studies that span and integrate several disciplines, involve adaptive problem solving, and develop new skills and expertise. In particular, the Environmental Science program looks to supplement studies in the science disciplines with units that provide complimentary information on environmental issues that not only show how the sciences interact in the environment but how humans impact upon it. Prior to 2007, students wanting to take Environmental Science did so through the specialist BSc (Environmental) degree - see Table 1B. Now students wanting to take Environmental Science can only do so by taking a double major in the BSc, one major in Environmental Studies and the other in a Science discipline of the students' choice. For descriptions of the ENVI units of study refer to the entries under Environmental Studies.

Honours in the Bachelor of Science (Environmental)

Students of sufficient merit may be admitted to an Honours course in the Bachelor of Science (Environmental). In the Honours year, a student will undertake an interdisciplinary research exercise in association with one or more supervising members of the academic staff at the University of Sydney, write a thesis based upon the research, and attend advanced lecture units of study and seminars as required by their supervisor(s). The Honours year is not only rewarding but enjoyable as well, and marks the transition period where a student becomes a research collaborator. Eligible students can choose to complete Honours in the following Science Subject Areas: Agricultural Chemistry, Biology, Chemistry, Geography, Geology, Marine Science, Microbiology, or Soil Science. (Please note that there are no Honours units of study entitled ‘Environmental Science’).

Environmental Studies

Environmental Studies is the examination of the human interactions with the natural and built environment. It encapsulates the fundamental social aspects of sustainability, environmental impact, law, ethics, development, energy use, economics and politics. In order to properly cover this material, the ENVI units are taught by various staff from within the Faculties of Science, Architecture and Law. Consequently, the ENVI units are complimentary to studies not only in the physical and natural Science disciplines but also to the social disciplines.

Obtaining a major in Environmental studies

A major in Environmental Studies constitutes the completion of 24 credit points of Senior units as listed in Table 1, including at least 12 credit points of Senior ENVI units of study listed below. Study of at least one Intermediate ENVI unit is highly recommended.

ENVI2111 Conservation Biology and Applied Ecology

Credit points: 6 Teacher/Coordinator: Dr C Taylor Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practical per week plus one 2 day field trip during the semester. Prerequisites: 24 credit points of Junior Science units, including 12 credit points of Junior Biology. Prohibitions: ENVI2001, ENVI2911 Assessment: Essays, tutorial papers, exam

This topic examines the role of conservation biology and applied ecology in environmental science, examining pattern and process in natural systems and evaluating how these are being affected by pervasive anthropogenic impacts. Focusing on the conservation, assessment of impacts and the restoration of natural systems, we consider the range of ecological issues environmental scientists must address. We examine the extent of environmental problems; derive explanations of why and how they are occurring and address management options for resolving them. We will derive general principles for these by addressing case studies, chosen from Australian examples when possible. The aim of this unit is for you to understand the processes that go into solving environmental problems from an ecological perspective and how to identify management options.

ENVI2911 Conservation Biology (Advanced)

Credit points: 6 Teacher/Coordinator: Dr Charlotte Taylor Dr Clare McArthur Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practical per week plus one 2 day field trip during the semester. Prerequisites: Distinction average in BIOL1001 or 1101 or 1901 and either one of BIOL (1002 or 1902 or 1003 or 1903) or EDUH1016. 12 credit points of Junior Chemistry (or for BSc (Marine Science) students 6 credit points of Junior Chemistry and 6 credit points of Junior Physics). These requirements may be varied and students with lower averages should consult the Unit Executive Officer. Prohibitions: ENVI2001, ENVI2911 Assessment: One 2 hour exam, field report, briefing paper, oral presentation.

Qualified students will participate in alternative components of ENVI2111, Conservation Biology, including an independent research project.

Textbooks

Caughley G & Gunn 1996 Conservation Biology in Theory and Practice, Blackwell; Oxford

Lindenmayer D & Burgman M 2005 Practical Conservation Biology, CSIRO Publishing: Victoria

ENVI2112 Atmospheric Processes and Climate

Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 2 hour practical per week. Prerequisites: 24 credit points of Junior Science units, including 12 credit points of Junior Chemistry or Physics. Prohibitions: ENVI2002 Assessment: Assignments, tutorial papers, exam

This unit of study investigates the physical and chemical characteristics of our atmosphere, as well as the natural processes that occur within it and how these contribute to the climate we live in. Topics such as atmospheric structure, photochemical processes, and weather will be examined. The effects of ocean circulation are investigated, particularly examining the ocean's importance as a source/sink for atmospheric constituents and as a heat regulator. The impact of glaciation is also examined, including sources, quantity, magnitude of threat, and the potential impact to our climate, are then explored. Finally, the unit examines issues surrounding climate change and the modelling of these changes.

ENVI3111 Environmental Law and Ethics

Credit points: 6 Teacher/Coordinator: Dr Gerry Bates Dr Rachel Ankeny Session: Semester 1 Classes: Two 2 hour lectures per week. Prerequisites: 12 credit points of Intermediate Science or Agriculture units. Prohibitions: ENVI3001, ENVI3003. Assumed knowledge: Intermediate Environmental Science. Assessment: Essays, tutorial papers.

This unit of study covers topics in environmental law and ethics. The environmental law component provides an overview of all laws in Australia pertaining to environmental matters and looks at a number of environmental issues at the various levels of analysis, policy making, implementation of policy, enforcement, and dispute resolution. It also provides a broad background to the political and economical issues as they relate to the legal issues involved. It also examines international environmental law, particularly examining how these influence and affect our local policies. The ethics component helps students develop thoughtful and informed positions on issues in environmental ethics using arguments derived from traditional ethics as well as environmentally specific theories. Ethical conflicts are often inevitable and difficult to resolve but using the resources of philosophical ethics and regular reference to case studies, students can learn to recognize the values and considerations at stake in such conflicts, acknowledge differing viewpoints and defend their own well considered positions.

ENVI3112 Environmental Assessment

Credit points: 6 Teacher/Coordinator: Dr John Dee Dr Scott Kable Session: Semester 2 Classes: Two 2 hour lectures per week. Prerequisites: 12 credit points of Intermediate Science or Agriculture units. Prohibitions: ENVI3002,
Environmental Economics and Planning

Credit points: 6
Teacher/Coordinator: Dr Tihomir Ancic, Dr John Dee
Session: Semester 1
Prerequisites: 12 credit points of Intermediate Science or Agriculture units
Prohibitions: ENVI3001
Assumed knowledge: Intermediate Environmental Science
Assessment: Essays, tutorials, reports, exam

This unit of study covers topics in environmental economics and planning. The economics component will provide a general introduction to theoretical concepts and empirical work in natural resource and environmental economics. The basic economic concepts of consumption, choice, utility, production, costs, property rights, market failures, externalities and government institutions will be defined and discussed. A set of tools and methods that are used in resource and environmental economics practice will be introduced. These comprise optimisation, econometric and simulation models, as well as more specific methods such as benefit-cost analysis and non-market valuation methods. The concepts and tools will be applied to specific problems related to land and water. In particular, discussions will be focused on some of the following problems: agricultural and urban water supply and demand, water quality, land use, sustainable development. The planning component introduces the field of urban and regional planning and its application in Australia. The lectures cover a broad range of topics including urbanization, the scope of plan making, policy and implementation, development control measures, principles of environmental sustainability, indigenous development issues, and planning in regional and urban settings relevant to both the built and natural environment. The implications for planning in a liberal-pluralist political environment and the need to reconcile a wide range of competing interests in land use and natural resources will also be investigated.

Energy and the Environment

Credit points: 6
Teacher/Coordinator: Dr Chris Dew
Session: Semester 2
Prerequisites: 12 credit points of Intermediate Science or Agriculture units
Prohibitions: ENVI3001, PHYS3600
Assumed knowledge: Junior Physics or Intermediate Environmental Science
Assessment: Essays, tutorials, reports, exam

This unit covers the following aspects of energy and the environment: energy use; electrical power generation including alternate methods such as wind turbines; the environmental impact of energy use and power generation including the enhanced greenhouse effect; transportation and pollution; energy management in buildings; solar thermal energy, photovoltaics, and nuclear energy; and, socio-economic and political issues related to energy use and power generation.

Financial Mathematics and Statistics

This is an interdisciplinary major offered in the Faculty of Science consisting of several core units and a number of elective units from mathematics, statistics and information technologies. The program is designed to meet the need for high level quantitative and modelling skills in the banking, insurance, stockbroking and finance industries without constraining students to a full major in mathematics or statistics. Graduates with specifically strong mathematical and statistics backgrounds are in high demand. The core units Optimisation and Financial Mathematics (MA TH2070/2970) and Financial Mathematics 2 (MA TH3015/3933) are the backbone of the program and introduce the student to important financial concepts within a mathematical and statistical framework. The core mathematics and statistics units provide the technical base that is required by a quantitative analyst, while the elective units offer the student increased flexibility and additional opportunities to develop related skills. Students completing the program at the Advanced Level may continue into Fourth Year Honours where a number of further Financial Mathematics and Statistics units are on offer. It is envisaged that students completing the Honours program will not only be highly trained in quantitative finance, but will also be well prepared for active research in the field. Students should refer to Table 1 for an enrolment guide and to entries under the contributing Schools for unit of study descriptions.

Geosciences

The School of Geosciences offers units of study in the discipline areas of Geography and Geology & Geophysics. Students may take a major in one of these disciplines, or a minor in one of these disciplines, and many of the Geoscience units also form key components of the Environmental Studies and Marine Science majors. The junior units GEOS1001, GEOS1002 and GEOS1003 provide a comprehensive introduction to both Geography and Geology & Geophysics. A major in Geography or Geology & Geophysics can be included within various degree programs across the University, including Science, Arts, Liberal Studies, Economics and Social Sciences.

Geography

Geography is the study of earth as the home of people. As the need to find solutions to issues of environmental sustainability, population change and globalisation have become more challenging, the skills and knowledge of geographers have come to the forefront. Students of Geography are interested in their world, and are taught to think critically about the relationships between people, environments and places. The knowledge and skills gained from studying Geography at the University of Sydney provide a launch pad to a professional career in an array of fields including environmental management, planning, overseas development and consulting research. Our Geography program has strong linkages with various national and international organizations that provide pathways for further studies at Honours and post-graduate levels, and into the work force. It differs from High School Geography in that it provides more opportunities for independent learning, introduces new techniques and skills, offers flexibility for you to follow your interests and is tailored to real world events and issues.

Geology and Geophysics

Geology & Geophysics provides a unifying context for understanding the workings of the earth system and the dynamic structural and ecosystem relationships between the continents and the oceans. Global climate change and shrinking resources have heightened our sense of dependence on Earth as a complex system. Geology & Geophysics provides students with an understanding of change on Earth, its origin, plate tectonics, surface processes, evolution of life and geologic time. Intermediate units highlight the role of the earth system in natural phenomena, including those of concern to humans such as geo-biodiversity, salinity, seismicity, volcanic hazards, climate and sea level change. Senior units of study cover methods of field data collection and provide access to cutting edge computing and data resources used for turning such observations into knowledge. Students will acquire the skills necessary for employment in all areas of sustainable exploration and management of our natural, mineral and energy resources.
Geosciences Advice
As a Geoscience student at the University of Sydney, you will participate in an array of learning environments that complement traditional lecture and tutorial classes; for example, studies can include field trips to destinations in Australia and overseas. Students who wish to obtain advice concerning the units of study described below should approach School advisors during the enrolment week or the unit coordinators during semester. Further information is available at www.geosci.usyd.edu.au, as well as in the Geosciences’ student handbook available from the School’s administrative office (Room 348, Madsen Building).

Website
The School of Geosciences website is located at: http://www.geosci.usyd.edu.au/

Location
The School of Geosciences is located within two buildings. Staff with expertise in Geography, and the Head of School, are located on the second floor of the Madsen Building (F09). The Demountables (H11) houses staff with expertise in Geology and Geophysics. All enquiries can be made at the Madsen Building, Room 470, 8.30am to 4.30pm, Mon to Fri.

Further information
Further information is available at www.geosci.usyd.edu.au, as well as in the Geosciences’ student handbook available from the School’s administrative office (second floor, Madsen Building).

Geosciences junior units of study
Students are encouraged to commence their studies of Geography, Geology & Geophysics, Environmental Studies or Marine Science by enrolling in GEOS1001 (Earth, Environment and Society) (February semester). This unit of study provides an overarching introduction to issues and themes taught across the School of Geosciences. In the second (July) semester, Geography students should enroll in GEOS1002 (Introductory Geography); Geology & Geophysics students need to enroll in GEOS1003 (Introduction to Geology). Entry into any of these units of study does not require any prior knowledge.

GEOS1001 Earth, Environment and Society
Credit points: 6
Teacher/Coordinator: Dr Tom Hubble, Dr Mel Neave, Dr Bill Pritchard
Session: Semester 1
Classes: Two 1 hour lectures and one 2 hour practical per week.
Prohibitions: GEOG1001, GEOG1002, GEOL1001, GEOL1002, GEOL1902
Assessment: One 2 hour exam, 2000 word essay, field and prac reports

This Unit of Study examines interactions between the physical Earth and the activities of its growing population of human inhabitants. Several themes will be explored to provide students with an overview of the way that the earth's physical systems have come into being and how they function. Firstly, past geological events will be used to illustrate how habitats and ecosystems respond to environmental crises. Secondly, models of environmental and climate change will be examined. Thirdly, the requirements of growing human populations and their ecological footprints will be investigated. These three themes will then be integrated to enable students to think critically about the key issues facing the future of the planet, and provide a foundation for future studies in Geography and Geology.

GEOS1002 Introductory Geography
Credit points: 6
Teacher/Coordinator: Dr Mel Neave, Dr Kurt Ivens
Session: Semester 2
Classes: Two 1 hour lectures and one 2 hour practical per week.
Prohibitions: GEOG1902, GEOG1001, GEOG1002
Assessment: One 2 hour exam, one 2000 word essay, five practical reports

This unit of study provides an introductory geographical analysis of the ways in which places and landscapes are produced. The unit focuses on both the physical and human processes that generate spatial variation and difference, as well as tracing the interactions between these processes. The unit will begin with an investigation of Earth’s surface features, exploring the distribution of landforms across Earth and interpreting their evolutionary histories. Several landscapes will be examined including those formed by rivers, wind, oceans and glaciers. But physical landscapes evolve under the influence of and affect human operations. Therefore, the unit of study will also consider the political, economic, cultural and urban geographies which shape contemporary global society. Each of these themes will be discussed with reference to key examples, in order to consider the ways in which the various processes (both physical and human) interact in the shaping of places. The unit of study will also include short field trips to localities surrounding the university to observe processes of spatial change and conflict. The unit of study is designed to attract and interest students who wish to pursue geography as a major within their undergraduate degree, but also has relevance to students who wish to consider the way geographers understand the contemporary world.

GEOS1003 Introduction to Geology
Credit points: 6
Teacher/Coordinator: Dr Tom Hubble, A/Prof Clarke, Dr Julie Dickinson
Session: Semester 2
Classes: Three 1 hour lectures and one 1 hour practical per week.
Prohibitions: GEOS1903, GEOL1002, GEOL1902
Assessment: One 2 hour exam, practical reports, field report

The aim of this unit of study is to examine the chemical and physical processes involved in mineral formation, the interior of the Earth, surface features, sedimentary environments, volcanoes, and metamorphism. Lectures and laboratory sessions on mountain building processes and the formation of mineral deposits will lead to an understanding of the forces controlling the geology of our planet. Processes such as weathering, erosion and nature of sedimentary environments are related to the origin of the Australian landscape. In addition to laboratory classes there is a two-day excursion to the western Blue Mountains and Lithgow to examine geological objects in their setting.

Textbooks

GEOL1501 Engineering Geology 1
Credit points: 6
Session: Semester 2
Classes: 39 hours lectures, 26 hours laboratory Field excursions in the Sydney region, as appropriate.
Prohibitions: GEOL1002
Assumed knowledge: No previous knowledge of Geology assumed.
Assessment: Practical laboratory work, assignment, and a combined theory and practical exam.

Course objectives: To introduce basic geology to civil engineering students. Expected outcomes: Students should develop an appreciation of geologic processes as they influence civil engineering works and acquire knowledge of the most important rocks and minerals and be able to identify them. Syllabus summary: Geological concepts relevant to civil engineering and the building environment. Introduction to minerals; igneous, sedimentary and metamorphic rocks, their occurrence, formation and significance. General introduction to physical geology and geomorphology, structural geology, plate tectonics, and hydrogeology. Associated laboratory work on minerals, rocks and mapping.

Textbooks

GEOS1901 Earth, Environment and Society Advanced
Credit points: 6
Teacher/Coordinator: Dr Tom Hubble, Dr Mel Neave, Dr Bill Pritchard
Session: Semester 1
Classes: Two 1 hour lectures and one 2 hour practical per week.
Prerequisites: Departmental permission is required for enrolment.
Assessment: A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator.

Prohibitions: GEOS1001, GEOS1002, GEOS1901, GEOL1001, GEOL1002, GEOL1902
Assessment: One 2 hour exam, 2000 word essay, field and prac reports

Note: Department permission required for enrolment.
Advanced students will complete the same core lecture material as for GEOS1001, but will be required to carry out more challenging practical assignments.

GEOS1902
Introductory Geography (Advanced)
Credit points: 6 Teacher/Coordinator: Dr Mel Neave, Dr Kurt Iverson Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practicals per week.
Prerequisites: Departmental permission is required for enrolment. A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator. Prohibitions: GEOS1002, GEOG1001, GEOG1002 Assessment: One 2 hour exam, one 2000 word essay, five practical reports
Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEOS1001, but will be required to carry out more challenging practical assignments.

GEOS1903
Introduction to Geology (Advanced)
Credit points: 6 Teacher/Coordinator: Dr Tom Hubble, A/Prof Clarke, Dr Julie Dickinson Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour practical GEOG1001 or 2001 or 36 credit points of Junior study is required for enrolment. A UAI above 93 is normally required for admission. This requirement may be varied and students should consult the unit of study coordinator. Prohibitions: GEOG1002, GEO1902, GEO1903 Assessment: One 2 hour exam, practical reports, field report
Note: Department permission required for enrolment.

This unit has the same objectives as GEOS1003 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. This unit may be taken as part of the BSc (Advanced).

Geosciences intermediate units of study
Geoscience intermediate units of study are listed below. All intermediate students are encouraged to enrol in GEOG2111 (Natural Hazards: a GIS Approach) which covers concepts and skills relevant to all Geoscience disciplines. Students interested in different areas of the Geoscience disciplines may select intermediate units of study as follows: physical and environmental Geology; GEOG2111 and/or GEOG2113 (Feb semester); GEOG2121 and/or GEOG2124 (July semester), human and environmental Geography; GEOG2112 and/or GEOG2111 (Feb semester); GEOG2122 and/or GEOG2121 (July semester), Geology & Geophysics: GEOG2111, GEOG2112 and/or GEOG2114 (Feb semester); GEOG2124 and/or GEOG2121 (July semester). Regardless, subject to the prerequisites for each individual unit of study, students may vary their enrolment across these streams. The School of Geosciences encourages students to construct a sequential ordering of units that best meets their interests and aspirations.

GEOG2321
Fluvial and Groundwater Geomorphology
Credit points: 6 Teacher/Coordinator: Dr Melissa Neave Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical per week.
Prerequisites: GEOG2311 or 2001 or 36 credit points of Junior study including GEOG1001 or ENVI (1001 or 1002) or GEOGL (1001 or 1002 or 1501). Students in the Bachelor of Resource Economics should have 36 credit points of study in Geography (or Land and Water Science), Chemistry and Mathematics. Students in the Bachelor of Land and Water Science should have ENV11002, 12 credit points of Chemistry, 6 credit points of Biology, BIOM1502. Prohibitions: GEOG (2002 or 2302 or 2303) or MARS2002 or MARS2006 Assessment: One 2 hr exam, one quiz, one field report, practical exercises
This unit of study provides an introduction to the fundamentals of fluvial geomorphology (the study of surface water as an agent of landscape change) and groundwater hydrology. The fluvial geomorphology section of the unit will describe the movement of water in stream channels and investigate the landscape change associated with that movement. Topics to be covered will include open channel flow hydraulics, sediment transport processes and stream channel morphology. Practical work will focus on the collection and analysis of field data. The quantity and quality of the groundwater resources are closely linked to geology and fluvial geomorphology. The groundwater section of this unit is based around four common groundwater issues: contamination, extraction, dryland salinity and groundwater-surface water interaction. In the practical component, common groundwater computer models such as FLOWTUBE and MODFLOW will be used to further explore these problems.

Textbooks

GEOS2111
Natural Hazards: a GIS Approach
Credit points: 6 Teacher/Coordinator: Dr Eleanor Bruce Dr Michael Hughes and others Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour practical per week. Prerequisites: 24 credit points of Junior units of study including one of GEOS1001 or GEOS1002 or GEOG1003 or GEOG1001 or GEOG1002 or ENV1102 or GEOGL1001 or GEOGL1002 Prohibitions: GEOG2411, GEOG2911 Assessment: One 2 hour exam, one assignment, report.

The geosciences provide an essential framework for understanding the environmental response to short- and long-term geologic, oceanic and atmospheric processes. This unit of study introduces students to a variety of natural phenomena that affect society with impact levels ranging from nuisance to disastrous. The discussion of each hazard focuses on: (1) the process mechanics, (2) hazards and risk, and (3) methods for mitigation. Geographic Information Systems (GIS) are used by scientists, planners, policy-makers and the insurance industry alike to address many issues relating to natural hazards. This unit of study will introduce students to the major concepts relating to GIS and provide practical experience in the application of GIS techniques to hazard mapping, risk assessment and mitigation.

GEOS2112
Economic Geography of Global Development
Credit points: 6 Teacher/Coordinator: Dr Bill Pritchard, A/Prof Phil Hirsch Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practical per week. Prerequisites: 24 credit points of Junior units of study, including GEOG1001 or GEOG1002 or GEOG1003 or GEOG1901 or GEOG1902 or GEOG1903 or ECOP1001 or ECOP1002 or GEOG1002 or GEOG1001 Prohibitions: GEOG2912, GEOG2911 Assessment: One 2 hour exam, 2000 word essay, tutorial papers, practical report.

In this unit of study, students will be introduced to the sub-discipline of economic geography by way of debates on the spatial character of global development. We focus on questions relating to who are the winners and losers from contemporary patterns of global economic change. This includes the analysis of relevant conceptual approaches to these questions (including comparative advantage, global commodity chain theory, regionalism, economic governance etc), plus 'hands-on' examination of the key institutions (such as the WTO and ADB) driving these changes. In general, issues are tailored to themes being played out in Asia-Pacific countries. Students are expected to participate in a variety of practical class exercises throughout the semester, which will include presenting the fruits of independent research activities. This unit provides an especially relevant feeder-unit into GEOG 3053/ GEOS 3054, the Asia-Pacific Field School.

Urban Geography

GEOS2114

Volcanoes, Hot Rocks and Minerals

Credit points: 6
Teacher/Coordinator: Dr Derek Wyman, Dr Patrice Rey, Dr Geoff Clarke
Session: Semester 1, Summer Late Classes: Two 1 hour lectures and one 3 hour practical per week, Prerequisites: GEOG1001, GEOL1001, GEOL1002, GEOS1003, GEOS1903 or ENV1102 and 24 credit points of Junior Science units of study
Prohibitions: GEOG2294, GEOL2123, GEOL2124
Assessment: One 2 hour exam, practical reports, field trip report, group presentation

This advanced unit of study relates the plate tectonics of subduction zones to a) volcanoes and their hazards, b) geological processes in the deep crust, and c) the formation of precious metal and gemstone ores around the Pacific Rim. A problem solving approach is used to develop the skills required to understand the history of individual volcanoes and predict their future activity and hazards. The unit includes a two- to three-day field trip to study an extinct volcano in NSW. Practical work includes independent study of igneous systems, rocks, and minerals employing both microscope-based techniques and computer modeling. A field excursion to volcanic terranes of New Zealand (North Island) is optional. The unit provides relevant knowledge for GEOS 3006 and GEOS 3906, Mineral Deposits & Spatial Data Analysis.

GEOS2121

Environmental and Resource Management

Credit points: 6
Teacher/Coordinator: Dr Phil McManus
Session: Semester 2 Classes: Two 1 hour lectures and one 1 hour tutorial per week, one fieldtrip.
Prerequisites: 24 credit points of junior units of study, including one of: GEOG1001 or GEOL1002 or GEOS1003 or 2111, GEO1001 or GEOS1902 or GEOS1903 or ECO1001 or ECO1002
Prohibitions: GEOG2421, GEO2202, GEOS2921
Assessment: One 2 hour exam, one 2000 word essay, tutorial papers, one fieldtrip report

This unit of study explores cultural constructions of nature and resources, the evolution of environmental thought and the debates about sustainable development. It integrates environmental, economic, cultural and social considerations, with particular regard to water, mining, forestry and fishing industries in Australia and other countries. The unit includes a fieldtrip to the Hunter Valley to look at geological and geographical issues pertaining to mines, wines and the thoroughbred breeding industries in this region. The unit of study enables students to learn about the economics of resource extraction and the social, cultural and environmental considerations that must be taken into account when developing and implementing environmental and resource management policies.

GEOS2122

Urban Geography

Credit points: 6
Teacher/Coordinator: Prof John Connell, Dr Kurt Iveson
Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practical per week, Prerequisites: 24 credit points of Junior units of study, including GEOG1001 or GEOL1002 or GEOS1003 or ECO1001 or ECO1002
Prohibitions: GEOG2292, GEOS2521
Assessment: One 2 hour exam, 2000 word essay, tutorial papers, practical reports

By their very nature, cities are full of different people doing all sorts of different things. These activities all have their own geographies, people make the most of urban spaces available to them, and they shape and produce new kinds of cities through their actions. These urban geographies are unstable and contested. In fact, efforts to shape urban spaces in particular ways are fundamentally dynamic and political. This course will examine the politics of a range of different practices which use and shape urban space, such as shopping, eating, crime, religion, language, protest, sport, music, sex, mobility, and hanging out. In considering these various practices, we will investigate how different people perceive space and construct space, primarily in western contexts. The course as a whole seeks to understand the cultural and political dimensions of everyday life in cities, and to develop new perspectives on metropolitan change.

GEOS2124

Fossils and Tectonics

Credit points: 6
Teacher/Coordinator: Dr Julie Dickinson, A/Prof Dietmar Muller, Dr Patrice Rey, Prof Peter Hatherton
Session: Semester 2 Classes: Two 1 hour lectures plus one 3 hour practical each week
Prerequisites: 24 credit points of Junior units of study including GEOS1003 or GEOS1903
Prohibitions: GEOS2294, GEOL2123, GEOL2124
Assessment: One 2 hour exam, practical reports, field report

The unit aims to convey how fossils, stratigraphic and structural data are used together to determine ages and environments and the deformation history of rock layers. It covers an introduction to historical geology and the evolution of the major fossils groups. Methods of stratigraphic age determination include litho-, bio-, chemo-, magneto-stratigraphy, as well as radiometric geochronology and the stratigraphic characteristics of the main geological time intervals. Structural methods are focused on brittle deformation in the upper crust and sediments. Students will gain familiarity with the most important fossil groups and how to identify them, and with the most important types of faults and folds. The formation of fossil fuels such as coal, oil and gas will also be covered in an earth history and resource exploration context. The simultaneous use of fossils, stratigraphy and structure to unravel the geological history of a set of exposed rock layers is demonstrated during a field excursion to Yass.

Classnotes by Dickinson et al. available in co-op bookshop

GEOS2911

Natural Hazards: a GIS Approach Advanced

Credit points: 6
Teacher/Coordinator: Dr Eleanor Bruce, Dr Michael Hughes and others.
Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour practical per week
Prerequisites: 24 credit points of junior units of study including GEOG1001 or GEOL1002 or GEOS1003 or GEG1001 or GEG1002 or ENV1102 or GEOL1001 or GEOL1002
Prohibitions: GEOG2421, GEOS2911
Assessment: One 2 hour exam, one assignment, practical report

The geosciences provide an essential framework for understanding the environmental response to short- and long-term geologic, oceanic and atmospheric processes. This unit of study introduces students to a variety of natural phenomena that affect society with impact levels ranging from nuisance to disastrous. The discussion of each hazard focuses on: (1) the process mechanics, (2) hazards and risk, and (3) methods for mitigation. Geographic Information Systems (GIS) are used by scientists, planners, policy-makers and the insurance industry alike to address many issues relating to natural hazards. This unit of study will introduce students to the major concepts relating to GIS and provide practical experience in the application of GIS techniques to hazard mapping, risk assessment and mitigation.

GEOS2912

Credit points: 6
Teacher/Coordinator: Dr Bill Pritchard, A/Prof Phil Hirsch
Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practicals per week
Prerequisites: 24 credit points of Junior units of study, including a distinction in one of: GEOG1001 or GEOG1901 or GEOS1002 or GEOS1902 or GEOS1003 or GEOS1903 or ECO1001 or ECO1002 or GEOG1001 or GEOG1901 or GEOS3102
Prohibitions: GEOS2112, GEO2511
Assessment: One 2 hour exam, 2000 word essay, tutorial papers, practical reports

This is an Advanced version of GEOS2112. In this unit of study, students will be introduced to the sub-discipline of economic geography by way of debates on the spatial character of global development. We focus on questions relating to who are the winners and losers from contemporary patterns of global economic change. This includes the analysis of relevant conceptual approaches to these questions (including comparative advantage, global commodity chain theory, regionalism, economic governance etc), plus ‘hands-on’ examination of the key institutions (such as the WTO and ADB) driving these changes. In general, issues are tailored to themes being played out in Asia-Pacific countries. Students are expected to participate in a variety of practical class exercises throughout the semester, which
will include presenting the fruits of independent research activities. This unit provides an especially relevant feeder-unit into GEOSS3053/ GEOSS3054, the Asia-Pacific Field School.

The course as a whole seeks to understand the cultural and political dimensions of everyday life in cities, and to develop new perspectives on metropolitan change.

**GEOS2924 Fossils and Tectonics (Advanced)**

Credit points: 6
Teacher/Coordinator: Dr Julie Dickinson, A/Prof Dietmar Muller, Dr Patrice Rey, Prof Peter Hatherly
Session: Semester 2
Classes: Two 1 hour lectures plus one 3 hour practical each week.
Prerequisites: Distinction in GEOSS1003 or Distinction average in 12 credit points of Junior Geoscience units (Geoscience is the disciplines of Geography, Geology and Geophysics) Prohibitions: GEOSS2124, GEOL2123, GEOL2124 Assessment: One 2 hour exam, practical reports, field report

This unit has the same objectives as GEOS2124 and is suitable for students who wish to pursue aspects of the subject in greater depth.
10. Undergraduate units of study

General Training

GEOS3008/3908 (Geology field school), GEOS3003/3903 (Dynamics of Continents and Basins) and GEOS3007/3907 (Remote Sensing: Imaging the Earth) as well as one of GEOS3009/3909 (Coastal Environments & Processes) or GEOS3017/3917 (Global Energy-Exploration & Exploitation), GEOS3005/3916 (Mineral Deposits), GEOS3007/3917 (Remote Sensing; Imaging the Earth), or GEOS3018/3918 (Rivers: Science, Policy & Management).

GEOS3003

Dynamics of Continents and Basins

Credit points: 6  Teacher/Coordinator: A/Prof Dietmar Muller, Dr Patrice Rey
Session: Semester 1  Classes: One 2 hour lecture and one 2 hour practical per week; excursion
Prerequisites: (6 credit points of Intermediate Geoscience units) and (6 further credit points of Intermediate Geoscience or 6 credit points of Physics, Mathematics, Information Technology or Engineering units) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906))
Prohibitions: GEOL3101, GEOS3903
Assessment: One 2 hour theory exam, class work

The Earth's crust hosts mineral and energy resources that have sustained our civilisation over the past five thousand years. These resources are formed along plate boundaries and in sedimentary basins. They are the by-products of dynamic and thermal processes that have affected the lithosphere since its formation in the Archaean. This unit focuses on the understanding the thermal and mechanical aspects of lithospheric deformation from continental break-up and basin formation and evolution to continental convergence and orogenesis. The main topics of this module include: Mantle convection, oceanic lithospheric evolution, heat transfer in the lithosphere; Isostasy and vertical motion of the Earth's surface; Plate boundaries, body forces and the dynamic of the Earth's lithosphere; Rheology of the lithosphere; Continental break-up and the formation of continental margins and basins; Thermo-mechanics of sedimentary basins; Thermo-mechanics of orogenesis; and, Thermal consequences and tectonic feedback of geodynamic processes. Practical classes are designed to enhance problem solving abilities, computational and communication skills as well as building a profound knowledge in Tectonics and Geodynamics. The course is relevant to all students interested in using computational methods to learn how the Earth works.

GEOS3004

Geophysics, Imaging, Oil/Ore Production

Credit points: 6  Teacher/Coordinator: Prof Iain Mason  Session: Semester 2  Classes: 12 hours of lectures, practicals per week. Prerequisites: 12 credit points of Intermediate Science units of study or CIVL2409
Prohibitions: GEOS3002, GEOS3904
Assessment: One 2 hour theory exam, computer class work

This unit examines the use of computerised geophysical techniques to map high value sites. Sites of interest range from oil fields through mine sites to archaeological digs. Data sources include micro-gravity surveying, magnetism and aero-magnetism; radiometry, short-and long-range surveillance and tracking. The course is designed around the reality that while people, as much as data acquisition and reduction technology have influenced modern geophysics, recently, major strides have been made in digital data acquisition and reduction. Lectures deal with the creation, inversion and application of 2D and 3D potential and wave fields. Lab classes extend skills in computer-aided image processing.

GEOS3006

Mineral Deposits & Spatial Data Analysis

Credit points: 6  Teacher/Coordinator: Dr Derek Wyman  Session: Semester 2  Classes: 12 hours of lectures, practicals per week; field excursion. Prerequisites: 12 credit points of Intermediate Science units of study or CIVL2409
Prohibitions: GEOL3103, GEOS3906
Assessment: One 2 hour theory exams, class work and field reports

Global-scale tectonics and continental growth are examined in terms of their relationships to mineral deposits over the last 3.5 billion years. Deposits of metals and precious gems are linked to igneous rocks and hydrothermal fluids, which provide the basis for exploration strategies, account for specific ore deposit characteristics, and determine appropriate mining techniques. Representative ore deposits from New South Wales, Australia, and overseas will be included as case studies for a wide array of mineralisation types. Practical components of the course will introduce specimens of ore deposits and associated rocks and the spatial analysis of geological data at the regional to district scale. In addition to laboratory classes there will be a four-day field excursion to active and historic mining sites in New South Wales.

GEOS3007

Remote Sensing: Imaging the Earth

Credit points: 6  Teacher/Coordinator: Dr Geoff Clarke  Session: Semester 1  Classes: 12 hours of lectures, practicals per week. Prerequisites: 12 credit points of Intermediate Science units of study or CIVL2409
Prohibitions: GEOL3101
Assessment: Practical work, one 2 hour computer-based examination and an assignment

This unit of study initially addresses the evolution of the Australian landscape, involving tectonic influences, long-term climate variation and the effects of bedrock weathering. The unit then provides a comprehensive introduction to the use and manipulation of computer-based imaging techniques at the microscopic to macroscopic scales in the Earth Sciences. The application of image analysis as a tool in the interpretation of remote sensing techniques to geological terranes and landscapes is covered in computer-based practical exercises that use a mixture of Landsat thematic mapper, airborne radiometric and magnetic databases. Integrated lectures and laboratory exercises focus on the use of processed images in mineral exploration, tectonic analysis, and environmental studies.

GEOS3008

Field Geology and Geophysics

Credit points: 6  Teacher/Coordinator: Dr Patrice Rey, Prof Peter Hatherley  Session: Semester 2  Classes: (weeks 1-7) 14 days of field work
Prerequisites: 12 credit points of Intermediate GEOS units
Prohibitions: GEOL3908
Assessment: The field work will be assessed by written reports (up to 30 pages in total) and field exercises

This unit is considered an essential component all Geology and Geophysics majors. All students will undertake a range of exercises, but concentrate on aspects that emphasise their chosen major: (1) field mapping and the analysis of geological objects in the field, in weakly to complexly deformed sedimentary and volcanic sequences; (2) field investigations of mineral deposits and their relationships to host rocks; and (3) the practical application of magnetic and electrical methods commonly employed in the search for mineral deposits. The field course complements other subject areas in Geology & Geophysics and will give students experience in the field identification of rocks and minerals, regional geology, stratigraphy, structure and rock relationships. Students will be required to pay the cost of host-style accommodation during field work, which may involve camping.

GEOS3009

Coastal Environments & Processes

Credit points: 6  Teacher/Coordinator: Prof Andy Short, Dr Michael Hughes  Session: Semester 1  Classes: Two 1 hour lectures and one 2 hour practical per week; weekend excursion
Prerequisites: (6 credit points of Intermediate Geoscience units) and (8 further credit points of Intermediate Geoscience or 6 credit points of Physics, Mathematics, Information Technology or Engineering units) or ((MARS2005 or MARS2905) and (MARS2006 or MARS2906))
Prohibitions: GEOS3909, MARS3003, MARS3105
Assessment: One 2 hour exam, two 1500 word reports

Note: * Geoscience is the disciplines of Geography, Geology and Geophysics.

Australian coastal environments are dynamic systems responding to input sediments and processes as well as solid boundary conditions. The first half of this unit focuses on high-energy wave and wind dominated coastal systems; in particular the beach-surf zone, dunes and barriers, including their Holocene/Quaternary evolution. The regional impact of waves, tides, embayments, and other environmental parameters in controlling morphology are addressed. The second half of this unit focuses on the smaller-scale processes controlling beach-surf zone morphology. In particular, how waves and currents drive beach and bar morphodynamics via sediment transport. The practical program uses real data sets collected during recent research.
programs and during a weekend field excursion, and they address issues specifically relevant to Australia's coastline.

Course notes will be available from the Photocopy Centre.

**GEOS3014 GIS in Coastal Management**

Credit points: 6
Teacher/Coordinator: Dr Eleanor Bruce, Dr Peter Cowell.

Session: Semester 2 Classes: Three 1 hour lectures and one 2 hour practical per week.
Prerequisites: GEOS3014, MARS3104.
Assessment: One 2 hour exam, two project reports, quizzes.

Note: * Geoscience is the disciplines of Geography, Geology and Geophysics.

Coastal Management is about how scientific knowledge is used to support policy formulation and planning decisions in coastal environments. The course links coastal science to policy and practice in management of estuaries, beaches and the coastal ocean. The principles are exemplified through specific issues, such as coastal erosion, pollution, and impacts of climate-change. The issues are dealt with in terms of how things work in nature, and how the issues are handled through administrative mechanisms. These mechanisms involve planning strategies like Marine Protected Areas and setback limits on civil development in the coastal zone. At a practical level, the link between science and coastal management is given substance through development and use of ‘decision-support models’. These models involve geocomputing methods that entail application of simulation models, remotely sensed information, and Geographic Information Systems (GIS). The course therefore includes both principles and experience in use of these methods to address coastal management issues. (It thus also involves extensive use of computers.) Although the focus is on the coast, the principles and methods have broader relevance to environmental management in particular, and to problem-solving in general. That is, the course has vocational relevance in showing how science can be exploited to the benefit of society and nature conservation.

Textbooks

**GEOS3015 Environmental Geomorphology**

Credit points: 6
Teacher/Coordinator: A/Professor Deidre Dragovich, Dr Stephen Gale.

Session: Semester 2 Classes: Two 1 hour lectures, one 1 hour tutorial and one 2 hour practical per week or equivalent.
Prerequisites: 24 credit points of Intermediate units, including 6 credit points of Intermediate Geography.
Prohibitions: GEOS3915, GEOS3916.
Assessment: One 2 hour exam, practical & field reports.

The first part of this unit deals with the effects of weathering on the physical and the built environment, and considers the relationship between soil and landforms. The second part investigates the environmental changes that have taken place since the end of the last glacial, the time when the world’s climates and environments first took on a recognisably modern form. It deals specifically with changes to the Australian biophysical environment and will focus on human-environmental impacts, both under pre-European and post-contact conditions.

**GEOS3016 Seafloor Processes & Imaging**

Credit points: 6
Teacher/Coordinator: Dr Dietmar Müller, Dr Julie Dickinson.

Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical per week; one-day excursion.
Prerequisites: 12 credit points of Intermediate Geoscience or (one of MARS2005 and MARS2006) and (one of MARS2006 and MARS2007).
Prohibitions: GEOS3916, MARS2005, MARS3106
Assessment: One 2 hour exam, prac reports.

Note: * Geoscience is the disciplines of Geography, Geology and Geophysics.

Exploring the sediments and rocks that make up the continental shelves and deep ocean floor requires the use of remote sensing techniques, and the analysis of geological and geophysical data. This course teaches analytical and interpretive skills in both these areas, with a focus on the interaction of physical, biological and chemical processes on the sea floor. The aim of this course is to provide the student with skills to analyse sea floor environments and interpret a variety of relevant geological and geophysical datasets, including include side-scan sonar, swath-mapping, magnetics, gravity, and seismic reflection data. Students will also gain the skills to investigate marine sedimentary successions. The practical exercises will provide an introduction to standard data analysis tools such as Matlab, and the use of Australian and world data-bases. Students will also be introduced to seafloor samples from the shelf, slope and deep ocean, with the role of physical and biological actions on the sediment characteristics will be examined. The course is relevant to students interested in seafloor environments, marine geology and geophysics, and computer-based marine data analysis.

**GEOS3017 Global Energy-Exploration & Exploitation**

Credit points: 6
Teacher/Coordinator: Prof Peter Davies, Dr Gavin Birch.

Session: Semester 1 Classes: One 1 hour lecture and one 2 hour tutorial per week.
Prerequisites: MARS(2005 or 2905) and MARS(2006 or 2906), or 12 credit points of Intermediate Geoscience* units. Prohibitions: GEOS3917, MARS3008.
Assessment: One 2 hour exam, report.

Note: * Geoscience is the disciplines of Geography, Geology and Geophysics.

This unit is aimed at geoscientists, biologists, environmental and marine scientists who are interested in the energy resources, particularly in the context of the evolution of coral reefs and how they have been affected by changing short and long-term environmental conditions. This interdisciplinary unit provides an introduction to offshore energy and coral reefs and explores this complex system in relation to geology, biology and ecology as well as the oceanographic setting. The unit acquaints students with tools currently being used in the industry and is underpinned by modern concepts of basin architecture and petroleum economics. Exploration techniques include the principals and practice of electrical logging, source rock evaluation and reservoir quality assessment. The controlling influence of basin architecture is examined in terms of critical factors such as hydrocarbon source, migration and entrapment are used to demonstrate climatic and tectonic control. Students will also become familiar with the factors and processes that control the structure, morphology, sediments and distribution of coral reefs and how they function as part of larger ecosystem. The unit is based on problem solving by groups and is underpinned by closely integrating geology, geophysics, marine science and economics. The theoretical base developed in course work will be used to solve a real-world exploration case study, using petroleum industry techniques and by simulating an economic competitive environment. The unit will include a 5 day field trip to the Great Barrier Reef. Students will be required to meet associated travel and accommodation costs.

**GEOS3018 Rivers: Science, Policy and Management**

Credit points: 6
Teacher/Coordinator: Dr Mel Neave.

Session: Semester 1 Classes: Two 1 hour lectures, one 1 hour tutorial, two 4 hour practicals per week. 
Prerequisites: 24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study) or (MARS2005 or MARS2905) and (MARS2006 or MARS2906).
Prohibitions: GEOS3918
Assessment: One 2 hour exam, two 1500 word essays.

The unit of study is concerned with understanding the functioning of river catchments from both natural science and social science perspectives, at a variety of scales. The catchment as a morphodynamic process-response system is addressed with an emphasis on the relationships between processes and landform entities. Similarly, relationships within social, economic, and political systems are explored within the catchment context, with particular emphasis on the interactions between the social system and bio-physical system. Empirical context for the unit will primarily be
drawn from the Murray-Darling, Mekong, and Hawkesbury-Nepean catchments. Fieldwork in the latter is integral to the unit of study.

Textbooks

GEOS3511
Understanding Australia’s Regions
Credit points: 6
Teacher/Coordinator: Dr Bill Pritchard
Session: Semester 1
Classes: 2 one hour lectures plus 2 hours of tutorials including on-line participation and one 2 hour practical per week.
Prerequisites: 24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study - one of GEOG2311, GEOG2321, GEOG2411, GEOG2421, GEOG2511, GEOG2521, GEOG2621, GEOG2711, GEOG2721, GEOG2113, GEOG2121, GEOG2122, GEOG2124, GEOG2131, GEOG2132, GEOG2911, GEOG2912, GEOG2921, GEOG2922, GEOG2924
Prohibitions: GEOG3911
Assessment: One 2 hour exam; 2000 word essay, tutorial papers, fieldtrip or alternative report.

Regional difference in Australia is becoming more acute. This has major implications for the life chances and economic prospects of people across Australia. Thus unit of study examines these issues, using extensive case study material and introducing students to new approaches in regional development theory to account for and explain this state of affairs. Specific topics to be addressed include the concept of the triple bottom line, the future of family farming, population change across Australia, Indigenous rights over land, and how rural Australia fits within our ‘national imagination’. This unit provides students with a solid grounding for graduate employment or further studies in the field of regional development.

Textbooks

GEOS3512
Contemporary Global Geographies
Credit points: 6
Teacher/Coordinator: A/Prof Philip Hirschi
Session: Semester 1
Classes: One 2 hour lecture, one hour tutorial, one 2 hour practical per week.
Prerequisites: 6 credit points of Intermediate units of study in Geography.
Prohibitions: GEOG3912
Assessment: One 2 hour exam, one 2000 word essays, one 3000 word practical report, tutorial participation

This unit of study provides students with detailed exposure to contemporary thematic areas of human geography research. It seeks to apply the conceptual material introduced in intermediate human geography units of study to ‘real-life’ research problems, as a platform for engaging students with research issues, frameworks, conceptual debates, methods, and problem-solving techniques. In 2007, this unit of study examines thematic and regional geographies of environment and development in the Asia-Pacific region. It also provides experience of dealing with issues around multi-stakeholder negotiation, natural resource management and development decision making. The unit is "hands-on", framed around an award-winning electronic simulation/role play exercise (eSim). Using past and current research by human geography academic staff in the School of Geosciences, the unit engages students with research issues, frameworks, conceptual debates, methods, and problem-solving techniques. Specifically, the unit focuses on multiple issues around environment and development in the Mekong region of Southeast Asia. Lectures and tutorials cover relevant conceptual and methodological issues related to research on this subject area, including that of the Australian Mekong Resource Centre (www.mekong.es.usyd.edu.au). ^ The eSim requires more hours over fewer weeks. The Unit will be completed in nine weeks of the semester. ** The essay and practical reports will consist of shorter modular submissions through the eSim

GEOS3522
Cities and Citizenship
Credit points: 6
Teacher/Coordinator: Dr Kurt Iveson
Session: Semester 2
Classes: One 2 hour lecture, one 1 hour tutorial and one 2 hour practical per week.
Prerequisites: 6 credit points of intermediate geography.
Prohibitions: GEOG3203, GEOG3292
Assessment: One 2 hour exam, one 2000 word essay, one 3000 word practical report, tutorial participation

What does it mean to be a ‘citizen’, and what has this got to do with cities? This module explores the urban dimension of contests over the meaning of citizenship. The first half of the module will consider historical configurations of urban citizenship, from the Greek city-states of antiquity through to imperial, colonial and industrial cities. The second half of the module will then focus on contemporary globalising cities. A series of case studies will consider the production of new configurations of urban citizenship across a range of cities in the world, looking at issues such as: asylum-seekers and the city; children and the city; homelessness in the city; ‘cultural jamming’ and new forms of urban protest; trans-national social movements. The module will involve a substantial practical component, encouraging students to draw on their own experiences of city life to reflect on the meanings of citizenship.

GEOS3053
Asia-Pacific Field School-Assessment A
Credit points: 6
Teacher/Coordinator: A/Prof Phil Hirschi
Session: S1
Intensive Classes: Five weeks intensive. Eight modules of 3 lectures each; ten full days’ equivalent fieldwork; 20 hours small group work.
Prerequisites: 6 credit points of Intermediate units of study in Geography.
Corequisites: GEOG3054
Prohibitions: GEOG3201, GEOG3953
Assessment: One tutorial paper, one extended field report.
Note: Department permission required for enrolment.
Note: Students must contact the unit coordinator no later than the end of June in the year before taking this Unit.

The unit of study can be taken only in coincidence with GEOS 3054 and with prior permission from the unit of study coordinator. It constitutes a Field School run over a five-week period in January-February, prior to the commencement of the semester. In 2006 the Field School will be held in Thailand, Laos and Viet Nam. In other years it may be held in the South Pacific (Vanuatu and Fiji). It is run in close association with local universities, whose staff and students participate in some components of the course. It focuses on environmental and development issues in the context of rapid social change. Places are limited, and students interested in the 2007 Field School should indicate expression of interest to jconnell@mail.usyd.edu.au before the end of June 2006.

GEOS3054
Asia-Pacific Field School-Assessment B
Credit points: 6
Teacher/Coordinator: A/Prof Phil Hirschi
Session: S1
Intensive Classes: Five weeks intensive. Eight modules of 3 lectures each; ten full days’ equivalent fieldwork; 20 hours small group work.
Prerequisites: 6 credit points of Intermediate units of study in Geography.
Corequisites: GEOG3053
Prohibitions: GEOG3201, GEOG3954
Assessment: Two tutorial papers, one exam.
Note: Department permission required for enrolment.
Note: Students must contact the unit coordinator no later than the end of June in the year before taking this Unit.

The unit of study can be taken only in coincidence with GEOS 3053 and with prior permission from the unit of study coordinator. It constitutes a Field School run over a five-week period in January-February, prior to the commencement of the semester. In 2006 the Field School will be held in Thailand, Laos and Viet Nam. In other years it may be held in the South Pacific (Vanuatu and Fiji). It is run in close association with local universities, whose staff and students participate in some components of the course. It focuses on sustainability, focusing on the ways we manage urban regions. This involves discussion of topics including utopian visions for cities, urban history, ecological footprint analysis, bioregionalism, transport options, urban form and urban policy, with reference to sustainable futures. The unit of study looks at different Australian cities and includes practical work on a current sustainability issue in Sydney.
This unit has the same objectives as GEOS3008 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students that elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week prior to the field camp which is usually in the break between semester 1 and 2. This unit of study may be taken as part of the BSc (Advanced).

Advanced students will complete the same core lecture material as for GEOS3009, but will carry out more challenging projects, practicals, assignments and tutorials.

GEOS3914 GIS in Coastal Management (Advanced)

Credit points: 6 Teacher/Coordinator: Prof Andy Short & Dr Michael Hughes.
Session: Semester 2 Classes: Two hours of lectures, one 3 hour practical per week comprising one 1 hour practical demonstration and one 2 hour practical.
Prerequisites: Distinction average in 12 credit points of Intermediate geography or geology units or 12 credit points of Intermediate marine science units.
Prohibitions: GEOS3014, MARS3104 Assessment: One 2 hour exam, two project reports, biweekly progress quizzes.
Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEOS3014, but will carry out more challenging projects, practicals, assignments and tutorials.

GEOS3915 Environmental Geomorphology (Advanced)

Credit points: 6 Teacher/Coordinator: A/Prof Deirdre Dragovich & Dr Stephen Gale.
Session: Semester 2 Classes: Three 1 hour lectures, two 3 hour practicals per week.
Prerequisites: Distinction average in 24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units.
Prohibitions: GEOS3015 Assessment: One 2 hour exam, two 1500 word essays, prac and field reports.
Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEOS3015, but will carry out more challenging projects, practicals, and field reports.

GEOS3916 Seafloor Processing and Imaging (Adv)

Credit points: 6 Teacher/Coordinator: A/Prof Dietmar Muller, Dr Julie Dickinson.
Session: Semester 2 Classes: Four 1 hour lectures and practicals per week, one-day excursion.
Prerequisites: Distinction average in 12 credit points of Intermediate Geoscience or (one of MARS2005 & MARS2905) and (one of MARS2006 & MARS2906) Assessment: One 2 hour theory exam, class work.
Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEOS3016, but will carry out more challenging projects, practicals, assignments and tutorials.
10. Undergraduate units of study

GEOS3917
Global Energy Exploration (Advanced)
Credit points: 6
Teacher/Coordinator: Prof Peter Davies (Coordinator), Dr Gary Betteridge (Session: Semester 1 Classes: 1 hour lecture, one 2 hour tutorial per week, excursion. Prerequisites: Distinction average in Intermediate Geoscience units of study. Prohibitions: GEOS3517, MARS3008 Assessment: Fieldwork, 1 hour exam. Note: *Geoscience is the discipline of Geography, Geology and Geophysics. There are a limited number of places available at this field school.

This unit has the same objectives as GEOS3107 and is suitable for students who wish to pursue aspects of the subject in greater depth. Entry is restricted and selection is made from the applicants on the basis of their performance to date. Students who elect to take this unit will participate in alternatives to some aspects of the standard unit and will be required to pursue independent work to meet unit objectives. Specific details for this unit of study will be announced in meetings with students in week 1 of semester. This unit of study may be taken as part of the BSc (Advanced).

GEOS3918
Rivers: Science and Management (Adv)
Credit points: 6
Teacher/Coordinator: Dr Melissa Neave (Session: Semester 1 Classes: 1 hour lecture, 1 hour tutorial, 2 hour practical per week, fieldwork. Prerequisites: Distinction average in (24 credit points of Intermediate units of study including 6 credit points of Intermediate Geography units of study) or (MARS2005 or MARS2905) and (MARS2006 or MARS2906)). Prohibitions: GEOS3018 Assessment: One 2 hour exam, two 1500 word essays.

Advanced students will complete the same core lecture material as for GEOS3018, but will carry out more challenging projects, practicals, assignments and tutorials.

GEOS3919
Understanding Australia's Regions (Adv)
Credit points: 6
Teacher/Coordinator: Dr Bill Pritchard (Session: Semester 1 Classes: 2 hour lecture, 2 hour tutorial, 4 week practicals per week. Prerequisites: Distinction average in 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study - one of GEOG2311, GEOG2321, GEOG2411, GEOG2412, GEOG2511, GEOG2521, GEOG2522, GEOG2521, GEOG2522, GEOS2112, GEOS2113, GEOS2121, GEOS2122, GEOS2124, GEOS2911, GEOS2912, GEOS2921, GEOS2922, GEOS2924 Prohibitions: GEOS3511 Assessment: One 2 hour exam; 2000 word essay, tutorial papers, fieldtrip or alternative report.

Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEO3511, but will carry out more challenging projects, practicals, assignments and tutorials.

Textbooks

GEOS3912
Contemporary Global Geographies (Adv)
Credit points: 6
Session: Semester 1 Classes: One 2 hour lecture, one 1 hour tutorial, one 2 hour practical per week. Prerequisites: Distinction in 6 credit points of Intermediate units of study in Geography. Prohibitions: GEOS3512 Assessment: One 2 hour exam, 2000 word essay, tutorial papers, prac reports.

Note: Department permission required for enrolment.

Advanced students will complete the same core lecture material as for GEOS3512, but will carry out more challenging projects, practicals, assignments and tutorials.

GEOG3921
Sustainable Cities (Adv)
Credit points: 6
Teacher/Coordinator: Dr Phil McManus Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical/tutorial per week. Prerequisites: Distinction average 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. Prohibitions: GEOG3521, GEOG3502 Assessment: One 2 hour exam; 2000 word essay, tutorial papers, practical reports.

Advanced students will complete the same core lecture material as for GEOS3521, but will carry out more challenging projects, practicals, assignments and tutorials.

GEOS3922
Cities and Citizenship (Advanced)
Credit points: 6
Teacher/Coordinator: Dr Kurt Iveson Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour practical per week. Prerequisites: Distinction average in 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. Prohibitions: GEOS3522 Assessment: One 2 hour exam; e-Sim assignments, tutorial papers.

Advanced students will complete the same core lecture material as for GEOS3022, but will carry out more challenging projects, assignments and tutorials.

GEOS3953
Asia-Pacific Field School-A (Adv)
Credit points: 6
Session: S1 Intensive Classes: Five weeks intensive, eight modules of 3 lectures each; 10 full days' equivalent fieldwork; 20 hours small group work. Prerequisites: Distinction average in 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. Corequisites: GEOS3954 Prohibitions: GEOS3053 Assessment: Fieldwork reports.

Note: Department permission required for enrolment.

Note: Students must contact the unit coordinator no later than the end of June in the year before taking this Unit.

The unit of study can be taken only in coincidence with GEOS3954 and with prior permission from the unit of study coordinator. Advanced students will carry out more challenging fieldwork reports.

GEOS3954
Asia-Pacific Field School-B (Adv)
Credit points: 6
Teacher/Coordinator: A/Prof Phil Hirsch. Session: S1 Intensive Classes: Five weeks intensive, eight modules of 3 lectures each; 10 full days' equivalent fieldwork; 20 hours small group work. Prerequisites: Distinction average in 24 credit points of Intermediate Units of study including 6 credit points of Intermediate Geography units of study. Corequisites: GEOS3953 Prohibitions: GEOS3054 Assessment: Fieldwork reports.

Note: Department permission required for enrolment.

Note: Students must contact the unit coordinator no later than the end of June in the year before taking this Unit.

The unit of study can be taken only in coincidence with GEOS3953 and with prior permission from the unit of study coordinator. Advanced students will carry out more challenging fieldwork reports.

Geography or Geology & Geophysics Honours
Offered February and July. Information sessions about Geography or Geology & Geophysics Honours are held for interested third year students during Second Semester. Students contemplating Honours in their fourth year should consider possible thesis topics and discuss these with potential staff supervisors. Entry into fourth year Honours will require completion of units in Intermediate and Senior Geoscience units (to be passed at the level of credit or better) and a satisfactory WAM. In some years when the number of applicants exceeds resources (availability of supervisors, laboratory space etc.) offers will be made according to academic merit. Students will be notified in January of their formal acceptance into the Honours program. Honours students are required to undertake formal coursework during their first semester and to participate in seminars throughout the year as arranged. They will be required to study original problems, working as appropriate in the field, the laboratory, libraries, and in some instances in conjunction with other university or government departments. A dissertation of not more than 20,000 words must be submitted during the second semester, followed by an examination that may include both written and oral work. Further details relating to Geography Honours are available from Dr. Mel Neave (mrneave@geosci.usyd.edu.au) Further details of Geology and Geophysics Honours are available from Dr. Michael Hughes (michaelh@mail.usyd.edu.au)
Geology and Geophysics Postgraduate Study
Details concerning fields of postgraduate study in Geology and Geophysics may be obtained from Dr Derek Wyman or the Head of School. Details concerning Geography may be obtained from A/Prof Deirdre Dragovich or the Head of School.

History and Philosophy of Science
History and Philosophy of Science allows students to enrich their knowledge of science and stand back from the specialised concerns of their other subjects by gaining a broader perspective on what science is, how it acquired its current form and how it fits into contemporary society. HPS is particularly relevant for students hoping to make careers in science policy, science administration, science education and science reporting. Any student with a genuine interest in science will derive benefit from study in HPS.

Course Advice
An advisor will be available in the Unit for History and Philosophy of Science during the enrolment period. The Unit is located on Level 4 of the Carslaw Building. More detailed information on courses is available either in a handbook from the Unit office or electronically via the unit website http://www.usyd.edu.au/hps. The Unit for History and Philosophy of Science offers the Junior unit of study Bioethics (HPSC1000), which analyses and discusses the ethical concerns raised by scientific accomplishments in modern society. Students interested in related topics should consider taking the unit Concepts and Issues in Physical Science (PHYS1600) offered in the School of Physics. This unit serves as useful background for further studies in HPS and is offered as an Arts unit for all students, including students enrolled in the Faculty of Science.

Junior units of study

**HPSC1000 Bioethics**

**Credit points:** 6
**Teacher/Coordinator:** Dr Rachel Ankeny
**Session:** Semester 1
**Classes:** Three 1 hour lectures and one 1 hour tutorial per week.
**Prohibitions:** HPSC1900
**Assessment:** Short essays, tutorial work, tests
**Note:** This Junior unit of study is highly recommended to Intermediate and Senior Life Sciences students.

Science has given us nearly infinite possibilities for controlling life. Scientists probe the origins of life through research with stem cells and embryos. To unlock the secrets of disease, biomedicine conducts cruel experiments on animals. GM crops are presented as the answer to hunger. Organ transplantation is almost routine. The international traffic in human body parts and tissues is thriving. The concept of brain death makes harvesting organs ethically more acceptable. It may also result in fundamental changes in our ideas about life. Science has provided new ways of controlling and manipulating life and death. As a consequence, difficult ethical questions are raised in increasingly complex cultural and social environments. This course will discuss major issues in the ethics of biology and medicine, from gene modification to Dolly the sheep. This unit will be introductory, but a small number of topical issues will be studied in depth. No scientific background beyond School Certificate level will be assumed.

**Textbooks**

**Course reader**

**HPSC1900 Bioethics (Advanced)**

**Credit points:** 6
**Teacher/Coordinator:** Dr Rachel Ankeny
**Session:** Semester 1
**Classes:** Three 1 hour lectures, one 1 hour tutorial per week.
**Prohibitions:** HPSC1000
**Assessment:** Tutorial work, essays, exam, tutorial participation.
**Note:** Enrolment in this unit is limited, and will be on a first-come first-served basis.

The topics covered by HPSC1000 - Bioethics will be treated in more depth, in a special tutorial set aside for Advanced students.

Intermediate units of study

There are two Intermediate units of study offered by the Unit for History and Philosophy of Science. They provide a broad background in the history and the philosophy of science, and a solid background for students in arts and science who wish to acquaint themselves with principles and methods in the history and philosophy of science. For students who wish to major in HPS, they provide essential background knowledge.

**HPSC2100 The Birth of Modern Science**

**Credit points:** 6
**Teacher/Coordinator:** Dr Ofer Gal
**Session:** Semester 1
**Classes:** Three 1 hour lectures and one tutorial per week.
**Prerequisites:** 24 credit points of Junior units of study
**Prohibitions:** HPSC2001, HPSC2900
**Assessment:** Short essays, tutorial work, tests.

Modern culture is a culture of science. Modern Western science is the outcome of a historical process of 2,500 years. In this course we investigate how Western knowledge-theoretical, technological and medical-acquired the characteristics of modern science: its specific social structure, contents, values and methods. We will look at some primary chapters of this process, from antiquity to the end of the seventeenth century, and try to understand their implications to understanding contemporary science in its culture. Special emphasis will be given to the scientific revolution of the seventeenth century, which is often described as the most important period in the history of science and as one of the most vital stages in human intellectual history.

**Course reader**

**HPSC2101 What Is This Thing Called Science?**

**Credit points:** 6
**Teacher/Coordinator:** Dr Rachel Ankeny and HPS staff
**Session:** Semester 2, Summer Main
**Classes:** Three 1 hour lectures and one 1 hour tutorial per week.
**Prohibitions:** HPSC2001, HPSC2901
**Assessment:** Short essays, tutorial work, tests.

Philosophers of science aim to define what distinguishes creationism from evolutionary theory, or astrology from astronomy. They give reasons why we can believe that today's theories are improvements over those that preceded them and how we know that what we see and do in scientific practice reflects the nature of reality. This course critically examines the most important attempts to define the scientific method, to draw a line dividing science from non-science, and to justify the high status generally accorded to scientific knowledge. The philosophies of science studied include Karl Popper's idea that truly scientific theories are falsifiable, Thomas Kuhn's proposal that science consists of a series of paradigms separated by scientific revolutions; and Feyerabend's anarchist claim that there are no objective criteria by which science can be distinguished from pseudo-science. This Unit of Study also explores contemporary theories about the nature of science and explores ideas about the nature of the experimental method and concepts such as underdetermination, the nature of scientific explanation, theory confirmation, realism, the role of social values in science, sociological approaches to understanding science, and the nature of scientific change.

**HPSC2900 The Birth of Modern Science (Advanced)**

**Credit points:** 6
**Teacher/Coordinator:** Dr Ofer Gal
**Session:** Semester 1
**Classes:** Three 1 hour lectures and one 1 hour tutorial per week.
**Prerequisites:** Enrolment in the Talented Student Program or 24 credit points of Junior study with a Distinction average
**Prohibitions:** HPSC2002, HPSC2900
**Assessment:** Short essays, tutorial work, tests.
**Note:** Enrolment in this unit is limited, and will be on a first-come, first-served basis.
The topics covered in 'The Birth of Modern Science' will be covered in
more depth, in a special tutorial set aside for advanced students.

Alan F. Chalmers. What Is This Thing Called Science? 3rd edition. Course reader

Senior units of study
Students wishing to major in History and Philosophy of Science in either the BSc, BA or LibStSt must take 24 credit points from the following Senior units of study. Our Intermediate courses provide students with a background in the history and philosophy of science. HPSC3002 Science and Society, provides students with an essential background in the sociology of science. This unit of study is compulsory for majors in history and philosophy of science.

HPSC3002
History of Biological/Medical Sciences
Credit points: 6 Teacher/Coordinator: Dr Hans Pols or HPS staff
Session: Semester 1 Classes: Two 1 hour lectures and two 1 hour tutorials per week. Prerequisites: At least 8 credit points of Intermediate HPSC units or Credit or better in at least 4 credit points of Intermediate HPSC units, and at least 24 credit points of Intermediate or Senior units. Assumed knowledge: HPSC (2001 and 2002) or HPSC (2100 and 2101). Assessment: Short essays, presentation, tutorial work, final essay.

Throughout the ages people have been born, have died, and in between have lived in various stages of sickness or health. In this unit of study we shall look at how these states of being were perceived in different times and places throughout history, while at the same time noting the increasing medicalisation of everyday life, together with the irony that the "miracles" of modern medicine appear to have created, and you can't believe that it is not what it claims to be: the empirically-determined truth about the world. In this unit, we will have a close look at some of these ships in bottles and examine how they got there. When observing science-in-the-making, rather than the finished product, the factors that influence science become much clearer. We will introduce some of the most exciting and innovative ideas about what science is and how it works by examining the sociological and anthropological approaches to science that have become the basis for research in the social studies of science, technology, and medicine, including: the norms of science, scientists' images of themselves, the boundaries between science and other subjects, the rhetoric of scientific writing, laboratory work, science museums and science in the media.

HPSC3016
The Scientific Revolution
Credit points: 6 Teacher/Coordinator: Dr Ofer Gal
Session: Semester 2 Classes: Two 1 hour lectures and two 1 hour tutorials per week. Individual student consultation as required. Prerequisites: At least 8 credit points of Intermediate HPSC units or Credit or better in at least 4 credit points of Intermediate HPSC units, and at least 24 credit points of Intermediate or Senior units. Prohibitions: HPSC3001, HPSC3006. Assumed knowledge: HPSC (2100 and 2101) or HPSC (2001 and 2002). Assessment: Take-home tests, short essays, tutorial participation.
Note: This unit will not be offered every year.

Modern Western science has a number of characteristics which distinguish it from other scientific cultures. It ascribes its tremendous success to sophisticated experiments and meticulous observation. It understands the universe in terms of tiny particles in motion and the forces between them. It is characterised by high-powered mathematical theorizing and the rejection of any intention, value or purpose in Nature. Many of these characteristics were shaped in the 17th century, during the so-called scientific revolution. We will consider them from an integrated historical-philosophical perspective, paying special attention to the intellectual motivations of the canonical figures of this revolution and the cultural context in which they operated. Topics will include: experimentation and instrumentation, clocks, mechanistic philosophy, and the changing role of mathematics.

HPSC3022
Science and Society
Credit points: 6 Teacher/Coordinator: Dr Hans Pols or HPS staff
Session: Semester 1 Classes: Two 1 hour lectures and two 1 hour tutorials per week. Prerequisites: At least 8 credit points of Intermediate HPSC units or Credit or better in at least 4 credit points of Intermediate HPSC units, and at least 24 credit points of Intermediate or Senior units. Prohibitions: HPSC3003. Assumed knowledge: HPSC2100 and HPSC2101. Assessment: Short essays, tutorial work, presentation.
Note: This unit is a requirement for HPS majors.

Science has become an essential element of Western societies. It is impossible to imagine our lives today without the achievements of science, technology, and medicine. Many scientists and laypeople think that scientific knowledge transcends political, social, cultural, and economic conditions. Sociologists of science think otherwise. In this unit, we will investigate the nature of science, the position of science in society, and the internal dynamics of science. Sociologists of science have compared scientific knowledge to a ship in a bottle: if you see the finished product, you can't understand how it came about, and you can't believe that it is not what it claims to be: the empirically-determined truth about the world. In this unit, we will have a close look at some of these ships in bottles and examine how they got there. When observing science-in-the-making, rather than the finished product, the factors that influence science become much clearer. We will introduce some of the most exciting and innovative ideas about what science is and how it works by examining the sociological and anthropological approaches to science that have become the basis for research in the social studies of science, technology, and medicine, including: the norms of science, scientists' images of themselves, the boundaries between science and other subjects, the rhetoric of scientific writing, laboratory work, science museums and science in the media.

HPSC3023
Psychology & Psychiatry: History &Phil
Credit points: 6 Teacher/Coordinator: Dr Hans Pols and Dr Fiona Hibberd
Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour tutorial per week. Prerequisites: At least 8 credit points of Intermediate HPSC Units of study) OR (a CR or above in one HPSC Intermediate Unit of Study) OR (12 intermediate credit points in psychology). Prohibitions: PSYCH3202. Assumed knowledge: Basic knowledge about the history of modern science as taught in HPSC2100 AND the principles of philosophy of science as taught in HPSC2101 AND knowledge of the various sub-disciplines within Psychology. Assessment: Take-home essays (2000 words), take-home exams, tutorial work.

This course examines one of the most interesting developments in the history of science: it deals with the sciences that make human beings their object of study. We will examine the ways in which psychologists and psychiatrists have investigated human nature, what kinds of experimental approaches they have developed to that end, the major controversies in this field, and the basic philosophical assumptions that have been made in the sciences of human nature. We investigate the developments of psychological theories and investigative methods as well as the development of psychiatric theory, treatment methods, and institutions.

HPSC3024
Science and Ethics
Credit points: 6 Teacher/Coordinator: Dr Rachel Ankeny
Session: Semester 2 Classes: Two 1 hour lectures and two 1 hour tutorials per week.

Is science really neutral, impartial, and objective? Should it be? Or should it tell us what is right, good, fair, or just? Does scientific progress imply social progress and benefits for humanity? Are scientists responsible when their discoveries are used for evil purposes? Should the publication of dangerous discoveries be prevented? What if the same discoveries might be used for beneficial purposes as well? In this unit, we give study possible answers to these questions by examining the relationships between science and human values. We consider the extent to which science is, or should be, influenced by the values of scientists and the societies in which they operate. And we question the extent to which science promotes or threatens the good of mankind. Issues such as these are pursued via philosophical examination of major historical episodes involving weapons of mass destruction, Nazi medicine, cloning, mind control in neuroscience, human experimentation and censorship. We also examine contemporary developments in genetics and brain science. This unit is for science and non-science students alike. It will be of interest to anyone concerned about the social responsibilities of scientists, matters of science policy, and relationships between science and society.

History and Philosophy of science Honours
An Honours course in HPS is available to students of sufficient merit who have satisfied the requirements for the degree of BSc or BA or BLibSt with a major in HPS or another relevant area and to students who have satisfied the requirements for the degree of BMedSc including the HPS options in the second and third years of study. The Honours course consists of 48 points of Honours level units of study, which must include HPSC4201 HPS Research Project 1, HPSC4202 HPS Research Project 2, HPSC4203 HPS Research Project 3 and HPSC4204 HPS Research Project 4. In their final semester all students must also enrol in the zero credit point non-assessable unit HPSC4999. Students intending to proceed to Honours or to enrol in the Graduate Diploma in Science (HPS) are strongly advised to contact the Unit towards the end of the previous academic year to discuss thesis topic and supervision. Note: Honours level (4000) Units of Study are available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. A number of our Honours-level courses are also open to students in the medical humanities and liberal studies.

HPSC4101
Philosophy of Science
Credit points: 6 Teacher/Coordinator: Dr Ofer Gal Session: Semester 1 Classes: One 2 hour seminar per week, individual consultation. Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. Assessment: Written assignments, seminar participation. Note: Department permission required for enrolment.

The success of science in enabling us to manipulate the natural world has been so surprising, so often, that it has caused many individuals to revise a large part of their pre-scientific philosophical and religious consensus. Something very important is going on, and a number of fascinating philosophical topics emerge when we try to analyse what it is. Working backwards from the success of an epistemological enterprise offers a fruitful way to do philosophy, and, reciprocally, our philosophical insights help to clarify the contentious question of what it means to claim that science is successful. This unit investigates the relationships between scientific theories and evidence, and the relationships between scientific theories. Participants will have an opportunity to relate the successes and failures of specific sciences to contemporary philosophical debates. Each week the seminar will discuss a piece of philosophical theory in the light of examples from particular sciences. Technical topics will be covered, but very little background knowledge will be assumed.

Textbooks

HPSC4102
History of Science
Credit points: 6 Teacher/Coordinator: HPS Staff Session: Semester 1, Semester 2 Classes: One 2 hour seminar per week. Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. Assessment: Essays, seminar participation. Note: Department permission required for enrolment.

This unit explores major episodes in the history of science as well as introducing students to historiographic methods. Special attention is paid to developing practical skills in the history and philosophy of science.

Course reader

HPSC4103
Sociology of Science
Credit points: 6 Teacher/Coordinator: Dr Hans Pols Session: Semester 2 Classes: One 2 hour seminar per week, individual consultation. Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. Assessment: Essays, fieldwork report, seminar participation. Note: Department permission required for enrolment.

This unit explores recent approaches in the social studies of scientific knowledge. Students evaluate various sociological approaches by conducting their own research on topics relevant to their own major thesis. The unit starts with an overview of the development of history and philosophy of science since 1945, to put the emergence of the sociology of science into perspective, before moving on to a selection of readings from the field. Topics will include: the strong program critique of traditional philosophy of science, the sociology of technology, the impact of feminism on the study of science, and the actor-network approach developed by Bruno Latour and Michel Callon.

Course reader

HPSC4104
Recent Topics in HPS
Credit points: 6 Teacher/Coordinator: HPS Staff Session: Semester 1, Semester 2 Classes: One 2 hour seminar per week, individual consultation. Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. Assessment: Essays, seminar participation. Note: Department permission required for enrolment.

An examination of one area of the contemporary literature in the history and philosophy of science. Special attention will be paid to development of research skills in the history and philosophy of science.

Textbooks
Course reader

HPSC4105
HPS Research Methods
Credit points: 6 Teacher/Coordinator: Dr Rachel Ankeny Session: Semester 1, Semester 2 Classes: One 2 hour seminar per week, individual consultation. Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission. Assessment: Literature review, archival research project, seminar participation mark, short essays. Note: Department permission required for enrolment.

Adopting a seminar style, this unit provides students with an advanced knowledge of the skills necessarily to conduct their own original research in the sociology, history and philosophy of science. Participants will be given a weekly set of core readings, and specialists
both from within the Unit and from outside will present their views on the topic in question. This presentation will form the basis for a discussion involving the students, the academic members of the Unit, and invited speakers. Topics will include: the use of case studies in the philosophy of science, how to conduct oral history projects, institutional history, and sociological methodology.

### HPSC4108

**Core topics:** History & Philosophy of Sci

**Credit points:** 6

**Teacher/Coordinator:** HPS Staff

**Session:** Semester 1, Semester 2

**Classes:** One 2 hour seminar per week. **Prerequisites:** Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission **Prohibitions:** Not available to students who have completed a major in History and Philosophy of Science or an equivalent program of study at another institution. **Assessment:** Essays, seminar presentations, seminar participation mark. **Note:** Department permission required for enrolment.

An intensive reading course, supported by discussion seminars, in the main figures and events of the 'Scientific Revolution' of the 16th to 18th centuries, in the leading historiographic interpretations of the scientific revolution and in the use of episodes in these scientific revolutions as evidence for the philosophies of science of Karl Popper, Imre Lakatos, Thomas Kuhn and contemporary authors.

**Textbooks**

**Course reader**

### HPSC4201

**HPS Research Project 1**

**Credit points:** 6

**Teacher/Coordinator:** HPS Staff

**Session:** Semester 1, Semester 2

**Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Note:** Department permission required for enrolment.

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4202

**HPS Research Project 2**

**Credit points:** 6

**Teacher/Coordinator:** HPS Staff

**Session:** Semester 1, Semester 2

**Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106 and HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Note:** Department permission required for enrolment.

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4203

**HPS Research Project 3**

**Credit points:** 6

**Teacher/Coordinator:** HPS Staff

**Session:** Semester 1, Semester 2

**Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Note:** Department permission required for enrolment.

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4204

**HPS Research Project 4**

**Credit points:** 6

**Teacher/Coordinator:** HPS Staff

**Session:** Semester 1, Semester 2

**Classes:** Weekly individual supervision, fortnightly 90-minute research seminars. **Prerequisites:** Available only to students admitted to HPS Honours and Graduate Diploma or Certificate in Science (History and Philosophy of Science). **Prohibitions:** HPSC4106, HPSC4107 **Assumed knowledge:** HPSC (2001 and 2002) or HPSC (2100 and 2101) **Assessment:** HPSC4201, HPSC4202, HPSC4203 and HPSC4204 are jointly assessed by a research thesis of up to 15,000 words. **Note:** Department permission required for enrolment.

Research into a topic in history, philosophy or sociology of science under the supervision of one or more members of the HPS staff.

### HPSC4999

**History & Philosophy of Science Honours**

**Session:** Semester 1, Semester 2

**Prerequisites:** Available only to students admitted to HPS Honours. **Note:** Department permission required for enrolment.

All students in History and Philosophy of Science Honours must enrol in this non-assessable unit of study in their final semester.

### Immunobiology major

Immunology in the Discipline of Infectious Diseases and Immunology administers the Immunobiology Major. Our location is on Level 6, Blackburn Building D06. Further information from Helen Briscoe (phone: (02) 9351 7308, email: hbriscoe@med.usyd.edu.au). A major in Immunobiology requires successful completion of 12 credit points of Senior study in Immunology plus 12 credit points from the elective Senior units of study in Biochemistry, Biology, Cell Pathology, Molecular Biology and Genetics, Microbiology, Physiology or Virology listed in Table I. Participants in the Immunobiology major will select an accompanying Senior unit according to their particular interest. Concurrent study in the life science disciplines will add a depth of understanding in a particular aspect of immunology. Participants are invited to consult with Helen Briscoe and with elective unit of study co-ordinators before selecting concurrent study units and should note that a unit of study taken as part of the Immunobiology Major cannot count towards a major in another Science discipline area.

### Immunology

Immunology is offered as Introductory Immunology (IMMU2101) at Intermediate level, Molecular and Cellular Immunology (IMMU3102) and Immunology in Human Disease (IMMU3202) at Senior level, and Immunology Honours. Further information can be obtained from Helen Briscoe (phone: (02) 9351 7308, email: hbriscoe@med.usyd.edu.au).

### Immunology intermediate units of study

IMMU2101

**Introductory Immunology**

**Credit points:** 6

**Teacher/Coordinator:** A/Prof Helen Briscoe

**Session:** Semester 1

**Classes:** Two 1 hour lectures per week, one 3 hour tutorial or practical or independent study per week. **Prerequisites:** 24 credit points of Junior units of study from any of the Science discipline areas. **Prohibitions:** IMMU2001, BMED2506, BMED2807 **Assumed knowledge:** Junior Biology and Junior Chemistry. **Assessment:** One 2 hour examination (60%), one 2000 word essay (20%), on-line quizzes and tutorial group presentation (20%) **Note:** This is a prerequisite unit of study for IMMU3102 and IMMU3202. The completion of 6 credit points of MBLG units of study is highly recommended.

This unit of study will provide an overview of the human immune system and essential features of immune responses. The lecture course begins with a study of immunology as a basic research science. This includes the nature of the cells and molecules that recognise antigens and how these cells respond at the cellular and molecular level. Practical / tutorial sessions will introduce the lecture program. Further lectures and self-directed learning sessions will integrate this fundamental information into studies of mechanisms of host defence against infection,
transplantation, and dysfunction of the immune system including allergy, immunodeficiency and autoimmune diseases.

**Textbooks**

Basic Immunology Functions and Disorders of the Immune System. AK Abbas & AH Lichtman. Saunders 2004

**Immunology senior units of study**

**IMMU3102 Molecular and Cellular Immunology**

**Credit points:** 6

**Teacher/Coordinator:** Dr Allison Abendroth

**Session:** Semester 2

**Classes:** 2 Classes: Three 1 hour lectures, one tutorial and one practical per fortnight.

**Prerequisites:** BMED2807 or BMED2506 or IMMU2101 or IMMU2001 and 6cp of Intermediate units of study from Biochemistry, or Biology or Microbiology or Molecular Biology and Genetics or Pharmacology or Physiology.

**Prohibitions:** IMMU3002, BMED3003

**Assumed knowledge:** Intermediate for the duration of the course. This unit directly complements the unit "Immunology in human disease IMMU3202" and students are strongly advised to undertake this study units concurrently.

**Textbooks**

**IMMU3202 Immunology in Human Disease**

**Credit points:** 6

**Teacher/Coordinator:** Dr Allison Abendroth

**Session:** Semester 2

**Classes:** 2 Classes: Three 1 hour lectures, one tutorial and one practical per fortnight.

**Prerequisites:** BMED2807 or BMED2506 or IMMU2101 or IMMU2001 and 6cp of Intermediate units of study from Biochemistry, or Biology or Microbiology or Molecular Biology and Genetics or Pharmacology or Physiology.

**Prohibitions:** IMMU3002, BMED3003

**Assumed knowledge:** Intermediate biochemistry and molecular biology and genetics.

**Assessment:**

 Formal examination: 60% one 2 hour exam. Progressive assessment: 40% includes practical assessment.

**Note:** The completion of 6 CP of MBLG units of study is highly recommended. Concurrent study of IMMU3202 Immunology in Human Disease is strongly recommended.

This study unit builds on the series of lectures that outlined the general properties of the immune system, effector lymphocytes and their functions, delivered in the core courses, IMMU2101 - Introductory Immunology and BMED2807 - Microbes & Body Defences (formerly IMMU2001 and BMED2506). In this unit the molecular and cellular aspects of the immune system are investigated in detail. We emphasise fundamental concepts to provide a scientific basis for studies of the coordinated and regulated immune responses that lead to elimination of infectious organisms. Guest lectures from research scientists eminent in particular branches of immunological research are a special feature of the course. These provide challenging information from the forefront of research that will enable the student to become aware of the many components that come under the broad heading "Immunology". Three lectures (1 hour each) will be given each fortnight: 2 lectures in one week and one lecture the following week, for the duration of the course. This unit directly complements the unit "Immunology in human disease IMMU3202" and students are strongly advised to undertake this study units concurrently.

**Information Technologies**

**Information Technologies in the Bachelor of Science degree**

The School of Information Technologies administers the disciplines of Information Systems and Computer Science, each of which is available as a major in the Bachelor of Science degree.

**Computer Science**

Computer Science is the scientific discipline which has grown out of the use of digital computers to manage and transform information. Computer Science is concerned with the design of computers, their applications in science, government and business, and the formal and theoretical properties which can be shown to characterise these applications. Teaching in Computer Science covers a diversity of topics such as Software Development, Networks and Systems, Multimedia Technologies and Principles of Computer Science. The diversity of the discipline is demonstrated by current research interests in the School which include biomedical image processing, parallel and distributed computing, user-adaptive systems and information visualisation. The School has a range of computers and specialised laboratories for its teaching and research. Note that units of study beginning with COMP, MULT, NETS, SOFT and INFO (but not ISYS) can be counted as Computer Science. Each INFO unit may only be
10. Undergraduate units of study

counted to one subject area (either Computer Science or Information Systems, but not both). Students who intend to major in Computer Science should pay particular attention to the prerequisites of each unit of study. Students should note that entry to Honours requires an average of Credit or better in the Senior units of study.

Information Systems

Information Systems studies people and organisations to determine and deliver their technological needs. Hence Information Systems encompasses issues such as strategic planning, system development, system implementation, operational management, end-user needs and education. Information Systems study is related to Computer Science but there is an important distinction in that Information Systems is about the architecture of computer systems and making them work for people, hence people are the focus of attention, whereas much of Computer Science is about developing and improving the performance of computers. The School performs IS research in a number of areas including natural language processing, data mining, knowledge management and workflow methods. Students who wish to complete a major in Information Systems need to appreciate that effective communication and critical analysis are important parts of the curriculum and though taught explicitly in one unit ARIN1000 (or an equivalent unit) are expected to be practised throughout all units of study. Intending Honours students need to complete at least 18 credit points of Information systems units at Senior level. Note that units beginning with both ISYS and INFO codes (but not COMP, MULT, NETS or SOFT) can be counted as Information systems units.

Information Technologies in the BCST, BCST(Adv), BIT degrees

Information on majors for the BCST, BCST(Adv) and BIT degrees may be found in Table 3 and the chapter on the IT degrees.

Other Information

The units of study offered by the School are described briefly below, and more fully in the School’s Handbook which is available from the School Office (Room G71) in the Madsen Building. Students should confirm details of units of study, registration procedures, textbooks, etc., on the School noticeboards and web site www.it.usyd.edu.au. Those in doubt should seek advice from members of the School’s academic staff.

Summer School: January-February

This School offers some units of study in The Sydney Summer School. Consult The Sydney Summer School web site for more information: www.summer.usyd.edu.au/

Computer Science and Information Systems junior units of study

See the School web site www.it.usyd.edu.au for advice on choosing appropriate units of study from this list.

SOFT1001 Software Development 1

Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture, one 2 hour tutorial and one 2 hour practical per week. Prerequisites: SOFT1901, COMP1001, COMP1901, DECO2011 Assumed knowledge: HSC Mathematics Extension 1 Assessment: Written and practical assignments, quizzes, exam.

The unit introduces a structured approach to problem solving using computers. The main emphasis will be to teach students about modular design in programming and software development. Although the unit will use a programming language for teaching, the concepts taught are universal and can be applied through other languages as well.

SOFT1901 Software Development 1 (Adv)

Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture, one 2 hour tutorial and one 2 hour laboratory per week. Prerequisites: SOFT1001, COMP1001, COMP1901 Assumed knowledge: HSC Mathematics Extension 1 Assessment: Written and practical assignments, quizzes, exam. Note: Department permission required for enrolment.

Note: Entry requires departmental permission, except for students in BSc(Adv), BCST(Adv) or BIT degrees

An advanced alternative to SOFT 1001; covers material at an advanced and challenging level. See the description of SOFT 1001 for more information.

SOFT1002 Software Development 2

Credit points: 6 Session: Semester 1, Semester 2 Main Classes: One 2 hour lecture, one 2 hour tutorial and one 3 hour laboratory per week. Prerequisites: SOFT1001, COMP1002, COMP1902, DECO2011 Assessment: Written and practical assignments, quizzes, exam. Note: Students with Credit or above in INFO1903 are encouraged to request special permission to enter this unit.

This unit extends the students’ software development skills in several important directions. It covers a number of advanced features of Java programming such as inheritance and recursion. It deals with important issues in using library classes to manage collections of similar objects. It also provides students with experience in design; that is, in choosing which classes to write to respond to a user’s demands. Design in group work raises special issues of dealing with conflict and misunderstanding between group members.

SOFT1902 Software Development 2 (Adv)

Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture, one 2 hour tutorial and one 3 hour laboratory per week. Prerequisites: Distinction in one of SOFT (1001 or 1901) or COMP (1001 or 1901) Prohibitions: SOFT1002, COMP1002, COMP1902, DECO2011 Assessment: Written and practical assignments, quizzes, exam.

Note: Department permission required for enrolment in the following sessions: Semester 1.

Note: Students with Credit or above in INFO1903 are encouraged to request special permission to enter this unit.

An advanced alternative to SOFT 1002; covers material at an advanced and challenging level. See the description of SOFT 1002 for more information.

INFO1003 Foundations of Information Technology

Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture, one 1 hour tutorial and one 2 hour practical per week. Prohibitions: INFO1000, INF51000, ISYS1003, INFO1903 Assumed knowledge: Basic computer operations. Assessment: Assignments, written exam, prac exam.

In our society computer systems have become a major platform for communication, commerce, education and entertainment. Students, using a systems thinking approach, will undertake meaningful research and authoring tasks using various kinds of software including word processors, spreadsheets, web browsers and databases, in order to understand how hardware, software and human systems support communication, collaboration, modelling and decision-making. Students will be expected to understand how information is structured, linked and flowed in different situations, and to be able to customise an IT environment to streamline or share tasks. In addition, the course will emphasise the importance of documenting decisions and processes, and understanding the many social, ethical, and intellectual property issues that arise when creating and handling information.

INFO1903 Foundations of Information Tech (Adv)

Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and two 1 hour laboratories per week. Prerequisites: UAI at least that for acceptance into BSc(Adv) degree program. Prohibitions: INFO1003, ISYS1003, INFO1000, INF51000 Assumed knowledge: Basic computer operations. Assessment: Practical assignments, quizzes, tutorial contribution, written examination. Note: Department permission required for enrolment.

Analysing empirical information is the cornerstone of many domains, including science, engineering, economics and social science. Graduates in these domains must be able to process, manipulate and present the growing quantities of data effectively. Although computing should play a key role, we rarely exploit the full power of existing or
custom software to efficiently convert data into information and then knowledge. INFO1903 will equip students with the skills and techniques for exploiting data effectively. INFO1903 covers advanced data processing and management, integrating the use of existing productivity software, e.g. spreadsheets and databases, with the development of custom software using the powerful general-purpose Python scripting language. It will focus on skills directly applicable to research in any quantitative domain. The course will also cover presentation of data through written publications and dynamically generated web pages, visual representations and oral presentation skills. The assessment, a semester long project, involves the demonstration of these skills and techniques for processing and presenting data in a choice of domains.

Textbooks
Given the diversity of the material, the main resource for INFO1903 will be the course notes, which will be made available through the University Copy Centre. Additional suggested readings:

Computer Science and Information Systems intermediate units of study
It is important to choose second year subjects appropriately to keep options open for further study. See www.it.usyd.edu.au for advice.

COMP2160 Data Structures
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: COMP(1002 or 1902) or COMP(1002 or 1902) Prohibitions: COMP2111, COMP2811, COMP2002, COMP2902, COMP2860 Assessment: Assignments, 2 hour exam
One of the worst things that can happen when implementing a large software system is to find, after months of hard work, that the underlying design is too inefficient, or is fundamentally flawed. Such situations can often be avoided through careful design using well understood structures, and an analysis of the time complexity and correctness of these designs. This unit includes a formal introduction to commonly used data structures such as lists, stacks, queues, priority queues, search trees, hash tables and graphs. It also covers the analysis of algorithms and all data structures introduced are analysed according to a notion of asymptotic complexity. There will be a programming project in which students will design an algorithmic solution to a problem, analyse its time complexity, and implement it.

COMP2860 Data Structures (Advanced)
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: [SOFT(1002 or 1902) or COMP(1002 or 1902)] and Distinction in one COMP, SOFT or MATH unit. Prohibitions: COMP(2111 or 2811 or 2002 or 2902 or 2160) Assessment: Assignments, one 2 hour exam
An advanced alternative to COMP2160; covers material at an advanced and challenging level. See the description of COMP2160 for more information.

INFO2110 Systems Analysis and Modelling
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture, one 1 hour tutorial and one 2 hour practical per week. Prerequisites: [INFO(1003 or 1903 or 1000) or ISYS1003 or INF5100 or SOFT(1001 or 1901) or COMP(1001 or 1901) or 6 credit points of COSC units of study or DECQ2011] and Distinction in one ISYS, INFO, SOFT or INF5 unit. Prohibitions: INFO (2000 or 2110 or 2900) Assessment: Exam, assignments, tutorial papers
An advanced alternative to INFO2110; covers material at an advanced and challenging level. See the description of INFO2110 for more information.

INFO2820 Database Systems 1 (Advanced)
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture, one 1 hour tutorial and one 2 hour lab per week. Prerequisites: [INFO(1003 or 1903 or 1000) or ISYS1003 or INF5100 or SOFT(1001 or 1901) or COMP(1001 or 1901) or (6 credit points of COSC)] and Distinction in one ISYS, INFO, SOFT or INF5 unit. Prohibitions: INFO (2005 or 2120 or 2905) Assessment: written and practical assignments plus a written exam
This unit of study will provide a comprehensive introduction to database management, SQL query language, and application development using databases. The fundamentals of relational database technology will be covered. Contents: data modelling, relational data model, data normalisation, logical and physical database design, SQL query language, Form-based application development, client server and web-enabled transactions processing systems, and distributed database systems.

ISYS2140 Information Systems
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture, one 1 hour tutorial and one 1 hour practical per week. Prerequisites: [INFO(1003 or 1903 or 1000) or ISYS1003 or INF5100 or SOFT(1001 or 1901) or (6 credit points of COSC)] and Distinction in one ISYS, INFO, SOFT or INF5 unit. Prohibitions: ISYS (2006 or 2007) Assessment: One 2 hours exam, written assignments and Tutorial presentations
This unit of study will provide a comprehensive conceptual and practical introduction to information systems (IS) in contemporary organisations. Content: General Systems Theory; Basic concepts of organisations, systems and information; The role of information systems in operating and managing organisations; How IS and the Internet enables organisations to adopt more competitive business models, including e-Commerce; The technologies that underpin IS; Distributed systems, including security, networking principles, the client server model and how distributed components locate and communicate with each other; The integration of disparate systems both within the organisation and between organisations, including the role of XML; Behavioural, managerial and ethical issues in implementing and managing IS.

Textbooks
In this unit of study we cover elementary methods for developing robust, efficient, and re-usable software. The unit is taught in C, in a Unix environment. Specific coding topics include memory management, the pragmatic aspects of implementing data structures such as lists and hash tables, and managing concurrent threads. Debugging tools and techniques are discussed and common programming errors are considered along with defensive programming techniques to avoid such errors. Emphasis is placed on using common Unix tools to manage aspects of the software construction process, such as version control and regression testing. The subject is taught from a practical engineering viewpoint and it includes a considerable amount of programming practice, using existing tools as building blocks to complete a large-scale task. The unit discusses professionalism issues relevant to a career in software development, including intellectual property in software and employment conditions for programmers.

Computer Science and Information Systems senior units of study

Students are advised that doing less than 24 Senior credit points is not regarded as adequate preparation for a professional career in computing or for further study. Students are advised to balance their workload between semesters. It is important to choose second year subjects appropriately to keep options open for further study. See www.it.usyd.edu.au for advice.

**COMP3608**

**Intro. to Artificial Intelligence (Adv)**

Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 2 hour tutorial per week.  
Prerequisites: 18 crpts of 2000-level units, and Distinction in a COMP, SOFT or MATH unit at 2000-level or above.  
Assessment: Assignments, written exam.

An advanced alternative to COMP3308; covers material at an advanced and challenging level. See the description of COMP3308 for more information.

Textbooks

Prentice Hall, 0-13-080302-2, 2003

**COMP3309**

**Algorithms**

Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 2 hour tutorial per week.  
Prerequisites: COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902).  
Assessment: Assignments, written exam

This unit will discuss techniques of algorithm design and analysis and their applications. The contents include review of analysis of algorithms; divide and conquer; greedy algorithms; dynamic programming; preprocessing; case study of sorting/selection; case study of pattern matching; case study of graph algorithms; randomised algorithms; NP completeness; approximation algorithms for NPC problems.

**COMP3310**

**Theory of Computation**

Credit points: 6  
Session: Semester 2  
Classes: One 2 hour lecture and one 2 hour tutorial per week.  
Prerequisites: COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902).  
Assessment: Assignments One 2 hr exam

This unit explores the fundamental nature of computing. We investigate the expressive power of computer languages, and learn how to describe them with grammars. We discuss the computational power of computers: what can be computed, and what cannot be computed; what can be computed efficiently?

**COMP3610**

**Theory of Computation (Advanced)**

Credit points: 6  
Session: Semester 2  
Classes: One 2 hour lecture and one 2 hour tutorial per week.  
Prerequisites: COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902).  
Assessment: Assignments One 2 hr exam

An advanced alternative to COMP3310; covers material at an advanced and challenging level. See the description of COMP3310 for more information.

**INFO3402**

**Management of IT Projects and Systems**

Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 2 hour tutorials per week.  
Prerequisites: INFO (2000 or 2110 or 2810 or 2900).  
Assessment: Two one hour exam, 2 written assignments, tutorial preparation, participation and presentation

This course introduces the basic processes and techniques for managing IT projects, systems and services, throughout the IT lifecycle. It addresses both the technical and behavioural aspects of IT management at the enterprise level. Major topics include: organisational strategy and IT alignment, IT planning, project planning, tracking, resource estimation, team management, software testing, delivery and support of IT services, service level agreements, change and problem management, cost effectiveness and quality assurance.

Textbooks

INFO3404
Database Systems 2
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: INFO2120 or 2820 or 2905 or 2906. Prohibitions: INFO (3005 or 3504 or 3905) or COMP (3005 or 3905) Assessment: Assignments, written exam.

This unit builds on INFO2120 Database Systems 1. It has two main parts. The first part provides a deeper understanding of the internal mechanisms of a database engine, as it is needed e.g. by Database Administrators (DBA) or Software Engineers for successful performance tuning. Topics include: internal mechanisms in the DBMS engine, database tuning, physical data placement and access structures, query processing and optimisation, transaction management, and security. The second part focuses on the diversity of post-relational systems, and extensions to the relational data model to support different application needs. Topics include: object-relational systems, semi-structured data including XML, and information retrieval for textual data. The unit will be of interest to students seeking an introduction to database tuning, disk-based data structures and algorithms, and advanced data models. It will be valuable to those pursuing such careers as Software Engineers, Database Experts, Database Administrators, or e-Business Consultants.

INFO3504
Database Systems 2 (Adv)
Credit points: 6 Teacher/Coordinator: · Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: INFO (2005 or 2120 or 2820 or 2905), and Distinction in an INFO, ISYS or SOFT unit at 2000-level or above. Prohibitions: INFO (3005 or 3404 or 3905) or COMP (3005 or 3905) Assessment: Assignments, written exam.

An advanced alternative to INFO3404; covers material at an advanced and challenging level.

ISYS3400
Information Systems Project
Credit points: 6 Session: Semester 2 Classes: Two 1 hour meetings Prerequisites: INFO3402 or ISYS3012) and (ISYS (3401 or 3015) or ARIN2000). Prohibitions: ISYS3207 Assessment: Individual presentation, oral examination, group report

The objective is to enable students to design and implement a solution to a complex data processing problem or to investigate an issue in the management or development of a real-world information system. The project consists of students working together in teams to complete a task of adequate complexity that draws on their education in Information Systems to date. The project will either investigate an issue that is important to the successful practice of the management of Information systems including topics in such areas as end-user computing, IS methodologies, business process re-engineering. Alternatively, it will follow through the life-cycle of systems creation and development and delivery using the traditional tools and methods of the systems analyst.

ISYS3401
Analytical Methods & Information Systems
Credit points: 6 Session: Semester 1 Classes: 2 hrs lecture and 2 hrs tut / wk. Prerequisites: ISYS (2140 or 2008) and INFO (2000 or 2810 or 2900) and (MATH1005 or 1015 or 1905) or STAT1021 and (ARIN1000 or ENG1050 or ENGL1055 or LNGS1001 or LNGS1002 or LNGS1005 or any HPSC unit) Prohibitions: ISYS3015 Assessment: Assignments, written exam.

This course will provide an introduction to the scientific approach and basic research methods that are relevant for conceptualizing and solving complex problems encountered Information Systems practice. It will guide students through the essential stages of a research project through a variety of case scenarios. A collection of different methods for collecting and analyzing information will be studied in the context of a systems thinking approach to investigative research. These methods include participative methods, surveys, focus groups, controlled experiments and case studies. Textbooks: Leedy P. and Ornrod J. Practical Research: planning and design (7th ed). Prentice Hall

ISYS3403
IT Systems in Arts and Humanities
Credit points: 6 Session: Semester 1 Classes: 2 hr lectures, 2 hr tutorials /wk. Prerequisites: INFO (2000 or 2110 or 2810 or 2900) and INFO (2005 or 2120 or 2820 or 2905). Prohibitions: ISYS3113 or EBUS3002 or 3004. Assessment: Assignments, written exam.

This unit provides a conceptual overview of the key technological directions in Fine Arts, History, New Media, Literature, Politics, & Archaeology. It frames actual technological applications in a theoretical systems context, and builds an understanding of common technological approaches to systems solutions in the Arts and Humanities. Representation technologies such as New Media, Digital Streaming and Content Servers are explored. Concepts underlying Analytical systems and field technologies are also examined to build an understanding of their place in an overall systems context. The course elaborates this understanding through specific experience in web-based scripting, web services, relational database interfaces, XML technologies, and qualitative analysis tools.

MULT3306
Multimedia Computing and Processing
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (COMP2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902) or (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)). Prohibitions: MULT3019, MULT3919, MULT3004, MULT3904, MULT3606, COMP3004, COMP3904 Assessment: Assignments, written exam.

Multimedia has become an indispensable part of our heterogeneous computing and communication environment. This unit covers basic and advanced topics of coding and manipulating digital media, which mainly include image, audio, video, graphics, animation, etc. It introduces principles and current techniques such as multimedia data processing, content analysis, media coding and compression. It also elaborates different multimedia coding standards such as JPEG, MP3, and MPEG. Various multimedia systems and cutting-edge multimedia applications are presented. Practice of multimedia programming is also covered. In particular, computer graphics (CG) is of fundamental importance in multimedia. It allows us not only to generate and display still pictures, but also to underlie the display of moving pictures and text. CG is the enabling technology for all the visual elements of multimedia. Therefore, in this unit, we pay special attention to computer graphics and examine established CG algorithms, covering such topics as hidden-line elimination, shading and texturing, and ray-tracing. The effects on performance of algorithmic design choices are considered.

MULT3606
Multimedia Computing & Processing (Adv)
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902)) or (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)), and Distinction in a COMP or MULT or SOFT unit at 2000-level or above. Prohibitions: MULT3019, MULT3919, MULT3004, MULT3904, MULT3606, COMP3004, COMP3904 Assessment: Assignments, written exam.

An advanced alternative to MULT3306; covers material at an advanced and challenging level.

MULT3307
Interactive Multimedia Systems
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902)) or (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)). Prohibitions: SOFT3102, SOFT3902, MULT3018, MULT3918, COMP3102, COMP3802, MULT3607. Assessment: Assignments, written exam.

Interactive multimedia is becoming one of the fastest growing areas in our modern computing and communication industries, and providing effective and flexible access of business, education and cultural information. This unit offers a comprehensive and detailed approach...
for the design and development of interactive multimedia systems, with maximizing the use of different multimedia building blocks (audio, image, video, graphics and animation). It covers principles and expertise for creation and delivery of interactive multimedia, and looks specifically at media integration, hypermedia design models, human computer interaction, user interface design and programming, multimedia authoring and the design and development process. Practice of creating interactive multimedia systems using a range of programming tools is also included and emphasized.

MULT3607
Interactive Multimedia Systems (Adv)
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902)) or (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)), and Distinction in a MULT or SOFT or INFO or COMP unit at 2000-level or above. Prohibitions: SOFT3102, SOFT3802, MULT3018, MULT3918, COMP3102, COMP3802, MULT3307. Assessment: Assignments, written exam.

An advanced alternative to MULT3307; covers material at an advanced and challenging level.

NETS3303
Network Protocols & Programming
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour practicals per week. Prerequisites: (NETS(2150 or 2850) or NETS(2009 or 2909) or ELEC(3504 or 3604)) and (SOFT(2130 or 2830) or SOFT(2004 or 2904)). Prohibitions: NETS(3007 or 3907), COMP(3007 or 3907) or NETS3603. Assessment: Assignments, written exam.

Distributed and networked computing has become the norm rather than an exception. Today, the advantages of being able to communicate between computing devices extend beyond computers to incorporate such diverse devices as mobile phones and sensors. This unit covers the mechanisms that enable different computing devices to communicate in networked environments. The focus lies on the fundamental mechanisms and functions that are used to build communication protocols, and the design decisions and system consideration that have to be made for protocols to operate well. In particular, the TCP/IP protocol stack is examined as example protocols. In addition, the unit covers fundamental programming techniques in networked environments. After successful completion of this unit, students are expected to be able to design protocols for specified purposes and also be able to implement protocols according to standard documents (RFCs).

Textbooks

NETS3603
Network Protocols & Programming (Adv)
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (NETS(2150 or 2850) or NETS(2009 or 2909) or ELEC(3504 or 3604)) and (SOFT(2130 or 2830) or SOFT(2004 or 2904)), and Distinction in a NETS or SOFT unit at 2000-level or above. Prohibitions: NETS(3007 or 3907), COMP(3007 or 3907) or NETS3303. Assessment: Assignments, written exam.

An advanced alternative to NETS3303; covers material at an advanced and challenging level.

NETS3305
Computer and Network Security
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (NETS(2150 or 2850) or NETS(2009 or 2909) or ELEC3504 or ELEC3604) and (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2094)). Prohibitions: NETS(3016 or 3916), NETS3605 or ELEC(5610 or 5616) Assessment: Assignments, written exam.

This unit examines the main issues of security for enterprise systems and networks. It covers confidentiality, integrity, data-origin authentication, non-reputation, user authentication, access control. At the end of this unit students will know and understand properties of and evaluate a variety of common techniques to address security threats (public-key crypto, private-key crypto, firewalls, role-based access-control, etc). We pay special attention to the variety of attacks to which systems are subjected, and we address ways of managing the risks associated with different attacks. In this unit, cryptography is treated as a tool with given properties; to learn more about cryptography see units offered by the School of Mathematics and Statistics.

NETS3605
Computer and Network Security (Advanced)
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (NETS(2150 or 2850) or NETS(2009 or 2909) or ELEC3504 or ELEC3604) and (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)), and Distinction in a NETS or SOFT unit at 2000-level or above. Prohibitions: NETS(3016 or 3916), NETS3305 or ELEC(5610 or 5616) Assessment: Assignments, written exam.

An advanced alternative to NETS3305; covers material at an advanced and challenging level.

NETS3304
Operating System Internals
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (ELEC1601 or NETS(2008 or 2908) or COMP(2001 or 2901) or ELEC2801) and (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)), and Distinction in a NETS or SOFT unit at 2000-level or above. Prohibitions: NETS(3009 or 3909 or 3304), COMP(3009 or 3909) Assessment: Assignments, written exam.

Note: Students who were not able to do ELEC1601, but have the remaining prerequisites, are encouraged to apply for special permission to enrol in this unit.

This unit will provide a comprehensive discussion of relevant OS issues and principles and discuss how those principles are put into practice in real operating systems. The contents include internal structure of OS; several ways each major aspect (process scheduling, inter-process communication, memory management, device management, file systems) can be implemented; the performance impact of design choices; case studies of common OS (Linux, MS Windows NT, etc). The contents also include concepts of distributed systems: naming and binding, time in distributed systems, resource sharing, synchronization models (distributed shared memory, message passing), fault-tolerance, and case study of distributed file systems.

NETS3604
Operating Systems Internals (Advanced)
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (ELEC1601 or NETS(2008 or 2908) or COMP(2001 or 2901) or ELEC2801) and (SOFT(2130 or 2830) or SOFT(2004 or 2904) or COMP(2004 or 2904)), and Distinction in a NETS or SOFT unit at 2000-level or above. Prohibitions: NETS(3009 or 3909 or 3304), COMP(3009 or 3909) Assessment: Assignments, written exam.

Note: Students who were not able to do ELEC1601, but have the remaining prerequisites, are encouraged to apply for special permission to enrol in this unit.

An advanced alternative to NETS3304; covers material at an advanced and challenging level.

NETS3308
Software Development Project
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 1 hour lecture, or supervision meeting, per week. Prerequisites: INFO(2110 or 2810 or 2000 or 2900) and SOFT(2130 or 2830 or 2004 or 2904) and 12 crpts of 3000-level IT-related units (from Table III(v) or III(v) of the BIT regulations). Prohibitions: SOFT3600, SOFT3200, SOFT3700 Assessment: Project process documentation, oral presentation, written report.

This unit is a capstone for the undergraduate curriculum. It provides students with the chance to demonstrate their skills in developing a substantial software system, working in a group which needs to carry out the full range of activities including requirements capture, analysis and design, coding, testing and documentation.
SOFTWARE 3300
Software Development Project (Advanced)
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture, one supervision meeting, per week. Prerequisites: (INFO2110 or INFO2810 or INFO2900 or INFO2920) and (SOFTWARE130 or SOFTWARE230 or SOFTWARE204 or SOFTWARE294 or COMP2004 or COMP2904), and 12 crpts of 2000-, 3000-, and 4000-level IT-related units from Table III(v) and IV(v) of the BIT regulations, and Distinction in any 2000-level or above IT-related unit. Prohibitions: SOFTWARE3300, SOFTWARE3200, SOFTWARE3700 Assessment: Project process documentation, oral presentation, written report.

An advanced alternative to SOFTWARE3300; covers material at an advanced and challenging level.

SOFTWARE 3301
Software Construction 2
Credit points: 6 Session: Semester 1 Classes: Two hours lecture, two hours tutorial per week. Prerequisites: SOFTWARE2130 or SOFTWARE2830 or SOFTWARE204 or SOFTWARE2904 or COMP2004 or COMP2904 Prohibitions: SOFTWARE3601, SOFTWARE3104, SOFTWARE3804, COMP3008, COMP3908 Assessment: Programming assignments, in-lab quizzes, written exam.

At the end of this course you should have an easy familiarity with C++ and know when (and when not) to use it to solve a problem. In particular, we deal with those issues which differ from Java and C, including multiple inheritance, name spaces, destructors, the difference between virtual and non-virtual overriding, and templates. You should be comfortable reading the STL source. You will know many of the recognized Design Patterns, and be able to use them appropriately to evaluate and improve (refactor) existing code. You will have experience with coding using an Integrated Development Environment.

SOFTWARE 3601
Software Construction 2 (Advanced)
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: SOFTWARE2130 or SOFTWARE2830 or SOFTWARE204 or SOFTWARE2904 or COMP2004 or COMP2904, and Distinction in any 2000-level or above IT-related unit. Prohibitions: SOFTWARE3601, SOFTWARE3104, SOFTWARE3804, COMP3008, COMP3908 Assessment: Programming assignments, in-lab quizzes, written exam.

An advanced alternative to SOFTWARE 3301; covers material at an advanced and challenging level.

SOFTWARE 3302
Software Quality Assurance
Credit points: 6 Session: Semester 2 Classes: Two hours lecture, two hours tutorial per week. Prerequisites: (INFO(2110 or 2810) or INFO(2000 or 2900)) and ((COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902)) or (SOFTWARE(2130 or 2830) or SOFTWARE(204 or 294) or COMP(2004 or 2904))), and Distinction in any 2000-level or above IT-related unit. Prohibitions: SOFTWARE3602 or SOFTWARE3103 or SOFTWARE3803 Assessment: Programming assignments, in-lab quizzes, written exam.

This unit will discuss ways in which the quality of software systems can be enhanced through processes that occur within the Software Development Life Cycle (SDLC). We cover both agile methodologies such as extreme programming (XP), and heavier methodologies such as Rational’s RUP. We deal with ways to enhance quality of designs and of code construction, and we particularly emphasize the role of testing, for functionality and also for nonfunctional issues such as performance, usability, conformance to policy. You will learn to produce a testing strategy, starting from a careful analysis of the risks faced by the system; this strategy is elaborated into a detailed test plan. You will evaluate test plans in terms of coverage and contribution to system reliability. Emphasis is also placed on the management of the testing activity, especially on tracing from test results back to the aspect of the requirements being tested. You will have experience using some automated tools for managing the testing process.

SOFTWARE 3602
Software Quality Assurance (Adv)
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 2 hour tutorial per week. Prerequisites: (INFO(2110 or 2810) or INFO(2000 or 2900)) and ((COMP(2160 or 2860) or COMP(2111 or 2811) or COMP(2002 or 2902)) or (SOFTWARE(2130 or 2830) or SOFTWARE(204 or 294) or COMP(2004 or 2904))), and Distinction in any 2000-level or above IT-related unit. Prohibitions: SOFTWARE3602 or SOFTWARE3103 or SOFTWARE3803 or COMP3008 or SOFTWARE3908 Assessment: Programming assignments, in-lab quizzes, written exam.

An advanced alternative to SOFTWARE 3302; covers material at an advanced and challenging level.

Computer Science Honours
To be awarded Honours in Computer Science, a student must complete units of study to a total of 48 credit points, as approved by the School and the Faculty, as follows: 6 credit points of research preparation through the unit INFO4990, covering a literature review and research plan, 18 credit points of research project through the unit INFO4991 and 4992, and 24 credit points of coursework units of study, which, except with permission of the School and Faculty, must all be from 4000-level units of study which are in the subject area of Computer Science (that is, units of study or selected 5000-level units of study (see Honours units of study). Seek special permission from the School of Information Technologies for 5000-level units. Note that the Faculty requires that Honours be completed in two consecutive semesters of full-time study, or four consecutive semesters of part-time study; a single final grade and mark is given for the Honours course, as determined by the Faculty based on performance in Honours and in prior undergraduate study.

Honours units of study

COMP 4045
Computational Geometry
Credit points: 6 Session: Semester 1 Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work. Assumed knowledge: Data structures, analysis of algorithms Assessment: Practical assignments, written assignments, exam

Geometric data are used in fields including information and scientific visualisation, image processing, pattern recognition, chip layout, and geographic information systems. This unit focuses on the study of computational algorithms which efficiently process geometric data. Students will approach relevant research being done in the University of Sydney.

Textbooks

COMP 4046
Statistical Natural Language Processing
Credit points: 6 Session: Semester 1 Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work. Assumed knowledge: Concepts of linguistics, elementary statistics, AI techniques Assessment: Practical assignments, written assignments, exam

This unit deals with techniques that allow computers to handle natural human languages (such as English, French), by analysis of large corpora of text. Particular emphasis is given to methods that analyse the meaning in texts, the categorisation of texts, and the general application of machine learning methods to these topics. Students will approach relevant research being done in the University of Sydney.

COMP 4048
Information Visualisation
Credit points: 6 Session: Semester 2 Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work. Assumed knowledge: Discrete mathematics Assessment: Practical assignments, written assignments, exam

This unit provides knowledge of the concepts techniques and algorithms involved in producing graphical representations of relational information, especially graph drawings. Students will approach relevant research in the University of Sydney.

Textbooks
C. Ware "Information Visualisation" Morgan Kaufman (2000); R. Spence "Information Visualisation" Addison-Wesley (2000)

COMP 5318
Knowledge, Discovery and Data Mining
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5138 Relational Database Management Systems. Assessment: Assignments, written exam.
Knowledge discovery is the process of extracting useful knowledge from data. Data mining is a discipline within knowledge discovery that seeks to facilitate the exploration and analysis of large quantities of data, by automatic or semiautomatic means. This subject provides a practical and technical introduction to knowledge discovery and data mining. Objectives: Topics to be covered include problems of data analysis in databases, discovering patterns in the data, and knowledge interpretation, extraction and visualisation. Also covered are analysis, comparison and usage of various types of machine learning techniques and statistical techniques: clustering, classification, prediction, estimation, affinity grouping, description and scientific visualisation.

COMP5338
Advanced Data Models
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: COMP5306  Assumed knowledge: COMP5138 Relational Database Management Systems Assessment: Assignments, written exam.

This course will offer a comprehensive survey of post-relational data models and technologies with significant emphasis on XML and content management on the world wide web. The important challenges in managing the complex and varied data in modern database environments will be specifically addressed.

COMP5347
e-Commerce Technology
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5028 Object Oriented Analysis and Design  Assessment: Assignments, written exam.

This unit will focus on technological advances supporting the development of e-commerce applications and systems. This includes server-side development of e-business applications, methodologies and practices for the development of web-applications, J2EE/Java-based support for front-end development, XML processing, and database integration, as well as web services development (SOAP, WSDL, UDDI) and handheld wireless integration.

COMP5348
Enterprise Scale Software Development
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5028 Object Oriented Analysis and Design  Assessment: Assignments, exam

This unit covers a range of approaches for constructing large-scale computer-based systems which can deal with data and business processes through a large company or other organisation. In building software on this scale, it is essential to integrate existing "legacy" code and data stores. The unit includes a study of both middleware technologies and process management techniques needed to develop enterprise scale computer-based systems.

COMP5416
Advanced Network Technologies
Credit points: 6  Session: Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5116 Internet Protocols and COMP5126 Distributed Systems Programming Assessment: Assignments, written exam

The unit introduces networking concepts beyond the best effort service of the core TCP/IP protocol suite. Provides understanding of the fundamental issues in building an integrated multi-service network for global Internet services, taking into account service objectives, application characteristics and needs and network mechanisms. Enables students to understand the core issues and be aware of proposed solutions so they can actively follow and participate in the development of the Internet beyond the basic bit transport service.

COMP5424
Information Technology in Biomedicine
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

Specialist/Elective Information technology (IT) has significantly contributed to the research and practice of medicine, biology and health care. The IT field is growing enormously in scope with biomedicine taking a lead role in utilizing the evolving applications to its best advantage. The goal of this unit is to provide students with the necessary knowledge to understand the information technology in biomedicine. The major emphasis will be on the principles associated with biomedical digital imaging systems and their applications, computer modeling of biomedical systems, and biomedical system identification. Specialist areas such as medical image compression, telemedicine, Picture Archiving and Communication System (PACS), and web technology in biomedicine etc. will also be addressed.

COMP5425
Multimedia Storage, Retrieval & Delivery
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP 5122 Multimedia Human Computer Interaction Assessment: Assignments, written exam

The unit covers Multimedia Storage and Compression, fundamental compression techniques, audio storage and compression, image storage and compression (JPEG, JPG and JPEG2000), video storage and compression (MPEG, MPEG1, MPEG2, MPEG4 and MPEG7), Multimedia Information Retrieval information retrieval fundamentals, visual information retrieval, video cataloguing and retrieval issues of multimedia systems and delivery image watermarking, video watermarking, video encryption, future HCI, progressive transmitted images and video, multicasting control, immersive video for future digital TV

COMP5426
Network Based High Performance Computing
Credit points: 6  Session: Semester 1  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5126 Distributed Systems Programming Assessment: Assignments, written exam.

This unit is intended to introduce and motivate the study of high performance computer systems. The student will be presented with the foundational concepts pertaining to the different types and classes of high performance computers. The student will be exposed to the description of the technological context of current high performance computer systems. Students will gain skills in evaluating, experimenting with, and optimizing the performance of high performance computers. The unit also provides students with the ability to undertake more advanced topics and courses on high performance computing.

Information Systems Honours
To be awarded Honours in Information Systems, a student must complete units of study to a total of 48 credit points, as approved by the School and the Faculty, as follows: 6 credit points of research preparation through the unit INFO4990, covering a literature review and research plan, 18 credit points of research project through the unit INFO4991 and 4992, and 24 credit points of coursework units of study, which, except with permission of the School and Faculty, must all be from 4000-level units of study which are in the subject area of Information Systems (that is, units of study or selected 5000-level units of study (see Honours units of study). Seek special permission from the School of Information Technologies for 5000-level units. Note that the Faculty requires that Honours be completed in two consecutive semesters of full-time study, or four consecutive semesters of part-time study; a single final grade and mark is given for the Honours course, as determined by the Faculty based on performance in Honours and in prior undergraduate study.

Honours units of study

INFO4010
IT Advanced Topic A
Credit points: 6  Session: Semester 1  Classes: One 2 hour scheduled single group class per week, plus 10 hours per week private work. Prerequisites: Permission of Head of School Assessment: Practical assignments, written assignments, exam

Note: Department permission required for enrolment.
This unit will cover some topic of active research within IT; it will change in content depending on special opportunities such as a distinguished researcher visiting the University. Topics depend upon staff availability.

**INFO4011**

**IT Advanced Topic B**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
**Prerequisites:** Permission of Head of School  
**Assessment:** Practical assignments, written assignments, exam  
**Note:** Department permission required for enrolment.

This unit will cover some topic of active research within IT; it will change in content depending on special opportunities such as a distinguished researcher visiting the University. Topics depend upon staff availability.

**INFO4090**

**IT Research Methods**

**Credit points:** 6  
**Session:** Semester 1, Semester 2  
**Classes:** One 3 hour scheduled small-group class per week, plus 9 hours per week private work (including interaction with research supervisor).  
**Assumed knowledge:** Elementary statistics  
**Assessment:** Written papers (critical evaluation of a research paper, literature survey, research plan, thesis structure) and oral presentation.  
**Note:** Department permission required for enrolment.

This unit forms a key foundation for the student's work on their IT-related research project within an Honours degree. It introduces the varied approaches to research common in different fields of IT, such as experimentation, simulation, prototyping/design, mathematical proof, surveys, and interpretive methods. The main focus is on understanding how research is done, and how it is evaluated. Key assessment tasks include writing a critical evaluation of a research paper from the literature, a survey of the literature within some topic, a research plan, and a presentation of a research plan. It is expected that the student would use their thesis research as the basis for this assessment, and use feedback provided in this unit to improve the work for inclusion in the final thesis.

**ISYS4050**

**Knowledge Management Systems**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
**Assumed knowledge:** Information systems concepts, database concepts  
**Assessment:** Practical assignments, written assignments, exam

This unit will provide a comprehensive introduction to the emerging area of Knowledge Management (KM) from both technological and organisational perspectives. Topics include document repositories, ontologies and the semantic web, customer relationship management systems, communities of practice, and computer-supported cooperative work. Students will approach relevant research being done in the University of Sydney.

**NETS4047**

**Pervasive Computing**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
**Assumed knowledge:** Networking concepts, operating system concepts, programming expertise  
**Assessment:** Practical assignments, written assignments, exam

Pervasive computing deals with the likely future where many computational devices are widely dispersed in the environment: there will be sensors in rooms, people will carry PDAs or mobile phones with capacity for running sophisticated software, etc, there may be chips in one's clothing. Key issues include communication between the devices and humans; interpretation of, and adapting computation to, the human context; managing the information and communication efficiently so knowledge gets to the places where it is needed. Students will approach the relevant research being done in the University of Sydney.

**INFO4091**

**IT Research Thesis A**

**Credit points:** 6  
**Session:** Semester 1, Semester 2  
**Classes:** 12 hours per week research work (including interaction with supervisor and research group).  
**Corequisites:** INFO4990 and INFO4992  
**Assessment:** Thesis

Together with INFO4992, this unit covers the research and writing of the student's Honours thesis.

**INFO4092**

**IT Research Thesis B**

**Credit points:** 12  
**Session:** Semester 1, Semester 2  
**Classes:** 24 hours per week research work (including interaction with supervisor and research group).  
**Corequisites:** INFO4990 and INFO4991  
**Assessment:** Thesis

Together with INFO4991, this unit covers the research and writing of the student's Honours thesis.

**INFO4099**

**Computer Science Honours Result**

**Session:** Semester 1, Semester 2  
**Prerequisites:** Permission of the Head of Department  
**Note:** Department permission required for enrolment.

All students in Computer Science Honours must enrol in this non assessable unit of study in their final semester.

**Law units of study**

The following units of study are only available to students in the Bachelor of Science/Bachelor of Laws degree. Please consult department information in chapter 9, and the relevant Departments/Schools entries in this chapter for descriptions of other units of study required for this degree.

**Curriculum Review**

The Faculty of Law is undertaking a curriculum review, anticipated to be completed in 2007/2008. Combined law students are expected to complete 48 credit points of Law units of study in the first three years of the combined degree. Third year combined law students who are not able to accumulate 48 credit points of Law units of study using the unit of study codes in Table 2 as it appears in Chapter 9 must contact the Faculty of Law for alternative unit of study codes for Federal Constitutional Law and Law, Lawyers and Justice.

**LAWS1006**

**Foundations of Law**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Belinda Smith  
**Session:** Semester 1  
**Classes:** (1x1hr lec and 2x2hr seminars)/wk  
**Prohibitions:** LAWS1000  
**Assessment:** class participation (20%), 1x case assignment (30%) and 1x research essay (50%)  
**Note:** Available to Combined Law candidates only.

This unit of study provides a foundation core for the study of law. We aim to provide a practical overview of the Australian legal system, an introduction to the skills of legal reasoning and analysis which are necessary to complete your law degree, and an opportunity for critical engagement in debate about the role of law in our lives. The course will introduce students to issues such as: - the development of judge made and statute law - the relation between courts and parliament - the role and function of courts, tribunals and other forms of dispute resolution - understanding and interrogating principles of judicial reasoning and statutory interpretation - the relationship between law, government and politics - what are rights in Australian law, where do they come from and where are they going - the development and relevance of international law.

**LAWS1010**

**Torts**

**Credit points:** 6  
**Teacher/Coordinator:** Mr Ross Anderson  
**Session:** Semester 2  
**Classes:** (1x2hr seminar and 1x1hr seminar)/wk  
**Prohibitions:** LAWS1006  
**Assessment:** 2x class tests (15% each) and 1x2hr open book exam (70%)  
**Note:** Department permission required for enrolment.

Note: Available to Combined Law candidates who commenced prior to 2006 and are progressing under the old LLB resolutions.
This is a general introductory unit of study concerned with liability for civil wrongs. The unit seeks to examine and evaluate, through a critical and analytical study of primary and secondary materials, the function and scope of modern tort law and the rationale and utility of its governing principles. Particular topics on which the unit will focus include: (a) The relationship between torts and other branches of the common law including contract and criminal law; (b) The role of fault as the principal basis of liability in the modern law; (c) Historical development of trespass and the action on the case and the contemporary relevance of this development; (d) Trespass to the person (battery, assault, and false imprisonment); (e) Interference with goods (trespass, detinue and conversion) (f) Trespass to land and private nuisance; (g) The action on the case for intentional injury; (h) Defences to trespass, including consent, intellectual disability, childhood, necessity and contributory negligence; (i) Development and scope of the modern tort of negligence, including detailed consideration of duty of care and breach of duty with particular reference to personal and psychiatric injury; (j) Injuries to relational interests, including compensation to relatives of victims of fatal accidents; (k) Defences to negligence.

**LAWS1012**

**Torts**

**Credit points:** 6  **Teacher/Coordinator:** Mr Ross Anderson  **Session:** Semester 2  **Classes:** (1x2hr seminar and 1x1hr seminar)/wk  **Prerequisites:** LAWS1006  **Prohibitions:** LAWS1010, LAWS2005  **Assessment:** 2x class tests (15% each) and 1x2hr open book exam (70%)  **Note:** Available to Combined Law candidates who commenced in 2007.

This is a general introductory unit of study concerned with liability for civil wrongs. The unit seeks to examine and evaluate, through a critical and analytical study of primary and secondary materials, the function and scope of modern tort law and the rationale and utility of its governing principles. Particular topics on which the unit will focus include: (a) The relationship between torts and other branches of the common law including contract and criminal law; (b) The role of fault as the principal basis of liability in the modern law; (c) Historical development of trespass and the action on the case and the contemporary relevance of this development; (d) Trespass to the person (battery, assault, and false imprisonment); (e) Interference with goods (trespass, detinue and conversion) (f) Trespass to land and private nuisance; (g) The action on the case for intentional injury; (h) Defences to trespass, including consent, intellectual disability, childhood, necessity and contributory negligence; (i) Development and scope of the modern tort of negligence, including detailed consideration of duty of care and breach of duty with particular reference to personal and psychiatric injury; (j) Injuries to relational interests, including compensation to relatives of victims of fatal accidents; (k) Defences to negligence.

**LAWS1013**

**Legal Research I**

**Teacher/Coordinator:** Ms Margaret McAleese  **Session:** Semester 1  **Classes:** 1x1hr seminar/fortnight  **Corequisites:** LAWS1008  **Prohibitions:** LAWS1006  **Assessment:** 1x assignment  **Note:** Available to Combined Law candidates only in 2007.

This is a compulsory unit taught on a pass/fail basis. It consists of five classes which meet once a fortnight during first semester. The aim of this course is to introduce you to finding and citing primary and secondary legal materials and introducing you to legal research techniques. These are skills which are essential for a law student and which you will be required to apply in your other units.

**LAWS1014**

**Processes of Justice**

**Credit points:** 6  **Teacher/Coordinator:** Ms Miki Kumar  **Session:** Semester 1  **Classes:** 2x2hr seminars/wk  **Prerequisites:** LAWS1006  **Corequisites:** LAWS1006 (for transfer students only)  **Prohibitions:** LAWS1007, LAWS3002, LAWS3004, LAWS1001  **Assessment:** 1x2000wd assignment (35%), class participation (15%) (subject to class size) and 1x2hr exam (50%)  **Note:** Available to Combined Law candidates who commenced in 2006 or 2007 and are progressing under the new LLB resolutions.

This unit of study aims to introduce students to the procedures that administer justice. It is concerned with the processes relating to civil dispute resolution and criminal justice which are separate to the substantive hearing. The unit will consider the features of an adversarial system of justice and its impact on process. Recent reforms to adversarial process will be explored. The civil dispute resolution part of the unit will cover alternative dispute resolution, the procedures for commencing a civil action, case management, gathering evidence and the rules of privilege. Criminal process will be explored by reference to crime and society, the phenomenon of crime, colonisation and crime, police powers, bail and sentencing. The course focuses on practical examples with consideration of ethics, and contextual and theoretical perspectives.

**LAWS1015**

**Contracts**

**Credit points:** 6  **Teacher/Coordinator:** Assoc Prof Elisabeth Peden  **Session:** Semester 1  **Classes:** 2x2hr seminars/wk  **Prerequisites:** LAWS1006  **Prohibitions:** LAWS1002, LAWS2000, LAWS2008  **Assessment:** 1x1hr in-class test (25%), online quizzes (15%) and 1x2hr exam (60%)  **Note:** Available to Combined Law candidates who commenced in 2006 or 2007 and are progressing under the new LLB resolutions.

Contract law provides the legal background for transactions involving the supply of goods and services and is, arguably the most significant means by which the ownership of property is transferred from one person to another. It vitally affects all members of the community and a thorough knowledge of contract law is essential to all practising lawyers. In the context of the law curriculum as a whole, Contracts provides background which is assumed knowledge in many other units. The aims of the course are composite in nature. The course examines the rules that regulate the creation, terms, performance, breach and discharge of a contract. Remedies and factors that may vitiate a contract such as misrepresentation are dealt with in Torts and Contracts II. The central aim of the course is to provide an understanding of the basic principles of contract law and how those principles are applied in practice to solve problems. Students will develop the skills of rules based reasoning and case law analysis. A second aim is to provide students an opportunity to critically evaluate and make normative judgments about the operation of the law. Successful completion of this unit of study is a prerequisite to the option Advanced Contracts.

**LAWS1016**

**Criminal Law**

**Credit points:** 6  **Teacher/Coordinator:** Prof Mark Findlay  **Session:** Semester 2  **Classes:** 2x2hr seminars/wk  **Prerequisites:** LAWS1003, LAWS2001, LAWS2009  **Assessment:** class participation (10%), 1x in-class problem (10%), 1x research problem (30%) and final exam 50%  **Note:** Available to Combined Law candidates who commenced in 2006 or 2007 and are progressing under the new LLB resolutions.

This unit of study is designed to introduce the general principles of criminal law in context as they operate in NSW, and to critically analyse these in their contemporary social and political relevance. In order to achieve these goals, the unit will consider a range of theoretical literature as well as critical commentary, and will focus on particular substantive legal topics in problem-centred contexts. Although the topic structure is necessarily selective, it is intended that students will gain a broad understanding of crime and justice issues, as well as of the applications of the criminal law. Students will encounter problem-based learning and will be encouraged to challenge a range of conventional wisdom concerning the operation of criminal justice. This unit of study is designed to assist students in developing the following understandings: (1) A critical appreciation of certain key concepts which recur throughout the substantive criminal law. (2) A knowledge of the legal rules in certain specified areas of criminal law and their application. (3) A preliminary knowledge of how the criminal law operates in its broader societal context. (4) Through following the process of proof in a criminal prosecution and its defense, to understand the determination of criminal liability. The understandings referred to in the foregoing paragraphs will have a critical focus and will draw on procedural, substantive, theoretical and empirical sources.
The contradictions presented by the application of legal principle to complex social problems will be investigated.

**LAW2008 Contracts**

*Credit points: 6 Teacher/Coordinator: Assoc Prof Elisabeth Peden*  
*Session: Semester 1, Summer Dec*  
*Classes: 2x2hr seminars/wk*  
*Prerequisites: LAW1006, LAWS1002, LAWS1015*  
*Assessment: 1x1hr in-class test (25%), online quizzes (15%) and 1x2hr exam (60%)*  
*Note: Department permission required for enrolment in the following sessions: Semester 1. Available to Combined Law candidates who commenced prior to 2006 and are progressing under the old LLB resolutions.*

Contract law provides the legal background for transactions involving the supply of goods and services and is, arguably the most significant means by which the ownership of property is transferred from one person to another. It vitally affects all members of the community and a thorough knowledge of contract law is essential to all practising lawyers. In the context of the law curriculum as a whole, Contracts provides background which is assumed knowledge in many other units. The aims of the unit are composite in nature. The central aim is to provide an understanding of the basic principles of the common law, equity and statutes applicable to contracts. A second aim is to provide students an opportunity to critically evaluate and make normative judgments about the operation of the law. As Contracts is basically a case law unit, the final aim of the unit of study is to provide experience in problem solving through application of the principles derived from decided cases. Successful completion of this unit of study is a prerequisite to the option Advanced Contracts.

**LAW2009 Criminal Law**

*Credit points: 6 Teacher/Coordinator: Prof Mark Findlay*  
*Session: Semester 2*  
*Classes: 2x2hr seminars/wk*  
*Prerequisites: LAW1006, LAWS1003, LAWS1016*  
*Assessment: class participation (10%), 1x in-class test (10%), 1x research problem (30%) and 1x exam (50%)*  
*Note: Department permission required for enrolment. Available to Combined Law candidates who commenced prior to 2006 and are progressing under the old LLB resolutions.*

This unit of study is designed to introduce the general principles of criminal law and process as they operate in NSW, and to critically analyse these in their contemporary social context. In order to achieve these goals, the unit will consider a range of socio-legal literature, and will focus on particular substantive legal topics. Although the topic structure is necessarily selective, it is intended that students will gain a broad understanding of crime and justice issues, as well as of the applications of the criminal law. Students will encounter problem-based learning and will be encouraged to challenge a range of conventional wisdom concerning the operation of criminal justice. This unit of study is designed to assist students in developing the following understandings:  
(1) A critical appreciation of certain key concepts which recur throughout the substantive criminal law.  
(2) A knowledge of the legal rules in certain specified areas of criminal law and their application.  
(3) A preliminary understanding of the working criminal justice system as a process and the interaction of that process with the substantive criminal law.  
(4) A preliminary knowledge of how the criminal law operates in its broader societal context.  
(5) Through following the process of proof in a criminal prosecution and its defense, to understand the determination of criminal liability. The understandings referred to in the foregoing paragraphs will have a critical focus and will draw on procedural, substantive, theoretical and empirical sources. The contradictions presented by the application of legal principle to complex social problems will be investigated.

**LAW3003 Federal Constitutional Law**

*Credit points: 12 Teacher/Coordinator: Dr Peter Gerangelos*  
*Session: Semester 1*  
*Classes: 2x2hr seminars/wk*  
*Prerequisites: LAW1006*  
*Assessment: 1x mid-semester assignment/exam (40%) and 1x3hr exam (60%)*  
*Note: Available to Combined Law candidates only.*

This unit of study aims to achieve an understanding of the principles of Australian constitutional law. The unit commences with a development of an understanding of Australia's constitutional independence, parliamentary sovereignty, indigenous rights and the concept of representative and responsible government. Further topics covered include federalism (including the external affairs power and the relationship between Commonwealth and state laws); economic and financial power and relations (including the corporations power, the trade and commerce power, freedom of interstate trade, and excise); the doctrine of separation of powers and judicial power of the Commonwealth; express and implied constitutional rights; and principles of constitutional interpretation. The unit aims to develop a capacity to evaluate the principles critically, with regard to political theory and the social context within which cases have been decided.

**LAW3004 Law, Lawyers and Justice**

*Credit points: 12 Teacher/Coordinator: Assoc Prof Mary Crock*  
*Session: Semester 2*  
*Classes: 2x2hr seminars/wk*  
*Prerequisites: LAW1006*  
*Assessment: 1x1hr in-class test (10%), reflective journal (30%) and 1x open book exam (60%)*  
*Note: Available to Combined Law candidates proceeding under the old resolutions.*

Law, Lawyers and Justice has a distinct intellectual focus. It is the only unit in the curriculum that concentrates on the regulation of the legal profession and legal practice. Part 1 of Law, Lawyers and Justice examines the nature and structure of the legal profession, historical struggles to regulate the profession, and the current regulatory regime in New South Wales. Part 2 explores specific forms of legal practice, highlights the major cultural and economic forces that challenge attempts to regulate the profession and canvasses alternative ways of organising legal practice and providing legal services. Part 3 investigates the adversary system and considers its advantages and limitations. More specifically, the material in Part 3 addresses how the adversary system moulds lawyers' behaviour within and outside the judicial process and analyses current regulatory measures aimed at curbing the undesirable aspects of an adversarial culture. Part 4 evaluates the way clients are treated by lawyers and suggests strategies to change their conduct in the interests of both equality and effective communication. Furthermore, it examines lawyers' duties to their clients and the ways in which the rules and principles of confidentiality, legal professional privilege and conflicts of interest shape the advice and representation lawyers provide for their clients.

**Liberal Studies units of study**

The Bachelor of Liberal Studies degree is offered jointly by the Faculties of Science and Arts. The Faculty of Arts administers the degree program. Liberal Studies students should consider the Faculty of Arts their home Faculty for administrative purposes. The following units of study form part of the requirements of the Bachelor of Liberal Studies degree. Please consult degree information in Chapter 2, the Tables earlier in this chapter, and the relevant Departments/Schools entries in this chapter for descriptions of other units of study required for this degree.

**ENGL1000 Academic Writing**

*Credit points: 6 Teacher/Coordinator: Dr R Johinke (Sem 1 2007); Dr S Thomas (Sem 2 2007)*  
*Session: Semester 1, Semester 2, Summer Main*  
*Classes: 1 hour lecture and one 2 hour workshop per week*  
*Prerequisites: This unit is available to all enrolled students and will count for credit across all faculties. There are no specific pre-requisites, co-requisites or prohibitions, but students are expected to have native or near native competence in written English. Students not meeting this requirement should enrol in an appropriate remedial English courses before undertaking ENGL1000. ENGL1000 cannot be counted towards the junior credit points required to enrol in senior units of English, though it can be counted as an elective in most degree programs.*  
*Assessment: One 750 word annotated bibliography, one 1500 word essay, one 1000 word critical reading task, one oral presentation and a weekly journal*  

Academic Writing is designed to improve student writing at all undergraduate levels in a variety of formats across a range of...
This course equips students with some general tools for the close analysis of literary language. Grammatical concepts will be introduced and applied to the description of prose, poetry and drama, and students will explore the changing relations between form and meaning in English from the earliest times up to the present. A number of key strands in contemporary language study will also be presented, including semiotic theory, rhetoric and discourse studies and theorizations of the relationship between texts and subjectivity.

**Textbooks**

Barber, Charles, The English Language: A Historical Introduction (Cambridge, 1993)

A Resource book will be available from the University Copy Centre.

---

**MARS2006**

Marine Ecosystems and Geomorphology

**Credit points:** 6 

**Teacher/Coordinator:** Dr Peter Cowell 

**Session:** Semester 1

**Classes:** Two 1 hour lectures and six tutorials per semester and 1 day field excursion.

**Prohibitions:** MARS2002, MARS2906, GEOG2002

**Assumed knowledge:** MARS2005

**Assessment:** One 2 hour exam, assignments

**Note:** This is a qualifying unit for Senior Marine Science units. Some Senior electives may have additional prerequisites.

This course is split into two sections: marine biology and coastal geomorphology. The marine biology section describes some of the ways that the properties of the oceans affect marine organisms. It also introduces coral reefs and other marine ecosystems, together with their productivity, biological oceanography, the reproductive biology of marine organisms, and marine biological resources. The coastal geomorphology section provides an introduction to coastal geomorphology by examining the geographic variability of coasts as the sum effect of variations in terrestrial, climatic and oceanographic factors. These factors are introduced in terms of the main physical processes (geology, sea-level, waves, tides, winds) governing coastal geomorphology on a range of space-time scales. Geographic variation in the physical processes is illustrated by reference to the local coast: ie, Sydney. The illustration is amplified by drawing comparisons with other parts of SE Australia, and with overseas examples (especially from coastal environments very different to that of Sydney).

**MARS2007**

Marine Science Field School

**Credit points:** 6 

**Teacher/Coordinator:** Prof Andy Short 

**Session:** S1 Intensive Classes: Field school, four 3 hour practicals. Prohibitions: 24 credit points of Junior Science units. Prerequisites: MARS (2005 or 2905). Prohibitions: MARS2003, MARS2907

**Assessment:** Participation in field school, field report

**Practical field work:**

This unit of study introduces students to a range of field issues within the coastal and marine environment during a 5 day field school held prior to commencement of lectures in Semester 1. Many of the field methods focused on are generic across the marine disciplines. In addition, techniques specific to the disciplines of Biological Sciences and Geosciences are taught. Students will be expected to participate in a hands-on way, undertaking small project-based data collection exercises during the field school. These data will provide resources for the practical part of the course undertaken during semester.

---

**LNGS1001**

Structure of Language

**Credit points:** 6 

**Teacher/Coordinator:** Prof W Foley 

**Session:** Semester 1

**Classes:** Two 1 hour lectures and one 1 hour tutorial per week.

**Prohibitions:** LNGS1004, LNGS1005

**Assessment:** Ten short problem based assignments, each about 150 words, for a total of 1500 words; one 1 hour mid-term exam (equivalent to 1000 words); one 2 hour formal final examination (equivalent to 2000 words)

This unit is a comparative look at the general structure of human language. It looks at the sounds of human language: how the speech organs make them and their variety, in particular, a detailed description of English consonants and vowels and how to transcribe them. It investigates what is a possible word in English and other languages.

It looks at the way speakers put words together to form sentences and how and why is English different from Japanese or even Irish.

**MARS2005**

Global Oceans (Introduction)

**Credit points:** 6 

**Teacher/Coordinator:** Dr Michael Hughes 

**Session:** Semester 1

**Classes:** Three 1 hour lectures per week and six tutorials per semester and 1 day field trip. Prohibitions: 24 credit points of Junior units of study from Science Discipline Areas. Prohibitions: MARS2001, MARS2905

**Assessment:** One 2 hour exam, assignments

**Note:** This is a qualifying unit for some Senior Marine Science units. Some Senior electives may have additional prerequisites.

This course is split into two sections: physical and geological oceanography. Major physical oceanography topics include the physical and chemical properties of ocean water, ocean circulation, waves and tides. Major geological oceanography topics include the origins and geological history of ocean basins, ocean volcanism, sediments and continental margins. Both the regional oceanography and continental shelf of Australia are emphasised. Although this is principally a lecture-based course, you will receive feedback on your understanding of the course content through regular assignments and six tutorials. The learning outcome you should expect at the end of the course is a broad knowledge of the fundamental concepts in physical and geological oceanography, and their particular relevance to the Australasian region. This provides the necessary background for senior-level Marine Science courses in which you will learn more advanced concepts, and also become involved in the practical and field-based aspects of marine science.

---
MARS2905
Global Oceans (Introduction) (Advanced)
Credit points: 6 Teacher/Coordinator: Dr Michael Hughes Session: Semester 1 Classes: Three 1 hour lectures per week, six tutorials per semester and 1 day field trip. Prerequisites: Credit average in 24 credit points of Junior Science units. Prohibitions: MARS2005, MARS2001 Assessment: One 2 hour exam, 8 assignments, participation in field trip activities
Note: This unit of study is available to advanced students only.
Qualified students will participate in alternative components of MARS2005, while sharing the same lectures. The content and nature of these components may vary from year to year.
Textbooks

MARS2906
Marine Ecosystems and Geomorphology Adv
Credit points: 6 Teacher/Coordinator: Dr Peter Cowell Session: Semester 2 Classes: Three 1 hour lectures, 6 hours tutorial per semester and 1 day field excursion. Prerequisites: Credit average in 24 credit points of Junior Science units Prohibitions: MARS2006, MARS2002, GEOG2002 Assessment: One 2 hour exam and assignments.
Note: This unit of study is available to advanced students only.
Qualified students will participate in alternative components of MARS2006, while sharing the same lectures. The content and nature of these components may vary from year to year.
Textbooks

MARS2907
Marine Science Field School (Advanced)
Credit points: 6 Teacher/Coordinator: Prof Andy Short Session: S1 Intensive Classes: Field school and four 3 hour practicals. Prerequisites: Credit average in 24 credit points of Junior Science units. Corequisites: MARS2005 or MARS2905 Prohibitions: MARS2007, MARS2003 Assessment: Participation in field school activities and submission of a field report.
Note: This unit of study is available to advanced students only.
Qualified students will participate in alternative components of MARS2007, while sharing the same practical and fieldwork. The content and nature of these components may vary from year to year.

Marine Science senior units of study
Students intending to major in Marine Science should enrol in Senior units of study to a total worth of 24 credit points from the list below, including at least one BIOL and one GEOS unit. Students in the specialist BSc (Marine Science) degree must enrol in a minimum of 36 credit points of Senior Marine Science units of study, which may include up to 3 Tropical Marine Science (NTMP) units, and which must include at least one BIOL and one GEOS unit. Students are encouraged to select those electives in which they have a particular interest, subject to certain conditions (see Table 1). Because of limited facilities available for some units of study, particularly in marine biology, it may be necessary to restrict number of students taking these electives. If this need arises selection will be based on academic merit and/or other courses completed. All students intending to enrol in any of the biology options must consult the booklet information for Students Considering Senior Biology Units of Study available from the School of Biological Sciences Office during the last few weeks of the academic year prior to this enrolment. Each student should also complete a preliminary enrolment form in the School of Biological Sciences before first semester commences.

Descriptions of senior Marine Science options
Students should consult electives as listed in this chapter under Biological Sciences and Geosciences in this handbook, BIOL3006 Ecological Methods; BIOL3007 Ecology; BIOL3008 Marine Field Ecology; BIOL3011 Ecophysiology; BIOL3013 Marine Biology; GEOS3003 Dynamics of Continents and Basins; GEOS3004 Coastal Environments and Processes; GEOS3014 GIS in Coastal Management; GEOS3016 Seafloor Processes and Imaging; GEOS3017 Global Energy Exploration and Exploitation; GEOS3018 Rivers: Science, Policy and Management; (Plus Advanced versions of the above - BIOL389X, GEOS389X).

Marine Sciences Honours
The structure of Honours in Marine Science (including in Tropical Marine Science for interested students in the Bachelor of Science (Marine Science)) will be about one third formal coursework, seminars and reading, and about two thirds devoted to preparation of a thesis on a topic with a clear marine or estuarine orientation. The formal coursework may comprise units of study mainly chosen from existing Honours options offered in the Department of the student's principal interest. Background study in a subsidiary field of interest may be required. Students may commence Honours in either semester 1 or semester 2.

Admission to Honours
In general, a Credit average or better in Senior Marine Sciences units of study and at least a Pass in another Senior unit of study are required for entry. Arrangements for the supervision and Department of primary location of students will be made in the light of their proposed thesis topic. Joint supervision involving staff of more than one Department may be arranged if a thesis topic is deemed to be transdisciplinary. Upon acceptance, students should register formally with the Undergraduate Advisor of USIMS.

Tropical Marine Network Program
Students enrolled in the BSc (Marine Science) are be eligible to enrol in units of study offered as part of the Tropical Marine Network Program. This is a joint program of the University of Sydney, the University of Queensland and James Cook University, which offers four units of study in tropical marine science, all taught at marine island research stations off the Queensland coast.

Stations used
The following stations will be used: Lizard Island (Australian Museum field station, north of Cairns); Orpheus Island (James Cook University field station, off Townsville); Heron Island (University of Queensland field station, off Gladstone); One Tree Island (University of Sydney field station, off Gladstone); North Stradbroke Island (University of Queensland field station, off Brisbane)

Teaching and assessment
The four units of study, each worth 6 credit points, are conducted as field schools offered only during the Easter (Semester 1 mid-semester) break and the July mid-year break. Each field school will run for approximately 10 days. Assessment will be based on participation and reports completed during the field school, and an assignment to be completed following the field school. The Coral Reef Ecosystems unit and the Coastal Management unit will be offered each year, together with one of the other two units. Students may enrol in these units in academic year 2 and year 3 as part of the BSc (Marine Science). Students enrolling in these units of study will be selected from the three participating Universities, as well as some overseas students. Preference will however be given to students enrolled in the program at the three participating universities.

Quotas on numbers of students enrolling in NTMP units
Owing to the size of facilities and accommodation at the island research stations all units will have a quota with entry based on merit. There are no Advanced versions of these units. For further information on the availability and timing of these units please refer to the website: www.usyd.edu.au/marine.

NTMP3001
Coral Reef Ecosystems
Credit points: 6 Teacher/Coordinator: Associate Professor Maria Byrne Session: S2 Intensive Classes: Fieldwork, 30 hours block mode. Prerequisites: MARS(2005 or 2905) and MARS(2007 or 2907), plus 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology. Corequisites: MARS(2006 or 2906) Assumed knowledge: General concepts in Biology Assessment: Participation in field work and submission of a report.
Note: Department permission required for enrolment.
Note: These units are only available to BSc (Marine Science) students.
Coral Reef Ecosystems is an intensive unit that will be held at either the Heron Island or One Tree Island Tropical Research Stations on the Great Barrier Reef. The unit focuses on the dominant taxa in reef environments ad linkages between them. Emphasis is given to corals, other reef associated invertebrates (e.g., echinoderms and plankton) and fishes. Ecological and physiological aspects of key organisms are explored. Aspects covered include: distribution of corals; coral bleaching; coral symbionts and the health of the corals based on photosynthetic activity; predation on corals; the input of plankton to reefs; and, the role of fishes and invertebrates in reef environments.

**NTMP3003 Fisheries Biology and Management**

**Credit points:** 6  
**Teacher/Coordinator:** Associate Professor Maria Byrne  
**Session:** S2 Intensive Classes: Fieldwork, 80 hours block mode.  
**Prerequisites:** MARS(2005 or 2905) and MARS(2007 or 2907), plus 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology.  
**Corequisites:** MARS(2006 or 2906)  
**Assumed knowledge:** General concepts in Biology.  
**Assessment:** Participation in field work and submission of a report.  
**Note:** Department permission required for enrolment.  
**Note:** These units are only available to BSc (Marine Science) students.

Fisheries Biology and Management is an intensive unit that will be held at the tropical research station on Orpheus Island in the Great Barrier Reef. The unit focuses on approaches to quantitative fisheries biology in tropical marine environments. Emphasis is given to sampling design and hypothesis testing, underwater visual census surveys, fishery surveys, assessments of habitat types, and tagging and trapping of organisms. Most field aspects will be covered while diving and data storage will be dealt with at the end of each day. The assessment will focus on the manipulation of data and reporting.

**NTMP3004 Aquaculture**

**Credit points:** 6  
**Teacher/Coordinator:** Associate Professor Maria Byrne  
**Session:** S2 Intensive Classes: Fieldwork, 80 hours block mode.  
**Prerequisites:** MARS(2005 or 2905) and MARS(2007 or 2907), plus 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology.  
**Corequisites:** MARS(2006 or 2906)  
**Assumed knowledge:** General concepts in Biology.  
**Assessment:** Assignments and report.  
**Note:** Department permission required for enrolment.  
**Note:** These units are only available to BSc (Marine Science) students.

Aquaculture is an intensive unit that will be held at the tropical research station on Orpheus Island in the Great Barrier Reef. The unit focuses on approaches to aquaculture in tropical marine environments. Emphasis is given to aquaculture of tropical invertebrates (especially bivalves and clams) and fishes. Some aspects of the unit may also be done using the aquarium system on campus at James Cook University. Aspects covered include: the design of aquatic facilities; water quality; rearing of algae; rearing of planktonic food; stocking densities; and, growth and genetics of the target species.

**NTMP3005 Coastal Management**

**Credit points:** 6  
**Teacher/Coordinator:** Professor Andrew Short  
**Session:** S2 Intensive Classes: Fieldwork, 80 hours block mode.  
**Prerequisites:** MARS(2005 or 2905) and MARS(2007 or 2907), plus 12 credit points from Intermediate Science units of study which must include at least 6 credit points of Biology.  
**Corequisites:** MARS(2006 or 2906)  
**Assumed knowledge:** General concepts in Biology.  
**Assessment:** Assignment and report.  
**Note:** Department permission required for enrolment.  
**Note:** These units are only available to BSc (Marine Science) students.

This unit examines the impacts of human activities on coastal and marine environments. It explores the complex relationships among the ecological and social values of these environments and outlines strategies and tools for their management. This is an intensive unit that will be held at the Moreton Bay Research Station.

**Mathematics and Statistics**

The School of Mathematics and Statistics offers units of study in Applied Mathematics, Mathematical Statistics and Pure Mathematics. The Junior units of study cover a range of topics in mathematics and statistics and are offered at four levels, viz. Introductory, Life Sciences, Normal and Advanced, to suit various levels of previous knowledge. Intermediate, Senior and Honours units of study are mostly provided within one of the subject areas of Applied Mathematics, Mathematical Statistics and Pure Mathematics.

**Applied Mathematics**

Applied Mathematics is concerned with the development of mathematical and computing methods and their application in particular contexts which may arise in the natural sciences, engineering, economics or the social sciences. Units of study are designed to give training to students who will specialise in other subjects, and also for training applied mathematicians. While mathematical rigour is not neglected, particular emphasis is given to questions such as the treatment of observational models which are relevant to particular contexts.

**Mathematical Statistics**

Mathematical Statistics is concerned with the theory of probability and the mathematical methods of statistics applied to such problems as statistical inference, the design of experiments and sample surveys, and all problems of data analysis. The major units of study are designed to train those who wish to become professional statisticians, tertiary teachers and research workers, but there are units of study which provide a knowledge of statistical methods and techniques for students specialising in other fields.

**Pure Mathematics**

Pure Mathematics units of study have two main aims. One of these is to equip students with the background of mathematical knowledge, understanding and skill necessary for units of study in many branches of science. The other is the provision of training in pure mathematics necessary for those who wish to make a career in mathematics. This might be either in teaching or research or in one of the many avenues where highly developed mathematical ability and a thorough knowledge of modern mathematical techniques are required, such as computing, operations research, management, finance and economics.

**Website:** Further information about all units of study is available at www.maths.usyd.edu.au/Teaching.html

**Summer School**

This School offers some units of study in The Sydney Summer School (January-February). Consult The Sydney Summer School website for more information: www.summer.usyd.edu.au/

**Mathematics Junior units of study**

Various combinations of Junior units of study may be taken, subject to the prerequisites listed. Often specific Junior units of study are prerequisites for Mathematics and Statistics units in the Intermediate and Senior years. Before deciding on a particular combination of Junior units of study, students are advised to check carefully the prerequisites relating to Mathematics for all units of study.

**Junior introductory unit of study**

Students who have not studied a calculus course at high school may enrol in the Introductory Calculus 6-credit point unit.

**MATH1111 Introduction to Calculus**

**Credit points:** 6  
**Session:** Semester 1 Classes: Three 1 hour lectures and two 1 hour tutorials per week.  
**Prohibitions:** MATH1001, MATH1901, MATH1101, MATH1906  
**Assumed knowledge:** At least Year 10 Mathematics  
**Assessment:** One 2 hour exam, assignments, quizzes  
**Note:** Students with HSC Mathematics/Extension 1/Extension 2 (or equivalent) are prohibited.

This unit is an introduction to the calculus of one and two variables. Topics covered include elementary functions, differentiation, basic integration techniques and partial derivatives. Applications in science and engineering are emphasised.

**Textbooks**

Junior Life Sciences units of study
Life Sciences units of study are designed to provide students with an overview of the necessary mathematical and statistical background for studies in the Life Sciences. They are provided for students in the Faculty of Science whose major interest lies outside mathematics. There are more details in the Junior Mathematics Handbook, available from the School at the time of enrolment.

Assumed knowledge
Knowledge equivalent to the HSC 2-unit Mathematics course is assumed. Students who do not have this knowledge are strongly advised to attend a bridging course conducted jointly by the School and the Mathematics Learning Centre in February.

Relationship of Life Sciences units to other units of study and recommendations
The four Life Science units of study together give 12 credit points of mathematics, which is the minimum required by the BSc degree regulations. Students obtaining a Distinction in MATH1011 are encouraged to enrol in normal units of study in subsequent semesters. Students obtaining a Distinction or better in MATH1011, 1012 or 1013 may proceed to Intermediate units of study in the Mathematics Discipline Area. Students with a Credit or better in MATH1011 and a Pass or better in MATH1015 may proceed to Intermediate units of study in the Statistics discipline area. Students with a Pass in only MATH1015 are limited to the Intermediate Statistics units of study STAT2011 and STAT2012.

MATH1011
Life Sciences Calculus
Credit points: 3 Session: Semester 1, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATHH111, MATH1001, MATH1901, MATH1906 Assumed knowledge: HSC Mathematics Assessment: One 1.5 hour examination, assignments and quizzes.

This unit is designed to provide calculus for students of the life sciences who do not intend to undertake higher year mathematics and statistics. It includes the fitting of data to various functions, introduces finite difference methods, and it demonstrates the use of calculus in optimisation problems. It extends differential calculus to functions of two variables and develops integral calculus, including the definite integral and multiple integrals.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1013
Differential and Difference Equations
Credit points: 3 Session: Semester 2 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1003, MATH1001, MATH1907 Assumed knowledge: HSC Mathematics or MATH1111 Assessment: One 1.5 hour examination, assignments and quizzes.

MATH1013 is designed to provide the theory of difference and differential equations for students of the life sciences who do not intend to undertake higher year mathematics and statistics. This unit of study looks at the solution of equations by bisection and iteration, first and second order difference equations where chaos is met, and examples of modelling using simple first and second order differential equations.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1014
Introduction to Linear Algebra
Credit points: 3 Session: Semester 2, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1012, MATH1002, MATH1902 Assumed knowledge: HSC Mathematics or MATH1111 Assessment: One 1.5 hour exam, assignments, quizzes.

This unit is an introduction to Linear Algebra. Topics covered include vectors, systems of linear equations, matrices, eigenvalues and eigenvectors. Applications in life and technological sciences are emphasised.

Textbooks
Linear Algebra: A Modern Introduction, David Poole, Thompson Brook/Cole

MATH1015
Life Science Statistics
Credit points: 3 Session: Semester 1 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1005, MATH1905, STAT2012, STAT1022, ECMT Junior units of study. Assumed knowledge: HSC Mathematics Assessment: One 1.5 hour examination, assignments and quizzes.

MATH1015 is designed to provide a thorough preparation in statistics for students of the Life Sciences. It offers a comprehensive introduction to data analysis, probability and sampling, inference including t-tests, confidence intervals and chi-squared goodness of fit tests. There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

Textbooks
As set out in the Junior Mathematics Handbook

Mathematics and Statistics Normal units of study
Normal units of study are designed for students who have both the necessary background and the interest in mathematics and who need to study mathematics beyond Junior units of study in order to satisfy their own aspirations or degree requirements. There are more details of these units of study in the Junior Mathematics Handbook, available from the School at the time of enrolment.

Assumed knowledge
For the units MATH1001, MATH1002 and MATH1004, knowledge equivalent to the HSC Mathematics Extension 1 course is assumed. The assumed knowledge for MATH1005 is HSC 2-unit Mathematics. For MATH1003 the assumed knowledge is MATH1001 or HSC Mathematics Extension 2.

Relation to other units of study and recommendations
Students should take at least two units of study in each semester in order to meet the minimum requirement of 12 credit points of Mathematics in the BSc award course. The usual enrolment for Normal level students is in the three units MATH1001, MATH1002, MATH1003 and (at least) one of MATH1004 and MATH1005. Passes in Junior units of study at this level qualify students to proceed to Intermediate units of study in Mathematics and Statistics. Students should note however that some Intermediate units of study in both Mathematics and Statistics require specific Junior units of study to be passed as prerequisites. Students obtaining a Credit or better in Normal units of study may enrol in other Advanced units of study.

MATH1001
Differential Calculus
Credit points: 3 Session: Semester 1, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1011, MATH1901, MATH1906, MATH1111 Assumed knowledge: HSC Mathematics Extension 1 Assessment: One 1.5 hour examination, assignments and quizzes.

MATH1001 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit of study looks at complex numbers, functions of a single variable, limits and continuity, vector functions and functions of two variables. Differential calculus is extended to functions of two variables. Taylor’s theorem as a higher order mean value theorem.

Textbooks
As set out in the Junior Mathematics Handbook.

MATH1002
Linear Algebra
Credit points: 3 Session: Semester 1, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1002, MATH1902, MATH1014 Assumed knowledge: HSC Mathematics Extension 1 Assessment: One 1.5 hour examination, assignments and quizzes.

MATH1002 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit of study introduces vectors and vector algebra, linear algebra...
including solutions of linear systems, matrices, determinants, eigenvalues and eigenvectors.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1003
Integral Calculus and Modelling
Credit points: 3
Session: Semester 2, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1003, MATH1903, MATH1907
Assumed knowledge: HSC Mathematics Extension 2 or MATH1111. Assessed knowledge: One 1.5 hour examination, assignments and quizzes.

MATH1003 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit of study first develops the idea of the definite integral from Riemann sums, leading to the Fundamental Theorem of Calculus. Various forms of integration are considered, such as integration by parts. The second part is an introduction to the use of first and second order differential equations to model a variety of scientific phenomena.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1004
Discrete Mathematics
Credit points: 3
Session: Semester 2, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1904, MATH2011
Assumed knowledge: HSC Mathematics Extension 1. Assessed knowledge: One 1.5 hour examination, assignments and quizzes.

MATH1004 is designed to provide a thorough preparation for further study in Mathematics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit provides an introduction to fundamental aspects of discrete mathematics, which deals with ‘things that come in chunks that can be counted’. It focuses on the enumeration of a set of numbers, viz. Catalan numbers. Topics include sets and functions, counting principles, Boolean expressions, mathematical induction, generating functions and linear recurrence relations, graphs and trees.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1005
Statistics
Credit points: 3
Session: Semester 2, Summer Main Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1905, MATH1015, ECMT Junior units of study. STAT1021, STAT1022
Assumed knowledge: HSC Mathematics. Assessed knowledge: One 1.5 hour examination, assignments and quizzes.

MATH1005 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit offers a comprehensive introduction to data analysis, probability, sampling, and inference including t-tests, confidence intervals and chi-squared goodness of fit tests.

Textbooks
As set out in the Junior Mathematics Handbook

Mathematics & Statistics Junior Advanced units of study
Advanced units of study are designed for students who have a strong background and a keen interest in mathematics and who need to study mathematics at a higher level to satisfy their own aspirations or degree requirements. All students aiming for high achievement, such as an Honours degree or postgraduate study, are advised to enrol in Advanced units of study.

Content
The unit of study content is similar in outline to that of the Normal units of study above but proceeds more deeply and at a faster rate, covers more difficult material and requires more mathematical sophistication. There are more details of these units of study in the Junior Mathematics Unit of Study Handbook, available from the School at the time of enrolment.

Assumed knowledge
Knowledge equivalent to the HSC Mathematics Extension 2 course is assumed. Students who have a very good result in the equivalent of the HSC Mathematics Extension 1 course may enrol in these units of study but should discuss their plans with a Mathematics adviser.

Relation to other units of study and recommendations
Students should take two units of study in each semester in order to meet the minimum requirement of 12 credit points of Mathematics in the BSc award course. The usual enrolment for Advanced level students is in the units MATH1901, MATH1902, MATH1903 and (at least) one of the units MATH1904 and MATH1905. Passes in Junior units of study at this level qualify students to proceed to Intermediate units of study in Mathematics and Statistics at the Advanced level. It should be noted that some Intermediate and Senior units of study in both Mathematics and Statistics require specific Junior units of study as prerequisites. Students who are awarded at least a Credit grade in this level are encouraged to proceed to Intermediate units of study in Mathematics and Statistics at the Advanced level.

MATH1901
Differential Calculus (Advanced)
Credit points: 3
Session: Semester 1 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1111, MATH1011, MATH1001, MATH1906

Note: Department permission required for enrolment.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. It parallels the normal unit MATH1001 but goes more deeply into the subject matter and requires more mathematical sophistication.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1902
Linear Algebra (Advanced)
Credit points: 3
Session: Semester 1 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1002, MATH1012, MATH1014

Note: Department permission required for enrolment.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. It parallels the normal unit MATH1002 but goes more deeply into the subject matter and requires more mathematical sophistication.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1903
Integral Calculus and Modelling Advanced
Credit points: 3
Session: Semester 2 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1903, MATH1013, MATH1907
Assumed knowledge: HSC Mathematics Extension 2 or Credit or better in MATH1101 or MATH1901. Assessed knowledge: One 1.5 hour examination, assignments and quizzes.

Note: Department permission required for enrolment.

MATH1903 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This
unit of study parallels the normal unit MATH1003 but goes more deeply into the subject matter and requires more mathematical sophistication.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1004
Discrete Mathematics (Advanced)
Credit points: 3 Session: Semester 2 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1004, MATH2011 Assumed knowledge: HSC Mathematics Extension 2 Assessment: One 1.5 hour examination, assignments and quizzes.

Note: Department permission required for enrolment.

This unit is designed to provide a thorough preparation for further study in mathematics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. It parallels the normal unit MATH1004 but goes more deeply into the subject matter and requires more mathematical sophistication.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1905
Statistics (Advanced)
Credit points: 3 Session: Semester 2 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prohibitions: MATH1105, MATH1115, ECMT1021, STAT1022 Assumed knowledge: HSC Mathematics Extension 2 Assessment: One 1.5 hour examination, assignments and quizzes.

Note: Department permission required for enrolment.

This unit is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This Advanced level unit of study parallels the normal unit MATH1005 but goes more deeply into the subject matter and requires more mathematical sophistication.

Textbooks
As set out in the Junior Mathematics Handbook

MATH1006
Mathematics (Special Studies Program) A
Credit points: 3 Session: Semester 1 Classes: Two 1 hour lectures, one 1 hour seminar and one 1 hour tutorial per week. Prerequisites: UAI of at least 98.5 and result in Band E4 HSC Mathematics Extension 2; by invitation. Prohibitions: MATH1111, MATH1101, MATH1011, MATH1901 Assessment: One 1.5 hour exam, assignments, coursework.

Note: Department permission required for enrolment.

This is an Advanced unit of study. Entry to Mathematics (Special Studies Program) A is restricted to students with a UAI of 98.5 and an excellent school record in Mathematics. Students will cover the material in MATH1901 Differential Calculus (Advanced). In addition there will be a selection of special topics, which are not available elsewhere in the Mathematics and Statistics program.

MATH1907
Mathematics (Special Studies Program) B
Credit points: 3 Session: Semester 2 Classes: Two 1 hour lectures, one 1 hour seminar and one 1 hour tutorial per week. Prerequisites: Distinction in MATH1906; by invitation. Prohibitions: MATH1003, MATH1013, MATH1903 Assessment: One 1.5 hour exam, assignments, coursework.

Note: Department permission required for enrolment.

This is an Advanced unit of study. Entry to Mathematics (Special Studies Program) B is normally restricted to students with a Distinction in MATH1906. Students will cover the material in MATH1903 Integral Calculus and Modelling (Advanced). In addition there will be a selection of special topics, which are not available elsewhere in the Mathematics and Statistics program.

Mathematics Intermediate units of study
The School of Mathematics provides a range of Intermediate units of study, each worth 6 credit points covering a variety of topics in Pure and Applied Mathematics. A normal Intermediate load in a discipline is 12 credit points and this is the minimum that should be undertaken by anyone intending to specialise in Senior Mathematics. The units of study are taught at either the Normal or the Advanced level. Entry to an Advanced unit of study usually requires a Credit or better in a Normal level prerequisite or a Pass in an Advanced level prerequisite. For ease of overview the units of study are arranged under Pure, for students wishing to specialise in Pure Mathematics, and Applied, for those wishing to specialise in Applied Mathematics. Several units of study are suitable for either. Details of each unit of study appear below whilst full details of unit of study structure, content and examination procedures are provided in the Second Year Mathematics Handbook available from the School at the time of enrolment.

Pure units of study (each 6 credit points)
Algebra (Adv) MATH2968; Discrete Maths & Graph Theory MATH2069; Discrete Maths & Graph Theory (Adv) MATH2969; Linear Mathematics & Vector Calculus MATH2061; Linear Mathematics & Vector Calculus (Adv) MATH2961; Number Theory and Cryptography MATH2068; Real and Complex Analysis (Adv) MATH2962

Applied units of study (each 6 credit points)

Relation to other units of study and recommendations
In general, 2 units of study (12 credit points) of Intermediate mathematics are needed to progress to a Senior Mathematics unit of study. If your major interest is in mathematics, then you are strongly encouraged to enrol in at least 3 units of study in Intermediate Mathematics. If you are considering doing Honours in mathematics, they should include some Advanced units of study. Students intending to specialise in Applied Mathematics are encouraged to include MATH2061 or 2961, and MATH2065 or 2965. Students intending to specialise in Pure Mathematics should include MATH2061 or 2961, and MATH2065 or 2965. Prospective teachers of mathematics should consider MATH2061 and 2068.

MATH2916
Working Seminar A (SSP)
Credit points: 3 Session: Semester 1 Classes: One 1 hour seminar per week. Prerequisites: By invitation, High Distinction average over 12 credit points of Advanced Junior Mathematics Assessment: One 1 hour presentation, 15-20 page essay.

Note: Department permission required for enrolment.

The main aim of this unit is to develop the students' written and oral presentation skills. The material will consist of a series of connected topics relevant to modern mathematics and statistics. The topics are chosen to suit the students' background and interests, and are not covered by other mathematics or statistics units. The first session will be an introduction on the principles of written and oral presentation of mathematics. Under the supervision and advice of the lecturer(s) in charge, the students present the topics to the other students and the lecturer in a seminar series and a written essay in a manner that reflects the practice of research in mathematics and statistics.

MATH2917
Working Seminar B (SSP)
Credit points: 3 Session: Semester 2 Classes: One 1 hour seminar per week. Prerequisites: By invitation, High Distinction average over 12 credit points of Advanced Junior Mathematics Assessment: One 1 hour presentation, 15-20 page essay.

Note: Department permission required for enrolment.
The main aim of this unit is to develop the students' written and oral presentation skills. The material will consist of a series of connected topics relevant to modern mathematics and statistics. The topics are chosen to suit the students' background and interests, and are not covered by other mathematics or statistics units. The first session will be an introduction on the principles of written and oral presentation of mathematics. Under the supervision and advice of the lecturer(s) in charge, the students present the topics to the other students and the lecturer in a seminar series and a written essay in a manner that reflects the practice of research in mathematics and statistics.

MATH2061
Linear Mathematics and Vector Calculus
Credit points: 6  Session: Semester 1  Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week.  Prerequisites: MATH (1111 or 1001 or 1901 or 1906) and MATH (1014 or 1002 or 1902) and MATH (1003 or 1903 or 1907).  Prohibitions: MATH2001, MATH2901, MATH2002, MATH2902, MATH2961, MATH2067  Assessment: Two 1.5 hour exams, assignments, quizzes

This unit starts with an investigation of linearity: linear functions, general principles relating to the solution sets of homogeneous and inhomogeneous linear equations (including differential equations), linear independence and the dimension of a linear space. The study of eigenvalues and eigenvectors, begun in junior level linear algebra, is extended and developed. Linear operators on two-dimensional real space are investigated, paying particular attention to the geometrical significance of eigenvalues and eigenvectors. The unit then moves on to topics from vector calculus, including vector-valued functions (parametrised curves and surfaces; vector fields; div, grad and curl; gradient fields and potential functions), line integrals (arc length; work; path-independent integrals and conservative fields; flux across a curve), iterated integrals (double and triple integrals; polar, cylindrical and spherical coordinates; areas, volumes and mass; Green's Theorem), flux integrals (flow through a surface; flux integrals through a surface defined by a function of two variables, though cylinders, spheres and parametrised surfaces), Gauss' Divergence Theorem and Stokes' Theorem.

MATH2961
Linear Mathematics & Vector Calculus Adv
Credit points: 6  Session: Semester 1  Classes: Four 1 hour lectures and one 1 hour tutorial per week.  Prerequisites: MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003)  Prohibitions: MATH2001, MATH2901, MATH2002, MATH2902, MATH2061, MATH2067  Assessment: 2 hour exam, assignments

This unit is an advanced version of MATH2061, with more emphasis on the underlying concepts and on mathematical rigour. Topics from linear algebra focus on the theory of vector spaces and linear transformations. The connection between matrices and linear transformations is studied in detail. Determinants, introduced in first year, are revised and investigated further, as are eigenvalues and eigenvectors. The calculus component of the unit includes local maxima and minima, Lagrange multipliers, the inverse function theorem and Jacobians. There is an informal treatment of multiple integrals: double integrals, change of variables, triple integrals, line and surface integrals, Green's theorem and Stokes' theorem.

MATH2962
Real and Complex Analysis (Advanced)
Credit points: 6  Session: Semester 1  Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week.  Prerequisites: MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003)  Prohibitions: MATH2007, MATH2907  Assessment: 2 hour exam, assignments

Analysis is one of the fundamental topics underlying much of mathematics including differential equations, dynamical systems, differential geometry, topology and Fourier analysis. Starting off with an axiomatic description of the real number system, this first course in analysis concentrates on the limiting behaviour of infinite sequences and series on the real line and the complex plane. These concepts are then applied to sequences and series of functions, looking at point-wise and uniform convergence. Particular attention is given to power series leading into the theory of analytic functions and complex analysis. Topics in complex analysis include elementary functions on the complex plane, the Cauchy integral theorem. Cauchy integral formula, residues and related topics with applications to real integrals.

MATH2063
Math Computing and Nonlinear Systems
Credit points: 6  Session: Semester 1  Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2963).  Prerequisites: MATH (1001 or 1901 or 1906) and MATH (1002 or 1902) and MATH (1003 or 1903 or 1907).  Prohibitions: MATH2003, MATH2903, MATH2006, MATH2906, MATH2963  Assessment: 2 hour exam, assignments, quizzes

This unit will introduce students to techniques of mathematical computation as applied to nonlinear systems, using the numerical programming language MATLAB and, where appropriate, computer algebra. This knowledge will be applied to a number of modelling problems, particularly those involving nonlinear mappings and nonlinear ordinary differential equations (ODEs). Throughout the unit of study the essential nonlinear theory will be developed, and the resulting ideas will be explored computationally. This will allow us to explore the modern concepts of chaos using a variety of examples, including the logistic map, the Henon map and the Lorenz equations. No prior knowledge of programming or of the MATLAB language or computer algebra is required.

MATH2963
Math Computing & Nonlinear Systems (Adv)
Credit points: 6  Session: Semester 1  Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2963).  Prerequisites: MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) and MATH (1903 or 1907 or Credit in 1003)  Prohibitions: MATH2003, MATH2903, MATH2006, MATH2906, MATH2063  Assessment: 2 hour exam, assignments/quiz

The content of this unit of study parallels that of MATH2063, but both computational and theory components will place more emphasis on Advanced topics, including Lyapunov exponents, stability, 2- and 3-cycles for mappings and concepts such as strange attractors. No prior knowledge of programming or of the MATLAB language or computer algebra is required.

MATH2065
Partial Differential Equations (Intro)
Credit points: 6  Session: Semester 2  Classes: Three 1 hour lectures, one 1 hour tutorial, one 1 hour example class per week.  Prerequisites: MATH (1001 or 1901 or 1906) and MATH (1002 or 1902) and MATH (1003 or 1903 or 1907).  Prohibitions: MATH2005, MATH2905, MATH2965, MATH2067  Assessment: 2 hour exam, mid-semester test, assignments

This is an introductory course in the analytical solutions of PDEs (partial differential equations) and boundary value problems. The techniques covered include separation of variables, Fourier series, Fourier transforms and Laplace transforms.

MATH2965
Partial Differential Equations Intro Adv
Credit points: 6  Session: Semester 2  Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures in common with MATH2965).  Prerequisites: MATH (2901 or Credit in 2001) or (MATH (2901 or 2001) and MATH (2902 or Credit in 2002)).  Prohibitions: MATH2005, MATH 2905, MATH2905, MATH2065, MATH2067  Assessment: 2 hour exam, assignments

This unit of study is essentially an Advanced version of MATH2065, the emphasis being on solutions of differential equations in applied mathematics. The theory of ordinary differential equations is developed for second order linear equations, including series solutions, special functions and Laplace transforms. Some use is made of computer programs such as Mathematica, for PDEs (partial differential equations) and boundary-value problems include separation of variables, Fourier series and Fourier transforms.
MATH2068 Number Theory and Cryptography
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. Prerequisites: 9 credit points of Junior level Mathematics including MATH (1002 or 1902) Prohibitions: MATH3024, MATH3099 Assessment: 2 hour exam, assignments, quizzes

Cryptography is the branch of mathematics that provides the techniques for confidential exchange and authentication of information sent over public networks. This unit introduces tools from elementary number theory, then applies them to the analysis of block ciphers and stream ciphers, as the foundation for modern public key cryptography.

MATH2968 Algebra (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. Prerequisites: 9 credit points of Junior Mathematics (advanced level or Credit at normal level) including (MATH1902 or Credit in MATH1002) Prohibitions: MATH2908, MATH2918, MATH2008 Assessment: 2 hour exam, assignments

This unit provides an introduction to modern abstract algebra, via linear algebra and group theory. It starts with a revision of linear algebra concepts from Junior Mathematics and MATH2961, and proceeds with a detailed investigation of inner product spaces over the real and complex fields. Applications here include least squares lines and curves of best fit, and approximation of continuous functions by finite Fourier series. Further topics in linear algebra covered in this unit include dual space, quotient spaces and (if time permits) possibly tensor products. The second part of the unit is concerned with introductory group theory, motivated by examples of matrix groups and permutation groups. Topics include actions of groups on sets, including linear actions on vector spaces. Subgroups, homomorphisms and quotient groups are investigated, and the First Isomorphism Theorem is proved.

MATH2069 Discrete Mathematics and Graph Theory
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. Prerequisites: 6 credit points of Junior level Mathematics. Prohibitions: MATH2011, MATH2009, MATH2969 Assessment: Two 1.5 hour exams, assignments, quizzes

This unit introduces students to several related areas of discrete mathematics, which serve their interests for further study in pure and applied mathematics, computer science and engineering. Topics to be covered in the first part of the unit include recursion and induction, generating functions and recurrences, combinatorics, including connections with probability theory, asymptotics and analysis of algorithms, set theory and logic. Topics covered in the second part of the unit include Eulerian and Hamiltonian graphs, the theory of trees (used in the study of data structures), planar graphs, the study of chromatic polynomials (important in scheduling problems), maximal flows in networks, matching theory.

MATH2969 Discrete Mathematics & Graph Theory Adv
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour practice class per week. Prerequisites: 9 credit points of Junior Mathematics (advanced level or Credit at the normal level) Prohibitions: MATH2011, MATH2009, MATH2969 Assessment: Two 1.5 hour exams, assignments, quizzes

This unit will cover the same material as MATH2069 with some extensions and additional topics.

MATH2070 Optimisation and Financial Mathematics
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. Prerequisites: MATH (1001 or 1901) and MATH (1002 or 1902) Prohibitions: MATH2010, MATH2033, MATH2933, MATH2970, ECMT3510 Assumed knowledge: MATH (1903 or 1907) Assessment: One 2 hour exam, assignments, quizzes, project

Problems in industry and commerce often involve maximising profits or minimising costs subject to constraints arising from resource limitations. The first part of this unit looks at the important class of linear optimisation programming problems and their solution using the simplex algorithm. The second part of the unit deals with utility theory and modern portfolio theory. Topics covered include: pricing under the principles of expected return and expected utility; mean-variance Markowitz portfolio theory, the Capital Asset Pricing Model, log-optimal portfolios and the Kely criterion; dynamical programming. Some understanding of probability theory including distributions and expectations is required in this part. Theory developed in lectures will be complemented by computer laboratory sessions using MATLAB. Minimal computing experience will be required.

MATH2970 Optimisation & Financial Mathematics Adv
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week (lectures given in common with MATH2070). Prerequisites: MATH (1901 or 1906 or Credit in 1001) and MATH (1902 or Credit in 1002) Prohibitions: MATH2010, MATH2033, MATH2933, MATH2070 Assumed knowledge: MATH (1903 or 1907) or Credit in MATH1003 Assessment: One 2 hour exam, assignments, quizzes

Note: Students may enrol in both MATH2970 and MATH3975 in the same semester

The content of this unit of study parallels that of MATH2070, but students enrolled at Advanced level will undertake more advanced problem solving and assessment tasks, and some additional topics may be included.

Mathematics Senior units of study
The School of Mathematics and Statistics provides a range of senior units of study in the Science Subject Area MATH. (The separate Science Subject Area STAT is dealt with in the next section.) Each unit of study is worth 6 credit points; students wishing to obtain a major in mathematics must therefore take at least 4 units of senior mathematics, while those wishing to obtain a double major must take 8. To proceed to honours in either Applied Mathematics or Pure Mathematics, students must have a major in mathematics. Honours entry is further restricted to students attaining a sufficiently high average mark in their senior year. Students interested in doing honours should consult the School to find out the precise details, and obtain advice on an appropriate senior year program. As well as majors in Mathematics and Statistics, the School offers a major in Financial Mathematics and Statistics. The precise requirements for this major can be found in Table 1. Alternatively, consult the School directly.

Normal and Advance
Each unit of study is designated either as "Normal" or "Advanced". Advanced units have more stringent prerequisites than normal units, and are significantly more demanding. Although the precise requirements vary from unit to unit, it is generally inadvisable for a student who has not achieved a Credit average in intermediate level mathematics to attempt an advanced senior mathematics unit.

Semester 1
MATH3063 Differential Equations and Biomaths; MATH3065 Logic and Foundations; MATH3068 Analysis; MATH3076 Mathematical Computing; MATH2961 Metric Spaces (Advanced); MATH3962 Rings, Fields and Galois Theory (Adv); MATH3963 Differential Equations and Biomaths (Adv); MATH3974 Fluid Dynamics (Advanced); MATH3976 Mathematical Computing (Advanced)

Semester 2
MATH3061 Geometry and Topology; MATH3062 Algebra and Number Theory; MATH3067 Information and Coding Theory; MATH3075 Financial Mathematics; MATH3078 PDEs and Waves; MATH3964 Complex Analysis with Applications (Adv); MATH3966 Modules and Group Representations ( Adv); MATH3968 Differential Geometry (Adv); MATH3969 Measure Theory & Fourier Analysis (Adv); MATH3975
10. Undergraduate units of study

Financial Mathematics (Advanced); MATH3977 Lagrangian & Hamiltonian Dynamics (Adv); MATH3978 PDEs and Waves (Advanced)

Relation to other units of study and recommendations
In general, 4 units of study (24 credit points) are required in order to major in Mathematics and a credit average is required to progress to an Honours year. Potential Honours students are strongly encouraged to include one or more Advanced level unit(s) of study and seek advice from a Senior year coordinator. Particular combinations would be suitable for students with special interests.

Computer Science students
MATH3065, MATH3962, MATH3076/3976, MATH3062, MATH3067, MATH3966, MATH3961, MATH3075/3975.

Engineering (BSc/BE) students
MATH3961, MATH3068, MATH3063/3963, MATH3065, MATH3974, MATH3076/3976, MATH3969, MATH3078/3978, MATH3968, MATH3067, MATH3977, MATH3964, MATH3075/3975.

Physics or Chemistry students
MATH3061/3961, MATH3068, MATH3962, MATH3063/3963, MATH3065, MATH3974, MATH3076/3976, MATH3969, MATH3966, MATH3968, MATH3078/3978, MATH3964, MATH3977, 3075/3975, MATH3067.

Prospective teachers of Mathematics
MATH3065, MATH3068, MATH3063/3963, MATH3962, MATH3961, MATH3076/3976, MATH3067, MATH3062, MATH3061, MATH3078/3978.

MATH3061
Geometry and Topology
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics. Prohibitions: MATH3001, MATH3006. Assessment: One 2 hour exam, tutorial tests, assignments.

The aim of the unit is to expand visual/geometric ways of thinking. The geometry section is concerned mainly with transformations of the Euclidean plane (that is, bijections from the plane to itself), with a focus on the study of isometries (proving the classification theorem for transformations which preserve distances between points), symmetries (including the classification of frieze groups) and affine transformations (transformations which map lines to lines). The basic approach is via vectors and matrices, emphasizing the interplay between geometry and linear algebra. The study of affine transformations is then extended to the study of collineations in the real projective plane, including collineations which map conics to conics. The topology section considers graphs, surfaces and knots from a combinatorial point of view. Key ideas such as homeomorphism, subdivision, cutting and pasting and the Euler invariant are introduced first for graphs (1-dimensional objects) and then for triangulated surfaces (2-dimensional objects). The classification of surfaces is given in several equivalent forms. The problem of colouring maps on surfaces is interpreted via graphs. The main geometric fact about knots is that every knot bounds a surface in 3-space. This is proven by a simple direct construction, and this fact is used to show that every knot is a sum of prime knots.

MATH3061
Metric Spaces (Advanced)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics. Prohibitions: MATH3001, MATH3001. Assumed knowledge: MATH2961 or MATH2962. Assessment: 2 hour exam, assignments, quizzes.

Topology, developed at the end of the 19th Century to investigate the subtle interaction of analysis and geometry, is now one of the basic disciplines of mathematics. A working knowledge of the language and concepts of topology is essential in fields as diverse as algebraic number theory and non-linear analysis. This unit develops the basic ideas of topology using the example of metric spaces to illustrate and motivate the general theory. Topics covered include: Metric spaces, convergence, completeness and the contraction mapping theorem; Metric topology, open and closed subsets; Topological spaces, subspaces, product spaces; Continuous mappings and homeomorphisms; Compact spaces; Connected spaces; Hausdorff spaces and normal spaces, Applications include the implicit function theorem, chaotic dynamical systems and an introduction to Hilbert spaces and abstract Fourier series.

MATH3062
Algebra and Number Theory
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics. Prohibitions: MATH3962, MATH3902, MATH3002, MATH3009. Assessment: One 2 hour exam, quizzes and assignments. Note: Students are advised to take MATH2008 or 2968 before attempting this unit.

The first half of the unit continues the study of elementary number theory, with an emphasis on the solution of Diophantine equations (for example, finding all integer squares which are one more than twice a square). Topics include the Law of Quadratic Reciprocity, representing an integer as the sum of two squares, and continued fractions. The second half of the unit introduces the abstract algebraic concepts which arise naturally in this context: rings, fields, irreducibles, and unique factorization. Polynomial rings, algebraic numbers, and constructible numbers are also discussed.

Textbooks

MATH3062
Rings, Fields and Galois Theory (Adv)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics. Prohibitions: MATH3062, MATH3902, MATH3002. Assumed knowledge: MATH2961. Assessment: One 2 hour exam, assignments and quizzes. Note: Students are advised to take MATH2968 before attempting this unit.

This unit of study investigates the modern mathematical theory that was originally developed for the purpose of studying polynomial equations. The philosophy is that it should be possible to factorize any polynomial into a product of linear factors by working over a "large enough" field (such as the field of all complex numbers). Viewed like this, the problem of solving polynomial equations leads naturally to the problem of understanding extensions of fields. This in turn leads into the area of mathematics known as Galois theory. The basic theoretical tool needed for this program is the concept of a ring, which generalizes the concept of a field. The course begins with examples of rings, and associated concepts such as subrings, ring homomorphisms, ideals and quotient rings. These tools are then applied to study quotient rings of polynomial rings. The final part of the course deals with the basics of Galois theory, which gives a way of understanding field extensions.

Textbooks

MATH3063
Differential Equations & Biomaths
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics. Prohibitions: MATH3020, MATH3920, MATH3003, MATH3923, MATH3963. Assumed knowledge: MATH2961. Assessment: One 2 hour exam, assignments, quizzes.

This unit of study is an introduction to the theory of systems of ordinary differential equations. Such systems model many types of phenomena in engineering, biology and the physical sciences. The emphasis will
not be on finding explicit solutions, but instead on the qualitative features of these systems, such as stability, instability and oscillatory behaviour. The aim is to develop a good geometrical intuition into the behaviour of solutions to such systems. Some background in linear algebra, and familiarity with concepts such as limits and continuity, will be assumed. The applications in this unit will be drawn from predator-prey systems, transmission of diseases, chemical reactions, beating of the heart and other equations and systems from mathematical biology.

MATH3963
Differential Equations & Biomaths (Adv)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics Prohibitions: MATH3020, MATH3020, MATH3003, MATH3923, MATH3063 Assumed knowledge: MATH2961 Assessment: One 2 hour exam, assignments, quizzes

The theory of ordinary differential equations is a classical topic going back to Newton and Leibniz. It comprises a vast number of ideas and methods of different nature. The theory has many applications and stimulates new developments in almost all areas of mathematics. The applications in this unit will be drawn from predator-prey systems, transmission of diseases, chemical reactions, beating of the heart and other equations and systems from mathematical biology. The emphasis is on qualitative analysis including phase-plane methods, bifurcation theory and the study of limit cycles. The more theoretical part includes existence and uniqueness theorems, stability analysis, linearisation, and hyperbolic critical points, and omega limit sets.

MATH3964
Complex Analysis with Applications (Adv)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics Prohibitions: MATH3004, MATH3015. Assumed knowledge: MATH2962 Assessment: One 2 hour exam, assignments and quizzes

This unit continues the study of functions of a complex variable and their applications introduced in the second year unit Real and Complex Analysis (MATH2962). It is aimed at highlighting certain topics from analytic function theory and the analytic theory of differential equations that have intrinsic beauty and wide applications. This part of the analysis of functions of a complex variable will form a very important background for students in applied and pure mathematics, physics, chemistry and engineering. The course will begin with a revision of properties of holomorphic functions and Cauchy theorem with added topics not covered in the second year course. This will be followed by meromorphic functions, entire functions, harmonic functions, elliptic functions, elliptic integrals, analytic differential equations, hypergeometric functions. The rest of the course will consist of selected topics from Greens functions, complex differential forms and Riemann surfaces.

MATH3065
Logic and Foundations
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 6 credit points of Intermediate Mathematics Prohibitions: MATH3005 Assessment: One 2 hour exam, tutorial tests, assignments.

This unit is in two halves. The first half provides a working knowledge of the propositional and predicate calculi, discussing techniques of proof, consistency, models and completeness. The second half discusses notions of computability by means of Turing machines (simple abstract computers). (No knowledge of computer programming is assumed.) It is shown that there are some mathematical tasks (such as the halting problem) that cannot be carried out by any Turing machine. Results are applied to first-order Peano arithmetic, culminating in Gödel’s Incompleteness Theorem: any statement that includes first-order Peano arithmetic contains true statements that cannot be proved in the system. A brief discussion is given of Zermelo-Fraenkel set theory (a candidate for the foundations of mathematics), which still succumbs to Gödel’s Theorem.

MATH3966
Modules and Group Representations (Adv)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics Prohibitions: MATH3906, MATH3907 Assumed knowledge: MATH3962 Assessment: One 2 hour exam, assignments and quizzes

This unit deals first with generalized linear algebra, in which the field of scalars is replaced by an integral domain. In particular we investigate the structure of modules, which are the analogues of vector spaces in this setting, and which are of fundamental importance in modern pure mathematics. Applications of the theory include the solution over the integers of simultaneous equations with integer coefficients and analysis of the structure of finite abelian groups. In the second half of this unit we focus on linear representations of groups. A group occurs naturally in many contexts as a symmetry group of a set or space. Representation theory provides techniques for analysing these symmetries. The component will deals with the decomposition of representation into simple constituents, the remarkable theory of characters, and orthogonality relations which these characters satisfy.

MATH3067
Information and Coding Theory
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics Prohibitions: MATH3007, MATH3010 Assessment: One 2 hour exam, tutorial tests, assignments.

The related theories of information and coding provide the basis for reliable and efficient storage and transmission of digital data, including techniques for data compression, digital broadcasting and broadband internet connectivity. The first part of this unit is a general introduction to the ideas and applications of information theory, where the basic concept is that of entropy. This gives a theoretical measure of how much data can be compressed for storage or transmission. Information theory also addresses the important practical problem of making data immune to partial loss caused by transmission noise or physical damage to storage media. This leads to the second part of the unit, which deals with the theory of error-correcting codes. We develop the algebra behind the theory of linear and cyclic codes used in modern digital communication systems such as compact disk players and digital television.

MATH3068
Analysis
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics Prohibitions: MATH3008, MATH2007, MATH2907, MATH2962 Assessment: One 2 hour exam, tutorial tests, assignments.

Analysis grew out of calculus, which leads to the study of limits of functions, sequences and series. The aim of the unit is to present enduring beautiful and practical results that continue to justify and inspire the study of analysis. The unit starts with the foundations of calculus and the real number system. It goes on to study the limiting behaviour of sequences and series of real and complex numbers. This leads naturally to the study of functions defined as limits and to the notion of uniform convergence. Returning to the beginnings of calculus and power series expansions leads to complex variable theory: analytic functions, Taylor expansions and the Cauchy Integral Theorem. Power series are not adequate to solve the problem of representing periodic phenomena such as wave motion. This requires Fourier theory, the expansion of functions as sums of sines and cosines. This unit deals with this theory, Parseval’s identity, pointwise convergence theorems and applications. The unit goes on to introduce Bernstein polynomials, Bernoulli polynomials, the Euler MacLaurin formula and applications, the gamma function and the Riemann zeta function. Lastly we return to the foundations of analysis, and study limits from the point of view of topology.

MATH3968
Differential Geometry (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate
This unit is an introduction to Differential Geometry, using ideas from calculus of several variables to develop the mathematical theory of geometrical objects such as curves, surfaces and their higher-dimensional analogues. Differential geometry also plays an important part in both classical and modern theoretical physics. The initial aim is to develop geometrical ideas such as curvature in the context of curves and surfaces in space, leading to the famous Gauss-Bonnet formula relating the curvature and topology of a surface. A second aim is to present the calculus of differential forms as the natural setting for the key ideas of vector calculus, along with some applications.

MATH3969
Measure Theory & Fourier Analysis (Adv)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points Intermediate Mathematics. Prohibitions: MATH3909. Assumed knowledge: At least 6 credit points of Advanced Mathematics units of study at Intermediate or Senior level. Assessment: One 2 hour exam, assignments, quizzes.

Measure theory is the study of such fundamental ideas as length, area, volume, arc length and surface area. It is the basis for the integration theory used in advanced mathematics since it was developed by Henri Lebesgue in about 1900. Moreover, it is the basis for modern probability theory. The course starts by setting up measure theory and integration, establishing important results such as Fubini's Theorem and the Dominated Convergence Theorem which allow us to manipulate integrals. This is then applied to Fourier Analysis, and results such as the Inversion Formula and Plancherel's Theorem are derived. Probability Theory is then discussed, with topics including independence, conditional probabilities, and the Law of Large Numbers.

MATH3974
Fluid Dynamics (Advanced)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points Intermediate Mathematics with average grade of at least Credit. Prohibitions: MATH3914. Assumed knowledge: MATH2961, MATH2965. Assessment: One 2 hour exam.

This unit of study provides an introduction to fluid dynamics, starting with a description of the governing equations and the simplifications gained by using stream functions or potentials. It develops elementary theorems and tools, including Bernoulli's equation, the role of vorticity, the vorticity equation, Kelvin's circulation theorem, Helmholtz's theorem, and an introduction to the use of tensors. Topics covered include viscous flows, lubrication theory, boundary layers, potential theory, and complex variable methods for 2-D airfoils. The unit concludes with an introduction to hydrodynamic stability theory and the transition to turbulent flow.

MATH3975
Financial Mathematics (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points Intermediate Mathematics. Prohibitions: MATH3975, MATH3015, MATH3933. Assessment: Two class quizzes and one 2 hour exam.

This unit is an introduction to the mathematical theory of modern finance. Topics include: notion of arbitrage, pricing riskless securities, risky securities, utility theory, fundamental theorems of asset pricing, complete markets, introduction to options, binomial option pricing model, discrete random walks, Brownian motion, derivation of the Black-Scholes option pricing model, extensions and introduction to pricing exotic options, credit derivatives. A strong background in mathematical statistics and partial differential equations is an advantage, but is not essential. Students completing this unit have been highly sought by the finance industry, which continues to need graduates with quantitative skills. The lectures in the Normal unit are held concurrently with those of the corresponding Advanced unit.

MATH3976
Mathematical Computing
Credit points: 6 Teacher/Coordinator: Dr D J Ivers. Session: Semester 1. Classes: Three 1 hour lectures and one 1 hour laboratory per week. Prerequisites: 12 credit points of Intermediate Mathematics and one of MATH1001 or 1003 or 1901 or 1903 or 1906 or 1907. Prohibitions: MATH3976, MATH3016, MATH3916. Assessment: One 2 hour exam, assignments, quizzes.

This unit of study provides an introduction to Fortran 95 programming and numerical methods. Topics covered include computer arithmetic and computational errors, systems of linear equations, interpolation and approximation, solution of nonlinear equations, quadrature, initial value problems for ordinary differential equations and boundary value problems.

MATH3977
Lagrangian & Hamiltonian Dynamics (Adv)
Credit points: 6 Teacher/Coordinator: Dr Leon Poladian. Session: Semester 2. Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: 12 credit points of Intermediate Mathematics with at least Credit average. Prohibitions: MATH2904, MATH2004, MATH3917. Assessment: One 2 hour exam and assignments.

This unit provides a comprehensive treatment of dynamical systems using the mathematically sophisticated framework of Lagrange and Hamilton. This formulation of classical mechanics generalizes elegantly to modern theories of relativity and quantum mechanics. The unit develops dynamical theory from the Principle of Least Action using the calculus of variations. Emphasis is placed on the relation between the symmetry and invariance properties of the Lagrangian and Hamiltonian functions and conservation laws. Coordinate and canonical transformations are introduced to make apparently complicated dynamical problems appear very simple. The unit will also explore connections between geometry and different physical theories beyond classical mechanics. Students will be expected to solve fully dynamical systems of some complexity including planetary motion and to investigate stability using perturbation analysis. Hamilton-Jacobi theory will be used to elegantly solve problems ranging from geodesics (shortest path between two points) on curved surfaces to relativistic motion in the vicinity of black holes. This unit is a useful preparation for units in dynamical systems and chaos, and...
complements units in differential equations, quantum theory and general relativity.

**MATH3078**

**PDES and Waves**

Credit points: 6  
Session: Semester 2  
Classes: Three 1 hour lectures and one 1 hour tutorial per week.  
Prerequisites: 12 credit points of Intermediate Mathematics  
Prohibitions: MATH3078, MATH3018, MATH3921  
Assumed knowledge: MATH(2061/2961) and MATH(2065/2965)  
Assessment: One 2 hour exam, one lecture quiz

This unit of study introduces Sturm-Liouville eigenvalue problems and their role in finding solutions to boundary value problems. Analytical solutions of linear PDEs are found using separation of variables and integral transform methods. Three of the most important equations of mathematical physics - the wave equation, the diffusion (heat) equation and Laplace’s equation - are treated, together with a range of applications. There is particular emphasis on wave phenomena, with an introduction to the theory of sound waves and water waves.

Textbooks  

**MATH3978**

**PDES and Waves (Advanced)**

Credit points: 6  
Session: Semester 2  
Classes: Three 1 hour lectures and one 1 hour tutorial per week.  
Prerequisites: 12 credit points of Intermediate Mathematics with at least Credit average  
Prohibitions: MATH3078, MATH3018, MATH3921  
Assumed knowledge: MATH(2061/2961) and MATH(2065/2965)  
Assessment: One 2 hour exam, one lecture quiz

As for MATH3078 PDEs & Waves but with more advanced problem solving and assessment tasks. Some additional topics may be included.

Textbooks  

**Statistics Intermediate units of study**

The School of Mathematics and Statistics provides Intermediate units of study, each worth 6 credit points, in Statistics. A normal Intermediate load in a discipline is 12 credit points and students intending to specialise in Senior Statistics should take 2 units of study (12 credit points) of Intermediate Statistics. Topics are offered at Normal and Advanced levels and may not be counted together. Further information follows, whilst details of units of study structure, content and assessment procedures are provided in the Intermediate Year Unit of Study Handbook available from the School at the time of enrolment.

The units of study (each 6 credit points) are listed below:

- **First semester**

  Statistical Models STAT2011; Probability and Statistical Models (Adv) STAT2911

- **Second semester**

  Statistical Tests STAT2012; Statistical Tests (Advanced) STAT2912

**Relation to other units of study and recommendations**

Students should note that all Senior Statistics units of study have statistics prerequisites and some require MATH1003 or 1903 or MATH1002 or 1902. MATH2061 or MATH2961 is also desirable. If your major interest is statistics, then you are encouraged to enrol in 2 units of study (12 credit points) in Intermediate Statistics. If you are considering doing Honours in Statistics, these units of study should be the Advanced units of study, and choices from Intermediate Mathematics should include at least MATH2061 or 2961. If you do not intend to major in Statistics but want a solid introduction to Applied Statistics, you should take STAT2012 in your second semester.

**STAT2011**

**Statistical Models**

Credit points: 6  
Session: Semester 1  
Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory week.  
Prerequisites: MATH (1001 or 1901 or 1906 or 1011) and (MATH(1005 or 1905 or 1015) or STAT1021)  
Prohibitions: STAT2901, STAT2001, STAT2911  
Assessment:  
One 2 hour exam, assignments, quizzes, computer practical reports, one 1 hour computer practical class assessment task

This unit provides an introduction to univariate techniques in data analysis and the most common statistical distributions that are used to model patterns of variability. Common discrete random models like the binomial, Poisson and geometric and continuous models including the normal and exponential will be studied. The method of moments and maximum likelihood techniques for fitting statistical distributions to data will be explored. The unit will have weekly computer classes where candidates will learn to use a statistical computing package to perform simulations and carry out computer intensive estimation techniques like the bootstrap method.

**STAT2911**

**Probability and Statistical Models (Adv)**

Credit points: 6  
Session: Semester 1  
Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week.  
Prerequisites: MATH (1903 or 1907 or Credit in 1003) and MATH (1905 or Credit in 1005)  
Prohibitions: STAT2001, STAT2911, STAT2901  
Assessment:  
One 2 hour exam, assignments, quizzes, computer practical reports, one 1 hour computer practical class assessment task

This unit is essentially an advanced version of STAT2011, with an emphasis being on the mathematical techniques used to manipulate random variables and probability models. Common random variables including the Poisson, normal, beta and gamma families are introduced. Probability generating functions and convolution methods are used to understand the behaviour of sums of random variables. The method of moments and maximum likelihood techniques for fitting statistical distributions to data will be explored. The unit will have weekly computer classes where candidates will learn to use a statistical computing package to perform simulations and carry out computer intensive estimation techniques like the bootstrap method.

**STAT2012**

**Statistical Tests**

Credit points: 6  
Session: Semester 2  
Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week.  
Prerequisites: MATH(1005 or 1905 or 1015)  
Prohibitions: STAT2004, STAT2912  
Assumed knowledge: STAT (2011 or 2002)  
Assessment: One 2 hour exam, assignments, quizzes, computer practical reports, one 1 hour computer practical class assessment task

This unit provides an introduction to the standard methods of statistical analysis of data: Tests of hypotheses and confidence intervals, including t-tests, analysis of variance, regression - least squares and robust methods, power of tests, non-parametric tests, non-parametric smoothing, tests for count data, goodness of fit, contingency tables. Graphical methods and diagnostic methods are used throughout with all analyses discussed in the context of computation with real data using an interactive statistical package.

**STAT2912**

**Statistical Tests (Advanced)**

Credit points: 6  
Session: Semester 2  
Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week.  
Prerequisites: MATH1905 or Credit in MATH1005  
Prohibitions: STAT2004, STAT2012  
Assumed knowledge: STAT (2911 or 2901)  
Assessment: One 2 hour exam, assignments, quizzes, computer practical reports, one 1 hour computer practical class assessment task

This unit is essentially an advanced version of STAT2012 with an emphasis on both methods and the mathematical derivation of these methods: Tests of hypotheses and confidence intervals, including t-tests, analysis of variance, regression - least squares and robust methods, power of tests, non-parametric methods, non-parametric smoothing, tests for count data, goodness of fit, contingency tables. Graphical methods and diagnostic methods are used throughout with all analyses discussed in the context of computation with real data using an interactive statistical package.

**Statistics senior units of study**

The School of Mathematics and Statistics provides several Senior units of study, each worth 6 credit points, in Statistics. Students wishing to major in Statistics should take 4 units of study (24 credit points) of Senior Statistics. Some topics are offered at Normal and Advanced levels and may not be counted together. Entry to some Advanced
units of study requires a Credit or better in a Normal level prerequisite or a Pass or better in an Advanced level prerequisite. Further information follows, whilst details of unit of study structure, content, and assessment procedures are provided in the Senior Units of Study Handbook available from the School at the time of enrolment. The units of study (each 6 credit points) are listed below:

**First semester**

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Relation to other units of study and recommendations**

In general 4 units of study (24 credit points) are required in order to major in Statistics, and a Credit average is required to progress to an Honours year. Potential Honours students are expected to include at least two Advanced level units of study. Students intending to major in Statistics should choose 2 units of study of Senior Statistics each semester, making 24 credit points in total.

**Credit points:** 6 Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week; ten 1 hour computer laboratories per semester.

**Prerequisites:** STAT (2011 or 2911 or 2001 or 2901) and MATH (1003 or 1903 or 1907). **Prohibitions:** STAT3911, STAT3003, STAT3903, STAT3005, STAT3905 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports.

Section I of this course will introduce the fundamental concepts of applied stochastic processes and Markov chains used in financial mathematics, mathematical statistics, applied mathematics and physics. Section II of the course establishes some methods of modeling and analysing situations which depend on time. Fitting ARMA models for certain time series are considered from both theoretical and practical points of view. Throughout the course we will use the S-PLUS (or R) statistical packages to give analyses and graphical displays.

**STAT3911**

**Stochastic Processes and Time Series Adv**

**Credit points:** 6 Session: Semester 1 Classes: Three 1 hour lecture, one 1 hour tutorial per week, plus an extra 1 hour lecture per week on advanced material in the first half of the semester. Seven 1 hour computer laboratories (on time series) in the second half of the semester (one 1 hour class per Prerequisites: STAT2911 or credit in STAT2011) and MATH(1003 or 1903 or 1907). **Prohibitions:** STAT3011, STAT3003, STAT3903, STAT3005, STAT3905 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports.

This is an Advanced version of STAT3011. There will be 3 lectures in common with STAT3011. In addition to STAT3011 material, theory on branching processes and birth and death processes will be covered. There will be more advanced tutorial and assessment work associated with this unit.

**STAT3012**

**Applied Linear Methods**

**Credit points:** 6 Session: Semester 1 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratories per week. **Prerequisites:** STAT(2012 or 2912 or 2004) and MATH(1002 or 1902). **Prohibitions:** STAT3912, STAT3002, STAT3902, STAT3004, STAT3904 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports, one 1 hour computer practical class assessment task.

This course will introduce the fundamental concepts of analysis of data from both observational studies and experimental designs using classical linear methods, together with concepts of collection of data and design of experiments. First we will consider linear models and regression methods with diagnostics for checking appropriateness of models. We will look briefly at robust regression methods here. Then we will consider the design and analysis of experiments considering notions of replication, randomization and ideas of factorial designs. Throughout the course we will use the S-PLUS (or R) statistical packages to give analyses and graphical displays.

**STAT3912**

**Applied Linear Methods Advanced**

**Credit points:** 6 Session: Semester 1 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2912 or Credit in STAT2004 or Credit in STAT2012) and MATH(2061 or 2961 or 1902). **Prohibitions:** STAT3012, STAT3002, STAT3902, STAT3004, STAT3904 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports, one 1 hour computer practical class assessment task.

This unit is essentially an Advanced version of STAT3012, with emphasis on the mathematical techniques underlying applied linear models together with proofs of distribution theory based on vector space methods. There will be 3 lectures per week in common with STAT3012 and some advanced material given in a separate advanced tutorial together with more advanced assessment work.

**STAT3013**

**Statistical Inference**

**Credit points:** 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2012 or 2912 or 2004 or 1903). **Prohibitions:** STAT3913, STAT3001, STAT3901 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports, one 1 hour computer practical class assessment task.

In this course we will study basic topics in modern statistical inference. This will include traditional concepts of mathematical statistics: likelihood estimation, method of moments, properties of estimators, exponential families, decision-theory approach to hypothesis testing, likelihood ratio test as well as more recent approaches such as Bayes estimation, Empirical Bayes and nonparametric estimation. During the weekly computer classes (using S-PLUS or R software packages) we will illustrate the various estimation techniques and give an introduction to computationally intensive methods like Monte Carlo, Gibbs sampling and EM-algorithm.

**STAT3913**

**Statistical Inference Advanced**

**Credit points:** 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2912 or 2903). **Prohibitions:** STAT3013, STAT3001, STAT3901 **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports, one 1 hour computer practical class assessment task.

This unit is essentially an Advanced version of STAT3013, with emphasis on the mathematical techniques underlying statistical inference together with proofs based on distribution theory. There will be 3 lectures per week in common with some material required only in this advanced course and some advanced material given in a separate advanced tutorial together with more advanced assessment work.

**STAT3014**

**Applied Statistics**

**Credit points:** 6 Session: Semester 2 Classes: Three 1 hour lectures, one 1 hour tutorial and one 1 hour computer laboratory per week. **Prerequisites:** STAT(2012 or 2912 or 2004). **Prohibitions:** STAT3914, STAT3002, STAT3902, STAT3006 **Assumed knowledge:** STAT(2012 or 3912). **Assessment:** One 3 hour exam, assignments / quizzes, computer practical reports, one 1 hour computer practical assessment task.

This unit has three distinct but related components: Multivariate analysis; sampling and surveys; and generalized linear models. The first component deals with multivariate data covering simple data reduction techniques like principal components analysis and core multivariate tests including Hotelling’s T^2, Mahalanobis’ distance and Multivariate Analysis of Variance (MANOVA). The sampling section includes sampling without replacement, stratified sampling, ratio estimation, and cluster sampling. The final section looks at the analysis of categorical data via generalized linear models. Logistic regression and log-linear models will be looked at in some detail along with special techniques for analyzing discrete data with special structure.
STAT3914
Applied Statistics Advanced
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour computer laboratory per week plus an extra hour each week which will alternate between lectures and tutorials. Prerequisites: STAT2912 or credit or better in (STAT2004 or STAT2012). Prohibitions: STAT3014, STAT3002, STAT3002, STAT3902, STAT3907 Assumed knowledge: STAT3912 Assessment: One 3 hour exam, quizzes, computer practical reports, one 1 hour computer practical assessment task.
This unit is an Advanced version of STAT3014. There will be 3 lectures per week in common with STAT3014. The unit will have extra lectures focusing on multivariate distribution theory developing results for the multivariate normal, partial correlation, the Wishart distribution and Hotelling’s T^2. There will also be more advanced tutorial and assessment work associated with this unit.

Media and Communications units of studies
The following units of study are only available to students in the Bachelor of Science Media and Communications degree.
MECO1001
Australian Media Studies
Credit points: 6 Teacher/Coordinator: Dr M Brennan Session: Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: One 1500 word essay (30%); One 1500 word essay (40%); one 2 hour exam (30%). Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.
This unit offers an introduction to the history and theory of media and communications studies. Students will gain a foundation in key concepts, methodologies and theorists in the field. They will also explore the interdisciplinary roots of media and communications studies and acquire basic research skills. By the end of the unit students should be familiar with major shifts in the history and theory of media and communications studies and with basic concepts and methodologies in the field.
Textbooks
It is recommended that students purchase a reader from the Copy Centre. Recommended Reading: Alan McKee, Textual Analysis: A Beginner’s Guide, SAGE London, 2003

MECO1003
Principles of Media Writing
Credit points: 6 Teacher/Coordinator: A/Prof C Lumby Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: One 1500 word essay (30%); one 500 word colour news story (20%); one 700 word broadcast script (20%) and one 2 hour exam (30%). Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.
This unit will give students foundational skills in writing for the print and broadcast media. Students will learn the elements of journalistic style, how to structure news and feature articles, how to script basic broadcast and online news, and be introduced to the principles of interviewing and journalistic research.
Textbooks

David Conley, ‘The Daily Miracle: An Introduction to Journalism’, Oxford University Press, Melbourne, 1997; Style, News Custom, 2005; Graeme Turner and Stuart Cunningham, Media and Communications in Australia, Allen and Unwin, Sydney, 2006; Style, News Custom, 2005

MECO2601
Radio Broadcasting
Credit points: 6 Teacher/Coordinator: Dr A Dunn Session: Semester 1 Classes: One 2 hour lecture and one 2 hour workshop per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1005 or LNGS1005 for students who commenced prior to 2005) Prohibitions: MECO2601 Assessment: One radio news exercise, one production diary, radio scripts and final work (equivalent 2500 words) and one 2 hour exam. Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.

This unit is designed to introduce students to the history, nature and contemporary status of radio. It specifically considers such concepts as news values and the role of the Internet in audio broadcasts. Students will also apply critical analytical approaches to radio and online broadcast texts. Practically, the unit offers an introduction to radio presentation and production, using professional quality digital audio recording and editing facilities.
Textbooks

MECO3603
Media, Law and Ethics
Credit points: 6 Teacher/Coordinator: Dr S Maras Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1005 or LNGS1005 for students who commenced prior to 2005). Prohibitions: MECO3003 Assessment: One 2000 word essay (40%), one 2 hour exam (40%) and one Web CT Posting (20%). Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.

MECO3603 will introduce students to the area of Media Law and Ethics through discussion of key legal, ethical, and cultural issues relevant to journalism and the professional fields of public communication. Students will be given an introductory survey of the main ethical theories in Western thought to establish a framework within which to examine specific ethical issues that relate to media. They will also be introduced to those aspects of the law that impinge on the work of media professionals.

Textbooks
There is a Reader of key articles, available from the University Copy Centre. There are also two textbooks:

MECO3601
Video Production
Credit points: 6 Teacher/Coordinator: Dr S Maras Session: Semester 2 Classes: One 2 hour lecture and one 2 hour workshop per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1005 or LNGS1005 for students who commenced prior to 2005). Prohibitions: MECO3001 Assessment: Individual 90 second News Piece; Group production video; weekly Production Report; Reflection statement; 2 hour exam. Practical field work: This unit will involve substantial group video production project work outside of class time. Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.

This is an introduction to the theory and practice of digital video production, with a strong practical component, emphasizing information-based programming (news, current affairs, corporate video, documentary and infotainment). Students will be expected to produce short video items individually and in groups, using professional standard desktop editing software.
Textbooks
There is a recommended Reader, available from the University Copy Centre. Supplementary text:

MECO3602
Online Media
Credit points: 6 Teacher/Coordinator: Ms K Crawford Session: Semester 2 Classes: One 1 hour lecture and one 2 hour seminar per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1005 or LNGS1005 for students who commenced prior to 2005). Prohibitions: MECO3002 Assessment: Group produced web site (50%); one individual production essay (20%); one two hour exam (30%); one web site proposal (Pass/Fail). Practical field work: This unit will involve substantial group web site production project work outside of class time. Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.
This unit will examine the role of the Internet, new media and the way the web is changing the media landscape. It explores the development and growth of the Internet, and provides a critical framework in which to understand the current industry. By the end of the unit, students will be familiar with key theoretical and cultural issues in online media, and will engage in both offline and online analysis of the Internet. Students will also gain practical skills in writing and producing for the web and will develop their own web sites.

Textbooks
There is a reader of key articles, available from the University Copy Centre. There is also one textbook:

MECO3603
Media, Law and Ethics
Credit points: 6 Teacher/Coordinator: Dr S Maras. Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1085 or LNGS1005 for students who commenced prior to 2005). Prohibitions: MECO3003 Assessment: One 2000 word essay (40%), one 2 hour exam (40%) and one Web CT Posting (20%) Note: Available to BA (Media and Comm) and BSc (Media and Comm) students only.

MECO3603 will introduce students to the area of Media Law and Ethics through discussion of key legal, ethical, and cultural issues relevant to journalism and the professional fields of public communication. Students will be given an introductory survey of the main ethical theories in Western thought to establish a framework within which to examine specific ethical issues that relate to media. They will also be introduced to those aspects of the law that impinge on the work of media professionals.

MECO3605
Media Globalisation
Credit points: 6 Teacher/Coordinator: Dr M Brennan. Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prerequisites: 12 junior credit points of MECO units and ENGL1000 (or ENGL1050 or ENGL1085 or LNGS1005 for students who commenced prior to 2005). Prohibitions: MECO3005 Assessment: One 2000 word essay (40%); tutorial presentation/ debate (20%) and one 2 hour exam (40%) Note: Available to BA (Media and Comm) and, subject to departmental approval, students undertaking a major in Cultural Studies.

This unit aims to demonstrate the complexity of media globalisation and to examine in depth some of the common assumptions associated with the term. While the unit will consider the impact of global market forces (i.e. cheap labour in developing countries, environmental issues, etc), it is interested in the dynamics of globalisation more generally, and media globalisation more specifically. Students can expect to appreciate that media globalisation is a complex proposal that involves formats, localisation, symbolic currency and negotiation.

Textbooks
It is recommended that students purchase a reader from the Copy Centre. Recommended Reading:
- Stuart Cunningham and Graeme Turner (Ed.), The Media and Communications in Australia. Allen & Unwin, Sydney, 2002

MECO3671
Media and Communications Internship
Credit points: 6 Teacher/Coordinator: Ms I Blue. Session: Semester 1. Semester 2. Summer Main. Winter Main Classes: There are no lectures, but attendance may be required at a programme of industry talks. Prerequisites: 30 senior credit points of MECO, including MECO3603. Students may not enrol in MECO3671 prior to the second semester of their 3rd year. Assessment: Students must satisfy the requirements of an internship contract with their workplace, including attendance and performance, as evaluated through a workplace supervisor report.
BMED2802
Molecular Basis of Medical Sciences
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916)
Assessment: One 2hr exam; on-line quizzes, prac reports

This unit of study extends pre-existing understanding of the way in which genetic information is stored, transmitted and expressed. Students will be introduced to the role of enzymes in the catalysis of cellular reactions and the pharmacological strategies employed to exploit our knowledge of these mechanisms is then discussed. Intracellular signalling cascades, cell to cell signalling and pharmacological intervention in these processes is covered. The molecular basis of drug action and the use of DNA technology in drug design will be discussed. Students will then cover the application of medical genetics to the study of advanced gene expression, recombinant technology, cloning and gene products, transgenics and the linkage and mapping of genes including reference to DNA fingerprinting and the human genome project and gene therapy. The technical skills taught in the practical classes include the use of restriction enzymes, the separation of DNA molecules using electrophoresis, the inspection of chromosomes, linkage mapping, gene transfer and the measurement of gene expression. In addition to nurturing the skills involved in the design and execution of experiments, the practical sessions will formally teach students report writing skills and will give students practice at articulating feedback to their peers.

BMED2803
Cardiac, Respiratory and Renal Function
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916)
Assessment: One 2hr exam; on-line quizzes, essay, prac reports

The maintenance of constant conditions in the human body is dependent on thousands of intricate control mechanisms. This unit of study examines how these homeostatic processes work with specific reference to major apparatus such as the respiratory, cardiovascular and renal. The structure and function of the cardiovascular system is discussed and cardiac output, blood pressure and blood flow are studied. Discussion of the respiratory system embraces the structure of the respiratory organs and description of the mechanism of the transport of gases to and from cells. Similar treatment of the renal system involves anatomical and histological investigation of kidney structure and a physiological description of kidney function. Practical classes are designed to nurture the same generic attributes taught in BMED2801 and BMED2802 but, in addition, students are introduced to a wide range of anatomical and physiological technical skills. Specifically, students will investigate the structure and function of the heart and blood vessels, the components of the respiratory system and the kidney - all at the cellular and organ level. Students will also conduct experiments (often on themselves) which show how heart rate and blood pressure are controlled, how breathing is regulated and how urine output is modulated in response to both physiological and pharmacological stimuli.

BMED2804
Digestion, Absorption and Metabolism
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916)
Assessment: One 2hr exam; on-line quizzes, prac reports

This unit of study gives an introduction to the structures used to digest and absorb fuels, at both the anatomical and histological level. This is then followed by discussion of the utilisation and fate of absorbed nutrients. After an overview of the alimentary tract and associated organs, the detailed anatomy of the oral cavity, oesophagus, stomach, intestines, liver, etc is considered. This is complemented by description of the specialised cell types in the digestive system, discussion of the transport mechanisms employed to absorb nutrients, and consideration of the control systems used to regulate activity of the digestive process. The role of intestinal microflora in the gastrointestinal tract, contributing to both beneficial digestion and absorption of nutrients, as well as to pathogenic disruption, is also discussed in this unit of study. The fundamentals of metabolism are introduced, in particular, the chemical reactions that are responsible for fuel processing. The pharmacokinetic angle is explored further with discussion of the metabolism and absorption of drugs including the detoxification and excretion of xenobiotic compounds. Practical classes give students extensive experience with inspection of the digestive system at both the cellular and gross anatomical level. The peristaltic reflex and pharmacological influences are explored. These sessions are designed to nurture observation, data analysis, record keeping and report writing skills.

BMED2805
Hormone, Reproduction and Development
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916)
Assessment: One 2 hour exam; quizzes, essay, practical assay

This unit of study examines hormonal control of human body processes. Specifically, students will investigate the structure and function of endocrine glands: the pituitary, thyroid and pancreas - all at the cellular and organ level. Examples of the influence of hormones on metabolic processes are provided by consideration of fuel selection during exercise and starvation, and diabetes and obesity. This enables students to appreciate the extent of the contribution of hormones to organ co-ordination in response to circumstances such as starvation, obesity, exercise and diabetes. Students extrapolate to consider the regulation of fuel selection during exercise and the cause of fatigue. The fate of the macronutrients (carbohydrate, fat and protein) is then considered by reference to their uptake, disposal and reassembly into storage fuels and cellular structures. The biochemical pathways involved in the extraction of energy from the macronutrient fuels are then covered, with particular emphasis on the whole body integration and regulation of these metabolic processes. This leads onto discussion of performance enhancing drugs and also provides a solid background for the understanding of pharmacological intervention in these conditions. The hormones involved in reproduction, contraception, fertilisation and pregnancy are also discussed, leading on to foetal-new-born transition and discussion of the development of the human embryo and cell differentiation. In the practical classes, students are introduced to a wide range of biochemical technical skills. Specifically, students will investigate the structure and function of the important endocrine glands - all at the cellular and organ level. Students will design a biochemical kit for the evaluation of blood glucose and will perform a glucose tolerance test to investigate how glucose levels are regulated and modulated in response to a glucose load. In addition, sessions are designed to nurture oral presentation skills, hypothesis testing, data analysis, troubleshooting, instruction writing and feedback skills.

BMED2806
Sensory and Motor Functions
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916)
Assessment: One 2 hour exam; on-line quizzes, practical reports

This unit of study examines how neural and motor systems are adapted to sense and respond to changes in the external environment. After consideration of the basic anatomical organisation of the nervous and sensory systems, the way in which nerve signals are integrated and co-ordinated in response to external stimuli are covered in more
10. Undergraduate units of study

detail. Various senses such as vision, touch and hearing are studied, together with a discussion on motor reflexes. The receptors involved in normal modes of communications are discussed before specific examples such as the fright and flight and stress responses are considered. This is complemented by discussion of the effects of drugs on the nervous system, with special reference to pain and analgesics. An appreciation is gained of how toxins and infections can perturb the normal neuromuscular co-ordination. Thus pharmacological and pathological considerations, such as the use of poisoned arrows and muscle paralysis and viral and tetanus infections, are studied in concert with relevant physiological concepts. In practical classes, students perform experiments (often on themselves) to illustrate the functioning of the senses and motor control and co-ordination involving both stretch and flexor reflexes. In addition, students extend their anatomical expertise by examining the structure and function of the nervous system and the skeleton (especially the vertebral column, the thorax and the limbs). Practical sessions also include the effects of analgesics on experimental pain and case studies of tetanus and botulism. The practical sessions draw widely on, and nurture, the generic skills taught in preceding units of study but particularly in BMED2804 and BMED2805.

BMED2807

Microbes and Body Defences

Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) Assessment: One 2 hour exam; on-line quizzes, continuous assessment, practical examinations

This unit of study begins by introducing the concepts of disease transmission, pathogenicity and virulence mechanisms of microbes. How the body deals with injury and infection is discussed by exploring host defences. Sections on wound healing, clotting and inflammation cover the response to physical damage and this is complemented by discussion of the pharmacological basis of anti-inflammatory agents and anti-coagulants. For a full understanding of the process of infection, it is necessary to have an appreciation of the range of pathogens and injuries with which the body must cope. Therefore this unit of study examines the structure and function of pathogenic microorganisms (including bacteria, fungi, protists, and viruses, etc). The response of the body to pathogen invasion is studied by discussion of both molecular and cellular immune responses. In particular, this gives students an appreciation of the structure, production and diversity of antibodies, the processing of antigens, operation of the complement system and recognition and destruction of invading cells. This allows students to appreciate the basis of derangements of the immune system and the mechanism of action of immunosuppressive drugs. Practical classes allow students to obtain experience in, and an understanding of, a range of techniques in classical and molecular virology, bacteriology and immunology. In addition, the practical sessions draw widely on, and nurture, the generic skills taught in preceding units of study.

BMED2808

Disease in Society

Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week; five hours of tutorials or practicals every fortnight. Prerequisites: 42 credit points of Junior Bachelor of Medical Science units of study Prohibitions: All Intermediate level units offered by the Schools of Molecular and Microbial Biosciences, Medical Sciences and BIOL(2006/2906) and BIOL(2016/2916) Assessment: One 2 hour exam; quizzes, continuous assessment

Disease in Society seeks to integrate basic knowledge of important diseases, ranging from metabolic diseases through infections and heart disease to ‘social’ diseases such as drug addiction and use of psychoactive compounds. About half the unit considers infectious diseases: viral, bacterial, fungal and parasitic. The other half looks at inherited disorders, cardio-respiratory disorders such as angina, heart failure and asthma. Society’s approaches to dealing with these diseases - whether by pharmacological intervention, counselling or lifestyle change are discussed. Putting the disease in the relevant social context is emphasized in all aspects of the unit. The impact of bacteria and viruses on individuals and society is taught with reference to specific infectious diseases (eg influenza, polio, herpes, STDs, etc) and this leads into an introduction of epidemiology. Included in the discussion is the way in which these organisms cause and transmit disease is a consideration of how antibiotics and anti-viral drugs work and how microbes can become drug resistant. Practical classes are designed to complement the lectures and provide a ‘hands-on’ experience in investigating disease. Also included are tutorial sessions in which hospital microbiologists guide students through clinical case studies and in an integrated session, students examine the infection, immunity and pathology of tuberculosis. These sessions are designed to foster an appreciation of the importance of an integrative approach to the study of disease in today’s society. The generic skills taught in preceding units of study are further reinforced.

Bachelor of Medical Science Senior Core units of study

Students are required to complete at least 36 credit points of Senior units of study chosen from the core subject areas of Anatomy and Histology, Biology (Genetics), Biochemistry, Cell Pathology, Immunology, Infectious diseases, Microbiology, Pharmacology and Physiology, as listed in Table IV. Descriptions are listed here and under the relevant department headings in this chapter where the units are offered by other Schools/Departments in the faculty.

INFD3012

Infectious Diseases

Credit points: 6 Teacher/Coordinator: A/Prof. Colin Harbour Session: Semester 2 Classes: One 1 hour lecture and one 1 hour tutorial and one 2 hour practical and one 2 hour case study or theme session a week. Prerequisites: 42 credit points of intermediate BMED units including BMED2807. Assumed knowledge: Intermediate microbiology, immunology, molecular biology and genetics. Assessment: Formal examination: one 2 hour exam, 60% Progressive assessment: includes: 2000w essay, tutorial case presentation, poster presentation, 40%

Note: The completion of MICR3011 is strongly recommended prior to undertaking this course.

Infectious diseases occur as a result of interactions between a host and a microbial parasite. This unit of study will explain how infectious agents interact with human hosts at the molecular, cellular, individual patient and community levels to cause diseases and how the hosts attempt to combat these infections. The unit will be taught by the discipline of Infectious Diseases and Immunology of the Department of Medicine within the Central Clinical School, Faculty of Medicine with involvement of associated clinical and research experts who will contribute lectures and their own experience in infectious diseases. The primary learning vehicle in this unit will be the case study involving three or four cases per week on the diseases theme of the week, e.g. Pneumonia in week 1, wound infections in week 2 etc. Students are strongly recommended to complete MICR3011 before enrolling in this unit.

Textbooks

Bachelor of Medical Science Honours

The Bachelor of Medical Science Honours degree is governed by regulations of the Senate and of the Faculty of Science as described in chapter 5. An Honours degree may be taken by students of sufficient merit in any of the Departments offering Senior level core units. Entry to Honours units is regulated by individual Departments and the exact detail of Honours programs also varies from Department to Department. Students interested in undertaking Honours should consult the relevant Department for further details.

Medical Science Honours - Infectious Diseases Honours

The Honours program in Infectious Diseases provides the opportunity for full-time research on a proposed project supervised by a staff member expert in that field. Experimental research, a seminar and a thesis constitute the major part of the program and of assessment. Guidance in research techniques is given in training programs covering experimental design, data analysis, written and oral communication
and critical appraisal of the literature. Student contributions to this program are also assessed. In addition, a supplementary seminar program keeps students informed and abreast of wider issues in infectious diseases.

Applying for admission to Infectious Diseases Honours

Students are invited to apply for Honours enrolment during semester two of the year preceding Honours. Applicants should consult the Honours coordinator in the first instance. A list of possible research topics is provided, and students select projects of interest, speak with prospective supervisors and apply for permission to enrol, before the end of semester two. Within the constraints of availability, an attempt is made to assign students to the project of their choice. Usually Honours candidates will have achieved a Credit in the senior unit Infectious Diseases and will also have successfully completed Senior study in Biochemistry, Microbiology, or Virology. Usually Honours candidates will have an overall SCIWAM of 65 or greater. Departmental permission is required for enrolment.

Medicinal Chemistry

Medicinal Chemistry is an interdisciplinatory major offered within the BSc. It is concerned with the chemistry underpinning the design, discovery and development of new pharmaceuticals, and is jointly administered by the School of Chemistry and the Department of Pharmacology. Medicinal Chemistry examines why some types of chemical compounds are toxic, why some have therapeutic value, and the mode of drug action at the molecular level. A major in Medicinal Chemistry includes the study of natural and synthetic compounds of biological and medicinal importance, how molecules interact with each other and how specific molecules can influence metabolic pathways in living organisms. A student seeking to complete this major will study Junior and Intermediate Chemistry, and also Intermediate Pharmacology, as prerequisites for the Senior units of study. Refer to Table 1 for an enrolment guide and to entries under the contributing schools and departments for unit descriptions.

Microbiology

The discipline of Microbiology in the School of Molecular and Microbial Biosciences offers units of study that equip students for a career in Microbiology in fields of health, industry and basic research. In addition, it provides introductory units of study to students of agriculture, pharmacy and science. These units of study will help students who wish to specialise in related fields where microorganisms are often used in studying life processes, e.g. biochemistry, genetics and botany.

Microbiology Intermediate units of study

MICR2021

Introductory Microbiology

Credit points: 6

Teacher/Coordinator: Dr Dee Carter

Session: Semester 1

Classes: Two 1 hour lectures per week, plus an additional six 1 hour lectures or tutorials per semester. Eleven 3 hour practicals per semester.

Prerequisites: 6cp of Junior Biology and (6cp of MBLG1001 or MBLG2901 or PLNT2001 or PLNT2911) and 6cp of Junior Chemistry

Assessment: One 2 hour exam, continuous assessment in practical, 2 assignments, practical exam

Note: Students are very strongly recommended to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2022 or 2922 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG1001 or PLNT (2001 or 2901).

MICR2022

Microbes in Society

Credit points: 6

Teacher/Coordinator: Dr Nick Coleman

Session: Semester 2

Classes: Two 1 hour lectures per week, plus an additional six 1 hour lectures or tutorials per semester. Eleven 3 hour practicals per semester.

Prerequisites: 6cp of Junior Biology and (6cp of MBLG1001 or PLNT2001 or PLNT2911) and 6cp of Junior Chemistry

Assumed knowledge: MICR (2021 or 2921 or 2024)

Assessment: One 2 hour exam, continuous assessment in prac, 2 assignments, prac exam

Note: Students are very strongly advised to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2022 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG1001 or PLNT (2001 or 2901).

Microorganisms have a large impact on human society, and are particularly notorious as the causative agents of infectious diseases. However, microbes also have many beneficial roles in agricultural, industrial, biotechnological, and environmental processes. Understanding the biology of microorganisms and their relationship to human society is critical to fighting the ‘bad’ microbes, and harnessing the activities of the ‘good’ microbes. MICR2022 will build on the skills and knowledge gained in MICR2021/2921. An extensive set of Medical Microbiology lectures will cover bacterial, viral, and fungal pathogenesis, and will introduce key concepts including epidemiology and disease transmission. Pathogenicity, host/pathogen interactions, host defences, prevention of disease, and antibiotic types and functions. Lecture topics in other areas include Food Microbiology (microbial ecology of food, fermentation and production, spoilage and food poisoning), Agricultural Microbiology (plant/microbe associations), Microbial Evolution and Genomics (incl. structural and functional genomics), and Industrial Microbiology (large-scale fermentation, traditional and recombinant products, biosensors and biocatalysts, biodeterioration and biodegradation). The laboratory sessions are integrated with the lecture series and are designed to give students practical experience in isolating, identifying and manipulating microorganisms. Work Experience - students who have completed MICR2021/2921 and MICR2022/2922 and are enrolled in the BSc or BSc (Advanced) may be offered the opportunity to undertake work experience for approximately one month in a local microbiology laboratory (hospital, food, research, environmental, etc) subject to availability of places.

Textbooks

Prescott L M et al. Microbiology. 6th edn, WCB/McGraw-Hill, 2005

MICR2921

Introductory Microbiology (Advanced)

Credit points: 6

Session: Semester 1

Classes: Two 1 hour lectures per week, plus an additional six 1 hour lectures per semester. Eleven 3 hour practicals per semester.

Prerequisites: (6credit points of Junior Biology) and (6credit points of MBLG1001 or MBLG2901 or PLNT2001 or PLNT2911) and 6 credit points of Junior Chemistry

Assessment: One 2 hour exam, continuous assessment in practical, 2 assignments, practical exam

Note: Students are very strongly advised to complete MICR (2021 or 2921 or 2024) before enrolling in MICR2022 or 2922 in Semester 2. For progression on to Senior Microbiology units, students must also complete MBLG1001 or PLNT (2001 or 2901).

This unit of study is based on MICR2021 with approximately six alternative lectures/tutorials on advanced aspects of the material covered in MICR2021. The content and nature of these components may vary from year to year.

Textbooks

As for MICR2021
Prescott L M et al. Microbiology. 6th edn, WCB/McGraw-Hill, 2005

MICR2922
Microbes in Society (Advanced)
Credit points: 6
Session: Semester 2 Classes: Two 1 hour lectures per week, plus an additional six 1 hour lectures per semester. Eleven 3 hour practicals per semester. Prerequisites: 6 credit points of Junior Biology and (6 credit points of MBLG1001 or PLNT2001 or PLNT2901) and 6 credit points of Junior Chemistry. Distinction grade required in at least one of Junior Biology or MBLG1001 or PLNT2001 or PLNT2901. Note: Assumes knowledge: MICR (2021 or 2921 or 2024). Assumed knowledge: MICR (2021 or 2921 or 2024). Assessment: One 2 hour exam, continuous assessment in practical, 2 assignments, practical exam

This unit of study is based on MICR2022 with approximately six alternative lectures/tutorials on advanced aspects of the material covered in MICR2022. The content and nature of the alternative components may vary from year to year.

As for MICR 2021

MICR2024
Microbes in the Environment
Credit points: 6
Teacher/Coordinator: Dr Andrew Holmes
Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour practical per week. Prerequisites: 30 credit points of Junior Science or Faculty of Agriculture, Food and Natural Resource units including 6 credit points of Junior Biology. Prohibitions: MICR2022, MICR2821, MICR2801, MICR2901, MICR2003, MICR2007, MICR2011, MICR2909 Assessment: One 2 hour exam, fortnightly practical quiz, project report and continuous practical assessment.

This unit introduces the diversity of microbes found in soil, water, air, plants and animal environments. Through an examination of their physiology and genetics it explores their interactions with plants, animals and each other, and their roles as decomposers and recyclers in the environment. The soil is a rich microbial environment, and the concept of soil health and its relationship to plant growth is discussed. Practical classes introduce techniques and skills in isolating, quantifying and culturing microbes, designing and interpreting experiments to study microbial growth, and in preparing and presenting data.

Microbiology Senior units of study

MICR3011
Microbes in Infection
Credit points: 6
Teacher/Coordinator: Mrs Helen Agus
Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour practical per week. Prerequisites: At least 6 credit points of MBLG units and MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including in BMED (2807 or 2808) with a Distinction in one of these two. For BScAgr students: PLNT (2001 or 2901) and MICR (2022 or 2922) including one Distinction. Assessment: MICR3011, MICR3001, MICR3901 Assessment: One 2 hour exam, continuous assessment, practical work, one essay, one group presentation.

This unit is available to students who have performed well in Intermediate Microbiology and is based on MICR3011 with a series of additional lectures related to the research interests in the Discipline. Consequently, the unit of study content may change from year to year.

MICR3911
Microbes in Infection (Advanced)
Credit points: 6
Teacher/Coordinator: Mrs Helen Agus
Session: Semester 2 Classes: Two 1 hour lectures per week, plus an additional six 1 hour lectures per semester. One 3 hour practical per week. Prerequisites: At least 6 credit points of MBLG units and Distinction in MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including in BMED (2807 or 2808) with a Distinction in one of these two. For BScAgr students: PLNT (2001 or 2901) and MICR (2022 or 2922) including one Distinction. Prohibitions: MICR3011, MICR3001, MICR3901 Assessment: One 2 hour exam, continuous assessment, practical work, one essay, one group presentation.

This unit is designed to enhance students' practical skills and to complement the lecture series. Clinical tutorial sessions underpin and investigate the application of the material covered in the practical classes.

Textbooks

MICR39012
Molecular Biology of Pathogens
Credit points: 6
Teacher/Coordinator: Dr D Carter
Session: Semester 2 Classes: Two 1 hour lectures per week, six 5 hour practicals plus two practical-based tutorials per semester. Prerequisites: At least 6 credit points of MBLG units and MICR (2022 or 2922 or 2002 or 2902). For BMedSc students: 42 credit points of Intermediate BMED units including BMED (2802, 2807 and 2808). For BScAgr students: PLNT (2001 or 2901) and MICR2924. Prohibitions: MICR3912, MICR3902, MICR3903, MICR3903, MICR3904, MICR3904 Assessment: One 2 hour exam, continuous assessment, practical work

This unit of study is designed to provide an understanding of the virulence mechanisms underlying microbial disease at the molecular level. The following topics will be covered: pathogenic processes and the molecular basis of adhesion, cell invasion and immune evasion in bacteria; bacterial and fungal toxins and their associated diseases; modern topics in microbiology using selected microbial pathogens as examples; and modern techniques in the analysis, diagnosis and prevention of microbial diseases.

MICR3022
Microbial Biotechnology
Credit points: 6
Teacher/Coordinator: Dr A Holmes
Session: Semester 2 Classes: Two 1 hour lectures per week and six 5 hour practicals. Prerequisites: At least 6 credit points of MBLG units and 6 credit points of Intermediate MICR...
This unit of study will cover both traditional microbial biotechnologies and the impact of new technologies on the emergence of new industries. Existing applications are based on empirical management of a remarkably small proportion of microbial diversity. The past ten years have seen dramatic advances in the capacity to explore microbial diversity and actively manage microbial communities. This course will focus on how these new techniques are creating new opportunities in biotechnology. General applications to be covered include production of metabolites or small molecules by microbial cultures (alcohols and antibiotics), production of macromolecules in microorganisms (protein expression and DNA manipulations), and management of microbial communities in biotechnology (gastrointestinal health, waste treatment and prospecting). Specific new techniques covered will include gene discovery via environmental metagenomics; microarrays and high throughput screening for isolation and recovery of producers of novel bioactive compounds.

**Assessment:** One 2 hour exam, practical work, group presentations

Note: Students are very strongly advised to complete VIRO (3001 or 3901) before enrolling in VIRO3002 Medical and Applied Virology in Semester 2.

This unit of study explores the way viruses invade cells, infect individual patients and spread in the community. Host/Virus interactions will also be described with a focus on the viral mechanisms that have evolved to combat and/or evade host defence systems. These features will be used to explain the symptoms, spread and control of particular human diseases ranging from the common cold to HIV. The unit will be taught by the Infectious Diseases and Immunology Unit of the Department of Medicine with the involvement of associated clinical and research experts who will contribute lectures on their own special interests and with contributions from the discipline of Microbiology. In the practical classes students will have the opportunity to develop their skills in performing and interpreting the methods currently used in diagnostic and research virology. In the tutorials emerging problems as diverse as SARS and liver cancer will be analysed in the light of the concepts and knowledge being studied in the course.

**Textbooks**

**Microbiology Honours**

During the Honours year, students will be involved in a research program to produce a thesis under the direction of a supervisor. A seminar at the end of the year will also be given to provide a summary of the research project. Students are also expected to broaden their general knowledge of Microbiology through attendance at research seminars and through a coursework component in their first semester which will cover diverse aspects of the subject. The coursework involves an essay as well as analysis of recently published papers in Microbiology. An expression of interest in Honours is required from students before the Honours year, on a form to be lodged with the Honours Coordinator. Entry into the Honours year is usually dependent on an average of Credit level performance in Senior Microbiology units of study. Additionally, strong students with related training may be admitted by permission of the Head of School.

**Molecular Biology and Genetics**

Molecular Biology and Genetics units of study in at Junior and Intermediate level will be taught by staff from the School of Molecular and Microbial Biosciences and the School of Biological Sciences. The Junior unit, MBLG1001, and the Intermediate unit, MBLG2071/2971,
are coordinated by the School of Molecular and Microbial Biosciences, while MBLG 2072/2972 is coordinated by the School of Biological Sciences.

**MBLG1001**

**Molecular Biology and Genetics (Intro)**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Dale Hancock  
**Session:** Semester 2  
**Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight.  
**Prohibitions:** AGCH2001, BCHM2001, BCHM2101, BCHM2901, MBLG2101, MBLG2901, MBLG2001, MBLG2111, MBLG2771, MBLG2871  
**Assumed knowledge:** 6 credit points of Junior Biology and 6 cp of Junior Chemistry  
**Assessment:** One 2.5 hour exam, in-seminar skills test and assignments

The lectures in this unit of study introduce the "Central Dogma" of molecular biology and genetics -i.e., the molecular basis of life. The course begins with the information macro-molecules in living cells: DNA, RNA and protein, and explores how their structures allow them to fulfill their various biological roles. This is followed by a review of how DNA is organised into genes and chromosomes leading to discussion of gene expression (transcription and translation) and replication. The unit concludes with an introduction to the techniques of molecular biology and, in particular, how these techniques have led to an explosion of interest and research in Molecular Biology. The practical component complements the lectures by exposing students to experiments which explore the measurement of enzymatic activity, the isolation of DNA and the 'cutting' of DNA using restriction enzymes. However, a key aim of the practicals is to give students higher level generic skills in computing, communication, criticism, data analysis/evaluation and experimental design.

**Textbooks:**  

**MBLG1999**

**Molecular Biology & Genetics Seminar A**

**Session:** Semester 2  
**Classes:** Four 1 hour seminars per semester.  
**Corequisites:** MBLG1001  
**Assessment:** There will be no assessment for this unit.  
**Note:** Only available in the BSc(MBG)

This unit consists of four introductory molecular biology and genetics research based seminars.

**MBLG2071**

**Molecular Biology and Genetics A**

**Credit points:** 6  
**Teacher/Coordinator:** Ms Vanessa Gysbers  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight.  
**Prohibitions:** MBLG1001 and 12 cp of Junior Chemistry.  
**Prohibitions:** MBLG2971, MBLG2771, MBLG2871, MBLG2001, MBLG2101, MBLG2901, MBLG2111, PLNT2001, AGCH2001, BCHM2001, BCHM2101, BCHM2901  
**Assessment:** One 2.5 hour exam, practical work, 2 assignments.  
**Note:** Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course prior to enrolling in this unit.

This unit of study extends the basic concepts introduced in MBLG1001 and provides a firm foundation for students wishing to continue in the molecular biosciences as well as for those students who intend to apply molecular techniques to other biological or medical questions. The unit explores the regulation of the flow of genetic information in both eukaryotes and prokaryotes. The central focus is on the control of replication, transcription and translation and how these processes can be studied and manipulated in the laboratory. Experiments in model organisms are provided to illustrate how the field has advanced, together with discussion of work carried out in human systems and the relevance to human genetic diseases. The tools of molecular biology are taught within the context of recombinant DNA-cloning - with an emphasis on essential knowledge required to use plasmid vectors to produce proteins from cloned genes, the use of genomic libraries, cDNA libraries, and methods for screening libraries. The methods of gene introduction (examples of transgenic plants and animals) are also discussed. Other techniques include PCR methodology and its use for cloning specific genes and detection of polymorphisms, separating DNA fragments by gel electrophoresis and analysis of macromolecules by Southern, Northern & Western blotting. In the genetics section, topics include assigning genes to specific chromosomes, high resolution chromosome mapping, DNA markers, physical mapping of genomes as well as DNA and genome sequencing methods and international projects in genome mapping. The practical course complements the theory and builds on the skills learnt in MBLG1001. Specifically students will: use spectrophotometry for the identification and quantification of nucleic acids, explore the lac operon system for the investigation of gene expression control, perform PCR analysis as with MBLG1001, strong emphasis is placed on the acquisition of generic and technical skills.

**MBLG2971**

**Molecular Biology and Genetics A (Adv)**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Dale Hancock  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures per week; one 1 hour tutorial and one 4 hour practical per fortnight.  
**Prohibitions:** 12 credit points of Junior Chemistry and Distinction in MBLG1001  
**Assessment:** One 2.5 hour exam, practical work, 2 assignments.  
**Note:** Students enrolled in the combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) must have completed all Junior units for this course prior to enrolling in this unit.

Extension of concepts presented in MBLG2771 which will be taught in the context of practical laboratory experiments.

**MBLG2072**

**Molecular Biology and Genetics B**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Two 1 hour lectures per week; one 2-3 hour practical per week. One tutorial every second week.  
**Prohibitions:** BIOL (1001 or 1101 or 1901) and MBLG1001 and 12 credit points of Junior Chemistry  
**Prohibitions:** MBLG2972, MBLG2102, MBLG2002, MBLG2902  
**Assumed knowledge:** One of MBLG2071, MBLG2771, MBLG2001, MBLG2871, MBLG2971, MBLG2901  
**Assessment:** One 2 hour exam (50%), laboratory reports and quizzes (50%).

This unit of study builds on the concepts introduced in MBLG2071 and shows how modern molecular biology is being applied to the study of the genetics of all life forms from bacteria through to complex multicellular organism including plants, animals and humans. Lecture topics include classical Mendelian genetics with an emphasis on its molecular basis, cytogenetics, bacterial genetics and evolution, molecular evolution, bioinformatics and genomics, developmental genetics and the techniques and applications of molecular genetics. Practical: In laboratory exercises you will use a variety of prokaryotic and eukaryotic organisms to illustrate aspects of the lecture material, while developing familiarity and competence with equipment used in molecular techniques, microscopes, computers and statistical tests. Generic skills are developed in report writing, oral presentation, problem solving and data analysis. This is a core Intermediate unit of study in the BSc (Molecular Biology and Genetics) degree program.

**MBLG2972**

**Molecular Biology and Genetics B (Adv)**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Two 1 hour lectures per week; one 2-3 hour practical per week. One tutorial every second week.  
**Prohibitions:** Distinction in one of MBLG2071, MBLG2771, MBLG2001, MBLG2871, MBLG2971, MBLG2901  
**Prohibitions:** MBLG2072, MBLG2102, MBLG2002, MBLG2902  
**Assessment:** One 2 hour exam (50%), laboratory reports and quizzes (50%).

Qualified students will participate in alternative components of MBLG2072, Molecular Biology and Genetics B. The content and nature of these components may vary from year to year.
MBLG3999
Molecular Biology & Genetics Seminar B
Session: Semester 2 Classes: Four 1 hour seminars (available by invitation only from MBLG program chair). Assessment: There will be no assessment for this unit.
Note: Department permission required for enrolment.
Note: Only available in the BSc(MB)
This unit consists of four advanced molecular biology and genetics research based seminars.

Molecular Biotechnology
The following units of study are only available to students in the Bachelor of Science (Molecular Biotechnology) degree. Please consult degree information in chapter 4, and the relevant Departments/Schools entries in this chapter for descriptions of other units of study required for this degree.

MOBT2102
Molecular Biotechnology 2
Credit points: 6 Teacher/Coordinator: Dr Rachel Codd Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week.
Prerequisites: 12 credit points of Junior Biology and 12 credit points of Junior Chemistry Prohibitions: MOBT2001 Assessment: One 2 hour theory exam (70%) and in-semester assessments (30%). NB Students must pass the theory exam to pass the unit overall.
Note: This unit of study is only available to students in the BSc (Molecular Biotechnology).

The main purpose of this unit of study is to introduce students to the core concepts of modern molecular biotechnology, and build a base for future study in this discipline. It assumes students will have knowledge of Molecular Biology and Genetics through previous study of MBLG1001 and MBLG2771/2871 and concurrent study of MBLG2072/2972. It commences with an introduction to the biotechnology revolution and its impact worldwide. Students are then introduced to how large biomolecules are exploited in drug discovery with discussions of structural diversity in macromolecules, the construction of synthetic peptide and oligonucleotide combinatorial libraries, the uses and screening of such libraries in drug discovery together with examples from industry. This unit proceeds with considerations of the chemical synthesis of pharmaceuticals to specific drug targets. Structure-activity relationships, the use of biomolecules such as proteins versus natural products in drug design, the role of DNA as a drug target, and the importance of metals ions are all discussed together with case studies from industry. Issues associated with pharmaceutical stability and metabolism are then described. The unit concludes with an overview of the commercialization of discoveries in science with consideration given to the role of researchers, university and industry interactions, and regulatory and patent issues. This is followed by an appreciation of the societal impact and ethics of biotechnology, including how the industry and researchers interact with, and inform, the public. Guest lecturers will contribute to these presentations to help students develop an appreciation of emerging areas in molecular biotechnology from a broad perspective.

Textbooks

MOBT3002
Molecular Biotechnology 3A Project
Credit points: 6 Teacher/Coordinator: A/Prof Kevin Doward Session: Semester 2 Classes: 75 hours industry related project over the semester Prohibitions: MOBT2002 or MOBT3101 Assessment: Presentation, project report and essay Note: This unit of study is only available to students in the BSc (Molecular Biotechnology).

This Senior unit of study builds on the knowledge gained in earlier units of modern molecular biotechnology. It emphasizes applications of molecular biotechnology including product design, research and development, and the importance of recognizing industry trends. This will typically involve an industry placement or a detailed industry case study, on-site visits, and interactions with industry partners in association with university staff. To maximize future opportunities, students will learn about funding and research and development. As well as industry-relevant experience, students will research biotechnology kits and technologies.

Textbooks

School of Molecular and Microbial Biosciences
The School brings together the disciplines of Biochemistry, Microbiology, Molecular Biotechnology and Nutrition, with separate study codes BCHM, MICR, MOBT [see Table IE for details of the BSc (Molecular Biotechnology)] and NUTR [see Table IF for details of the BSc (Nutrition)]. Significant contributions are also made to the Intermediate faculty units of study in Molecular Biology and Genetics with study code MBLG (see Table ID for details of the BSc (Molecular Biology and Genetics)) and to the units of study in Molecular Biotechnology [see Table IE for details of the BSc (Molecular Biotechnology)].

Location of unit descriptions
Unit descriptions are located under separate headings in this chapter: Biochemistry (BCHM); Microbiology (MICR); Molecular Biology and Genetics (MBLG); Molecular Biotechnology (MOBT); Molecular Biology and Genetics; Nutrition (NUTR).
Location
The School is located in the Biosciences Biochemistry and Microbiology Building (G08), across near City Road in the Darlingford area behind the Wentworth Building.

Nanoscience and Technology
Nanoscience and Technology is an interdisciplinary major offered within the BSc. It is directed at students interested in understanding the emerging science of working and building at and near the molecular level. It incorporates study of the fundamental sciences in order to understand the structure of matter, as well as technological elements of the mechanical properties of materials. Students undertaking this major are strongly encouraged to take suitable units from the Faculty of Engineering in combination with Physics and Chemistry.

Majoring in Nanoscience and Technology
A student seeking to complete this major should study Physics and Chemistry in their Junior and Intermediate years together with some Engineering and Mathematics. In the Senior year it is possible to focus on two of the three discipline areas, or to continue to study elements of all three. This major may also be seen as a complement to a traditional major in Chemistry or Physics. Refer to Table 1 for an enrolment guide and to entries under the contributing schools and departments for unit descriptions. Engineering units are described in the Engineering Handbook.

Neuroscience
Neuroscience encompasses a diverse range of disciplines that cross traditional subject boundaries. The study of Neuroscience ranges from anatomy to neuronal function; the cellular and molecular biology of the neuron to the complex phenomena of perception; emotion and memory; from the regulation of breathing and blood pressure to movement; developing to ageing; normal cognition to neurodegeneration.

Majoring in Neuroscience
A major in Neuroscience is designed to provide a foundation in the basic biology of the brain as well as the fundamentals of cognition. Students are able to focus their cross-disciplinary studies with a molecular, cellular, anatomical and behavioural concentration. Refer to Table 1 for an enrolment guide and to entries in specific subject areas for Unit of Study descriptions. A cross-disciplinary major requires careful selection of subjects to fulfill the requirements of the major. Research in Neuroscience is vibrant and an international priority area.

Research in Neuroscience
There are many opportunities for high-achieving students to undertake honours study within the field of Neuroscience. Honours projects are typically undertaken within individual departments: Physiology, Anatomy, Pharmacology, Psychology, Pathology and associated institutes. Students should canvass respective departments during their senior studies for details of projects, admission criteria and enrolment details.

Neuroscience Coordinator
Dr Karen Cullen (Anatomy) is the co-ordinator for the Neuroscience major. Dr Cullen's contact email address is: kcullen@anatomy.usyd.edu.au

Nutrition
The Human Nutrition Unit in the School of Molecular and Microbial Biosciences offers units of study to students enrolled in the Bachelor of Science (Nutrition) degree. Please consult degree information in chapter 4 and Table 1F entries. Check the relevant Department/school entries in this chapter for descriptions of other units of study required for this degree.

NUTR2911 Food Science Introductory (Advanced)
Credit points: 6 Teacher/Coordinator: Dr Kim Bell-Anderson Session: Semester 1 Classes: Three 1 hour lectures and one 2.5 hour practical per week. Prerequisites: MBLG1001 and CHEM (1001 or 1101 or 1901 or 1903 or 1909) and CHEM (1002 or 1102 or 1902 or 1904 or 1908) and BIOL (1001 or 1101 or 1901) and BIOL (1002 or 1903 or 1902 or 1903). For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course. Prohibitions: NUTR2901 Assessment: One 3 hour exam, one 1 hour theory of practical exam, one assignment and 4 quizzes.

This unit of study aims to give a broad appreciation of foods as commodities; that is, the origin, history, cultural and nutritional importance of the major foods for human use. Further, aspects of food processing and cooking that affect the nutritional quality of these foods will be discussed. Food groups covered include animal foods, seafood, cereals, sugars, fats and oils, dairy products, legumes, nuts, vegetables, fruits, herbs and spices and alcohol. Topics in food science and technology include the principles of food preservation, aspects of the preparation and processing of cereals, dairy products, fats and oils, sugars and starches and meats. Food legislation is discussed as well as food additives, naturally occurring toxica in foods, food products, food safety, food hygiene and food microbiology. Practical classes investigate the nutritional and physical composition of food commodities, and demonstrate their behaviour and functional properties during normal culinary processes.

Textbooks

NUTR2912 Nutritional Science Introductory (Adv)
Credit points: 6 Teacher/Coordinator: Dr Kim Bell-Anderson Session: Semester 2 Classes: Three 1 hour lectures and one 2.5 hour practical per week. Prerequisites: MBLG1001 and CHEM (1001 or 1101 or 1901 or 1903 or 1909) and CHEM (1002 or 1102 or 1902 or 1904 or 1908) and BIOL (1001 or 1101 or 1901) and BIOL (1002 or 1903 or 1902 or 1903). For Combined BAppSc (Exercise and Sport Science)/BSc(Nutrition) degree completion of all Junior units in the table of units for this course. Prohibitions: NUTR2901 Assumed knowledge: NUTR2911 Assessment: One 3 hour exam, one 1 hour theory of practical exam, one assignment.

Information about the major nutrients, vitamins, the major and trace elements is presented with respect to food sources, consumption patterns, requirements for health, absorption, metabolism, nutritional/disease significance, deficien cy states and the consequences of excess intakes. Practical classes cover aspects of food analysis of the student's own diet. The practicals are designed to give students hands-on experience in the determination of major and minor nutrients in foods using procedures and instrumentation used in food research and analytical laboratories. The data obtained in the laboratory will be compared with that obtained with reference to published data in food composition tables. Students will gain an appreciation of the limitations of both methods of data collection and will become competent in the use and interpretation of food composition software packages.

Textbooks

NUTR3911 Nutritional Assessment Methods
Credit points: 6 Teacher/Coordinator: Dr Karen Webb Session: Semester 1 Classes: One 2 hour lecture, one 1 hour tutorial and one 2 hour practical per week. Prerequisites: NUTR2911 and NUTR2912. Prohibitions: NUTR3901 Assessment: 1 assignment, 3 practical reports, 3 tutorial papers.

Basic concepts in nutritional status; four methods of dietary assessment in individuals, advantages and limitations; validation of dietary methods; nutritional guidelines, targets and recommended dietary intakes; computerized nutrient analysis; limitations of food composition software packages.
composition analysis. Behavioural influences on food intake. Nutritional assessment of individuals through clinical examination and commonly used laboratory biochemical tests for nutritional status; methods used to diagnose nutritional deficiencies; specificity, reliability of biochemical tests. Anthropometry and body composition; soft tissue measurement; percent body fat; reference standards; growth standards and percentiles.

Textbooks

NUTR3912 Community and Public Health Nutrition
Credit points: 6 Teacher/Coordinator: Ms Soumela Amanatidis. Session: Semester 2 Classes: One 3 hour lecture and one 2 hour practical per week. Prerequisites: NUTR2911 and NUTR2912 Prohibitions: NUTR3902 Assessment: One 1 hour exam, 3 assignments

This unit of study covers topics such as nutrition through the life cycle from infancy to old age; nutrition in vulnerable groups such as low income groups, indigenous populations and homeless youth and theories of food habits. It helps students gain skills and knowledge in planning, implementing and evaluating nutrition health promotion programs for various population groups. Topics covered include principles of health promotion, effective nutrition promotion strategies, program evaluation and program planning. It also looks at current public health nutrition strategies for promoting health and preventing diet related diseases. The delivery of material involves lectures, tutorials and workshops.

Textbooks

NUTR3921 Methods in Nutrition Practice
Credit points: 6 Teacher/Coordinator: Ms Soumela Amanatidis Session: Semester 2 Classes: One 2 hour exam
Prerequisites: NUTR2911 and NUTR2912 Prohibitions: NUTR3901 Assessment: One 2 hour exam

Basic concepts in nutritional epidemiology, advantages and limitations of epidemiological methods; biological markers of chronic disease; use of biostatistical tools in epidemiology; critical interpretation of published data. Survey questionnaire design and statistics.

Textbooks

NUTR3922 Nutrition and Chronic Disease
Credit points: 6 Teacher/Coordinator: Ms Soumela Amanatidis Session: Semester 2 Classes: One 3 hour lecture and one 2 hour workshop per week. Prerequisites: NUTR2911 and NUTR2912 Prohibitions: NUTR3902 Assessment: One 2 hour exam, 2 assignments

This unit of study examines the relationship and evidence for the role of nutrition in the etiology of chronic diseases such as cancer, coronary heart disease, hypertension, obesity, dental caries and osteoporosis. It also investigates the current nutrition policies and guidelines that are aimed at preventing these diseases at a population level. These include National Dietary Guidelines, Recommended Dietary Intakes, food legislation and Commonwealth and State food policies. Students will also get an opportunity to examine the current popular fad diets on the market. There is also a section on developing communication skills for promoting positive nutrition messages using the media. The delivery of material involves lectures, tutorials and workshops.

Textbooks

Nutrition Honours
The coordinators for Nutrition Honours are Associate Professor S Samman and Ms Beth Rohrlach. Students who have completed the three year Bachelor (Nutrition) may complete an honours year in either the clinical strand, or by research. Students who want accreditation as a dietitian will need to complete the clinical strand.

Clinical Nutritional Science and Dietetics
Students in this strand enrol in and complete: NUTR4001 Clinical Nutritional Science A; NUTR4002 Clinical Nutritional Science B. The contact hours per week are a minimum of 15 and during intensive practicals will be 35. With problem based learning it is expected that a student will need to spend minimum of 20h in self-directed learning. At the completion of this course students will be able to describe the pathophysiology and biochemistry of disease processes where nutrition is an important part of prevention and/or treatment and will be able to construct appropriate treatment regimes and prevention strategies for these diseases using their nutritional science knowledge.

Nutrition Research
Students in this strand enrol in and complete: NUTR 4101 Nutrition Research A; NUTR 4102 Nutrition Research B; NUTR 4103 Nutrition Research C; NUTR 4103 Nutrition Research D; Students will be involved in full-time research under the supervision of a staff member within the Human Nutrition Unit or a cognate department. During the year, students will be required to: (i) carry out a supervised research project; (ii) present a written project proposal and present orally a brief literature survey and aims of the project; (iii) write an essay based on the project; and (iv) deliver a seminar on the project. Students will prepare a project proposal, which should outline the aims, significance and background of the project, including an indication of the relationship of the project to the work of others, citing key references (not to be included in the 1000 word limit) where appropriate. A brief outline of methods and techniques to be used.

Pharmacology
This Department offers a general training in Pharmacology to students in the Faculty of Science. It provides three intermediate 6-credit point units of study and eight senior 6-credit point units of study.

PCOL2011 Pharmacology Fundamentals
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures per week; tutorials and laboratory sessions. Prerequisites: 6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBGL1001. Prohibitions: PCOL2001 Assessment: One 2 hour exam, in semester quizzes and reports.

This unit of study examines four basic areas in Pharmacology: (1) principles of drug action (2) pharmacokinetics and drug metabolism (3) autonomic and endocrine pharmacology, and (4) drug design. The delivery of material involves lectures, practicals, computer-aided learning and problem-based tutorials. Practical classes provide students with the opportunity of acquiring technical experience and teamwork skills. Problem-based tutorials are based on real-life scenarios of drug use in the community. These tutorials require students to integrate information obtained in lectures in order to provide solutions to the problems. Online quizzes accompany each module for self assessment.

Textbooks
PCOL3012
Pharmacology: Drugs and People
Credit points: 6 Teacher/Coordinator: Dr B McParland Session: Semester 2 Classes: Two 1 hour lectures per week; tutorials and laboratory sessions.
Prerequisites: 6 credit points of Junior Chemistry and 6 credit points of Junior Biology or MBGL1001. Prohibitions: PCOL2002, PCOL3003
Assumed knowledge: PCOL2011 Assessment: One 2 hour exam, in semester quizzes, reports.

This unit of study examines four important areas of Pharmacology: (1) drug action in the nervous system (2) drug discovery and development (3) pharmacotherapy of inflammation, allergy and gut disorders, and (4) drugs of recreation, dependence and addiction. The delivery of material involves lectures, practicals, computer-aided learning and problem-based tutorials. Practical classes provide students with the opportunity of acquiring technical experience and teamwork. Problem-based tutorials are based on real-life scenarios of drug use in the community. These tutorials require students to integrate information obtained in lectures in order to provide solutions to the problems. Online quizzes accompany each module.

Textbooks
Reference books

PCOL2555
Essentials of Pharmacology
Credit points: 6 Session: Summer Main Classes: On-line lectures and face-to-face tutorial and laboratory classes. Prohibitions: PCOL2011, PCOL2012
Assumed knowledge: 6cp of Junior Biology, 6 cp of junior Chemistry. Assessment: On-line quizzes and a final examination

This unit of study introduces students to the principles of drug action and allows them to develop an understanding of the therapeutic applications of drugs based on their underlying pharmacodynamic properties. It covers cardiovascular and renal drugs, chemotherapy, analgesics and anti-inflammatory agents, respiratory and gastro-intestinal drugs, drugs affecting peripheral and central neurotransmission and the principles of chemotherapy.

PCOL3011
Toxicology
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: PCOL2011 and PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3001, PCOL3901, PCOL9311 Assessment: One 2 hour exam, in class quizzes, assignments.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the discipline of toxicology. The unit considers the toxicology associated with therapeutic drugs (adverse drug reactions) and the associated issue of drug interactions. The pharmacogenetic basis of adverse reactions is also considered. The unit also considers aspects of environmental toxicology, particularly toxic reactions to environmental agents such as asbestos and pesticides. As part of the unit students are introduced to basic ideas about the collection and analysis of data from human populations, both in the structured situation of clinical trials and in analysis of retrospective data.

Textbooks

PCOL3911
Toxicology (Advanced)
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: Distinction average in PCOL2011 and PCOL2012 or Distinction average in 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3001, PCOL3901, PCOL3011 Assessment: One 2 hour exam, in class quizzes, assignments.

This unit will consist of the lecture and practical components of PCOL3011. Students will be set special advanced assignments related to the material covered in core areas. These may also involve advanced practical work or detailed investigation of a theoretical problem.

Textbooks

PCOL3012
Drug Design and Development
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: PCOL2001 or PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3001, PCOL3901, PCOL3912 Assessment: One 2 hour exam, in class quizzes, assignments.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the field of medicinal chemistry associated with drug design, development and registration. It covers the main aspects of drug discovery and development by outlining the main considerations, and illustrates these using examples which include COX-2 inhibitors, statins, and viagra. The role of computers in drug design is emphasised by classwork and assignments on molecular modelling and structure-activity relationships. The course also extends to a section on the design of diverse pharmacological agents which include compounds for imaging by positron emission tomography (PET), as well as chemical and biological warfare agents, and riot control agents.

Textbooks

PCOL3912
Drug Design and Development (Adv)
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: Distinction average in PCOL2011 and PCOL2012 or Distinction average in 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3001, PCOL3901, PCOL3012 Assessment: One 2 hour exam, in class quizzes, assignments.

This unit will consist of the lecture and practical components of PCOL3012. Students will be set special advanced assignments related to the material covered in core areas. These may also involve advanced practical work or detailed investigation of a theoretical problem.

Textbooks

PCOL3021
Drug Therapy
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: PCOL2011 and PCOL2012 or 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3002, PCOL3902, PCOL3921 Assessment: One 2 hour exam, in class quizzes, assignments.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the theory and practice of drug therapy in the treatment of major disorders such as asthma, cancer and hypertension.

Textbooks

PCOL3921
Drug Therapy (Advanced)
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week. Prerequisites: Distinction average in PCOL2011 and PCOL2012 or in 36 credit points from Intermediate BMED units of study. Prohibitions: PCOL3002, PCOL3902, PCOL3921 Assessment: One 2 hour exam, in class quizzes, assignments.
Advanced students will complete the same core lecture material as students in PCOL3021 but carry out advanced level elective projects, practicals and tutorials.

Textbooks

PCOL3022 Neuropharmacology
Credit points: 6
Session: Semester 2
Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week.
Prerequisites: PCOL2011, PCOL2012 or 36 credit points from Intermediate BMED units of study
Prohibitions: PCOL3002, PCOL3902, PCOL3922
Assessment: One 2 hour exam, in-classes quizzes, assignments.

This unit of study is designed to introduce students with a basic understanding of pharmacology to the theory and practice of neuropharmacology in the treatment of neurological disorders such as Alzheimer’s disease, epilepsy, depression, insomnia, pain, schizophrenia and stroke.

Textbooks

PCOL3922 Neuropharmacology (Advanced)
Credit points: 6
Session: Semester 2
Classes: Two 1 hour lectures and one 3 hour tutorial/practical per week.
Prerequisites: Distinction average in PCOL2011 and PCOL2012 or in 36 credit points from Intermediate BMED units of study
Prohibitions: PCOL3002, PCOL3902, PCOL3922
Assessment: 2 lectures per week, 3 tutorials/practicals per week

Advanced students will complete the same core lecture material as PCOL3022 Neuropharmacology but carry out advanced level elective projects, practicals and tutorials.

Textbooks
As for PCOL3022

Pharmacology Honours
Subject to a satisfactory standard being attained in Pharmacology, a student may arrange to read for the Honours degree in this subject area. Much of the work will be arranged to suit the interest of the individual. The student will participate in a research project in progress in the Discipline. A research plan, literature review and a 50-page thesis on the research project must be prepared. Seminars on the literature review, the project and another chosen topic will be given by the student.

Physics
The School of Physics provides undergraduate units of study in Physics at Junior, Intermediate, Senior and Honours levels. Appropriate unit of study choices are available for candidates who wish to major in Physics, to proceed to Honours in Physics, or to combine Physics with a major in another subject area. Several other Faculties and Departments within the Faculty of Science require that Junior Physics be taken as part of the students’ preparation for later studies in their more specialised fields. Similarly, Intermediate Physics units of study are taken by many Faculty of Engineering students, as well as by many Faculty of Science students who intend to major in other subjects. The School of Physics also provides units of study in Computational Science at Junior, Intermediate, Senior and Honours levels. For details see the Computational Science entry.

Location

Information
On noticeboards in the Physics Building as appropriate for each unit of study and outside the Physics Student Support Office (Room 202, ground floor, Physics Building), and also at the School of Physics website: www.physics.usyd.edu.au.

Registration
Junior units of study: In assigned laboratory sessions during the second week of each semester. Intermediate units of study: At first lecture, in the Physics Building. Senior units of study: At first lecture, in the Physics Building.

Advice on units of study
A member of the Physics staff is normally present among Faculty advisers during enrolment week to advise students. The Physics Student Support Office, Room 202, Physics Building, will arrange for students to meet advisers at other times. Further information about the School of Physics and its teaching program are available at www.physics.usyd.edu.au and on WebCT.

Physics junior units of study
There are seven different semester length units of study offered at the Junior level. Completion of one unit of study in each semester provides a solid foundation for further studies in Physics in higher years. PHYS1500 Astronomy cannot be counted towards the 12 credit points of Junior Physics needed as a prerequisite for Intermediate Physics. Each unit of study has a laboratory component. The first semester laboratory work provides an introduction to experimental techniques while reinforcing concepts of physics introduced in lectures. In second semester the laboratory work provides an introduction to electrical circuits and offers students the opportunity to design and undertake short experimental projects.

First semester
PHYS1001 (Regular); PHYS1002 (Fundamentals); PHYS1901 (Advanced)

Second semester
PHYS1003 (Technological); PHYS1004 (Environmental and Life Sciences); PHYS1902 (Advanced); PHYS1500 (Astronomy)

Information Booklet
Further information about Junior Physics units of study is contained in a booklet for intending commencing students available at enrolment or during O-Week or from the Physics Student Support Office (Room 202, ground floor, Physics Building (A28)). It is also available on the School of Physics website at www.physics.usyd.edu.au

PHYS1001 Physics 1 (Regular)
Credit points: 6
Session: Semester 1
Classes: Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week.
Corequisites: Recommended concurrent Units of Study: MATH (1001/1901, 1002/1902)
Prohibitions: PHYS1002, PHYS1901
Assumed knowledge: HSC Physics
Assessment: Laboratory (20%), assignments (10%), progressive test (5%), skills test (5%), examination (60%)

This unit of study is for students who gained 65 marks or better in HSC Physics or equivalent. The lecture series contains three modules on the topics of mechanics, thermal physics, and oscillations and waves.

Textbooks

Experimental Physics Laboratory Manual - School of Physics Publication.

PHYS1002 Physics 1 (Fundamentals)
Credit points: 6
Session: Semester 1
Classes: Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week.
Corequisites: Recommended concurrent Units of Study: MATH (1001/1901, 1002/1902)
Prohibitions: PHYS1001, PHYS1901
Assumed knowledge: No assumed knowledge of Physics
Assessment: Laboratory (20%), assignments (10%), progressive tests (10%), examination (60%)

This unit of study is designed for students who have not studied Physics previously or scored below 65 in HSC Physics. The lecture series contains modules on the language of physics, mechanics, and oscillations and waves.

Textbooks
Experimental Physics Laboratory Manual - School of Physics Publication.
PHYS1003
Physics 1 (Technological)
Credit points: 6 Session: Semester 2 Classes: Three 1 hr lectures, one 3 hr laboratory, one 1 hour tutorial per week. Corequisites: Recommended concurrent Units of Study: MATH (1003/1903), MATH (1005/1905). Prohibitions: PHYS1004, PHYS1902 Assumed knowledge: HSC Physics or PHYS (1001 or 1002) or equivalent. Assessment: Laboratory (25%), assignments (10%), examination (65%) Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit
This unit of study is designed for students majoring in physical and engineering sciences and emphasis is placed on applications of physical principles to the technological world. The lecture series contains modules on the topics of fluids, electromagnetism, and quantum physics.
Textbooks
PHYS1004
Physics 1 (Environmental & Life Science)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. Corequisites: Recommended concurrent Units of Study: MATH (1003/1903), MATH (1005/1905). Prohibitions: PHYS1003, PHYS1902 Assumed knowledge: HSC Physics or PHYS (1001 or 1002 or 1901) or equivalent. Assessment: Laboratory (25%), assignments (10%), examination (65%) Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit
This unit of study has been designed specifically for students interested in further study in environmental and life sciences. The lecture series contains modules on the topics of properties of matter, electromagnetism, and radiation and its interactions with matter.
Textbooks
PHYS1500
Astronomy
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 2 hour laboratory and one 1 hour tutorial per week. Assumed knowledge: No assumed knowledge of Physics. Assessment: Laboratory (25%), essay (15%), tutorials (5%), night viewing project (5%), examination (50%)
This unit of study provides a broad understanding of the structure, scale and diversity of the universe and an appreciation of the scientific methods used to achieve this understanding. Current areas of investigation, new ideas and concepts which often receive wide media attention will be used to demonstrate how science attempts to understand new and remote phenomena and how our ideas of our place in the universe are changing. The range of topics includes the planets, the solar system and its origin, spacecraft discoveries, stars, supernovas, black holes, galaxies, quasars, cosmology and the Big Bang. It also includes day and night sky observing sessions. This unit of study cannot be counted as part of the 12 credit points of Junior Physics necessary for enrolment in Intermediate Physics.
Textbooks
PHYS1901
Physics 1A (Advanced)
Credit points: 6 Session: Semester 1 Classes: Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. Prerequisites: UAI of at least 96, or HSC Physics result in Band 6, or PHYS1902, or Distinction or better in PHYS (1003 or 1004) or an equivalent unit. Corequisites: Recommended concurrent Units of Study: MATH (1001/1901,1002/1902), MATH (1005/1905). Prohibitions: PHYS1001, PHYS1002 Assessment: Laboratory (20%), assignments (10%), progressive test (5%), skills test (5%), examination (60%)
This Unit of Study is intended for students who have a strong background in Physics and an interest in studying more advanced topics. It proceeds faster than Physics 1 (Regular), covering further and more difficult material. The lecture series contains modules on the topics of mechanics, thermal physics, oscillations and waves, and chaos. The laboratory work also provides an introduction to computational physics using chaos theory as the topic of study.
Textbooks
PHYS1902
Physics 1B (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures, one 3 hour laboratory and one 1 hour tutorial per week. Prerequisites: UAI of at least 96, or HSC Physics result in Band 6, or PHYS1901, or Distinction or better in PHYS (1001 or 1002) or an equivalent unit. Corequisites: Recommended concurrent unit of study: MATH (1003/1903), MATH (1005/1905). Prohibitions: PHYS1003, PHYS1004 Assessment: Laboratory (25%), assignments (10%), examination (65%) Note: It is recommended that PHYS (1001 or 1002 or 1901) be completed before this unit
This unit of study is a continuation of Physics 1A (Advanced). Students who have completed PHYS1001 or PHYS1002 at Distinction level may enrol. It proceeds faster than Physics 1 (Technological), covering further and more difficult material. The lecture series contains modules on the topics of fluids, electricity and magnetism, and quantum physics.
Textbooks
PHYS2011
Physics 2A
Credit points: 6 Session: Semester 1 Classes: Two 1 hour lectures per week for 11 weeks; one 2 hour computational laboratory and one 3 hour laboratory per week for 9 weeks. Prerequisites: 12 credit points of Junior Physics (excluding PHYS1500 and PHYS1600) Prohibitions: PHYS2001, PHYS2901, PHYS2911, PHYS2101, PHYS2103, PHYS2213, PHYS2203 Assumed knowledge: MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful Assessment: One 2 hour exam, one 1 hour computational test, practical work, practical report and oral presentation
In combination with two semesters of Junior Physics, this unit of study continues a first pass through the major branches of classical and modern physics, providing students with a sound basis for later Physics units or for studies in other areas of science or technology. Hence this unit suits students continuing with the study of physics at the general Intermediate level, and those wishing to round out their knowledge of physics before continuing in other fields. The major topics in this unit of study are: Optics: The wave nature of light, and its interactions with matter. Applications including spectroscopy and fibre optics. Nuclear Physics: The fundamental structure of matter. Computational Physics: In a PC-based computing laboratory students use simulation software to conduct virtual experiments in optics, which
illustrate and extend the relevant lectures. Students also gain experience in the use of computers to solve problems in physics. An introductory session is held at the beginning of semester for students who are not familiar with personal computers. Practical: Experimental Physics is taught as a laboratory module and includes experiments in the areas of optics, nuclear decay and particles, properties of matter, and other topics. Assessment is based on mastery of each attempted experiment. At the end of the semester students prepare a short report on one experiment and make an oral presentation on it.

Textbooks
Young and Freedman, University Physics, 11th ed. Pearson Education Inc. 2004
Serway, Moses and Moyer ‘Modern Physics’, Brooks/Cole
Experimental Physics Notes, published by the School of Physics.

PHYS2013
Astrophysics and Relativity
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lectures per week for 11 weeks and one 3 hour laboratory per week for 12 weeks. Prerequisites: PHYS (1003 or 1004 or 1902) and PHYS (1001 or 1002 or 1901 or 2001 or 2901 or 2091 or 2911). Prohibitions: PHYS2001, PHYS2012, PHYS2104, PHYS2902, PHYS2902, PHYS2912, PHYS2921, PHYS2923 Assumed knowledge: MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful Assessment: One 2 hour exam, one 1 hour computational test

This unit of study is designed for students continuing with the study of physics at the general Intermediate level, and represents the beginning of a more in-depth study of the major topics of classical and modern physics. The lecture topics are: Quantum physics: The behaviour of matter and radiation at the microscopic level, modelled by the Schroedinger equation. Application to 1-dimensional systems including solid state physics. Electromagnetic properties of matter: Electric and magnetic effects in materials; the combination of electric and magnetic fields to produce light and other electromagnetic waves; the effects of matter on electromagnetic waves. Computational Physics: The computational physics component is similar to that of PHYS2011, except that the material illustrates topics in the quantum physics module.

Textbooks
Serway, Moses and Moyer ‘Modern Physics’, Brooks/Cole

PHYS2012
Physics 2B
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures per week; one 2 hour computational laboratory per week for 11 weeks. Prerequisites: PHYS (1003 or 1004 or 1902) and PHYS (1001 or 1002 or 1901 or 2001 or 2901 or 2091 or 2911). Prohibitions: PHYS2012, PHYS2104, PHYS2902, PHYS2912, PHYS2921, PHYS2923 Assumed knowledge: MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful Assessment: One 3 hour exam, one 1 hour computational test

This unit of study is designed for students with a strong interest in Physics. The lecture topics are as for PHYS2011. They are treated in greater depth and with more rigorous attention to derivations than in PHYS2011. The assessment reflects the more challenging nature of the material presented. Computational Physics: As for PHYS2011, but at a more advanced level. Practical: As for PHYS2011, but at a more advanced level.

Textbooks
Young and Freedman, University Physics, 11th ed. Pearson Education Inc. 2004
Serway, Moses and Moyer ‘Modern Physics’, Brooks/Cole
Experimental Physics Notes, published by the School of Physics.

PHYS2912
Physics 2B (Advanced)
Credit points: 6 Session: Semester 2 Classes: Three 1 hour lectures per week; one 2 hour computational laboratory per week for 11 weeks. Prerequisites: Credit or better in PHYS (1003 or 1004 or 1902) and Credit or better in PHYS (1001 or 1002 or 1901 or 2001 or 2901 or 2091 or 2911). Prohibitions: PHYS2102, PHYS2104, PHYS2902, PHYS2902, PHYS2921, PHYS2923, PHYS2923 Assumed knowledge: MATH (1001/1901 and 1002/1902 and 1003/1903). MATH (1005/1905) would also be useful Assessment: One 3 hour exam, one 1 hour computational test

Refer to PHYS2911 for an overall description of the Advanced Intermediate Physics program. The lecture topics are as for PHYS2012. Computational Physics: As for PHYS2012, but at a more advanced level.

Textbooks
Serway, Moses and Moyer ‘Modern Physics’, Brooks/Cole

PHYS2913
Astrophysics and Relativity (Advanced)
Credit points: 6 Session: Semester 2 Classes: Two 1 hour lecture per week for 11 weeks; one 3 hour laboratory per week for 12 weeks. Prerequisites: Credit or better in PHYS (1003 or 1004 or 1902) and Credit or better in PHYS (1001 or 1002 or 1901 or 2001 or 2901 or 2091 or 2911). Corequisites: PHYS (2912 or 2912). Prohibitions: PHYS2001, PHYS2013, PHYS2101, PHYS2102, PHYS2103 Assumed knowledge: MATH (1001/1901 and 1002/1902 and 1003/1903). MATH 1005/1905 would also be useful. Assessment: One 3 hour exam, practical work, practical report and oral presentation

This unit of study builds on the foundation provided by Junior Physics and first semester of Intermediate Physics, to provide an introduction to Astrophysics (Structure and evolution of stars), and Special Relativity (Space and time at high velocities). The material for the advanced unit is treated with more depth and more rigorous attention to derivations than in PHYS2913. Practical: Experimental Physics is taught as a laboratory module and includes experiments in the areas of analysis of stellar images, electromagnetic phenomena, electronic instrumentation, quantum physics, and other topics. Assessment is based on mastery of each attempted experiment. At the end of the semester students may work in teams on a project. Students prepare a written report and oral presentation on their project or one experiment.

Physics senior units of study
Coordinator
Associate Professor Tim Bedding

Majoring in Physics
Students intending to major in Physics, or to proceed to Physics Honours, must take at least 24 credit points of Senior Physics, which must include a Semester 1 Core unit (PHYS3040, 3940 or 3941); a Semester 2 Core unit (PHYS3060, 3960 or 3961); two Options units
PHYS3015

Topics in Senior Physics A

Credit points: 6
Session: Semester 1
Classes: 40 per semester.
Prerequisites: 12 credit points of Intermediate Physics
Assumed knowledge: 6 credit points of Intermediate Mathematics
Assessment: Exams and/or laboratory reports.
Note: Department permission required for enrolment.

This unit is normally restricted to students not majoring in Physics, giving them the flexibility to take a combination of modules that is not offered in the standard units. Please obtain permission from the Senior Physics Coordinator.

Textbooks
See the Senior Physics Handbook, available from the School of Physics or the website http://www.physics.usyd.edu.au/ugrad/spc.html

PHYS3915

Topics in Senior Physics A (Advanced)

Credit points: 6
Session: Semester 1
Classes: 40 hours per semester.
Prerequisites: 12 credit points of Intermediate Physics
Assumed knowledge: 6 credit points of Intermediate Mathematics
Assessment: Exams and/or laboratory reports.
Note: Department permission required for enrolment.

This unit of study covers the same topics as PHYS3015, with some more challenging material.

PHYS3025

Topics in Senior Physics B

Credit points: 6
Session: Semester 2
Classes: 40 hours per semester.
Prerequisites: 12 credit points of Intermediate Physics
Assumed knowledge: 6 credit points of Intermediate Mathematics
Assessment: Exams and/or laboratory reports.
Note: Department permission required for enrolment.

This unit is normally restricted to students not majoring in Physics, giving them the flexibility to take a combination of modules that is not offered in the standard units. Please obtain permission from the Senior Physics Coordinator.

PHYS3925

Topics in Senior Physics B (Advanced)

Credit points: 6
Session: Semester 2
Classes: 40 hours per semester.
Prerequisites: 12 credit points of Intermediate Physics
Assumed knowledge: 6 credit points of Intermediate Mathematics
Assessment: Exams and/or laboratory reports.
Note: Department permission required for enrolment.

This unit of study covers the same topics as PHYS3025, with some more challenging material.

PHYS3040

Electromagnetism & Physics Lab

Credit points: 6
Session: Semester 1
Classes: Nineteen lectures, twelve 4 hour practicals per semester
Prerequisites: PHYS(2011 or 2911 or 2001 or 2901), PHYS(2012 or 2912 or 2002 or 2902), MATH(2061 or 2961 or 2067)
Assessment: One 1.5 hour exam, practical reports and oral presentation
Assumed knowledge:

The lectures cover the theory of electromagnetism, one of the cornerstones of classical physics. They introduce Maxwell's equations in their field form, using the power of vector calculus. The main application will be to electromagnetic waves, including reflection and absorption, which have application in fields such as optics, plasma physics and astrophysics. The project is carried out in a research group with the Faculty of Science, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

Textbooks
Introduction to Electrodynamics (Third Edition) by David J Griffiths

PHYS3940

Electromagnetism & Physics Lab (Adv)

Credit points: 8
Session: Semester 1
Classes: Nineteen lectures and twelve 4 hour practicals per semester
Prerequisites: PHYS(2011 or 2911 or 2001 or 2901), PHYS(2012 or 2912 or 2002 or 2902) with at least Credit; MATH(2061 or 2961 or 2067)
Assessment: One 1.5 hour exam, practical reports and oral presentation

This unit covers the same topics as PHYS3040, but with greater depth and some more challenging material.

Textbooks
Introduction to Electrodynamics (Third Edition) by David J Griffiths

PHYS3941

Electromagnetism & Special Project (Adv)

Credit points: 6
Session: Semester 1
Classes: Nineteen lectures per semester, 3.5 hours per week in School of Physics
Prerequisites: PHYS(2011 or 2911 or 2001 or 2901) with at least Credit; PHYS(2012 or 2912 or 2002 or 2902) with at least Credit; MATH(2061 or 2961 or 2067)
Assessment: One 1.5 hour exam, project report and talk
Note: Department permission required for enrolment.
Note: Approval for this unit must be obtained from the School of Physics Senior Coordinator.

The lectures cover the theory of electromagnetism, one of the cornerstones of classical physics. They introduce Maxwell's equations in their field form, using the power of vector calculus. The main application will be to electromagnetic waves, including reflection and absorption, which have application in fields such as optics, plasma physics and astrophysics. The project is carried out in a research group with the Faculty of Science, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

Introduction to Electrodynamics (Third Edition) by David J Griffiths

PHYS3051

Thermodynamics/Biol. Physics & Lab

Credit points: 6
Session: Semester 1
Classes: Nineteen lectures and twelve 4 hour practicals per semester
Prerequisites: PHYS(2011 or 2911 or 2001 or 2901), PHYS(2012 or 2912 or 2002 or 2902) with at least Credit; MATH(2061 or 2961 or 2067)
Assessment: One 1.5 hour exam, practical reports and oral presentation

The lectures cover the theory of thermodynamics, which have application in fields such as optics, plasma physics and astrophysics. The project is carried out in a research group with the Faculty of Science, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

Textbooks
Introduction to Thermodynamics by David J Griffiths

PHYS3951

Thermodynamics/Biol. Physics & Lab (Adv)

Credit points: 6
Session: Semester 1
Classes: Nineteen lectures and twelve 4 hour practicals per semester
Prerequisites: PHYS(2011 or 2911 or 2001 or 2901), PHYS(2012 or 2912 or 2002 or 2902) with at least Credit; MATH(2061 or 2961 or 2067)
Assessment: One 1.5 hour exam, practical reports and oral presentation

The lectures cover the theory of thermodynamics, which have application in fields such as optics, plasma physics and astrophysics. The project is carried out in a research group with the Faculty of Science, working on a research experiment or theoretical project supervised by a researcher. The aim is for students to acquire an understanding of the nature of research, to apply their knowledge of physics and scientific practice, and to serve as preparation for a research project at Honours level and beyond.

Textbooks
Introduction to Thermodynamics by David J Griffiths
Nanoscience/Plasma Physics & Labs (Adv)

Credit points: 6 Session: Semester 1 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS (2011 or 2011 or 2001 or 2091); PHYS (2012 or 2012 or 2002 or 2092) Prohibitions: PHYS3954, PHYS3050, PHYS3950, PHYS3055, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3059, PHYS3959, PHYS3060, PHYS3960, PHYS3061, PHYS3961, PHYS3062, PHYS3962, PHYS3063, PHYS3963, PHYS3064, PHYS3964, PHYS3065, PHYS3965, PHYS3066, PHYS3966, PHYS3067, PHYS3967, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978

Assumed knowledge: Electromagnetism at Senior Physics level; MATH (2061 or 2061 or 2056)

Assessment: One 2 hour exam, practical reports

This unit covers the same topics as PHYS3055, but with greater depth and some more challenging material.

Nanoscience is the study of the behaviour of light and matter as they interact with structures that have features on nanometre scales. This part of the course will cover the fundamental physics of nanoscience and the methods used for manipulating matter and creating structures on these scales. Plasma Physics is the study of ionised gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano and biomedical technologies. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

Nanoscience/Thermodynamics/Biol.Phys(Adv)

Credit points: 6 Session: Semester 1 Classes: Nineteen x three 1 hour lectures per semester. Prerequisites: PHYS (2011 or 2011 or 2001 or 2091); PHYS (2012 or 2012 or 2002 or 2092) Prohibitions: PHYS3957, PHYS3050, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3059, PHYS3959, PHYS3060, PHYS3960, PHYS3061, PHYS3961, PHYS3062, PHYS3962, PHYS3063, PHYS3963, PHYS3064, PHYS3964, PHYS3065, PHYS3965, PHYS3066, PHYS3966, PHYS3067, PHYS3967, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978

Assumed knowledge: Electromagnetism at Senior Physics level; MATH (2061 or 2061 or 2056)

Assessment: One 2 hour exam, practical reports

This unit covers the same topics as PHYS3057, but with greater depth and some more challenging material.

Plasma/Thermodynamics/Biol. Physics

Credit points: 6 Session: Semester 1 Classes: Nineteen x three 1 hour lectures per semester. Prerequisites: PHYS (2011 or 2011 or 2001 or 2091); PHYS (2012 or 2012 or 2002 or 2092) Prohibitions: PHYS3957, PHYS3050, PHYS3955, PHYS3056, PHYS3956, PHYS3057, PHYS3957, PHYS3058, PHYS3958, PHYS3059, PHYS3959, PHYS3060, PHYS3960, PHYS3061, PHYS3961, PHYS3062, PHYS3962, PHYS3063, PHYS3963, PHYS3064, PHYS3964, PHYS3065, PHYS3965, PHYS3066, PHYS3966, PHYS3067, PHYS3967, PHYS3068, PHYS3968, PHYS3069, PHYS3969, PHYS3070, PHYS3970, PHYS3071, PHYS3971, PHYS3072, PHYS3972, PHYS3073, PHYS3973, PHYS3074, PHYS3974, PHYS3075, PHYS3975, PHYS3076, PHYS3976, PHYS3077, PHYS3977, PHYS3078, PHYS3978

Assumed knowledge: Electromagnetism at Senior Physics level; MATH (2061 or 2061 or 2056)

Assessment: One 3 hour exam

This unit covers the same topics as PHYS3057, but with greater depth and some more challenging material.

Plasma Physics is the study of ionised gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano and biomedical technologies. The lectures on Thermodynamics provide a formal introduction to classical equilibrium thermodynamics, including chemical reactions, phases, and electric and magnetic fields, and an introduction to the principles of statistical mechanics. The Biological Physics component will cover applications of physics to biological systems, including topics such as molecular biology, structure and properties of polymers and proteins, thermodynamics of cells, transport of biomolecules, excitation of nerve impulses, and computer simulations of biological systems.
This unit covers the same topics as PHYS3059, but with greater depth and some more challenging material.

**PHYS3060**  
Quantum Mechanics & Physics Lab  

*Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902; MATH 2061 or 2961 or 2001 or 2902; PHYS 2012 or 2912 or 2002 or 2902. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Note: Approval for this unit must be obtained from the School of Physics Senior Coordinator.*  

The lectures cover the fundamental concepts and formalism of quantum dynamics, and the application to angular momentum and symmetry in quantum mechanics. The practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.  

**Textbooks**  

**Assessment:**  
One 1.5 hour exam, practical reports and oral presentation

This unit covers the same topics as PHYS3060, but with greater depth and some more challenging material.

**PHYS3061**  
Quantum/Cond Matter Physics & Lab (Adv)  

*Credit points: 6 Teacher/Coordinator: Dr Tim Bedding Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3062**  
Quantum/Cond Matter Physics & Lab  

*Credit points: 6 Teacher/Coordinator: Dr Tim Bedding Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3081**  
Quantum/Cond Matter Physics & Lab (Adv)  

*Credit points: 6 Teacher/Coordinator: Dr Tim Bedding Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3068**  
Optics/Cond. Matter & Lab  

*Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3086**  
Electromagnetism and Quantum Mechanics  

*Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3096**  
Optics/Cond. Matter & Lab (Adv)  

*Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.

**PHYS3099**  
Optics/High Energy Physics & Lab  

*Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS 2011 or 2911 or 2901 or 2902. Prohibitions: PHYS 3060, PHYS 3960, PHYS 3961, PHYS 3962, PHYS 3963, PHYS 3964, PHYS 3965, PHYS 3966, PHYS 3967, PHYS 3968, PHYS 3969, PHYS 3970, PHYS 3971, PHYS 3972, PHYS 3973, PHYS 3974, PHYS 3975, PHYS 3976, PHYS 3977, PHYS 3978, PHYS 3979, PHYS 3980, PHYS 3981, PHYS 3982, PHYS 3982. Assessment: 1 one 1.5 hours exam, one 1hr exam, practical reports.*  

This unit covers the same topics as PHYS3062, but with greater depth and some more challenging material.
PHYS3053, PHYS3056, PHYS3058, PHYS3059, PHYS3068, PHYS3069, PHYS3070, PHYS3071, PHYS3072, PHYS3074, PHYS3077, PHYS3078, PHYS3079, PHYS3080, PHYS3081, PHYS3981, PHYS3082, PHYS3982 Assumed knowledge: Electromagnetism at Senior Physics level; MATH (2061 or 2961 or 2067) Assessment: One 2 hour exam, practical reports

The lectures on Optics introduce students to modern optics, using the laser to illustrate the applications in studying the properties of matter and many important optical phenomena. The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

PHYS3969 Optics/High Energy Physics & Lab (Adv) Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS (2011 or 2012 or 2011 or 2012 or 2001 or 2901) with at least Credit; PHYS (2012 or 2011 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3069, PHYS3070, PHYS3053, PHYS3058, PHYS3059, PHYS3068, PHYS3069, PHYS3070, PHYS3071, PHYS3072, PHYS3073, PHYS3074, PHYS3075, PHYS3076, PHYS3077, PHYS3078, PHYS3079, PHYS3080, PHYS3081, PHYS3982 Assessment: One 2 hour exam, practical reports

This unit covers the same topics as PHYS3069, but with greater depth and some more challenging material.

PHYS3071 High Energy/Astrophysics & Lab Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS (2011 or 2011 or 2011 or 2012 or 2001 or 2901); PHYS (2012 or 2011 or 2001 or 2901); PHYS (2013 or 2012 or 2011 or 2001 or 2901) with at least Credit; PHYS (2012 or 2011 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3071, PHYS3069, PHYS3079, PHYS3068, PHYS3070, PHYS3072, PHYS3073, PHYS3074, PHYS3075, PHYS3076, PHYS3077, PHYS3078, PHYS3079, PHYS3080, PHYS3081, PHYS3981, PHYS3982 Assessment: One 2 hour exam, practical reports

The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

PHYS3074 High Energy/Cond. Matter Physics & Lab Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS (2011 or 2011 or 2012 or 2001 or 2901); PHYS (2012 or 2011 or 2001 or 2901); PHYS (2013 or 2012 or 2011 or 2001 or 2901) with at least Credit; PHYS (2012 or 2011 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3071, PHYS3069, PHYS3079, PHYS3068, PHYS3070, PHYS3072, PHYS3073, PHYS3074, PHYS3075, PHYS3076, PHYS3077, PHYS3078, PHYS3079, PHYS3080, PHYS3081, PHYS3981, PHYS3982, PHYS3983 Assumed knowledge: Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) Assessment: One 2 hour exam, practical reports

Plasma Physics is the study of ionized gases, which are collections of charged and neutral particles and form the main constituent of the Universe. The lectures cover the properties of plasmas and their applications, including nuclear fusion energy, materials synthesis and modification, environmental remediation, aerospace, nano- and biomedical technologies. The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe. In the practical laboratory classes, students will choose from a range of experiments that aim to give them an appreciation of the analytical, technical and practical skills required to conduct modern experimental work.

PHYS3974 High Energy/Cond. Matter Phys. & Lab(Adv) Credit points: 6 Session: Semester 2 Classes: Nineteen x two 1 hour lectures and six x four 1 hour practicals per semester. Prerequisites: PHYS (2011 or 2012 or 2011 or 2001 or 2901); PHYS (2012 or 2011 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3074, PHYS3082, PHYS3968, PHYS3969, PHYS3970, PHYS3971, PHYS3972, PHYS3973, PHYS3974, PHYS3975, PHYS3976, PHYS3977, PHYS3978, PHYS3979, PHYS3980, PHYS3981, PHYS3982, PHYS3983 Assessment: One 2 hour exam, practical reports

This unit covers the same topics as PHYS3074, but with greater depth and some more challenging material.

PHYS3079 Cond. Matter/High Energy/Astrophysics Credit points: 6 Session: Semester 2 Classes: Three 3 hour lectures per semester. Prerequisites: PHYS (2011 or 2012 or 2001 or 2091 or 2901) with at least Credit; PHYS (2011 or 2012 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3079, PHYS3082, PHYS3083, PHYS3968, PHYS3969, PHYS3970, PHYS3971, PHYS3972, PHYS3073, PHYS3974, PHYS3975, PHYS3976, PHYS3977, PHYS3978, PHYS3979, PHYS3980, PHYS3981, PHYS3982, PHYS3983 Assumed knowledge: Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) Assessment: One 3 hour exam

The lectures on Condensed Matter Physics cover the theoretical underpinning and properties of condensed matter, specifically the physics of solids. Semiconductors are investigated in detail, considering recent discoveries and new developments in nanotechnology and lattice dynamics. The lectures on High Energy Physics explore astrophysical environments inside stars and beyond (e.g. the interstellar medium, the intergalactic medium and galaxies themselves) and focus on one of the most important physical processes in astrophysics: the transport of radiative energy.

PHYS3979 Cond. Matter/High Energy/Astrophysics (Adv) Credit points: 6 Session: Semester 2 Classes: Nineteen x three 1 hour lectures per semester. Prerequisites: PHYS (2011 or 2011 or 2001 or 2901); PHYS (2012 or 2011 or 2001 or 2901); PHYS (2013 or 2012 or 2011 or 2901) with at least Credit; PHYS (2012 or 2011 or 2001 or 2901) with at least Credit. Prohibitions: PHYS3079, PHYS3082, PHYS3968, PHYS3969, PHYS3970, PHYS3971, PHYS3972, PHYS3073, PHYS3974, PHYS3975, PHYS3976, PHYS3977, PHYS3978, PHYS3979, PHYS3980, PHYS3981, PHYS3982, PHYS3983 Assumed knowledge: Quantum Mechanics at Senior Physics level; MATH (2061 or 2961) Assessment: One 3 hour exam
This unit covers the same topics as PHYS3079, but with greater depth and some more challenging material.

PHYS3080

Optics/Cond.Matter/High Energy Physics

Credit points: 6 Session: Semester 2 Classes: Nineteen 3 hour lectures per semester.

Prerequisites: PHYS (2011 or 2911 or 2001 or 2901); PHYS (2012 or 2912 or 2002 or 2902); PHYS (2013 or 2913 or 2001 or 2901).

Prohibitions: PHYS3980, PHYS3050, PHYS3055, PHYS3058, PHYS3069, PHYS3953, PHYS3056, PHYS3956, PHYS3958, PHYS3067, PHYS3962, PHYS3966, PHYS3968, PHYS3969, PHYS3970, PHYS3071, PHYS3073, PHYS3074, PHYS3075, PHYS3975, PHYS3076, PHYS3078, PHYS3079, PHYS3973, PHYS3977, PHYS3078, PHYS3079, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982. Assumed knowledge: Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067).

Assessment: One 3 hour exam

The lectures on Optics introduce students to modern optics, using the laser to illustrate the applications in studying the properties of matter and many important optical phenomena. The lectures on Condensed Matter Physics cover the theoretical underpinning and properties of condensed matter, specifically the physics of solids. The lectures on High Energy Physics cover the basic constituents of matter, such as quarks and leptons, examining their fundamental properties and interactions, and their origin at the creation of the universe.

PHYS3980

Credit points: 6 Session: Semester 2 Classes: Nineteen x three 1 hour lectures per semester.

Prerequisites: PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit; MATH (2061 or 2961 or 2067)

Assumed knowledge: Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067).

Assessment: One 3 hour exam

This unit covers the same topics as PHYS3080, but with greater depth and some more challenging material.

PHYS3081

Optics/Cond.Matter/ Astrophysics

Credit points: 6 Session: Semester 2 Classes: Nineteen 3 hour lectures per semester.

Prerequisites: PHYS (2012 or 2912 or 2002 or 2902); PHYS (2013 or 2913 or 2001 or 2901).

Prohibitions: PHYS3981, PHYS3050, PHYS3055, PHYS3058, PHYS3069, PHYS3953, PHYS3056, PHYS3956, PHYS3958, PHYS3067, PHYS3962, PHYS3966, PHYS3968, PHYS3969, PHYS3070, PHYS3071, PHYS3072, PHYS3074, PHYS3075, PHYS3975, PHYS3076, PHYS3077, PHYS3078, PHYS3079, PHYS3973, PHYS3074, PHYS3075, PHYS3076, PHYS3975, PHYS3077, PHYS3078, PHYS3079, PHYS3979, PHYS3080, PHYS3980, PHYS3081, PHYS3981, PHYS3082, PHYS3982. Assumed knowledge: Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067).

Assessment: One 3 hour exam

The lectures on Optics introduce students to modern optics, using the laser to illustrate the applications in studying the properties of matter and many important optical phenomena. The lectures on Condensed Matter Physics cover the theoretical underpinning and properties of condensed matter, specifically the physics of solids. Semiconductors are investigated in detail, considering recent discoveries and new developments in nanotechnology and lattice dynamics. The lectures on Astrophysics explore astrophysical environments inside stars and beyond (e.g. the interstellar medium, the intergalactic medium and galaxies themselves) and focus on one of the most important physical processes in astrophysics: the transport of radiative energy.

PHYS3982

Optics/High Energy/ Astrophysics (Adv)

Credit points: 6 Session: Semester 2 Classes: Nineteen x three 1 hour lectures per semester.

Prerequisites: PHYS (2011 or 2911 or 2001 or 2901) with at least Credit; PHYS (2012 or 2912 or 2002 or 2902) with at least Credit; PHYS (2013 or 2913 or 2001 or 2901) with at least Credit; MATH (2061 or 2961 or 2067)

Assumed knowledge: Electromagnetism and Quantum Mechanics at Senior Physics level; MATH (2061 or 2961 or 2067).

Assessment: One 3 hour exam

This unit covers the same topics as PHYS3082, but with greater depth and some more challenging material.

Physics Honours

Honours Coordinator
Dr Stephan Bartlett

Qualifying
24 credit points of senior Physics units of study or equivalent.

Classes
Six lecture courses and a research project

Assessment
Coursework examinations, a 40 page Research report and oral presentation of the Research project. Physics Honours comprises formal coursework (weight 50%) and a research project (weight 50%)

Undertaking an Honours year in Physics

The Honours program in Physics provides students with an opportunity to undertake an original research project as well as attend advanced lecture courses to give students a broad understanding of modern physics at a high level. All students satisfying the qualifying requirements as set out above and in the Science Faculty Honours section of this handbook are strongly encouraged to apply for entry into Physics Honours. Fulltime enrolment is equivalent to 48 credit points.
points for the year. Students are offered an opportunity to carry out independent research as a member of one of the active research groups in the School of Physics, under the supervision of a member of staff. Students may also study with staff from complementary disciplines, subject to the approval of the Honours coordinator. Honours students join a research group in the School of Physics and are encouraged to participate with staff and research students in activities within the School. They are provided with office accommodation, and are expected to attend colloquia and seminars. They may be employed for several hours per week in Junior teaching. Further information is available from the Physics Student Support Office, the Honours co-ordinator or from the website www.physics.usyd.edu.au/ugrad/hons.html.

Physiology

The Department of Physiology provides introductory general Intermediate units of study and for those wishing to major in the subject, in-depth Senior units of study. For Senior units the February semester offers Neuroscience and Human Cellular Physiology, and the July semester offers Heart and Circulation as well as further study in Neuroscience.

PHSI2005

Integrated Physiology A

Credit points: 6 Teacher/Coordinator: Dr Meloni Muir Session: Semester 1 Classes: Five 1 hour lectures, one 3 hour practical and one 3 hour tutorial per fortnight. Prerequisites: 6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics, Biology, Psychology units of study. Prohibitions: PHSI2005, PHSI2001, PHSI2101, PHSI2901 Assessment: One written exam; group and individual written and oral presentations.

Note: The completion of 6 credit points of MBLG units of study is highly recommended for progression to Senior Physiology. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites.

This unit of study gives a basic introduction to the functions of the nervous system, including excitable cell (nerve and muscle) physiology, sensory and motor systems and central processing. It also incorporates haematology and cardiovascular physiology. The practical component involves experiments on humans, isolated tissues, and computer simulations, with an emphasis on hypothesis generation and data analysis. Inquiry-based learning tutorial sessions will be integrated with this demonstrating the integrative nature of physiology. Both oral and written communication skills are emphasized, as well as group learning.

Textbooks

Lauralee Sherwood: Human Physiology; From Cells to Systems 5th edition 2004

PHSI2006

Integrated Physiology B

Credit points: 6 Teacher/Coordinator: Dr Meloni Muir Session: Semester 2 Classes: Five one hour lectures, one 3 hour practical and one 3 hour tutorial per fortnight. Prerequisites: 6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics, Biology, Psychology units of study. Prohibitions: PHSI2006, PHSI2002, PHSI2102, PHSI2902 Assessment: One written exam; group and individual written and oral presentations.

Note: The completion of Molecular Biology and Genetics A is highly recommended for progression to Senior Physiology. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites.

This unit of study gives a basic introduction to the functions of the remaining body systems: gastrointestinal, respiratory, endocrine, reproductive and renal. The practical component involves experiments on humans, isolated tissues, and computer simulations, with an emphasis on hypothesis generation and data analysis. Inquiry-based learning tutorial sessions will be integrated with this demonstrating the integrative nature of physiology. Both oral and written communication skills are emphasized, as well as group learning.

Lauralee Sherwood: Human Physiology; From Cells to Systems 5th edition 2004

PHSI2905

Integrated Physiology A (Advanced)

Credit points: 6 Teacher/Coordinator: Dr Catherine Learney and Dr Dario Protti Session: Semester 1 Classes: Five 1 hour lectures, one 3 hour practical and one 3 hour tutorial per fortnight. Advanced students will be exempt from attending some classes to permit meetings with supervisor. Prerequisites: 6 credit points of Junior Chemistry plus 30 credit points from any Junior Chemistry, Physics, Mathematics, Biology, Psychology units of study.

Prohibitions: PHSI2005, PHSI2101, PHSI2901, PHSI2902 Assessment: One written exam; group oral and individual written presentations, 1 research essay (research essay will replace some other assessment items from regular course).

Note: Department permission required for enrolment.

Note: Permission from the coordinators is required for entry into this course. It is available only to selected students who have achieved a WAM of 65 (Credit average) or higher in their Junior units of study. Students taking combined degrees or with passes in units not listed should consult a coordinator if they do not meet the prerequisites. The completion of 6 credit points of MBLG units of study is highly recommended for progression to Senior Physiology.

This unit of study is an extension of PHSI2005 for talented students with an interest in Physiology and Physiological research. The lecture/practical component of the course is run in conjunction with PHSI2005. This unit of study gives a basic introduction to the functions of the nervous system, including excitable cell (nerve and muscle) physiology, sensory and motor systems and central processing. It also incorporates haematology and cardiovascular physiology. The practical component involves experiments on humans, isolated tissues, and computer simulations, with an emphasis on hypothesis generation and data analysis. Inquiry-based learning tutorial sessions will be integrated with this...
demonstrating the integrative nature of physiology. Both oral and written communication skills are emphasized, as well as group learning. The advanced stream of the course gives students an opportunity to interact with academics in small groups (or one to one) and to carry out a research project. Students will be allocated a supervisor and a project according to interest and availability. A research project will be determined by the supervisor, and students will carry out a library-based research project and have the opportunity to discuss their progress and understanding of the topic at regular meetings with the supervisor. Students will submit their research assignment as a major component of their assessment for the course. This will replace some other assessable activities from the regular course. Students will also be exempt from attending some of the tutorial and/or practical classes in order to give them time to meet with their supervisor.

Textbooks

Please note, all NEUR courses are taught and administered jointly by the Disciplines of Physiology and Anatomy & Histology and can form part of a major in Physiology, Anatomy & Histology or Neuroscience. NEUR3001/3901 and 3002/3902 are designed to be taken in conjunction with other. It is also strongly advised that NEUR3003/3903 and 3004/3904 be taken together. For information on NEUR3002 and NEUR3004 refer to page 160.

NEUR3001
Neuroscience: Special Senses

Credit points: 6 Teacher/Coordinator: Dr Dario Protti Session: Semester 1 Classes: Two 1 hour lectures per week; one 3 hour practical per fortnight. Prerequisites: For BMedSc students: BMED(2801 or 2503) and BMED(2806 or 2505) For other students: (PHSI(2101 or 2001 or 2901 or 2005 or 2905) or ANAT(2003 or 2010) and 6 credit points of MLBG. Prohibitions: PHSI3001, NEUR3001. Assumed knowledge: It is strongly recommended that students also take unit NEUR3003. PHSI3002 and ANAT2010 are assumed knowledge. Assessment: Two 1 hour exams, one prac report, tutorial papers, 2000 word essay.

The aim of this course is to provide students with an introduction to the structure and function of the nervous system and to the main concepts of processing of sensory information. Understanding basic sensorytransduction mechanisms and the function of the sensory systems is necessary to understand how perceptual processes work in normal and disease conditions and provides a gateway to unravel the complexity of the mind. Basic aspects of low and high level sensory processing in all sense modalities will be covered, with a special emphasis in the auditory and visual systems. The relationship between sensory systems, perception and higher cognitive functions will be addressed.

Textbooks

NEUR3003
Cellular and Developmental Neuroscience

Credit points: 6 Teacher/Coordinator: Dr Kevin Keay and Dr Catherine Learney Session: Semester 2 Classes: Three 1 hour lectures plus one 1 hour tutorial or one 2 hour practical per week. Prerequisites: For BMedSci; 42 credit points of Intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Prohibitions: NEUR3903, PHSI3002, PHSI3902. Assumed knowledge: Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. Assessment: Three 1 hour exams. Major essay/report.

Note: Enrolment in NEUR3004/3904 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other.

This second semester unit is designed to introduce students to "cutting edge" issues in the neurosciences. This course is a combination of small lectures on current issues in cellular and developmental neuroscience and a research-based laboratory or library project. Issues covered in the lecture series will include the role of glial on cerebral blood flow and neural transmission, neurochemistry and psychiatric disorders and development of central and peripheral nervous system.

NEUR3903
Cellular & Developmental Neurosci. (Adv)

Credit points: 6 Teacher/Coordinator: Dr Kevin Keay and Dr Catherine Learney Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial or one 2 hour practical per week. Prerequisites: For BMedSci; 42 credit points of Intermediate BMed units. For others: 18 credit points of Intermediate science units of study from Anatomy & Histology, Biochemistry, Biology, Chemistry, Computer Science, Mathematics, Microbiology, Molecular Biology and Genetics, Physiology, Psychology or Statistics. Plus, students must have a CREDIT (or better) in NEUR3001 or NEUR3002/3902. Prohibitions: NEUR3003, PHSI3002, PHSI3902. Assumed knowledge: Students should be familiar with the material in Bear, Connors & Paradiso Neuroscience: Exploring the Brain. Assessment: Three 1 hour exams. Major essay/report. Mini-lecture.

Note: Department permission required for enrolment.

Note: Enrolment in NEUR3004/3904 is HIGHLY RECOMMENDED. Courses are designed to be taken in conjunction with each other. Students must receive permission from the coordinators for enrolment.

This unit encompasses the material taught in NEUR3003. Advanced students prepare and present a mini-lecture on a current topic in neuroscience research.

Textbooks

For other NEUR units of study, see the entry for the Department of Anatomy and Histology.

PHSI3005
Human Cellular Physiology: Theory

Credit points: 6 Teacher/Coordinator: Dr William Phillips Session: Semester 1 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: Except for BMedSci students: PHSI(2005 or 2905) and PHSI(2006 or 2906). For BMEdSci: BMED (2801 and 2802). Prohibitions: PHSI3905, PHSI3004, PHSI3904. Assumed knowledge: 6 credit points of MLBG. Assessment: One 2 hour exam and 4-6 quizzes
The aim of this unit of study is to examine key cellular processes involved in the growth, maintenance and reproduction of human life. Processes to be studied include the regulation of cell division and differentiation in developing and adult tissues, the regulation of body fluids through ion transport across epithelia, mechanisms of hormonal and nervous system signaling. Lectures will relate the molecular underpinnings to physiological functions: our current interpretation of how ion channels, hormone receptors and exocytotic complexes mediate tissue function and human life. The significance of these molecular mechanisms will be highlighted by considering how mutations and other disorders affect key proteins and genes and how this might lead to disease states such as cancer, intestinal and lung transport disorders and osteoporosis.

Textbooks

PHSI3006
Human Cellular Physiology: Research
Credit points: 6 Teacher/Coordinator: Dr William D. Phillips Session: Semester 1 Classes: Two small group PBL and one 1 hour lecture per week; one 3 hour practical in some weeks. Prerequisites: Except for BMEdSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) for BMEdSc: BMed (2801 and 2802). Corequisites: PHSI3005 Prohibitions: PHSI3905, PHSI3904, PHSI3904 Assessment: One 1.5 hour exam, PBL assessments by oral presentations and paper summaries, prac reports. This unit of study complements, and should be taken together with PHSI3005. PHSI3006 focuses deeply upon certain areas of cellular physiology that have particular relevance to human health and disease. In the problem-based learning (PBL) sessions groups of students work together with the support of a tutor to develop and communicate an understanding of mechanism underlying the physiology and patho-physiology of disorders such as cystic fibrosis and vitamin D resistance. Each problem runs over three weeks with two small group meetings per week. Reading lists are structured to help address written biomedical problems. Lectures provide an introduction to the biological and clinical features of the problem and advice on how to interpret scientific data of the type found in the research papers. Practical classes will emphasize experimental design and interpretation. Collectively, the PBL, lectures and practical classes aim to begin to develop skills and outlook needed to deal with newly emerging biomedical science.

Textbooks

PHSI3007
Heart and Circulation: Normal Function
Credit points: 6 Teacher/Coordinator: Prof Roger Dampney Session: Semester 2 Classes: Two 1 hour lectures and one 3 hour practical or one 2 hour tutorial per week. Prerequisites: Except for BMEdSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) plus at least 12 credit points of intermediate Science Units of Study For BMEdSc: BMed (2801 and 2803). Prohibitions: PHSI3907, PHSI3903, PHSI3903 Assumed knowledge: 6 credit points of MBLG Assessment: One 2 hour exam, two 1000w reports, one oral presentation. Note: It is recommended that students take PHSI3007 ONLY in combination with PHSI3008.

The aim of this unit of study is to examine in depth the structure and function of the cardiovascular system at the organ system, cellular and molecular levels. There is a particular focus on exercise physiology and the way in which the heart, circulation and skeletal muscles contribute to the limits of sporting achievement. The excitability, contractility and energetics of the heart and blood vessels are studied and the regulation of these organs by local (physical and chemical) factors, hormones and the nervous system are discussed, with emphasis on cellular and molecular mechanisms. At the systemic level, short term (neural) mechanisms controlling the blood pressure and how the system behaves during exercise and other stresses is dealt with. Long term (hormonal) mechanisms regulating blood pressure via the renal control of extracellular fluid volume is also discussed. There is an emphasis in this unit of study on recent advances in cellular and molecular aspects of heart and the blood vessels and the regulation of these organs by local (physical and chemical) factors, hormones and the autonomic nervous system. Lectures will be complemented by practical classes and tutorials that reinforce the theory and emphasize experimental design, data interpretation and presentation.
PHSI3007
Heart & Circulation: Normal Function Adv

Credit points: 6
Teacher/Coordinator: Prof Roger Dampney
Session: Semester 2
Classes: Two 1 hour lectures and one 3 hour practical or one 2 hour tutorial per week.
Prerequisites: Except for BMedSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) plus at least 12 credit points of Intermediate Science Units of Study For BMedSc: BMED (2801 and 2803).
Prohibitions: PHSI3007, PHSI3003, PHSI3903
Assumed knowledge: 6 credit points of MBLG
Assessment: One 2 hour exam, 2000w report/essay based on a mentored research project, one oral presentation.

Note: Department permission required for enrolment.

Note: Available to selected students who have achieved an average of at least 75 in their prerequisite units of study. It is highly recommended that this unit of study be taken in combination with PHSI3908.

PHSI3908
Heart and Circulation: Dysfunction Adv

Credit points: 6
Teacher/Coordinator: Prof Roger Dampney
Session: Semester 2
Classes: Two 1 hour lectures and one 2 hour seminar per week.
Prerequisites: Except for BMedSc students: PHSI(2005 or 2905) and PHSI(2006 or 2906) plus at least 12 credit points of Intermediate Science Units of Study For BMedSc: BMED (2801 and 2803).
Prohibitions: PHSI3908
Assumed knowledge: 6 credit points of MBLG
Assessment: One 2 hour exam, 2000wd essay.

Note: It is strongly recommended that students take PHSI3908 ONLY in combination with PHSI3007

This unit of study complements and should be taken together with PHSI3007, which deals with the normal function of the cardiovascular system. This unit of study focuses on cardiovascular disease which is a major cause of death in western society. Lectures provide the background to understanding (a) the disruption of normal physiological processes, (b) recent advances in cellular and molecular aspects, and (c) the physiological basis of modern approaches to treatment. Example of diseases covered include: heart failure, heart attack, cardiac hypertrophy, atheroma and hypertension. In the seminar sessions, students will work in small groups with a tutor to further extend their understanding of cellular and molecular mechanisms underpinning cardiovascular disease. Reading lists are organized into specific topics related to a particular disease. Through analysis and discussion of the readings students develop skills necessary for interpreting and communicating science.

**Physiology Honours**

During fourth year, no formal series of lectures is provided but students are given a relevant problem to investigate. This problem usually represents a small facet of one of the major current research projects within the Department, and the students work in collaboration with members of the staff. Students write a thesis embodying the results of their work.

**Plant Science**

The following units of study form part of the Plant Science program, which has been developed jointly by the Faculty of Agriculture, Food and Natural Resources and the School of Biological Sciences.

**Intermediate units of study**

**PLNT2001**

Plant Biochemistry and Molecular Biology

Credit points: 6
Teacher/Coordinator: Prof Les Copeland (Coordinator), Dr Rosanne Quinnell
Session: Semester 1
Classes: (2 hr lec, 3 hr prac)/wk.
Prerequisites: 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202).
Prohibitions: PLNT2901, AGCH2001
Assessment: Quizzes + theory of prac test (25%), laboratory reports (25%), final examination (50%)

This unit of study explores the fundamentals of plant biochemistry, from what plants are made of to how plants regulate their metabolic processes. The specialised nature of these metabolic processes, which enable plants to respond to different biotic and abiotic environmental influences, is featured as is their relationship to food, feed and fibres. The unit covers basic chemistry and metabolic reactions of the main plant constituents, how storage reserves are mobilized to provide energy and substrates for growth and development, and how metabolic pathways are controlled and respond to influences from the plant environment. Special attention is given to these processes in economic plants, and their relevance to foods and fibres. The unit covers basic chemistry and metabolic reactions of the main plant constituents, how storage reserves are mobilized to provide energy and substrates for growth and development, and how metabolic pathways are controlled and respond to influences from the plant environment. Special attention is given to these processes in economic plants, and their relevance to foods and fibres.

This unit of study complements intermediate units of study in plant science, molecular and cell biology, genetics and biotechnology, and leads on to senior plant modules offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources. Learning in the unit is by lectures and laboratory work, augmented by self-directed learning related to the lecture and practical classes and discussions to provide insights into how molecular and biochemical approaches lead to understanding of plant functions. Students will be expected to access the WebCT site regularly for information.

**Textbooks**

A Study Guide for the unit will be available for purchase from the Copy Centre at a cost of $10 during the first week of Semester.
A Laboratory Manual for the unit will be available for purchase from the Copy Centre at a cost of $10 during the first week of Semester.

**PLNT2002**

Credit points: 6  
Teacher/Coordinator: Dr Glenda Wardle & Dr Murray Henwood  
Session: Semester 1  
Class(es): (2 hrs lect & 3 hrs prac)/wk, audiovisual  
Prerequisites: Distinction average in 12 credit points of Junior Biology or LWSC units of study including two of BIOL (1001, 1002, 1902, 1003, 1903) LWSC1002, MBLG1001 (or with the Dean's permission BIOL1201 and BIOL1202 or may be substituted for the above). Prohibitions: PLNT2902, BIOL2004, BIOL2904

This unit provides a broad understanding of the evolution, classification and diversity of terrestrial plants and the principles of plant ecology in an Australian context. The major types of Australian vegetation are discussed across a range of temporal and spatial scales, and their current distribution related to their environment and origins. Selected contemporary issues in plant conservation from Australian natural and managed systems are explored. There is a strong emphasis on practical skills such as phyllogenetic inference, plant identification and the collection and analysis of ecological data. The practical component of the unit of study uses examples taken from the Australian flora (including plants of horticultural significance) and major crop plants. Important elements of this unit are half-day field trips to the Royal National Park (or production systems at Camden), the Royal Botanic Gardens Sydney and the construction of student herbaria. The unit of study complements intermediate units of study in plant science, zoology, molecular and cell biology, genetics and biotechnology, and leads on to advanced plant and ecology modules offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources.

Textbooks:  
A Laboratory Manual for the unit will be available for purchase from the Copy Centre during the first week of Semester.

**Assessment:**  
One 2-hr exam (40%), laboratory reports (10%) independent research project presentation and report (25%), self-directed learning exercises (15%).

**PLNT2901**

**Plant Biochem & Molecular Biology (Adv)**

Credit points: 6  
Teacher/Coordinator: Prof Les Copeland (Coordinator), Dr Rosanne Quinnell  
Session: Semester 1  
Class(es): (3 lec or tut; 3 prac or sem)/wk  
Prerequisites: A Distinction average in 12 credit points of Junior Chemistry and 12 credit points of Junior Biology (or with the Dean's permission BIOL1201 and BIOL1202)  

Assessment: One 2-hr exam (50%), laboratory reports (10%) independent research project presentation and report (25%), self-directed learning exercises (15%).

The content will be based on PLNT2001 but qualified students will participate in alternative components at a more advanced level

Textbooks:  
A Study Guide for the unit will be available for purchase from the Copy Centre at a cost of $10 during the first week of Semester.

**PLNT2003**

**Plant Form and Function**

Credit points: 6  
Teacher/Coordinator: A/Prof Bruce Sutton, A/Prof Robyn Overall  
Session: Semester 2  
Class(es): 2 lectures, 1 hr tutorial and 1 prac, A/V session (2-3hr) or field trip (6hr) per wk  
Prerequisites: 12 credit points of Junior Biology (or with the Dean's permission), BIOL1201 and BIOL1202 or BIOL1001 and ENV11002

Prohibitions: PLNT2903, BIOL2003, BIOL2903, CROP2001  
Assumed knowledge: The content of BIOL1002 or 1902 is assumed knowledge and students entering from BIOL1003 or 1903 will need to do some preparatory reading. Assessment: One 2hr theory exam (40%), prac exam (20%), anatomy project (10%), quizzes (5%), physiology report (10%), field report (15%)

This unit of study investigates the structure of cells, tissues and organs of flowering plants and relates them to function. Topics include: how photosynthesis, translocation, water transport and nutrition relate to the structures that carry out these processes. Most of the information on plant structure will be provided in self-instructional audio-visual sessions augmented by small group discussions. This is integrated with experiments carried out in the laboratory or on field excursions to investigate the physiological aspects of plant structures. There is a focus on recent advances in plant molecular biology where they have been critical in enhancing our understanding of the form and function of plants. The physiological and anatomical responses of plants to extreme environments such as drought and salinity will also be addressed. Attention will be paid to the anatomy and physiology of crop, horticultural and Australian native plants. This unit of study complements Applied Plant Biochemistry, Australian Flora: ecology and conservation and Cell Biology and leads onto senior units of study in plant sciences, including Plant Growth and Development. It is essential for those seeking a career in plant molecular biology

**Senior units of study**

**PLNT3001**

**Plant, Cell and Environment**

Credit points: 6  
Teacher/Coordinator: Dr Rosanne Quinnell and A/Prof Bruce Sutton  
Session: Semester 2  
Class(es): (2-3 workshops, 2-3 prac)/wk  
Prerequisites: 12 credit points of Intermediate Biology, Plant Science, Molecular Biology and Genetics or equivalent

Prohibitions: PLNT3901

Assessment: One 2hr exam (50%), 2 lab reports (50%)

Plant Cell and Environment comprises discussion and practical sessions that are guided by current research directions in Australian
Plant sciences. Several broad themes in Plant Science research will be identified at the start of the semester and these will provide the framework for discussions for the remainder of the semester. Theme areas will consider the Australian flora and areas currently under investigation at the University of Sydney including rising atmospheric carbon dioxide levels, post-harvest physiology, symbiotic systems and advances in plant cell and molecular biology. Students will be required to examine and critique the current published literature and to articulate how newly published findings have informed the field. Students will be required to draw on knowledge from their previous studies in biology, which may include Intermediate Biology, Plant Science, Molecular and Microbial Biology, Agriculture and Horticulture units of study. The practical component of this unit of study has sufficient flexibility for students to design their own group experiments and to answer questions raised during the discussions of the published literature. A range of equipment for student experiments will be available including: pulse amplitude modulated (PAM) fluorometers; oxygen electrodes; Scholander bomb, gel electrophoresis (PAGE).

Assessment:
- One 2 hr exam (60%), project presentation and report (20%), laboratory quizzes, term assessment (10%), nomenclature exercise (10%) and research project (10%)

Note: Department permission required for enrolment.

A range of equipment for student experiments will be available including: pulse amplitude modulated (PAM) fluorometers; oxygen electrodes; Scholander bomb, gel electrophoresis (PAGE).

Assessment:
- One 2 hr exam (50%), research project (50%)

Note: Entry is restricted and is based on a combination of a high WAM and student motivation.

Plant Cell and Environment comprises discussion and practical sessions that are guided by current research directions in Australian plant sciences. Several broad themes in Plant Science research will be identified at the start of the semester and these will provide the framework for discussions for the remainder of the semester. Theme areas will consider the Australian flora and areas currently under investigation at the University of Sydney including rising atmospheric carbon dioxide levels, post-harvest physiology, symbiotic systems and advances in plant cell and molecular biology. Students will be required to examine and critique the current published literature and to articulate how newly published findings have informed the field. Students will be required to draw on knowledge from their previous studies in biology, which may include Intermediate Biology, Plant Science, Molecular and Microbial Biology, Agriculture and Horticulture units of study. The practical component of this unit of study has sufficient flexibility for students to design their own group experiments and to answer questions raised during the discussions of the published literature. A range of equipment for student experiments will be available including: pulse amplitude modulated (PAM) fluorometers; oxygen electrodes; Scholander bomb, gel electrophoresis (PAGE).

Assessment:
- One 2 hr exam (50%), research project (50%)

Note: Entry is restricted and is based on a combination of a high WAM and student motivation.

Plant growth and Development (Advanced)

Credit points: 6

Teacher/Coordinator: Dr Rosanne Quinnell and A/Prof Bruce Sutton

Session:
- Semester 2 Classes: 2-3 workshops/week

Prerequisites:
- 12 credit points of Intermediate Biology, Plant Science, Molecular and Microbial Biology, Agriculture and Horticulture units of study. The practical component of this unit of study has sufficient flexibility for students to design their own group experiments and to answer questions raised during the discussions of the published literature. A range of equipment for student experiments will be available including: pulse amplitude modulated (PAM) fluorometers; oxygen electrodes; Scholander bomb, gel electrophoresis (PAGE).

Assessment:
- One 2 hr exam (50%), research project (50%)

Note: Department permission required for enrolment.

Credit points: 6

Teacher/Coordinator: A/Prof Robyn Overall

Session:
- Semester 2 Classes: 3 lec, 0-3 hr prac/week

Prerequisites:
- 12 credit points of Intermediate PLNT, BIOL, AGCH or CROP units of study including at least one of PLNT2001, PLNT2901, PLNT2003, PLNT2903, BIOL2016, BIOL2916, BIOL2003, BIOL2903, BIOL2006, BIOL2906, CROP2001, AGCH2002 or equivalent. These requirements may be varied and students with lower averages should consult the unit coordinator.

Prohibitions:
- PLNT2001, PLNT2901, BIOL3901, BIOL3903 Assessment: One 2 hr exam (60%), project presentation and report (30%), laboratory quizzes and book (10%)

Qualified students will participate in alternative components of PLNT3002 Plant Growth and Development, representing 30% of the total assessment. The students will be exempt from one standard laboratory report and the standard independent group project. Instead, the students will conduct an advanced independent individual practical or theoretical research project under the supervision of a member of the academic staff. The program includes a formal presentation of the results of the project in verbal and written reports.

Textbooks:

Recommended reading:

A Study Guide for the unit will be available for purchase from the Copy Centre during the first week of Semester.

Systematics and Evolution of Plants

Credit points: 6

Teacher/Coordinator: Dr Murray Henwood

Session:
- Semester 1 Classes: 2 lectures, one 3 hour practical per week

Prerequisites:
- PLNT3902 or 2902 or equivalent

Prohibitions:
- BIOL3915, BIOL3910, PLNT3903 Assumed knowledge: BIOL(1001 or 1011 or 1901 or 1002 or 1902 or 1904) Assessment: One 1.5 hr take-home exam (50%), oral presentation (5%), nomenclature exercise (15%), research project (30%)

This unit of study introduces students to the practical aspects of Plant Systematics and evolution. Students will gain a working knowledge of the general techniques and approaches used in Plant Systematics (including an understanding of plant taxonomy, phylogenetics and evolutionary processes). A range of data sources (DNA sequences and morphology) will be used to address questions concerning the evolution, classification and historical biogeography of various plant groups. A two-day field trip will provide tuition in plant identification and an opportunity to acquire skills in field-botany. This unit of study is recommended for students with an interest in the areas of: field biology, bioinformatics, general ecology and evolution.

Textbooks:

Systematics and Evolution of Plants Adv

Credit points: 6

Teacher/Coordinator: Dr Murray Henwood

Session:
- Semester 1 Classes: 2 lectures & 1 practical per week

Prerequisites:
- Distinction in PLNT2002 or PLNT2902 (or equivalent). These requirements may be varied and students with lower averages should consult the Unit Executive Officer.

Prohibitions:
- BIOL3915, BIOL3910, PLNT3903 Assumed knowledge: BIOL(1001 or 1101 or 1901 or 1002 or 1902 or 1904) Assessment: One 1.5 hr take-home exam (50%), oral presentation (5%), nomenclature exercise (15%), research project (30%)

This unit of study introduces students to the practical aspects of Plant Systematics and evolution. Students will gain a working knowledge of the general techniques and approaches used in Plant Systematics (including an understanding of plant taxonomy, phylogenetics and evolutionary processes). A range of data sources (DNA sequences and morphology) will be used to address questions concerning the evolution, classification and historical biogeography of various plant groups. A two-day field trip will provide tuition in plant identification and an opportunity to acquire skills in field-botany. This unit of study is recommended for students with an interest in the areas of: field biology, bioinformatics, general ecology and evolution.
Fungi in the Environment (Advanced)

Credit points: 6 Teacher/Coordinator: Dr P McGee Session: S1 Intensive Classes: 40 hours of practical work in a two week intensive program immediately prior to semester one (labs run from 12 February to 23 February 2007), plus the equivalent of 30 hours self-guided study during the semester. Prerequisites: 12 credit points of Intermediate Biology, or 6 credit points of Intermediate Biology and 6 Intermediate credit points of either Microbiology or Geography, or their equivalent. Prohibitions: BIOL3817 Assessment: One 2 hour take home exam, laboratory and written assignments.

The unit emphasises use of research techniques in the laboratory to enable deeper understanding of issues in fungal ecology, environmental and rehabilitation biology, biological control and soil microbiology. Benefits provided by fungi in symbiotic interactions with plants, including mycorrhizal fungi and shoot-borne endophytes. Students will be encouraged to develop a deeper understanding of one area of Fungal Biology through independent study. Part of the learning material will be available on the internet.

Biol3017

Fungi in the Environment

Credit points: 6 Teacher/Coordinator: Dr P McGee Session: S1 Intensive Classes: 40 hours of practical work in a two week intensive program immediately prior to semester one (labs run from 12 February to 23 February 2007), plus the equivalent of 30 hours self-guided study during the semester. Prerequisites: 12 credit points of Intermediate Biology, or 6 credit points of Intermediate Biology and 6 Intermediate credit points of either Microbiology or Geography, or their equivalent. Prohibitions: BIOL3817 Assessment: One 2 hour take home exam, laboratory and written assignments.

The unit emphasises use of research techniques in the laboratory to enable deeper understanding of issues in fungal ecology, environmental and rehabilitation biology, biological control and soil microbiology. Benefits provided by fungi in symbiotic interactions with plants, including mycorrhizal fungi and shoot-borne endophytes. Students will be encouraged to develop a deeper understanding of one area of Fungal Biology through independent study. Part of the learning material will be available on the internet.

Plnt3003

Plant Disease

Credit points: 6 Teacher/Coordinator: Prof Lester Burgess and Prof David Guest Session: Semester 1 Classes: (2 lec, 3 labs/seminars/workshops)/wk Prerequisites: Two of PLNT2001, PLNT2901, PLNT2002, PLNT2902, PLNT2003, PLNT2903, MICR2024, MICR2026 or MICR2101 Assessment: Written exam 2 hr (60%), 12 quizzes (15%), group project report (25%)

This unit introduces fungi and other microbes as causes of plant disease that limit agricultural and horticultural production. The practical component introduces techniques used in handling and identifying fungi, and in studying plant disease. Emphasis is placed on the design of experiments and interpretation of experimental data. Topics include symptoms and diagnosis of plant disease; the biology, epidemiology and management of fungi and other microbes that cause plant disease; breeding for disease resistance; plant-parasite relationships; and disease resistance in plants.

Textbooks

Hort3004

Postharvest Biology and Technology

Credit points: 6 Teacher/Coordinator: Dr Robyn McConchie Session: Semester 2 Classes: (2 lec, 3-4 labs/seminars/workshops)/wk Prerequisites: Two of PLNT2001, PLNT2901, PLNT2002, PLNT2902, PLNT2903, MICR2024, MICR2026 or MICR2101 Assessment: Written exam 2 hr (60%), laboratory reports (25%), assignment (10%), seminar (5%)

The unit develops understanding and skills relevant to the maintenance of quality during the harvesting, handling, storage and marketing of fresh plants and plant parts. The subject integrates the postharvest physiology of products that are handled or marketed in a living state, with the technological and economic challenges associated with delivering them from the field to the consumer. Supply chain analysis of crops will be examined via case study examples, drawn from fruits, vegetables, cut flowers, nursery and foliage crops, turf and edible fungi. Students will study all operations from harvesting to consumer evaluation.

Textbooks

Hort3005

Production Horticulture

Credit points: 6 Teacher/Coordinator: Dr Jenny Jobling Session: Semester 1 Classes: (2 lec, 3 labs/seminars/workshops)/wk Prerequisites: Two of PLNT2001, PLNT2901, PLNT2002, PLNT2902, PLNT2003, PLNT2903.

Assumed knowledge: HORT1001, HORT1002 and HORT2002. Assessment: Exam 2 hr (60%), laboratory reports (25%), assignment (10%), seminar (5%)

The unit develops understanding and skills relevant to the maintenance of quality during the harvesting, handling, storage and marketing of fresh plants and plant parts. The subject integrates the postharvest physiology of products that are handled or marketed in a living state, with the technological and economic challenges associated with delivering them from the field to the consumer. Supply chain analysis of crops will be examined via case study examples, drawn from fruits, vegetables, cut flowers, nursery and foliage crops, turf and edible fungi. Students will study all operations from harvesting to consumer evaluation.

Textbooks

One 3 hr exam (55%), assignments (45%) if fruit crops 15%, vegetables 15%, tropical and environmental horticulture 15%.

Emphasis is given to the scientific basis for fruit and winegrape production and to sustainable vegetable crop production and tropical horticultural crops. Concepts underpinning the establishment of and management of urban plants and use are addressed. The unit develops skills in the evaluation of technical and environmental status of established orchards, vineyards, vegetable crops and urban plantings.

AGRO3002

Agronomy 3
Credit points: 6
Teacher/Coordinator: A/Prof Bruce Sutton
Session: Semester 1
Classes: 5 student contact hrs/wk, workshops and discussions (36 hr total), labs (26 hr total)
Prerequisites: PLNT2003 or PLNT2903
Assumed knowledge: CRNP1001 or HDR1001 or LWSC1001
Assessment: One 2 hour exam, consultancy report, practical reports

Agronomy studies the practices and underlying concepts of sustainable crop and pasture production. The scientific basis of modern practices used in crop production, particularly those relevant to New South Wales, is explored. This knowledge is used to appreciate the scale of future problems such as climate change, soil degradation and increased costs of petrochemical-based inputs like fuel and fertilizer. Possible responses to these problems that will help maintain productivity will be examined. The relationship between agricultural production and natural resource management is also considered as part of a modern production environment, with the impact of recent legislation supporting Ecologically Sustainable Development on agriculture and the agricultural response to it as the focus of discussion. The practical classes will develop key skills appropriate to precision agriculture and use of current decision support systems

Psychology

Psychology is the study of behaviour and it is approached on a scientific basis, with provision for professional training at the postgraduate level. The research activities of the School cover almost all of the main branches of the subject. Extensive information about the subject and the School is available on the School web-site: www.psych.usyd.edu.au. A normal three year sequence required for a major in Psychology is: PSYC1001, 1002, 2011, 2012, 2013, 2014, and at least four Senior units of study selected from PSYC3010, 3011, 3012, 3013, 3014, 3015, 3016, 3017, 3018, 3019, and HPSC3023. Mid-year entrance is possible and involves modification of this sequence. *(Required for entry to Fourth Year).

Registration and noticeboards
Students in all years must register during the orientation period. PSYC1001 students register by going to the Carslaw Building during orientation and collecting a personalised computer generated timetable, or by obtaining their timetables through MyUni, which will indicate the lecture times and the tutorial group to which they have been allocated. Further information will be posted at the Enrolment Centre and on the Junior Psychology noticeboard on the 4th floor of the Old Teachers College building.

Enquiries
The main enquiry office of the School is Room 325, Level 3 Brennan MacCallum Building, A18 (tel. 9351 2872). Staff members available to discuss particular courses may be contacted directly or through this office.

Honours
In order to be eligible to enter Psychology Honours, it is necessary (except as provided in the by-laws or resolutions) to gain a year average of at least Pass with Credit in Intermediate and in Senior Psychology units of study constituting a major in Psychology, and must include PSYC3010. Students wishing to graduate with Honours in Psychology are urged to discuss their choice of other subjects with a Faculty adviser as soon as practicable. There is currently a quota on entry to Psychology Honours.

Examinations
Undergraduate units of study are examined at the end of each semester and include classwork by way of essays, reports or practical/laboratory work. At the beginning of each unit of study students are advised of the contributions of exam and classwork for assessment purposes.

Summer School: January-February
PSYC1001 and PSYC1002 are offered in the Sydney Summer School. Consult the Sydney Summer School website for more information: http://www.summer.usyd.edu.au/

PSYC1001

Psychology 1001
Credit points: 6
Session: Semester 1, Summer Main
Classes: Three 1 hour lectures and one 1 hour tutorial per week, plus 1 hour per week of additional web-based (self-paced) material related to the tutorial.
Assessment: One 2.5 hr exam, one 1000 word essay, multiple tutorial tests, experimental participation.

Psychology 1001 is a general introduction to the main topics and methods of psychology, and is the basis for advanced work as well as being of use to those not proceeding with the subject. Psychology 1001 covers the following areas: subject matter and methods of psychology; basic statistics and measurement; behavioural neuroscience; applied psychology; social psychology; personality theory. This unit is offered in the Sydney Summer School. Consult the web site: http://www.usyd.edu.au/summerschool/ for more information.

Textbooks
Psychology 1001 Handbook.
Texts under review - See School website

PSYC1002

Psychology 1002
Credit points: 6
Session: Semester 2, Summer Main
Classes: Three 1 hour lectures and one 1 hour tutorial per week, plus 1 hour per week of additional web-based (self-paced) material related to the tutorial.
Assessment: One 2.5 hr exam, one 1250 word research report, multiple tutorial tests, experimental participation.

Psychology 1002 is a further general introduction to the main topics and methods of psychology, and it is the basis for advanced work as well as being of use to those not proceeding with the subject. Psychology 1002 covers the following areas: human development; human mental abilities; learning, motivation and emotion; visual perception; cognitive processes. This unit is offered in the Sydney Summer School. Consult the web site: http://www.usyd.edu.au/summerschool/ for more information.

Intermediate units of study

PSYC2011

Brain and Behaviour
Credit points: 6
Teacher/Coordinator: Dr Ian Johnston
Session: Semester 1
Classes: Three 1 hour lectures and one 1 hour tutorial per week.
Prerequisites: PSYC (1001 and 1002).
Prohibitions: PSYC2111
Assessment: One 2 hour exam, one 1500 word practical report, one 1000 word essay and six fortnightly quizzes.

This unit of study examines a range of phenomena and principles in learning and perception and their relations to underlying neural substrates. The emphasis in learning is on instrumental conditioning and the principle of reinforcement, ranging from applications of this principle to its neural substrates. Also covered are analyses of aversive-based learning, such as punishment and avoidance, and anxiety, together with related neurochemical mechanisms and the effects of various psychopharmacological agents on these processes. A number of perceptual phenomena will be studied (e.g., motion detection, recognition of faces, identification of emotion). A series of practical classes and demonstrations allow students to gain hands-on

252
experience of how some of these principles and phenomena may be studied experimentally.

Textbooks
See school website

PSYC2012
Statistics & Research Methods for Psych
Credit points: 6 Teacher/Coordinator: Dr Margaret Charles Session: Semester 1 Classes: Two 1 hour lectures and one 1 hour tutorial per week. Prerequisites: PSYC (1001 and 1002). Prohibitions: PSYC2112 Assumed knowledge: Recommended: HSC Mathematics, any level Assessment: One 2 hour exam, three class tests, one 1000 word group project, one 1 hour mid-semester exam.

The aim is to introduce students to fundamental concepts in statistics as applied to psychological research. These include summary descriptive statistics, an introduction to the principles and practice of research design, and the use of inferential statistics. Building upon this framework, the unit of study aims to develop each student’s expertise in understanding the rationale for, and application of, a variety of statistical tests to the sorts of data typically obtained in psychological research.

See school website

PSYC2013
Cognitive and Social Psychology
Credit points: 6 Teacher/Coordinator: Dr Karen Croot Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: PSYC (1001 and 1002). Prohibitions: PSYC2113 Assessment: One 2 hour exam, one 1500-2000 word essay/report, one 1000-1500 word written practical exercise.

This unit expands the depth and range of topics introduced in the first year lectures on Cognitive Processes, Developmental Psychology and Social Psychology. Following an introductory lecture, the first section (16 lectures) on Cognitive Processes focuses on current theories of memory, attention and reasoning and discusses the methods and issues involved in investigating these processes in both healthy individuals and people with cognitive dysfunctions. The second section (6 lectures) on Developmental Psychology presents and evaluates evidence about the early influences on children’s social and cognitive development. The final section (16 lectures) on Social Psychology continues an examination of social development across the lifespan from adolescence to late adulthood, followed by an examination of salient social constructs such as prejudice, group processes, altruism, affiliation and attraction.

Textbooks
Cognitive: See School website

PSYC2014
Personality and Differential Psychology
Credit points: 6 Teacher/Coordinator: Dr Fiona White Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour tutorial per week. Prerequisites: PSYC (1001 and 1002). Prohibitions: PSYC2114 Assessment: One 2 hour exam, one 1500 word essay, one 1500 word report.

PSYC2014 is made up of two components: Theories of Personality and Differential Psychology (Individual Differences). The aim of the Personality component is to introduce students to a number of influential theories of personality. Students will be exposed to some conceptual analysis and expected to examine critically the various theories covered. The aim of the Differential Psychology component is to introduce key topics in the study and assessment of individual differences in various psychological attributes. Students are expected to gain an understanding about the major theories of intelligence, associated research methods, and the traditional areas of group differences.

Textbooks
Differential Psychology component: See School website

Senior units of study
PSYC3010
Advanced Statistics for Psychology
Credit points: 6 Teacher/Coordinator: Dr Sabina Kleitman Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour tutorial per week. Prerequisites: PSYC (2012 or 2112) plus at least one other Intermediate Psychology Unit of Study from PSYC (2011 or 2111), PSYC (2013 or 2113), PSYC (2014 or 2114). Prohibitions: PSYC3201 Assessment: One 2 hour exam, class test, 1500 word assignment, practical exercises.

This unit of study expands upon students’ knowledge of the general linear model and its applications in the analysis of data from psychological research. The first half of the course is focused on research for which analysis of variance would be appropriate, and develops students’ ability to test more focused questions than can be answered by omnibus F tests. Issues that arise in testing contrasts, such as inflation of Type I error, will also be considered. In the second half of the course, students will further their understanding of multivariate techniques, such as multiple regression analysis.

Textbooks
See School website

PSYC3011
Learning and Behaviour
Credit points: 6 Teacher/Coordinator: Dr Justin Harris Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour tutorial per week. Prerequisites: PSYC (2011 or 2111) and at least one other Intermediate Psychology Unit from PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114). Prohibitions: PSYC3209 Assessment: PSYC (2012 or 2112) Assessment: One 2 hour exam, one 2000 word prac report, tutorial assessment.

This unit addresses the fundamental concepts and more important research findings related to contemporary theories of associative learning in animals and humans. It examines the application of such fundamental research to issues such as drug use, food choice, and learned helplessness. It is designed to foster skills in reading primary sources in this area, and provide the opportunity for hands-on experience in carrying out a research project.

Textbooks
See School website

PSYC3012
Cognition, Language and Thought
Credit points: 6 Teacher/Coordinator: Dr Bruce Burns Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour practical per week. Prerequisites: PSYC (2013 or 2113) and at least one other Intermediate Psychology unit from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2014 or 2114). Prohibitions: PSYC3205 Assessment: PSYC (2012 or 2112) Assessment: One 2 hour exam, 2000 word prac report, practical exercise(s).

This unit extends the theories and methods of investigating memory and attentional processes discussed in PSYC2013 to consider a number of domains of higher cognitive processing. One strand of the course will focus on language processing and consider how children learn language, the processes involved in speech perception and production, language comprehension and reading. The remainder of the course will deal with the cognitive processes involved in reasoning and decision-making. The practical program will expose students to a variety of the research methods used to investigate higher cognitive processes, develop their understanding of how these methods can be used to investigate hypotheses about mental processes and consider applications of cognitive research to real-world problems and issues.

Textbooks
See School website

PSYC3013
Perceptual Systems
Credit points: 6 Teacher/Coordinator: Assoc Prof Colin Clifford Dr Alex Holcombe Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour tutorial per week. Prerequisites: PSYC (2011 or 2111) and at least one other Intermediate Psychology Unit from PSYC (2012 or 2112), PSYC (2013 or 2113),
PSYC (2014 or 2114) or ANAT2010 Prohibitions: PSYC3210
Assumed knowledge: PSYC2012
Assessment: One 2 hour exam, one 1500 word report, tutorial quiz, group presentation.

The unit covers at an advanced level selected topics in perception from the psychophysical, physiological and neuropsychological perspectives. Students are expected to gain an understanding of some of the major theoretical issues motivating current perceptual research, to appreciate the significance of basic perceptual research for understanding normal perceptual functioning, and to be able to evaluate the empirical and conceptual worth of research contributions.

Textbooks
See School website

PSYC3014
Behavioural and Cognitive Neuroscience
Credit points: 6 Teacher/Coordinator: Prof Iain McGregor Dr Karen Croot
Session: Semester 2 Classes: Three 1 hour lectures and one 1 hour practical per week.
Prerequisites: (PSYC 2011 or 2111) and at least one other Intermediate Psychology Unit from PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114) OR (ANAT2010 plus PCOL2011)
Prohibitions: PSYC3204, PSYC3215
Assumed knowledge: PSYC (2113 or 2013)
Assessment: One 2 hour exam, one major essay/report 2000-2500 words, one 1000-1500 word written practical exercise.

This unit of study will focus on approaches to studying neurosciences incorporating molecular, pre-clinical and clinical models of brain function. These biological models of brain function will be linked with behavioural, affective and cognitive function and dysfunction. The implications of focal cognitive deficits in neurological patients for models of normal cognitive function will also be explored. Specific topics to be covered will be selected from the following areas: psychopharmacology, addiction, molecular neuroscience, sensorimotor integration, and the neural basis of learning and memory, language, visual cognition and praxis. In addition to lectures, a practical component will cover basic neuroanatomy, histology and neuropharmacology, and will introduce students to experimental and case-study approaches to studying neurosciences.

Textbooks
See School website

PSYC3015
Intelligence and Human Reasoning
Credit points: 6 Teacher/Coordinator: Dr. Jens Beckmann
Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour tutorial per week.
Prerequisites: PSYC(2014 or 2114) and PSYC(2013 or 2113)
Assumed knowledge: PSYC(2012 or 2112)
Assessment: One 2 hour exam; one 2000 word essay; tutorial quizzes.

The aim of this unit of study is to provide an overview of recent studies on human cognitive abilities and intelligence, and to build a critical platform from which both empirical evidence and theoretical propositions can be evaluated. Two broad methodological approaches will be considered, compared, and contrasted. (a) The individual differences approach which serves as the basis of much of contemporary psychological assessment in clinical, educational and organizational settings and (b) the experimental approach to cognitive abilities which use experimental methods to study the information-processing components that underlie intellectual performance (e.g., working-memory theories).

Textbooks
See school website.

PSYC3016
Developmental Psychology
Credit points: 6 Teacher/Coordinator: Dr David Livesey
Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour tutorial per week.
Prerequisites: PSYC (2013 or 2113) and at least one other Intermediate Psychology unit from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2014 or 2114)
Prohibitions: PSYC3206
Assessment: One 2 hour exam, one 2000 word report.

This unit examines various theoretical approaches to human development and selected issues within Developmental Psychology. The major issues/controversies in developmental theory are examined in relation to a number of the more influential theoretical approaches.

Students are expected to gain an understanding of the main theoretical influences upon current developmental research and to be able to compare and contrast theories of development. The second part of the unit introduces students to a range of issues in selected areas of contemporary Developmental Psychology. Students are expected to gain knowledge of these areas, and to develop a critical approach to the analysis of current research and theoretical issues. They are also expected to apply their knowledge in practical exercises involving observations of children.

Textbooks

PSYC3017
Social Psychology
Credit points: 6 Teacher/Coordinator: Dr Alan Craddock
Session: Semester 1 Classes: Two 1 hour lectures and one 2 hour tutorial per week.
Prerequisites: PSYC (2013 or 2113) and at least one other Intermediate Psychology Unit of Study PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2013 or 2113), PSYC (2014 or 2114)
Prohibitions: PSYC3212
Assumed knowledge: PSYC (2012 or 2112)
Assessment: One 2 hour exam, one 2500 word research report, tutorial presentation.

PSYC3017 continues the coverage of topics in Social Psychology begun in PSYC1001 and PSYC2013. The unit is divided into topic areas, where the emphasis is on evaluating theories and the relevant evidence. Topics areas include social relationships, antisocial behaviours, applied social psychology (effects of the physical environment on social behaviour; jury decision making), social cognition, leadership, and cross cultural psychology. Tutorials provide first hand experience of research by involving students in a range of research projects on the topics covered in the lectures. The tutorials also provide an opportunity for discussion of issues associated with these topics.

Textbooks
See School website.

PSYC3018
Abnormal Psychology
Credit points: 6 Teacher/Coordinator: Dr Marianna Szabo
Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour tutorial per week.
Prerequisites: PSYC (2012 or 2112) and at least one other Intermediate Psychology unit from study from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2013 or 2113)
Prohibitions: PSYC3203
Assumed knowledge: PSYC2012
Assessment: One 2 hour exam, one 2000 word essay, tutorial presentation.

This unit of study critically examines core issues in Abnormal Psychology, concerning the description, explanation and treatment of psychological disorders. The unit of study will include topics such as: (a) Adult abnormal psychology: Anxiety disorders (specific phobias, panic disorder, agoraphobia, OCD); Addictive disorders (drug, alcohol, gambling); Eating disorders (anorexia nervosa, bulimia nervosa); Mood disorders (dysthymia, major depressive disorder, cyclothymia, bipolar disorder); Schizophrenia, Personality disorders. (b) Child abnormal psychology: Learning disabilities, Mental retardation, Pervasive developmental disorders, Attention Deficit Hyperactivity disorder; Conduct disorder; Anxiety disorders, Depression.

Textbooks
See School website.

PSYC3019
Communication and Counselling
Credit points: 6 Teacher/Coordinator: Dr Alan Craddock
Session: Semester 2 Classes: Two 1 hour lectures and one 2 hour tutorial per week.
Prerequisites: PSYC2013 and one other Intermediate Psychology unit of study from PSYC (2011 or 2111), PSYC (2012 or 2112) and PSYC (2014 or 2114)
Prohibitions: PSYC3214
Assumed knowledge: PSYC (2012 or 2112)
Assessment: One 2 hour exam, one 2500 word report, quiz.

Communication: This part of the unit is concerned with understanding how interpersonal communication occurs in a face to face context. The emphasis will be on the structure of language and non-language components that compose the message and the extent to which that message is correctly decoded. Counselling: This part of the unit aims to provide an introduction to counselling psychology, to
critically examine the theoretical foundations of counselling processes and to consider relevant empirical research.

**Textbooks**
See School website.

**Psychology Honours**

**Prerequisites for admission**
A Major in Psychology with Credit average or better across both the Intermediate and Senior Psychology* Units of Study comprising the 48 credit points of Intermediate and Senior Psychology Units that constitute the minimum required for the major. PSYC (3010 or 3201) must be included in the Senior Units. BPych students should consult resolutions in chapter 6. School permission required. Due to restricted resources for research supervision, the intake to Psychology Honours will be limited to approximately 80 students and will be determined by academic merit in Intermediate and Senior Psychology.

**Assessment**
Formal exams in Ethics and Issues in Psychology and in Research Methods; report of empirical research project; theoretical thesis or assessment in three Special Fields modules. Students are required to (a) devise, conduct and report upon an empirical research project (research area dependent on interests and specialities of staff members); (b) write a theoretical thesis or attend two Special Fields seminars and complete required assessment tasks; and (c) attend one lecture series in Ethics and Issues in Psychology and two series of lectures in Research Methods.

**HPSC3023 Psychology & Psychiatry History & Phil**
HPSC3023 Psychology & Psychiatry History & Phil can be counted towards a Psychology Major. Successful completion of this unit of study is essential for students intending to take the Theoretical Thesis option in Psychology Honours.

**Virology**
Details for Virology units can be found under the Microbiology entry.
10. Undergraduate units of study
11. Talented Student Program

Overview
The Talented Student Program is a special program of study intended for students ‘of exceptional merit’ who are enrolled in degrees administered by the Faculty of Science (BSc, BMedSc, BIT, BCST, BPsych and their specialist streams or combined degrees). It is also available for the science component of the BLibStud. If other Faculties grant permission, TSP options may be taken for science components that are part of other degree programs. The aim of the program is to offer students of exceptional merit additional challenging material to enable them to maximise their intellectual growth and potential.

A major benefit of participation in the Talented Student Program is that students receive special supervision by academic staff and often engage in studies with small numbers of fellow students, all of whom have particular interest in the subject. In general, the TSP caters for students whose talent is broad-based across science. There are two main aspects of a student’s involvement in the TSP. Students can have greater flexibility in their choice of study (beyond that normally allowed by degree rules), and they have a mentor, a member of the academic staff who assists them in choosing from the great range of possibilities. Participation in the Talented Student Program is recorded separately on the student’s academic transcript, as are TSP units of study, so that all potential employers are aware that the student has completed challenging courses of study. Further information on the operation of the Talented Student Program may be obtained from the Departmental coordinators listed below or from the Undergraduate Adviser, Faculty of Science.

Selection
Entry to the Talented Student Program is by invitation from the Dean. Invitations to participate in the TSP are made each year for that year. The following guidelines apply generally, although Departments may have additional (and more stringent) requirements for entry to the activities they offer in the program.

- to be considered for the program in their first year, students should normally have a UAI (or equivalent) of 99.00 or higher and a result in band 6 in at least one HSC science subject area and/or a mark of 95 or better in HSC Mathematics Extension 2. The Dean may consider slight variations to these requirements where a student has demonstrated exceptional performance in scientific study (eg, at the level of membership of a team which represents Australia in an International Science or Mathematics Olympiad).
- to be considered for entry into the program in their second and third years, students should normally have WAMs of 85 or over and a high distinction grade in an appropriate Science subject area. Intermediate level entry to TSP is available only to students who have been enrolled full-time in units of study totaling at least 48 credit points.

Students who feel that they satisfy these criteria, but who have not received an invitation to participate in the TSP that year, should contact the Dean.

Range of TSP structures
The relevant Faculty Resolutions (eg Section 2.2 of the BSc degree authorises the Dean to give approval for students of exceptional merit to enrol in units of study or in combinations of units of study not normally available within the degree. In very exceptional cases, particularly for students who have excelled in Olympiad programs, application of these Resolutions may permit accelerated progress toward the completion of the BSc degree. Faculty policy in relation to the Talented Student Program is described in this chapter.

Students will arrange a suitable pattern of study for the year, in consultation with their mentor (who will also consider the entire degree program). For some students, the TSP activities will be in a single discipline, for others there will be separate TSP activities in several disciplines. Still others will choose interdisciplinary activities that relate to several fields to one another. Some students choose TSP activities that involve additional work beyond the normal amount for a student in the degree; for others, the TSP activities replace prescribed work, giving a normal total credit point load. Many disciplines have organised activity for a whole group of TSP students studying that field, such as a weekly seminar or group project. In other disciplines, TSP activity involves participation by each TSP student in a research group of staff and postgraduates. Every student is treated individually; however, there are some common patterns that we describe below.

For many TSP students who are interested in several fields, (especially if they aren’t really sure about their eventual direction), a suitable arrangement might be for them to join in separate TSP activities of each discipline. Students might elect to study a broader range of fields than usual, by studying more than the normal load of 24 credit points per semester. Another pattern is to accelerate a student who (say through Olympiad participation) has already learnt most of the topics in the usual first-year units in a discipline. Such a student can go directly to second year study in that field and in related fields, when they begin their degree. By studying more than the usual workload each semester, they may be able to complete their Honours degree in less than 4 years full-time. Some students have particular interests that can best be served by specially planned activities combining different disciplines.

Constraints on TSP structure
When a TSP activity replaces normal activity within a unit of study, the student will enrol in that unit, but the transcript will be annotated to reflect the TSP activity. When a TSP activity differs from the normal workload, the student will be enrolled in specially designated TSP units. The maximum number of credit points from TSP activities that can be credited towards the degree is normally 40 credit points designated as TSP units of study that are not listed in the Faculty handbook. This 40-credit point total covers all three years of study, and perhaps several different disciplines, so it is important to plan carefully to leave enough TSP possibilities in later years. It is also important that the student meets all the usual degree requirements, involving numbers of credit points at various levels and in a range of disciplines. Each TSP activity is assigned a number of credit points, a level (Junior, Intermediate or Senior) and a Discipline area, so it can contribute to meeting the degree requirements.

The TSP process
At the start of each year, the Dean chooses students to be invited to participate in the TSP. A welcome is held in Orientation week, and at that time, each student who is new to the TSP will meet briefly with the Faculty TSP coordinator, who assigns a mentor for the student. The mentor is usually a departmental TSP coordinator, from a department closest to the student’s interest(s). The mentor and the student then plan special activities for the year, covering all fields (this may involve discussions with coordinators from other departments).

A proposal is put to the Dean, who can approve enrolment in special TSP units of study. During the year the student will meet several times with the mentor, to make sure that everything is going well. Whatever TSP activities have been arranged will be carried out by the student with others (staff and possibly students too). Assessment will be
through the mentor and the staff involved in the activities. At the end of the semester the mentor will report results.

**TSP coordinators**

**Faculty of Science**  
Coordinator: A/Prof Anthony Masters

**Senior Agricultural Chemistry**  
Coordinator: Professor Les Copeland  
Students may undertake, in addition to normal coursework, a special research project directly supervised by a member of the academic staff.

**Anatomy and Histology**  
Coordinator: Dr Vladimir Balcar  
The Department of Anatomy and Histology offers individual projects related to research in the Department (for example Neuroscience, Developmental Biology, Forensic Anatomy, Structure and Function of Muscle Tissue) as well as more structured programme in cooperation with other departments in the School of Medical Sciences.

**Biochemistry**  
See Molecular and Microbial Biosciences

**Biology**  
Coordinator: Dr Jan Marc  
Students may undertake additional seminars and/or special project work.

**Chemistry**  
Coordinator: Dr Lou Rendina  
The Chemistry School offers Junior TSP students a challenging program based on the 'Chemistry 1 (Special Studies Program)'. The program comprises the Junior Chemistry (Advanced) lecture series, special tutorials, and special project-based laboratory exercises. Admission to Chemistry 1 (SSP) is by invitation only, and is limited to 40 students each year. Intermediate and senior Chemistry students may undertake a special research project. The possibility of intermediate students taking senior units also exists. Students should discuss options with Dr Rendina.

**Geosciences**  
Intermediate Geography  
Coordinator: A/Prof Phil Hirsch  
In lieu of some of the normal coursework students may undertake special project work on an environmental problem. Particular emphasis will be given to the enhancement of student capabilities in the areas of problem identification, problem formulation, data gathering, and analysis and reporting.

**Geology and Geophysics**  
Coordinator: Dr Derek Wyman  
Students will be offered extra seminars and/or special project work.

**History and Philosophy of Science**  
Coordinator: Dr Ofer Gal  
The unit will make special arrangements for individual students throughout their studies. Interested students should contact the TSP coordinator as soon as possible. Topics offered include History, Philosophy, and Sociology of Science; Science and Ethics; and Public Communication/Understanding of Science.

**Immunology**  
Coordinator: A/Prof Helen Briscoe  
Students may undertake a special research project.

**Information Technologies**  
Coordinator: Dr James Curran  
The Department will make special arrangements for individual students throughout their studies. Interested students should contact the TSP coordinator as soon as possible.

**Mathematics and Statistics**  
Coordinators: Dr Daniel Daners  
Students admitted to the program have the following options available to them:

- First Year students in the Faculty Talented Student Program are invited to apply for entry to the Mathematics Special Studies Program. In addition to covering standard material, students in the Special Studies Program will participate in their own seminars on specially chosen advanced topics. Second and third year students are encouraged to tailor their own programs, in consultation with the coordinators.
- Students in the Faculty Talented Student Program have access to Mathematics units of study in higher years. For example, a First Year student may take selected second or even third year units.
- Second and third year students have access to special projects, which can be inter-disciplinary, according to the interests of the individual student. Second and third year students are encouraged to tailor their own programs, in consultation with the coordinators.

**Medical Science**  
Coordinator: Dr Margot Day

**Molecular and Microbial Bioscience**  
(for Biochemistry, Molecular Biology and Genetics, Molecular Biotechnology and Microbiology)  
Coordinator: Dr Andrew Holmes  
A special program of study will be developed for individual students enrolled in Intermediate and Senior Biochemistry, Molecular Biology and Genetics, Molecular Biotechnology and Microbiology.

**Pathology**  
Coordinator: Dr Bob Bao

**Pharmacology**  
Coordinator: Dr Brent McParland  
The Department will make special arrangements for individual students throughout their studies.

**Physics**  
Coordinators: Prof Dick Hunstead and Prof David McKenzie  
Junior students may take extra seminars and special project work in addition to, or in lieu of, parts of Physics (Advanced) units of study. Intermediate students may take extra seminars and special project work in addition to, or in lieu of, parts of Intermediate Physics units of study. Senior students may take extra seminars and special research project work in addition to, or in lieu of, parts of Senior Physics units of study. An excursion to visit research facilities outside Sydney is offered in the mid-semester break in the July semester.

**Physiology**  
Coordinator: Dr Margot Day  
Students may undertake, in addition to normal coursework, a special research project.

**Psychology**  
Coordinator: Dr Irina Harris  
The program is available in Intermediate and Senior Psychology. Students admitted to the program have the following options, or various combinations of these options, available to them:

- additional options in Psychology either in lieu of, or in addition to, other units of study in Science
- a combination of additional Psychology options combined with special studies in another science discipline (eg, Biochemistry, Computer Science, Mathematics and Statistics)
- a special research project in lieu of, or in addition to, normal practical or classwork components

**Senior Soil Science**  
Coordinator: Dr Balwant Singh  
Students may undertake, in addition to normal coursework, a special research project.
This chapter is intended to give enrolment advice to undergraduate students in the Faculty of Science.

Honours in the Faculty of Science

Honours in the BSc (Including all streams and combined degrees), BCST, BMedSc, BST

Admission

To qualify to enrol in an honours course, students shall:

1. (a) have qualified for the award of a relevant pass degree from the Faculty of Science, or
(b) be a pass graduate of the Faculty of Science, or
(c) be a pass graduate holding an equivalent qualification from another institution
2. have completed a minimum of 24 credit points of Senior units of study relating to the intended honours course (or equivalent at another institution)
3. have achieved either
   (a) a credit average in the relevant Senior units of study, or
   (b) a SCIWAM of at least 60 (or equivalent at another institution)
4. satisfy any additional criteria set by the Head of Department concerned.

You should also note the following:

- Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters. Not all Departments offer students part time enrolment in honours, or honours enrolment commencing in the July semester. Students considering these types of honours enrolment are urged to contact the Department concerned.

- A student may not re-attempt an honours course in a single subject area. A student who is qualified to enrol in two honours courses may either complete the honours courses in the two subject areas separately and in succession, or complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

- An interdisciplinary honours course shall comprise such parts as determined by the Coordinating Committee for the interdisciplinary course

Honours in the BIT

Admission

To qualify to transfer into the Bachelor of Information Technology (Honours) degree, students shall:

1. have completed at least 144 credit points from the Bachelor of Information Technology degree;
2. have completed a minimum of 24 credit points from Table III (iv) and/or III (v), or the equivalent at another institution;
3. have achieved either a distinction average (75) in the relevant units of study in Table III (iv) and/or III (v), or a SCIWAM of at least 70;
4. satisfy any additional criteria set by the Head of Department concerned.

To qualify for the award of the Bachelor of Information Technology (Honours) degree, students shall complete 192 credit points as outlined in Section 4 of the Resolutions, including at least 42 credit points from honours-level units, including INFO4990, INFO4991, INFO4992 and INFO4999, with a result of at least 65 in INFO4999. However, students who fail to meet the requirements for the award of honours and who have satisfied the requirements of the BIT will graduate with a pass BIT degree.

You should also note the following:

- Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters. Not all Departments offer students part time enrolment in honours, or honours enrolment commencing in the July semester. Students considering these types of honours enrolment are urged to contact the Department concerned.

- A student may not re-attempt an honours course in a single subject area. A student who is qualified to enrol in two honours courses may either complete the honours courses in the two subject areas separately and in succession, or complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

Honours in the BPsych

Admission

To qualify to enrol in the honours course, students shall have completed 144 credit points as specified in Resolution 5 (1) of the BPsych including completion of all Intermediate and Senior units of study in Psychology with an average grade of Distinction or better.

You should also note the following:

- Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of School of Psychology so recommends, permission may be granted to undertake honours half-time over four consecutive semesters. A student may not re-attempt an honours course.

Honours in the BScMediaCommun and BLibStud

Admission

To qualify to enrol in the honours course, students shall

1. (a) have completed the relevant degree with the grade of Credit
   (b) a pass graduate holding an equivalent qualification from another institution
2. completed a major at Credit average in the subject area related to the intended honours course
3. satisfy any additional criteria set by the Head or Chair of Department concerned.

You should also note the following:

- Students shall complete the requirements for the honours course full-time over two consecutive semesters. If the Faculty is satisfied that a student is unable to attempt the honours course on a full-time basis and if the Head of Department concerned so recommends, permission may be granted to undertake honours half-time over four consecutive semesters. Not all Departments offer students part time enrolment in honours, or honours enrolment commencing in the July semester. Students considering these types of honours enrolment are urged to contact the Department concerned.

- A student may not re-attempt an honours course in a single subject area. A student who is qualified to enrol in two honours
courses may either complete the honours courses in the two subject areas separately and in succession, or complete a joint honours course, equivalent to an honours course in a single subject area, in the two subject areas. A joint honours course shall comprise such parts of the two honours courses as may be decided by the Dean.

- An interdisciplinary honours course shall comprise such parts as determined by the Coordinating Committee for the interdisciplinary course.

**Grades of honours for all degrees**

To qualify for the award of an honours degree, students shall complete 48 credit points of honours units of study in the table of honours units of study, as prescribed by the Head of Department concerned (at least 40 credit points of honours-level units of study for the BIT (Hons)).

The grade of honours and the honours mark are determined by performance in the honours course.

The Faculty is aware that, because the honours units of study in some Departments are wholly or predominantly formal course work and in others a research project, and because some subjects are not taught until well into the undergraduate program, the way in which Departments take cognisance of performance in the honours year in arriving at a recommendation for a grade of honours must be left to their discretion. However the Faculty has established a set of guidelines for Departments to use in determining their recommendations.

The Faculty has adopted the following guidelines for assessment of student performance in honours:

**95–100**
Outstanding First Class quality of clear Medal standard, demonstrating independent thought throughout, a flair for the subject, comprehensive knowledge of the subject area and a level of achievement similar to that expected by first rate academic journals. This mark reflects an exceptional achievement with a high degree of initiative and self-reliance, considerable student input into the direction of the study, and critical evaluation of the established work in the area.

**90–94**
Very high standard of work similar to above but overall performance is borderline for award of a Medal. Lower level of performance in certain categories or areas of study above.

**75–79**
Second class honours, first division – student will have shown a command of the theory and practice of the discipline. They will have demonstrated their ability to conduct work at an independent level and complete tasks in a timely manner, and have an adequate understanding of the background factual basis of the subject. Student shows some initiative but is more reliant on other people for ideas and techniques and project is dependent on supervisor’s suggestions. Student is dedicated to work and capable of undertaking a higher degree.

**70–74**
Second class honours, second division – student is proficient in the theory and practice of their discipline but has not developed complete independence of thought, practical mastery or clarity of presentation. Student shows adequate but limited understanding of the topic and has largely followed the direction of the supervisor.

**65–69**
Third class honours – performance indicates that the student has successfully completed the work, but at a standard barely meeting honours criteria. The student’s understanding of the topic is extremely limited and they have shown little or no independence of thought or performance.

**SCIWAM for all degrees**
SCIWAM means the weighted average mark calculated by the Faculty from the results for all Intermediate and Senior units of study with a weighting of 2 for Intermediate units and 3 for Senior units.

The SCIWAM is calculated by summing the products of the marks achieved and the weighted credit point values of the units of study taken in the degree and then dividing by the sum of the weighted credit point values, with all attempts at units of study being included in the calculation, except where units of study are discontinued with permission; the formula used is:

\[
\text{SCIWAM} = \frac{\sum (Wc \times Mc)}{\sum Wc}
\]

where \(Wc\) is the weighted credit point value – i.e. the product of the credit point value and level of weighting of 2 for 2000–2999 units of study and 3 for 3000–3999 units of study; where \(Mc\) is the mark out of 100 for the unit of study.

In calculating the SCIWAM for a student transferring from another university, units of study are assigned level weightings and credit point values consistent with their equivalent units of study at the University of Sydney. A mark is assigned to each unit of study credited based on the results provided on a validated academic transcript from the University. Where no mark is provided by the institution an appropriate estimate is used. Students are encouraged to obtain actual marks from Departments at those universities that do not issue formal marks.

**Ranking for postgraduate scholarships**
Ranking for postgraduate scholarships is determined by a combination of the SCIWAM and the Honours mark in the ratio 35:65.

**Honours units of study**
Honours units of study are listed in Table VI: Honours units of study or in the tables associated with the relevant degree (all tables appear in chapter 3).

Please note that enrolment in Honours requires both Faculty and Departmental permission, and students intending to attempt an Honours year should read the relevant sections of chapters 3 and 5 for further information.
Important policies relating to undergraduate candidature

Restrictions (general)

1. A candidate for a degree must satisfy the minimum eligibility requirements before commencing the degree units of study. Units of study taken before satisfying these requirements cannot normally be counted for degree purposes.

2. A candidate may not take a unit of study in any subject without having previously completed the qualifying unit(s) of study appropriate to that subject. Except with the permission of the Head of Department, he or she must also complete the prerequisites and corequisites as prescribed.

3. The only combinations of units of study available are those permitted by the timetable. A candidate may attend evening units of study if they are available.

Time limits

The Faculty resolved at its meeting on 14 March 1995 that, except with the permission of the Faculty, students must complete the requirements for award of their degree within ten calendar years of admission to candidature. This rule applies to all students who first enrolled in their degree after 1995, and applies from 1998 to students who first enrolled in their degree before 1996.

Suspension

The Faculty resolved at its meeting on 14 March 1995 that all students must re-enrol each calendar year unless the Faculty has approved suspension of candidature. Candidature will lapse if a student has not obtained approval for suspension and does not re-enrol. A student whose candidature has lapsed must be selected for admission again (usually by submitting an application to UAC) before they can re-enrol.

The Faculty also resolved that, except with the prior permission of the Faculty, a student shall not be granted a suspension of candidature in order to enrol in another course of tertiary study. Candidature will lapse if a student enrolls in another course of tertiary study after having been granted a suspension of candidature.

Satisfactory progress

If a student fails, absent fails (AF) or discontinues with failure (DF) enrolment in one unit of study twice, a warning will be issued that if the unit is failed a third time, the student may be asked to show good cause why he or she should be allowed to re-enrol in that unit of study.

Faculty of Science attendance policy

Students enrolled in courses and units of study under the administration of the Faculty of Science are expected to attend a minimum of 80 per cent of tutorials, seminars and practical sessions etc associated with those courses or units, unless granted exemption by the Dean or Head of the relevant department. The Head of Department may set additional requirements for the minimum number of assessment items such as practical reports, tutorial papers, seminars, essays, exercises, quizzes etc which must be completed. On the recommendation of the relevant Head of Department the Dean may determine that a student fails a unit of study because of inadequate attendance or insufficient assessment items completed.

Credit

The Faculty resolved at its meeting on 14 March 1995 that students who have previously completed studies which are considered by the Faculty to be equivalent to any unit of study listed in the Tables may be given credit for that unit of study providing that the unit of study was completed not more than ten years before admission to candidature in the Faculty.

Examinations and assessment

The Faculty resolved at its meeting on 9 March 1993 that the various forms of assessment of a student’s performance in an undergraduate unit of study should include an examination or examinations conducted under University supervision and requiring written answers to unseen questions, provided that the general scope of a supervised examination paper may be made known to students in advance.

Results

For all Junior, Intermediate and Senior units of study in the Bachelor of Science, Bachelor of Liberal Studies, Bachelor of Medical Science, Bachelor of Computer Science and Technology, Bachelor of Information Technology, Bachelor of Science in Media and Communications and Bachelor of Psychology degrees, the following mark ranges apply within the Faculty of Science:

<table>
<thead>
<tr>
<th>HD</th>
<th>High Distinction</th>
<th>85–100</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>Distinction</td>
<td>75–84</td>
</tr>
<tr>
<td>CR</td>
<td>Credit</td>
<td>65–74</td>
</tr>
<tr>
<td>P</td>
<td>Pass</td>
<td>50–64</td>
</tr>
<tr>
<td>PCON</td>
<td>Pass (Concessional)*</td>
<td>46–49</td>
</tr>
</tbody>
</table>

Junior units of study only. PCON (Pass Concessional) will no longer be awarded in any degree in the Faculty of Science from 2004.

| F   | Fail | Below 46 or 50 |
| AF  | Absent Fail |
| DF  | Discontinued – Fail |
| DNF | Discontinued – not to count as failure |

* A maximum of 18 credit points from Junior units of study with the grade of PCON may be counted for all degrees, except BScMediaCommun where the maximum is 12 credit points and BIT and BMedSc where no units with the grade of PCON may be credited.

Note: PCON (Pass Concessional) will no longer be awarded in any degree in the Faculty of Science from 2004.

Honours

For Final Year Honours units of study, the following Honours grades apply from 1999. The grade of Honours is determined by the mark in the final year (Honours) course.

<table>
<thead>
<tr>
<th>H1</th>
<th>Honours Class I</th>
<th>80+</th>
</tr>
</thead>
<tbody>
<tr>
<td>H21</td>
<td>Honours Class II (Division 1)</td>
<td>75–79</td>
</tr>
<tr>
<td>H22</td>
<td>Honours Class II (Division 2)</td>
<td>70–74</td>
</tr>
<tr>
<td>H3</td>
<td>Honours Class III</td>
<td>65–69</td>
</tr>
<tr>
<td>F</td>
<td>Fail*</td>
<td>below 65</td>
</tr>
<tr>
<td>AF</td>
<td>Absent Fail</td>
<td></td>
</tr>
</tbody>
</table>

*Note that in these cases the award of the Pass degree is recommended.

This chapter is intended for students in the Faculty of Science who wish to take up the opportunity to study overseas at an exchange-partner institution for part of their University of Sydney degree.

The University of Sydney has exchange agreements with Universities throughout the United States, Canada, Europe and Asia. Each year a number of students in the Faculty of Science choose to participate in Exchange programs and have found them to be an exciting and challenging way of globalising their academic experience and enriching their personal experience in different environments and cultures.

When a student is on exchange they are enrolled full-time at the University of Sydney and pay all relevant fees to the University of Sydney (i.e. Commonwealth Supported or Full-Fee). Students from Sydney may be required to pay some minor administrative charges and health insurance; however they are not required to pay any other fees to the host institution.

Eligibility

All students should check with the Faculty of Science to ensure there are no restrictions on their program of study before applying for the exchange. If there are none, the following eligibility criteria normally apply for the University-wide student exchange programs:

- Undergraduate students must have completed 48 credit points at the University of Sydney at the time of application (you can apply in the second semester of first year to depart in the second semester of second year). Students who have transferred from another university and received credit for previous study must have completed at least one semester of full-time (24 credit points) study at the University of Sydney before they can apply for the exchange program.
- Postgraduate coursework students will usually need to have completed one semester of full-time postgraduate study at the University of Sydney at the time of application.
- Postgraduate research students must have completed one semester of full-time postgraduate study before they can go on exchange.
- You must have achieved at least a credit average (65 per cent or higher) over your academic record at the University of Sydney and should have passed all subjects. A failure may be overlooked if you can demonstrate extenuating circumstances.
- You must be enrolled as a full-time student at the University of Sydney while away on exchange taking classes that will count as credit towards your normal Sydney enrolment i.e. you cannot study classes overseas for recreation or personal interest.
- You must have sufficient funding for the exchange period.
- Exchange programs are not available to honours students.

The application deadlines are 31 May for programs commencing in the first half of the following year and 15 October for programs commencing in the second half of the following year.

Please note that the application is quite complex and it is essential that you plan to commence the process 4 to 6 weeks before the deadline. Details on the application process can be obtained from the International Study Abroad and Exchange Office at the University of Sydney or on the University of Sydney website.

Students are required to obtain the following information prior to lodging the application at the Study Abroad and Exchange Office:

- Sydney University unit of study equivalences for all of the possible subjects of choice at the overseas institutions of interest. This is obtained by contacting the nominated Exchange Unit of Study coordinator in each School of interest. You will need to provide course outlines from the overseas institution. This approval needs to be recorded on the academic approval study plan provided by the International Study Abroad and Exchange Office
- Faculty Permission. This approval needs to be recorded on the academic approval study plan provided by the International Study Abroad and Exchange Office

Students need to ensure that a copy of the final approval is lodged at the Faculty of Science prior to departure.

In many instances the unit of study availability at the overseas institution can vary. Students need to ensure that the University of Sydney enrolment correctly reflects the enrolment at the overseas institution. If units of study at the overseas institution become unavailable, students are required to obtain written equivalencies and Faculty approval for any subsequent changes prior to the HECS census dates each semester.

Results

After completion of the exchange semester(s), your original transcript will be forwarded to the Faculty of Science Office (via the International Study Abroad and Exchange Office). Exchange results appear on your University of Sydney transcript on a pass/fail basis.
Postgraduate degrees, graduate diplomas and graduate certificates

The postgraduate degrees in the Faculty of Science are:

1. Degrees of Doctor
   1.1 Doctor of Philosophy (PhD)
   1.2 Doctor of Science (DSc)
   1.3 Doctor of Clinical Psychology/Master of Science DCP/MSc
   1.4 Doctor of Clinical Neuropsychology/Master of Science (DCN/MSc)

2. Degrees of Master
   2.1 Master of Science (MSc)
   2.2 Master of Science (Environmental Science) (MSc(EnvironSc))
   2.3 Master of Environmental Science and Law (MEnvSciLaw)
   2.4 Master of Medical Physics (MMedPhys)
   2.5 Master of Science (Microscopy and Microanalysis) (MSc(Micr&An))
   2.6 Master of Nutrition and Dietetics (MNutrDiet)
   2.7 Master of Nutritional Science (MNutrSc) (Not available to new students in 2007)
   2.8 Master of Psychology (MPsy)
   2.9 Master of Information Technology (MInfTech)
   2.10 Master of Information Technology Management (MInfTechMan)
   2.11 Master of Bioethics (MBEth)
   2.12 Master of Bioethics (Honours) (MBEthHon)
   2.13 Master of Applied Information Technology (MApplIT) (Not available to new students in 2007)
   2.14 Master of Applied Science (MApplSc), which shall also incorporate the streams:
      2.14.1 Master of Applied Science (Bioinformatics) (MApplSc(Bioinf))
      2.14.2 Master of Applied Science (Coastal Management) (MAppSc(CoastalMgt))
      2.14.3 Master of Applied Science (Environmental Science) (MAppSc(EnvSc))
      2.14.4 Master of Applied Science (Health Psychology) (MAppSc(HlthPsych))
      2.14.5 Master of Applied Science (Microscopy and Microanalysis) (MAppSc(Micr&An))
      2.14.6 Master of Applied Science (Molecular Biotechnology) (MAppSc(MBT))
      2.14.7 Master of Applied Science (Neuroscience) (MAppSc(NeuroSc)) (Not available to new students in 2007)
      2.14.8 Master of Applied Science (Nutrition and Dietetics) (MAppSc(NutrDiet)) (Not available to new students in 2007)

3. Graduate Diplomas
   The diplomas in the Faculty of Science shall be:
      3.1 Graduate Diploma in Science (GradDipSc)
      3.2 Graduate Diploma in Science (Psychology) (GradDipSc(Psych)) (Not available to new students in 2007)
      3.3 Graduate Diploma in Psychology (GradDipPsych)
      3.4 Graduate Diploma in Science (Microscopy and Microanalysis) (GradDipSc(Micr&An))
      3.5 Graduate Diploma in Information Technology (GradDipIT)
      3.6 Graduate Diploma in Information Technology Management (GradDipITMan)
      3.7 Graduate Diploma in Applied Information Technology (GradDipAppIT) (Not available to new students in 2007)
      3.8 Graduate Diploma in Medical Physics (GradDipMedPhys)
      3.9 Graduate Diploma in Computing (GradDipComp)
      3.10 Graduate Diploma in Bioethics (GradDipBEth)
      3.11 Graduate Diploma in Applied Science (GradDipApplSc), which shall also incorporate the streams:
         3.11.1 Graduate Diploma in Applied Science (Bioinformatics) (MApplSc(Bioinf))
         3.11.2 Graduate Diploma in Applied Science (Coastal Management) (MAppSc(CoastalMgt))
         3.11.3 Graduate Diploma in Applied Science (Environmental Science) (MAppSc(EnvSc))
         3.11.4 Graduate Diploma in Applied Science (Health Psychology) (MAppSc(HlthPsych))
         3.11.5 Graduate Diploma in Applied Science (Microscopy and Microanalysis) (MAppSc(Micr&An))
         3.11.6 Graduate Diploma in Applied Science (Molecular Biotechnology) (MAppSc(MBT))
         3.11.7 Graduate Diploma in Applied Science (Neuroscience) (MAppSc(NeuroSc)) (Not available to new students in 2007)
         3.11.8 Graduate Diploma in Applied Science (Nutrition and Dietetics) (MAppSc(NutrDiet)) (Not available to new students in 2007)
         3.11.9 Graduate Diploma in Applied Science (Psychology of Coaching) (MAppSc(PsychCoach))
         3.11.10 Graduate Diploma in Applied Science (Wildlife Health and Population Management)

4. Graduate Certificates
   The certificates in the Faculty of Science shall be:
      4.1 Graduate Certificate in Science (History and Philosophy in Science) (GradCert(HPS))
      4.2 Graduate Certificate in Science (Microscopy & Microanalysis) (GradCertSC(Micr&An))
      4.3 Graduate Certificate in Information Technology (GradCertIT)
      4.4 Graduate Certificate in Information Technology Management (GradCertITMan)
      4.5 Graduate Certificate in Applied Information Technology (GradCertAppIT) (Not available to new students in 2007)
      4.6 Graduate Certificate in Applied Science (GradCertApplSc), which shall also incorporate the streams:
         4.6.1 Graduate Certificate in Applied Science (Bioinformatics) (MApplSc(Bioinf))
         4.6.2 Graduate Certificate in Applied Science (Coastal Management) (MAppSc(CoastalMgt))
         4.6.3 Graduate Certificate in Applied Science (Neuroscience) (MAppSc(NeuroSc)) (Not available to new students in 2007)
         4.6.4 Graduate Certificate in Applied Science (Nutrition and Dietetics) (MAppSc(NutrDiet)) (Not available to new students in 2007)
         4.6.5 Graduate Certificate in Applied Science (Psychology of Coaching) (MAppSc(PsychCoach))
      4.7 Graduate Certificate in Bioethics (GradCertBEth), which shall also incorporate the streams:
         4.7.1 Graduate Certificate in Bioethics (Biotechnology) (GradCertBEth(BTech))
4.7.2 Graduate Certificate in Bioethics (Clinical Ethics) (GradCertBEthClinEth)

Prospective candidates for these awards should consult with the appropriate postgraduate adviser (see chapter 2) or Head of Department most closely concerned, as early as possible.

Candidates who have commenced qualifications in the past that are no longer offered by the Faculty should make reference to the regulations applicable in their first year of enrolment and consult with the advisers in the Faculty Office.

University of Sydney (Coursework) Rule 2000 (as amended)

See the University of Sydney (Coursework) Rule 2000 (as amended) at the end of the Handbook.

The Resolutions in the postgraduate section of the Handbook must be read in conjunction with the University of Sydney (Coursework) Rule 2000 (as amended), which sets out the requirements for all coursework courses, and the relevant Senate Resolutions, which are available in the University Calendar. The Calendar can also be viewed on the Web at www.usyd.edu.au/publications/calendar/
This chapter sets out the requirements for research postgraduate degrees offered in the Faculty of Science. Following is a brief description of the research degrees, notes on the presentation of theses and a description of coursework/research degrees.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously at the end of the degree descriptions, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Research doctorate degrees
Research degrees offered by the Faculty are listed in this chapter in the following order:

- Doctor of Science (DSc)
- Doctor of Philosophy (PhD)
- Doctor of Clinical Psychology/ Master of Science (DCP/MSc)
- Doctor of Clinical Neuropsychology/ Master of Science (DCN/MSc)

The resolutions of the Senate, Academic Board and Faculty relating to these degrees may be found below and in the Calendar. Additional valuable resources for intending and current research students are the Postgraduate Research Studies Handbook, published by the University of Sydney and the Thesis Guide and Survival Manual published by SUPRA (Sydney University Postgraduate Representative Association). These publications are available from the Faculty Office. The Postgraduate Research Studies Handbook is also on the Web at www.usyd.edu.au/study/postgrad.shtml.

Doctor of Science (DSc)
The degree of Doctor of Science is awarded for published work which has been generally recognised by scholars in the field concerned as a distinguished contribution to knowledge. To be eligible applicants must be graduates of the University of Sydney. Alternatively they may be graduates of another university or be accepted as having standing equivalent to that required of a graduate of the university and have been either a full-time member of the academic staff of the University of Sydney for at least three years or have had a significant involvement with the teaching or research of the University.

Admission to candidature is subject to a preliminary assessment by the Faculty of the applicant's case. If this is favourable an applicant is required to submit a list of published work, together with a description of the theme of the published work. At least three examiners, of whom at least two are external, are appointed to assess the application and make recommendations.

Faculty resolutions: see end of this chapter.
Resolutions of the Senate: see the University of Sydney Calendar.

Doctor of Philosophy (PhD)
The degree of Doctor of Philosophy is a research degree awarded for a thesis considered to be a substantially original contribution to the subject concerned. Some coursework may be required (mainly in the form of seminars) but in no case is it a major component. The Resolutions of the Senate and Academic Board relating to the degree of Doctor of Philosophy are printed in University of Sydney Calendar.

Applicants should normally hold a masters degree or a bachelors degree with first or second class honours from the University of Sydney, or an equivalent qualification from another university or institution.

The degree may be taken on either a full-time or part-time basis.

In the case of full-time candidates, the minimum period of candidature can, with the permission of the Faculty, be two years for candidates holding an MSc degree or equivalent, or shall be three years in the case of candidates holding a bachelors degree with first class or second class honours; the maximum period of candidature is normally four years.

Part-time candidature may be approved for applicants who can demonstrate that they are engaged in an occupation or other activity, which leaves them substantially free to pursue their candidature for the degree. Normally the minimum period of candidature will be determined on the recommendation of the Faculty but in any case will be not less than three years; the maximum period of part-time candidature is normally eight years.

Doctor of Philosophy Resolutions: see the University of Sydney Calendar.

Doctor of Clinical Psychology/Master of Science (DCP/MSc)
The School of Psychology offers a combined course which trains psychology graduates in the professional specialisation of clinical psychology: the Doctor of Clinical Psychology/Master of Science course.

The Doctor of Clinical Psychology is recognised, in principle, by the New South Wales Department of Health as qualifying the holder for progression to the grade of Clinical Psychologist. The course is accredited by the Australian Psychological Society as a 5th, 6th and 7th year of training, and as an approved qualification for Associate Membership of the APS College of Clinical Psychologists. The NSW Psychologists Registration Board also accredits the course for the purposes of registration.

The Doctor of Clinical Psychology (DCP) involves 3 years of full-time study and includes three components: academic course work, supervised clinical internships and research.

The academic coursework involves lectures, workshops, forums and seminars by the University academic staff. Qualified Clinical Psychologists who work in a variety of teaching hospitals and clinics in the Sydney area provide supervised clinical practice. In some circumstances, Internships may also be available in rural and remote areas including Bathurst, Bourke and Lismore. The research component requires students to produce, by the end of the second semester of their third year, a Research Thesis that incorporates 1 or 2 journal publications and a comprehensive literature review.

All students enrol in the DCP degree and in their second year enrol in a MSc degree as well. On completion of all the course requirements at the end of the third year, students will graduate with a DCP and MSc degree.

Students who have made excellent progress and whose projects are of sufficient scope may then apply for transfer to a PhD degree. Transfer to a PhD is also subject to the satisfactory production of a thesis proposal which on completion, will make a contribution to knowledge in a specialist area of study.
Admission requirements

**Essential requirements**

- Completion of a four year honours degree in Psychology, gaining at least an upper second class (2.1) Honours, or its equivalent eg. (BPsych, BA(Hons), BSci(Hons), BEc(SocSci)(Hons) or BLibStudies(Hons), GradDipSc(Psych)*, in Psychology).
- "An overall result of 80% or above is required for GradDipSc(Psych) to be deemed equivalent.
- Completion of an individually conducted research project and thesis within the degree.
- Satisfactory referee reports (academic referee, work experience referee).

Only candidates who fulfil the essential requirements will be considered for the selection interview. The selection interview is also an essential part of the selection procedure.

**Desirable requirements**

- Completion of relevant work experience (relevant paid, voluntary or research work).

Applicants are encouraged to have gained some previous relevant work experience. The benefit of work experience is that it is likely to enhance the understanding of clinical issues and allow a prospective student to determine whether they would like to pursue working with a clinical population. Should an applicant be invited to interview, they will be advantaged if able to draw upon previous work experiences, particularly in regard to answering questions that specifically assess understanding of clinical issues and potential difficulties of work in clinical contexts.

**Clinical Relevance for Application**

Students applying for the DCP are not required to have completed an empirical research project in the area of Abnormal Psychology, Health Psychology, Clinical Psychology or Neuropsychology. The selection process aims to identify students with a demonstrated interest in abnormal, clinical psychology or clinical neuropsychology, an awareness of clinical issues, and experience related to the area. This can be demonstrated in a number of ways, for example relevant work experience or a relevant empirical project. Note also that clinical relevance can be discussed on the basis of projects in many areas of Psychology, for example cognitive psychology, developmental psychology, individual differences, human learning, neuroscience, social psychology.

**Selection**

Applicants are selected following the evaluation of application forms, supporting documentation and a selection interview. Offers of places are dependent upon the ranking of applicants and competition for places.

**Application submission**

Applications are to be sent to the Postgraduate Assistant, Faculty of Science, Carslaw Building (F07), University of Sydney NSW 2006. International applicants should apply in writing to the International Office, Services Building (G12), University of Sydney NSW 2006, Australia.

**Conditional Registration**

All intending candidates are required to apply for and gain provisional registration with the NSW Psychologists Registration Board immediately before commencing their candidature, or if applicable, full registration.

PO Box K599 Haymarket NSW 1238; Phone 02 9219 0211; Fax 02 9281 2030.

**Course structure**

This program is based on a scientist-practitioner model with a cognitive-behavioural emphasis. It aims to provide students with a high level of expertise in practical, academic and research areas which will enable them to work successfully as professional clinical psychologists in a variety of academic, clinical and community settings. Our graduates will have a highly developed knowledge base and strong clinical skills necessary for both the practice of professional psychology on the one hand and conducting psychological research on the other.

**Course resolutions**

See the end of this chapter.

**Unit of study descriptions**

**Doctor of Clinical Psychology/ Master of Science units of study**

**PSYC6065 Psychological Assessment**

**Credit points:** 6 Teacher/Coordinator: Dr David Horry and Dr Suncica Sunny Lah Session: Semester 1 Classes: One 3-hr lec/wk Assessment: One practical report, two clinical skills assessments.

This course introduces students to the basic theory and the general practice of neuropsychological assessment for adults and children. The course will focus on the components of cognition including intelligence, memory, attention executive abilities and achievement.

Students will be taught how to administer, score and interpret a variety of tests in these areas; and how to report the results in written form. Students will also be familiarised with normal development stages, and a systematic/developmental approach to assessment.

**PSYC6003 Clinical Internship 1**

**Credit points:** 3 Teacher/Coordinator: Dr Louise Sharpe Session: Semester 1 Classes: 2 three hour and 4 four hours of core clinical skills training; 13 four hours and 4 four hours of core clinical skills training; 13 four hours clinical observation per semester. Assessment: Attendance; Observation report; Clinical log.

This unit of study is designed to introduce students to the work of clinical psychologists through observation in the Psychology Clinic. The internship will strengthen theory-practice links, by exposing students to a range of mental health problems faced in clinical settings. In addition, core clinical skills will be developed. Skills in micro-counselling and cognitive-behavioural interviewing are reviewed and practiced. Diagnostic assessment, mental status examination and cognitive behavioural case formulation are taught with a view to developing individual treatment plans.

**PSYC6004 Ethics and Professional Practice**

**Credit points:** 3 Teacher/Coordinator: Prof Stephen Touyz Session: Semester 1 Classes: 7 three hour lectures and 1 seven hour workshop per semester. Assessment: Child protection assignment; clinical viva.

This unit of study will introduce students to the highest standards of ethical and clinical practice and familiarise them with relevant legislation pertaining to contemporary practice in clinical psychology.

**PSYC6005 Research 1**

**Credit points:** 3 Teacher/Coordinator: Dr Louise Sharpe Session: Semester 1

This unit of study provides an introduction to issues in psychological research. Students will attend a weekly research forum in the Clinical Psychology Unit and the School Colloquium in fulfillment of requirements for this unit of study.

**PSYC6029 Case Seminars 1**

**Credit points:** 3 Teacher/Coordinator: Prof Stephen Touyz Session: Semester 1 Classes: 13 one hour seminars per semester. Assessment: Attendance.

Attendance at the case seminars introduces students to history taking, conducting a mental status examination, formulation, diagnosis and
treatment. These clinical case conferences will allow students to recognise a wide range of psychiatric diagnoses, the interrelationships between medical illness and psychiatric/psychological symptomatology as well as working within a multidisciplinary framework.

**PSYC6051**

**Adult Psychological Disorders**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Maree Abbott  
**Session:** Semester 1  
**Classes:** 13 one hour lectures and 13 four hour practicals per semester.  
**Assessment:** Formal examination; clínica viva

This unit of study is designed to introduce students to the nature of therapeutic work with common psychological problems of adulthood, through a series of lectures and practical skills based sessions. Strategies for cognitive behavioural interviewing within a diagnostic framework (DSMIV) are reviewed and practiced. Emphasis is placed upon the learning of strong practical skills in the application of evidence-based therapies to the common psychological disorders encountered in adulthood, such as anxiety disorders, mood disorders and eating disorders.

**PSYC6055**

**Advanced Adult Psychological Disorders**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Maree Abbott  
**Session:** Semester 2  
**Classes:** 6 six hour lectures per semester.  
**Prerequisites:** PSYC6051  
**Assessment:** Formal examination; attendance at mental health tribunal.

This course is designed to introduce interns to the nature of therapeutic work with more complex psychological disorders. The course will include mental health problems such as schizophrenia, bipolar disorder, drug and alcohol problems, and personality disorders. The course will also introduce students to clinical psychology work in specialist contexts: working with clients from different cultural backgrounds, clients in forensic settings, and older adults.

**PSYC6067**

**Clinical Internship 2**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Louise Sharpe  
**Session:** Semester 2  
**Classes:** 24 fourteen hour practicals per semester.  
**Prerequisites:** PSYC6065, PSYC6051  
**Assessment:** Attendance, practical; contract; mid-internship review, end of internship review.

This unit of study is designed to introduce students to therapy and psychological assessment skills for working specifically with adults. Students will be allocated to a supervisor who will oversee their clinical practice closely. This internship will expose students to clients with psychological problems in mild to moderate clinical range. The internship builds student's confidence in working with clients of adult ages. It will allow students to develop skills in the identification of clinical problem, the communication of a formulation and treatment plan and the conduct of the plan.

**PSYC6009**

**Case Seminars 2**

**Credit points: 3**  
**Teacher/Coordinator:** Prof Stephen Touyz  
**Session:** Semester 2  
**Classes:** 13 one hour seminars per semester.  
**Prerequisites:** PSYC6029  
**Assessment:** Attendance

This unit of study will continue the seminars introduced in PSYC6029 Case Seminars 1. This unit of study will comprise formal weekly presentations of cases seen in the course of Clinical Internships by Year 3 students. All students are required to attend throughout the semester.

**PSYC6010**

**Research 2**

**Credit points: 3**  
**Teacher/Coordinator:** Dr Louise Sharpe  
**Session:** Semester 2  
**Classes:** 13 one hour seminars per semester.  
**Prerequisites:** PSYC6005  
**Assessment:** Attendance; research proposal.

Within this Unit of Study students will consolidate their research plan and develop a written proposal for their research project. The Research Forum will also feature the presentation of special topics including research design, statistics and power considerations. Students will also be guided through the process of submitting an Application for Ethical Approval. Students will be expected to attend the School of Psychology Colloquium.

**PSYC6049**

**Child Psychological Disorders**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Deborah Finney  
**Session:** Semester 2  
**Classes:** 13 four hour lectures per semester  
**Prerequisites:** PSYC6051  
**Assessment:** Case study; formal evaluation

This course introduces the nature, assessment and treatment of psychological disorders in children and adolescents. Students will examine the diagnostic classification, epidemiology, aetiology, developmental course, context and outcomes of common psychological problems evidenced in childhood and adolescence (e.g., anxiety, depression, conduct disorders, ODD, ADHD, eating problems, OCD). Prevention issues will also be addressed. Cognitive and behavioural intervention strategies will be discussed along with a number of other conceptual and practical issues in child clinical psychology. Skills training will include interviewing, measurement tools and application of interventions.

**PSYC6068**

**Clinical Internship 3**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Louise Sharpe  
**Session:** Semester 1  
**Classes:** 24 fourteen hour practicals per semester.  
**Prerequisites:** PSYC6065, PSYC6049, PSYC6008  
**Assessment:** Attendance, practical; contract; mid-internship review, end of internship review.

This unit of study is designed to introduce students to therapy and psychological assessment skills for working specifically with young people and their families. Students will be allocated to a supervisor who will oversee their clinical practice closely. This internship will expose students to clients with psychological problems in mild to moderate clinical range. The internship builds student's confidence in working with young clients of school age. In addition, this unit will allow students to build on their previous work with adults. Specifically, students will continue to work half a day per week with adult clients in the internal clinic. Interns will be able to work more independently at this stage of their training.

**PSYC6014**

**Case Seminars 3**

**Credit points: 3**  
**Teacher/Coordinator:** Prof Stephen Touyz  
**Session:** Semester 1  
**Prerequisites:** PSYC6009

This unit of study builds upon previous semesters where second year students will present a clinical case for discussion. Assessment of this unit of study is by detailed case reports.

**PSYC6015**

**Research 3**

**Credit points: 3**  
**Teacher/Coordinator:** Dr Louise Sharpe  
**Session:** Semester 1  
**Prerequisites:** PSYC6010

Students will attend the Research Forum and will present the rationale, aims, hypotheses, and plan of their proposed research project to the group, which will include staff of the CPU and School of Psychology. Students will also attend the School Colloquium in fulfilment of requirements for this unit of study.

**PSYC6032**

**Adult Health Psychology**

**Credit points: 6**  
**Teacher/Coordinator:** Dr Louise Sharpe  
**Session:** Semester 1  
**Classes:** 6 six hour lectures per semester.  
**Prerequisites:** PSYC6051  
**Assessment:** Attendance; presentation

This course aims to understand the relationships between psychological and physical functioning across a wide range of medical disorders, including their effect on cognitive function, and the way in which cognitive and behavioural factors influence psychological and physical functioning of those with health related problems. A variety of medical problems will be studied in relation to their impact on function, as well as issues such as preventative medicine (e.g. HIV), adjusting to and living with chronic illness (e.g. chronic pain), issues
relating to terminal illness (eg. psychooncology) and issues relating to compliance (eg. diabetes). The course will be concerned with theories and interventions that promote health related behaviours and improve quality of life for people with medical problems.

PSYC6064
Paediatric and Developmental Disorders
Credit points: 6 Teacher/Coordinator: Dr Suncica Sunny Lah Session: Semester 1 Classes: One 3hr lec/wk. Prerequisites: PSYC6049 Assessment: One 2500 word essay, critical review of paper

This unit of study will provide students with advanced learning in child psychological disorders and will contain two major sections: (1) paediatric child psychology and (2) developmental disorders. The paediatric child psychology section will cover acute and chronic illnesses, psychological treatments, treatment adherence, and rehabilitation. The developmental disorders section will focus on current theories and models of developmental disorders that occur in childhood, as well as cover interventions currently used for remediation of these disorders.

PSYC6066
Clinical Internship and Case Seminars 4
Teacher/Coordinator: Prof Stephen Touyz Session: Semester 2 Classes: External internship 2 days per week; case seminar 1 hour per week. Corequisites: PSYC6013 Assessment: Case presentation; two written case reports; internship evaluation

Students are introduced to a range of experiences in hospitals and community settings in accordance with their clinical and research interests. One of the three internships will be specifically tied to the student’s research project to allow them to specifically develop skills relevant to research with that particular clinical population. One of the three internships should also be with a client group with general psychiatric problems. The specific nature of learning outcomes will depend upon the setting for the internship, the client group and the nature of the clinical work. Choices for internships will be made in collaboration with the unit coordinator, who will work with students to develop individually tailored training plans. Students will also present a clinical case for discussion at the case seminar.

PSYC6031
Family Therapy
Credit points: 3 Teacher/Coordinator: Dr Caroline Hunt Session: Semester 2 Classes: 4 six hour seminars per semester. Prerequisites: PSYC6049 Assessment: Assignment

This course introduces students to issues that may be a focus of clinical attention during childhood but are not defined as mental disorders such as relationship problems in the family system, parenting capacity, and problems related to abuse and/or neglect. Students will be introduced to family therapy as an approach to treating such problems.

PSYC6056
Advanced Seminars
Credit points: 6 Teacher/Coordinator: Dr Caroline Hunt Session: Semester 2 Classes: 4 six hour lectures per semester. Prerequisites: PSYC6051 Assessment: Attendance; presentation; written assignment; clinical viva

This course is designed to provide interns with advanced level training in psychotherapeutic approaches. The advanced level seminars will include Schema Therapy, Integrated Approaches to Psychotherapy and may include from time to time, seminars by visiting clinical academics with expertise in specific therapeutic approaches.

PSYC6054
Neuropsychopathology
Credit points: 3 Teacher/Coordinator: Dr David Horry and Dr Suncica Sunny Lah Session: Semester 2 Classes: 13 one hour lectures per semester. Assessment: Essay; formal examination

This course introduces students to the cognitive correlates of a range of neurological and medical conditions in adults and children. These conditions include cerebral anoxia, epilepsy, traumatic brain injury, diabetes, HIV/AIDS, multiple sclerosis, etc. Students will be able to recognise the cognitive profiles associated with a variety of neurological and medical conditions; understand the neurological basis for these profiles; know how to assess patients with these disorders.

PSYC6061
Clinical Internship and Case Seminars 5
Teacher/Coordinator: Prof Stephen Touyz Session: Semester 1 Classes: 13 one hour seminars, 24 fourteen hour practicals per semester. Assessment: Attendance, practical; case report; contract; mid-internship review, end of internship review.

This course provides students with a range of therapy and assessment experiences in accordance with their clinical and research interests. The specific nature of learning outcomes will depend upon the setting for the internship, the client group and the nature of the clinical work. Students will also attend the clinical case seminars and present complex clinical cases for discussion which pose either diagnostic dilemmas or difficulties in treatment.

PSYC6058
Clinical Internship and Case Seminars 6
Teacher/Coordinator: Prof Stephen Touyz Session: Semester 2 Classes: 13 one hour seminars, 24 fourteen hour practicals per semester. Assessment: Attendance, practical; case report; contract; mid-internship review, end of internship review.

This course provides students with a range of therapy and assessment experiences in accordance with their clinical and research interests. The specific nature of learning outcomes will depend upon the setting for the internship, the client group and the nature of the clinical work. Students will also attend the clinical case seminars and present for discussion complex clinical cases which pose either diagnostic dilemmas or difficulties in treatment.

Doctor of Clinical Neuropsychology/Master of Science (DCN/MSc)

This degree is not available to new students in 2007

For information and course resolutions: see 2006 Faculty of Science Handbook.

Presentation of theses – for research degrees

The following information is presented for the guidance of candidates. It should be regarded as a summary only. Candidates should also consult the University’s Calendar, the Postgraduate Research Studies Handbook and the Faculty of Science for the most current and detailed advice. The Postgraduate Research Studies Handbook is available on the Web at www.usyd.edu.au/ su/ab/committees/committees.html.

Formal requirements
Number of copies to be submitted: Doctor of Philosophy 4

The four copies of theses submitted for examination for the degree of Doctor of Philosophy and the three copies of theses submitted for examination for the degree of Master of Science may be bound in either a temporary or a permanent form. Theses submitted in temporary binding should be strong enough to withstand ordinary handling and postage. Full details of requirements for the Master of Science (Research) may be found in the following chapter.

The degree shall not be awarded until the candidate has submitted a permanently bound copy of the thesis (containing any corrections or amendments that may be required) and printed on acid-free or permanent paper.
The thesis shall be accompanied by a certificate from the supervisor stating whether in the supervisor's opinion the form of presentation of the thesis is satisfactory.

Theses in permanent form shall normally be on International Standard A4 size paper sewn and bound in boards covered with bookcloth or buckram or other binding fabric. The title of the thesis, the candidate’s initials and surname, the title of the degree, the year of submission and the name of the University of Sydney should appear in lettering on the front cover or on the title page. The lettering on the spine, reading from top to bottom, should conform as far as possible to the above except that the name of the University of Sydney may be omitted and the thesis title abbreviated. Supporting material should be bound in the back of the thesis as an appendix or in a separate sheet of covers.

Additional information
At the request of the Academic Board, the Science Faculty has resolved that a thesis should not normally exceed 80,000 words. With the permission of the Chair of the Faculty of Science’s Postgraduate Studies Committee, a thesis may have an absolute upper limit of 100,000 words.

Amendments do not have to involve rekeying if a black ink/biro amendment is clear. Amendments can also be made by way of an appendix to the thesis.

Candidates are advised to consult the SUPRA publication, Practical Aspects of Producing a Thesis at the University of Sydney, for other guidelines and suggestions in addition to the formal requirements above.

Summary
Within the Faculty of Science, there are no formal requirements/guidelines other than those listed above. There are no requirements for single/double spacing or single/double sided presentation, nor font size, figure presentation, format of bibliographic citations, etc. Candidates should however, be aware that, if the degree is awarded, the thesis becomes a public document, the quality of which reflects on the ability of the candidate. Moreover, utilising a format that will make the examiners’ tasks easier is obviously sensible.

Resolutions
Doctor of Science (DSc)
The Resolutions of the Senate relating to the degree of Doctor of Science are printed in the University of Sydney Calendar, the following Resolutions of the Faculty apply.

1.1 Published work which a candidate for the degree of Doctor of Science submits for examination must, in addition to satisfying the requirements of the resolutions of the Senate relating to the degree, be in a field with which the Faculty is concerned.

1.2 A candidate for the degree is required, by way of an introduction, to describe the theme of the published work submitted and, where there is a large number of publications whose dates range over a period of time and which contain some range of subject matter, to state how these are related to one another and to the theme.

1.3 If a prospective candidate, as a first step, tenders the introduction called for in 1.2 above, together with a list of the published work which it is proposed to submit for examination, the Faculty will endeavour to make an assessment as to whether the published work is in a field with which the Faculty is concerned and, if so, an assessment also of the prima-facie worthiness for examination of the published work.

1.4 A prospective candidate who tenders the introduction together with the list of published work shall not be debarred from subsequently submitting the published work for examination.

Doctor of Philosophy
The Resolutions of the Senate and Academic Board relating to the degree of Doctor of Philosophy are printed in the University of Sydney Calendar.

Doctor of Clinical Psychology/Master of Science

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature: graduates of the University of Sydney with a result of Honours 2.1 or better in Psychology holding the degree of Bachelor of Psychology, Bachelor of Science (Honours), Bachelor of Arts (Honours), Bachelor of Economics (Social Sciences) (Honours), or Bachelor of Liberal Studies (Honours) or any other equivalent award of the University of Sydney and who have satisfied the Department of their personal suitability for the practice of clinical psychology determined by personal interview and by analysis of units of study completed; or graduates of other universities who have qualifications equivalent to those specified in subsection 1.1.1; and who have satisfied the Department of their personal suitability for the practice of clinical psychology determined by personal interview and by analysis of units of study completed.

2. Units of study
2.1 The units of study for the combined Doctor of Clinical Psychology/Master of Science, together with
2.1.1 credit point value;
2.1.2 assumed knowledge;
2.1.3 corequisites/prerequisites/assumed learning/assumed knowledge; and
2.1.4 any special conditions;
2.2 are listed in the Table of units of study in subsection 5.1.

3. Requirements for the Doctor of Clinical Psychology/Master of Science
3.1 Candidates for the Doctor of Clinical Psychology/Master of Science are required to:
3.1.1 complete satisfactorily all units of study listed in the table of units of study in subsection 5.1. A unit of study shall consist of such lectures, seminars, tutorial instruction, exercises, practical work, or project work as may be prescribed. In these resolutions, ‘to complete a unit of study’ or any derivative expression means:
3.1.1.1 to attend all the lectures and the meetings, if any, for seminars or tutorial instruction;
3.1.1.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
3.1.1.3 to pass any other examination of the unit of study that may apply;
3.1.2 pursue a course of advanced study and research leading to the submission of a thesis in an area of clinical research; and
3.1.3 complete satisfactorily clinical internships in accordance with subsections 6 and 4.1.

4. Method of progression
4.1 A candidate for the Doctor of Clinical Psychology/Master of Science shall proceed by completing units of study, clinical internships, research and thesis in accordance with subsections 7 and 8.

[Section 2]

5. Details of units of study
5.1 The structure of the course is designed to cover areas from the five key topics, namely: Therapy Knowledge and Skills, Assessment Knowledge and Skills, Clinical Internships, Ethics and Professional Practice and Research arranged as shown in the following table:

6. Enrollment in more/less than minimum load
6.1 A candidate may proceed on either a part-time or full-time basis.

7. Cross-institutional study
7.1 Cross-institutional study shall not be available to students enrolled in the Doctor of Clinical Psychology/Master of Science course, except where the University of Sydney has a formal Cooperation Agreement with another University.

8. Restrictions on enrolment
8.1 Admission to candidature may be limited by a quota. In determining the quota, the University will take into account:
8.1.1 availability of resources including space, laboratory and computing facilities; and
8.1.2 availability of adequate and appropriate supervision.
8.2 In considering an application for admission to candidature, the Head of Department, the Director of Clinical Training and the Dean shall take account of the quota and shall select, in preference, applicants who are most meritorious in terms of subsection 1 above.

9. Discontinuation of enrolment
9.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the combined course. Students who have discontinued from the combined course will be required to apply for admission to the combined course and be subject to admission requirements pertaining at that time.

10. Suspension of candidature
10.1 A student may seek written permission from the Dean to suspend candidature in the combined course. The Dean of the Faculty of Science in consultation with the Director of Clinical Training shall approve any period of absence. Suspension may be granted for a maximum of one year on any one application.

11. Re-enrolment after an absence
11.1 A student who plans to reenrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

12. Satisfactory progress
12.1 The Dean may:
12.1.1 call upon any candidate to show cause why that candidature should not be terminated by reason of unsatisfactory progress towards the completion of the combined award course; and
12.1.2 terminate the candidature where the candidate does not show good cause.
12.2 Satisfactory progress is prescribed as follows:
12.2.1 a candidate for the combined award course must complete satisfactorily (at a pass level) all units of study;
12.2.2 if a candidate fails to complete satisfactorily a unit of study at the first attempt, they can make a second attempt at completing that unit of study. They may not begin the next unit of study within the same key topic area until the previous unit of study has been satisfactorily completed;
12.2.3 any candidate who fails to complete satisfactorily a unit of study at the second attempt will normally be deemed to have failed to complete the course requirements, and their candidature will be terminated by the Dean; and
12.2.4 if a candidate fails to complete satisfactorily two units of study within the same key topic area at the first attempt, they will normally be deemed to have failed to complete the course requirements and their candidature will be terminated by the Dean.

13. Time limit
13.1 A candidate shall complete the requirements for the Doctor of Clinical Psychology/Master of Science course, except where the University of Sydney has a formal Cooperation Agreement with another University, within six semesters and a maximum enrolment of twelve semesters, and except with permission of the Dean within nine calendar years of admission to candidature.

14. Assessment policy
14.1 The procedures for the examination and award of the Master of Science shall be prescribed in the Resolutions of the Senate and Faculty relating to that degree.
14.2 On completion of the requirements for the combined award course, the Faculty, on the recommendation of the Head of Department and the Director of Clinical Training, shall determine the results of the candidature.

15. Credit transfer policy
15.1 A candidate who, before admission to candidature, has spent time in graduate study and, within the previous three years, has completed coursework considered by the Dean to be equivalent to units of study prescribed for the combined award course, may receive credit of up to 48 credit points towards the requirements for the Doctor of Clinical Psychology provided that the completed work was not counted toward the requirements of another degree.

16. Transfer to and from Doctor of Philosophy Candidature
16.1 The Director of Clinical Training in consultation with the Head of Department may recommend to the Dean of the Faculty of Science that a candidate withdraw from candidature for the combined award course and complete requirements for the degree of Doctor of Philosophy under such conditions as the University may determine.
16.2 The Dean of the Faculty may readmit to candidature a candidate who has previously withdrawn from the combined award course as provided for in subsection 1 above and who has completed the requirements for the award of the degree of Doctor of Philosophy. Such a candidate shall complete the requirements for the degree of Doctor of Clinical Psychology under such conditions as the Dean may determine but shall not be permitted to continue candidature for the award of the degree of Master of Science.
16.3 The Dean of the Faculty may readmit to candidature a candidate who has previously withdrawn from the combined award course as provided for in subsection 16.1 above, and who has not completed the requirements for the award of the degree of Doctor of Philosophy. Such a candidate will complete the requirements for the combined award course under such conditions as the Dean may determine.
16.4 Except in exceptional circumstances, and with the permission of the Dean, readmission to candidature under subsections 17.2 and 17.3 above shall occur within 14 semesters of withdrawal under subsection 17.1 above and within a maximum of nine years from commencement of candidature for the DCP/MSc course.

276
15. Master's research degrees

This chapter sets out the requirements for Master's level research postgraduate degrees offered in the Faculty of Science. Following is a brief description of the research degrees, notes on the presentation of theses and a description of the masters level research degrees.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected at the end of this chapter or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Research degrees

Research master's degrees offered by the Faculty are listed in this chapter in the following order:

- Master of Science (MSc)
- Master of Science (Environmental Science)

The resolutions of the Senate, Academic Board and Faculty relating to these degrees may be found this chapter and the Calendar. Additional valuable resources for intending and current research students are the Postgraduate Research Studies Handbook, published by the University of Sydney, the Thesis Guide and the Survival Manual published by SUPRA (Sydney University Postgraduate Representative Association). These publications are available from the Faculty Office. The Postgraduate Research Studies Handbook is also on the Web at www.usyd.edu.au/study/postgrad.shtml.

Master of Science (MSc)

Graduates of the University of Sydney with first or second class honours and candidates in the final year of an approved honours course in the BSc degree or who have an equivalent qualification from another institution or an equivalent standard of knowledge, may apply for admission to candidature for the MSc degree. Once admitted, candidates proceed full-time or part-time, by supervised research and thesis, or in some cases by coursework and essay.

An application should be lodged with the Faculty. It must be supported by the Head of the Department concerned and approved by the Faculty. If qualifications have been obtained in another university or institution then an application must also be approved by the Academic Board. If an applicant has the prerequisite qualifications, admission to candidature may be approved if the necessary staff and facilities are available, including adequate accommodation and any special equipment. Some candidates may need to satisfy a preliminary examination before being admitted to full candidature.

Full-time candidates
Minimum period of candidature: 1 year
Maximum period of candidature: 2 years

Part-time candidates
Minimum period of candidature: 1 year
Maximum period of candidature: 4 years

Master of Science Resolutions: see end of this chapter.

Master of Science (Environmental Science)

The MSc (Environmental Science) is a research degree requiring a minimum of three semesters of full-time study (or equivalent part-time study). This degree is designed to extend the students knowledge base in environmental matters by providing the student with further training and research experience.

Candidates are required to show proof of a breadth of knowledge in environmental issues, as determined by the Director of Environmental Science. Consequently, as well as the submission of a research thesis, candidates may be required to satisfactorily complete up to a maximum of 24 credit points of coursework study. Prior to the beginning of studies, students must discuss their enrolment details and candidature with the Director of Environmental Science and agree a program guaranteeing breadth of study and ensuring that all units of coursework cover material new to the student. Such details may only be approved or modified by the Director.

Graduates of the University of Sydney with first or second class honours, or who have completed a Graduate Diploma in Applied Science (with or without an emphasis in Environmental Science) with a grade of credit or above, or who have an equivalent qualification from another institution or an equivalent standard of knowledge, may apply for admission to candidature for the Master of Science (Environmental Science) degree.

An application should be lodged with the Faculty of Science and must include a project proposal and the signature(s) of the prospective supervisor(s). It should also be supported by the Director of Environmental Science. If an applicant has the prerequisite qualifications, admission to candidature may be approved if the necessary staff and facilities are available, including adequate accommodation and any special equipment. Some candidates may need to satisfy a preliminary examination before being admitted to full candidature.

Master of Science (Environmental Science) Resolutions: see end of this chapter.

Presentation of theses

The following information is presented for the guidance of candidates. It should be regarded as a summary only. Candidates should also consult the Universitys Calendar, the Postgraduate Research Studies Handbook and the Faculty of Science for the most current and detailed information. The following information is presented for the guidance of candidates. It should be regarded as a summary only. Candidates should also consult the Universitys Calendar, the Postgraduate Research Studies Handbook and the Faculty of Science for the most current and detailed information.

Formal requirements

Number of copies to be submitted:

Master of Science 3

The three copies of theses submitted for examination for the degree of Master of Science or Master of Science (Environmental Science) may be bound in either a temporary or a permanent form. Theses submitted in temporary binding should be strong enough to withstand ordinary handling and postage.

The degree shall not be awarded until the candidate has submitted a permanently bound copy of the thesis (containing any corrections or amendments that may be required) and printed on acid-free or permanent paper.

The thesis shall be accompanied by a certificate from the supervisor stating whether in the supervisors opinion the form of presentation of the thesis is satisfactory.

Theses in permanent form shall normally be on International Standard A4 size paper sewn and bound in boards covered with bookcloth or buckram or other binding fabric. The title of the thesis, the candidates...
initials and surname, the title of the degree, the year of submission and the name of the University of Sydney should appear in lettering on the front cover or on the title page. The lettering on the spine, reading from top to bottom, should conform as far as possible to the above except that the name of the University of Sydney may be omitted and the thesis title abbreviated. Supporting material should be bound in the back of the thesis as an appendix or in a separate sheet of covers.

Similar formal requirements exist for the presentation of MSc theses.

Additional information
At the request of the Academic Board, the Science Faculty has resolved that a thesis should not normally exceed 80,000 words. With the permission of the Chair of the Faculty of Sciences Post-graduate Studies Committee, a thesis may have an absolute upper limit of 100,000 words.

Amendments do not have to involve rekeying if a black ink/biro amendment is clear. Amendments can also be made by way of an appendix to the thesis.

Candidates are advised to consult the SUPRA publication, Practical Aspects of Producing a Thesis at the University of Sydney, for other guidelines and suggestions in addition to the formal requirements above.

Summary
Within the Faculty of Science, there are no formal requirements/guidelines other than those listed above. There are no requirements for single/double spacing or single/doubled sided presentation, nor point size, figure presentation, format of bibliographic citations, etc. Candidates should however, be aware that, if the degree is awarded, the thesis becomes a public document, the quality of which reflects on the ability of the candidate. Moreover, utilising a format that will make the examiners tasks easier is obviously sensible.

Resolutions
Master of Science (MSc)

1. Admission
1.1 The Faculty of Science may, on the recommendation of the Head of the Department concerned, admit to candidature for the degree of Master of Science an applicant who:
1.1.1 is a graduate of the University of Sydney; and
1.1.2 has, in the opinion of the Faculty, reached a first or second class honours standard:
1.1.2.1 in the final year of an honours program for the degree of Bachelor of Science, or
1.1.2.2 in a program considered by the Faculty to be equivalent to a unit of study referred to in subsection 1.1.2.1, or has, in some other manner, acquired a standard of knowledge considered by the Faculty to be equivalent to a first or second class honours standard in a unit of study referred to in subsection 1.1.2.1.
1.2 Notwithstanding subsection 1, the Academic Board may admit a person to candidature for the degree in accordance with the provisions of Part 9 of the University of Sydney (Amendment Act) Rule 1999.

2. Enrolment in more/less than minimum load
2.1 Subject to the approval of the Head of the Department, a candidate for the degree shall elect to proceed:
2.1.1 either as a full-time or as a part-time candidate;
2.1.2 either by research and thesis in accordance with subsections 7.1-7.8 or by coursework and essay in accordance with subsection 7.9-7.12; and
2.1.3 except in the case of a candidate proceeding in accordance with Part 9 of the University of Sydney (Amendment Act) Rule, either within The University of Sydney or elsewhere.

3. Restrictions on enrolment
3.1 A candidate to be full-time shall not keep the normal semesters but shall pursue candidature continuously throughout the year, except for a period of recreation leave and shall not have any substantial employment during the day.

3.2 A candidate who does not comply with subsection 3.1 shall be regarded as a part-time candidate.

4. Time Limits
4.1 A candidate shall not present for examination for the degree earlier than one year after commencement of candidature.
4.2 Except with the permission of the Faculty, a full-time candidate proceeding by research and thesis or any candidate proceeding by coursework and essay shall complete the requirements for the degree not later than two years after the commencement of candidature.
4.3 Except with the permission of the Faculty, a part-time candidate proceeding by research and thesis shall complete the requirements for the degree not later than four years after the commencement of candidature.
4.4 Time spent by a candidate in advanced study in The University of Sydney before admission to candidature may be deemed by the Faculty to be time spent after such admission.

5. Supervision
5.1 The Dean of the Faculty, on the recommendation of the Head of the Department concerned, shall appoint a full-time member of the academic staff or research staff of the University to act as supervisor of the candidate.
5.2 Where the supervisor is a member of the research staff, the Dean of the Faculty, on the recommendation of the Head of the Department concerned, shall also appoint a member of the full-time academic staff as associate supervisor. Any personso appointed as associate supervisor must be capable of acting as supervisor in the event that the supervisor is no longer able to act.
5.3 The Dean of the Faculty, on the recommendation of the Head of the Department concerned, may appoint a full-time member of the academic staff of the University or other appropriately qualified person to act as associate supervisor.
5.4 The supervisor shall report annually to the Faculty, through the Head of Department, on the progress towards completion of the requirements for the degree of each candidate under his or her supervision.

6. Satisfactory Progress
6.1 The Faculty, on the recommendation of the Head of the Department concerned, may terminate the candidature of any candidate who has not shown evidence of sufficient progress, in the opinion of the Faculty.

7. Assessment and Examination
7.1 A candidate proceeding by research and thesis shall:
7.1.1 carry out an original investigation on a topic approved by the Head of the Department concerned;
7.1.2 write a thesis embodying the results of this investigation, and
7.1.3 state in the thesis generally in a preface and specifically in notes, the sources from which the information was taken, the extent to which the work of others has been used, and the proportion of the thesis claimed as original;
7.2 lodge with the Registrar three copies of the thesis, typewritten and bound; and
7.3 if required by the examiners, sit for an examination in the branch or branches of science to which the thesis relates.
7.4 The thesis shall be accompanied by a certificate from the supervisor stating whether in the supervisor's opinion the form of presentation of the thesis is satisfactory.
7.5 The Dean of the Faculty of Science on the recommendation of the head of department concerned, shall appoint two, or where the Dean considers it appropriate, more than two examiners of whom at least one shall be external to the University, i.e. not being a member of the staff of the University or holding a clinical academic title, and of whom one may be the person appointed as supervisor of the candidate.
7.6 The examiners shall report to the Faculty which shall determine the result of the examination.
7.7 A candidate may not present as the thesis any work which has been presented for a degree or diploma at this or another tertiary institution, but the candidate shall not be precluded from incorporating such work in the thesis, provided that in presenting the thesis the candidate indicates the part of the work which has been so incorporated.
7.8 The Registrar shall lodge one copy of the thesis with the Librarian if the degree is awarded.
7.9 A candidate proceeding by course work and essay shall:
7.9.1 attend such course of study and pass such examinations in each unit of study as the Faculty, on the recommendation of the Department concerned, shall by resolution prescribe;
3.1 A candidate may proceed on either a full-time or a part-time basis.

2.3 Candidates for the degree must satisfactorily complete any coursework requirements prescribed by the Chair of the Program Committee for Environmental Science.

2.2 Candidates for the degree must satisfactorily complete any coursework requirements prescribed by the Chair of the Program Committee for Environmental Science.

2.1.2 write a substantial essay on a topic approved by the Head of the Department concerned and state in the essay, generally in a preface and specifically in notes, the sources from which the information was taken and the extent to which the work of others has been used; and

7.9.2 write a substantial essay on a topic approved by the Head of the Department concerned, shall appoint two examiners to examine the essay. One may be the person appointed to act as supervisor of the candidate.

10.4.3 In these resolutions, the term 'immediately' means that the candidate's supervisor, and shall not have any substantial employment during the day.

10.1 A full-time candidate shall complete the requirements for the degree not earlier than the end of the second semester and not later than the end of the fourth semester of candidature, except as described in subsection 8.1 or unless otherwise determined by the Faculty. A part-time candidate shall not keep the normal minimum duration for completion of the requirements of the MSc (Environmental Science) is three semesters.

10.4.2 Where a part-time candidate has completed the requirements for the Graduate Diploma of Science or Applied Science immediately prior to admission into the MSc (Environmental Science), the minimum duration for completion of the requirements of the MSc (Environmental Science) is two semesters.

10.3 Any candidate who does not comply with subsection 1 shall be deemed to have discontinued candidature, except as described in subsection 8.1 or unless otherwise determined by the Faculty.

10.2 A part-time candidate shall complete the requirements for the degree not earlier than the end of the third semester and not later than the end of the eighth semester of candidature, except where the University of Sydney has a formal Cooperation Agreement with another University.

5. Restrictions on enrolment

5.1 Admission to candidature may be limited by a quota. In determining the quota the University will take into account:

5.1.1 availability of resources including space, laboratory and computing facilities; and

5.1.2 availability of adequate and appropriate supervision.

5.2 In considering an application for admission to candidature the Program Committee for Environmental Science and the Faculty shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of section 1 above.

6. Discontinuation of enrolment

6.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued candidature for the degree. Students who have discontinued candidature will have to apply for admission to the candidature and be subject to admission requirements pertaining at that time.

7. Suspension of candidature

7.1 A student may seek written permission from the Dean to suspend candidature for the degree.

7.2 Suspension may be granted for a maximum of one year.

8. Re-enrolment after an absence

8.1 A student who plans to reenrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

9. Satisfactory progress

9.1 The Faculty may:

9.1.1 call upon any candidate to show cause why that candidature should not be terminated by reason of unsatisfactory progress towards completion of the degree; and

9.1.2 terminate the candidature where the candidate does not.

10. Time limit

10.1 A full-time candidate shall complete the requirements for the degree not earlier than the end of the third semester and not later than the end of the fourth semester of candidature, except as described in subsection 1 or unless otherwise determined by the Faculty. A full-time candidate shall not keep the normal minimum duration for completion of the requirements of the MSc (Environmental Science) is three semesters.

10.2 A part-time candidate shall complete the requirements for the degree not earlier than the end of the third semester and not later than the end of the eighth semester of candidature, except as described in subsection 8.1 or unless otherwise determined by the Faculty.

11. Assessment policy

11.1 A candidate shall:

11.1.1 attend such course of study and pass such examinations in each unit of study as prescribed under subsection 3.3.
11.1.2 carry out an original investigation on a topic approved by Chair of the Program Committee - Environmental Science;
11.1.3 write a thesis embodying the results of this investigation and state in the thesis generally in a preface and specifically in notes, the sources from which the information was taken, the extent to which the work of others has been used, and the proportion of the thesis claimed as original;
11.1.4 lodge with the Registrar three copies of the thesis, typewritten and bound; and
11.1.5 if required by the examiners, sit for an examination in the branch or branches of science to which the thesis relates.

11.2 The thesis shall be accompanied by a certificate from the supervisor stating whether in the supervisor's opinion the form of presentation of the thesis is satisfactory.

11.3 The Dean of the Faculty of Science on the recommendation of the head of department concerned, shall appoint two, or where the Dean considers it appropriate, more than two examiners of whom at least one shall be external to the University - i.e, not being a member of the staff of the University or holding a clinical academic title, and of whom one may be the person appointed to act as supervisor of the candidate.

11.4 The examiners shall report to the Faculty which shall determine the result of the examination

11.5 A candidate may not present as the thesis any work which has been presented for a degree or diploma at this or any another tertiary institution, but the candidate shall not be precluded from incorporating such work in the thesis, provided that in presenting the thesis the candidate indicates the part of the work which has been so incorporated.

11.6 The Registrar shall lodge one copy of the thesis with the Librarian if the degree is awarded.

12. Credit transfer policy
12.1 A candidate who, before admission to candidature, has spent time in graduate study and, within the previous three years, has completed coursework considered by the Dean to be equivalent to units of study prescribed for the combined award course, may receive credit of up to 6 credit points towards the requirements for the Master of Science (Environmental Science) provided that the completed work was not counted toward the requirements of another degree.
This chapter sets out the requirements for the Graduate Diploma in Science coursework degree.

**Admission requirements**
Graduates of the University of Sydney who are holders of a Bachelor of Science, Bachelor of Computer Science and Technology, Bachelor of Liberal Studies, Bachelor of Medical Science or Bachelor of Psychology, or graduates from other universities with an equivalent degree, may apply for admission to candidature for the degree Graduate Diploma in Science.

**Relationship of Graduate Diploma to research degrees**
The Graduate Diploma in Science serves as an entry qualification for the degrees of Master of Science or Doctor of Philosophy. It consists of equivalent work to that carried out by candidates enrolled in the fourth year honours courses, and is normally available to candidates who may not be eligible to enrol in those courses. The normal duration of the degree is one year full-time or two years part-time.

**Course requirements**
Intending students should consult the table of honours units of study in chapter 12 for the range of disciplines offered. After discussion of your interests with a relevant member of academic staff, an application should be lodged with the Faculty of Science. Entry to the Graduate Diploma is subject to approval by the relevant head of department, the Faculty, and confirmation that requirements for the award of a relevant bachelor's degree have been met.

**Resolutions**

**Graduate Diploma in Science (GradDipSc)**

1. **Admission**
   1.1 The Faculty may, on the recommendation of the Head of the Department concerned, admit to candidature for the Graduate Diploma in Science, an applicant who is a holder of a bachelor's degree from the Faculty of Science, from the University of Sydney.
   1.2 The Academic Board, in accordance with the provisions of Part 9 of the University of Sydney (Amendment Act) Rule 1999, on the recommendation of the relevant Head of Department and of the Faculty, may admit to candidature of the graduate diploma, graduates who have qualifications equivalent, in the opinion of the Academic Board, to those specified in subsection 1.1.
   1.3 Admission to the graduate diploma may be limited by quota.

2. **Method of progression and time limits**
   2.1 A candidate shall engage in a program of work equivalent to that required for completion of the relevant fourth year of a bachelor's degree in the Faculty of Science by completing the honours units of study offered by the department concerned either as a full-time student for a period of one year or, with the approval of the Head of Department concerned, as a part-time student for a period of two years.
16. Postgraduate coursework: Graduate Diploma in Science
17. Postgraduate coursework: Applied Science degrees

This chapter sets out the requirements for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science.

Graduate Certificate in Applied Science

Graduate Diploma in Applied Science

Master of Applied Science

The Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science are articulated coursework programs available over a number of different subject areas offered by the Faculty, or in the following subject areas:

- Bioinformatics
- Coastal Management
- Environmental Science
- Health Psychology
- Microscopy and Microanalysis
- Molecular Biotechnology
- Nutrition and Dietetics (not available to new students in 2007)
- Neuroscience (not available to new students in 2007)
- Psychology of Coaching
- Spatial Information Science (Graduate Certificate only)
- Wildlife Health and Population Management

Course outcomes

Upon completion of the graduate certificate, graduates will possess a practical and theoretical background in some aspects of the field of study; this will be extended upon completion of the graduate diploma and further extended to include research and practical skills upon completion of the master's program.

Resolutions

Graduate Certificate in Applied Science

Graduate Diploma in Applied Science

Master of Applied Science

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for:

1.1.1 the Graduate Certificate in Applied Science:

1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;

1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1;

1.1.2 the Graduate Diploma in Applied Science:

1.1.2.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;

1.1.2.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1;

1.1.3 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;

1.1.3.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;

1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or

1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.

1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

1.3 The additional requirements are as follows.

1.3.1 Health Psychology

1.3.1.1 Students must have either a four-year Psychology degree or a three-year degree in a cognate discipline with at least two years relevant employment experience. Students can articulate from Certificate to Master's by obtaining Distinction level results at the Certificate level. To obtain entry into the Research stream, students will need to have either a four-year Psychology degree or entry obtain Distinction or better at the Certificate level.

1.3.2 Molecular Biotechnology

1.3.2.1 Applicants for the Graduate Certificate in Molecular Biotechnology should hold a Bachelor's degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology, or previous experience in a relevant area that is considered to demonstrate the knowledge and aptitude required to undertake this award course.

1.3.2.2 Applicants for the Graduate Diploma in Applied Science (Molecular Biotechnology) should hold a Bachelor's degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology, or have completed the Graduate Certificate in Applied Science (Molecular Biotechnology) at the University of Sydney, without failing any units of study.

1.3.2.3 Applicants for a Master of Applied Science (Molecular Biotechnology) should hold a Bachelor's degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology, or have completed the Graduate Certificate in Applied Science (Molecular Biotechnology) at the University of Sydney, without failing any units of study; or have completed the Graduate Diploma in Applied Science (Molecular Biotechnology) at the University of Sydney without failing more than 6 credit points of study.

1.3.3 Nutrition and Dietetics (Note: Not available to new students in 2007)

1.3.3.1 Applicants for the Graduate Certificate in Applied Science (Nutrition and Dietetics), Graduate Diploma in Applied Science (Nutrition and Dietetics), Master of Applied Science (Nutrition and Dietetics) should:

1.3.3.2 be eligible for FULL membership of the Dietitians Association of Australia; and

1.3.3.3 have at least three years experience as a professional dietitian.

1.3.4 Psychology of Coaching

1.3.4.1 An applicant for admission to the Graduate Certificate in Applied Science (Psychology of Coaching), Graduate Diploma in Applied Science (Psychology of Coaching) or Master of Applied Science (Psychology of Coaching) should:

1.3.4.2 have a minimum 3 year sequence in Psychology; and
1.3.4.3 relevant work experience. Relevant work experience may include counselling, experience in organisational learning and development, management experience, employment in applied psychology settings, professional coaching or other areas directly related to coaching.

2. Units of study
2.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science are listed in subsection 3.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in Tables to 11 of these resolutions.

3. Requirements for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science
3.1 Candidates for the Graduate Certificate in Applied Science are required to complete satisfactorily units of study granting a minimum of 24 credit points selected from units of study as listed in subsection 3.

3.1.1 Candidates for the Graduate Diploma in Applied Science are required to complete satisfactorily units of study granting a minimum of 36 credit points selected from units of study as listed in subsection 3.

3.1.2 Candidates for the Master of Applied Science are required to complete satisfactorily units of study granting a minimum of 48 credit points selected from units of study as listed in subsection 3.

3.1.3 Candidates for the Master of Applied Science may enrol in 12-credit point project units of study only after successful completion of at least 24 credit points of study, with credit average and above, subject to the approval of the Program Coordinator.

3.1.4 Except as provided in subsection 4.6, candidates may not enrol in units of study that are not included in the tables associated with these resolutions.

3.2 Graduate Certificate in Applied Science (Bioinformatics) (GradCertAppSci(Bioinf)): Graduate Diploma in Applied Science (Bioinformatics) (GradDipAppSci(Bioinf)): Master of Applied Science (Bioinformatics) (MApplSci(Bioinf))
3.2.1 Candidates for the Graduate Certificate in Applied Science (Bioinformatics) (GradCertAppSci(Bioinf)) are required to complete satisfactorily four core units of study (BIOL5001, BIOL5002, MOBT5201, STAT5001).

3.2.2 Candidates for the Graduate Certificate in Applied Science (Bioinformatics) Stream B are required to complete satisfactorily four core units of study (BIOL5002, MOBT5201, STAT5001, COMP5213).

3.2.3 Candidates for the Graduate Diploma in Applied Science (Bioinformatics) Stream A are required to complete satisfactorily four core units of study (BIOL5001, BIOL5002, MOBT5201, STAT5001) and 12 credit points from optional units of study.

3.2.4 Candidates for the Graduate Diploma in Applied Science (Bioinformatics) Stream B are required to complete satisfactorily five core units of study (BIOL5002, MOBT5201, STAT5001, COMP5213, COMP5214) and 6 credit points from optional units of study.

3.2.5 Candidates for the Master of Applied Science (Bioinformatics) Stream A are required to complete satisfactorily four core units of study (BIOL5001, BIOL5002, MOBT5201, STAT5001) and 24 credit points from optional units of study.

3.2.6 Candidates for the Master of Applied Science (Bioinformatics) Stream B are required to complete satisfactorily five core units of study (BIOL5002, MOBT5201, STAT5001, COMP5213, COMP5214) and 18 credit points from optional units of study.

3.3 Graduate Certificate in Applied Science (Coastal Management) (GradCertAppSci(Coastal Mgt)): Graduate Diploma in Applied Science (Coastal Management) (GradDipAppSci(Coastal Mgt)): Master of Applied Science (Coastal Management) (MApplSci(Coastal Mgt)) (Note: Not available to new students from Semester 2, 2007)
3.3.1 Candidates for the Graduate Certificate in Applied Science (Coastal Management) are required to complete satisfactorily at least two core units of study from: MARS5001, MARS5002, MARS5003, GEOG5001, and 12 credit points from the following optional units of study: MARS5001, MARS5002, MARS5003, GEOG5001, CHEM5001, ENVIS5705, ENVIS5803, ENVIS5808, ENVIS5809.

3.3.2 Candidates for the Graduate Diploma in Applied Science (Coastal Management) are required to complete satisfactorily four core units of study (MARS5001, MARS5002, MARS5003, GEOG5001) and 12 credit points from the following optional units of study: MARS5004, CHEM5001, ENVIS5705, ENVIS5803, ENVIS5808, ENVIS5809.

3.3.3 Candidates for the Master of Applied Science (Coastal Management) are required to complete satisfactorily four core units of study (MARS5001, MARS5002, MARS5003, GEOG5001) and 24 credit points from the following optional units of study: MARS5004, MARS5005, CHEM5001, ENVIS5705, ENVIS5803, ENVIS5808, ENVIS5809.

3.4 Candidates for the Graduate Diploma in Applied Science (Environmental Science) (GradDipApplSc(EnvSc)); Master of Applied Science (Environmental Science) (MAppSc(EnvSc)); and Doctor of Philosophy (Health Psychology) (PhD). Candidates for the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011, PUBH5018; one elective unit of study from PSYC5013, PSYC5012, BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180; BACH5268 and PSYC5015.

3.5 Candidates for the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011, PUBH5018; one elective unit of study from PSYC5013, PSYC5012, BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180; BACH5268 and PSYC5015.

3.5.1 Candidates for the Graduate Certificate in Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011, PUBH5018; one elective unit of study from PSYC5013, PSYC5012, BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180; BACH5268 and PSYC5015.

3.5.2 Candidates for the Graduate Certificate in Applied Science (Environmental Science) (GradDipApplSc(EnvSc)); Master of Applied Science (Environmental Science) (MAppSc(EnvSc)); and Doctor of Philosophy (Health Psychology) (PhD). Candidates for the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011, PUBH5018; one elective unit of study from PSYC5013, PSYC5012, BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180; BACH5268 and PSYC5015.

3.5.3 Candidates for the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011 and PUBH5018; one elective unit of study from PSYC5013, PSYC5012, and BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180 and BACH5268; one elective unit of study and one research elective unit of study. Candidates for the Master of Applied Science (Health Psychology) may be admitted to the Research stream in their second semester of enrolment, upon completion of at least 24 credit points with a distinction average.

3.5.4 Candidates for the Graduate Certificate in Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011 and PUBH5018; one elective unit of study from PSYC5013, PSYC5012, and BACH5180; one elective unit of study from PSYC5013, PSYC5012, BACH5180 and BACH5268; one elective unit of study and one research elective unit of study. Candidates for the Master of Applied Science (Health Psychology) may be admitted to the Research stream in their second semester of enrolment, upon completion of at least 24 credit points with a distinction average.

3.5.5 A candidate for the course shall proceed by completing units of study. Unless otherwise indicated, all units are worth 6 credit points.

3.6 Candidates for the Graduate Diploma in Applied Science (Microscopy and Microanalysis) (GradDipApplSc(Micro and Microanal)); Master of Applied Science (Microscopy and Microanalysis) (MAppSc(Micro and Microanal)); and Doctor of Philosophy (Health Psychology) (PhD). Candidates for the Master of Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and a further 12 credit points from additional core project and report units of study.

3.6.1 Candidates for the Graduate Certificate in Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and a further 24 credit points from optional units of study.

3.6.2 Candidates for the Graduate Certificate in Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and a further 24 credit points from optional units of study.

3.6.3 Candidates for the Master of Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and a further 24 credit points from additional core project and report units of study.
3.7 Graduate Certificate in Applied Science (Molecular Biotechnology) (GradCertAppSc(MBT)); Graduate Diploma in Applied Science (Molecular Biotechnology) (GradDipAppSc(MBT)); Master of Applied Science (Molecular Biotechnology) (MApplSc(MBT)).

3.7.1 Candidates for the Graduate Certificate in Applied Science (Molecular Biotechnology) are required to complete satisfactorily two core units of study (MOBT5101 and MOBT5102).

3.7.2 Candidates for the Graduate Diploma in Applied Science (Molecular Biotechnology) are required to complete satisfactorily two core units of study (MOBT5101 and MOBT5102) and 12 credit points from optional units of study.

3.7.3 Candidates for the Master of Applied Science (Molecular Biotechnology) are required to complete satisfactorily four core units of study (MOBT5101, MOBT5102, and MOBT5103) and 12 credit points from optional units of study.

3.8 Graduate Certificate in Applied Science (Neuroscience) (GradCertAppSc(NeuroSc)); Graduate Diploma in Applied Science (Neuroscience) (GradDipAppSc(NeuroSc)); Master of Applied Science (Neuroscience) (MApplSc(NeuroSc)).

3.8.1 Candidates for the Graduate Certificate in Applied Science (Neuroscience) are required to complete satisfactorily four units of study selected from NEUR5101, NEUR5102, NEUR5103, NEUR5104, NEUR5105, NEUR5106, NEUR5107 or NEUR5108.

3.8.2 Candidates for the Graduate Diploma in Applied Science (Neuroscience) are required to complete satisfactorily five units of study selected from NEUR5101, NEUR5102, NEUR5103, NEUR5104, NEUR5105, NEUR5106, NEUR5107 or NEUR5108 and either NEUR5001 or NEUR5002.

3.8.3 Candidates for the Master of Applied Science (Neuroscience) are required to complete satisfactorily five units of study selected from NEUR5001, NEUR5002, NEUR5003, NEUR5004.
### 17. Postgraduate coursework: Applied Science degrees

#### 3.10 Graduate Certificate in Applied Science (Psychology of Coaching) (GradCertApplSc(PSychCoach))

Candidates for the Graduate Certificate in Applied Science (Psychology of Coaching) are required to satisfactorily complete three core units of study PSYC4721, PSYC4722 and PSYC4724 and 6 credit points from elective units.

#### 3.10.1 Candidates for the Graduate Certificate in Applied Science (Psychology of Coaching)

- PSYC4721: Theories & Techniques of Coaching Psych
- PSYC4722: Fundamentals of Coaching Practice
- PSYC4724: Coaching Practice: Co-coaching & Groups
- PSYC4723: Socio-cognitive Issues in Coaching Psych
- PSYC4725: Assessment and Selection
- PSYC4727: Coaching in Organisations
- PSYC4729: Groups, Teams and Systems
- PSYC4730: Personal and Work/Life Coaching

#### 3.10.3 Candidates for the Master of Applied Science (Psychology of Coaching)

Candidates for the Master of Applied Science (Psychology of Coaching) are required to complete satisfactorily three core units of study PSYC4721, PSYC4722 and PSYC4724 and 12 credit points from optional units of study.

#### 3.11 Graduate Certificate in Applied Science (Spatial Information Science) (GradCertApplSc (SIS))

Candidates for the Graduate Certificate in Applied Science (Spatial Information Science) are required to complete satisfactorily two core units of study (GEOG5001 and GEOG5002) and 12 credit points from optional units of study.

#### 3.12 Graduate Certificate in Applied Science (Wildlife Health and Population Management) (GradCertApplSc(WildHlthPopMan))

Candidates for the Graduate Certificate in Applied Science (Wildlife Health and Population Management) are required to satisfactorily complete two core units of study (WILD5001 and WILD5002) and 12 credit points from optional units of study.

#### 3.12.2 Candidates for the Graduate Diploma in Applied Science (Wildlife Health and Population Management)

Candidates for the Graduate Diploma in Applied Science (Wildlife Health and Population Management) are required to complete satisfactorily two core units of study (WILD5001 and WILD5002) and 24 credit points from optional units of study.

#### 3.12.3 Candidates for the Master of Applied Science (Wildlife Health and Population Management)

Candidates for the Master of Applied Science (Wildlife Health and Population Management) are required to complete satisfactorily three core units of study (WILD5001, WILD5002 and WILD5009) and 24 credit points from optional units of study.

#### Table 11 Wildlife Health and Population Management

**Unless otherwise indicated, all units are worth 6 credit points. There are no prerequisites, corequisites or other special conditions for enrollment in these units of study except that 24 credit points of units of study must be completed successfully before a candidate may enrol in WILD5009.**

#### Core units all degrees

- WILD5001 Australasian Wildlife: Introduction
- WILD5002 Australasian Wildlife: Field Studies

**Additional core unit Master’s**

- WILD5009 Research Project (12cp)
- WILD5003 Wildlife Health
- WILD5004 Vertebrate Pest Management
- WILD5005 In Situ Wildlife Management
- WILD5006 Ex Situ Wildlife Management
- WILD5007 Sustainable Wildlife Use & Stewardship

### Section 2

#### 4. Details of units of study

- **4.1** The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science are listed in tables 1 to 11 of these resolutions, in subsection 3.

- **4.2** A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

- **4.3** A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

- **4.4** In these resolutions, ‘to complete a unit of study’ or any derivative expression means:
  - to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
  - to complete satisfactorily the essays, exercises, practical and project work if any; and
  - to pass any other examination of the unit of study that may apply.

- **4.5** All units of study for a particular subject area may not be available every semester.

- **4.6** The Dean may allow substitution of any unit of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

#### 5. Enrolment in more/less than minimum load

- **5.1** A candidate may proceed on either a full-time or a part-time basis.

#### 6. Cross-institutional study

- **6.1** Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

#### 7. Restrictions on enrolment

- **7.1** Admission to candidature may be limited by a quota.

- **7.2** In determining the quota, the University will take into account:
  - availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of section 2 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science, the Graduate Diploma in Applied Science, and the Graduate Certificate in Applied Science, shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science;

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science and/or the Graduate Diploma in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science;

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science and/or the Graduate Diploma in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science and/or the Graduate Diploma in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science may transfer, within three years, to the Graduate Diploma in Applied Science and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science.

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science may transfer, within three years, to the Master of Applied Science and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science.

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
Graduate Certificate in Bioethics (GradCertBEth)
Graduate Certificate in Bioethics (Biotechnology) (GradCertBEthBTech)
Graduate Certificate in Bioethics (Clinical Ethics) (GradCertBEthClinEth)
Graduate Diploma in Bioethics (GradDipBEth)
Master of Bioethics (MBEth)
Master of Bioethics (Honours) (MBEthHon)

This chapter sets out the requirements for postgraduate degrees offered in the Faculty of Science in the area of Bioethics. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at:

www.usyd.edu.au/publications/calendar/

Course Overview
The University of Sydney offers several postgraduate degree courses in Bioethics. Increasing levels of expertise are provided through completion of the Graduate Certificate in Bioethics, Graduate Certificate in Bioethics (Biotechnology), Graduate Certificate in Bioethics (Clinical Ethics), Graduate Diploma in Bioethics, Master of Bioethics, and the Master of Bioethics (Honours).

These courses are designed to meet the widely recognised growing need for ethics education for scientists, researchers, and professionals working in medicine, nursing, public health, health law, health policy/administration, public policy, and science communication. They will also be attractive to students with general interests in relationships between science and society or relevant social science disciplines.

Particular individual units of study (such as Core Concepts in Bioethics (BETH5000), Human and Animal Research Ethics (BETH5202), Ethics and Biotechnology (BETH5201), and Ethics and Public Health (BETH5203)) offered through the Postgraduate Program in Bioethics will be popular with postgraduate students pursuing degrees in other fields—such as medical humanities, law, biology, health sciences, biomedical sciences, public health, and/or any disciplines involving human or animal experimentation.

The discipline of bioethics is concerned with ethical questions arising in contexts of biological and medical science. Social concern about such issues has grown with advances in biomedical technology, as illustrated by contemporary debate over reproductive technologies, genetic engineering, cloning, and stem cell research. Traditional topics in bioethics include abortion, euthanasia, relationships between health care providers and patients, research involving humans and animals, and justice in the distribution of medical resources. Emerging topics include ethical issues related to global public health.

Falling at the intersections of ethics, policy, and biomedical science, bioethics is an inherently interdisciplinary field. The University of Sydney's Postgraduate Program in Bioethics uniquely addresses this interdisciplinarity head-on.

In addition to the Core unit of study (BETH5000), which provides a broad survey of the field of bioethics, our Foundational units provide interdisciplinary grounding in ethical philosophy (BETH5101), philosophy of science/medicine (BETH5102), interdisciplinary approaches to the study of medicine and society (BETH5103), and bioethics law (BETH5104).

Specialisation in areas of particular interest is provided via Elective units with focus on biotechnology (BETH5201), research ethics (BETH5202), public health (BETH5203), and clinical ethics (BETH5204). All of these units of study include historical components.

Qualified students admitted to the Master of Bioethics (Honours) degree will obtain further expertise in an area of special interest, and experience necessary for further postgraduate study (i.e. Ph.D), through completion of a research project (BETH5301 and 5302).

The Master of Bioethics degree can be completed in one year by full-time students or over two years by part-time students. Further details on duration of study are provided below.

Course Outcomes
The University of Sydney Postgraduate Bioethics degree courses provide breadth and depth of coverage of both traditional and alternative/新兴 issues in, and approaches to, bioethics. Our students will gain advanced understanding of the bearing of ethical philosophy, epistemology, law, sociology, linguistics, and history on issues in bioethics. They will develop interdisciplinary appreciation of relationships between values, science, and society. They will become familiar with both the historical and philosophical bases of local and international legislation and regulatory guidelines regarding the ethics of health care and research. They will develop, and be able to defend, their own reasoned judgments about how ethical issues arising in health care, research, and public policy contexts should be resolved; and they will be able to recognise novel, or previously unappreciated, ethical issues arising in the professional workplace or in social policy contexts.

Our degrees contribute to the professional development of those working in health care and they offer the skills and knowledge base necessary for critical analysis in health policy making or in relevant areas of social science disciplines. All of our degrees contribute to development of general skills in research, reading, writing, and oral expression. Expertise will vary with level of degree completed.

The program has been designed to enable progression from Graduate Certificate to Graduate Diploma, Masters, and Masters (Honours). The Graduate Certificate (Biotechnology) is specifically designed to provide ethical training for those working in the fields of, or those concerned with recent developments in, genetics and stem cell research. The Graduate Certificate (Clinical Ethics) is designed to provide training in ethics and associated issues for those engaged in clinical practice in a range of health professions. The Master of Bioethics (Honours) degree provides opportunity for in-depth learning in an area of special interest and research experience necessary for further postgraduate study.
Bioethics units of study 2007

Core unit of study

BETH5000 Core Concepts in Bioethics

Credit points: 6 Session: Semester 1 Classes: The equivalent of two hours of seminars per week and up to 4 hours per week spent on online learning tasks, small group sessions, project work, and consultation with lecturers. Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. A limited number of students may be granted permission to take this unit during their honours year. Assessment: Essays; short written assignments; research project/presentation.

Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit provides a broad overview of the primary issues in, and theoretical approaches to, bioethics. Following an introduction to the history of bioethics and review of the major theoretical approaches to applied ethics, central debates in bioethics surrounding doctor-patient relationships, informed consent, privacy/confidentiality, research ethics, abortion, euthanasia, genetics, cloning, stem cell research, justice and distribution of health care resources, etc., are examined. In addition to classical cases and traditional theoretical perspectives, emerging topics and alternative perspectives are explored. The unit concludes with the topic of global public health and socio-political critique(s) of the discipline of bioethics itself. Learning activities will include seminars, small group sessions, and project work. It is recommended, but not required, that BETH5000 is taken during students’ first semester in the program.

Foundational units of study

BETH5101 Introduction to Ethical Reasoning

Credit points: 6 Session: Semester 1 Classes: The equivalent of two hours of seminar/week and up to 4 hours per week spent on online learning tasks, small group sessions, project work, and consultation with lecturers. Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays; short written assignments; research project/presentation.

Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit prepares students for advanced analysis of issues in bioethics by laying foundations in both critical thinking and ethical theory. Following an introduction to the construction and assessment of arguments, central issues of debate in meta-ethics, normative ethics, and political philosophy are examined. Major traditional (historical, consequential, deontological, contractarian/egaltarian, and communitarian) theoretical frameworks as well as postmodern/continental perspectives are introduced and critically evaluated. The unit concludes with an introduction to applied and professional ethics. It is recommended, but not required, that BETH5101 is taken during students’ first semester in the program.

BETH5102 Philosophy of Medicine

Credit points: 6 Session: Semester 1 Classes: One 2-hour seminar per week with up to 4 hours per week spent on online learning tasks, small group sessions, project work, and consultation with lecturers. Assumed knowledge: A three-year degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field - or by special permission. Assessment: Essays, short written assignments, research project/presentation.

Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit of study introduces students to the broader philosophical issues and epistemological structures that underlie medicine and the biomedical sciences. The unit will begin by introducing students to the philosophy of science and medicine, epistemology and the concepts of health, illness and disease. The second part of the unit will review debates regarding disease causation and the social construction of disease. Students will then consider issues relating to the generation and use of knowledge and evidence, and the differences between conventional and alternative/non-Western approaches to illness and healing. The final part of the unit will focus on diagnosis, nosology and classification of disease, with particular reference to mental illness.

BETH5103 Biomedicine and Society

Credit points: 6 Session: Semester 2 Classes: The equivalent of one 2-hour seminar per week with up to 4 hours per week spent on online learning tasks, small group sessions, project work and consultation with lecturers. Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays; short written assignments, presentation/project.

Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit introduces students to the complex relationships between biomedicine and society utilizing several disciplines including philosophy, ethics, sociology, anthropology and linguistics. Students will consider issues such as power in the biomedical professions and industries; the illness experience; the role of the healer; biomedicine and indigenous cultures and non-western notions of illness and care.

BETH5104 Bioethics, Law and Society

Credit points: 6 Session: Semester 1 Classes: The equivalent of one 2-hour seminar per week with up to four hours per week spent on online learning tasks, small group sessions and consultation with lecturers. Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays; short written assignments.

The unit of study will begin by introducing students to interrelationships between health care, ethics and the law. In particular students will explore the moral basis of law and the means by which law influences moral norms, clinical practice and health policy. Students will be shown how to critically read and analyse primary sources of law relevant to bioethics. Students will then examine a number of areas of law that have particular significance for bioethics and society including the law of tort (consent and standards of care), contract (confidentiality), criminal law (euthanasia and abortion), public health law, administrative law and law reform.

Elective units

BETH5201 Ethics and Biotech: Genes and Stem Cells

Credit points: 6 Session: Semester 2 Classes: The equivalent of one 2-hour seminar per week will be presented in an intensive format. In addition, students will spend up to four hours per week on online learning tasks, small group sessions, project work and consultation with lecturers over the course. Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays; short written assignments, one project.

Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit introduces students to the broader social/political, ethical/philosophical and legal/regulatory issues that underlie genetics, stem cell research and the emerging biotechnologies. The unit will provide a brief overview of the relevant science before considering scientific, cultural and religious understandings of life and human identity. The second part of the unit will review the political, regulatory and commercial context of biotechnology and the control of information. Students will then review the history of genetics and eugenics and the ethical issues that arise in clinical and population genetics, stem cell research and cloning. The final part of the unit will explore the boundaries of research and knowledge and the issues raised by emerging biotechnologies, such as nanotechnology and proteomics. Learning activities will include an intensive seminar program, small group sessions and reading. Students will be able to concentrate on stem cell research, clinical or molecular genetics or other biotechnologies according to their clinical and scientific interests and experience.
BETH5202 Human and Animal Research Ethics
Credit points: 6 Session: Semester 2 Classes: The equivalent of one 2-hour seminar per week will be presented in an intensive format. In addition, students will spend up to four hours per week on online testing tasks, small group sessions, project work and consultation with lecturers over the course of Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays, short written assignments, projects.
Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit introduces students to research ethics in its social context. Students will first analyse the philosophical underpinnings of the research endeavour, including the justifications for engaging in research, research priorities and research integrity. The unit will then review the history of research and research abuses, the evolution of research ethics and the regulation of research in Australia. The second part of the unit will focus on issues arising in the conduct of research including: the protection of research subjects (both human and animal), consent, confidentiality and risk/benefit analysis.

BETH5203 Ethics and Public Health
Credit points: 6 Session: Semester 2 Classes: The equivalent of one 2-hour seminar per week will be presented in an intensive format. In addition, students will spend up to four hours per week on online testing tasks, small group sessions, project work and consultation with lecturers over the course of Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field, or by special permission. Assessment: Essays, short written assignments.
Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit will provide students with an overview of the broader philosophical, ethical, sociopolitical and cultural issues that underlie public health and public health research. Students will first review the history of public health and examine the values that underpin health promotion and disease prevention. The second part of the unit will critique the place of facts and values in public health and the construction and use of information, with particular reference to evidence-based medicine. The third part of the unit will examine the cultural, moral and social context of public health including the social determinants of health, the construction of health services, the determination of research priorities and issues relating to human rights and global health. Learning activities will include 2-hour weekly seminars and readings. Assessment tasks will consist of essays and a presentation/project.

BETH5204 Clinical Ethics
Credit points: 6 Session: Semester 1 Classes: The equivalent of one 2-hour seminar/week will be presented in an intensive format (in weeks 5-6). In addition, students will spend up to four hours per week spent on small group sessions, project work, portfolio development and discussion, and consult at Assumed knowledge: Honours or equivalent degree, or other appropriate terminal undergraduate degree (such as a three-year nursing degree) in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field or by special permission. Assessment: Two essays (2 x 1000 words worth 15% each, total 30%); reflective portfolio/journal via WebCT (worth 30%); and a project/presentation on the analysis of a case (worth 40%).
Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit will provide students with an overview of the broader philosophical, ethical, sociopolitical, and cultural issues that underlie the delivery of healthcare. Students will first explore major conceptual models for ethical reasoning in the clinical context; the design and delivery of clinical ethics consultation; and issues relating to the role of the professions. The second part of the unit will examine the foundations of clinical practice, including consent, competence, veracity, confidentiality, and decision-making. The third part of the unit will consider specific issues and populations within clinical practice, such as the care of vulnerable populations, mental health, and chronic illness. The next part of the unit will focus on skills associated with clinical ethics including analytic and mediation skills. The unit will conclude with reflections on current debates in the Australian healthcare context, particularly issues associated with healthcare rationing. Learning activities will include lectures (in an intensive format), facilitated discussion, case study presentations, and readings. Assessment tasks will consist of essays, a portfolio/journal, and a presentation/project.

Research project units
BETH5301 Research Project A
Credit points: 6 Session: Semester 1, Semester 2 Classes: Weekly consultation with supervisor(s). Prerequisites: Distinction average (or higher) in 24 credit points of BETH units of study. Assessment: Research tasks, 15,000 word thesis (in conjunction with BETH5302).
Note: Only available to students admitted to the Master of Bioethics (Honours) degree. BETH5301 must be taken in conjunction with BETH5302. It is recommended, but not required, that BETH5301 and BETH5302 are taken in separate semesters.

This unit must be taken in conjunction with BETH5302 (Research Project B). These units are only available to students admitted to the Master of Bioethics (Honours) degree track. The Research Project (i.e. parts A and B combined) provides opportunity for research and in-depth learning in a bioethics topic of special interest or importance to the student. Successful completion of the project may also provide students with the research experience required for the pursuit of a higher degree. This unit involves independent research and regular meetings with (a) supervisor(s). In the process of completing the Research Project (i.e. parts A and B combined), students will produce an original 15,000 word thesis. Choice of thesis topic depends on availability of appropriate supervisor(s). It is recommended, but not required, that BETH5301 and BETH5302 are taken in separate semesters. A mark for both BETH5301 and BETH5302 combined is provided at the completion of BETH5302 (upon submission of thesis). It is possible to take these units in distance mode.

BETH5302 Research Project B
Credit points: 6 Session: Semester 1, Semester 2 Classes: Weekly consultation with supervisor(s). Assessment: Research tasks, 15,000 word thesis (in conjunction with BETH5301).
Note: Only available to students admitted to the Masters of Bioethics (Honours) degree. Must be taken in conjunction with BETH5301. It is recommended, but not required that BETH5301 and BETH5302 are taken in separate semesters.

This unit must be taken in conjunction with BETH5301 (Research Project A). These units are only available to students admitted to the Master of Bioethics (Honours) degree. The Research Project (i.e. parts A and B combined) provides opportunity for research and in-depth learning in a bioethics topic of special interest or importance to the student. Successful completion of the project may also provide students with the research experience required for the pursuit of a higher degree. This unit involves independent research and regular meetings with (a) supervisor(s). In the process of completing the Research Project (i.e. parts A and B combined), students will produce an original 15,000 word thesis. Choice of thesis topic depends on availability of appropriate supervisor(s). It is recommended, but not required, that BETH5301 and BETH5302 are taken in separate semesters. A mark for both BETH5301 and BETH5302 combined is provided at the completion of BETH5302 (upon submission of thesis). It is possible to take these units in distance mode.
Resolutions

Graduate Certificate in Bioethics (GradCertBEth)
Graduate Certificate in Bioethics (Biotechnology) (GradCertBEthBTech)
Graduate Certificate in Bioethics (Clinical Ethics) (GradCertBEthClinEth)
Graduate Diploma in Bioethics (GradDipBEth)

Master of Bioethics (MBEth)
Master of Bioethics (Honours) (MBEthHon)

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Bioethics, Graduate Certificate in Bioethics (Biotechnology), Graduate Certificate in Bioethics (Clinical Ethics), Graduate Diploma in Bioethics and Master of Bioethics:
1.1.1.1 an applicant who is the holder of a Bachelor’s degree or any equivalent award in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology, anthropology, history, law, or other relevant field;
1.1.2 the Master of Bioethics (Honours):
1.1.2.1 an applicant who has completed at least four units of study in the University’s Postgraduate Program in Bioethics and who holds at least a distinction average for units of study taken in the University's Postgraduate Program in Bioethics.

2. Units of study
2.1 The units of study for these award courses are listed in the tables in subsection 4.1 of these resolutions.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the description of units of study associated with these resolutions.

3. Requirements for the Graduate Certificate in Bioethics, Graduate Certificate in Bioethics (Biotechnology), Graduate Certificate in Bioethics (Clinical Ethics), Graduate Diploma in Bioethics, Master of Bioethics, Master of Bioethics (Honours)
3.1 Candidates for the GradCertBEth are required to complete satisfactorily units of study granting a minimum of 24 credit points selected from units of study approved from time to time by the Faculty.
3.1.2 They must complete BETH5000 and three Foundational units of study.
3.2 Candidates for the GradCertBEthBTech are required to complete satisfactorily units of study granting a minimum of 24 credit points selected from units of study approved from time to time by the Faculty.
3.2.1 They must complete BETH5000, BETH5201, BETH5202 and one Foundational unit.
3.3 Candidates for the GradCertBEthClinEth are required to complete satisfactorily units of study granting a minimum of 24 credit points selected from units of study approved from time to time by the Faculty.
3.3.1 They must complete BETH5000 and BETH5204, and two additional units of study (Foundational or Elective).
3.4 Candidates for the GradDipBEth are required to complete satisfactorily units of study granting a minimum of 36 credit points selected from units of study approved from time to time by the Faculty.
3.4.1 They must complete BETH5000, three Foundational units, and two additional units of study (Foundational or Elective).
3.5 Candidates for the MBEth are required to complete satisfactorily units of study granting a minimum of 48 credit points selected from units of study approved from time to time by the Faculty.
3.5.1 They must complete BETH5000, four Foundational units, and three Elective units of study.
3.6 Candidates for the MBEthHon are required to complete satisfactorily units of study granting a minimum of 60 credit points selected from units of study approved from time to time by the Faculty.
3.6.1 They must complete the BETH5000, four Foundational units, three Elective units, and two Research Project units of study.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Certificate in Bioethics, Graduate Certificate in Bioethics (Biotechnology), Graduate Certificate in Bioethics (Clinical Ethics), Graduate Diploma in Bioethics, Master of Bioethics, Master of Bioethics (Honours) are listed in the tables below:

11.4 A student who has failed a cumulative total of more than 18 credit points in the Master of Bioethics and/or Master of Bioethics (Honours) and/or the Graduate Diploma in Bioethics and/or the Graduate Certificate in Bioethics and/or the Graduate Certificate in Bioethics (Biotechnology) and/or the Graduate Certificate in Bioethics (Clinical Ethics) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

12. **Time limit**
12.1 A candidate for the GradCertBEth shall complete the requirements for the award in a minimum of one semester and a maximum of five semesters, and (in the event of suspension) except with permission of the Dean within three calendar years of admission to candidature.
12.2 A candidate for the GradCertBEth(BTech) shall complete the requirements for the award in a minimum of two semesters and a maximum of five semesters, and (in the event of suspension) except with permission of the Dean within three calendar years of admission to candidature.
12.3 A candidate for the GradCertBEth(ClinEth) shall complete the requirements for the award in a minimum of one semester and a maximum of five semesters, and (in the event of suspension) except with permission of the Dean within three calendar years of admission to candidature.
12.4 A candidate for the GradDipBEth shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters, and (in the event of suspension) except with permission of the Dean within five calendar years of admission to candidature.
12.5 A candidate for the MBEth shall complete the requirements for the award in a minimum of two semesters and a maximum of ten semesters, and (in the event of suspension) except with permission of the Dean within six calendar years of admission to candidature.
12.6 A candidate for the MBEth(Hon) shall complete the requirements for the award in a minimum of three semesters and a maximum of twelve semesters, and (in the event of suspension) except with permission of the Dean within seven calendar years of admission to candidature.

13. **Assessment policy**
13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. **Credit transfer policy**
14.1 Credit may be available in the GradCertBEth, GradCertBEth(BTech), GradCertBEth(ClinEth), GradDipBEth, MBEth and MBEth(Hon) for postgraduate study which has been undertaken at the University of Sydney (either within the Postgraduate Program in Bioethics or through the University's Professional Master of Medicine Program) within the past three years and for which no award has been conferred.
14.1.2 If an award has been conferred for this study, credit is not available within any of the Bioethics programs.
14.2 A candidate who has qualified for the award of GradCertBEth, GradCertBEth(BTech), or GradCertBEth(ClinEth) may transfer, within three years, to the GradDipBEth, MBEth or MBEth (Hon) and receive credit for up to 24 credit points from the GradCertBEth, GradCertBEth(BTech), or GradCertBEth(ClinEth).
14.3 To transfer to the MBEth(Hon) the candidate must satisfy admission requirements in sub-section 1.1.2 of the Resolutions of Faculty.
14.4 A candidate who has qualified for the award of GradDipBEth may transfer, within three years, to the MBEth or MBEth(Hon) and receive credit for up to 36 credit points from the GradDipBEth.
14.5 A candidate who has qualified for the award of MBEth may transfer, within three years, to the MBEth(Hon) and receive credit for up to 48 credit points from the MBEth.
14.5.1 To transfer to MBEth(Hon) the candidate must satisfy admission requirements in subsection 1.1.2.
19. Postgraduate courses: Bioinformatics

Graduate Certificate in Applied Science (Bioinformatics)

Graduate Diploma in Applied Science (Bioinformatics)

Master of Applied Science (Bioinformatics)

This chapter sets out the requirements for postgraduate degrees offered in the Faculty of Science in the area of Bioinformatics. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, which can be found at the end of this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Course overview

The Graduate Certificate in Applied Science (Bioinformatics), Graduate Diploma in Applied Science (Bioinformatics) and Master of Applied Science (Bioinformatics) are articulated award courses that provide a professional qualification to biologists and computer scientists working in industry, research and education.

The award program brings together the disciplines of computer science, statistics and the life sciences, developing and enhancing skills in bioinformatics. Students with little background in molecular biology who want to extend their understanding of the biosciences, statistics and bioinformatics will follow Stream A. Students with a strong background in molecular biology and want to study bioinformatics, statistics and computer science should follow Stream B.

The Program has core and optional units of study to satisfy both of these requirements and will produce graduates with skills in the disciplines that underpin bioinformatics and in bioinformatics itself. Graduates from the Bioinformatics Program will be proficient in molecular biology, genetics and bioinformatics. (Biology graduates who want to learn about computer programming are directed to the Graduate Diploma in Computing).

Course outcomes

The aim of this articulated coursework program is to provide students with a coordinated approach to bioinformatics, thus developing expertise to perform and develop the analysis of biological data with underlying competencies in the life sciences, computer science and statistics. Upon completion of the graduate certificate, graduate diploma or master’s, graduates will have a broad understanding of the topic of bioinformatics. In addition, the master’s will provide the option of experience in carrying out and completing a research project and report.

Bioinformatics units of study 2007

BINF5002

Bioinformatics Research Project A

Credit points: 6  Teacher/Coordinator: Dr Jeremiin  Session: Semester 1, Semester 2

Classes: meetings by arrangement with the supervisor

Corequisites: BINF5003, BIOL5001, BIOL5002, MGMT5201 and STAT5001

Assessment: project plan, seminar, final report

Note: Department permission required for enrolment.

BINF5002 comprises the commencement of a research project on a topic with significant emphasis on the use of bioinformatics tools to address important questions in the areas of biology, biochemistry, mathematics and statistics, computer science, crop and veterinary sciences, and medical science. Students will be working with an appointed supervisor from the Faculties of Agriculture, Science, Veterinary Science, and Medicine or from industry under the guidelines of the convenor. Students will commence a small research project in an area agreed by the student, the supervisor and the convenor. Research experience is highly valued by prospective employers as it shows a willingness and ability to undertake independent, as well as guided, research in bioinformatics. The project is not conducted in the way of contact hours per week for a semester. Rather, the student is expected to work in a continuous manner throughout the semester.

BINF5003

Bioinformatics Research Project B

Credit points: 6  Teacher/Coordinator: Dr Jeremiin  Session: Semester 1, Semester 2

Classes: meetings by arrangement with the supervisor

Corequisites: BINF5002, BIOL5001, BIOL5002, MGMT5201 and STAT5001

Assessment: project plan, seminar, final report

Note: Department permission required for enrolment.

BINF5003 comprises the continuation of a research project commenced in BINF5002 on a topic with significant emphasis on the use of bioinformatics tools to address important questions in the areas of biology, biochemistry, mathematics and statistics, computer science, crop and veterinary sciences, and medical science. Students will be working with an appointed supervisor from the Faculties of Agriculture, Science, Veterinary Science, and Medicine or from industry under the guidelines of the convenor. The research project will be in an area agreed by the student, the supervisor and the convenor. Research experience is highly valued by prospective employers as it shows a willingness and ability to undertake independent, as well as guided, research in bioinformatics. The project is not conducted in the way of contact hours per week for a semester. Rather, the student is expected to work in a continuous manner throughout the semester.

For stream A students only (Information Technology Background)

BIOL5001

Molecular Genetics and Inheritance

Credit points: 6  Teacher/Coordinator: Dr Jenny Saleeba  Session: Semester 1

Classes: 2–3 tutorials per week.  Assessment: Formal exam, quizzes

Note: Department permission required for enrolment.

The fundamentals of inheritance and applications of molecular genetics will be covered. At the completion of the Unit, students will be able to recognise the most common modes of inheritance, understand the fundamentals of linkage analysis, be familiar with common genome structures, be familiar with modes of transmission and mechanisms of change in genetic material, be familiar with the genetic mechanisms behind complex biological systems, understand basic methods in recombinant DNA technology, be adept at applying genetics to solving problems in biology and understand the fundamentals of quantitative and population genetics.
Biol5002
Bioinformatics: Sequences and Genomes
Credit points: 6 Teacher/Coordinator: Dr Neville Firth Session: Semester 2 Classes: 1 lecture or tutorial per week, 1 three hour practical per fortnight.
Note: Department permission required for enrolment.
Note: Stream B students do not require BIOL5001
Bioinformatics - the application of computers to life sciences, and genomics - the study of biology at the genome-wide scale, are revolutionising basic and applied biological sciences in the 21st century. The unit focuses on the application of bioinformatics to the storage, retrieval and analysis of biological information, principally in the form of nucleotide and amino acid sequences. An extensive practical component emphasises the development of hands-on skills in the use of bioinformatics technologies. Students will gain an appreciation of the significance and potential of bioinformatics and genomics in contemporary life sciences; an awareness of the breadth of bioinformatics resources and applications, including non-sequence-based biological information; skills and experience in the use of a core set of programs and databases for nucleotide and amino acid sequence analysis and phylogenetic reconstruction; a basic understanding of the theoretical foundation and underlying assumptions of the programs, and their relative strengths/limitations; and, competence in the evaluation of output from the programs in appropriate biological context.

For stream A and stream B students

Comp5028
Object-Oriented Analysis and Design
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.
This unit introduces Object-Oriented Analysis and Design especially the principles of modelling through Rational Unified Process and agile processes using Unified Modeling Language (UML), both of which are industry standard. Students work in small groups to experience the process of object-oriented analysis, architectural design, object-oriented design, implementation and testing by building a real-world application. Objectives: In this unit students will develop the ability to: identify how the system interacts with its environment; identify appropriate objects and their attributes and methods; identify the relationships between objects; write the interfaces of each object and exception handling; implement and test the objects; read and write various UML diagrams (use case, activity, class, object, sequence, collaboration, state chart, component and deployment diagrams).

Comp5206
Introduction to Information Systems
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: INFO5210 Assessment: Assignments, written exam
This unit provides an introduction to information systems in organisations and the role of database management. It introduces the fundamentals of database management, along with the modeling and analysis that is needed for designing and implementing database solutions. The unit also introduces a database query language. Objectives: On completion of this unit students will be able to develop an understanding of the role of information systems in organisations, and the value of data and information to organisations. Students will also develop skills in creating database solutions, capturing user requirements, and building process and data models.

Comp5211
Algorithms
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lectures and one 1 hour tutorial per week. Assessment: Assignments, written exam.
The study of algorithms is a fundamental aspect of computing. This unit of study covers data structures, algorithms, and gives an overview of the main ways of thinking used in IT from simple list manipulation and data format conversion, up to shortest paths and cycle detection in graphs. The objective of the unit is to teach basic concepts in data structure, algorithm, dynamic programming and program analysis. Students will gain essential knowledge in computer science.

Comp5213
Computer and Network Organisation
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.
This unit of study provides an overview of hardware and system software infrastructure including: compilers, operating systems, device drivers, network protocols, etc. It also includes user-level Unix skills and network usability. The objectives are to ensure that on completion of this unit students will have developed an understanding of compilers, operating systems, device drivers, network protocols, Unix skills and network usability.

Comp5214
Software Development in Java
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.
This unit of study introduces software development methods, where the main emphasis is on careful adherence to a process. It includes design methodology, quality assurance, group work, version control, and documentation. It will suit students who do not come from a programming background, but who want to learn the basics of computer software. Objectives: This unit of study covers systems analysis, a design methodology, quality assurance, group collaboration, version control, software delivery and system documentation.

Comp5318
Knowledge, Discovery and Data Mining
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.
Knowledge discovery is the process of extracting useful knowledge from data. Data mining is a discipline within knowledge discovery that seeks to facilitate the exploration and analysis of large quantities of data, by automatic or semi-automatic means. This subject provides a practical and technical introduction to knowledge discovery and data mining. Objectives: Topics to be covered include problems of data analysis in databases, discovering patterns in the data, and knowledge interpretation, extraction and visualisation. Also covered are analysis, comparison and usage of various types of machine learning techniques and statistical techniques: clustering, classification, prediction, estimation, affinity grouping, description and scientific visualisation.

Comp5426
Network Based High Performance Computing
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5138 Distributed Systems Programming Assessment: Assignments, written exam.
This unit is intended to introduce and motivate the study of high performance computer systems. The student will be presented with the foundational concepts pertaining to the different types and classes of high performance computers. The student will be exposed to the description of the technological context of current high performance computer systems. Students will gain skills in evaluating, experimenting with, and optimizing the performance of high performance computers. The unit also provides students with the ability to undertake more advanced topics and courses on high performance computing.
Image Analysis
Credit points: 6 Teacher/Coordinator: Dr Allan S. Jones Session: Semester 1, Semester 2 Classes: 10 one hour lectures, 10 two hour practicals over a one week period. Assessment: Eight practical reports (50%), 1 three part mathematical assignment (20%), 1 in-depth assignment of 2500 word length on a relevant topic (30%).

This unit of study covers the nature and processing of images and the extraction of quantitative data from them. Participants will develop a sound working knowledge of both traditional stereochemistry techniques and modern digital image processing and analysis. Emphasis is placed on an understanding of both the strengths and the limitations that are inherent in image data, and the technology applied to it. Topics in this module include: a general review of image acquisition, filters and transforms, segmentation methods, calibration of hardware for analysis, extraction of simple features from images, advanced feature extraction from images, limitations of measurement and a general overview of stereology, including geometric probability, density estimation and sampling.

MOBT5201
Applied Molecular Biotech A (Theory)
Credit points: 6 Teacher/Coordinator: Dr Kevin Downard Dr Neville Firth Prof Tony Weiss Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: BINF5003, BCHM5001, MOBT5101 Assessment: 1 x two hour theory exam (70%) and in semester assessments (30%).

This unit of study comprises the lecture component of MOBT5101.

STAT5001
Applied Statistics for Bioinformatics
Credit points: 6 Session: Semester 1 Classes: one three hour seminar per week Assessment: computer exam and lab reports

This is an introduction to statistics and data analysis used in Bioinformatics and many other areas of Biology. It aims to give an understanding of the concepts and the use of a major scientific statistical package, R. In addition to an introduction to ideas of analysis of data and statistical tests the unit will introduce ideas of simulation in resampling and the methods of clustering and classification of particular importance in Bioinformatics.

Resolutions
Graduate Certificate in Applied Science (Bioinformatics)
Graduate Diploma in Applied Science (Bioinformatics)
Master of Applied Science (Bioinformatics)

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science:
1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1;
1.1.1.3 persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study;
1.1.2 the Graduate Diploma in Applied Science:
1.1.2.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.2.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1; or
1.1.2.3 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;
1.1.3 the Master of Applied Science:
1.1.3.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.
1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. Units of study
2.1 The units of study for the Graduate Certificate in Applied Science (Bioinformatics), Graduate Diploma in Applied Science (Bioinformatics), and Master of Applied Science (Bioinformatics), are listed in subsection 4.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included under units of study description.

3. Requirements for the Graduate Certificate in Applied Science (Bioinformatics) (GradCertApplSc(Bioinf)); Graduate Diploma in Applied Science (Bioinformatics) (Grad Dip Appl Sc(Bioinf)); Master of Applied Science (Bioinformatics) (MApplSc(Bioinf))
3.1 Candidates for the Graduate Certificate in Applied Science (Bioinformatics) Stream A are required to complete satisfactorily four core units of study (BIO5001, BIO5002, MOB5021, STAT5001).
3.2 Candidates for the Graduate Certificate in Applied Science (Bioinformatics) Stream B are required to complete satisfactorily four core units of study (BIO5002, MOB5021, STAT5001, COMP5213).
3.3 Candidates for the Graduate Diploma in Applied Science (Bioinformatics) Stream A are required to complete satisfactorily four core units of study (BIO5001, BIO5002, MOB5021, STAT5001) and 12 credit points from optional units of study.
3.4 Candidates for the Graduate Diploma in Applied Science (Bioinformatics) Stream B are required to complete satisfactorily five core units of study (BIO5002, MOB5021, STAT5001, COMP5213, COMP5214) and 6 credit points from optional units of study.
3.5 Candidates for the Master of Applied Science (Bioinformatics) Stream A are required to complete satisfactorily four core units of study (BIO5001, BIO5002, MOB5021, STAT5001) and 24 credit points from optional units of study.
3.6 Candidates for the Master of Applied Science (Bioinformatics) Stream B are required to complete satisfactorily five core units of study (BIO5002, MOB5021, STAT5001, COMP5213, COMP5214) and 18 credit points from optional units of study.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Certificate in Applied Science (Bioinformatics), Graduate Diploma in Applied Science (Bioinformatics), and Master of Applied Science (Bioinformatics), are listed in the following table.

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account: availability of resources including space, laboratory and computing facilities; and availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and select, in preference, applicants who are most meritorious in terms of sub-section 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend enrolment shall be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after suspension

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science (Bioinformatics), the Graduate Diploma in Applied Science (Bioinformatics), and the Graduate Certificate in Applied Science (Bioinformatics), shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Bioinformatics) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science (Bioinformatics);

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Bioinformatics) and/or the Graduate Diploma in Applied Science (Bioinformatics) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Bioinformatics);

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Bioinformatics) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Bioinformatics) and/or the Graduate Diploma in Applied Science (Bioinformatics) and/or the Graduate Certificate in Applied Science (Bioinformatics) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Bioinformatics) and/or the Graduate Diploma in Applied Science (Bioinformatics) and/or the Graduate Certificate in Applied Science (Bioinformatics) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science (Bioinformatics) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science (Bioinformatics) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science (Bioinformatics) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science (Bioinformatics), Graduate Diploma in Applied Science (Bioinformatics) and Master of Applied Science (Bioinformatics) for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Bioinformatics) may transfer, within three years, to the Graduate Diploma in Applied Science (Bioinformatics) and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science (Bioinformatics).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Bioinformatics) may transfer, within three years, to the Master of Applied Science (Bioinformatics)
and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science.

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
19. Postgraduate courses: Bioinformatics
Course overview
The University of Sydney Institute of Marine Science in collaboration with the Department of Environment and Conservation, the NSW Coastal Council and Surf Life Saving Australia, has developed a new and innovative graduate program in Coastal Management. This program is the only one of its kind in Australia, and has been designed and will be taught by leading researchers and practitioners of coastal management.

It will be taught primarily in coastal locations in the Sydney region. It will draw on local coastal management systems, issues and problems as part of the program material. It will also make use of the 2003 NSW Coastal Policy and Coastal Management Manual to provide students with an in-depth understanding of all aspects of coastal management. The program will include units on coastal processes and systems, coastal zone policy and management, beach management and the application of geographical information systems (GIS) to the coastal zone.

The program is ideal for recent graduates who wish to extend their knowledge of coastal and beach management, and for coastal practitioners in local, state, federal and other agencies and in industry who require additional training and knowledge of coastal management policy and issues. The program will provide formal training and also enable students to undertake a supervised coastal management project. A key aspect of all Masters units will be a broad on-site exposure to coastal processes, systems, issues and real management problems in the greater Sydney region, and in some units in regional NSW.

Course outcomes
Upon completion of the graduate certificate graduates will possess a practical and theoretical background in a range of issues related to coastal management. This knowledge can be extended by completion of a graduate diploma, and further extended through course work and research projects as part of a master's program. 

Coastal Management units of study 2007
MARS001
Coastal Processes and Systems
Credit points: 6
Teacher/Coordinator: Professor Andrew Short
Session: Semester 1
Classes: Three days per week for 3 weeks, including lectures, tutorials and field trips.
Assessment: Essay, field trip report
Note: This is a compulsory unit for all levels of the Applied Science (Coastal Management) program

This unit of study will examine the major coastal processes and systems of relevance to coastal zone management. These will include nearshore, estuarine and aeolian processes. Systems investigated will include rocky coasts and cliffs; beaches, barriers and dunes; and estuaries and inlets. The interaction between these processes and systems that are of most relevance to coastal management will be highlighted. These will include coastal hazards such as beach erosion, dune migration, bluffs, retreat, coastal flooding, inlet closure, and anthropogenic impacts such as pollution, storm water and acid sulphate soils. The unit will be presented both in lectures and field excursions, the latter enabling each system to be examined first hand.

MARS006
Coral Reefs, Science and Management
Credit points: 6
Session: S2 Late Int
Classes: University base delivery: Prefield trip Tutorial (1 hr), On-line exercises (2 hr) Field based delivery: Lectures (11 x 1 hr), Seminars (4 x 1 hr), Tutorials - individual consultations to develop concepts in research (2 x 1 hr), Independent Research an Assessment: Written assignments, essay and project report; oral presentations, seminar and lecture participation.

Note: Department permission required for enrolment.

This unit provides an in-depth overview of the key biological and non-biological processes that make up coral reef ecosystems. There is a focus on the biogeographic, oceanographic and physiological processes underlying the integrity of global tropical reef systems. The Great Barrier Reef is used as a case study to explore emerging concepts on the influence of natural and anthropogenic processes on the integrity of global reef and lagoon systems. Learning activities will include a series of background lectures and research seminars and tutorials in the development of a major research project. A major aspect of this unit is an independent research project conducted under the supervision of the course instructors. The unit concludes with a series of oral presentations based on student research. Assessment tasks will consist of two essays and a research project report and presentation. The curriculum in this unit is based on current research and a course book will be provided. This is a field intensive course held at One Tree Island Research Station or Heron Island Research Station. The course is ex-Gladstone Queensland and students are expected to make their own way there. This unit will be run over 8 days and there will be an additional course fee for food and accommodation, expected to be $600.

MARS007
Coral Reefs, Energy and Climate Change
Credit points: 6
Session: S2 Late Int
Classes: University base delivery: One hour prefied trip tutorial, two hours of on-line exercises Field based delivery: Eleven 1 hour lectures, four 1 hour seminars, two 1 hour tutorials - individual consultations to develop concepts in research, forty hours o Assessment: Written assignments, essay and project report; oral presentations, seminar and lecture participation.

For the latest updates, visit Handbooks online.
http://www.usyd.edu.au/handbooks
This unit provides an in-depth understanding of the key geological, oceanographic, biological and economic factors affecting climate change, energy generation and needs with specific reference to the Great Barrier Reef. Computer prediction of worst and best case scenarios are used to develop management strategies and policy implications. Learning activities will include a series of background lectures and research seminars, and tutorials on the development of a major research project. A major aspect of this unit is an independent research project conducted under the supervision of the course instructors. The unit concludes with a series of oral presentations based on student research. Assessment tasks will consist of two essays and a research project report and presentation. The curriculum in this unit is based on current research and a course book will be provided. This is a field intensive course held at One Tree Island Research Station. The course is ex-Gladstone Queensland and students are expected to make their own way there. The unit will be run over 8 days and there will be an additional course fee for food and accommodation, expected to be $600.

**NTMP5005 Tropical Coastal Management**

**Credit points:** 6  
**Teacher/Coordinator:** Prof Andy Short  
**Session:** Semester 2  
**Classes:** Field school 80 hours intensive.  
**Corequisites:** MARS (5002 and 5003)  
**Prohibitions:** NTMP3005  
**Assessment:** Presentation, teamwork, assignment, 1 hr exam  
**Note:** Department permission required for enrolment.

This course examines the impacts of human activities on coastal and marine environments. It explores the complex relationships among the ecological and social values of these environments and outlines strategies and tools for their management. This is an intensive course that will be held at the University of Queensland Moreton Bay Research Station, North Stradbroke Island.  

Textbooks  
Nil. Handouts provided.

**GEOG5001 Geographic Information Science A**

**Credit points:** 6  
**Teacher/Coordinator:** Dr David Chapman  
**Session:** Semester 1, Semester 2  
**Classes:** Six workshops.  
**Assessment:** Report  

This unit of study gives an overview of basic spatial data models, and enables students to understand the import and export of data to and from a geographical information system (GIS). The manipulation of spatial data at a level appropriate to planning or locational applications, and the development of thematic maps from diverse data layers, will be addressed.

**GEOG5002 Geographic Information Science B**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Eleanor Bruce  
**Session:** Semester 2  
**Classes:** One 2 hour lectures, one 1 hour tutorial, one 3 hour practical per week for 6 weeks.  
**Assumed knowledge:** GEOG5001  
**Assessment:** 2500 word assignment, seminar presentation, tutorial reports, WebCT quiz.

This course will provide the conceptual background to more advanced GIS analysis applications and spatial reasoning methods in the context of contemporary environmental issues. The course is designed to provide an understanding of spatial analysis techniques available within a GIS environment, explore a diversity of both social and physical environmental applications and address emerging issues in GIS research. A range of topics will be introduced including field based capture of spatial information, spatial data structures, surface modelling, visibility analysis, hydrological modeling, network analysis, spatial data uncertainty and social GIS. Conceptual material presented in lectures and tutorial workshops will be placed in an applied context through a series of laboratory and field sessions designed to strengthen practical understanding and awareness of GIS methods.

**ENVI5708 Introduction to Environmental Chemistry**

**Credit points:** 6  
**Teacher/Coordinator:** A/Prof Gavin Birch  
**Session:** Semester 1  
**Classes:** Two 1 hour lectures and one practical per week; one field trip per semester.  
**Assessment:** Assignment, presentation and report  
**Note:** This is a compulsory course for the Grad Dip and Masters levels of the Applied Science (Environmental Science) program.

Introduction to Environmental Chemistry provides the basic chemical knowledge required to be able to understand chemical analysis of air, water and soil samples taken in the field. This is supplemented by a field-based project analysing soil and sediment samples for trace pollutants from locations in and around Sydney. This unit of study involves 4 contact hours per week for one semester as well as some time in the field as arranged with the class.

**ENVI5803 Law and the Environment**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Gerry Bates  
**Session:** Semester 1  
**Classes:** One 2 hour lectures per week.  
**Assessment:** Essays  

This unit of study provides an overview of Australian and international law as it pertains to the environment. It looks at a number of environmental issues at the various levels of analysis, policy making, implementation of policy and dispute resolution. It also provides a broad background to political and economic issues as they related to the legal issues. This unit of study involves lecture material and an essay on policy issues.

**ENVI5809 Computer Modelling & Resource Management**

**Credit points:** 6  
**Teacher/Coordinator:** Dr David Chapman  
**Session:** Semester 2  
**Classes:** Six workshops.  
**Assessment:** Report  

The concept and use of computer modelling in natural resource management is introduced in this unit of study, which is aimed particularly at non-programmers.

**ENVI5903 Sustainable Development**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Phil McManus  
**Session:** Semester 2  
**Classes:** Two 2 hour lectures per week for seven weeks.  
**Assessment:** Essay and presentation  

This unit of study demonstrates the history and contested understandings of the concept of sustainable development. It applies these concepts to explore important environmental science issues such as population, water management sustainable cities, rural development, industrial ecology, and energy issues. The unit concludes by presenting a range of future scenarios and encouraging students to develop their own vision of sustainability at the global and other scales, and to communicate their means of achieving this sustainability vision.

**ENVI5904 Understanding Environmental Uncertainty**

**Credit points:** 6  
**Teacher/Coordinator:** Associate Professor Ross Coleman  
**Session:** Semester 2  
**Classes:** One three hour lecture per week for 8 weeks.  
**Assessment:** Tutorials, oral presentations and written reports.

No assessment of potential environmental impacts is possible without relevant information about the ecological consequences. This unit is for those without a science degree, to explain the need to quantify and what are relevant measures. Describing and understanding uncertainty will be explained in the context of precautionary principles. Issues about measuring biodiversity and the spatial and temporal problems of ecological systems will be introduced.

**ENVI5905 Management of Parks**

**Credit points:** 6  
**Teacher/Coordinator:** A/Prof Deirdre Dragovich  
**Session:** Semester 2a  
**Classes:** Lectures 2hrs for 6 weeks, Practical work 3 hrs for 3 wks, Fieldwork 21 hrs (2.5 days).  
**Total / week 7 hrs average**  
**Assessment:** A prac report, assignment, one 1hr exam.
This unit of study evaluates the reasons for the existence of parks, including National Parks, recreational spaces and reserves, and examines the applied aspects of their management. Topics covered include conservation, ecotourism, plans of management and their implementation (with particular emphasis on the remediation of the impacts of visitor numbers and erosion), fire control practices and resource management. Students will visit various parks within the Sydney region (such as the Royal National Park, the Sydney Harbour Foreshore, Jenolan Caves Reserve and Centennial Park) that highlight the different issues introduced in lectures and which illustrate the practical measures undertaken to manage the parks in a sustainable fashion. Textbooks A Course Handbook will be provided.

Resolutions

Graduate Certificate in Applied Science (Coastal Management)

Graduate Diploma in Applied Science (Coastal Management)

Master of Applied Science (Coastal Management)

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for:

1.1.1 the Graduate Certificate in Applied Science (Coastal Management):
- graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
- graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or
- persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study;

1.1.2 the Graduate Diploma in Applied Science (Coastal Management):
- graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
- graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1; or
- persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;

1.1.3 the Master of Applied Science (Coastal Management):
- graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
- graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
- persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.

1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. Units of study

2.1 The units of study for the Graduate Certificate in Applied Science (Coastal Management), Graduate Diploma in Applied Science (Coastal Management), and Master of Applied Science (Coastal Management), are listed in the following table.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included under unit of study descriptions.

3. Requirements for the Graduate Certificate in Applied Science (Coastal Management) (GradCertApplSc(Coastal Mgt)); Graduate Diploma in Applied Science (Coastal Management) (GradDiplApplSc(Coastal Mgt)); Master of Applied Science (Coastal Management) (MAPplSc(Coastal Mgt))

3.1 Candidates for the Graduate Certificate in Applied Science (Coastal Management) are required to complete satisfactorily 24 credit points of study including MARS5001 and GEOG5001; a minimum of 6cp from GEOG5002, MARS5005 and ENVI5708; and a maximum of 6cp from other units of study listed in the table in subsection 4.1, excluding MARS5005.

3.2 Candidates for the Graduate Diploma in Applied Science (Coastal Management) are required to complete satisfactorily 36 credit points of study including MARS5001 and GEOG5001; a minimum of 8cp from GEOG5002, MARS5006, NTMP5005 and ENVI5708; and a maximum of 18cp from other units of study listed in the table in subsection 4.1, excluding MARS5005.

3.3 Candidates for the Master of Applied Science (Coastal Management) are required to complete satisfactorily 48 credit points of study including MARS5001 and GEOG5001; a minimum of 12cp from GEOG5002, MARS5006, NTMP5005 and ENVI5708; and a maximum of 18cp from other units of study listed in the table in subsection 4.1, including MARS5005.

[Section 2]

4. Details of units of study

4.1 The units of study for the Graduate Certificate in Applied Science (Coastal Management), Graduate Diploma in Applied Science (Coastal Management), and Master of Applied Science (Coastal Management), are listed in the following table.

</table>
4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of sub-section 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science (Coastal Management), the Graduate Diploma in Applied Science (Coastal Management), and the Graduate Certificate in Applied Science (Coastal Management), shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Coastal Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Diploma in Applied Science (Coastal Management);

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Coastal Management) and/or the Graduate Diploma in Applied Science (Coastal Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Certificate in Applied Science (Coastal Management);

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Coastal Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Coastal Management) and/or the Graduate Diploma in Applied Science (Coastal Management) and/or the Graduate Certificate in Applied Science (Coastal Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Coastal Management) and/or the Graduate Diploma in Applied Science (Coastal Management) and/or the Graduate Certificate in Applied Science (Coastal Management) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science (Coastal Management) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science (Coastal Management) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science (Coastal Management) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science (Coastal Management), Graduate Diploma in Applied Science (Coastal Management) and/or the Graduate Certificate in Applied Science (Coastal Management) for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Coastal Management) may transfer, within three years, to the Graduate Diploma in Applied Science (Coastal Management) and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science (Coastal Management).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Coastal Management) may transfer, within three years, to the Master of Applied Science (Coastal Management) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Coastal Management).

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
21. Postgraduate coursework: Environmental Science degrees

This chapter sets out the requirements for postgraduate degrees offered in the Faculty of Science in the area of Environmental Science. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Further information can be found on the Environmental Science website: www.usyd.edu.au/envisci

Master of Environmental Science and Law

Course overview
The Master of Environmental Science and Law program is a novel concept of undertaking dual courses in the fields of both Science and Law. The program is unique and is not available elsewhere. It provides science graduates with the opportunity of extending their scientific knowledge into the area of the environment, as well as acquiring new skills in the field of environmental law. For law graduates, the opportunity is to extend their knowledge into environmental aspects of law, as well as to gain an understanding of some of the concepts underpinning environmental science.

Course outcomes
Upon completion of the Master of Environmental Science and Law graduates will possess a practical and theoretical background in aspects of Environmental Science and Environmental Law. This knowledge includes research and practical skills in these areas. The program is designed to integrate disciplines which are normally considered separately and which would be difficult to study outside of the master’s in Environmental Science and Law program.

Units of study
The table lists the units of study available with this degree. Other units are possible with the permission of the Director of Environmental Science. For LAWS units descriptions, see below. For other descriptions please see the entries in this chapter under Applied Science (Environmental Science).

Note: Law units of study are taught in intensive mode. Units offered change from time to time. Contact the Faculty of Law for a complete.

Unit of study descriptions
Environmental units of study descriptions can be found with the Environmental Science Applied Science degrees later in this chapter

Credit points: 6 Teacher/Coordinator: Assoc Prof Rosemary Lyster Session: S1 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable. Prerequisites: LAWS6252 and LAWS6044 for MEL, GradDipEnvLaw and MEnvSciLaw candidates Assessment: 1x7000wd essay (80%) and class participation (20%)

This unit aims to explore the nature of environmental disputes and the means of resolving them. The means examined include judicial review, administrative appeals and public inquiries and non-adjudicative or consensual means such as mediation. Critical evaluation of the forms and limits of dispute resolution strategies, including appropriateness of each means in resolving different types of environmental disputes, will be explored. The unit involves the use of innovative teaching techniques: lectures will be alternated with small group workshops, mediation simulations, a public inquiry and a mock court-hearing. In addition to the lecturers, there are guest lecturers including (subject to availability) a Land and Environment Court judge, Commissioner of Inquiry, Senior Counsel and a trained mediator from the Land and Environment Court. Participation in the practical exercises is a compulsory condition of the unit.

LAWS6042 Environmental Economics

This unit of study is not available in 2007

Credit points: 6 Teacher/Coordinator: Professor Patricia Apps Corequisites: Candidates enrolled in the MEL, GradDipEnvLaw and MEnvSciLaw must undertake LAWS6044 Environmental Law and Policy; and LAWS6252 Legal Reasoning and the Common Law System (candidates who do not hold a legal
planning. The unit will critically evaluate the function and design of externalities, cost-benefit analysis, and economics of renewable and non-renewable resources, inter-generational equity, and uncertainty. Relevant Australian laws and initiatives, such as national, state, and local heritage, are studied to address the development of international environmental law in specific issue areas. The unit aims to weave them into a framework for the legal protection of world heritage and environmental justice.

**LAW6045 Environmental Planning Law**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Gerry Bates  
**Session:** S1 Late Int  
**Classes:** block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Corequisites:** LAWS6252 and LAWS6044 for MEL, GradDipEnvLaw and MEnvScLaw candidates  
**Assessment:** 1x4000wd essay (50%) and 1xproblem-based 2500wd assignment (50%)  
**Practical field work:** field trip  

This unit examines the legal and institutional structures in New South Wales for land-use regulation and the resolution of land-use conflicts. The focus is on environmental planning, development control, and environmental impact assessment under the Environmental Planning and Assessment Act 1979 (NSW) and cognate legislation. The unit provides an opportunity to explore contemporary urban issues, such as urban consolidation and infrastructure funding. Federal interest in the cities is also examined. While an important aim of the unit is to provide candidates with an understanding of the New South Wales environmental planning system, the unit also aims to develop the capacity to evaluate environmental policies and programs through exploring theoretical perspectives on the function of environmental planning. The unit will critically evaluate the function and design of environmental planning systems and the legal ambit of planning discretion. Significant influences, such as escalating environmental and social concerns about our cities, will be discussed, together with an evaluation of processes and forums for public involvement in land-use policy and decision making. A good grounding in this area will be of assistance to candidates undertaking other units in the Environmental Law Program.

**LAW6055 Heritage Law**

**Credit points:** 6  
**Teacher/Coordinator:** Prof Ben Boer  
**Session:** S2 Late Int  
**Classes:** block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Corequisites:** LAWS6252 and LAWS6044 for MEL, MEnvScLaw and GradDipEnvLaw candidates  
**Assessment:** 1x4000wd research paper (50%) and 1xproblem assignment (50%)  
**Practical field work:** field trip  

This unit focuses on the conservation of natural and cultural heritage, including intangible heritage, underwater heritage and Australian Aboriginal heritage. International, national, state and local regimes for heritage conservation are looked at and put into the context of broader environmental decision making. The unit aims to bring together a range of interdisciplinary strands in archaeology, anthropology, cultural and natural history, art, architecture and urban planning, and to weave them into a framework for the legal protection of world, national, state and local heritage. An integral component of the unit is a field trip to areas of relevance to cultural and natural heritage conservation, focusing on northern New South Wales. Places to be studied include various towns and sites on the New South Wales State Heritage Register and on local government heritage lists, as well as habitats of threatened species and ecological communities and World Heritage areas listed under the relevant Commonwealth and State legislation. The field trip provides a unique opportunity to understand how principles of international and domestic law are implemented locally. The field trip component will be arranged in conjunction with the field trip for LAWS6165 Biodiversity Law. Candidates are encouraged to take both units of study; they are designed to complement each other closely.

**Textbooks**  
A book of reading materials and a field trip manual will be prepared and distributed.

**LAW6061 International Environmental Law**

**Credit points:** 6  
**Teacher/Coordinator:** Prof Ben Boer  
**Session:** S1 Late Int  
**Classes:** block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Corequisites:** LAWS6252 and LAWS6044 for MEL, GradDipEnvLaw and MEnvScLaw candidates (LAWS6167 and LAWS6243 for MIL and GradDipIntLaw candidates)  
**Assessment:** 1xproblem-based 2500wd assignment (30%) and 1x1550wd essay (70%)  

This unit aims to provide candidates with an overview of the development of international environmental law throughout the twentieth century. Attention will primarily be devoted to the international law and policy responses to global and regional environmental and resource management issues. Basic principles will be discussed prior to taking a sectoral approach in looking at the application of international environmental law in specific issue areas. The unit includes material on implementation of international environmental law in the Asia Pacific region. Relevant Australian laws and initiatives will be referred to from time to time. The focus is on law and policy that has been applied to deal with environmental problems in an international and transboundary context.

**LAW6081 Natural Resources Law**

**Credit points:** 6  
**Teacher/Coordinator:** Dr Gerry Bates  
**Session:** S1 Late Int  
**Classes:** block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Corequisites:** LAWS6252 and LAWS6044 for MEL, GradDipEnvLaw and MEnvScLaw candidates  
**Assessment:** 1xproblem-based 4000wd assignment (50%) and 1x4000wd essay (50%)  

This unit examines the conflicts over the use and conservation of natural resources and how they can be resolved through legal and other mechanisms. Commonwealth and State arrangements on topics such as forestry, mining, agriculture, soil and water use, national parks,
Aboriginal land rights, fisheries and tourism are selectively examined, drawing on the international context where necessary. The unit aims to familiarise students with debates over resource management and the role of various government sectors in these debates. The theme of ecologically sustainable development is explored throughout the unit, emphasizing the need to generate specific legal and other strategies to address the concerns of government, the private sector and conservation groups for each specific resource area.

**LAW6082 Pollution Law**

**Credit points:** 6  
**Teacher/Coordinator:** Ms Nicola Franklin (Co-ordinator), Dr Gerry Bates  
**Session:** S2 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Prerequisites:** LAW6522 or LAWS6881 for GradDipPubHL candidates and LAW6522 and LAWS6044 for MEL, GradDipEnvLaw and MEnvSciLaw candidates  
**Assessment:** 1x problem-based 4000wd assignment (50%) and 1x4000wd essay (50%)

This unit examines approaches to pollution prevention and control, with particular emphasis on regulation and enforcement. Compliance, deterrence and incentive strategies are evaluated, as is corporate environmental responsibility and accountability. The unit includes a study of environmental standards, permitting and land-use controls, administrative and civil enforcement, prosecution discretion and criminal and civil liability. Overarching themes are precaution and prevention, integrated pollution control, and community right to know and participate. The legislative and administrative framework that is studied is that of New South Wales, although comparisons are made with other jurisdictions. The federal dimension, including implementation of the Inter-governmental Agreement on the Environment, in particular Schedule 4, is discussed.

**LAW6154 Sustainable Development Law in China**

**Credit points:** 12  
**Teacher/Coordinator:** Ms Nicola Franklin (Co-ordinator), Prof Wang Xi  
**Session:** S1 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable. Classes will be held in Jiaotong University, Shanghai, China.  
**Prerequisites:** LAW6522 and LAWS6044 for MEL, GradDipEnvLaw and MEnvSciLaw candidates; Corequisites: LAW65167 and LAWS6523 for MIL and GradDipIntLaw candidates  
**Assessment:** 1x15000wd research paper (100%)  
**Note:** For further travel information, please contact Ms Nayantara Pothen at nayantara@law.usyd.edu.au or telephone 9351 0324.

This 12 credit point unit comprises an intensive series of lectures and field trips in Shanghai, People’s Republic of China, followed by supervised research. The location for lectures is Shanghai Jiaotong University. The unit is designed to - introduce the legal and institutional framework of environmental law and policy in China - encourage comparative and jurisprudential studies of Chinese environmental law and policy. The lectures and field trips are undertaken over a period of two weeks. The unit is taught principally by Chinese academics at Shanghai Jiaotong University. Candidates are given an introduction to Chinese law and the Chinese legal system before embarking on a study of Chinese environmental law. Field trips are included. It is likely that there will be a visit to the State Environment Protection Authority and to Huangshan, a World Heritage area.

**LAW6163 Energy Law**

**Credit points:** 6  
**Teacher/Coordinator:** Assoc Prof Rosemary Lyster  
**Session:** S2 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Prerequisites:** LAW6522 and LAWS6044 for MEL, GradDipEnvLaw and MEnvSciLaw candidates  
**Prohibitions:** LAW65886  
**Assessment:** class participation (20%) and 1x7000wd essay (80%)

This unit adopts an inter-disciplinary and integrative approach to understanding the dynamics of one of the most pressing global environmental concerns ecologically sustainable energy use. Working loosely within the framework of the Climate Change Convention, the unit relies on the perspectives of scientists, lawyers and economists to develop an integrated approach to sustainable energy use. The unit identifies current patterns of energy use in Australia and examines Australia’s response to the Climate Change Convention. It also analyses the strengths and weaknesses of various political, legal and economic mechanisms for influencing the choice of energy use. The initiatives of the Commonwealth and New South Wales governments, as well as local councils, to promote sustainable energy use and to combat global warming are scrutinised.

**LAW6191 Water Law**

**Credit points:** 6  
**Teacher/Coordinator:** Assoc Prof Rosemary Lyster  
**Session:** S2 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Prerequisites:** LAWS6252 and LAWS6044 for MEL, GradDipEnvLaw and MEnvSciLaw candidates  
**Assessment:** 1x7000wd essay (80%) and 1x class participation (20%)

This unit examines the ecologically sustainable management of water resources incorporating legal, scientific and economic perspectives. The legal analysis incorporates the following: international principles of water law; Commonwealth and state responsibilities for water management; the Water Management Act 2000 (NSW); the legal and constitutional implications of the reallocation of rights to use water; the implications of allocation and use for Indigenous people; the regulation of water pollution; and the corporatisation and privatisation of water utilities. Case studies from a number of jurisdictions are used to explore these themes. Economic perspectives include the impact of National Competition Policy on water law while the principles of sustainable water management are discussed within a scientific paradigm.

**LAW6252 Legal Reasoning & the Common Law System**

**Credit points:** 6  
**Teacher/Coordinator:** Assoc Prof Barbara McDonald and Assoc Prof Helen Irving (S1), Assoc Prof Barbara McDonald and Prof Reg Graycar (S6), Assoc Prof Barbara/McDonald and TBA (S5)  
**Session:** S1 Intensive, S2 Intensive, Semester 1 Classes; S6 and S5 block/intensive mode 4-5 days (9am-5pm) - see timetable and (S1) 1x2hr lec/wk. International candidates must attend the intensive session during Week 1 of their first semester of enrolment.  
**Assessment:** attendance and participation at workshops (30%) and assessment on case analysis, statutory interpretation and substantive legal principle (70%)

Note: Compulsory pre-requisite for health law, environmental law, MLLR, MALP, MRREHR, MEnvSciLaw, MIntBusL and MBL candidates undertaking tax units who do not have a qualification in accountancy or who have not completed a legal studies unit as part of a degree in business or commerce within a common law jurisdiction. This unit is also a pre-requisite for specified law units. Other candidates who do not have a law degree from a common law jurisdiction may seek permission to undertake this unit as an optional.

This is a compulsory unit for all postgraduate candidates who do not hold a degree in law entering the: - Master of Administrative Law and Policy - Master of Environmental Law - Master of Environmental Science and Law - Master of Health Law - Master of International Business Law and Business - Master of Labour Law and Relations as well as Graduate Diplomas offered in these programs. The unit has been designed to equip candidates with the necessary legal skills and legal knowledge to competently apply themselves in their chosen area of law. Instruction will cover the legislative process; the judiciary and specialist tribunals; precedent; court hierarchies; legal reasoning; constitutional law; administrative law; contracts; and torts. Some elements of the unit will be tailored in accordance with the requirements of the particular specialist programs.

**LAW6257 Public Policy**

**Credit points:** 6  
**Teacher/Coordinator:** Prof Patricia Apps  
**Session:** S2 Late Int Classes: block/intensive mode 4-5 days (9am-5pm). See timetable.  
**Prerequisites:** LAWS6522 for MALP, MEL, MEnvSciLaw and GradDipEnvLaw candidates and (LAWS6044 for MEL, MEnvSciLaw and GradDipEnvLaw candidates)  
**Prohibitions:** LAWS6139, LAWS6042, LAWS6113  
**Assessment:** 1x research essay (90%), 1x problem-based assignments and class presentation of a case study (10%)

Note: compulsory for MALP candidates

The aim of the unit is to provide an understanding of the role of government policy within the analytical framework of welfare economics. Questions of central interest include: - What are the conditions that justify government intervention? - How can policies be designed to support basic principles of social justice? - What kinds of reforms promote economic efficiency? Applications will range from
taxation and social security to environmental regulation and protection, and will cover the following specific topics: - The structure of the Australian tax-benefit system - Uncertainty and social insurance - Unemployment, health and retirement income insurance - Externalities, environmental taxes and tradeable permits - Monopoly and environmental regulation - Utility pricing and access problems - Cost benefit analysis, intergenerational equity and growth The unit will provide an overview of the main empirical methodologies used in evaluating policy reforms in these areas. Candidates may select to specialise in one or more of the policy areas.

Resolutions

Master of Environmental Science and Law

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature:

1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or Bachelor of Laws; or

1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.

2. Units of study

2.1 The units of study for the Master of Environmental Science and Law are listed in the Table associated with these resolutions.

3. Requirements for the Master of Environmental Science and Law

3.1 Candidates for the Master of Environmental Science and Law are required to complete satisfactorily 48 credit points selected from units of study approved by the Faculties of Science and Law including:

3.1.1 a core unit of study (LAWS6044);

3.1.2 LAWS6252 is compulsory for students who do not have a law background

3.1.3 a minimum of 24 credit points selected from units of study offered by each Faculty.

[Section 2]

4. Details of units of study

4.1 The units of study for the Master of Environmental Science and Law are listed in the following table (in accordance with requirements in subsection 3):

<table>
<thead>
<tr>
<th>Unit of study</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWS6045</td>
</tr>
<tr>
<td>LAWS6055</td>
</tr>
<tr>
<td>LAWS6061</td>
</tr>
<tr>
<td>LAWS6081</td>
</tr>
<tr>
<td>LAWS6082#</td>
</tr>
<tr>
<td>LAWS6154</td>
</tr>
<tr>
<td>LAWS6163</td>
</tr>
<tr>
<td>LAWS6165</td>
</tr>
<tr>
<td>LAWS6186</td>
</tr>
<tr>
<td>LAWS6191#</td>
</tr>
<tr>
<td>LAWS6257</td>
</tr>
</tbody>
</table>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 A candidate shall complete coursework to the value of 48 credit points.

4.7 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculties of Science and Law, or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time, or a part-time basis.

6. Cross-institutional study

6.1 Cross-institutional study shall not be available to students enrolled in the Master of Environmental Science and Law except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to the Master of Environmental Science and Law may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Science and Law shall be governed by the rule as follows:
11.1.2 A student who has failed a cumulative total of 12cp at any stage of enrolment in the Master of Science and Law will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be terminated and the student will not be permitted to re-enrol.

12. Time limit
12.1 A candidate for the Master of Environmental Science and Law shall complete the requirements for the award in a minimum of two semesters and a maximum of ten semesters, and except with permission of the Faculty, within six calendar years of admission to candidature.

13. Assessment policy
13.1 A candidate may be tested by written and oral examinations, assignments, exercises and practical work or any combination of these.
13.2 On completion of the requirements for the degree, the Dean shall determine the results of the candidature.

14. Credit transfer policy
14.1 A candidate who, before admission to candidature, has spent time in graduate study and, within the previous three years, has completed coursework considered by the Faculty to be equivalent to units of study prescribed for the degree, for which no award has been conferred, may receive credit of up to 12 credit points towards the requirements for the degree of Master of Environmental Science and Law.

15. Authority of the Deans
15.1 The Deans of Science and Law shall jointly exercise authority in any matter concerning the course not otherwise dealt with in these resolutions.

Environmental Science Applied Science degrees

Graduate Certificate in Applied Science (Environmental Science)

Graduate Diploma in Applied Science (Environmental Science)

Master of Applied Science (Environmental Science)

Further information can be found on the Environmental Science website: www.usyd.edu.au/envsci

Course overview
The Graduate Certificate in Applied Science (Environmental Science), Graduate Diploma in Applied Science (Environmental Science) and Master of Applied Science (Environmental Science) are articulated coursework programs that allow a large degree of flexibility in the depth at which studies are undertaken and the choice of subjects studied. Some of the major themes addressed include environmental sciences, environmental politics and law, project evaluation and assessment, decision making and conflict resolution.

Course outcomes
The articulated award program in Environmental Science is designed for both recent graduates wishing to obtain employment in the environmental field and for graduates already working in an environmental sphere who are interested in gaining either a formal qualification in environmental science or additional information about related areas of environmental science.

Environmental managers and scientists are increasingly finding that they need to have a broad interdisciplinary knowledge base and the ability to be flexible and innovative in their application of such knowledge. Thus the aim of this award program is to provide students with the ability to solve environmental problems that require the integration of knowledge from diverse disciplines. Emphasis is placed on studies which span several disciplines, adaptive problem solving, and the development of new skills and expertise.

Upon completion of the graduate certificate, graduates will possess a practical and theoretical background in some of the basic aspects of environmental science. This can be supplemented and extended upon completion of the graduate diploma, and extended further to include research and practical skills upon completion of the master's program. Students completing the full postgraduate program will have a solid grounding in all basic areas of environmental science, enabling them to understand the environmental problems that can arise and the disparate solutions that can be applied to solve such problems, and to comprehend all aspects of environmental assessment.

Units of study
Note for students enrolling in all Applied Science (Environmental Science)

Not all units of study may be available every semester. The Faculty may allow substitution of any unit of study by an approved unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

Applied Science (Environmental Science) units of study

Graduate Certificate

ENVI5705
Ecolog Principles for Environ Scientists

Credit points: 6
Teacher/Coordinator: Dr Charlotte Taylor
Session: Semester 1
Classes: One 3 hour lecture per week.
Assessment: Assignment, presentation.
Campus: Camperdown/Darlington
Mode of delivery: Normal (lecture/lab/tutorial)
Day
Note: This is a compulsory course for all levels of the Applied Science (Environmental Science) program.

This unit of study introduces fundamental concepts of modern ecology for environmental scientists so as to provide non-biologically trained persons an understanding of the nomenclature of ecology and the physical parameters represented.

ENVI5808
App Ecology for Environmental Scientists

Credit points: 6
Teacher/Coordinator: Dr Dieter Hochuli
Session: Semester 2
Classes: Three 1 hour lectures per week.
Assessment: Essay and presentation.
Campus: Camperdown/Darlington
Mode of delivery: Normal (lecture/lab/tutorial)
Day
Note: This is a compulsory unit for all levels of the Applied Science (Environmental Science) program.

This unit of study compliments ENVI5705, and covers in depth the concerns of modern ecology pertaining to both marine and terrestrial creatures. An understanding of the complex issue of biodiversity and impact of the Threatened Species Conservation Act is also provided.
Graduate Diploma and Master

ENVI5705
Ecolog Principles for Environ Scientists
Credit points: 6 Teacher/Coordinator: Dr Charlotte Taylor Session: Semester 1 Classes: One 3 hour lectures per week.
Assessment: Assignment, presentation. Campus: Normal (lecture/lab/tutorial) Day
Note: This is a compulsory course for all levels of the Applied Science (Environmental Science) program.

This unit of study introduces fundamental concepts of modern ecology for environmental scientists so as to provide non-biologically trained persons an understanding of the nomenclature of ecology and the physical parameters represented.

ENVI5708
Introduction to Environmental Chemistry
Credit points: 6 Teacher/Coordinator: A/Prof Gavin Birch Session: Semester 1 Classes: Two 1 hour lectures and one practical per week; one field trip per semester.
Assessment: Assignment, presentation and report. Campus: Normal (lecture/lab/tutorial) Day
Note: This is a compulsory course for the Grad Dip and Masters levels of the Applied Science (Environmental Science) program.

Introduction to Environmental Chemistry provides the basic chemical knowledge required to be able to understand chemical analysis of air, water and soil samples taken in the field. This is supplemented by a field-based project analysing soil and sediment samples for trace pollutants from locations in and around Sydney. This unit of study involves 4 contact hours per week for one semester as well as some time in the field as arranged with the class.

ENVI5808
App Ecology for Environmental Scientists
Credit points: 6 Teacher/Coordinator: Dr Dieter Hochuli Session: Semester 2 Classes: Three 1 hour lectures per week.
Assessment: Essay and presentation. Campus: Normal (lecture/lab/tutorial) Day
Note: This is a compulsory unit for all levels of the Applied Science (Environmental Science) program.

This unit of study compliments ENVI5705, and covers in depth the concerns of modern ecology pertaining to both marine and terrestrial creatures. An understanding of the complex issue of biodiversity and impact of the Threatened Species Conservation Act is also provided.

ENVI5904
Understanding Environmental Uncertainty
Credit points: 6 Teacher/Coordinator: Associate Professor Ross Coleman Session: Semester 2 Classes: One three hour lecture per week for 8 weeks.
Assessment: Tutorials, oral presentations and written reports. Campus: Normal (lecture/lab/tutorial) Day

No assessment of potential environmental impacts is possible without relevant information about the ecological consequences. This unit is for those without a science degree, to explain the need to quantify and what are relevant measures. Describing and understanding uncertainty will be explained in the context of precautionary principles. Issues about measuring biodiversity and the spatial and temporal problems of ecological systems will be introduced.

Optional units all degrees

ENVI5809
Computer Modelling & Resource Management

The concept and use of computer modelling in natural resource management is introduced in this unit of study, which is aimed particularly at non-programmers.

ENVI5707
Energy - Sources, Uses and Alternatives
Credit points: 6 Teacher/Coordinator: Dr Chris Dey Session: Semester 2 Classes: Two 1 hour lectures per week and three field trips per semester.
Assessment: Assignment, presentation and quiz. Campus: Normal (lecture/lab/tutorial) Day

Environmental impacts of energy generation and use are addressed in this unit of study. Major topics include discussion of the various energy sources, global energy resources, the economics associated with energy production, the politics and culture that surrounds energy use, and the alternative sources of solar thermal and photovoltaic energy and atmospheric systems. This unit of study includes several field trips to energy utilities and industry groups associated with alternate energy sources and generation.

ENVI5803
Law and the Environment
Credit points: 6 Teacher/Coordinator: Dr Gerry Bates Session: Semester 1 Classes: One 2 hour lectures per week. Assessment: Essays. Campus: Normal (lecture/lab/tutorial) Day

This unit of study provides an overview of Australian and international law as it pertains to the environment. It looks at a number of environmental issues at the various levels of analysis, policy making, implementation of policy and dispute resolution. It also provides a broad background to both political and economic issues as they relate to the legal issues. This unit of study involves lecture material and an essay on policy issues.

ENVI5903
Sustainable Development
Credit points: 6 Teacher/Coordinator: Dr Phil McManus Session: Semester 2 Classes: Two 2 hour lectures per week for seven weeks.
Assessment: Essay and presentation. Campus: Normal (lecture/lab/tutorial) Day

This unit of study demonstrates the history and contested understandings of the concept of sustainable development. It applies these concepts to explore important environmental science issues such as population, water management sustainable cities, rural development, industrial ecology, and energy issues. The unit concludes by presenting a range of future scenarios and encouraging students to develop their own vision of sustainability at the global and other scales, and to communicate their means of achieving this sustainability vision.
**ENVI5005**
The Urban Environment and Planning

Credit points: 6  
Session: Semester 1  
Classes: Eight lectures and eight 2 hour seminars per semester  
Assessment: Report and short research paper  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

The aim of this unit of study is to introduce the concepts and procedures which are relevant to the application of scientific analysis to the formulation of urban and regional development policy and strategies.

**ENVI5905**
Management of Parks

Credit points: 6  
Teacher/Coordinator: A/Prof Deirdre Dragovich  
Session: Semester 2  
Classes: Lectures 2hrs for 6 weeks, Practical work 3hrs for 3 wks, Fieldwork 21hrs (2.5 days), Total / week 7 hrs average  
Assessment: A prac report, assignment, one 1hr exam  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

This unit of study evaluates the reasons for the existence of parks, including National Parks, recreational spaces and reserves, and examines the applied aspects of their management. Topics covered include conservation, ecotourism, plans of management and their implementation (with particular emphasis on the remediation of the impacts of visitor numbers and erosion), fire control practices and resource management. Students will visit various parks within the Sydney region (such as the Royal National Park, the Sydney Harbour Foreshore, Jenolan Caves Reserve and Centennial Park) that highlight the different issues introduced in lectures and which illustrate the practical measures undertaken to manage the parks in a sustainable fashion.

Textbooks  
A Course Handbook will be provided.

**ENVI904**
Understanding Environmental Uncertainty

Credit points: 6  
Teacher/Coordinator: Associate Professor Ross Coleman  
Session: Semester 2  
Classes: One three hour lecture per week for 8 weeks  
Assessment: Tutorials, oral presentations and written reports.  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

No assessment of potential environmental impacts is possible without relevant information about the ecological consequences. This unit is for those without a science degree, to explain the need to quantify and what are relevant measures. Describing and understanding uncertainty will be explained in the context of precautionary principles. Issues about measuring biodiversity and the spatial and temporal problems of ecological systems will be introduced.

**GEOG5001**
Geographic Information Science A

Credit points: 6  
Teacher/Coordinator: Dr David Chapman  
Session: Semester 1, Semester 2  
Classes: Six workshops.  
Assessment: Report  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

This unit of study gives an overview of basic spatial data models, and enables students to understand the import and export of data to and from a geographical information system (GIS). The manipulation of spatial data at a level appropriate to planning or locational applications, and the development of thematic maps from diverse data layers, will be addressed.

**GEOG5002**
Geographic Information Science B

Credit points: 6  
Teacher/Coordinator: Dr Eleanor Bruce  
Session: Semester 2  
Classes: One 2 hour lectures, one 1 hour tutorial, one 3 hour practical per week for 6 weeks  
Assumed knowledge: GEOG5001  
Assessment: 2500 word assignment, seminar presentation, tutorial reports, WebCT quiz  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

This course will provide the conceptual background to more advanced GIS analysis applications and spatial reasoning methods in the context of contemporary environmental issues. The course is designed to provide an understanding of spatial analysis techniques available within a GIS environment, explore a diversity of both social and physical environmental applications and address emerging issues in GIS research. A range of topics will be introduced including field based capture of spatial information, spatial data structures, surface modelling, visibility analysis, hydrological modeling, network analysis, spatial data uncertainty and social GIS. Conceptual material presented in lectures and tutorial workshops will be placed in an applied context through a series of laboratory and field sessions designed to strengthen practical understanding and awareness of GIS methods.

**GEOG5004**
Environmental Mapping and Monitoring

Credit points: 6  
Teacher/Coordinator: Dr Peter Cowell  
Session: Semester 2  
Classes: 2 hours of lectures and one three hour practical per week  
Assessment: Assignments  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

The unit introduces methods associated with acquiring data in the field and examines issues associated with application of spatial data to environmental monitoring, terrain mapping and geocomputing. Students will learn both theoretically and practically how environmental data is collected using different remote sensing techniques, (pre)processing methods of integrating data in a GIS environment and the role of spatial data in understanding landscape processes and quantifying environmental change.

**MARS5001**
Coastal Processes and Systems

Credit points: 6  
Teacher/Coordinator: Professor Andrew Short  
Session: Semester 1  
Classes: Three days per week for 3 weeks, including lectures, tutorials and field trips  
Assessment: Essay, field trip report  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

Note: This is a compulsory unit for all levels of the Applied Science (Coastal Management) program

This unit of study will examine the major coastal processes and systems of relevance to coastal zone management. These will include nearshore, estuarine and aeolian processes. Systems investigated will include rocky coastal systems; beaches, barriers and dunes; and estuaries and inlets. The interaction between these processes and systems that are of most relevance to coastal management will be highlighted. These will include coastal hazards such as beach erosion, dune migration, bluff retreat, coastal flooding, inlet closure, and anthropogenic impacts such as pollution, storm water and acid sulphate soils. The unit will be presented both in lectures and field excursions, the latter enabling each system to be examined first hand.

**ENGG5601**
Greenhouse Gas Mitigation

Credit points: 6  
Teacher/Coordinator: Professor Ian Jones  
I.Jones@civil.usyd.edu.au  
Session: Semester 2  
Classes: 2 hour lecture each week on Monday afternoons. Tutorials on Friday mornings. Offered every year  
Assessment: Assignments and final examination  
Campus: Camperdown/Darlington  
Mode of delivery: Normal (lecture/lab/tutorial) Day

Note: Department permission required for enrolment  
Note: Unit Administration: Web CT

Graduate unit of study designed for environmental engineering students, either M.E.S. or Grad. Cert. of GHG Mitigation Keywords:Greenhouse science, energy efficiency, carbon sinks, climate change amelioration Objectives:To develop an understanding of the significance of carbon dioxide in climate; the role of increasing fossil fuel energy conversion efficiency; the international framework for carbon sinks; the size, cost, potential and nature of terrestrial and oceanic sinks of carbon; the amelioration of the impacts of climate change. Outcomes:Students will be able to make recommendations of the most cost effective approach to enterprises meeting carbon dioxide limits expected to be imposed as a result of the Kyoto Protocol.

Textbooks  

**WILD5001**
Australasian Wildlife: Introduction

Credit points: 6  
Session: S1  
Intensive Classes: Intensively taught unit, the remainder of the unit will involve personal study and project activity. See the
Wildlife Health and Population Management website for dates. **Assessment:** assessments for each unit may include practical work, field studies, student presentations and written reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Note:** Core

This unit of study provides an introduction to the wildlife of Australasia, an overview of the current status of that wildlife, and an understanding of both conservation problems and management solutions. Issues in wildlife management are exemplified using a broad range of vertebrate species occupying different environments. Emphasis is placed on providing students with a coordinated and interdisciplinary approach to wildlife health and management, and on developing expertise in recognising and solving a broad range of problems in field populations. The unit integrates lectures, practical work and supervised study, and offers students the opportunity to work through real-world wildlife conservation problems relevant to their individual backgrounds.

**WILD5002 Australasian Wildlife: Field Studies**

**Credit points:** 6 **Session:** S1 Intensive **Classes:** Intensively taught unit. See the Wildlife Health and Population Management website for dates. **Assessment:** Assessments for each unit may include practical work, field studies, student presentations and written reports. **Campus:** Camperdown/Darlington **Mode of delivery:** Normal (lecture/lab/tutorial) Day

**Note:** Core

This unit of study provides a first-hand introduction to the wildlife of Australasia, a practical overview of the present status of that wildlife, and an understanding of both conservation problems and management solutions. Issues in wildlife management are exemplified using sampling and diagnostic methods on a broad range of vertebrate species occupying different environments. The unit follows on from WILD5001 and provides practical experience via a five day field trip.

**WILD5007 Sustainable Wildlife Use and Stewardship**

**Credit points:** 6 **Teacher/Coordinator:** A/Prof Tony English **Session:** S2 Late Int **Classes:** A full-time week at the Camden campus (2 days) and at "Arthursleigh" farm (3 days). **Assessment:** The assessment of this unit occurs both in the full-time week and in individual written assignments done in the student's own time. The full-time week contributes 40% of the total mark through a number of individual and syndicate tasks, with presentations to the group. The remaining 60% comes from two written assignments of 3,000 words (20%) and 5,000 words (40%) respectively. **Campus:** Camperdown/Darlington **Mode of delivery:** Block Mode

The unit considers the potential for sustainable use of wildlife to contribute to the conservation of biodiversity and the economic well-being of local communities. There will be consideration of both consumptive and non-consumptive utilisation programs, using both Australian and international examples. Ethical and animal welfare issues will be considered in some detail. The Unit is taught in a full-time week at the Camden campus (2 days) and at "Arthursleigh" farm (3 days). There are lectures, tutorials and practical classes. A case study on the Australian kangaroo harvesting industry will provide an opportunity to examine all the factors that need to be taken into account - biological, socio-cultural, economic and animal welfare issues.

**Resolutions**

Graduate Certificate in Applied Science (Environmental Science)

Graduate Diploma in Applied Science (Environmental Science)

Master of Applied Science (Environmental Science)

[Section 1]

1. **Admission**

1.1 The Dean of the Faculty of Science may admit to candidature for:

1.1.1 the Graduate Certificate in Applied Science:

1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;

1.1.2.1 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or

1.1.3.1 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;

1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or

1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.

1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. **Units of study**

2.1 The units of study for the Graduate Certificate in Applied Science (Environmental Science), Graduate Diploma in Applied Science (Environmental Science), and Master of Applied Science (Environmental Science), are listed in subsection 4.1.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included under unit of study descriptions.

[Section 2]

3. **Requirements for Graduate Certificate in Applied Science (Environmental Science) (GradCertApplSc(EnvSc)); Graduate Diploma in Applied Science (Environmental Science) (GradDipApplSc(EnvSc)); Master of Applied Science (Environmental Science) (MAppSci(EnvSc))**

3.1 Candidates for the Graduate Certificate in Applied Science (Environmental Science) are required to satisfactorily complete 24 credit points of units of study including one of two core units of study (ENVI5705 or 5808) and 18 credit points from the optional units of study.

3.2 Candidates for the Graduate Diploma in Applied Science (Environmental Science) are required to satisfactorily complete three core units of study (ENVI5705 and ENVI5808 and either ENVI5708 or ENVI5904), and 18 credit points from optional units of study.

3.3 Candidates for the Master of Applied Science (Environmental Science) are required to satisfactorily complete three core units of study (ENVI5705 and ENVI5808 and either ENVI5708 or ENVI5904), and 30 credit points from optional units of study.

4. **Details of units of study**

4.1 The units of study for the Graduate Certificate in Applied Science (Environmental Science), Graduate Diploma in Applied Science (Environmental Science), and Master of Applied Science (Environmental Science), are listed in the following table.

<table>
<thead>
<tr>
<th>Unit of study</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unless otherwise indicated, all units are worth 6 credit points</td>
</tr>
<tr>
<td>MARS5001 Coastal Processes and Systems</td>
</tr>
</tbody>
</table>
11. Satisfactory progress
11.1 Candidates for the Master of Applied Science, the Graduate Diploma in Applied Science, and the Graduate Certificate in Applied Science, shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Diploma in Applied Science;

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science and/or the Graduate Diploma in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Certificate in Applied Science;

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science and/or the Graduate Diploma in Applied Science and/or the Graduate Certificate in Applied Science will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. Credit transfer policy
14.1 Credit is not available in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science may transfer, within three years, to the Graduate Diploma in Applied Science and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science.

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science may transfer, within three years, to the Master of Applied Science and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science.

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load
5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study
6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of section 2 above.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature
9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.
22. Postgraduate coursework: History and Philosophy of Science degrees

This chapter sets out the requirements for postgraduate degree offered in the Faculty of Science in the area of History and Philosophy of Science. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Graduate Certificate in Science (History and Philosophy of Science)

Course overview
The Graduate Certificate in Science (HPS) provides an introduction to the historical, philosophical, and sociological analysis of science. Candidates will be introduced to the main accounts of the nature of science and the methodologies underlying those interpretations.

Course outcomes
Upon completion of the graduate certificate candidates will understand the nature of the discipline of History and Philosophy of Science and will have acquired either basic research skills in history of science or basic skills in the sociological study of science or the basic skills of philosophical argument or some combination of the above, depending on their choice of options.

Units of study
- HPSC4101 Philosophy of Science
- HPSC4102 History of Science
- HPSC4103 Sociology of Science
- HPSC4104 Recent Topics in HPS
- HPSC4105 HPS Research Methods
- HPSC4108 Core Topics in HPS

Other information
The unit of study, HPSC4108 Core Topics in HPS, is not available to students who have completed a major in History and Philosophy of Science or equivalent program of study at another institution.

Course resolutions
See this chapter following unit of study descriptions.

History and Philosophy of science units available in 2007

HPSC4101 Philosophy of Science
Credit points: 6
Teacher/Coordinator: Dr Ofer Gal
Session: Semester 1
Classes: One 2 hour seminar per week, individual consultation.
Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission.
Assessment: Written assignments, seminar participation.
Note: Department permission required for enrolment.

The success of science in enabling us to manipulate the natural world has been so surprising, so often, that it has caused many individuals to revise a large part of their pre-scientific philosophical and religious consensus. Something very important is going on, and a number of fascinating philosophical topics emerge when we try to analyse what it is. Working backwards from the success of an epistemological enterprise offers a fruitful way to do philosophy, and, reciprocally, our philosophical insights help to clarify the contentious question of what it means to claim that science is successful. This unit investigates the relationships between scientific theories and evidence, and the relationships between scientific theories. Participants will have an opportunity to relate the successes and failures of specific sciences to contemporary philosophical debates. Each week the seminar will discuss a piece of philosophical theory in the light of examples from particular sciences. Technical topics will be covered, but very little background knowledge will be assumed.

Textbooks

HPSC4102 History of Science
Credit points: 6
Teacher/Coordinator: HPS Staff
Session: Semester 1, Semester 2
Classes: One 2 hour seminar per week.
Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission.
Assessment: Essays, seminar participation.
Note: Department permission required for enrolment.

This unit explores major episodes in the history of science as well as introducing students to historiographic methods. Special attention is paid to developing practical skills in the history and philosophy of science.

Textbooks
Course reader

HPSC4103 Sociology of Science
Credit points: 6
Teacher/Coordinator: Dr Hans Pols
Session: Semester 2
Classes: One 2 hour seminar per week, individual consultation.
Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission.
Assessment: Essays, fieldwork report, seminar participation mark.
Note: Department permission required for enrolment.

This unit explores recent approaches in the social studies of scientific knowledge. Students evaluate various sociological approaches by conducting their own research on topics relevant to their own major thesis. The unit starts with an overview of the development of history and philosophy of science since 1945, to put the emergence of the sociology of science into perspective, before moving on to a selection of readings from the field. Topics will include: the strong program critique of traditional philosophy of science, the sociology of technology, the impact of feminism on the study of science, and the actor-network approach developed by Bruno Latour and Michel Callon.

Textbooks
Course reader

HPSC4104 Recent Topics in HPS
Credit points: 6
Teacher/Coordinator: HPS Staff
Session: Semester 1, Semester 2
Classes: One 2 hour seminar per week, individual consultation.
Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission.
Assessment: Essays, seminar participation.
Note: Department permission required for enrolment.

An examination of one area of the contemporary literature in the history and philosophy of science. Special attention will be paid to development of research skills in the history and philosophy of science.

Textbooks

http://www.usyd.edu.au/handbooks

315
Adopting a seminar style, this unit provides students with an advanced knowledge of the skills necessarily to conduct their own original research in the sociology, history and philosophy of science. Participants will be given a weekly set of core readings, and specialists both from within the Unit and from outside will present their views on the topic in question. This presentation will form the basis for a discussion involving the students, the academic members of the Unit, and invited speakers. Topics will include: the use of case studies in the philosophy of science, how to conduct oral history projects, institutional history, and sociological methodology.

Textbooks
Course reader

HPSC4108
Core topics: History & Philosophy of Science
Credit points: 6
Teacher/Coordinator: HPS staff.
Session: Semester 1, Semester 2
Classes: One 2 hour seminar per week.
Prerequisites: Available only to students admitted to HPS Honours, Graduate Diploma in Science (History and Philosophy of Science) and Graduate Certificate in Science (History and Philosophy of Science), or by special permission.
Prohibitions: Not available to students who have completed a major in History and Philosophy of Science or an equivalent program of study at another institution.
Assessment: Essays, seminar presentations, seminar participation mark.
Note: Department permission required for enrolment.

An intensive reading course, supported by discussion seminars, in the main figures and events of the 'Scientific Revolution' of the 16th to 18th centuries, in the leading historiographic interpretations of the scientific revolution and in the use of episodes in the scientific revolution as evidence for the philosophies of science of Karl Popper, Imre Lakatos, Thomas Kuhn and contemporary authors.

Resolutions
Graduate Certificate in Science (History and Philosophy of Science)

Section 1

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for the Graduate Certificate in Science (History and Philosophy of Science) an applicant who is:

1.1.1 the holder of the degree of Bachelor of Science or Bachelor of Medical Science or Bachelor of Arts or Bachelor of Liberal Studies, or any other award of Bachelor of the University of Sydney; or

1.1.2 a graduate of another university or other appropriate institution who has qualifications equivalent to those specified in subsection 1.1.1.

2. Units of study

2.1 The units of study for the Graduate Certificate in Science are listed in the table in sub-section 4.1 of these resolutions.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the description of units of study.

3. Requirements for the Graduate Certificate in Science (History and Philosophy of Science)

3.1 A candidate shall complete course work to the value of 24 credit points selected from the following table associated with these resolutions, and including HPSC4108 (if they have not completed a major in History and Philosophy of Science, or equivalent program of study, at another institution).

Section 2

4. Details of units of study

4.1 The units of study for the Graduate Certificate in Science (History and Philosophy of Science) are listed in the table as follows:

<table>
<thead>
<tr>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, "to complete a unit of study" or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Certificate in Science (History and Philosophy of Science) except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to the Graduate Certificate in Science (History and Philosophy of Science), may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 The Dean may call upon any candidate to show cause why that candidature should not be terminated by reason of unsatisfactory progress towards completion of the Graduate Certificate in Science (History and Philosophy of Science).

11.2 If good cause has not been established, the student's candidature will be terminated.
12. **Time limit**
12.1 A candidate shall proceed as a full time student for a period of one semester or as a part time student for up to three semesters.

13. **Assessment policy**
13.1 A candidate may be tested by written and oral examinations, assignments, exercises and practical work or any combination of these.

13.2 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. **Credit transfer policy**
14.1 Credit is not available in the Graduate Certificate in Science (History and Philosophy of Science), except for postgraduate units of study which have been taken through the University of Sydney Unit for History and Philosophy of Science within the previous three years, and for which no award has been conferred.
22. Postgraduate coursework: History and Philosophy of Science degrees
23. Postgraduate coursework: Information Technology degrees

This chapter sets out the requirements for coursework postgraduate degrees offered by the School of Information Technologies. Following is a brief description of the degrees. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

Courses offered
The University of Sydney offers targeted postgraduate programs in IT to meet the demands of the IT industry.

For students who already have an IT background, there is the articulated program of the Graduate Certificate in Information Technology, the Graduate Diploma in Information Technology, and the degree of Master of Information Technology. These programs provide a core of knowledge in information technology, supplemented by a broad range of areas of options within areas of Computer Networks and the Internet, E-Business, Multimedia, Database Management and Administration, Software Engineering, Business Information Systems, and Computer Science.

For IT graduates, they provide an excellent opportunity for in-depth study of specialist areas, possibly leading to research, or a retraining opportunity for IT graduates wishing to extend the breadth of their expertise.

The University also recognises that there are many graduates from disciplines other than IT who seek a career change, either by moving into the IT industry or by enhancing their existing career with IT qualifications. The Graduate Diploma in Computing is specifically designed for graduates without an IT degree.

Graduate Diploma in Computing

Course overview
The Graduate Diploma in Computing is recognised as an industry relevant award, and it has been accredited by the Australian Computer Society (ACS) as an Associate Level course in information technology.

Relationship to other degrees
The combination of the Graduate Diploma in Computing followed by the Master of Information Technology provides an effective conversion program into the field of IT for graduates without an IT degree.

Course outcomes
Upon completion of the Graduate Diploma in Computing, graduates will possess a practical and theoretical background in some of the basic aspects of Information Technology. Graduates who satisfactorily complete the graduate diploma will also be eligible for admission to the Master of Information Technology and the Master of Information Technology Management. Satisfactory completion of the Graduate Diploma in Computing for purposes of entry into the Master of Information Technology and the Master of Information Technology Management require that a candidate has not failed more than 12 credit points of units of study in the Graduate Diploma in Computing.

Admission requirements
Applicants for the Graduate Diploma in Computing should hold a bachelor's degree in a discipline other than IT. The graduate diploma assumes significant numeracy skills such as those found in a Science or Engineering degree. Applicants holding a bachelor's degree in other areas who have completed relevant subjects with a mathematical foundation will also be eligible. Alternatively, applicants holding a bachelor's degree in any discipline and who have worked in Information Technology for more than five years are eligible. All applicants must have completed their bachelor's with credit average results or better.

Course requirements
A total of 48 credit points must be completed from the listed Computing units of study:

- 18 units of study must be completed before COMP5114 Digital Media Fundamentals can be taken;
- 18 credit points must be completed before COMP5028 Object Oriented Analysis and Design can be taken;
- 18 credit points must be completed before COMP5116 Internet Protocols can be taken;
- COMP5214 Software Development in Java and COMP5212 Software Construction cannot be taken in the same semester;
- COMP5212 Software Construction cannot be taken until at least 12 credit points of study, including COMP5214 Software Development in Java, have been completed.

Credit for previous study
Credit for previous study will not be granted in the Graduate Diploma in Computing. Units of study completed in the Graduate Diploma in Computing cannot be counted as units of study completed within any other postgraduate IT courses including the Graduate Certificate of Information Technology, Graduate Diploma of Information Technology, Master of Information Technology, Graduate Certificate of Information Technology Management, Graduate Diploma of Information Technology Management, or Master of Information Technology Management.

Units of study available in 2007
The units of study offered may change annually.

Computing units of study

COMP5211 Algorithms
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lectures and one 1 hour tutorial per week. Assessment: Assignments, written exam.

The study of algorithms is a fundamental aspect of computing. This unit of study covers data structures, algorithms, and gives an overview of the main ways of thinking used in IT from simple list manipulation and data format conversion, up to shortest paths and cycle detection in graphs. The objective of the unit are to teach basic concepts in data structure, algorithm, dynamic programming and program analysis. Students will gain essential knowledge in computer science.

COMP5213 Computer and Network Organisation
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit of study provides an overview of hardware and system software infrastructure including: compilers, operating systems, device drivers, network protocols, etc. It also includes user-level Unix skills and network usability. The objectives are to ensure that on completion of this unit students will have developed an understanding of compilers, operating systems, device drivers, network protocols, Unix skills and network usability.

COMP5214 Software Development in Java
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit of study introduces software development methods, where the main emphasis is on careful adherence to a process. It includes design methodology, quality assurance, group work, version control, and documentation. It will suit students who do not come from a programming background, but who want to learn the basics of computer software. Objectives: This unit of study covers systems analysis, a design methodology, quality assurance, group collaboration, version control, software delivery and system documentation.

COMP5206 Introduction to Information Systems
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: INFO5210  Assessment: Assignments, written exam

This unit provides an introduction to information systems in organisations and the role of database management. It introduces the fundamentals of database management, along with the modeling and analysis that is needed for designing and implementing database solutions. The unit also introduces a database query language. Objectives: On completion of this unit students will be able to develop an understanding of the role of information systems in organisations, and the value of data and information to organisations. Students will also develop skills in creating database solutions, capturing user requirements, and building process and data models.

COMP5212 Software Construction
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Prerequisites: Students cannot enrol until they have completed at least 12 cp of study in the Graduate Diploma in Computing, including COMP5214 Software Development in Java. Assessment: Assignments, written exam

This is a programming unit of study focusing on the C language, with emphasis on the individual producing code that works correctly. Topics include: the memory model, and errors associated with that (including pointers, malloc/free, sizeof, stack vs heap); coding simple dynamic data structures (linked lists, binary trees); debugging; threads, and errors associated with them; use of Unix tools for managing programming activities such as testing; learning from manual entries for standard library functions and Unix commands. Objectives: On completion of this unit students will have acquired programming skills and techniques applicable to the development of software used in areas such as networking, computer engineering, language translation, and operating systems.

COMP5114 Digital Media Fundamentals
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit provides an overview of processing digital media which include text, audio, pictorial data and video. It introduces various processing techniques and standards, and presents some applications. Objectives: The unit covers Multimedia Primer; Text Processing which includes text parsing, text summarization, text manipulation, text index and retrieval, and surrogate coding; Audio Data Processing which includes audio attribute, audio masking, MP3 audio, audio manipulation and audio segmentation; pictorial data processing which includes still image processing, multi-modal image processing and artificial image processing; video data processing which includes active image processing, video segmentation, motion analysis, moving object extraction, video representation and codification.

COMP5116 Internet Protocols
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written examination

In this unit students will develop the ability to gain in depth knowledge of the structure and algorithms used in the TCP/IP networking protocols that make up the foundation of the Internet. Furthermore, the unit will provide students with the architectural insight to being able to design and analyse protocols in the perspective of their intended use. Objectives: On completion of this unit students will develop an understanding on the layered model, the core protocols, the routing protocols, the link layer and the various tools for traffic and protocol analysis.

COMP5028 Object-Oriented Analysis and Design
Credit points: 6  Session: Semester 1, Semester 2  Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit introduces Object-Oriented Analysis and Design especially the principles of modelling through Rational Unified Process and agile processes using Unified Modeling Language (UML), both of which are industry standard. Students work in small groups to experience the process of object-oriented analysis, architectural design, object-oriented design, implementation and testing by building a real-world application. Objectives: In this unit students will develop the ability to: identify how the system interacts with its environment; identify appropriate objects and their attributes and methods; identify the relationships between objects; write the interfaces of each object and exception handling; implement and test the objects; read and write various UML diagrams (use case, activity, class, object, sequence, collaboration, state chart, component and deployment diagrams).
Degrees in Information Technology Management

Graduate Certificate in Information Technology Management
Graduate Diploma in Information Technology Management
Master of Information Technology Management

Course overview
The University of Sydney offers planned, targeted postgraduate programs in IT to meet the demands of the IT industry.

For technically-skilled graduates seeking career advancement in the ‘management ladder’ of IT organisations, the University offers a course known as the Master of Information Technology Management. In this course, a background in computing skills is assumed, but the emphasis is not on developing these technical skills. The focus of the Master of Information Technology Management is on a thorough and detailed understanding of the management of resources such as projects, people, knowledge, and technologies in the distinctive way needed within IT organisations. The Master of Information Technology Management is specifically designed for graduates who are currently moving along, or seeking to move along, a career path through managerial roles such as Project Manager, Program Manager, General Manager of Operations (GMO), Chief Information Officer (CIO), or Chief Technology Officer (CTO).

The Master of Information Technology Management provides a selection of postgraduate units of study covering a Core set of IT management topics. Students can also choose from a number of Elective topics to add depth or breadth to their studies. For students considering study leading to a research degree, the Master of Information Technology Management has a Research Path option that can be used to gain admission to an MSc by Research or a PhD.

The Master of Information Technology Management requires 1 year (2 semesters) of full-time study.

Note that for IT graduates seeking advanced technical studies, there is a separate articulated program of the Graduate Certificate in Information Technology, the Graduate Diploma in Information Technology, and the degree of Master of Information Technology. These programs provide an excellent opportunity for students to build upon their undergraduate IT studies and extend their technical knowledge in a wide range of IT specialisations.

Course outcomes
Upon completion of the Graduate Certificate, graduates will possess a practical and theoretical background in some of the basic aspects of Information Technology Management. This can be supplemented and extended upon completion of the graduate diploma, and extended further to include research and practical skills by completion of the master's program.

Upon completion of the Master of Information Technology Management, graduates will have a sound knowledge base in several contemporary topics within Information Technology Management. They may also have the opportunity of applying this knowledge to the execution of a small research project.

The Master of Information Technology Management is designed as an industry relevant award. It has been developed under the guidelines of the Australian Computer Society (ACS), and it has been accredited by the ACS as a Professional level course in information technology.

Admission requirements
Graduate certificate
Applicants for the Graduate Certificate in Information Technology Management should hold a bachelor's degree; or be able to offer evidence of recognised prior learning which is considered to demonstrate the knowledge and aptitude required to undertake this course.

Graduate diploma
Applicants for the Graduate Diploma in Information Technology Management should hold a bachelor’s degree; or have completed the Graduate Certificate in Information Technology Management at the University of Sydney with credit average results or above.

Master
All Information Technology Management degrees
For all applicants of the Graduate Certificate in Information Technology Management, Graduate Diploma in Information Technology Management, and Master of Information Technology Management the bachelor's degree does not have to be an Information Technology degree, but it should contain a significant amount of technical subjects related to computing, as typically found in an IT, Science, or Engineering degree. Applicants holding a bachelor's degree in other areas, such as Finance, Commerce, Health Sciences, and Social Sciences, who have completed relevant IT subjects will also be eligible for admission. Applicants holding a bachelor’s degree in any discipline and who have worked in Information Technology for more than five years are eligible for admission.

Course requirements
Graduate Certificate in Information Technology Management
- A total of 24 credit points must be completed;
- Credit points must be selected from Core units of study, excluding IT Research Project units of study;
- INFO5990 Professional Practice in IT must be completed as a Core unit of study.

Graduate Diploma in Information Technology Management:
- A total of 36 credit points must be completed;
- At least 30 credit points must come from Core units of study, excluding IT Research Project units of study;
- INFO5990 Professional Practice in IT must be completed as a Core unit of study;
- INFO5991 IT Professional Services must be completed as a Core unit of study;
- A maximum of 6 credit points of Elective units of study can be taken.

Master of Information Technology Management:
- A total of 48 credit points must be completed;
- At least 30 credit points must come from Core units of study;
- INFO5990 Professional Practice in IT must be completed as a Core unit of study;
- INFO5991 IT Professional Services must be completed as a Core unit of study;
- INFO5992 Understanding IT Innovations must be completed as a Core unit of study;
- A maximum of 18 credit points of Elective units of study can be taken;
- After completing 24 credit points of coursework, students who achieve Credit average results or above in their coursework may select 12 credit points of Information Technology Project units of study among their Core units;
- After completing 24 credit points of coursework, students who have Distinction average results or above may be eligible for the Research Path subject to the approval of the Head of the School of Information Technologies and the Dean;
• Students who pursue the Research Path must study INFO4990 Research Methods, and select 15 credit points from IT Research Project units of study among their Core units;
• Students who pursue the Research Path do not have to take INFO5991 IT Professional Services and INFO5992 Understanding IT Innovations as Core units of study.

Credit for previous study
Credit is not available in the Graduate Certificate in Information Technology Management, Graduate Diploma in Information Technology Management and Master of Information Technology Management except for postgraduate study which has been undertaken in postgraduate award courses in information technology at the University of Sydney within the previous three years and for which no award has been conferred. If an award has been conferred, credit for study in these award courses is limited to 12 credit points.

Units of study available in 2007
All INFS-coded units of study have the Core unit INFS6000 as assumed knowledge. Inclusion of a COMP-coded Project unit of study is subject to conditions identified in the Course Requirements. INFO6007 and INFS6014 are mutually exclusive, and students can take only one of these two units of study.

Core units of study
INFO5990
Professional Practice in IT
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This Unit of Study defines and explains the standards of knowledge of Information & Communication Technology (ICT) professionals. It covers the factors necessary for successful management of system development or enhancement projects, including managing the system life cycle, system performance evaluation, managing expectations of team members, cost effectiveness analysis, scheduling and change management. The unit also covers the issues related to the Organisational Behaviour, Interpersonal Communications, Ethics and Social implications as part of their involvement in professional practice.

INFO5991
IT Professional Services
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: INFO5990 Assessment: Assignments, written exam

This unit of study builds upon and extends the standard body of Information & Communication Technology (ICT) knowledge required by IT professionals. Specifically, it covers topics related to the management of key resources in IT organisations including: people, projects, knowledge, and processes. The delivery of this unit is driven by a critical examination of selected case studies that focus on topics such as organisational capability assessment, recruitment and organisational capability development, outsourcing strategies, and IT procurement.

INFO5992
Understanding IT Innovations
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 3 hour tutorial per week. Assumed knowledge: INFO5990 Assessment: Assignments

An essential skill for an IT manager is the ability to keep up-to-date with emerging technologies, and be able to evaluate the significance of these technologies to their organisation's business activities. This unit of study is based around a study of current technologies and the influence of these technologies on business strategies. On completion of this unit, students will be able to identify and analyse an emerging technology and write a detailed evaluation of the impact of this technology on existing business practices.

COMP5206
Introduction to Information Systems
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: INFO5210 Assessment: Assignments, written exam

This unit provides an introduction to information systems in organisations and the role of database management. It introduces the fundamentals of database management, along with the modeling and analysis that is needed for designing and implementing database solutions. The unit also introduces a database query language. Objectives: On completion of this unit students will be able to develop an understanding of the role of information systems in organisations, and the value of data and information to organisations. Students will also develop skills in creating database solutions, capturing user requirements, and building process and data models.

COMP5138
Relational Database Management Systems
Credit points: 6 Session: Semester 1, Semester 2, Summer Main Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: COMP5015 Assessment: Assignments, written exam

Assumed knowledge: INFO5010 Organisational Behaviour, Interpersonal Communications, Ethics and Social implications as part of their involvement in professional practice.

Organisational Change and Development
Semester 2
Session: Semester 1, Semester 2
Classes: One 2 hour lecture and one 1 hour tutorial per week.
Assumed knowledge: INFO5990
Assessment: Assignments, written exam

This unit of study builds upon and extends the standard body of Information & Communication Technology (ICT) knowledge required by IT professionals. Specifically, it covers topics related to the management of key resources in IT organisations including: people, projects, knowledge, and processes. The delivery of this unit is driven by a critical examination of selected case studies that focus on topics such as organisational capability assessment, recruitment and organisational capability development, outsourcing strategies, and IT procurement.

IT Professional Services
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: INFO5990 Assessment: Assignments, written exam

This unit of study builds upon and extends the standard body of Information & Communication Technology (ICT) knowledge required by IT professionals. Specifically, it covers topics related to the management of key resources in IT organisations including: people, projects, knowledge, and processes. The delivery of this unit is driven by a critical examination of selected case studies that focus on topics such as organisational capability assessment, recruitment and organisational capability development, outsourcing strategies, and IT procurement.

Understanding IT Innovations
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 3 hour tutorial per week. Assumed knowledge: INFO5990 Assessment: Assignments

An essential skill for an IT manager is the ability to keep up-to-date with emerging technologies, and be able to evaluate the significance of these technologies to their organisation's business activities. This unit of study is based around a study of current technologies and the influence of these technologies on business strategies. On completion of this unit, students will be able to identify and analyse an emerging technology and write a detailed evaluation of the impact of this technology on existing business practices.

Introduction to Information Systems
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: INFO5210 Assessment: Assignments, written exam

This unit provides an introduction to information systems in organisations and the role of database management. It introduces the fundamentals of database management, along with the modeling and analysis that is needed for designing and implementing database solutions. The unit also introduces a database query language. Objectives: On completion of this unit students will be able to develop an understanding of the role of information systems in organisations, and the value of data and information to organisations. Students will also develop skills in creating database solutions, capturing user requirements, and building process and data models.
This unit of study will provide a comprehensive conceptual and practical introduction to managing large relational databases. Relational and normalization theory will be emphasized along with a focus on relational query language (SQL). Objectives: In this unit students will develop the ability to: - Understand the foundations of database management; - Strengthen their theoretical knowledge of database systems in general and relational data model and systems in particular; - Create robust relational database designs; - Understand the theory and applications of relational query processing and optimization; - Study the critical issues in data and database administration; - Explore the key emerging topics in database management.

COMP5703 Information Technology Project
Credit points: 12 Session: Semester 1, Semester 2 Classes: Eight hours of practical work per week. Assessment: Report. Note: Department permission required for enrolment.
Specialist/Elective/Project

INFO6007 Project Management in IT
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Prohibitions: INF56014 IT Project Management Assumed knowledge: INF56000 or COMP5206 or INF5990 Assessment: Assignments, written exam.

This unit of study covers the factors necessary for successful management of system development or enhancement projects. Both technical and behavioural aspects of project management are discussed. Potential topics of interest could include managing the system life cycle, system and database integration issues, system performance evaluation, managing expectations of team members, cost effectiveness analysis, scheduling and change management.

ISYS4050 Knowledge Management Systems
Credit points: 6 Session: Semester 1 Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work. Assumed knowledge: Information systems concepts, database concepts Assessment: Practical assignments, written assignments, exam.

This unit will provide a comprehensive introduction to the emerging area of Knowledge Management (KM) from both technological and organisational perspectives. Topics include document repositories, ontologies and the semantic web, customer relationship management systems, communities of practice, and computer-supported cooperative work. Students will approach relevant research being done in the University of Sydney.

Core Research Path units of study

INFO4990 IT Research Methods
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 3 hour scheduled small-group class per week, plus 9 hours per week private work (including interaction with research supervisor). Assumed knowledge: Elementary statistics. Assessment: Written papers (critical evaluation of a research paper, literature survey, research plan, thesis structure) and oral presentation. Note: Department permission required for enrolment.

This unit forms a key foundation for the student's work on their IT-related research project within an Honours degree. It introduces the varied approaches to research common in different fields of IT, such as experimentation, simulation, prototyping/design, mathematical proof, surveys, and interpretive methods. The main focus is on understanding how research is done, and how it is evaluated. Key assessment tasks include writing a critical evaluation of a research paper from the literature, a survey of the literature within some topic, a research plan, and a presentation of a research plan. It is expected that the student would use their thesis research as the basis for this assessment, and use feedback provided in this unit to improve the work for inclusion in the final thesis.

COMP5702 IT Research Project A
Credit points: 12 Session: Semester 1, Semester 2 Classes: Eight hours of practical work per week. Assessment: Report. Note: Department permission required for enrolment.
Specialist/Elective/Project

COMP5704 IT Research Project B
Credit points: 6 Session: Semester 1, Semester 2 Classes: Four hours of practical work per week. Assessment: Report. Note: Department permission required for enrolment.
Specialist/Elective/Project

Elective units of study

COMP5213 Computer and Network Organisation
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit of study provides an overview of hardware and system software infrastructure including: compilers, operating systems, device drivers, network protocols, etc. It also includes user-level Unix skills and network usability. The objectives are to ensure that on completion of this unit students will have developed an understanding of compilers, operating systems, device drivers, network protocols, Unix skills and network usability.

COMP5114 Digital Media Fundamentals
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

This unit provides an overview of processing digital media which include text, audio, pictorial data and video. It introduces various processing techniques and standards, and presents some applications. Objectives: The unit covers Multimedia Primer; Text Processing which includes text parsing, text summarization, text manipulation, text index and retrieval, and surrogate coding; Audio Data Processing which includes audio attribute, audio masking, MP3 audio, audio manipulation and audio segmentation; pictorial data processing which includes still image processing, multi-modal image processing and artificial image processing; video data processing which includes active image processing, video segmentation, motion analysis, moving object extraction, video representation and codification.

COMP5116 Internet Protocols
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written examination.

In this unit students will develop the ability to gain in depth knowledge of the structure and algorithms used in the TCP/IP networking protocols that make up the foundation of the Internet. Furthermore, the unit will provide students with the architectural insight to being able to design and analyse protocols in the perspective of their intended use. Objectives: On completion of this unit students will develop an understanding on the layered model, the core protocols, the routing protocols, the link layer and the various tools for traffic and protocol analysis.

ECON6004 Regulating e-Business
Credit points: 6 Session: Semester 1 Classes: 3 hours which may include one or more of the following: lectures, seminars, tutorials, or workshops Assessment: Group participation, 1 group project, final exam.

The growth of e-business has been accompanied by calls for governments to act on behalf of existing businesses, workers,
consumers, and marginal groups. There are dangers from the threats from disruption by unauthorised or malicious intervention, from the harmful effects of global monopolies, from the possibilities for tax evasion, from the danger of invaded privacy, and from inappropriate, immoral, or illegal activity. Governments in the United States, Europe, Asia, and Australia have adopted very different approaches to these issues. Managers need to be aware of legal structures and commercial regulations as well as the development and delivery of e-business solutions, and their responses need to adjust to achieve their firm’s goals.

**INFS6000 Business Information Systems**

*This unit of study is not available in 2007*

**Credit points:** 6  
**Classes:** 3 hours per week

The objective is to help you understand (i) using data to meet organizational objectives and expected outcomes, (ii) the complex and changing information environment from the perspective of stakeholders, and (iii) the management issues associated with making effective use of the combined capabilities of technology and employee knowledge. These are explored with reference to enterprise-wide systems as well as small to medium systems in business and government. Understanding is fostered through presenting conceptual frameworks, analytical tools and research findings from over 30 years in business information systems. Four themes are referenced during the unit: data and data structures as a corporate resource; business processes within business cycles; ethics and socio-technical issues in BIS, and, information and knowledge for business intelligence and decisions by managers.

**INFS6001 BIS Management**

**Credit points:** 6  
**Session:** Semester 1, Semester 2, Summer Main  
**Classes:** Three hours per week  
**Assessment:** Group assignments; Mid-semester exam; Final exam  
**Note:** This unit of study may be offered in intensive mode

This unit introduces you to the organisational foundations of information systems and their emerging strategic role. You will develop an understanding of real-world systems and their relationship to organisations, management and business processes. The unit provides you with a solid understanding of the technology underlying information systems and how various information technologies work together to create infrastructure for electronic commerce and electronic business. You will explore the role of information systems in capturing and distributing organisational knowledge and in enhancing management decision making. Finally, you will have the opportunity to explore the special management challenges and opportunities created by the pervasiveness and power of information systems.

**INFS6002 BIS Strategy**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  
**Assessment:** Class participation, Examination, Individual assignments and Group projects

In this unit, you will explore current issues and theoretical concepts in information technology strategy and management. A key aim of the unit is to provide you with a detailed understanding of concepts, tools and methodologies that can be of assistance to organisations in their design, implementation and enactment of IT strategies and governance of value-adding IT resources. The focus will be on users and IT strategy and management in context rather than on more technical aspects. Your understanding will be enhanced through active participation in case studies, which are an essential element of the unit.

**INFS6004 BIS Change Management**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week

Many BIS implementations require organisational change, or are part of broader change initiatives, and this unit aims to equip you with the ability to operate as a change agent to lead and manage that process. You will be exposed to the factors that need to be considered to fully understand an organisation’s specific context and provided with the knowledge, methodologies and techniques to successfully manage the change related aspects of a BIS implementation within that context. Topics covered by this unit include the roles of change, approaches to change - including Strategic Change, Business Process Reengineering and Total Quality Management and managing the end-to-end change process - including overcoming organisational resistance.

**INFS6012 Business Process Integration**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000

This unit will provide you with an overview of integrated enterprise systems using packaged software solutions (via the SAP R/3 enterprise resource planning system). It offers practical experience in using the SAP R/3 system so as to familiarize you with all the modules and their functionality. You will learn how enterprise resource planning integrates functions within business and you will gain a thorough understanding of the information flows in procurement, production planning, production control, inventory control, sales and distribution, financial accounting and cost controlling.

**INFS6013 Risk Management and BIS Assurance**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000

This unit will introduce you to the concepts and practices relating to the protection and assurance of business information systems. Business information and information related systems are valuable assets to organisations and are of critical importance in meeting regulatory obligations. Therefore the risk of disruption, theft or destruction to information systems has business value and compliance implications. This unit provides you with the opportunity to investigate key concepts, strategies and methodologies that will assist you in identifying, analysing and evaluating potential risk areas and critical control needs throughout the information system lifecycle. Your knowledge will be expanded in a multi-level approach that examines tools and technologies for safeguarding business information resources, the key stakeholders and institutional arrangements for business information systems assurance. The theoretical and conceptual material covered in seminars is reinforced through problem based learning.

**INFS6014 BIS Project Management**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000

This unit will introduce you to the end to end project management lifecycle from project planning and initiation through implementation to benefits realisation. You will be exposed to both the technical and behavioural aspects of project management infrastructures, techniques and methodologies - including PMBOK, PRINCE2 and OPM3. You will be introduced to concepts and will critically analyse their application in specific project contexts. In addition you will learn how to use the standard project management tool Microsoft Project. Major topics covered in the unit include project plan development, execution and control along with consideration of the change management implications of the project for its host organisation.

**INFS6015 Business Process Management**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  
**Assumed knowledge:** INFS6012
This unit will introduce you to concepts of Business Process Management (BPM) and capabilities to discover, analyse, design, deploy and optimize end to end business processes. You will obtain a detailed understanding of strategies, methods, tools and technologies associated with BPM. You will also develop practical skills by modelling and re-designing business processes using commercial software. Business processes that stretch across organizational boundaries and the management of such processes are the central themes of this unit.

INFS6016
Technology Enabled Business Innovation
Credit points: 6  Session: Semester 2  Classes: Three hours per week
This unit will assist you to develop knowledge and skills in innovative, technology-enabled business models and strategies from a management perspective. It will enable you to better understand and apply the concepts, strategies, tools and technologies necessary for undertaking business innovation. From basic knowledge of business models and essential business processes this unit will increase your awareness and understanding of stakeholders, their capabilities and their limitations in the strategic convergence of technology and business. It will increase your insights into the technology and infrastructure required to support commerce in the 21st Century and will support development of your capabilities to analyse, develop and evaluate innovative technology-enabled business strategies and models.

INFS6017
Strategic Information & Knowledge Mgmt
Credit points: 6  Session: Winter Main  Classes: Three hours per week
Prerequisites: INFS5000 or INFS6000
In this unit you will be exposed to a sociotechnical change perspective to the study of information, content and knowledge management. The unit provides you with the opportunity to investigate the systems that enable the acquisition, storage and distribution of business and government information. The major emphasis is on the ways that organisations generate, communicate and leverage value from their information and knowledge assets. Different views of information such as “information as evidence” and “information as asset” will be presented, and you will explore the tensions arising from the interplay of these two views. Your knowledge will be expanded in a multi-level approach that examines digital information products, information users and institutional arrangements for information and knowledge management.

INFS6018
Business Intelligence Systems
Credit points: 6  Session: Semester 1  Classes: Three hours per week
Prerequisites: INFS5000 or INFS6000  Assumed knowledge: INFS6017
One of the key business challenges for any organisation today, is to convert large volumes of data, coming from various internal and external sources, into relevant information and then into actionable business intelligence. This applies equally to small as well as large companies, traditional and online business. Business intelligence solutions are widely used in customer relationship management, human resources, financial analysis, supply chain management, sales and marketing campaigns, manufacturing etc. This unit introduces fundamental BI concepts including datawarehousing and data mining multidimensional modelling and enterprise data management. The main emphasis is placed on the enterprise context of business intelligence tools and methodologies and their use in decision making. The unit also examines how business intelligence relates to Business Performance Management, Business Processes Management, Knowledge Management and Change Management in an enterprise. A common commercial software platform will be used to demonstrate the role of systems in business intelligence.

WORK6003
People, Management and Technology
This unit of study is not available in 2007
Credit points: 6  Assessment: Continuous: Essays, case studies and/or exam
This unit analyses the interaction of technology, organisations and work and highlights the importance of the human element in managing technology. Design, acquisition and utilisation of technology are examined as distinct yet complimentary phases in the strategic management of technology. The unit also expands into strategic and macro level issues.

WORK6026
Organisational Change and Development
Credit points: 6  Session: Semester 1a  Classes: Two hours per week
Assessment: Continuous: Essay and exam
This unit seeks to develop diagnostic and prescriptive skills in relation to the management of organisational change while also encouraging the adoption of a critical perspective of the field. Part 1 (Organisational Change and the Nature of Organisations) introduces the fields of organisational change, explains its relevance to organisation performance and strategy and examines key change management models. Part 2 (Diagnosis and Intervention) examines the utility of key organisational change models and techniques and identifies factors that may impact on the effectiveness of the change management process. Part 3 (Key Areas of Intervention) analyses the application of organisational change practices and initiatives to a number of specific organisational issues.

Degrees in Information Technology

Graduate Certificate in Information Technology
Graduate Diploma in Information Technology
Master of Information Technology

Course overview
The University of Sydney offers planned, targeted postgraduate programs in IT to meet the demand of the IT industry. This articulated program includes the Graduate Certificate in Information Technology, the Graduate Diploma in Information Technology and the Master of Information Technology degree and is designed to provide a core of knowledge in information technology, supplemented by a broad range of options within areas of Computer Networks and the Internet, E-Business Technologies, Multimedia, Database Management and Administration, Software Engineering, Business Information Systems, etc. The combination of core units and electives provides an excellent retraining opportunity. Students will not only obtain breadth and depth in their knowledge of the IT industry but will also be able to choose from a selection of options which will allow them to focus on a specialisation in the broad span of the industry.

The Master of Information Technology requires 1 year (2 semesters) of full-time study. The degree is designed to teach you current developments in topics you have already studied as well as extend your knowledge in advanced computing subjects. The program consists of coursework and/or projects in your major area of interest.

During the first semester of attendance you have the opportunity to select from a number of Information Technology units of study. These cover topics in software engineering, database systems, multimedia,
computer networks, business information systems, telecommunications engineering, and computer engineering.

Also available is a selection of specialist units of study covering advanced topics within various areas. In addition you have the option to choose information technology projects to replace some specialist units in the second semester if the average mark of your units of study is credit or above. The project involves a substantial piece of programming using the knowledge gained during the course and may be related to your employment.

Course outcomes
Upon completion of the Graduate Certificate, graduates will possess a practical and theoretical background in some of the basic aspects of Information Technology. This can be supplemented and extended upon completion of the graduate diploma, and extended further to include research and practical skills by completion of the master’s program.

Upon completion of the Master of Information Technology graduates will have a sound knowledge base in several contemporary topics within information technology. They may also have the opportunity of applying this knowledge to the implementation of a useful system.

The Master of Information Technology is recognised as an industry relevant award, and it has been accredited by the Australian Computer Society (ACS) as a Professional Level course in information technology.

Admission requirements
Graduate certificate
Applicants for the Graduate Certificate in Information Technology should hold a bachelor’s degree with substantial study of a relevant field of Information Technology; or a Bachelor of Engineering, Software Engineering or Telecommunications Engineering; or be able to offer evidence of recognised prior learning which is considered to demonstrate the knowledge and aptitude required to undertake this course.

Graduate diploma
Applicants for the Graduate Diploma in Information Technology should hold a Bachelor’s degree with substantial study of a relevant field of Information Technology; or a Bachelor of Engineering with a major sequence of study in Computer Engineering, Software Engineering or Telecommunications Engineering; or have completed the Graduate Certificate in Information Technology at the University of Sydney with credit average results or above.

Master
Applicants for the Master of Information Technology should hold a Bachelor’s degree with credit average results in a major sequence in any aspect of Information Technology; or a Bachelor of Engineering with credit average results in a major sequence in Computer Engineering, Software Engineering or Telecommunications Engineering; or have completed the Graduate Diploma in Information Technology at the University of Sydney with credit average results or above; or have satisfactorily completed the Graduate Diploma in Computing at the University of Sydney. Satisfactory completion of the Graduate Diploma in Computing for purposes of entry into the Master of Information Technology requires that a candidate has not failed more than 12 credit points of units of study in the Graduate Diploma in Computing.

Course requirements
Graduate Certificate in Information Technology
• A total of 24 credit points must be completed;
• Credit points can be selected from Foundational and Specialist units of study, excluding IT project units of study.

Graduate Diploma in Information Technology
• A total of 36 credit points must be completed;
• A maximum of 24 credit points can be selected from Foundational units of study;
• At least 12 credit points should come from Specialist units of study, excluding IT project units of study.

Master of Information Technology
• A total of 48 credit points must be completed;
• A maximum of 24 credit points can be selected from Foundational units of study;
• At least 24 credit points should come from Specialist units of study or IT project units of study;
• Every student must complete a defined major in the Master of Information Technology, which requires them to complete at least 18 credit points of Core units in the designated major and INFO5990;
• After completing 24 credit points of course work, students who achieve Credit average results or above in their coursework may select 12 credit points of IT project units of study among their Specialist units;
• After completing 24 credit points of course work, students who have Distinction average results or above may be eligible for the Research path subject to the approval of the Head of the School of Information Technologies and the Dean;
• Students who pursue the Research path must study INFO4990 and select 18 credit points from IT research project units of study.

Credit for previous study
Credit is not available in the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology, and Master of Information Technology except for postgraduate study which has been undertaken in postgraduate award courses in information technology at the University of Sydney within the previous three years and for which no award has been conferred. If an award has been conferred, credit for study in these award courses is limited to 12 credit points. Students enrolled in either the GradCertIT, GradDiplIT, or MinTech are not permitted to transfer to the Master of Applied Information Technology course.

Course Resolutions
See end of this chapter.

### Units of study available in majors in 2007

The following majors are available in the Master of Information Technology. Majors are not defined for the Graduate Certificate or for the Graduate Diploma in Information Technology.
# Core units for Telecommunications Engineering major

To achieve a major in Telecommunications Engineering, a student must complete INFS5990 and 18 credit points of study units from this list. Students in the Research Path must complete INFS4990. All Specialist INFS-coded units of study have the Foundational INFS6000 as assumed knowledge. Inclusion of a COMP-coded Project unit of study in this major requires the permission of the School of IT and the Chair of the BIS Discipline. A maximum of 18 credit points of ELEC-coded units of study can be completed.

# Core units for Health Informatics major

To achieve a major in Health Informatics, a student must complete INFS5990 and 18 credit points of study units from this list, including HIMT5057. Students in the Research Path must complete INFS4990. HIMT5057 must be completed before HIMT5058 or HIMT5060 can be taken. Inclusion of a COMP-coded Project unit of study in this major requires the permission of the School of IT and the Chair of the BIS Discipline. A maximum of 18 credit points of HIMT-coded units of study can be completed.

# Core units for Financial Modelling major

The Financial Modelling major is not available in 2007.
Foundational units of study

**COMP5114**  
Digital Media Fundamentals  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 1 hour tutorial per week.  
Assessment: Assignments, written exam.

This unit provides an overview of processing digital media which include text, audio, pictorial data and video. It introduces various processing techniques and standards, and presents some applications. Objectives: The unit covers Multimedia Primer: Text Processing which includes text parsing, text summarization, text manipulation, text index and retrieval, and surrogate coding; Audio Data Processing which includes audio attribute, audio masking, MP3 audio, audio manipulation and audio segmentation; pictorial data processing which includes still image processing, multi-modal image processing and artificial image processing; video data processing which includes active image processing, video segmentation, motion analysis, moving object extraction, video representation and codification.

**COMP5116**  
Internet Protocols  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 1 hour tutorial per week.  
Assessment: Assignments, written examination.

In this unit students will develop the ability to gain in depth knowledge of the structure and algorithms used in the TCP/IP networking protocols that make up the foundation of the Internet. Furthermore, the unit will provide students with the architectural insight to being able to design and analyse protocols in the perspective of their intended use. Objectives: On completion of this unit students will develop an understanding on the layered model, the core protocols, the routing protocols, the link layer and the various tools for traffic and protocol analysis.

**COMP5138**  
Relational Database Management Systems  
Credit points: 6  
Session: Semester 1, Semester 2  
Classes: One 2 hour lecture and one 1 hour tutorial per week.  
Prohibitions: COMP5015  
Assessment: Assignments, written exam.

This unit of study will provide a comprehensive conceptual and practical introduction to managing large relational databases. Relational and normalization theory will be emphasized along with a focus on relational query language (SQL). Objectives: In this unit students will develop the ability to: - Understand the foundations of database management; - Strengthen their theoretical knowledge of database systems in general and relational data model and systems in particular; - Create robust relational database designs; - Understand the theory and applications of relational query processing and optimization; - Study the critical issues in data and database administration; - Explore the key emerging topics in database management.

**COMP5028**  
Object-Oriented Analysis and Design  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 1 hour tutorial per week.  
Assessment: Assignments, written exam.

This unit introduces Object-Oriented Analysis and Design especially the principles of modelling through Rational Unified Process and agile processes using Unified Modeling Language (UML), both of which are industry standard. Students work in small groups to experience the process of object-oriented analysis, architectural design, object-oriented design, implementation and testing by building a real-world application. Objectives: In this unit students will develop the ability to: identify how the system interacts with its environment; identify appropriate objects and their attributes and methods; identify the relationships between objects; write the interfaces of each object and exception handling; implement and test the objects; read and write various UML diagrams (use case, activity, class, object, sequence, collaboration, state chart, component and deployment diagrams).

**INF56000**  
Business Information Systems  
This unit of study is not available in 2007  
Credit points: 6  
Classes: 3 hours per week

The objective is to help you understand (i) using data to meet organizational objectives and expected outcomes, ii) the complex and changing information environment from the perspective of stakeholders, and (iii) the management issues associated with making effective use of the combined capabilities of technology and employee knowledge. These are explored with reference to enterprise-wide systems as well as small to medium systems in business and government. Understanding is fostered through presenting conceptual frameworks, analytical tools and research findings from over 30 years in business information systems. Four themes are referenced during the unit: data and data structures as a corporate resource; core business processes within business cycles; ethics and socio-technical issues in BIS, and, information and knowledge for business intelligence and decisions by managers.

**COMP4045**  
Computational Geometry  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
Assumed knowledge: Concepts of mathematics, elementary statistics, AI techniques  
Assessment: Practical assignments, written assignments, exam.

Geometric data are used in fields including information and scientific visualisation, image processing, pattern recognition, chip layout, and geographic information systems. This unit focuses on the study of computational algorithms which efficiently process geometric data. Students will approach relevant research being done in the University of Sydney.

**COMP4046**  
Statistical Natural Language Processing  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
Assumed knowledge: Concepts of linguistics, elementary statistics, AI techniques  
Assessment: Practical assignments, written assignments, exam.

This unit deals with techniques that allow computers to handle natural human languages (such as English, French), by analysis of large corpora of text. Particular emphasis is given to methods that analyse the meaning in texts, the categorisation of texts, and the general application of machine learning methods to these topics. Students will approach the relevant research being done in the University of Sydney.

**COMP4048**  
Information Visualisation  
Credit points: 6  
Session: Semester 2  
Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work.  
Assumed knowledge: Discrete mathematics  
Assessment: Practical assignments, written assignments, exam.

This unit provides knowledge of the concepts techniques and algorithms involved in producing graphical representations of relational information, especially graph drawings. Students will approach relevant research in the University of Sydney.

**COMP5318**  
Knowledge, Discovery and Data Mining  
Credit points: 6  
Session: Semester 1  
Classes: One 2 hour lecture and one 1 hour tutorial per week.  
Assumed knowledge: COMP5138

Textbooks  
C. Ware "Information Visualisation" Morgan Kaufman (2000); R. Spence "Information Visualisation" Addison-Wesley (2000)

Knowledge discovery is the process of extracting useful knowledge from data. Data mining is a discipline within knowledge discovery that seeks to facilitate the exploration and analysis of large quantities of data, by automatic or semiautomatic means. This subject provides a practical and technical introduction to knowledge discovery and data mining. Objectives: Topics to be covered include problems of data analysis in databases, discovering patterns in the data, and knowledge interpretation, extraction and visualisation. Also covered are analysis, comparison and usage of various types of machine learning techniques and statistical techniques: clustering, classification, prediction, estimation, affinity grouping, description and scientific visualisation.

COMP5347 e-Commerce Technology
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5028 Object Oriented Analysis and Design. Assessment: Assignments, written exam.

This unit will focus on technological advances supporting the development of e-commerce applications and systems. This includes server-side development of e-business applications, methodologies and practices for the development of web-applications, J2EE/Java-based support for front-end development, XML processing, and database integration, as well as web services development (SOAP, WSDL, UDDI) and handheld wireless integration.

COMP5415 Multimedia Authoring and Production
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5114 Digital Media Fundamentals. Assessment: Assignments, written exam.

This unit provides fundamentals on multimedia authoring and production. It focuses on multimedia animation and authoring and introduces some multimedia authoring packages. The students will get a great exposure to the software authoring package Alice. It will study the applications of multimedia authoring in the areas of tele-medicine, progressive animation, multi-casting, and distance learning.

COMP5425 Multimedia Storage, Retrieval & Delivery
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5122 Multimedia Human Computer Interaction. Assessment: Assignments, written exam.

The unit covers Multimedia Storage and Compression, fundamental compression techniques, audio storage and compression, image storage and compression (JPEG, JBIG and JPEG2000), video storage and compression (MPEG, MPEG1, MPEG2, MPEG4 and MPEG7), Multimedia Information Retrieval and information retrieval fundamentals, visual information retrieval, video cataloguing and retrieval issues of multimedia systems, and delivery image watermarking, video watermarking, video encryption, future HCl, progressive transmitted images and video, multicasting control, immersive video for future digital TV

COMP5416 Advanced Network Technologies
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5116 Internet Protocols and COMP5126 Distributed Systems Programming. Assessment: Assignments, written exam.

The unit introduces networking concepts beyond the best effort service of the core TCP/IP protocol suite. Provides understanding of the fundamental issues in building an integrated multi-service network for global Internet services, taking into account service objectives, application characteristics and needs and network mechanisms. Enables students to understand the core issues and be aware of proposed solutions so they can actively follow and participate in the development of the Internet beyond the basic bit transport service.

COMP5424 Information Technology in Biomedicine
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assessment: Assignments, written exam.

Specialist/Elective Information technology (IT) has significantly contributed to the research and practice of medicine, biology and health care. The IT field is growing enormously in scope with biomedicine taking a lead role in utilizing the evolving applications to its best advantage. The goal of this unit is to provide students with the necessary knowledge to understand the information technology in biomedicine. The major emphasis will be on the principles associated with biomedical digital imaging systems and their applications, computer modeling of biomedical systems, and biomedical system identification. Specialist areas such as medical image compression, telemedicine, Picture Archiving and Communication System (PACS), and web technology in biomedicine etc. will also be addressed.

COMP5426 Network Based High Performance Computing
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5126 Distributed Systems Programming. Assessment: Assignments, written exam.

This unit is intended to introduce and motivate the study of high performance computer systems. The student will be presented with the foundational concepts pertaining to the different types and classes of high performance computers. The student will be exposed to the description of the technological context of current high performance computer systems. Students will gain skills in evaluating, experimenting with, and optimizing the performance of high performance computers. The unit also provides students with the ability to undertake more advanced topics and courses on high performance computing.

COMP5338 Advanced Data Models

This course will offer a comprehensive survey of post-relational data models and technologies with significant emphasis on XML and content management on the world wide web. The important challenges in managing the complex and varied data in modern database environments will be specifically addressed.

COMP5348 Enterprise Scale Software Development
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour tutorial per week. Assumed knowledge: COMP5028 Object Oriented Analysis and Design. Assessment: Assignments, exam.

This unit covers a range of approaches for constructing large-scale computer-based systems which can deal with data and business processes through a large company or other organisation. In building software on this scale, it is essential to integrate existing "legacy" code and data stores. The unit includes a study of both middleware technologies and process management techniques needed to develop enterprise scale computer-based systems.

NETS4047 Pervasive Computing
Credit points: 6 Session: Semester 2 Classes: One 2 hour scheduled small-group class per week, plus 10 hours per week private work. Assumed knowledge: Networking concepts, operating system concepts, programming expertise. Assessment: Practical assignments, written assignments, exam.

Pervasive computing deals with the likely future where many computational devices are widely dispersed in the environment: there will be sensors in rooms, people will carry PDAs or mobile phones with capacity for running sophisticated software, etc. there may be chips in one’s clothing. Key issues include communication between the devices and humans; interpretation of, and adapting computation
to, the human context; managing the information and communication efficiently so knowledge gets to the places where it is needed. Students will approach the relevant research being done in the University of Sydney.

EUBS5003 e-Commerce Systems

Large Internet systems are built using application frameworks. They allow great reuse so developers do not have to design and implement applications from scratch, as students have done in EBUS3004 and EBUS4001. The unit lays down the basic concepts and hands on experience on the design and development of enterprise systems, emphasizing the development of systems using design patterns and application frameworks. A project-based approach will introduce the problems often found when building such systems, and will require students to take control of their learning. Several development Java frameworks will be used, including Spring, Hibernate, and others. Principles of design patterns will also be studied.

ELEC5303 Computer Control System Design
Credit points: 6 Session: Semester 1 Classes: 2 hours of lectures and a 2 hour lab/tutorial per week Prohibitions: ELEC4301 Assessment: Weekly quiz 10%, lab exam 10%, mid semester exam 25%, end of semester exam 55% Note: Department permission required for enrolment.

This unit aims to teach the basic issues involved in the analysis and design of computer-controlled systems. The emphasis is on theory rather than technological application or industrial practice. However, students are expected to test some of these ideas on a few benchmark control problems in the laboratory. Completion of the unit will facilitate progression to advanced study in the area and to work in industrial control. This unit assumes a basic knowledge of calculus, functions of real variables, Laplace transform, matrix theory and control theory. The following topics are covered. Sampled data systems: aliasing. Zero order hold equivalent: inverse of sampling, sampling system with time delay. Properties of difference equations: solution, stability, change of co;ordinates, Z transform. Input output models: pulse response, pulse transfer operator, pulse transfer function, interpretation of poles and zeros. Analysis of discrete time system: stability ( Jury’s test, Nyquist criterion, Lyapunov method), sensitivity and robustness, observability (with reduced-order observers), reachability and controllers, loss of reachability/observability through sampling, output feedback, the Separation theorem. Optimal control: Kalman filter, linear quadratic regulator, output feedback, the Separation theorem. Approximating continuous time controllers. Finite word length implementations.

ELEC5402 Digital Integrated Circuit Design
Credit points: 6 Session: Semester 1 Classes: 2 hours of lectures and a 2 hour lab per week Prohibitions: ELEC4402 Assumed knowledge: ELEC3401 Electronic Devices and Circuits or ELEC3404 Electronic Circuit Design), and (ELEC2601 Microcomputer Systems or ELEC3607 Embedded Computing). Assessment: Lab work 75%, end of semester exam 25%.

This unit of study explores CMOS technology and integrated circuit design and fabrication. The fundamental theory and techniques behind digital integrated circuit design are introduced. A primary focus of this unit is providing the student with practical laboratory design experience using a professional VLSI CAD tool to design digital integrated circuits. This unit provides a foundation for more advanced digital integrated circuit design techniques and also analogue integrated circuit design. Topics covered in this unit are: IC manufacturing process and CMOS technology, CMOS static logic design, CMOS dynamic logic design, arithmetic building block design, sequential logic design, VLSI interconnection and wiring issues, timing issues, digital memory design, digital system design methodologies.

ELEC5507 Error Control Coding
Credit points: 6 Session: Semester 1 Classes: 2 hours of lectures and a 1 hour tutorial per week Prohibitions: ELEC4503 Assessment: Quizzes 30%, end of semester exam 70%.

This unit deals with the principles of error control coding techniques and their applications in various communication and data storage systems. Its aim is to present the fundamentals of error control coding techniques and develop theoretical and practical skills in the design of error control encoders/decoders. Successful completion of this unit will facilitate progression to advanced study or to work in the fields of telecommunications and computer engineering. It is assumed that the students have some background in communications principles and probability theory. The following topics are covered. Introduction to error control coding, coding: Linear block codes, cyclic codes, BCH codes, Reed-Solomon codes, burst-error correcting codes, design of codecs for block codes, applications of block codes in communications and digital recording. Convolutional codes, Viterbi algorithm, design of codecs for convolutional codes, applications of convolutional codes in communications, soft decision decoding of block and convolutional codes, trellis coded modulation, block coded modulation, design of codecs for trellis codes, applications of trellis codes in data transmission. Turbo codes and applications to space and mobile communications.

ELEC5508 Wireless Engineering
Credit points: 6 Session: Semester 2 Classes: 2 hours of lectures and a 1 hour tutorial per week Prohibitions: ELEC5504, ELEC4504 Assumed knowledge: ELEC3503 Introduction to Digital Communications or ELEC3505 Communications) and (ELEC3504 Data Communications and the Internet or ELEC3506 Data Communications and the Internet or NETS2150 Fundamentals of Networking). Assessment: Assignment 30%, end of semester exam 70%.

This unit will introduce the key ideas in modern wireless telecommunications networks. It will address both physical layer issues such as propagation and modulation, plus network layer issues such as capacity, radio resource management and mobility management issues. The following topics are covered. Mobile radio channel: Multipath fading, diversity, log-normal fading, mean propagation loss, propagation models. Cellular technologies: Cell types, coverage, frequency reuse, spectral efficiency, link budget, power propagation loss, mobility management. Third generation systems: WCDMA and cdma2000. Wireless LANs: IEEE802.11, Hiperlan, Bluetooth. Convergence: GSM evolution to data services via GPRS and EDGE. Issues with TCP over wireless. Mobility management in MobileIP.

ELEC5509 Advanced Communication Networks
Credit points: 6 Session: Semester 1 Classes: 2 hours of lecture and a 2 hour tutorial per week Prohibitions: ELEC5501 Assumed knowledge: ELEC3504 Data Communications and the Internet or ELEC3506 Data Communications and the Internet or NETS3007 Network Protocols. Assessment: Report and seminar 25%, end of semester exam 75%.

This unit of study serves as an introduction to communications network research. The unit relies on a solid understanding of data communications and mobile networks. It introduces some of the currently most debated research topics in mobile networking and presents an overview of different technical solutions. Students are expected to critically evaluate these solutions in their context and produce an objective analysis of the advantages/disadvantages of the different research proposals. The general areas covered are wireless Internet, mobility management, quality of service in mobile and IP networks, ad hoc networks, and cellular network architectures. The following topics are covered. Introduction to wireless and mobile

ELEC5510 Satellite Communication Systems
Credit points: 6 Session: Semester 2 Classes: 2 hours of lectures and a 1 hour lab/tutorial per week. Prohibitions: ELEC3503 Assumed knowledge: ELEC3505 Communications (or ELEC3503 Introduction to Digital Communications) and ELEC4505 Digital Communication Systems (or ELEC4502 Digital Communication Systems) Assessment: Class performance 5%, tutorial attendance 5%, assignment 20%, end of semester exam 70%

Satellite communication systems provide fixed and mobile communication services over very large areas of land, sea and air. This unit presents the fundamental knowledge and skills in the analysis and design of such systems. It introduces students to the broad spectrum of satellite communications and its position in the entire telecommunications network; helps students to develop awareness of the key factors affecting a good satellite communications system and theoretical and practical skills in the design of a satellite communications link. Topic areas include: satellite orbits and their properties; satellite subsystems; communications link design; satellite antenna; modulation and multiplexing techniques; multiple access techniques; error control for digital satellite links; propagation effects and their impact and satellite earth links; satellite applications.

ELEC5511 Optical Communication Systems
Credit points: 6 Session: Semester 1 Classes: 2 hours of lectures and a 2 hour lab/tutorial per week. Prohibitions: ELEC3503 Assumed knowledge: (ELEC3505 Introduction to Digital Communications or ELEC3505 Communications) and (ELEC4402 Communications Electronics or ELEC4305 Communications Electronics and Photonics) Assessment: Assignments and labs 25%, end of semester exam 75%

ELEC5512 Optical Networks
Credit points: 6 Session: Semester 2 Classes: 2 hours of lectures and a 1 hour lab/tutorial per week. Prohibitions: ELEC5506 Assumed knowledge: ELEC3503 Introduction to Digital Communications or ELEC3505 Communications. Assessment: Two assignments totaling 20%, end of semester exam 80%

Introduction, photonic network architectures: point to point, star, ring, mesh; system principles: modulation formats, link budgets, optical signal to noise ratio, dispersion, error rates, optical gain and regeneration; wavelength division multiplexed networks; WDM components: optical filters, gratings, multiplexers, demultiplexers, wavelength routers, optical crossconnects, wavelength converters, WDM transmitters and receivers; Wavelength switched or routed networks, ultra high speed TDM, dispersion managed links, soliton systems; broadcast and distribution networks, multiple access, subscriber multiplexed lightwave video networks, optical local area and metropolitan area networks; protocols for photonic networks: IP, Gbit Ethernet, SDH or SONET, FDDI, ATM, Fibre Channel.

ELEC5513 Network Management and Queuing Theory
Credit points: 6 Session: Semester 2 Classes: 2 hours of lecture and a 2 hours tutorial per week. Prohibitions: Nil Assumed knowledge: ELEC3506 Data Communications and the Internet (or ELEC3504 Data Communications and the Internet) and ELEC3505 Communications (or ELEC3503 Introduction to Digital Communications). Assessment: Tutorial attendance 5%, assignments and group projects 25%, 2 hour end of semester exam 70%

This unit presents the fundamental knowledge and skills in the design, planning and management of telecommunications networks. Upon successful completion, students will be able to understand the legal and social framework of network management; understand and appreciate key aspects of network design, planning and management; understand and apply techniques to solve real problems in network design, implementation and management. Topic areas include: data communications and network management overview; review of computer network technology (LAN and WAN); simple network management protocol (SNMP) management; remote network monitoring (RMON); broadband network management. Introduction to queuing theory and its application in network planning and design.

ELEC5613 Image Processing and Computer Vision
Credit points: 6 Session: Semester 1 Classes: 2 hours of lectures, a 2 hour lab/tutorial per week. Prohibitions: ELEC4302 Assumed knowledge: SOFT2130 Software Construction (or SOFT2004 Software Development Methods 1) or ELEC2602 Digital System Design (or ELEC3601 Digital Systems Design or ELEC3608 Digital Systems Design) or ELEC3603 Introduction to Computing Systems. Assessment: Project and lab 25%, end of semester exam 75%

This unit is concerned with the computer analysis and processing of images. The emphasis is on fundamental theory with discussion of some applications. A reasonable background in engineering mathematics and a modern programming language is assumed. The prime aim of this unit of study is to develop a sound understanding of the basic theory of image processing and a capacity for research and innovation. Completion of this unit will facilitate progression to advanced study in the area and to work in the image processing field. Topics covered include Image perception and representation; Enhancements; histogram & pixelwise transforms; Transforms ;FFT, Laplace, Z, Hough; Filtering; Compression and image coding; Texture analysis;Modelling, classification, segmentation; Geometry ; Transforms, matching; Mathematical Morphology ;nonlinear filtering, distances, residues, HMT; Segmentation;Thresholding, split & merge, snakes, watershed, SRG, recent PDE methods. The unit will conclude by discussing some applications in fields such as medical image processing and automation.

ELEC5614 Real Time Computing
Credit points: 6 Session: Semester 2 Classes: 2 hours of lectures, 2hours of project and a 1 hour tutorial per week. Prohibitions: ELEC4402 Assumed knowledge: SOFT2130 Software Construction (or SOFT2004 Software Development Methods 1) and ELEC3607 Embedded Computing (or ELEC2601 Microprocessor Systems). Assessment: Project and lab 25%, end of semester exam 75%

This unit is concerned with the theory and practice of real time computer systems as applied to the design of embedded systems and computer control systems in engineering, manufacturing and automation. Some background in programming, object oriented design and system architecture is assumed. A prime aim of this unit of study is to develop a capacity for research and inquiry in the field of real time and embedded systems. Completion of this unit will facilitate progression to advanced study or to work in embedded systems and industrial real time computer systems. The following topics are covered. Hard real time and embedded systems, as applied to engineering, manufacturing and automation. Timing and scheduling: periodic vs aperiodic processes, deadlines, rate monotonic, deadline monotonic and earliest deadline scheduling. Management of shared resources. Real time languages and their features. Real time operating systems. Real time software design. Embedded Systems: overview, signal flow, interfacing, Reliability and fault tolerance in hardware and software. SCADA and DCCS. Some case studies.
This unit of study is comprised of a selection of topics covering advanced computer architecture, advanced digital engineering and embedded systems. They may be chosen from the following:

Advanced Computer Architecture: Processor organisation, parallelism, scalability, language and application driven architectures, design tools and methodologies. Advanced Digital Engineering: Advanced hardware description language skills for ASIC and FPGA design; CAD methodologies; designing for low power, high speed, small area, low cost and testability; advanced printed circuit board design, system design exercises. Advanced Embedded systems: System on chip design and associated hardware description languages and CAD tools; embedded system internetworking; real time design constraints; case studies and laboratory exercises in communications and industrial control applications.

This unit examines the basic cryptographic building blocks of security, working through to their applications in authentication, key exchange, secret and public key encryption, digital signatures, protocols and systems. It then considers these applications in the real world, including models for integrity, authentication, electronic cash, viruses, firewalls, electronic voting, risk assessment, secure web browsers and electronic warfare. Practical cryptosystems are analysed with regard to the assumptions with which they were designed, their limitations, failure modes and ultimately why most end up broken.

This unit forms a key foundation for the student's work on their IT-related research project within an Honours degree. It introduces the varied approaches to research common in different fields of IT, such as experimentation, simulation, prototyping/design, mathematical proof, surveys, and interpretive methods. The main focus is on understanding how research is done, and how it is evaluated. Key assessment tasks include writing a critical evaluation of a research paper from the literature, a survey of the literature within some topic, a research plan, and a presentation of a research plan. It is expected that the student would use their thesis research as the basis for this assessment, and use feedback provided in this unit to improve the work for inclusion in the final thesis.

This unit introduces the definition of data, information and knowledge as well as what defines a system and a model. National and state information policies will be reviewed and steps in policy formulation, analysis and implementation will be covered. A central focus will be issues relating to privacy, confidentiality, security and the ethical use of health information. This will include discussion of relevant legislation.

This unit will introduce system analysis and design concepts, including the system life cycle, scheduling tools and approaches to assessing user requirements. Relevant IT standards for the health sector, for example HL7 will be covered along with issues related to data warehousing. Health informatics applications such as imaging, smart cards, telemedicine, wireless data transmission, handheld computers, robotics, data transmission via the Internet, expert systems and decision support systems will be discussed. A focus will be the design and implementation of the electronic patient record.

This unit aims to provide students with management skills that are needed to ensure the successful integration of information technology.
into an organisation. Topics covered include decision-making, the management of change and organisational culture. The features and development of an effective learning organisation are discussed.

**HIMT5069 Health Care Systems**

**Credit points:** 6  
**Teacher/Coordinator:** Janelle Craig (02) 9351 9651, j.craig@fhs.usyd.edu.au  
**Session:** Semester 1  
**Classes:** Block mode  
**Assessment:** Assignments and examinations  

This unit provides an introduction to the Australian health care system. Topics include Commonwealth and State responsibilities for health with a particular focus on funding issues, healthcare expenditure, the structure and organisation of health insurance, health care facilities and the health workforce. The unit encourages a critical appraisal of current health arrangements and policies and an appreciation of the pluralistic nature of the health system. Students will participate in the Health Care Game, an interactive web-based program, as part of the unit.

**INFS6001 Knowledge Management**

**Credit points:** 6  
**Session:** Semester 1, Semester 2, Summer Main  
**Classes:** Three hours per week  
**Assessment:** Group assignments; Mid-semester exam; Final exam  
**Note:** This unit of study may be offered in intensive mode  

This unit introduces you to the organisational foundations of information systems and their emerging strategic role. You will develop an understanding of real-world systems and their relationship to organisations, management and business processes. The unit provides you with a solid understanding of the technology underlying information systems and how various information technologies work together to create infrastructure for electronic commerce and electronic business. You will explore the role of information systems in capturing and distributing organisational knowledge and in enhancing management decision making. Finally, you will have the opportunity to explore the special management challenges and opportunities created by the pervasiveness and power of information systems.

**INFS6002 BIS Strategy**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  
**Assessment:** Class participation, Examination, Individual assignments and Group projects  

In this unit, you will explore current issues and theoretical concepts in information technology strategy and management. A key aim of the unit is to provide you with a detailed understanding of concepts, tools and methodologies that can be of assistance to organisations in their design, implementation and enactment of IT strategies and governance of value-adding IT resources. The focus will be on users and IT strategy and management in context rather than on more technical aspects. Your understanding will be enhanced through active participation in case studies, which are an essential element of the unit.

**INFS6004 BIS Change Management**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week  

Many BIS implementations require organisational change, or are part of broader change initiatives, and this unit aims to equip you with the ability to operate as a change agent to lead and manage that process. You will be exposed to the factors that need to be considered to fully understand an organisation’s specific context and provided with the knowledge, methodologies and techniques to successfully manage the change related aspects of a BIS implementation within that context. Topics covered by this unit include the roles of change, approaches to change - including Strategic Change, Business Process Reengineering and Total Quality Management and managing the end-to-end change process - including overcoming organisational resistance.

**INFS6012 Business Process Integration**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  

This unit will provide you with an overview of integrated enterprise systems using packaged software solutions (via the SAP R/3 enterprise resource planning system). It offers practical experience in using the SAP R/3 system so as to familiarize you with all the modules and their functionality. You will learn how enterprise resource planning integrates functions within business and you will gain a thorough understanding of the information flows in procurement, production planning, production control, inventory control, sales and distribution, financial accounting and cost controlling.

**INFS6013 Risk Management and BIS Assurance**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  

This unit will introduce you to the concepts and practices relating to the protection and assurance of business information systems. Business information and information related systems are valuable assets to organisations and are of critical importance in meeting regulatory obligations. Therefore the risk of disruption, theft or destruction to information systems has business value and compliance implications. This unit provides you with the opportunity to investigate key concepts, strategies and methodologies that will assist you in identifying, analysing and evaluating potential risk areas and critical control needs throughout the information system lifecycle. Your knowledge will be expanded in a multi-level approach that examines tools and technologies for safeguarding business information resources, the key stakeholders and institutional arrangements for business information systems assurance. The theoretical and conceptual material covered in seminars is reinforced through problem based learning.

**INFS6014 BIS Project Management**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  

This unit will introduce you to the end to end project management lifecycle from project planning and initiation through implementation to benefits realisation. You will be exposed to both the technical and behavioural aspects of project management infrastructures, techniques and methodologies - including PMBOK, PRINCE2 and OPM3. You will be introduced to concepts and will critically analyse their application in specific project contexts. In addition you will learn how to use the standard project management tool Microsoft Project. Major topics covered in the unit include project plan development, execution and control along with consideration of the change management implications of the project for its host organisation.

**INFS6015 Business Process Management**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week  
**Prerequisites:** INFS5000 or INFS6000  
**Assumed knowledge:** INFS6012  

This unit will introduce you to concepts of Business Process Management (BPM) and capabilities to discover, analyse, design, deploy and optimize end to end business processes. You will obtain a detailed understanding of strategies, methods, tools and technologies associated with BPM. You will also develop practical skills by modelling and re-designing business processes using commercial software. Business processes that stretch across organizational boundaries and the management of such processes are the central themes of this unit.

**INFS6016 Technology Enabled Business Innovation**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** Three hours per week
This unit will assist you to develop knowledge and skills in innovative, technology-enabled business models and strategies from a management perspective. It will enable you to better understand and apply the concepts, strategies, tools and technologies necessary for undertaking business innovation. From basic knowledge of business models and essential business processes this unit will increase your awareness and understanding of stakeholders, their capabilities and their limitations in the strategic convergence of technology and business. It will increase your insights into the technology and infrastructure required to support commerce in the 21st Century and will support development of your capabilities to analyse, develop and evaluate innovative technology-enabled business strategies and models.

**MATH4431**  
**Advanced Option Pricing**  
Credit points: 6  
Session: Semester 1  
Classes: Lectures/tutorials: 3 hours per week  
Assumed knowledge: BSc in mathematics or equivalent, and familiarity with financial concepts such as the basics of Black-Scholes option-pricing methodology.  
Assessment: 60% from final exam, 40% from two assignments

An important and large part of modern quantitative finance is concerned with the valuation of derivative securities including not only vanilla calls and puts but also the vast family of exotic options. The latter includes barrier options, lookback options, compound options, American options, Asian options, rainbow options, credit derivatives and many others. This unit develops a non-trivial mathematical framework for obtaining the fair or arbitrage-free prices of such derivative securities. This framework includes the two main approaches in popular use: the risk-neutral expectations method and the corresponding PDE method. Students will be introduced to the necessary stochastic calculus methods that underlie both approaches. Some computational methods employed in industry will also be discussed. While a good understanding of mathematical statistics and PDE's would be an advantage, the unit assumes neither. Thus students and practitioners with strong analytical skills will still benefit from this unit, considered by some as the most advanced academic course for business management.

**MATH4433**  
**Interest Rate Modelling**  
Credit points: 6  
Session: Semester 2  
Classes: Lectures/tutorials: 3 hours per week  
Assumed knowledge: BSc in mathematics or equivalent, and familiarity with financial concepts such as arbitrage, options, and the basics of Black-Scholes option-pricing methodology.  
Assessment: 60% from final exam, 40% from two assignments

Interest rate derivatives such as forwards, bond options, swaps, swaptions, caps and floors are extensively traded in financial markets around the world. Consequently, the modelling of interest rates and the pricing of interest rate derivatives are matters of considerable importance in the finance industry. This unit will begin with a review of riskless term-structure models, and then introduce various stochastic spot-rate and yield curve models, including those of Merton, Vasicek, Cox-Ingersoll-Ross, Ho-Lee, Hull-White, Black-Derman-Toy, and Black-Karasinski. The final part of the course will be on forward rate models of the kind arising in the Heath-Jarrow-Morton framework, and including the so-called "market models" (such as that of Brace-Gatarek-Musiela). Recurring themes will be the central risk-neutral measure and the forward measure, and their roles in the pricing of forwards, swaps, caps, bond options, caps and floors. Some familiarity with stochastic calculus and its relevance to the derivative pricing is assumed, although a brief review of this material will be included. A degree of familiarity with MATLAB is also highly desirable, as one of the assignments will involve some computational work.

### IT project units

**COMP5702**  
**IT Research Project A**  
Credit points: 12  
Session: Semester 1, Semester 2  
Classes: Eight hours of practical work per week.  
Assessment: Report.  
Note: Department permission required for enrolment.

**COMP5703**  
**Information Technology Project**  
Credit points: 12  
Session: Semester 1, Semester 2  
Classes: Eight hours of practical work per week.  
Assessment: Report.  
Note: Department permission required for enrolment.

**COMP5704**  
**IT Research Project B**  
Credit points: 6  
Session: Semester 1, Semester 2  
Classes: Four hours of practical work per week.  
Assessment: Report.  
Note: Department permission required for enrolment.

### Resolutions

**Graduate Diploma in Computing**  
Section 1

1. **Admission**
   1.1 The Dean of the Faculty of Science may admit to candidature for the Graduate Diploma in Computing:
      1.1.1 graduates who have completed a bachelor's degree, with results equivalent to credit average or above, and who have demonstrated significant numeracy skills by completing relevant subjects with a mathematical foundation; or
      1.1.2 graduates who have completed a bachelor's degree, with results equivalent to Credit average or above, and who have worked in the area of Information Technology for more than 5 years, who can offer evidence of prior learning which is considered to demonstrate the knowledge and aptitude required to undertake this course.

2. **Units of study**
   2.1 The units of study for the Graduate Diploma in Computing are listed in the table associated with these Resolutions in subsection 4.1.

3. **Requirements for the Graduate Diploma in Computing**
   3.1 Candidates for the Graduate Diploma in Computing are required to complete satisfactorily units of study giving credit for a total of 48 credit points, selected from units of study approved for the Graduate Diploma in Computing.
   3.2 Satisfactory completion of the Graduate Diploma in Computing for purposes of entry into the Master of Information Technology require that a candidate has not failed more than 12 credit points of units of study in the Graduate Diploma in Computing.
[Section 2]

4. Details of units of study

4.1 The units of study for the Graduate Diploma in Computing are listed in the following table:

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>Sem</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMP5206 Introduction to Information Systems</td>
<td>1, 2</td>
</tr>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work, if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Diploma in Computing except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to the Graduate Diploma in Computing, may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 The Dean may require any student who has failed a cumulative total of 18 credit points or more at any stage of enrolment in the Graduate Diploma in Computing to show good cause why he or she should be allowed to re-enrol.

11.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Diploma in Computing shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. Credit transfer

14.1 Credit is not available in the Graduate Diploma in Computing for previous study unless it was postgraduate study undertaken in this award course within the previous three years.

14.2 Units of study completed in the Graduate Diploma in Computing cannot be counted as units of study completed within the Graduate Certificate of Information Technology, Graduate Diploma of Information Technology, or Master of Information Technology.

Resolutions

Graduate Certificate in Information Technology Management

Master of Information Technology Management

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for:

1.1.1 the Graduate Certificate in Information Technology Management:

1.1.1.1 graduates who have completed a Bachelor's degree;

1.1.1.2 persons who are able to offer evidence of recognised prior learning which is considered to demonstrate the knowledge and aptitude required to undertake this course.

1.1.1.3 The bachelor's degree does not have to be an Information Technology degree, but it should contain a significant amount of technical subjects related to computing, as typically found in an IT, Science, or Engineering degree.

1.1.1.4 Applicants holding a bachelor's degree in other areas, such as Finance, Commerce, Health Sciences, and Social Sciences, who have completed relevant IT subjects will also be eligible.

1.1.1.5 Applicants holding a bachelor's degree in any discipline and who have worked in Information Technology for more than five years are eligible.

1.2 the Graduate Diploma in Information Technology Management:

1.2.1.1 graduates who have completed a Bachelor's degree;

1.2.1.2 persons who have completed the Graduate Certificate in Information Technology Management at the University of Sydney, with Credit average results or above.

1.2.1.3 The bachelor's degree does not have to be an Information Technology degree, but it should contain a significant amount of technical subjects related to computing, as typically found in an IT, Science, or Engineering degree.

1.2.1.4 Applicants holding a bachelor's degree in other areas, such as Finance, Commerce, Health Sciences, and Social Sciences, who have completed relevant IT subjects will also be eligible.

1.2.1.5 Applicants holding a bachelor's degree in any discipline and who have worked in Information Technology for more than five years are eligible.

1.3 the Master of Information Technology Management:

1.3.1 graduates who have completed a bachelor's degree, with results equivalent to Credit average or above.

1.3.2 persons who have completed the Graduate Diploma in Information Technology Management at the University of Sydney, with Credit average results or above.

1.3.3 persons who have completed the Graduate Diploma in Computing at the University of Sydney.
1.1.1.4 The bachelor's degree does not have to be an Information Technology degree, but it should contain a significant amount of technical subjects related to computing, as typically found in an IT, Science, or Engineering degree.

1.1.1.5 Applicants holding a bachelor's degree in other areas, such as Finance, Commerce, Health Sciences, and Social Sciences, who have completed relevant IT subjects will also be eligible.

1.1.1.6 Applicants holding a bachelor's degree in any discipline and who have worked in Information Technology for more than five years are eligible.

1.2 In considering an application for admission to the Graduate Certificate in Information Technology Management, the Graduate Diploma in Information Technology Management and the Master of Information Technology Management, the Head of the School of Information Technologies and the Dean shall select, in preference, applicants who are most meritorious in terms of subsections 1.1.1-1.1.3 above.

2. Units of study

2.1 The units of study for the Graduate Certificate in Information Technology Management, Graduate Diploma in Information Technology Management and Master of Information Technology Management are listed in the tables in subsection 4.1 of these resolutions.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the tables associated with these resolutions.

3. Requirements for the Graduate Certificate in Information Technology Management, Graduate Diploma in Information Technology Management and Master of Information Technology Management

3.1 Candidates for the Graduate Certificate in Information Technology Management are required to complete satisfactorily units of study giving credit for a total of 24 credit points selected from units of study approved for the Master of Information Technology Management.

3.2 Candidates for the Graduate Diploma in Information Technology Management are required to complete satisfactorily units of study giving credit for a total of 36 credit points selected from units of study approved for the Master of Information Technology Management.

3.3.1 Of the 48 credit points, a minimum of 30 credit points must be selected from core units of study, excluding IT Research Project units of study.

3.3.2 INFO5990 Professional Practice in IT and INFO5991 IT Professional Services, must be completed as a Core unit of study.

3.3.3 A maximum of 18 credit points of Elective units of study can be taken.

3.3.4 Candidates for the Master of Information Technology Management are required to complete satisfactorily units of study giving credit for a total of 48 credit points selected from units of study approved for the Master of Information Technology Management.

3.3.5 Of the 48 credit points, a minimum of 30 credit points must be selected from core units of study.

3.3.6 INFO5990 Professional Practice in IT, INFO5991 IT Professional Services, and INFO5992 Understanding IT Innovations, must be completed as core units of study.

3.3.7 A maximum of 18 credit points of Elective units of study can be taken.

3.3.8 Enrolment in IT projects will be approved only for students who have completed at least 24 credit points and may be limited by quota.

3.3.9 After completing 24 credit points of coursework, students who achieve Credit average results or above in their coursework may select 12 credit points of Information Technology Project units of study among their core units.

3.4 Research Path in the Master of Information Technology Management

3.4.1 After completing 24 credit points of coursework, students who have Distinction average results or above may be eligible for the Research Path subject to the approval of the Head of the School of Information Technologies, and the Dean.

3.4.2 Students who pursue the Research Path must study INFO4990 Research Methods, and select 18 credit points from IT Research Project units of study among their core units.

3.4.3 Students who pursue the Research Path are not required to take INFO5991 IT Professional Services and INFO5992 Understanding IT Innovations as core units of study.

[Section 2]

4. Details of units of study

4.1 The units of study for the Graduate Certificate in Information Technology Management, Graduate Diploma in Information Technology Management and Master of Information Technology Management are listed in the following tables:

does not show good cause, apply the

5. Enrolment in more/less than minimum load
5.1 A candidate may proceed on either a full-time or a part-time
basis.

6. Cross-institutional study
6.1 Cross-institutional study shall not be available to students
enrolled in the Graduate Certificate in Information Technology
Management, the Graduate Diploma in Information Technology
Management, and the Master of Information Technology
Management, except where the University of Sydney has a
formal Cooperation Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to the Graduate Certificate in Information Technology
Management, the Graduate Diploma in Information Technology
Management and the Master of Information Technology
Management may be limited by:
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and
computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the
Dean shall take account of the quota and will select, in
preference, applicants who are most meritorious in terms of
subsection 2 above.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first
obtaining written permission from the Dean to suspend
enrolment will be deemed to have discontinued enrolment in the
course.
8.2 Students who have discontinued from the course will be
required to apply for admission to the course and be subject
to admission requirements pertaining at that time.

9. Suspension of candidature
9.1 A student may seek written permission from the Dean to
suspend enrolment for:
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension
must advise the Faculty of Science Office in writing of their
intention by no later than the end of October for First Semester
of the following year or the end of May for Second Semester
of the same year.

11. Satisfactory progress
11.1 Candidates for the Graduate Certificate in Information
Technology, Graduate Diploma in Information Technology, and
the Master of Information Technology, shall be governed by
the rules as follows:
11.1.1 The Dean may:
11.1.1.1 advise a student when his or her performance has been
such that a rule would normally be applied and call upon
that student to show good cause why the rule should not
be applied; and
11.1.1.2 where the student does not show good cause, apply the
rule.
11.1.2 A student who has failed a cumulative total of 12 credit points
at any stage of enrolment in the Master of Information
Technology Management will be required to show good
cause why he or she should be allowed to re-enrol and, if
good cause has not been established, the student's
enrolment will be transferred to the Graduate Certificate in
Information Technology Management;
11.1.3 A student who has failed a cumulative total of 18 credit points
at any stage of enrolment in the Master of Information
Technology Management and/or the Graduate Diploma in
Information Technology Management will be required to
show good cause why he or she should be allowed to re-enrol
and, if good cause has not been established, the student's

14. Credit transfer policy
14.1 Credit is not available in the Graduate Certificate in Information
Technology Management, Graduate Diploma in Information
Technology Management, and the Master of Information
Technology Management except for postgraduate study which
has been undertaken in information technology at the University
of Sydney within the previous three years.
14.2 If no award has been conferred for this study, credit may be
transferred in full to the Graduate Certificate in Information
Technology Management, Graduate Diploma in Information
Technology Management, and the Master of Information
Technology Management.
14.3 If an award has been conferred for this study, credit to a limit
of 12 credit points may be transferred to the Graduate
Certificate in Information Technology Management, Graduate
Diploma in Information Technology Management, and the
Master of Information Technology Management.

15. Restrictions on Transfer
15.1 Students enrolled in either the Graduate Certificate in
Information Technology Management, the Graduate Diploma
in Information Technology Management, or the Master of
Information Technology Management, are not permitted to
transfer to the Master of Information Technology award courses.
15.2 Students enrolled in either the Graduate Certificate in
Information Technology Management, Graduate Diploma in
Information Technology Management, or Master of Information
Technology Management, are not permitted to transfer to the
Master of Applied Information Technology award courses.

Resolutions

Graduate Certificate in Information Technology
Graduate Diploma in Information Technology
Master of Information Technology

[Section 1]
1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Information Technology;
1.1.1.1 graduates who have completed a Bachelor's degree, with
a substantial study in a relevant field of Information
Technology;
1.1.1.2 graduates who have completed a Bachelor of Engineering
degree with a major cumulative sequence of study in Computer
Engineering, Software Engineering or Telecommunications
Engineering; or
1.1.1.3 persons who offer evidence of recognised prior learning
which is considered to demonstrate the knowledge and
aptitude required to undertake the units of study.
To qualify for the award of Master of Information Technology:

- Graduates who have completed a Bachelor of Engineering degree with a major sequence of study in Computer Engineering, Software Engineering or Telecommunications Engineering;
- Graduates who have completed a Bachelor of Engineering degree with results equivalent to Credit average or above in a major sequence of study in any aspect of Information Technology;
- Of the 48 credit points required for the Graduate Certificate in Information Technology at the University of Sydney, with Credit average results or above.
- The Master of Information Technology:
  - Graduates who have completed a bachelor's degree, with results equivalent to Credit average or above in a major sequence of study in any aspect of Information Technology;
  - Enrolment in IT projects will be approved only for those graduates who have completed requirements for the Graduate Certificate in Information Technology at the University of Sydney, with Credit average results or above.

14. **Credit transfer policy**
14.1 Credit is not available in the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology, and the Master of Information Technology except for postgraduate study which has been undertaken in information technology at the University of Sydney within the previous three years.
14.2 If no award has been conferred for this study, credit may be transferred in full to the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology, and the Master of Information Technology.
14.3 If an award has been conferred for this study, credit to a limit of 12 credit points may be transferred to the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology, and the Master of Information Technology.
15. **Restrictions on Transfer**
15.1 Students enrolled in either the Graduate Certificate in Information Technology, the Graduate Diploma in Information Technology, or the Master of Information Technology are not permitted to transfer to the Master of Applied Information Technology award course.
Master of Medical Physics

Graduate Diploma in Medical Physics

This chapter sets out the requirements for coursework postgraduate degrees offered in the Faculty of Science in the area of Medical Physics. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in at the end of this chapter, following the unit of study descriptions, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at: www.usyd.edu.au/publications/calendar/

Course overview

The Master of Medical Physics (MMedPhys) and the Graduate Diploma in Medical Physics (GradDipMedPhys) are the entry level qualifications for trainee medical physicists. Physical scientists apply their knowledge and training in many different areas of medicine including the treatment of cancer, medical imaging, physiological monitoring and medical electronics.

Course outcomes

The MMedPhys and GradDipMedPhys provide the entry level qualification for trainee medical physicists working in a hospital medical physics department. Both courses are accredited by the Australasian College of Physical Scientists and Engineers in Medicine (ACPSEM). Graduates of these courses will qualify to apply for trainee medical physicist positions in hospitals in Australia and New Zealand. Medical physicists employed in hospitals often undertake research studies part-time for the higher Doctor of Philosophy (PhD) research degree.

Medical Physics units

PHYS5001
Radiation Physics
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the production of ionising radiation and its fundamental interactions with matter and related factors are covered.

PHYS5002
Anatomy and Physiology
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the concepts of the structure of the human cell and tissues are introduced. The organisation and function of each of the major organ systems that constitute the human body are covered. Example of pathology of diseases commonly encountered in the practice of medical physics will be included.

PHYS5003
Instrumentation
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the principles underlying the fundamental operation of instrumentation used in medicine are covered. Examples will include pressure and volume measurements in respiratory medicine, and electric potential measurements in cardiology.

PHYS5004
Radiation Dosimetry
Credit points: 6 Session: Semester 1 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the principles of both absolute and relative measurement of ionising radiation in radiotherapy and medical imaging are covered. Issues related to the dosimetry of non-ionising radiation are also covered.

PHYS5005
Radiotherapy Physics
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, both theoretical and practical aspects of the major topics in radiotherapy physics are covered. These topics include radiation beam production and modification, calibration and characterisation, principles of treatment planning, dose calculation and reporting, and the physics of brachytherapy.

PHYS5006
Medical Imaging Physics
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the physical principles underlying the science of imaging in radiology, ultrasound, magnetic resonance imaging and nuclear medicine are covered.

PHYS5007
Image Processing
Credit points: 3 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour practical per week for half the semester. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the theory of image formation, concepts of computing, numerical methods and image processing are covered, including techniques such as enhancement, registration, fusion and 3D reconstruction.

PHYS5008
Radiation Biology and Health Physics
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture and one 1 hour practical per week. Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, the
biological effects due to the interaction of radiation with human tissues from the DNA level through to the major organ systems are covered. Factors affecting dose response of tissue are considered along with models describing characteristic behaviour.

PHYS5009
Research Methodology
Credit points: 3  Session: Semester 2  Classes: One 2 hour lecture and one 1 hour practical per week for half the semester  Assessment: assignments, written exam

In this unit normally undertaken as part of the Masters of Medical Physics degree or the Graduate Diploma in Medical Physics, an understanding of the processes involved in conducting various forms of research, basic data analysis and interpretation, research writing and presentation skills are covered. The professional framework is presented by considering issues such as legal, ethical and basic management issues.

PHYS5010
Project
Credit points: 24  Session: Semester 1, Semester 2  Assessment: report

Note: This unit is only available for students in the Master of Medical Physics degree

This unit is a research project to be carried out in a hospital or similar environment. The topic of the project will be determined in consultation with the course coordinator.

Resolutions
Master of Medical Physics

Graduate Diploma in Medical Physics

[Section 1]

1. Admission
1.1 The Faculty may, on the recommendation of the Head of the School of Physics, admit to candidature for:

1.1.1 the Graduate Diploma in Medical Physics;
1.1.2 an applicant who is the holder of a bachelor's degree in Science or Engineering from the University of Sydney provided the applicant has achieved a major in physics, or equivalent;
1.1.3 a graduate of another university or appropriate institution who has equivalent qualifications to those specified in subsection 1.1.2.
1.2 the Master of Medical Physics
1.2.1 a person who has the qualifications specified in subsection 1.1.2; or
1.2.2 a person who has completed requirements for the Graduate Diploma in Medical Physics.

2. Units of study
2.1 The units of study for the Graduate Diploma in Medical Physics and the Master of Medical Physics are listed in the Table of units of study associated with these resolutions.

3. Requirements for the Graduate Diploma in Medical Physics and Master of Medical Physics
3.1 Candidates for the Graduate Diploma in Physics are required to complete 48 credit points consisting of the core units of study in the Table of units of study in subsection 4.1, excluding the project PHYS5010.
3.2 Candidates for the Master of Medical Physics are required to complete 72 credit points consisting of the 48 credit points of core units of study in the Table of units of study in subsection 4.1, including the 24 credit point project PHYS5010.
3.3 A candidate must complete successfully 48 credit points of units of study before enrolling in PHYS5010.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Diploma in Medical Physics, and the Master of Medical Physics are listed in the following table (in accordance with requirements in subsection 3):

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>Credit points</th>
</tr>
</thead>
<tbody>
<tr>
<td>All units are core. Unless otherwise indicated all units are worth 6 credit points</td>

4.2 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed. In these resolutions, "to complete a unit of study" or any derivative expression means:

4.2.1 to attend lectures and meetings, if any, for seminars and tutorial instruction;
4.2.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.2.3 to pass any other examination of the unit of study that may apply.

5. Enrolment in more/less than minimum load
5.1 A candidate may proceed on either a full-time or part-time basis.
6. Cross-institutional study
6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Diploma in Medical Physics and the Master of Medical Physics courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to either course may be limited by quota.
7.2 In determining the quota the University will take into account:
7.2.1 availability of resources including space, library, equipment, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.2.3 In considering an application for admission to candidature the Head of Department and the Faculty shall take account of the quota and will select in preference applicants who are most meritorious in terms of section 1 above.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course. Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature
9.1 A student may seek written permission from the Dean to suspend candidature in the course.
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress
11.1 Candidates for the Master of Medical Physics and the Graduate Diploma in Medical Physics shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12cp at any stage of enrolment in the Master of Medical Physics will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been
11.1.2 A student who has failed a cumulative total of 18cp at any stage of enrolment in the Master of Medical Physics and/or the Graduate Diploma in Medical Physics will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.1.3 A student who has failed a unit at the second attempt in the Master of Medical Physics and/or the Graduate Diploma in Medical Physics will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol. If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit
12.1 For the Graduate Diploma in Medical Physics:
12.1.1 A full-time candidate shall complete the requirements for the Graduate Diploma not earlier than the end of the second semester of candidature, and not later than the fourth semester of candidature.
12.1.2 A part-time candidate shall complete the requirements for the Graduate Diploma not earlier than the end of the fourth semester of candidature, and not later than the sixth semester of candidature.

12.2 For the Master of Medical Physics:
12.2.1 A full-time candidate shall complete the requirements for the Masters degree not earlier than the end of the third semester of candidature, and not later than the fourth semester of candidature.
12.2.2 A part-time candidate shall complete the requirements for the Masters degree not earlier than the end of the fourth semester of candidature, and not later than the sixth semester of candidature.

13. Assessment policy
13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature, on the recommendation of the Head of the School of Physics.

14. Credit transfer policy
14.1 Credit is not available in the Graduate Diploma in Medical Physics and Master of Medical Physics for postgraduate study which has not been undertaken in these award courses within the previous three years.
14.2 A candidate who has qualified for the award of the Graduate Diploma in Medical Physics may transfer, within three years, to the Master of Medical Physics and receive credit for up to 48 credit points from the Graduate Diploma in Medical Physics.
24. Postgraduate coursework: Medical Physics degrees
25. Postgraduate coursework: Microscopy and Microanalysis degrees

Graduate Certificate in Applied Science (Microscopy and Microanalysis)

Graduate Diploma in Applied Science (Microscopy and Microanalysis)

Master of Applied Science (Microscopy and Microanalysis)

This chapter sets out the requirements for postgraduate degrees offered in the Faculty of Science in the area of Microscopy and Microanalysis. A comprehensive guide to the requirements and units of study of the coursework degrees follows.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Course overview

The Graduate Certificate in Applied Science (Microscopy and Microanalysis), Graduate Diploma in Applied Science (Microscopy and Microanalysis) and Master of Applied Science (Microscopy and Microanalysis) are articulated award courses that provide a professional qualification to microscopists for industry, research, medical science and education. The course develops and enhances skills in specimen preparation, operation of microscopes and analytical equipment, interpretation of microscopical images and microanalysis.

Course outcomes

The aim of this articulated coursework program is to provide students with a coordinated and interdisciplinary approach to microscopy and microanalysis, thus developing expertise to recognise and solve a broad range of problems in life and material sciences. Upon the completion of the graduate certificate, graduates will possess practical and theoretical background in a wide variety of microscopy, microanalysis and specimen preparation techniques for the materials or life sciences. The graduate diploma will add more specialist knowledge in particular areas of interest or relevance. In addition, the master’s will provide experience in designing, carrying out and completing an independent project and report.

Admission requirements

Graduate Certificate in Applied Science (Microscopy and Microanalysis)

Applicants for the Graduate Certificate in Applied Science (Microscopy and Microanalysis) should have a Bachelor of Science, Bachelor of Applied Science, Bachelor of Engineering, or equivalent qualifications or experience. Applications will also be considered from those with a Bachelor of Arts who wish to acquire microscopy and microanalysis skills for such areas as archaeology, history of art and museum studies.

Master of Applied Science (Microscopy and Microanalysis)

Applicants for the Master of Applied Science (Microscopy and Microanalysis) should have a Bachelor of Science, Bachelor of Applied Science, Bachelor of Engineering, or equivalent degree or have completed the Graduate Diploma in Applied Science (Microscopy and Microanalysis) with a credit average.

All degrees -- availability of units

Not all units of study may be available every semester. The faculty may allow substitution of any unit of study by an approved unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

Research path

After completing 24 credit points of coursework, students who have Distinction average results or above across all units of study attempted may be eligible for the Research path subject to the approval of the Director of the Key Centre for Microscopy and Microanalysis and the Dean. Students who pursue the Research path must study MCAN5201, MCAN5202, MCAN5203 and MCAN5210.

Units of Study

MCAN5005 Introductory Microscopy & Microanalysis

Credit points: 6 Teacher/Coordinator: Dr. Lilian Soon Session: Semester 1, Semester 2 Classes: Nine hour lectures, nine hour practicals, three hour tutorials (3 sessions). Assessment: Two reports/portfolios of images from light microscopy and demonstrations (80%). Practical assessment: two reports/portfolios of images from light microscopy and demonstrations (80%). Practical exercises (10%), attendance and participation (10%).

The course provides an introduction to the fundamental principles of optics and the related principles of spectroscopy that are commonly used in microscopy and microanalysis. Students are introduced to a variety of imaging and analysis techniques and their role in both biotechnology and the technology of materials, as relevant to laboratory-professionals and researchers. An emphasis on light-optical microscopy and related imaging modes is developed.

MCAN5006 Electron Microscopy

Credit points: 6 Teacher/Coordinator: Prof. Simon Ringer and (non-academic) Dr Tim Petersen Session: Semester 1, Semester 2 Classes: Eight groups/two people per group; can vary) of 4 one hour, 25 minutes lectures, 4 one hour lectures, 4 two hour practicals (TEMs), 4 one hour practical (SEM), forty minute tutorial, forty five minute practical demonstration. Assessment: Practical, analytical exercises in a written report including an annotated image portfolio (30-40 pages with ½ page sized images).

Trains participants, with no prior knowledge of electron microscopy, to become operators of scanning and transmission electron microscopes. Participants are given theoretical and practical understanding of the operation and construction of the microscope and how to obtain the optimum performance from it in routine operation.

MCAN5101 Confocal & Fluorescence Microscopy

Credit points: 6 Teacher/Coordinator: Assoc. Prof. Filip Braet Session: Semester 1, Semester 2 Classes: 8 one hour lectures, thirty hour practicals (5 sessions). Prerequisites: MCAN 5005. Assessment: 60% portfolio, 30% exercises, 10% attendance and participation.

For the latest updates, visit Handbooks online.

http://www.usyd.edu.au/handbooks
Introduces the general principles of confocal microscopy and training in the use of the confocal microscope. It covers the theory behind confocal microscopy, the instrumentation and its applications. Develops knowledge and skills in specimen preparation for biological and medical applications of optical and confocal microscopes such as immunohistochemistry, cell loading, GFP.

MCAN5102

Biological Specimen Preparation

Credit points: 6
Teacher/Coordinator: Dr Lilian Soon and Dr Allan S. Jones

Overview of stereology, including geometrical probability, density extraction from images, limitations of measurement and general transforms, segmentation methods, calibration of hardware for inherent in image data, and the technology applied to it. Topics include diffraction, contrast theory in transmission electron microscopy, analytical electron microscopy, other X-ray, ion beam and scanned probe methodologies.

MCAN5110

Materials Preparation and Microscopy

Credit points: 6
Teacher/Coordinator: Prof. Simon Ringer, Dr. Tim Petersen

Sessions: Semester 1, Semester 2
Classes: Electron microscopy section: 6 lectures, twenty three hours of practicals (13 sessions), one hour discussion, over one week. Light microscopy section: 2 one hour lectures, 4 three hour practicals, over one week. Prerequisites: MCAN5005
Assessment: Practical sessions assessed on basis of participation and competence. Electron microscopy section requires a report containing a portfolio of images of at least 2500 words (60%) and submission of 2-4 prepared specimens. Light microscopy requires submission of four individual specimens for assessment with an accompanying report on each (about 1500 words). A major written assignment of at least 2500 words (includes library search tasks).

Develops knowledge and skills in the fundamentals of specimen preparation for light microscopy. Techniques covered will include tissue processing for paraffin microtomy and an introduction to histochemical staining methods. In addition this unit will present the theory and practical skills of routine specimen preparation techniques used for electron microscopy in the biological sciences including fixing, embedding, sectioning, drying, coating and staining techniques. An introduction to cryotechniques and immuno methodologies is included.

MCAN5103

Image Analysis

Credit points: 6
Teacher/Coordinator: Dr Lilian Soon and Dr Allan S. Jones
Session: Semester 1, Semester 2
Classes: 3 thirty minute lectures, 3 five and a half hour laboratory practicals, 1 three and a half hour demonstrations
Assessment: Flat polished SEM specimen brass (20%), TEM specimen of Al or steel using electropolishing (20%), TEM cross-sectional specimen of a Si based devices using tripod polishing (30%), Quiz (20%), Materials preparation log (10%).

This unit provides students with the opportunity to extend the practical work encountered in other modules, and gain skills in carrying out and work under supervision. Students also need to enrol in MCAN5205 for assessment details.

MCAN5201

Research Methodology

Credit points: 6
Teacher/Coordinator: Assoc. Prof. Filip Braet
Session: Semester 2
Classes: Thirteen hours of lectures, one hour student presentation, four hours of tutorials/practicals
Assessment: Risk assessment (10%), written research proposal (30%), written experimental plan (30%), worked exercises in data analysis (30%).

This unit covers the principles and practice of research methodology. Topics included: literature and database searches; ethics and referencing; research proposals; safety, risk assessment and ethics; experimental design and documentation; statistics, errors and data analysis; and written and oral communication.

MCAN5201

Project and Report A

Credit points: 6
Teacher/Coordinator: Assoc. Prof. Filip Braet, Dr Allan Jones, Dr Lilian Soon
Session: Semester 1, Semester 2
Classes: At least forty five hours devoted to a research project
Assessment: Continuing unit (see MCAN 5201 for assessment details).

This unit covers the principles and practice of advanced microscopy techniques for probing cellular and biomolecular processes. It will cover techniques to investigate cellular processes at the molecular and protein level including, intracellular signalling, uptake and metabolism of drugs/carcinogens/exogenous material and localisation of enzymes/proteins associated with cells. Topics may include: advanced confocal microscopy, immunolabelling and associated cryo-procedures for EM, micro and nano-analytical procedures for biological applications.

MCAN5112

Advances in Modern Microscopy

Credit points: 6
Teacher/Coordinator: Dr Allan S Jones, A/Prof. Filip Braet, Dr Lilian Soon and others
Session: Semester 1, Semester 2
Classes: 12 one hour lectures, 2-4 one hour tutorials, 12 two hour practicals over a two week period.
Assessment: Six practical reports, two to four tutorial reports, two major assignments of approximately 2500 words.

This unit covers the principles and practice of advanced microscopy techniques. It will maintain a focus on cutting-edge techniques that reflect the dynamic advances occurring in microscopy technologies.

MCAN5210

Assessment: Written report including portfolio of images, at least 3000 words (100%).

This unit provides students with knowledge and training so that they may explore the relationships between the structure and properties of materials. The unit covers the principles and practice of materials characterisation with an emphasis on techniques for the quantitative determination of the nanoscale structure and chemistry of materials. Topics include diffraction, contrast theory in transmission electron microscopy, analytical electron microscopy, other X-ray, ion beam and scanned probe methodologies.

MCAN5111

Microscopy of Biomolecular Processes

Credit points: 6
Teacher/Coordinator: Assoc. Prof. Filip Braet
Session: Semester 2
Classes: 11 lectures and twenty four hours of practicals
Assessment: Assignments (90%), class participation (10%)

This unit covers the principles and practice of advanced microscopy techniques for probing cellular and biomolecular processes. It will cover techniques to investigate cellular processes at the molecular and protein level including, intracellular signalling, uptake and metabolism of drugs/carcinogens/exogenous material and localisation of enzymes/proteins associated with cells. Topics may include: advanced confocal microscopy, immunolabelling and associated cryo-procedures for EM, micro and nano-analytical procedures for biological applications.

MCAN5110

Nanostructural Analysis of Materials

Credit points: 6
Teacher/Coordinator: Prof. Simon Ringer, Dr Zongwen Liu
Session: Semester 1, Semester 2
Classes: 8 one hour lectures, twenty four hours of practicals, two hours of tutorials. Assumed knowledge: MCAN5005 or equivalent
Assessment: Written report including portfolio of images, at least 3000 words (100%).

This unit provides students with knowledge and training so that they may explore the relationships between the structure and properties of materials. The unit covers the principles and practice of materials characterisation with an emphasis on techniques for the quantitative determination of the nanoscale structure and chemistry of materials. Topics include diffraction, contrast theory in transmission electron microscopy, analytical electron microscopy, other X-ray, ion beam and scanned probe methodologies.
25. Postgraduate coursework: Microscopy and Microanalysis degrees

MCAN5202 Project and Report B
Credit points: 6 Teacher/Coordinator: Assoc. Prof. Filip Braet, Dr Alan Jones, Dr Lilian Soon. Session: Semester 1, Semester 2. Classes: At least forty five hours devoted to a research project. Corequisites: MCAN 5201. Assessment: Written report (70%) and a oral presentation (30%).
See MCAN 5201.

MCAN5203 Project and Report Part C
Credit points: 6 Teacher/Coordinator: Assoc. Prof. Filip Braet, Dr Allan Jones, Dr Lilian Soon. Session: Semester 1, Semester 2. Classes: Research project. Corequisites: MCANS201 Project and Report A MCANS202 Project and Report B MCANS210 Research Methodology. Assessment: Oral presentation (20%), problem solving task (20%), written report in the form of a journal publication (60%).
Note: Research path only

This unit of study is an extension of Project and Report A and B and is only for those students approved for the Research path. Students will further extend their research, as well as formulating a literature review and a research plan and incorporating referee’s comments into the final report. Students also need to enrol in or have completed MCANS201, MCANS202 and MCAN 5210.

MCAN5210 Research Methodology
Credit points: 6 Teacher/Coordinator: Dr Lilian Soon and Dr July Cairney. Session: Semester 2. Classes: Thirteen hours of lectures, one hour student presentation, four hours of tutorials/practicals. Assessment: Risk assessment (10%), written research proposal (30%), written experimental plan (30%), worked exercises in data analysis (30%).
Note: Core for research path, optional for Masters

This unit covers the principles and practice of research methodology. Topics included: literature and database searches; citing and referencing; research proposals; safety, risk assessment and ethics; experimental design and documentation; statistics, errors and data analysis; and written and oral communication.

Resolutions

Graduate Certificate in Applied Science (Microscopy and Microanalysis)

Graduate Diploma in Applied Science (Microscopy and Microanalysis)

Master of Applied Science (Microscopy and Microanalysis)

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science (Microscopy and Microanalysis);
1.1.2 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.3 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or
1.1.4 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;
1.1.5 the Master of Applied Science (Microscopy and Microanalysis);
1.1.6 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.7 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
1.1.8 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.

1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. Units of study

2.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science (Microscopy and Microanalysis) are listed in subsection 4.1.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in unit of study descriptions.

3. Requirements for Graduate Certificate in Applied Science (Microscopy and Microanalysis); Graduate Diploma in Applied Science (Microscopy and Microanalysis) and Master of Applied Science (Microscopy and Microanalysis)

3.1 Candidates for the Graduate Certificate in Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and 12 credit points from optional units of study.

3.2 Candidates for the Graduate Diploma in Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study and a further 24 credit points from optional units of study.

3.3 Candidates for the Master of Applied Science (Microscopy and Microanalysis) are required to complete satisfactorily 12 credit points from core units of study, a further 24 credit points from optional units of study, and 12 credit points of additional core project and report units of study.

[Section 2]

4. Details of units of study

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Course Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidacy may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of sub-section 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science (Microscopy and Microanalysis), the Graduate Diploma in Applied Science (Microscopy and Microanalysis), and the Graduate Certificate in Applied Science (Microscopy and Microanalysis), shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Microscopy and Microanalysis) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science (Microscopy and Microanalysis);

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Microscopy and Microanalysis) and/or the Graduate Diploma in Applied Science (Microscopy and Microanalysis) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Microscopy and Microanalysis);

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Microscopy and Microanalysis) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Microscopy and Microanalysis) and/or the Graduate Diploma in Applied Science (Microscopy and Microanalysis) and/or the Graduate Certificate in Applied Science (Microscopy and Microanalysis) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Microscopy and Microanalysis) and/or the Graduate Diploma in Applied Science (Microscopy and Microanalysis) and/or the Graduate Certificate in Applied Science (Microscopy and Microanalysis) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science (Microscopy and Microanalysis) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science (Microscopy and Microanalysis) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science (Microscopy and Microanalysis) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science (Microscopy and Microanalysis), Graduate Diploma in Applied Science (Microscopy and Microanalysis) and Master of Applied Science (Microscopy and Microanalysis) for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Microscopy and Microanalysis) may transfer, within three years, to the Graduate Diploma in Applied Science (Microscopy and Microanalysis) and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science (Microscopy and Microanalysis).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Microscopy and Microanalysis) may transfer, within three years, to the Master of Applied Science (Microscopy and Microanalysis) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Microscopy and Microanalysis).

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
26. Postgraduate coursework: Molecular Biotechnology degrees

Graduate Certificate in Applied Science (Molecular Biotechnology),
Graduate Diploma in Applied Science (Molecular Biotechnology)
Master of Applied Science (Molecular Biotechnology)

This chapter sets out the requirements for postgraduate degrees offered in the Faculty of Science in the area of Molecular Biotechnology. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at: www.usyd.edu.au/publications/calendar/

Course overview and outcomes
The Graduate Certificate in Applied Science (Molecular Biotechnology), Graduate Diploma in Applied Science (Molecular Biotechnology) and Master of Applied Science (Molecular Biotechnology) are articulated programs intended for industry employees and those experienced in related fields to obtain relevant knowledge in molecular biotechnology. They include teaching in current and innovative areas and provide specialisations with attractive prospects for retraining and employment and for further education.

These programs cover new and leading edge high technologies that provide education in relevant aspects of biology, biochemistry, chemistry, food science and technology, agricultural science, bioinformatics and information bioscience. They aim to provide a basic knowledge and skills base emphasising scientific applications.

The courses also provide a professional graduate education for scientists and technologists already working in these areas. Students will be exposed to a solid grounding in molecular biotechnology including an appreciation of social and ethical implications. This professional development award course is particularly designed for those seeking training in this expanding high technology area.

Optional units
Students may select optional units from any of the other graduate diploma or master’s courses offered by the Faculty, subject to timetable constraints. These optional units are listed in the postgraduate section of this handbook.

Please note, the unit MOBT5303 is not an allowable elective for graduate diploma students.

Units of study 2007
MOBT5101
Applied Molecular Biotechnology A
Credit points: 12 Teacher/Coordinator: Dr Neville Firth Session: Semester 1 Classes: 1 two hour lecture and 1 one hour tutorial per week Assessment: Continuous assessment throughout semester, end of semester examination

MOBT5102
Applied Molecular Biotechnology B
Credit points: 12 Teacher/Coordinator: Dr Rachel Codd Session: Semester 2 Classes: 1 two hour lecture and 1 one hour tutorial per week Assessment: Continuous assessment throughout semester, end of semester examination

MOBT5303
Applied Molecular Biotech C (Project)
Credit points: 6 Teacher/Coordinator: A/Prof Kevin Downward Session: Semester 1, Semester 2 Prerequisites: MOBT 5101 or 5102. Prohibitions: MOBT5103 Assessment: Report (60%) and individual/group poster and presentation (40%)

This unit of study provides a solid foundation for education and training in applied molecular biotechnology. Classes emphasise molecular biology and genetics combined with essential aspects underscoring modern molecular biotechnology.

Textbooks

BETH5201
Ethics and Biotech: Genes and Stem Cells
Credit points: 6 Session: Semester 2 Classes: The equivalent of one 2-hour seminar per week will be presented in an intensive format. In addition, students will spend up to four hours per week on online learning tasks, small group sessions, project work and consultation with lecturers over the course Assumed knowledge: A three-year undergraduate degree in science, medicine, nursing, allied health sciences, philosophy/ethics, sociology/anthropology, history, or other relevant field; or by special permission. Assessment: Essays, short written assignments, one project.
Note: A limited number of students may be granted permission to take this unit during their honours year.

This unit introduces students to the broader social/political, ethical/philosophical and legal/regulatory issues that underlie genetics, stem cell research and the emerging biotechnologies. The unit will provide a brief overview of the relevant science before considering scientific, cultural and religious understandings of life and human identity. The second part of the unit will review the political, regulatory and commercial context of biotechnology and the control of information. Students will then review the history of genetics and eugenics and the ethical issues that arise in clinical and population genetics, stem cell research and cloning. The final part of the unit will explore the boundaries of research and knowledge and the issues raised by emerging biotechnologies, such as nanotechnology and proteomics. Learning activities will include an intensive seminar program, small group sessions and reading. Students will be able to concentrate on stem cell research, clinical or molecular genetics or other biotechnologies according to their clinical and scientific interests and experience.
Note: This unit is available to students in the Master of Applied Science (Molecular Biotechnology) only.

This unit of study provides students with the opportunity to undertake hands-on experience in the biotechnology industry. This will typically involve placement in an approved industry partner’s facility on a part-time basis or a case study project conducted in association with an industry affiliate. Entry to an industry placement is limited by a quota and the availability of facilities and projects. Results obtained in MOBT units of study undertaken in the preceding semester (in theory and practical components) will decide whether students are assigned to placements or case study projects. All students enrolled in this unit are required to complete an industry placement suitability survey which will also be taken into consideration. Assessment is based on a student’s performance in their placement or project, a report, poster and presentation.

Resolutions

Graduate Certificate in Applied Science (Molecular Biotechnology)
Graduate Diploma in Applied Science (Molecular Biotechnology)
Master of Applied Science (Molecular Biotechnology)

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science (Molecular Biotechnology):
1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or
1.1.1.3 persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study;
1.1.2 the Graduate Diploma in Applied Science (Molecular Biotechnology):
1.1.2.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.2.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1; or
1.1.2.3 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;
1.1.3 the Master of Applied Science (Molecular Biotechnology):
1.1.3.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.
1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.
1.3 The additional requirements for Molecular Biotechnology are as follows.
1.3.1 Applicants for the Graduate Certificate in Applied Science (Molecular Biotechnology) should hold a bachelor’s degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology, or have previous experience in a relevant area that is considered to demonstrate the knowledge and aptitude required to undertake this award course.
1.3.2 Applicants for the Graduate Diploma in Applied Science (Molecular Biotechnology) should hold a bachelor’s degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology, or have completed the Graduate Certificate in Applied Science (Molecular Biotechnology) at the University of Sydney, without failing any units of study.
1.3.3 Applicants for a Master of Applied Science (Molecular Biotechnology) should hold a bachelor’s degree with credit average results in substantial study in areas of relevance to Molecular Biotechnology, such as biochemistry, biology, chemistry, genetics or molecular biology; or have completed the Graduate Certificate in Applied Science (Molecular Biotechnology) at the University of Sydney, without failing any units of study; or have completed the Graduate Diploma in Applied Science (Molecular Biotechnology) at the University of Sydney without failing more than 6 credit points of study.

2. Units of study
2.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science (Molecular Biotechnology) are listed in subsection 4.1.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the unit of study descriptions.
3. Requirements for Graduate Certificate in Applied Science (Molecular Biotechnology) (GradCertAppSc(MBT)); Graduate Diploma in Applied Science (Molecular Biotechnology) (GradDipApplSc(MBT)); Master of Applied Science (Molecular Biotechnology) (MApplSc(MBT))
3.1 Candidates for the Graduate Certificate in Applied Science (Molecular Biotechnology) are required to complete satisfactorily two core units of study (MOBT5101 and MOBT5102).
3.2 Candidates for the Graduate Diploma in Applied Science (Molecular Biotechnology) are required to complete satisfactorily two core units of study (MOBT5101 and MOBT5102) and 12 credit points from optional units of study.
3.3 Candidates for the Master of Applied Science (Molecular Biotechnology) are required to complete satisfactorily four core units of study (MOBT5101, MOBT5102, MOBT5203 or BETHS201, and MOBT5303) and 12 credit points from optional units of study.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science (Molecular Biotechnology) are listed in the following table.

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>Core/Option</th>

Unless otherwise indicated, all units are worth 6 credit points. To enrol in these units of study, candidates must satisfy the specific requirements relating to the subject area as detailed in subsection 3 of the Resolutions.

Core units only

Core units Master’s only

Core units all degrees
4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science.

6.2 Cross institutional study shall be available to students enrolled in the Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of sub-section 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science (Molecular Biotechnology), the Graduate Diploma in Applied Science (Molecular Biotechnology), and the Graduate Certificate in Applied Science (Molecular Biotechnology), shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Molecular Biotechnology) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Certificate in Applied Science (Molecular Biotechnology);

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Molecular Biotechnology) and/or the Graduate Diploma in Applied Science (Molecular Biotechnology) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Certificate in Applied Science (Molecular Biotechnology);

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Molecular Biotechnology) and/or the Graduate Diploma in Applied Science (Molecular Biotechnology) and/or the Graduate Certificate in Applied Science (Molecular Biotechnology) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will not be permitted to re-enrol.

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Molecular Biotechnology) and/or the Graduate Diploma in Applied Science (Molecular Biotechnology) and/or the Graduate Certificate in Applied Science (Molecular Biotechnology) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Molecular Biotechnology) and/or the Graduate Diploma in Applied Science (Molecular Biotechnology) and/or the Graduate Certificate in Applied Science (Molecular Biotechnology) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science (Molecular Biotechnology) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science (Molecular Biotechnology) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science (Molecular Biotechnology) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science (Molecular Biotechnology), Graduate Diploma in Applied Science (Molecular Biotechnology) and Master of Applied Science (Molecular Biotechnology) and transfer, within three years, to the Graduate Diploma in Applied Science (Molecular Biotechnology) and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science (Molecular Biotechnology).

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Molecular Biotechnology) and transfer, within three years, to the Graduate Diploma in Applied Science (Molecular Biotechnology) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Molecular Biotechnology).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Molecular Biotechnology) and transfer, within three years, to the Master of Applied Science (Molecular Biotechnology) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Molecular Biotechnology).

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
27. Postgraduate coursework: Neuroscience degrees

Graduate Certificate in Applied Science (Neuroscience)
Graduate Diploma in Applied Science (Neuroscience)
Master of Applied Science (Neuroscience)

Note: these award courses are not available to new students from 2007.

This chapter sets out the requirements for coursework postgraduate degrees offered in the Faculty of Science in the area of Neuroscience. A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously at the end of this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Course overview
The Graduate Certificate in Applied Science (Neuroscience), Graduate Diploma in Applied Science (Neuroscience) and Master of Applied Science (Neuroscience) are articulated programs that allow flexible combinations of units of study.

The programs cover basic concepts in neuroscience together with advanced treatment of most major current research areas in neuroscience, particularly those with medical and other potential applications, and an introduction to related developments in other disciplines.

Course outcomes
The study of the brains and nervous systems of living creatures represents one of the most exciting and fast moving fields in 21st century science. It is also one that is having a considerable impact on attempts to solve major problems in health, including various neural diseases, current social problems such as addiction, and longer term social trends such as aging. The programs are designed both for graduates already working in a field where development of their expertise in at least some aspects of neuroscience is important and for recent graduates who wish to acquire a solid and broad grounding in this area.

Many professionals, particularly in health-related areas, find that they need to update or broaden their knowledge and understanding of the structure and function of the nervous system. Traditionally such training has been provided within individual departments, such as anatomy, physiology, pharmacology or psychology, and consequently has tended to be narrow in focus. The present programs have from the outset been designed to be inter-disciplinary: most units of study are taught by staff from at least three different departments. This is to meet the aim of providing a broad and comprehensive treatment of neuroscience.

Upon completion of the graduate certificate, graduates will have a solid grounding in basic principles of neuroscience and more specialised understanding of four different areas. This is supplemented in the diploma by inclusion of a fifth area and by acquisition of some project skills by working on either a library- or laboratory-based project. Extension of these project skills is obtained during completion of the master's by working on a total of three unrelated projects, of which two would normally be laboratory-based.

Neuroscience units of study

NEUR5001
Neuroscience Laboratory Project
Credit points: 6 Session: S2 Late Int, Semester 1, Semester 2 Classes: It is expected that the student meet at least three times during the semester with the supervisor (personally arranged times) Prerequisites: 12 credit points from NEUR (5101, 5102, 5103, 5104, 5105, 5106, 5107, 5108) Assessment: Assessment is based on the submission and evaluation of a scholarly article (6,000 words maximum) reviewing a field of contemporary neuroscience research. The article will be assessed by two internal and one external reviewers. These evaluations will comprise the entire mark for this unit. Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day Note: Department permission required for enrolment.

This provides the opportunity to develop knowledge gained from units of study on a specialised topic. The topic and nature of supervision will be arranged between the student and an appropriate supervisor, subject to the approval of the Co-ordinator of the Neuroscience Program. This unit of study is available only to students enrolled in the Graduate Diploma of Applied Science (Neuroscience) or in the Master in Applied Science (Neuroscience). It would normally be available only after a student has completed two units of study in the Neuroscience program or equivalent units of study approved by the Dean.

NEUR5002
Neuroscience Laboratory Project A
Credit points: 6 Session: S2 Late Int, Semester 1, Semester 2 Classes: It is expected that the research project should occupy the equivalent of about 2.5 weeks full-time research (~ 84 hours). This work will be performed under the direct supervision of an approved academic. Prerequisites: 24 credit points from NEUR (5101, 5102, 5103, 5104, 5105, 5106, 5107, 5108) Assessment: Assessment for this unit of study comprises two elements. (1) Supervisors evaluation of student participation in laboratory work (attendance, technical skills, application) [10% of final mark]. (2) Written report in the style of a scientific journal article (i.e., a short communication in the European Journal of Neuroscience), which will be evaluated by two internal and one external reviewers [90% of final mark] Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day Note: Department permission required for enrolment.

This provides the opportunity to develop laboratory skills by participation in a research project on a specialised topic. The topic
and nature of supervision will be arranged between the student and an appropriate supervisor, subject to the approval of the Co-ordinator of the Neuroscience Program. This unit of study is available only to students enrolled in the Graduate Diploma of Applied Science (Neuroscience) or in the Master in Applied Science (Neuroscience). It would normally be available only after a student has completed four units of study in the Neuroscience program or equivalent units of study approved by the Dean.

NEUR5003
Neuroscience Laboratory Project B
Credit points: 6 Session: S2 Late Int, Semester 1, Semester 2 Classes: It is expected that the research project should occupy the equivalent of about 2.5 weeks full-time research (~84 hours). This work will be performed under the direct supervision of an approved academic. Prerequisites: NEUR5002 Assessment: Assessment for this unit of study comprises two elements. (1) Supervisors evaluation of student participation in laboratory work (attendance, technical skills, application) [10% of final mark]; (2) Written report in the style of a scientific journal article (i.e., a short communication in the European Journal of Neuroscience), which will be evaluated by two internal and one external reviewers [90% of final mark].
Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day
Note: Department permission required for enrolment.

This is similar to NEUR5002, but would involve a different supervisor and a topic in a different discipline from those for the project a student undertook for NEUR5002. A student is normally required to complete NEUR5002 before enrolling in NEUR5003.

NEUR5004
Neuroscience Laboratory Project C
Credit points: 6 Session: Semester 1, Semester 2 Classes: It is expected that the research project should occupy the equivalent of about 2.5 weeks full-time research (~84 hours). This work will be performed under the direct supervision of an approved academic. Prerequisites: NEUR5002 and NEUR5003. Assessment: Assessment for this unit of study comprises two elements. (1) Supervisors evaluation of student participation in laboratory work (attendance, technical skills, application) [10% of final mark]; (2) Written report in the style of a scientific journal article (i.e., a short communication in the European Journal of Neuroscience), which will be evaluated by two internal and one external reviewers [90% of final mark].
Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day
Note: Department permission required for enrolment.

This is similar to NEUR5002, but would involve a different supervisor and a topic in a different discipline from those for the projects a student undertook for NEUR5002 and NEUR5003. A student is normally required to complete NEUR 5002 and NEUR5003 before enrolling in NEUR5004.

SCEL106
Science Elective - Neuroscience
Credit points: 6 Session: Semester 1, Semester 2 Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day
Note: Department permission required for enrolment.

This unit is only available to students enrolled in the postgraduate Neuroscience program. The content of the unit, assessment requirements and hours required are by negotiation with the program coordinator.

SCEL506
Science Elective - Neuroscience
Credit points: 6 Session: Semester 1, Semester 2 Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day
Note: Department permission required for enrolment.

This unit is only available to students enrolled in the postgraduate Neuroscience program. The content of the unit, assessment requirements and hours required are by negotiation with the program coordinator.

Resolutions
Graduate Certificate in Applied Science (Neuroscience)
Graduate Diploma in Applied Science (Neuroscience)
Master of Applied Science (Neuroscience)

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science (Neuroscience):
1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or
1.1.1.3 persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study:
1.1.2 the Graduate Diploma in Applied Science (Neuroscience):
1.1.2.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.2.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1; or
1.1.2.3 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;
1.1.3 the Master of Applied Science (Neuroscience):
1.1.3.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.
1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. Units of study
2.1 The units of study for the Graduate Certificate in Applied Science (Neuroscience), Graduate Diploma in Applied Science (Neuroscience) and Master of Applied Science (Neuroscience) are listed in subsection 4.1.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the unit of study descriptions.

3.1 Candidates for the Graduate Certificate in Applied Science (Neuroscience) are required to complete satisfactorily four units of study selected from NEUR5101, NEUR5102, NEUR5103, NEUR5104, NEUR5105, NEUR5106, NEUR5107 or NEUR5108.
3.2 Candidates for the Graduate Diploma in Applied Science (Neuroscience) are required to complete satisfactorily five units of study selected from NEUR5101, NEUR5102, NEUR5103, NEUR5104, NEUR5105, NEUR5106, NEUR5107 or NEUR5108 and either NEUR5001 or NEUR5002.
3.3 Candidates for the Master of Applied Science (Neuroscience) are required to complete satisfactorily five units of study selected from NEUR5101, NEUR5102, NEUR5103, NEUR5104, NEUR5105, NEUR5106, NEUR5107 or NEUR5108 and three units of study selected from NEUR5001, NEUR5002, NEUR5003, NEUR5004.

[Section 2]
4. Details of units of study

4.1 The units of study for the Graduate Certificate in Applied Science (Neuroscience), Graduate Diploma in Applied Science (Neuroscience) and Master of Applied Science (Neuroscience) are listed in the following table.

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>All units are worth 6 credit points. There are no prerequisites, corequisites or other special conditions for enrolment in these units of study.</th>

</tbody>
</table>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, exercises, practical work, or project work as may be prescribed.
4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:
4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.
4.5 All units of study for a particular subject area may not be available every semester.
4.6 The Dean may allow substitution of any unit of study by another unit of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science (Neuroscience), Graduate Diploma in Applied Science (Neuroscience) and Master of Applied Science (Neuroscience) courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidature may be limited by a quota.
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of sub-section 1 above.

8. Discontinuation of enrolment

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature

9.1 A student may seek written permission from the Dean to suspend candidature in the course.
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress

11.1 Candidates for the Master of Applied Science (Neuroscience), the Graduate Diploma in Applied Science (Neuroscience), and the Graduate Certificate in Applied Science (Neuroscience), shall be governed by the rules as follows:
11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Neuroscience) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science (Neuroscience).
11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Neuroscience) and/or the Graduate Diploma in Applied Science (Neuroscience) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Neuroscience);
11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Neuroscience) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.
11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Neuroscience) and/or the Graduate Diploma in Applied Science (Neuroscience) and/or the Graduate Certificate in Applied Science (Neuroscience) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.
11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. Time limit

12.1 A candidate for the Graduate Certificate in Applied Science (Neuroscience) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.
12.2 A candidate for the Graduate Diploma in Applied Science (Neuroscience) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.
12.3 A candidate for the Master of Applied Science (Neuroscience) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. Credit transfer policy

14.1 Credit is not available in the Graduate Certificate in Applied Science (Neuroscience), Graduate Diploma in Applied Science (Neuroscience) and Master of Applied Science (Neuroscience) for postgraduate study which has not been undertaken in these award courses within the previous three years.
14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Neuroscience) may transfer, within three years, to the Graduate Diploma in Applied Science (Neuroscience) and receive credit for up to 24 credit points.
from the Graduate Certificate in Applied Science (Neuroscience).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Neuroscience) may transfer, within three years, to the Master of Applied Science (Neuroscience) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Neuroscience).

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
Master of Nutrition and Dietetics

Course overview
The MNutDiet is a course designed to survey all aspects of human nutrition, with special emphasis on the needs of dietitians who will be working in Australia. It provides the basic training for hospital and community dietitians and nutritionists and is one of the recognised professional courses for dietitians in Australia.

The course requires two years of full-time work and study. The first year consists of coursework, lectures, tutorials and practicals. In the second year, one semester is devoted to clinical training and the other semester is spent on a small research project. The dates for this course do not follow the undergraduate academic year. The second year commences in late January.

Course outcomes
Upon completion of the course, the graduate will have a sound knowledge base in nutrition and dietetics, possess the skills to improve nutritional status of individuals, families and the community at large and to modulate the course of illness with dietetics. The graduate will be skilled in basic research and have a lifelong commitment to the pursuit of excellence in professional conduct.

Admission requirements
Applicants must have a degree from a recognised tertiary institution and have completed two semesters of study in Biochemistry and two semesters in Human Physiology. This preparation is required by the Dietitians Association of Australia. Applicants who meet the minimum entry requirements are then ranked according to their academic record and performance in Biochemistry and Physiology. Offers of places are dependent upon the ranking of applicants and competition for places.

Course requirements
First year: This is an integrated academic year of teaching, practicals and study. As part of the course, students attend the Ryde College of Technical and Further Education for practicals in commercial cookery, followed by dietetic cookery. All students take the units of study listed below.

Second year: In the February semester of second year (Jan to June), students undertake a clinical and community dietetics training placement, while in the July semester of second year (July to Nov) students carry out a research project.

During the second year all students are required to attend formal lectures at the University on several days. Lectures on management, advanced clinical nutrition and advanced community nutrition are compulsory.

The units of study are supervised by a Program Committee in Nutrition and Dietetics, chaired by the Dean of the Faculty of Science.

Course Resolutions: see end of this chapter.

Unit of study descriptions
First year
NTDT5501
Nutritional Science
Credit points: 6 Teacher/Coordinator: A/Prof Samir Samman Session: Semester 1 Classes: 4 lectures per week. Assessment: Set reading, 2-hr exam

NTDT 5501 aims to give a broad appreciation of different nutrients and the ways in which they are metabolised. The focus is on the multiple factors that drive metabolism and subsequently the relationship between nutrients and health and/or disease. Nutrients are discussed according to category, macronutrients and micronutrients, and there are different themes, including: the chemistry of macronutrients, vitamins and minerals, food sources and factors affecting availability for absorption, metabolism and excretion of the nutrient, the biochemical, physiological and pharmaceutical actions, methods of assessing biochemical status, the requirements at each stage of life and recommended intakes, signs of deficiency and toxicity, interactions with other nutrients. NTDT 5501 is a compulsory unit of study for students undertaking the Master of Nutrition and Dietetics or Master of Nutrition Science degrees and complements the learning in Food Science. NTDT 5501 is also offered as an optional course to students in other degree programs.

Textbooks

NTDT5502
Food Science
Credit points: 3 Teacher/Coordinator: Prof. J Brand-Miller Session: Semester 1 Classes: 2 lectures per week. Assessment: Set reading, exam.

NTDT 5502 aims to give a broad appreciation of different types of foods, the ways in which they are processed and consumed, their social context as well as their nutritional attributes. The focus is on the multiple factors that drive a food's relationship to health and/or disease. Foods are covered according to category: animal foods, seafoods, cereals, sugars, fats and oils, dairy products, legumes, nuts, roots, tubers, green leafy vegetables, fruits, herbs and spices and alcohol. NTDT 5502 is a compulsory unit of study for students undertaking the Master of Nutrition and Dietetics or Master of Nutritional Science degrees and complements the learning in Nutritional Science. NTDT 5502 is also offered as an optional course to students in other degree programs.

Textbooks
NTDT5503
Dietary Intake & Nutritional Assessment
Credit points: 8 Teacher/Coordinator: Dr Karen Webb Session: Semester 1 Classes: 3 lectures, 2 workshops per week Assessment: Assignment, reports.

Basic concepts in nutritional status; four methods of dietary assessment in individuals, advantages and limitations; validation of dietary methods; nutritional guidelines, targets and recommended dietary intakes; computerized nutrient analysis; limitations of food composition analysis. Behavioural influences on food intake. Nutritional assessment of individuals through clinical examination and commonly used laboratory biochemical tests for nutritional status; methods used to diagnose nutritional deficiencies; specificity, reliability of biochemical tests. Anthropometry and body composition; soft tissue measurement; patient body fat; reference standards; growth standards and percentiles.

Textbooks

NTDT5504
Communications A
Credit points: 3 Teacher/Coordinator: Soumela Amanatidis Veronica Tafts Session: Semester 1 Classes: 2 lec, 1 workshop / wk Assessment: One assignment, 2 tutorial papers

NTDT 5504 introduces students to the theories of effective communication. Students will acquire skills used to communicate with individuals in a variety of contexts, including the patient/client and his/her family, colleagues, other health team members and the community-at-large. Factors enhancing and distracting from effective communication are identified. The role of the dietitian as a facilitator of change is explored. Barriers to change and techniques used to enhance compliance are identified. Opportunity is provided for students to evaluate their own communication and interviewing skills. Students will also acquire knowledge and skills in planning, implementing and evaluating small group education.

Textbooks

NTDT5305
Food Service Management
Credit points: 6 Teacher/Coordinator: Ms Maria Kokkinakos Session: Semester 1 Classes: 4 to 6 hours per week practical classes, 1.5 hours per week lectures, 2 site visits of 1.5 hours each. Assessment: Continuous assessment that may include practical work and project.

The study of food service systems for use in institutions.

Second year

NTDT5307
Clinical Nutrition and Dietetics
Credit points: 12 Session: Semester 2 Classes: Lectures average nine hours per week, tutorials/practicals average three hours per week. Assessment: Two assessment tasks and formal examination.

This unit of study includes paediatrics at the New Children's Hospital, the study of medicine as it relates to nutrition, and the modification of diet and nutrition support of patients with different illnesses.

NTDT5308
Community and Public Health Nutrition
Credit points: 10 Teacher/Coordinator: Ms Sue Amanatidis Session: Semester 2 Classes: Average of seven hours lectures per week. Assessment: Combination of assignments and formal exam.

This unit of study covers several topics which include: 1. Introduction to health promotion which aims to introduce students to planning, implementing and evaluating nutrition health promotion programs for various population groups. Topics covered include principles of health promotion, effective nutrition promotion strategies, and program evaluation. 2. Nutrition and chronic disease which examines the relationship and evidence for the role and etiology of chronic diseases such as cancer, heart disease, hypertension and diabetes. It also investigates the current nutrition policies and guidelines aimed at preventing these diseases. 3. Food habits which covers theories of food habits and examines food habits of various population groups such as children, adolescents, older people and vulnerable groups. 4. Basic concepts of epidemiology which investigates the advantages and limitations of various epidemiological methods.

NTDT5309
Communication
Credit points: 2 Teacher/Coordinator: Ms Veronica Tafts Session: Semester 2 Classes: Lectures average one hour per week, tutorials/practicals average one hour per week. Assessment: Two practical assessment tasks

The study of counselling and education methods to communicate nutrition to individuals, groups and nations.

NTDT5310
Nutrition Research Project
Credit points: 24 Teacher/Coordinator: A/Prof Samir Samman Session: Semester 1, Semester 2 Classes: Tutorials two hours per week, supervised research experience. Assessment: Two assignments, presentation, report.

During the research semester each student has a research supervisor. Research projects can include small surveys, simple bench work, supervised hospital assignments or library searches, and are carried out in the University or with an external supervisor. Students also attend nutrition seminars.

NTDT5311
Nutrition Practice
Credit points: 12 Teacher/Coordinator: Ms Margaret Nicholson Session: Semester 1, Semester 2 Classes: Whole day lectures/workshops held on two to four occasions through the semester. Assessment: Attendance only

Note: This unit of study will commence prior to the start of semester.

The aim of this unit is to provide further knowledge and develop counselling strategies in specialty areas of dietetic practice. It builds on subjects introduced in the first year of the Masters course.

NTDT5312
Nutrition & Dietetics Training Placement
Credit points: 24 Teacher/Coordinator: Ms Margaret Nicholson Session: Semester 1, Semester 2 Classes: 18 week full time attendance of practical placement at clinical/community/food service sites. Assessment: Practical work and attendance

Note: This unit of study will commence prior to the start of semester.

Students are attached to two or more teaching hospitals and their associated community dietetic centres. The majority of time is spent in the wards or outpatient departments. There are up to 20 weeks' of training in dietetic practice in major primary health institutions so this unit starts early.

Resolutions
Master of Nutrition and Dietetics

[Section 1]

1. Admission

1.1 The Faculty of Science, on the recommendation of the Nutritional Science Program Committee, may admit to candidate for the degree:

1.1.1 graduates of the University of Sydney who have, unless exempted by the Nutritional Science Program Committee, completed acceptable units of study in Biochemistry and Physiology.

1.1.2 graduates of other universities who have qualifications equivalent to those specified in 1.1.1, and on such conditions as the Nutritional Science Program Committee may prescribe.
2. Units of study
2.1 The units of study for the Master of Nutrition and Dietetics are listed in subsection 4.1.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in description of units of study associated with this course.

3. Requirements for the Master of Nutrition and Dietetics
3.1 Candidates for the Master of Nutrition and Dietetics are required to complete satisfactorily units of study granting a minimum of 48 credit points selected from the table of units of study in subsection 4.1, in their first year of study.
3.2 In the second year of candidature a candidate will:
3.2.1 undertake training in the dietetics departments of primary health care settings;
3.2.2 complete further units of study as prescribed by the Nutritional Science Program Committee; and
3.2.3 undertake a project approved by the Head of the Human Nutrition unit. The results of this project shall be presented for examination in the form of a long essay.

[Section 2]

4. Details of units of study
4.1 The units of study for the Master of Nutrition and Dietetics are listed in the following table (in accordance with requirements in subsection 4.1):

<table>

</table>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.
4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:
4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.
4.5 All units of study for a particular subject area may not be available every semester.
4.6 A candidate shall complete in the first year of candidature such units of study as may be prescribed by the Nutritional Science Program Committee in: Nutritional Biochemistry, Nutritional Science, Food Science and Food Science, Nutrition in Individuals, Nutrition in Populations, Principles of Dietetic Practice, Clinical Nutrition, Nutrition Management, Communications.

5. Enrolment in more/less than minimum load
5.1 A candidate for the Master of Nutrition and Dietetics may proceed on a full-time basis only.

6. Cross-institutional study
6.1 Cross institutional study shall not be available to students enrolled in Master of Nutrition and Dietetics, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to candidature may be limited by a quota.
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature
9.1 A student may seek written permission from the Dean to suspend candidature in the course.
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress
11.1 Candidates for the Master of Nutrition and Dietetics shall be governed by the rule as follows:
11.1.1 A student who has failed a cumulative total of 12cp at any stage of enrolment in the Master of Nutrition and Dietetics will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be terminated and the student will not be permitted to re-enrol.

12. Time limit
12.1 A candidate for the degree shall be enrolled full-time and, except with the permission of the Faculty of Science, shall complete the requirements for the degree no later than two years from the date of first enrolment.

13. Assessment policy
13.1 On completion of the requirements for the degree, the Faculty shall determine the result of the candidature, on the recommendation of the Nutritional Science Program Committee, acting on a report from the Head of the Human Nutrition unit.

14. Credit transfer policy
14.1 Credit is not available in the Master of Nutrition and Dietetics for previous study.

Master of Nutritional Science
Note: this award course is not available to new students in 2007.

Course overview
The MNutrSc provides the same survey of all aspects of human nutrition in the first year as the MNutrDiet, but is designed for those persons who wish to pursue a career in nutrition research. The second year is devoted to a research project, with regular seminars. Students have a range of areas to choose from for their research year, for example sports nutrition, lipid biochemistry, infant nutrition or ecological research.

Course outcomes
Upon completion of the course the graduate will have a sound knowledge base in nutritional science and possess the skills to conduct nutrition research projects.
Course requirements

First year: The first year coursework and practicals coincide with those for MNutrDiet except that NTDT5305 is replaced with the units of study NTDT5306 and NTDT5315.

Second year: The second year is devoted to a full-time research project, supervised by a member of the academic staff of the Human Nutrition Unit, which is written up for assessment in a short thesis. Students enrol in NTDT5313 and NTDT5314.

Unit of study descriptions

See also units listed under first year Master of Nutrition and Dietetics

NTDT5306 Introduction to Food Service

Credit points: 3 Teacher/Coordinator: Ms Maria Kokkinakos Session: Semester 1 Classes: 1.5 hours per week lectures, 2 site visits of 1.5 hours each. Assessment: Continuous assessment that may include project.

An introduction to food service systems in institutions.

NTDT5315 Scientific Methodology in Nutrition

Credit points: 3 Teacher/Coordinator: A/Prof Samir Samman Session: Semester 1 Classes: Tutorials one hour per week Assessment: One assignment, presentation, report.

A small report on the desired area of research in year 2.

NTDT5313 Nutritional Science Research A

Credit points: 24 Session: Semester 1 Classes: Supervised research experience. Assessment: Presentation, research proposal.

Students have a range of areas to choose from for their research year, e.g. sports nutrition, lipid biochemistry, infant nutrition or ecological research.

NTDT5314 Nutritional Science Research B

Credit points: 24 Session: Semester 2 Classes: Tutorials two hours per week, supervised research experience. Assessment: 1 assignment, presentation, report.

3. Requirements for the Master of Nutritional Science

3.1 Candidates for the Master of Nutritional Science are required to complete satisfactorily units of study granting a minimum of 48 credit points selected from units of study listed in subsection 4.1, in their first year of study.

3.2 A candidate in the second year of candidature shall proceed by research and thesis. A candidate shall:

3.2.1 carry out an original investigation on a topic approved by the Head of the Human Nutrition unit;

3.2.2 write a short thesis embodying the results of the investigation and state in the thesis, generally in a preface and specifically in notes, the sources from which the information was taken, the extent to which the work of others has been made use of, and the proportion of the thesis which the student claims as original; and

3.2.3 lodge with the Faculty three copies of the thesis, typewritten and bound.

3.2.4 The thesis shall be accompanied by a certificate from the supervisor stating whether in his or her opinion the form of the presentation of the thesis is satisfactory.

3.2.5 A candidate may not present as the thesis any work which has been presented for a degree at this or another tertiary institution, but shall not be precluded from incorporating such work in the thesis, provided that in presenting the thesis indications are given to the part of the work which has been so incorporated.

3.3 The Faculty shall lodge one copy of the thesis with the Librarian if the degree is awarded.

3.4 Supervision

3.4.1 The Faculty of Science shall appoint, on the recommendation of the Head of the Human Nutrition unit, a full-time member of the teaching staff of the University to act as the supervisor for each candidate.

[Section 2]

4. Details of units of study

</table>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 A candidate shall complete in the first year of candidature such units of study as may be prescribed by the Nutritional Science Program Committee in: Nutritional Biochemistry, Nutritional Science, Foods and Food Science, Nutrition in Individuals, Nutrition in Populations, Principles of Dietetic Practice, Clinical Nutrition, Nutrition Management, and Communications.

5. **Enrolment in more/less than minimum load**

5.1 A candidate for the Master of Nutritional Science may proceed on a full-time basis only.

6. **Cross-institutional study**

6.1 Cross institutional study shall not be available to students enrolled in the Master of Nutritional Science, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. **Restrictions on enrolment**

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of section 2 above.

8. **Discontinuation of enrolment**

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. **Suspension of candidature**

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. **Re-enrolment after an absence**

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. **Satisfactory progress**

11.1 Candidates for the Master of Nutritional Science shall be governed by the rule as follows:

11.1.2 A student who has failed a cumulative total of 12cp at any stage of enrolment in the Master of Nutritional Science will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be terminated and the student will not be permitted to re-enrol.

12. **Time limit**

12.1 A candidate for the degree shall proceed full-time and, except with the permission of the Dean of the Faculty, shall complete the requirements for the degree no later than two years from the date of first enrolment.

13. **Assessment policy**

13.1 The Dean of the Faculty, on the recommendation of the Head of the Human Nutrition unit, shall appoint two or, where the Dean considers it appropriate, more than two examiners of whom one may be the person appointed to act as supervisor of the candidate.

13.2 On completion of the requirements for the degree, the Faculty shall determine the results of the candidature, on the recommendation of the Nutritional Science Program Committee, acting on a report from the Head of the Human Nutrition unit.

14. **Credit transfer policy**

14.1 Credit is not available for the Master of Nutritional Science.

---

**Applied Science (Nutrition and Dietetics)**

The following Applied Science degrees are not available to new students in 2007:

- Graduate Certificate in Applied Science (Nutrition and Dietetics)
- Graduate Diploma in Applied Science (Nutrition and Dietetics)
- Master of Applied Science (Nutrition and Dietetics)

For course details and resolutions, see the 2006 Faculty of Science Handbook.
28. Postgraduate coursework: Nutrition and Dietetics degrees
This chapter sets out the requirements for coursework postgraduate degrees offered by the School of Psychology.

The information in this chapter contains information in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously in this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

The School offers a range of degrees:
- the Graduate Diploma in Psychology for graduates in other disciplines to obtain a Psychology major
- the Graduate Diploma in Science (Psychology)[not open to new students in 2007]
- the Graduate Certificate, Graduate Diploma and Master of Applied Science (Psychology of Coaching) - an articulated postgraduate program for students interested in the applied science of human performance enhancement and coaching.
- the Graduate Certificate, Graduate Diploma and Master of Applied Science (Health Psychology) – an articulated postgraduate program for students interested in the theory and practical applications of health psychology.

Graduate Diploma in Psychology

Course outcomes
Upon completion of the course, the graduate will have a Psychology major, accredited by the Australian Psychological Society, equivalent to that available in the Bachelor of Arts, Bachelor of Science, Bachelor of Economics (Social Science), Bachelor of Liberal Studies or the Bachelor of Arts and Sciences. They will have studied all basic areas of experimental Psychology, statistical methods in Psychology, and an extensive range of optional topics. They will be eligible to apply to continue to a fourth year in Psychology (Honours) and from there to a higher degree in Psychology.

Eligibility for admission
Applicants holding relevant degrees
1. The Faculty of Science may admit to candidature applicants who hold the award course of Bachelor of Science, Bachelor of Arts, Bachelor of Economics (Social Science), Bachelor of Liberal Studies from the University of Sydney, Bachelor of Arts and Sciences or equivalent degree as deemed by the Faculty, who have not previously completed a major in Psychology. When assessing an applicant, both undergraduate record and UAI (or equivalent) may be taken into account.

Applicants who have completed junior Psychology units
2. Applicants must have already successfully completed 12 credit points of Junior Psychology (currently PSYC1001 and 1002) or equivalent within the last 10 years, except that an applicant who has completed 6 credit points of Junior Psychology at The University of Sydney in the previous 12 months with a grade of Distinction or better, shall be considered for admission. (Subject to Academic Board approval).

Method of progression
Students are required to study a minimum of 48 credit points of Intermediate and Senior level Psychology. This shall consist of 24 credit points of Intermediate Psychology (currently PSYC2111 or 2011, 2112 or 2012, 2113 or 2013 and 2114 or 2014) and a minimum of 24 credit points of Senior Psychology. Students must complete the necessary qualifying units of study for entry into later units of study. Normally, progression will be over a minimum of four semesters. Students may study additional Senior Psychology if they wish.

Study in Psychology beyond the graduate diploma
To be eligible for study in Psychology beyond the graduate diploma at the University of Sydney, students must, except with School approval, include PSYC3010 Advanced Statistics for Psychology for entry to the Graduate Diploma in Science or Psychology 4 (Honours). Successful completion of HPSC3023 History & Philosophy of Psychology & Psychiatry is essential for students intending to take the Theoretical Thesis option in Psychology Honours.

Exemptions and Advanced Standing
Students may apply for exemptions if they have already completed studies which the Faculty deems equivalent to those in the program. Such units of study must have been completed within the previous 10 years. The number of exemptions allowed will not exceed Faculty of Science regulations or will not exceed 24 credit points, whichever is the lower.

See chapter 10 for unit of study descriptions, under the School of Psychology entry.

Resolutions
Graduate Diploma in Psychology

[Section 1]
1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for the Graduate Diploma in Psychology:
1.1.1 applicants who hold the degree of Bachelor of Science, Bachelor of Arts, Bachelor of Economics (Social Science), or Bachelor of Liberal Studies from the University of Sydney, or 1.1.2 applicants who hold an equivalent degree as deemed by the Faculty, who have not previously completed a major in Psychology.
1.2 When assessing an applicant, both undergraduate record and UAI (or equivalent) may be taken into account.
1.3 Applicants must have already successfully completed 12 credit points of Junior Psychology (currently PSYC1001 and 1002) or equivalent within the last 10 years, except that an applicant who has completed 6 credit points of Junior Psychology at the University of Sydney in the previous 12 months with a grade of Distinction or better shall be considered for admission.
1.4 Conditions of candidature are prescribed by Resolutions of the Faculty.
2. Units of study
2.1 The units of study for the Graduate Diploma in Psychology are listed in Table 1 associated with the resolutions of the Bachelor of Science.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the description of units of study associated with these resolutions.
3. Requirements for the Graduate Diploma in Psychology
3.1 A candidate shall complete coursework to the value of 48 credit points comprising:
3.1.1 24 credit points of Intermediate units of study in Psychology, and
3.1.2 24 credit points of Senior units of study in Psychology which must, except with Departmental approval, include PSYC3012 or 3013 and one of PSYC3011, 3012, 3013 and 3014.
3.2 The prerequisites and progression requirements for these units of study as set out in Table I for the BSc must be met.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Diploma Psychology are listed in Table 1 of the Resolutions of the Bachelor of Science.
4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.
4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:
4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.
4.5 All units of study for a particular subject area may not be available every semester.

5. Enrolment in more/less than minimum load
5.1 A candidate may proceed on a part-time basis only.
6. Cross-institutional study
6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Diploma in Psychology except where the University of Sydney has a formal Cooperation Agreement with another University.
7. Restrictions on enrolment
7.1 Admission to the Graduate Diploma in Psychology, may be limited by a quota.
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsectorial basis.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidature
9.1 A student may seek written permission from the Dean to suspend candidature in the course.
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester or the end of May for Second Semester of the same year.

11. Satisfactory progress
11.1 Candidates for the Graduate Diploma in Psychology shall be governed by the rule as follows:
11.1.2 A student who has failed a cumulative total of 12cp at any stage of enrolment in the Graduate Diploma in Psychology will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be terminated and the student will not be permitted to re-enrol.

12. Time limit
12.1 A candidate for the Graduate Diploma in Psychology shall complete the requirements for the award in a minimum of four semesters and a maximum of eight semesters, and (in the event of suspension) except with permission of the Dean within five calendar years of admission to candidature.

13. Assessment policy
13.1 A candidate may be tested by written and oral examinations, assignments, exercises and practical work or any combination of these.
13.2 On completion of the requirements for the Graduate Diploma in Psychology, the results of the examination of the coursework and participation in the seminar series shall be reported by the School of Psychology to the Faculty, which shall determine the result of the candidature.

14. Credit transfer policy
14.1 Students may apply for credit (up to 24 credit points) for unit(s) of study where they have already completed studies which the Faculty deems equivalent to unit(s) in the Graduate Diploma in Psychology and for which no award has been conferred.
14.2 Such units of study must have been completed within the previous 10 years.

Graduate Diploma in Science (Psychology)
This degree is not available to new students in 2007

Award Course overview
The Graduate Diploma in Science (Psychology) is an Honours equivalent (in the terms used by the Australian Psychological Society) fourth year of study in Psychology. It was designed to meet the needs of students wishing to continue with Psychology but who have not completed a four year Honours program. The diploma requires one year of full-time or two years of part-time study.

Course outcomes
Upon completion of this course the graduate will have a sound background in significant issues in general and applied psychology, an understanding of research methodology in both experimental and field studies contexts, be capable of finding and assessing relevant research literature, be eligible to apply for further programs of study in psychology and be prepared to undertake supervised training in certain professional areas of psychology.

Eligibility for admission
To be considered for admission to the degree an applicant must be a holder of a bachelor's degree with an APS accredited major in Psychology within the past 10 years from a recognised tertiary institution and has achieved a minimum Credit average in senior (third) year units of study which includes a unit in statistics/research methods which meets the requirements of the School. Entrance may be limited by a quota. Entry is normally based on academic merit. Requests for deferral of commencement of candidature will not be granted.

Course requirements
The program involves attending lectures and seminars in 5 core and 2 optional units. The optional units offered are PSYC4506 Health and Safety Psychology Issues, PSYC4507 Counselling Psychology and PSYC4508 Psychology of Addiction. A full-time load will require 3 days of attendance per week. Part-time candidates will complete the PSYC4500 Research Project (A), PSYC4505 Research Project (B), and PSYC4501 Psychological Research Methods in their first year.
Course Resolutions: see this chapter.

Core units
The compulsory (core) units are PSYC4500 Research Project (A), PSYC4501 Psychological Research Methods, PSYC4502 Ethics, PSYC4503 Special Fields Topic and PSYC4505 Research Project (B).

Options
The optional units offered are PSYC4506 Health and Safety Psychology Issues, PSYC4507 Counselling Psychology and PSYC4508 Psychology of Addiction. A full-time load will require 3 days of attendance per week. Part-time candidates will complete the PSYC4500 Research Project (A), PSYC4505 Research Project (B), and PSYC4501 Psychological Research Methods in their first year.
Entry to other postgraduate programs
Students who have completed the Graduate Diploma in Science (Psychology) are eligible to apply for fifth and sixth year university programs in Psychology.

Current Departmental rules on progress
Candidates will not normally be allowed to repeat failed units of study if they have also failed the research project. Candidates who have passed the research project may be allowed to repeat up to two failed units of study.

Unit of study descriptions

Core units

**PSYC4500 Research Project (A)**

Credit points: 10  Session: Semester 1 Classes: One 1 hour class per week. Corequisites: PSYC4501 Prohibitions: PSYC4710 Assessment: 9000 word report

This is the largest single component of the Graduate Diploma program. The Research Project is a yearlong component and is intended to demonstrate the capability of students to conceive and carry out original high level research. The Research Project is supervised by either a member of the academic staff or an approved supervisor from outside the School. Each supervisor has nominated a specific research area on which a small group of students will work. Each student in the research group must generate their individual hypothesis or hypotheses and prepare and submit their own independently written report, although a single experiment/survey will be carried out and the collection of data and data sets may be shared. A completed draft of each student's report will be read by the supervisor prior to the writing of a final version. The text of the report must not exceed 9,000 words in length (excluding abstract, tables, appendices and references).

**PSYC4501 Psychological Research Methods**

Credit points: 8  Session: Semester 1 Classes: 44 hours per semester. Prohibitions: PSYC4711  Assumed knowledge: Nothing in excess of requirements set for admission into the GradDipSci(Psych) programme

Assessment: EDSA - examination; FRM - class quiz and examination

EXPERIMENTAL DESIGN AND STATISTICAL ANALYSIS (EDSA)
The aim of this course is to expand the menu of statistical tools available to students for their research, and to develop their understanding of the conceptual bases of these tools. Tutorial work will involve exposure to the features available in a large statistical package (SPSS) while at the same time reinforcing the concepts discussed in lectures. FIELD RESEARCH METHODS (FRM) The aim of this course is to: - develop students' awareness of the methods of field research in Psychology; - encourage a critical evaluation of the methods and develop an awareness of the problems in obtaining accurate field research data; - encourage a critical awareness of ways in which these problems might be overcome; - overall, to develop students' expertise in carrying out quality field research and to be a critical consumer of others' field research. The lecture series, supplemented by other reading, follows a progressive consideration of all stages that may be encountered in a field research project, from decisions on the appropriate statement of the research problem, methods of gathering data, sampling procedures, coding of data, etc. The tutorial sessions utilize a series of in class and out of class exercises to give students a "hands on" awareness of the methods, problems and developing solutions in the field research process.

**PSYC4503 Special Fields Topic**

Credit points: 6  Session: Semester 1  Classes: One 1 hour seminar per week for 12 weeks. Prohibitions: PSYC4715, PSYC4719 Assessment: Assignments

Students choose one of the topics available. The research seminar areas currently available are: Conceptual Foundations of Quantitative Methods, Current Approaches in Advanced Social Psychology, Current Controversies in Developmental Psychology, Eating and Weight-Related Issues, Health Psychology, Intelligence and Cognitive Abilities, Neuropsychological Rehabilitation, Learning, Models of Anxiety and Depression, Mysteries of the Mind, Neuroscience, Research in Counselling Psychology, Theory and Systems, Visual Neuroscience and Perceptual Systems, which are also offered as part of the Psychology Honours program. This list could change subject to staff availability.

**PSYC4505 Research Project (B)**

Credit points: 10  Session: Semester 2 Classes: One 1 hour supervision per week. Prerequisites: PSYC4500 Prohibitions: PSYC4720 Assessment: 9000 word report

See description under Research Project A (PSYC4500) above.

**PSYC4502 Ethics**

Credit points: 2  Session: Semester 2 Classes: One 1 hour lecture per week for 7 weeks. Prohibitions: PSYC4712 Assessment: Examination (1.5 hours) 100%

This unit covers current ethical and professional issues in Psychology. Lectures concerning current ethical and professional issues will be given by Psychologists working in a range of professional settings, such as clinical, counselling, organizational, assessment, educational, health and research settings. The lecturers will discuss professional and ethical issues that commonly arise in these settings.

Textbooks

APs Code of Conduct for Psychologists. Other references vary with topics covered each year.

Elective units

**PSYC4509 Problem Gambling**

Credit points: 6  Session: Semester 2  Classes: 25 hours per semester. Assessment: Essay and examination.
This unit is intended to provide a comprehensive coverage of the causes, assessment and treatment of problem gambling. The syllabus includes: History of gambling; explanations for gambling behaviour; concepts of compulsive gambling, pathological gambling, excessive gambling and problem gambling; prevalence of problem and pathological gambling; theories of causation of pathological gambling; assessment of excessive gambling and the problems caused by excessive gambling; treatment of pathological gambling; behavioural, cognitive, client centred, and other methods; effectiveness of different treatment approaches; preventive strategies.

PSYC4506
Health and Safety Psychology Issues
Credit points: 6 Session: Semester 2 Classes: 25 hours per semester. Prohibitions: PSYC4716 Assessment: Class presentation (25%) and take-home exam (75%)

This course will elucidate the principles of health psychology (which is concerned with human behaviour in the context of health & illness), via critical evaluation of their relevance to various health problems. Topics covered include risk perception, genetic counseling and testing, health and illness behaviour, psychosocial predictors of disease development and outcome, psychosocial interventions, doctor-patient communication and end-of-life issues.

PSYC4507
Counselling Psychology
Credit points: 6 Session: Semester 2 Classes: 25 hours per semester. Prohibitions: PSYC4717 Assessment: Examination and seminars

The weekly meetings will consist of lectures, seminar papers, discussions, role plays and demonstrations. The main aim of the course is to consider the application of general skills and theories of counselling to specific areas of counselling. Topics will be selected from those listed below on the basis of the experience and interests of the class members. Defining counselling. Skills oriented models of individual counselling and the organizing principles of counselling as proposed by various theoretical viewpoints. Relational counselling: Extending theories and principles of individual counselling to relational work and issues. Practice: Applying counselling theory and skills in various community settings; Industry, education, personal growth, vocational guidance, rehabilitation, health, grief, contemporary issues (eg. domestic violence, suicide), multicultural issues. Professional issues: Supervision; burnout; ethics; professional associations; using research to guide and inform counselling practice.

Textbooks

PSYC4508
Psychology of Addiction

The course is concerned with addictive behaviours such as smoking, alcohol consumption, illicit drug use, eating, gambling, and playing computer games. The course begins with a critical examination of the meaning of ‘addiction’. The remainder of the course is divided between addictive behaviour where drugs are not involved (so-called ‘psychological addictions’) and addictive behaviour where consumption of drugs is involved (so-called ‘drug addictions’). The focus of the first segment on psychological addiction is the question of whether such behaviour meets the criteria for description as addictive, and what is gained by broadening or weakening the notion of addiction to include psychological addiction. The behaviours used as the primary examples of psychological addictions are excessive eating and pathological gambling. The focus of the second segment on drug addiction is the biology, pharmacology, genetics and socio-political climate of drug consumption. Emphasis is placed on the question of whether nicotine is an addictive substance. Throughout the unit, there is a strong emphasis on clinical aspects of addictive behaviour and preferred treatment options. The course is intended to be a useful introduction to students who are contemplating a career in drug and alcohol work, in addictions counselling and in the treatment of pathological gambling.

Resolutions
Graduate Diploma in Science (Psychology)

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for the Graduate Diploma in Science (Psychology):
1.1.1 graduates who have completed a bachelor's degree, with an APS accredited major in Psychology from a recognised tertiary institution within the past 10 years and who have achieved a minimum of credit average in Senior (third year) units of study, which includes units of study in statistics/research methods, which meet the requirements of the Department.
1.2 The Academic Board, on the recommendation of the appropriate Interdepartmental Committee and of the Faculty, may admit to candidature for the graduate diploma, graduates of other universities or other appropriate institutions who have qualifications equivalent, in the opinion of the Academic Board, to those specified in subsection 1.1.1.

2. Units of study
2.1 The units of study for the Graduate Diploma in Science (Psychology) are listed in the table in subsection 4.1.1 of these resolutions.
2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the unit of study descriptions.
3. Requirements for the Graduate Diploma in Science (Psychology)
3.1 Candidates for the Graduate Diploma in Science (Psychology) are required to complete satisfactorily units of study giving credit for a total of 48 credit points, selected from units of study approved for the Graduate Diploma in Science (Psychology).

[Section 2]

4. Details of units of study

5.1 A candidate may seek written permission from the Dean to suspend candidature.
5.2 Suspension may be granted for a maximum of one year.

6. Cross-institutional study
6.1 Cross-institutional study shall not be available to students enrolled in the Graduate Diploma in Science (Psychology) except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to the Graduate Diploma in Science (Psychology), may be limited by a quota.
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

7. Discontinuation of enrolment
7.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
7.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

8. Suspension of candidature
8.1 A student may seek written permission from the Dean to suspend candidature in the course.
8.2 Suspension may be granted for a maximum of one year.

9. Re-enrolment after an absence
9.1 A student who plans to re-enroll after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

10. Satisfactory progress
10.1 A candidate cannot repeat any part of the Graduate Diploma in Science (Psychology) if he or she fails the Research project and at least one other component OR passes the Research Project but fails more than two components.
10.2 If the candidate fails either the Research Project or one other component, permission may be granted for the candidate to repeat that unit of study the following year.
10.3 The Dean may call upon any candidate to show cause why that candidature should not be terminated by reason of unsatisfactory progress towards completion of the Graduate Diploma in Science (Psychology).

10.4 If good cause has not been established, the student’s candidature will be terminated.

11. Time limit
11.1 A candidate for the Graduate Diploma in Science (Psychology) shall proceed as a full-time student for a period of two semesters or, with the approval of the interdepartmental Committee, as a part-time student for four semesters.

12. Assessment policy
12.1 A candidate may be tested by written and oral examinations, assignments, exercises and practical work or any combination of these.
12.2 On completion of the requirements for the Graduate Diploma in Science (Psychology), the results of the examination of the coursework and participation in the seminar series shall be reported by the Interdepartmental Committee to the Faculty, which shall determine the result of the candidature.

13. Credit transfer policy
13.1 Credit is not available in the Graduate Diploma in Science (Psychology) for previous study.

Psychology of Coaching
Graduate Certificate in Applied Science (Psychology of Coaching)
Graduate Diploma in Applied Science (Psychology of Coaching)
Master of Applied Science (Psychology of Coaching)

Course overview
The Master of Applied Science (Psychology of Coaching) is an articulated postgraduate program which teaches the applied science of human performance enhancement and coaching. Coaching psychology sits at the intersection of counselling, clinical and organisational psychology and focuses on working with non-clinical populations. This program provides students with a sound grounding in the theoretical and methodological aspects of coaching and coaching psychology and teaches fundamental applied coaching skills.

Students enrolled in the Graduate Certificate in Applied Science (Psychology of Coaching) may only enrol part-time.

Study for the Graduate Diploma in Applied Science (Psychology of Coaching) and the Master of Applied Science (Psychology of Coaching) may be undertaken in either part-time or full-time mode.

The progression sequence for part-time students is as follows: First semester of enrolment PSYC4721 and PSYC4722; second semester of enrolment and following semesters, PSYC4724 and remaining elective units to suit the individual student’s needs and interests and to meet degree requirements.

For students studying full time, the progression sequence is as follows: First semester of enrolment PSYC4721; PSYC4722; second semester of enrolment and following semesters, PSYC4724 and remaining elective units to suit the individual student’s needs and interests and to meet degree requirements. PSYC4721 and PSYC4722 must be completed before enrolling in PSYC4724. If PSYC4741 and PSYC4722 are taken in separate semesters, students should enrol in PSYC4721 before PSYC4722.

Eligibility for admission
An applicant for admission will satisfy the admission requirements for the Graduate Certificate in Applied Science or the Graduate Diploma in Applied Science or the Master of Applied Science and:

1. have a minimum 3 year sequence in Psychology; and
2. relevant work experience. Relevant work experience may include counselling, experience in organisational learning and development, management experience, employment in applied...
psychology settings, professional coaching or other areas directly related to coaching.

Course outcomes
This program is designed to provide graduates with the key theoretical understandings and the core skills necessary to work as a coach in a wide range of settings. Graduates of this course will be equipped to work in the scientist-practitioner model, and can expect to find employment as human performance consultants and personal, workplace of executive coaches in industry, in the human resources field or in private practice.

Unit of study descriptions
Core units of study

PSYC4721
Theories & Techniques of Coaching Psych
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 3 hour lecture per week. Assessment: Written papers (essay, journal or case study) and exam.

This unit outlines the emergence of Coaching from its roots in personal development, sports coaching, management consulting, clinical and counselling psychology, and details the fundamental models and techniques of coaching. Theories and techniques will be evaluated by reference to empirical research and conceptual analysis. Drawing on a broad base of established Behavioural Science, primary attention will be paid to cognitive-behavioural and solution-focused theories and techniques of behaviour change and their application to coaching clients. We will also evaluate key popular psychological approaches to coaching and personal development. Each weekly seminar has a lecture component and an experiential learning component. The experiential learning component requires students to evaluate each week’s topic in relation to their own personal life experience and to participate in group discussion and coaching practice.

PSYC4722
Fundamentals of Coaching Practice
Credit points: 6 Session: Semester 1, Semester 2 Classes: Block teaching. Corequisites: PSYC 4721. Assessment: Written papers (essay, journal or case study) and exam.

This unit teaches the Fundamentals of coaching, and lays the foundations for sound contemporary practice. Drawing on established approaches (e.g. Egan, 1974; Whitmore, 1992) students will be trained in the core micro skills of coaching. The unit details key coaching strategies in relation to common applications of coaching; workplace coaching, executive coaching, and personal or life coaching. Core issues relating to mental health problems and coaching practice are addressed, and we explore the essentials of professional practice development/ marketing and Ethical (ICF) practice. Each seminar has a lecture component and an experiential learning component. The experiential learning component requires students to evaluate each topic in relation to their own personal life/work experience and to participate in group discussion. Practical experience of self-coaching and co-coaching are central aspects of this unit, students will apply self-coaching strategies to their own lives. This unit is run in a block teaching format.

PSYC4724
Coaching Practice: Co-Coaching & Groups
Credit points: 6 Session: Semester 1, Semester 2 Classes: One 3 hour lecture per week. Prerequisites: PSYC (4721 and 4722). Assessment: Written papers (case study and learning journal) and exam.

Students will consolidate the theory and skills acquired in PSYC4721 and PSYC4722 through a semester-long coaching practicum. Using real-life issues in a supportive and confidential environment, students will coach each other in a structured solution-focused personal coaching program based on the material taught in previous units of study. This unit gives students experience in being both a coach and a client. A key component of this course will be feedback from the lecturer on students’ coaching styles, skills and other relevant issues. As such this unit provides students with the opportunity to embed and develop their coaching skills. Case studies and case presentations will form part of the unit.

Elective units

PSYC4723
Socio-cognitive Issues in Coaching Psych
Credit points: 6 Session: Semester 1 Classes: Block teaching with some evening tutorials. Prerequisites: PSYC (4721 and 4722 and either 4724 or 4728). Assessment: Written papers (major and minor essay) and exam.

The aim of this unit is to give students an understanding of key socio-cognitive issues related to coaching and behaviour change. The focus of the unit is on critical appraisal of theory and the relation of theory to practice and research. Topics covered in this unit include models of self-regulated behaviour, personality type, the relationships between emotion, cognition and behaviour, and the roles of learnt resourcefulness, learned optimism, psychological mindedness, self-reflection and insight in behaviour change. The unit also critically evaluates contemporary understandings and assessments of emotional intelligence. Current topics and research methods in coaching psychology are also examined. Each weekly seminar has a lecture component and an experiential learning component. The experiential learning component requires students to evaluate each topic in relation to their own personal life/work experience and to participate in group discussion. This unit is run in a block teaching format.

PSYC4725
Assessment and Selection
Credit points: 6 Session: Semester 2 Classes: One 2 hour lecture per week. Prerequisites: PSYC (4721 and 4722 and either 4724 or 4728). Assessment: Take home exam, Selection Case Study and Design of assessment program.

This unit will introduce students to some of the major assessment instruments used in coaching psychology. This unit does not accredit students to administer any of the instruments examined in this unit of study. Rather the unit focuses both on critical evaluation of assessment instruments and on fostering an understanding of where each may be best utilised. Assessment instruments include: NEO 4; 16PF; Myers Briggs Type Inventory; the DISK; Human Synergistics; BarOn EQI; WAIS, MMPI; Self-directed Search; Strong Interest Inventory; Multi-factor Leadership Questionnaire.

PSYC4727
Coaching in Organisations
Credit points: 6 Session: Seminars: Four Day Seminars: Block Teaching. Prerequisites: PSYC4721 and PSYC4722 and PSYC4724. Assessment: A written coaching proposal (3,000 words) (50%), take home
Executive and management coaching have emerged as key factors in the enhancement of performance within organisations and corporations. This unit examines key issues in contemporary executive and management coaching and equips students with the knowledge and skills to provide world-class executive and management coaching. The emphasis is on critical evaluation of theory and application to practice. Although primarily focused on solution-focused and cognitive-behavioural approaches to executive coaching, psychodynamic (e.g. Kilburg) and systems (e.g. O’Neill) approaches are also considered. The course covers issues in senior executive coaching, coaching middle management, establishing manager-as-coach programs and coaching in the workplace.

**PSYC4729**

**Groups, Teams and Systems**

**Credit points:** 6  
**Session:** Semester 2  
**Classes:** One 3 hour lecture per week.  
**Prerequisites:** PSYC 4721 and 4722 and either 4724 or 4728  
**Assessment:** Written papers (major essay, minor essay) and exam.  

Coaching always takes place within the context of human systems, be they family, social networks, or workplace organisations. This unit of study considers both the theory and practice of working in human systems. At the theoretical level, students undertaking this unit will consider the major theoretical advances which aid our understanding of groups and complex human systems. These will include systems theory and complexity theory as well as major research findings in group and team dynamics. Students will also consider the practical implications of these theoretical approaches to coaching within organisations. Issues surrounding self organisation, leadership and control, and the management of change in complex adaptive systems will also be discussed. Students will design and facilitate a small group coaching program. This unit is run in a block teaching format.

**PSYC4730**

**Personal and Work/Life Coaching**

**Credit points:** 6  
**Session:** Semester 1  
**Classes:** One 2 hour lecture per week.  
**Prerequisites:** PSYC (4721 and 4722 and either 4724 or 4728)  
**Assessment:** Written papers (Essays or case studies) and exam.  

This unit of study considers both the theory and practice of coaching adults in relation to work/life issues. Self-directed career development and imposed career transitions are important issues increasingly faced by adults. In addition, work/life balance is recognised as being an important factor in creating and maintaining well-being. Thus personal (or life) coaches have a major role to play. This unit of study details the role of the personal coach, and gives students an introduction to major theoretical perspectives on work/life balance, and career development theory and practice. Students will study key psychological theories of adult development as they relate to personal (or life) coaching practice. The perspectives covered include Work Adjustment Theory, Trait and Type Theory, and Life Span Theory. The course will focus on coaching clients through important work/life transitions, with an emphasis on understanding individual differences in relation to gender, age and personality.

**Resolutions**

Graduate Certificate in Applied Science (Psychology of Coaching)  
Graduate Diploma in Applied Science (Psychology of Coaching)  
Master of Applied Science (Psychology of Coaching)

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.
4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:
4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
4.4.2 to complete satisfactorily the essays, exercises, practical work and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.
4.5 All units of study for a particular subject area may not be available every semester.
4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load
5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study
6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperative Agreement with another University.

7. Restrictions on enrolment
7.1 Admission to candidacy may be limited by a quota.
7.2 In determining the quota, the University will take into account:
7.2.1 availability of resources including space, laboratory and computing facilities; and
7.2.2 availability of adequate and appropriate supervision.
7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. Discontinuation of enrolment
8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidacy will be deemed to have discontinued enrolment in the course.
8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. Suspension of candidacy
9.1 A student may seek written permission from the Dean to suspend candidacy in the course.
9.2 Suspension may be granted for a maximum of one year.

10. Re-enrolment after an absence
10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. Satisfactory progress
11.1 Candidates for the Master of Applied Science (Psychology of Coaching), the Graduate Diploma in Applied Science (Psychology of Coaching), and the Graduate Certificate in Applied Science (Psychology of Coaching), shall be governed by the rules as follows:
11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Psychology of Coaching);
11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Psychology of Coaching);
11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching);
11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.
11.2.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.
11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.
11.3.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol.
11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.
11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol.
11.4.2 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) and/or the Graduate Diploma in Applied Science (Psychology of Coaching) and/or the Graduate Certificate in Applied Science (Psychology of Coaching) will be required to show good cause why he or she should be allowed to re-enrol.

12. Time limit
12.1 A candidate for the Graduate Certificate in Applied Science (Psychology of Coaching) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.
12.2 A candidate for the Graduate Diploma in Applied Science (Psychology of Coaching) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.
12.3 A candidate for the Master of Applied Science (Psychology of Coaching) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. Assessment policy
13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. Credit transfer policy
14.1 Credit is not available in the Graduate Certificate in Applied Science (Psychology of Coaching), Graduate Diploma in Applied Science (Psychology of Coaching) and Master of Applied Science (Psychology of Coaching) for postgraduate study which has not been undertaken in these award courses within the previous three years.
Health Psychology careers within the health service, academia and counsellors. These programs will allow these individuals to pursue organisations, charities and research groups, allied health professionals, psychology students, geneticists and genetic counsellors. These programs will allow these individuals to pursue health psychology careers within the health service, academia and government.

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Psychology of Coaching) may transfer, within three years, to the Master of Applied Science (Psychology of Coaching) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Psychology of Coaching).

14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.

Health Psychology degrees

Graduate Certificate in Applied Science (Health Psychology)

Graduate Diploma in Applied Science (Health Psychology)

Master of Applied Science (Health Psychology)

Course overview
The Master of Applied Science (Health Psychology) is an articulated postgraduate program which teaches the theory and practical applications of Health Psychology. Health psychology is the field of psychology devoted to the study of the promotion and maintenance of health; the causes and detection of illness; the prevention and treatment of illness; and the improvement of health care systems and health care policy. The Master of Applied Science (Health Psychology) is designed to provide students with an understanding of the theoretical, methodological and practical aspects of health psychology.

Students enrolled in the Graduate Certificate in Applied Science (Health Psychology), the Graduate Diploma in Applied Science (Health Psychology) and the Master of Applied Science (Health Psychology) may undertake study in either part-time or full-time mode. There are three core units of study at graduate certificate level PSYC5001, PSYC5002 and PUBH5018. Students then chose an elective from PSYC5003, PSYC5004, PSYC5005 and BACH5180.

At graduate diploma level students complete the units of study at Certificate level as well as one elective from PSYC5003, PSYC5004, PSYC5005 and BACH5180 and one core unit of study BACH5268.

At master’s level students complete two additional electives.

A research stream is also available to Master of Applied Science (Health Psychology) students in their second semester of enrolment, upon completion of at least 24 credit points with a distinction average in their first full-time semester (or equivalent).

Course outcomes
This program is designed to meet the needs of a wide variety of health professionals interested in the growing area of health psychology: for example, people working within the Department of Health and other organisations, charities and research groups, allied health professionals, psychology students, geneticists and genetic counsellors. These programs will allow these individuals to pursue health psychology careers within the health service, academia and government.

Unit of study descriptions
Core units of study - all degrees

PSYC5010 Health Psychology in Clinical Practice
Credit points: 6 Session: Semester 2 Classes: 1 one hour lecture, two hours of tutorials per week Assessment: Tutorial attendance and presentation, major assignment - 2500 word essay Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

The work of health psychologists relies on a broad range of professional skills and attributes. The aim of this unit of study is to conceptually define health within a biopsychosocial framework and to present some of the psychological reactions to hospitalisation, illness and pain. This unit of study provides students with an introduction to key areas of health psychology, and demonstrates how they relate to other disciplines. It also considers the context within which treatment takes place. This unit of study will explore mental and physical diseases. This unit of study examines the application of psychology in clinical settings. The unit of study considers the application of psychological theory to illness and preparation for hospitalization; the management of adverse psychological sequelae arising from hospitalization; and rehabilitation.

PSYC5011 Applying Models of Health Behaviour
Credit points: 6 Session: Semester 2 Classes: 1 one hour lecture and two hours of tutorials per week Assessment: Presentation of intervention, write up of intervention Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

The student will be given the opportunity to develop an intervention based on social cognitions models. The process can be followed from start to finish allowing the individual to utilise knowledge and skills gained in other units of study. It is an intended outcome for students enrolled in the MAppSc (HealthPsych) that students can demonstrate an understanding of the key models and theories in Health Psychology which are seen by many to be the foundations of the subject area. The aim of this unit of study is to allow students to identify an area of Health Psychology where an intervention would be appropriate, review existing literature on the topic, formulate the intervention, and evaluate the intervention on a pilot level.

PUBH5018 Introductory Biostatistics
Credit points: 6 Teacher/Coordinator: Dr Petra Macaskill Session: Semester 1 Classes: 1x2hr lecture, 11x1hr lectures, 11x2hr tutorials, 2x2hr and 10x0.5hr statistical computing self directed learning tasks over 12 weeks Assessment:
This unit aims to provide students with an introduction to statistical concepts, their use and relevance in public health. This unit covers: summarising and displaying data; sampling; probability distributions; sampling distribution of the mean; confidence interval and significance tests for one-sample and paired continuous data, for a proportion and paired binary data, for two independent proportions, for the means of two independent samples; correlation and simple linear regression; distribution-free methods for two independent samples, two paired samples and correlation; sample size estimation; statistical aspects of study design and analysis and implementing methods using statistical software (SPSS). It is expected that students spend an additional 2 hours preparing for their tutorials. This unit may be undertaken in face to face or online/distance mode. Computing tasks are self-directed.

Textbooks
Course notes are provided.

Core units of study - Master of Applied Science (Health Psychology) Research Stream

PSYC5015 Research Project
Credit points: 12 Session: Semester 1, Semester 2 Classes: The student will use as many of the identified sessions as she wishes for collection of data, preparation of the project etc under the supervision of their research supervisor. Lectures are voluntary, and are designed to cover common problems. The major Prerequisites: all of PSYC5010, PSYC5011, PUBH5018 and BACH5268; plus 12 credit points of electives. Students must have a distinction average in the prerequisite units. Assessment: Project Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

The student will be given the opportunity to carry out a substantial piece of research in the field of health psychology. The research process can be followed from start to finish allowing the individual to utilise knowledge and skills gained in other unit of study. It is an intended outcome for students enrolled in the MAppSc (HealthPsych research stream) that they present evidence of their capacity to conduct a substantial piece of independent research that builds clearly upon their prior learning and which draws upon appropriate methodologies. The aim of this unit of study is to allow students to identify a research issue, review existing literature on the topic, formulate novel research questions, and test these questions through the application of contemporary psychological methodologies and appropriate data-analytic procedures.

BACH5268 Developing A Research Project
Credit points: 6 Teacher/Coordinator: Dr Rob Heard, email: r.heard@fhs.usyd.edu.au Session: Semester 1, Semester 2 Classes: 3 hrs/week semester 1 on campus Delivery Mode: Normal delivery evening Cumb Sem 1, DE Cumb Sem 1, Cumb Sem 2 Assessment: 3 assignments Campus: Cumberland Mode of delivery: Normal (lecture/lab/tutorial) Evening Note: Not available for Doctor of Health Science students

This unit provides an overview of the research process and focus on the formulation of a research proposal. It provides students with an opportunity to review and update their knowledge of research methods, and introduce the research electives which concentrate on a particular methodology or aspect of the research process. Basic research design issues are considered. Various methods of data collection are examined together with their suitability for investigating different types of research questions. Students explore the use of quantitative and qualitative data, longitudinal and cross-sectional designs, and data resulting from experimental interview, observation, single case and survey research methods in addition to content analysis and secondary data analysis. Emphasis is placed on the issues of validity and reliability of data collection techniques. Basic statistical procedures are briefly reviewed and applications such as epidemiology and evaluation research are introduced.

Textbooks

Selective units of study

PSYC5013 Coping and Adjustment to Illness
Credit points: 6 Session: Semester 1 Classes: 1 one hour lecture and two hours of tutorials per week Assessment: Formal examination Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

The unit of study aims to apply a psychosocial perspective to the study of disability and chronic disease. In this unit, students will consider the impact of acute and chronic illness states (including physical and mental illness) on the patient and their family. Aspects of quality of life affected will be considered, including sexuality, body image, fatigue, existential crisis, social and intimate relationships, physical reactions and spirituality. The impact of formal and informal systems of social support on illness and outcomes will be explored. The unit will incorporate evaluation of research methods used in such studies together with the application of health psychology theory and a critical examination of research findings. Relationships between health cognitions, health behaviour and psychological adjustment will be examined. The unit aims to provide a critical understanding of how psychological theories can be used to inform clinical practice.

BACH5180 Stress and Illness: Management Issues
Credit points: 6 Semester 1 Classes: On campus contract learning Assessment: Assignments Campus: Cumberland Mode of delivery: Normal (lecture/lab/tutorial) Day

This unit aims to provide students with an introduction to stress and illness and the role of the health psychology in the formulation and delivery of comprehensive services for the management of stress and illness. The unit provides a broad introduction to the nature of stress and illness and the impact of stress and illness on the patient. The unit will introduce the reader to the biological and psychological aspects of stress and illness and the role of illness and stress in the formulation and delivery of comprehensive services for the management of stress and illness.

PSYC5014
Developments in Health Psychology
Credit points: 6 Session: Semester 1 Classes: tutorials- three hours per week Assessment: one major assignment - 5000 word essay Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

The purpose of this unit of study is to allow the student to choose a topic of particular relevance to their areas of expertise. It will allow the student to examine new developments within Health Psychology which may impact on their clinical or work practice.

PUBH5010
Epidemiology Methods and Uses
Credit points: 6 Teacher/Coordinator: Associate Professor Alex Barratt, Dr Tim Driscoll Session: Semester 1 Classes: 1x1hr lecture and 1x2hr tutorial per week for 13 weeks (lectures and tutorials may be completed online) Assessment: 1x4page assignment (30%) and 1x2.5hr open-book exam (70%) Campus: Camperdown/Darlington Mode of delivery: Normal (lecture/lab/tutorial) Day

This unit provides students with core skills in epidemiology, particularly the ability to critically appraise public health and clinical epidemiological research literature. This unit covers: study types; measures of frequency; measures of association; use and interpretation of population health data; selection bias; information bias; confounding / effect modification; screening and test evaluation; infectious disease outbreaks; causal inference; measuring public health impact and systematic reviews. It is expected that students spend an additional 2 hours preparing for their tutorials. This unit may be undertaken in face to face or online/distance mode.

Textbooks

NURS5025
Understanding Cancer Causes & Therapies
Credit points: 6 Session: Semester 1 Classes: intensive mode Assessment: assignments, exam Campus: Camperdown/Darlington Mode of delivery: Block Mode

This unit of study is a pre requisite for the field of cancer nursing and will provide the scientific basis for cancer nursing practice. The unit will explore cancer epidemiology, with a focus on identifying the determinants and distribution of cancer in defined populations. The reporting and measurement of cancer in Australia will be included. Cancer as a genetic disease is explored and advances in understanding the biology of cancer is critiqued. Biological and physiological principles that support cancer treatments will be reviewed in detail.

NURS5026
Health Promotion in Cancer Recovery
Credit points: 6 Session: Semester 2 Classes: intensive mode Prerequisites: NURS5025 Assessment: assignment, exam Campus: Camperdown/Darlington Mode of delivery: Block Mode

This unit will analyse the consequences of a cancer diagnosis and the subsequent treatment, on the individual and their family. The short and long term side effects, impact on quality of life, employment, physical and psychological functioning will be reviewed. Approaches to maximising the individual's recovery will be explored, with specific focus on the role of early interventions, and maintaining individual autonomy. Areas such as body image, fertility, employment, and management of fatigue will be a major focus of this unit.

BACH5061
Statistical Analysis With SPSS
Credit points: 6 Teacher/Coordinator: Dr Peter Cho and Ms Karen Pepper Session: Semester 1, Semester 2 Classes: Individual supervision including a small number of on-campus classes. Assessment: Practical assignments Campus: Cumberland Mode of delivery: Normal (lecture/lab/tutorial) Day

This unit teaches the student to use the SPSS for Windows computer package to manage and analyse research data using a range of common statistical procedures. Data management procedures will include data transformation and selection, and import and exporting data. Statistical analyses to be covered include descriptive statistics, t-test, analysis of variance, correlation and regression, chi-square, non-variance, multiple regression, and factor analysis.

Textbooks
3.1 Candidates for the Graduate Certificate in Applied Science (Health Psychology) are required to complete satisfactorily the following core units of study: PSYC5010, PSYC5011, PUBH5018, BACH5268; and two elective units of study from PSYC5013, PSYC5012, and BACH5180.

3.2 Candidates for the Graduate Diploma in Applied Science (Health Psychology) are required to complete satisfactorily the following core units of study: PSYC5010, PSYC5011, PUBH5018, BACH5268; two elective units of study from PSYC5013, PSYC5012, and BACH5180; and one elective unit of study and one research elective unit of study.

3.3 Candidates for the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following core units of study: PSYC5010, PSYC5011, PUBH5018, BACH5268; two elective units of study from PSYC5013, PSYC5012, and BACH5180; one elective unit of study and one research elective unit of study.

3.4 Candidates for the Master of Applied Science (Health Psychology) may be admitted to the Research stream in their second semester of enrolment, upon completion of at least 24 credit points with a distinction average.

3.4.1 Candidates in the Research stream of the Master of Applied Science (Health Psychology) are required to complete satisfactorily the following units of study: PSYC5010, PSYC5011, PUBH5018, BACH5268; two elective units of study from PSYC5012, PSYC5013, BACH5180; and PSYC5015.

3.5 The units of study associated with the award course are listed in the table in subsection 4.1. Other electives will be available to students where appropriate and with agreement with the programs' coordinator and Head of School and with agreement from the Faculty involved.

3.6 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

[Section 2]

4. Details of units of study

4.1 The units of study for the Graduate Certificate in Applied Science (Health Psychology), Graduate Diploma in Applied Science (Health Psychology) and Master of Applied Science (Health Psychology) are listed in table 4 of these resolutions, as follows:

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>Core/Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core for Graduate Diploma, Master</td>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. **Enrolment in more/less than minimum load**

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. **Cross-institutional study**

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. **Restrictions on enrolment**

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

7.3 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. **Discontinuation of enrolment**

8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.

8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. **Suspension of candidature**

9.1 A student may seek written permission from the Dean to suspend candidature in the course.

9.2 Suspension may be granted for a maximum of one year.

10. **Re-enrolment after an absence**

10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. **Satisfactory progress**

11.1 Candidates for the Master of Applied Science (Health Psychology), the Graduate Diploma in Applied Science (Health Psychology), and the Graduate Certificate in Applied Science (Health Psychology), shall be governed by the rules as follows:

11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Health Psychology), will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science (Health Psychology);

11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Health Psychology), and/or the Graduate Diploma in Applied Science (Health Psychology), will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student’s enrolment will be transferred to the Graduate Certificate in Applied Science (Health Psychology);

11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Health Psychology), will be required to show good cause why he or she should be allowed to re-enrol

11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Health Psychology), and/or the Graduate Diploma in Applied Science (Health Psychology), and/or the Graduate Certificate in Applied Science (Health Psychology), will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student will not be permitted to re-enrol.

11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Health Psychology), and/or the Graduate Diploma in Applied Science (Health Psychology), and/or the Graduate Certificate in Applied Science (Health Psychology), will be permitted to re-enrol.

11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. **Time limit**

12.1 A candidate for the Graduate Certificate in Applied Science (Health Psychology), shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.

12.2 A candidate for the Graduate Diploma in Applied Science (Health Psychology), shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.

12.3 A candidate for the Master of Applied Science (Health Psychology), shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. **Assessment policy**

13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidature.

14. **Credit transfer policy**

14.1 Credit is not available in the Graduate Certificate in Applied Science (Health Psychology), Graduate Diploma in Applied Science (Health Psychology) and Master of Applied Science (Health Psychology) for postgraduate study which has not been undertaken in these award courses within the previous three years.

14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Health Psychology) may transfer, within three years, to the Graduate Diploma in Applied Science (Health Psychology) and receive credit for up to 36 credit points from the Graduate Certificate in Applied Science (Health Psychology).

14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Health Psychology) may transfer, within three years, to the Master of Applied Science (Health Psychology) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Health Psychology).

14.4 A candidate who has completed units of study in the Applied Science program within the past three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.
29. Postgraduate coursework: Psychology degrees
This chapter sets out the requirements for the Graduate Certificate in Applied Science (Spatial Information Science). A comprehensive guide to the requirements and units of study of the coursework degrees is listed.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously at the end of this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Course overview
The Graduate Certificate in Applied Science (Spatial Information Science) provides an understanding of spatial analysis and modelling theory and use of GIS and Remote Sensing methods in a range of application fields. The opportunity to select optional units in combination with the core GIS units will allow students to focus on a preferred specialisation within the broader spatial science spectrum. In providing a solid grounding in the principles of spatio-temporal analysis and spatial reasoning the core units will engender a depth of knowledge that is immediately transferable to industry. The optional units will extend this knowledge in specific applications areas and reinforce spatial science skills through practical and field-based training.

Course outcomes
The program will enable students to adopt effective spatial analysis methods for addressing broader environmental and socio-economic issues, examine geographical trends, embrace advances in spatial information technologies and contribute to innovations in the spatial science industry.

Unit of study descriptions

**GEOG5001**
Geographic Information Science A

<table>
<thead>
<tr>
<th>Credit points: 6</th>
<th>Teacher/Coordinator: Dr David Chapman</th>
<th>Session: Semester 1, Semester 2</th>
<th>Classes: Six workshops</th>
<th>Assessment: Report</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Associated degrees:</strong></td>
<td>Grad Cert App Sc (Coastal Mgt), Grad Cert App Sc (Enviro Sc)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This unit of study gives an overview of basic spatial data models, and enables students to understand the import and export of data to and from a geographical information system (GIS). The manipulation of spatial data at a level appropriate to planning or locational applications, and the development of thematic maps from diverse data layers, will be addressed.

**GEOG5002**
Geographic Information Science B

<table>
<thead>
<tr>
<th>Credit points: 6</th>
<th>Teacher/Coordinator: Dr Eleanor Bruce</th>
<th>Session: Semester 2</th>
<th>Classes: One 2 hour lectures, one 1 hour tutorial, one 3 hour practical per week for 6 weeks.</th>
<th>Assessment: 2500 word assignment, seminar presentation, tutorial reports, WebCT quiz.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Associated degrees:</strong></td>
<td>Grad Cert App Sc (Coastal Mgt), Grad Cert App Sc (Enviro Sc)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This course will provide the conceptual background to more advanced GIS analysis applications and spatial reasoning methods in the context of contemporary environmental issues. The course is designed to provide an understanding of spatial analysis techniques available within a GIS environment, explore a diversity of both social and physical environmental applications and address emerging issues in GIS research. A range of topics will be introduced including field based capture of spatial information, spatial data structures, surface modelling, visibility analysis, hydrological modeling, network analysis, spatial data uncertainty and social GIS. Conceptual material presented in lectures and tutorial workshops will be placed in an applied context through a series of laboratory and field sessions designed to strengthen practical understanding and awareness of GIS methods.

**GEOG5004**
Environmental Mapping and Monitoring

<table>
<thead>
<tr>
<th>Credit points: 6</th>
<th>Teacher/Coordinator: Dr Peter Cowell</th>
<th>Session: Semester</th>
<th>Classes: Two hours of lectures and one three hour practical per week.</th>
<th>Assessment: Assignments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Associated degrees:</strong></td>
<td>Grad Cert App Sc (Coastal Mgt), Grad Cert App Sc (Enviro Sc)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The unit introduces methods associated with acquiring data in the field and examines issues associated with application of spatial data to environmental monitoring, terrain mapping and geocomputing. Students will learn both theoretically and practically how environmental data is collected using different remote sensing techniques, (pre)processing methods of integrating data in a GIS environment and the role of spatial data in understanding landscape processes and quantifying environmental change.

**COMP5338**
Advanced Data Models

<table>
<thead>
<tr>
<th>Credit points: 6</th>
<th>Session: Semester 1, Semester 2</th>
<th>Classes: One 2 hour lecture and one 1 hour tutorial per week.</th>
<th>Prohibitions: COMP5306</th>
<th>Assessment: Assignments, written exam.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Associated degrees:</strong></td>
<td>B IT, B IT (Hons), B Psych (Hons), B Sc (Hons), Grad Cert Appl IT, Grad Cert IT.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

This course will offer a comprehensive survey of post-relational data models and technologies with significant emphasis on XML and content management on the world wide web. The important challenges in managing the complex and varied data in modern database environments will be specifically addressed.

**ENVI5809**
Computer Modelling & Resource Management

<table>
<thead>
<tr>
<th>Credit points: 6</th>
<th>Teacher/Coordinator: Dr David Chapman</th>
<th>Session: Semester 1</th>
<th>Classes: Six workshops.</th>
<th>Assessment: Report</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Associated degrees:</strong></td>
<td>Grad Cert App Sc (Coastal Mgt), Grad Cert App Sc (Enviro Sc)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The concept and use of computer modelling in natural resource management is introduced in this unit of study, which is aimed particularly at non-programmers.

Resolutions
Graduate Certificate in Applied Science (Spatial Information Science)

[Section 1]

1. Admission

1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science (Spatial Information Science)

1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;

1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or

1.1.1.3 persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study.

2. Units of study

2.1 The units of study for the Graduate Certificate in Applied Science (Spatial Information Science) are listed in subsection 4.1.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the unit of study descriptions.

3. Requirements for the Graduate Certificate in Applied Science (Spatial Information Science)

3.1 Candidates for the Graduate Certificate in Applied Science (Spatial Information Science) are required to complete satisfactorily two core units of study (GEOG5001 and GEOG5002) and 12 credit points from optional units of study.

4. Details of units of study

4.1 The units of study for the Graduate Certificate in Applied Science (Spatial Information Science) are listed in the following table:

<table>
<thead>
<tr>
<th>Unit of study</th>
<th>Core/optional</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG5001 Geographic Information Science A</td>
<td>C</td>
</tr>
<tr>
<td>GEOG5002 Geographic Information Science B</td>
<td>C</td>
</tr>
<tr>
<td>GEOG5004 Environmental Mapping and Monitoring</td>
<td>O</td>
</tr>
<tr>
<td>COMP338 Advanced Data Models</td>
<td>O</td>
</tr>
<tr>
<td>ENVIS809 Computer Modelling &amp; Resource Management</td>
<td>O</td>
</tr>
<tr>
<td>AFNR5502 Remote Sensing, GIS and Land Management</td>
<td>O</td>
</tr>
</tbody>
</table>

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.

4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, exercises, practical work, or project work as may be prescribed.

4.4 In these resolutions, ‘to complete a unit of study’ or any derivative expression means:

4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;

4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and

4.4.3 to pass any other examination of the unit of study that may apply.

4.5 All units of study for a particular subject area may not be available every semester.

4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

5. Enrolment in more/less than minimum load

5.1 A candidate may proceed on either a full-time or a part-time basis.

6. Cross-institutional study

6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science (Spatial Information Science) except where the University of Sydney has a formal Cooperation Agreement with another University.

7. Restrictions on enrolment

7.1 Admission to candidature may be limited by a quota.

7.2 In determining the quota, the University will take into account:

7.2.1 availability of resources including space, laboratory and computing facilities; and

7.2.2 availability of adequate and appropriate supervision.

Graduate Certificate in Applied Science (Wildlife Heath and Population Management)

Graduate Diploma in Applied Science (Wildlife Heath and Population Management)

Master of Applied Science (Wildlife Heath and Population Management)

This chapter sets out the requirements for both research and coursework postgraduate degrees offered in the areas of Wildlife Health and Population Management.

The information in this chapter is in summary form and is subordinate to the provisions of the relevant degree Resolutions, collected variously at the end of this chapter, or in the University of Sydney Calendar. The Calendar is available for sale at the Student Centre, for viewing at the Faculty Office or the Library, or on the Web at www.usyd.edu.au/publications/calendar/

Course overview

The Graduate Certificate in Applied Science (Wildlife Health and Population Management), Graduate Diploma in Applied Science (Wildlife Health and Population Management) and Master of Applied Science (Wildlife Health and Population Management) are articulated award courses that provide a professional qualification to biologists and veterinarians working in private practice, industry, research and education. The award program brings together the disciplines of animal health and wildlife population management, developing and enhancing skills in conservation techniques for native fauna, diagnosis and management of wildlife health, and management of native and pest species populations.

Course outcomes

The aim of this articulated coursework program is to provide students with a coordinated and interdisciplinary approach to wildlife health and wildlife management, thus developing expertise to recognise and solve a broad range of problems in field populations. Upon completion of the graduate certificate, graduate diploma or master's, graduates will have a broad understanding of the topic of wildlife management and practical skills developed from field studies. In addition, the master's will provide experience in designing, carrying out and completing a research project and thesis.

Admission requirements

Graduate Certificate in Applied Science (Wildlife Heath and Population Management)

Applicants for the Graduate Certificate in Applied Science (Wildlife Health and Population Management) should hold a first degree in science or veterinary science, or have the knowledge and aptitude obtained from professional or other experience required to undertake the award course.

Graduate Diploma in Applied Science (Wildlife Heath and Population Management)

Applicants for the Graduate Diploma in Applied Science (Wildlife Health and Population Management) similarly should hold a first degree in science or veterinary science, or have the knowledge and aptitude obtained from professional or other experience required to undertake the award course, or have completed the Graduate Certificate in Applied Science (Wildlife Heath and Population Management).

Master of Applied Science (Wildlife Heath and Population Management)

Applicants for the Master of Applied Science (Wildlife Health and Population Management) should hold a first degree in science or veterinary science, or have the knowledge and aptitude obtained from professional or other experience required to undertake the award course, or have completed the Graduate Diploma in Applied Science (Wildlife Health and Population Management)

Information for all degrees

Not all units of study will be available every semester. The Faculty may allow substitution of any unit of study by an approved unit of study, including units of study from other postgraduate coursework programs in the Faculty or elsewhere in the University.

Units of study

Core units of study

WILD5001

Australasian Wildlife: Introduction

Credit points: 6

Session: S1 Intensive

Classes: Intensively taught unit. See the Wildlife Health and Population Management website for dates.

Assessment: 

assessments for each unit may include practical work, field studies, student presentations and written reports

Note: Core

This unit of study provides an introduction to the wildlife of Australasia, an overview of the present status of that wildlife, and an understanding of both conservation problems and management solutions. Issues in wildlife management are exemplified using a broad range of vertebrate species occupying different environments. Emphasis is placed on providing students with a coordinated and interdisciplinary approach to wildlife health and management, and on developing expertise in recognising and solving a broad range of problems in field populations. The unit integrates lectures, practical work and supervised study, and offers students the opportunity to work through real-world wildlife conservation problems relevant to their individual backgrounds.

WILD5002

Australasian Wildlife: Field Studies

Credit points: 6

Session: S1 Intensive

Classes: Intensively taught unit. See the Wildlife Health and Population Management website for dates.

Assessment: 

Assessments for each unit may include practical work, field studies, student presentations and written reports

Note: Core

This unit of study provides a first-hand introduction to the wildlife of Australasia, a practical overview of the present status of that wildlife, and an understanding of both conservation problems and management solutions. Issues in wildlife management are exemplified using sampling and diagnostic methods on a broad range of vertebrate species occupying different environments. The unit follows on from WILD5001 and provides practical experience via a five day field trip.
Additional Core unit Masters

WILD5009 Research Project
Credit points: 12 Session: Semester 1, Semester 2 Classes: meetings throughout semester to be arranged with supervisor. Assessment: independent research project
Note: Core for the Masters program

A valuable opportunity to apply some of the knowledge gained from earlier coursework, WILD5009 comprises a research project on a topic with significant emphasis on wildlife health and/or population management, as arranged between the student and an appropriate supervisor. This research experience is highly valued by prospective employers as it shows a willingness and ability to undertake guided but independent research. The project is not conducted by way of contact hours per week for a semester. Instead the student is expected to work on the project full-time and in a continuous manner for the semester. This unit of study is available only to students enrolled in the Master of Applied Science (Wildlife Health and Population Management).

Optional units

WILD5003 Wildlife Health
Credit points: 6 Teacher/Coordinator: A/Prof Tony English Session: S1 Late Int Classes: A full-time week on the Camden campus, with one day spent on a field trip to Taronga Zoo. Assessment: The assessment of this unit occurs both in the full-time week and in individual written assignments done in the student’s own time. The full-time week contributes 40% of the total mark through a number of individual and syndicate tasks, with presentations to the group. The remaining 60% comes from two written assignments of 3,000 words (20%) and 5,000 words (40%) respectively.

This unit of study provides an introduction to the health issues confronting wildlife in Australasia, an overview of the health status of that wildlife, and an understanding of both the investigation of health problems and the effective management of these. Issues in wildlife disease management are exemplified using a broad range of vertebrate species occupying different environments. Emphasis is placed on providing students with a coordinated and interdisciplinary approach to wildlife health, and on developing expertise in recognising and solving a broad range of health problems in field populations. The unit is taught intensively in a full-time week on the Camden campus, with one day spent on a field trip to Taronga Zoo. The unit integrates lectures, practical work and supervised study, and offers students the opportunity to work through real-world wildlife conservation problems relevant to their individual backgrounds.

Textbooks
Unit of Study Handbook is the primary reference.

WILD5004 Vertebrate Pest Management
Credit points: 6 Teacher/Coordinator: A/Prof Tony English Session: S2 Intensive Classes: The Unit is taught in a full-time week at the university farm “Arthursleigh” near Marulan NSW. There are lectures, tutorials, and a variety of practical classes. Assessment: The assessment of this unit occurs both in the full-time week and in individual written assignments done in the student’s own time. The full-time week contributes 40% of the total mark through a number of individual and syndicate tasks, with presentations to the group. The remaining 60% comes from two written assignments of 3,000 words (20%) and 5,000 words (40%) respectively.

Note: Optional

Vertebrate pests occur in many parts of the world, and can pose significant problems for management of habitat, agricultural productivity, human and wildlife health. This unit focuses on vertebrates that have been introduced to new environments, and considers in detail the impacts and management of pest vertebrates in Australia. Steps in pest management are reviewed, from problem analysis to acceptable levels of control, using case studies of cane toads, rabbits, house mice and red foxes. Traditional mortality methods of management are reviewed, and emphasis placed on developing methods based on fertility control. The Unit is taught in a full-time week at the university farm “Arthursleigh” near Marulan NSW. There are lectures, tutorials, and a variety of practical classes. The Unit is taught in a full-time week at the university farm “Arthursleigh” near Marulan NSW. There are lectures, tutorials, and a variety of practical classes.

Textbooks
Unit of Study Handbook is the primary reference.

WILD5005 In Situ Wildlife Management
Credit points: 6 Teacher/Coordinator: A/Prof Tony English Session: S1 Late Int Classes: Intensively taught unit. See the Wildlife Health and Population Management website for dates. Assessment: Assessments for each unit may include practical work, field studies, student presentations and written reports. Note: Optional

Wildlife populations do not remain static, but change in size and composition over both time and space. The challenge for managers is to recognise when change in target populations exceeds acceptable limits and intervention is necessary. This unit of study develops skills in assessing population status and recognising differences between ‘small populations’ and ‘declining populations’. It introduces methods used in population pattern analysis, demographic analysis, threat and resource assessment, and determination of health, emphasising the value of a coordinated and interdisciplinary approach to problem recognition and resolution.

WILD5006 Ex Situ Wildlife Management
Credit points: 6 Teacher/Coordinator: A/Prof Tony English Session: S2 Late Int Classes: The Unit is taught in a full-time week at Western Plains Zoo in Dubbo, NSW. Assessment: The assessment of this unit occurs both in the full-time week and in individual written assignments done in the student’s own time. The full-time week contributes 40% of the total mark through a number of individual and syndicate tasks, with presentations to the group. The remaining 60% comes from two written assignments of 3,000 words (20%) and 5,000 words (40%) respectively.

Wildlife populations are under a variety of threats, most of which result from human activities. Modern conservation biology seeks practical solutions to these problems, using a wide variety of options. These options may include captive breeding and re-introduction programs, provided that a range of biological, ethical and politico-economic issues are addressed. This unit of study will provide students with the ability to evaluate the likely cost-effectiveness of such programs. It will also develop knowledge of the technologies available to capture and translocate wildlife, and of the planning required to ensure the best possible chance of success. The Unit is taught in a full-time week at Western Plains Zoo in Dubbo, NSW. The unit integrates lectures, tutorials, practical work and supervised study, and offers students the opportunity to examine real-world problems in the conservation and management of threatened wildlife populations using case studies relevant to their individual backgrounds.

Textbooks
Unit of Study Handbook is the primary reference.

WILD5007 Sustainable Wildlife Use and Stewardship
Credit points: 6 Teacher/Coordinator: A/Prof Tony English Session: S2 Late Int Classes: A full-time week at the Camden campus (2 days) and at “Arthursleigh” farm (3 days). Assessment: The assessment of this unit occurs both in the full-time week and in individual written assignments done in the student’s own time. The full-time week contributes 40% of the total mark through a number of individual and syndicate tasks, with presentations to the group. The remaining 60% comes from two written assignments of 3,000 words (20%) and 5,000 words (40%) respectively.

The unit considers the potential for sustainable use of wildlife to contribute to the conservation of biodiversity and the economic well-being of local communities. There will be consideration of both consumptive and non-consumptive utilisation programs, using both Australian and international examples. Ethical and animal welfare issues will be considered in some detail. The Unit is taught in a full-time week at the Camden campus (2 days) and at “Arthursleigh” farm (3 days). There are lectures, tutorials and practical classes. A case study on the Australian kangaroo harvesting industry will provide an
opportunity to examine all the factors that need to be taken into account - biological, socio-cultural, economic and animal welfare issues.

WILD5009
Research Project
Credit points: 12 Session: Semester 1, Semester 2 Classes: meetings throughout semester to be arranged with supervisor. Assessment: independent research project
Note: Core for the Masters program
A valuable opportunity to apply some of the knowledge gained from earlier coursework, WILD5009 comprises a research project on a topic with significant emphasis on wildlife health and/or population management, as arranged between the student and an appropriate supervisor. This research experience is highly valued by prospective employers as it shows a willingness and ability to undertake guided but independent research. The project is not conducted by way of contact hours per week for a semester. Instead the student is expected to work on the project full-time and in a continuous manner for the semester. This unit of study is available only to students enrolled in the Master of Applied Science (Wildlife Health and Population Management).

Other optional units of study
ENVIS808 Applied Ecology for Environmental Scientists

Resolutions
Graduate Certificate in Applied Science (Wildlife Health and Population Management)

Graduate Diploma in Applied Science (Wildlife Health and Population Management)

Master of Applied Science (Wildlife Health and Population Management)

[Section 1]

1. Admission
1.1 The Dean of the Faculty of Science may admit to candidature for:
1.1.1 the Graduate Certificate in Applied Science (Wildlife Health and Population Management):
1.1.1.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.1.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.1.1; or
1.1.1.3 persons who have experience which is considered to demonstrate the knowledge and aptitude required to undertake the units of study;
1.1.2 the Graduate Diploma in Applied Science (Wildlife Health and Population Management):
1.1.2.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.2.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.2.1; or
1.1.2.3 persons who have completed requirements for the Graduate Certificate in Applied Science, or equivalent;
1.1.3 the Master of Applied Science (Wildlife Health and Population Management):
1.1.3.1 graduates of the University of Sydney holding the degree of Bachelor of Science or any other equivalent award of the University of Sydney;
1.1.3.2 graduates of other universities or other appropriate institutions who have qualifications equivalent to those specified in subsection 1.1.3.1; or
1.1.3.3 persons who have completed requirements for the Graduate Diploma in Applied Science, or equivalent.

1.2 In relation to particular subject areas the Dean may require applicants to satisfy additional specific requirements relating to that subject area.

2. Units of study
2.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science (Wildlife Health and Population Management) are listed in subsection 4.

2.2 Credit point value, assumed knowledge, corequisites, prerequisites and any special conditions are included in the unit of study description.

3.1 Candidates for the Graduate Certificate in Applied Science (Wildlife Health and Population Management) are required to complete satisfactorily two core units of study (WILD5001 and WILD5002) and 12 credit points from optional units of study.
3.2 Candidates for the Graduate Diploma in Applied Science (Wildlife Health and Population Management) are required to complete satisfactorily two core units of study (WILD5001 and WILD5002) and 24 credit points from optional units of study.
3.3 Candidates for the Master of Applied Science (Wildlife Health and Population Management) are required to complete satisfactorily three core units of study (WILD5001, WILD5002 and WILD5009) and 24 credit points from optional units of study.

[Section 2]

4. Details of units of study
4.1 The units of study for the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science (Wildlife Health and Population Management) are listed in the following table.

Unless otherwise indicated, all units are worth 6 credit points. There are no prerequisites, corequisites or other special conditions for enrolment in these units of study except that 24 credit points of units of study must be completed successfully before a candidate may enrol in WILD5009.

4.2 A candidate for the course shall proceed by completing units of study as prescribed by the Faculty.
4.3 A unit of study shall consist of such lectures, seminars, tutorial instruction, essays, exercises, practical work, or project work as may be prescribed.
4.4 In these resolutions, 'to complete a unit of study' or any derivative expression means:
4.4.1 to attend the lectures and the meetings, if any, for seminars or tutorial instruction;
4.4.2 to complete satisfactorily the essays, exercises, practical and project work if any; and
4.4.3 to pass any other examination of the unit of study that may apply.
4.5 All units of study for a particular subject area may not be available every semester.
4.6 The Dean may allow substitution of any unit of study by another unit of study, including units of study from other postgraduate
coursework programs in the Faculty or elsewhere in the University.

5. **Enrolment in more/less than minimum load**
   5.1 A candidate may proceed on either a full-time or a part-time basis.

6. **Cross-institutional study**
   6.1 Cross institutional study shall not be available to students enrolled in the Graduate Certificate in Applied Science, Graduate Diploma in Applied Science and Master of Applied Science courses, except where the University of Sydney has a formal Cooperation Agreement with another University.

7. **Restrictions on enrolment**
   7.1 Admission to candidature may be limited by a quota.
   7.2 In determining the quota, the University will take into account: availability of resources including space, laboratory and computing facilities; and
   7.2.2 In considering an application for admission to candidature the Dean shall take account of the quota and will select, in preference, applicants who are most meritorious in terms of subsection 1 above.

8. **Discontinuation of enrolment**
   8.1 A student who does not enrol in any semester without first obtaining written permission from the Dean to suspend candidature will be deemed to have discontinued enrolment in the course.
   8.2 Students who have discontinued from the course will be required to apply for admission to the course and be subject to admission requirements pertaining at that time.

9. **Suspension of candidature**
   9.1 A student may seek written permission from the Dean to suspend candidature in the course.
   9.2 Suspension may be granted for a maximum of one year.

10. **Re-enrolment after an absence**
   10.1 A student who plans to re-enrol after a period of suspension must advise the Faculty of Science Office in writing of their intention by no later than the end of October for First Semester of the following year or the end of May for Second Semester of the same year.

11. **Satisfactory progress**
   11.1 Candidates for the Master of Applied Science (Wildlife Health and Population Management), the Graduate Diploma in Applied Science (Wildlife Health and Population Management), and the Graduate Certificate in Applied Science (Wildlife Health and Population Management), shall be governed by the rules as follows:
   11.1.1 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Master of Applied Science (Wildlife Health and Population Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Diploma in Applied Science (Wildlife Health and Population Management);
   11.1.2 A student who has failed a cumulative total of 18 credit points at any stage of enrolment in the Master of Applied Science (Wildlife Health and Population Management) and/or the Graduate Diploma in Applied Science (Wildlife Health and Population Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will not be permitted to re-enrol.
   11.1.3 A student who has failed a cumulative total of 12 credit points at any stage of enrolment in the Graduate Certificate in Applied Science (Wildlife Health and Population Management) will be required to show good cause why he or she should be allowed to re-enrol and, if good cause has not been established, the student's enrolment will be transferred to the Graduate Certificate in Applied Science (Wildlife Health and Population Management);
   11.2 A student who has failed a cumulative total of more than 18 credit points in the Master of Applied Science (Wildlife Health and Population Management) and/or the Graduate Diploma in Applied Science (Wildlife Health and Population Management) and/or the Graduate Certificate in Applied Science (Wildlife Health and Population Management) and/or the Graduate Diploma in Applied Science (Wildlife Health and Population Management) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.
   11.3.1 A student who has failed a core unit at the second attempt in the Master of Applied Science (Wildlife Health and Population Management) and/or the Graduate Diploma in Applied Science (Wildlife Health and Population Management) and/or the Graduate Certificate in Applied Science (Wildlife Health and Population Management) will be deemed to have failed to complete course requirements and will be required to show good cause why he or she should be allowed to re-enrol.
   11.3.2 If good cause has not been established, the student will not be permitted to re-enrol.

12. **Time limit**
   12.1 A candidate for the Graduate Certificate in Applied Science (Wildlife Health and Population Management) shall complete the requirements for the award in a minimum enrolment of one semester and a maximum enrolment of four semesters.
   12.2 A candidate for the Graduate Diploma in Applied Science (Wildlife Health and Population Management) shall complete the requirements for the award in a minimum enrolment of two semesters and a maximum enrolment of six semesters.
   12.3 A candidate for the Master of Applied Science (Wildlife Health and Population Management) shall complete the requirements for the award in a minimum of two semesters and a maximum of eight semesters.

13. **Assessment policy**
   13.1 On completion of the requirements for the course, the Faculty shall determine the results of the candidate.

14. **Credit transfer policy**
   14.1 Credit is not available in the Graduate Certificate in Applied Science (Wildlife Health and Population Management), Graduate Diploma in Applied Science (Wildlife Health and Population Management) and/or the Graduate Certificate in Applied Science (Wildlife Health and Population Management) for postgraduate study which has not been undertaken in these award courses within the previous three years.
   14.2 A candidate who has qualified for the award of the Graduate Certificate in Applied Science (Wildlife Health and Population Management) may transfer, within three years, to the Graduate Diploma in Applied Science (Wildlife Health and Population Management) and receive credit for up to 24 credit points from the Graduate Certificate in Applied Science (Wildlife Health and Population Management).
   14.3 A candidate who has qualified for the award of the Graduate Diploma in Applied Science (Wildlife Health and Population Management) may transfer, within three years, to the Master of Applied Science (Wildlife Health and Population Management) and receive credit for up to 36 credit points from the Graduate Diploma in Applied Science (Wildlife Health and Population Management).
   14.4 A candidate who has completed units of study in the Applied Science program within the previous three years, but has not qualified for an award, may transfer to another award course within the same Applied Science program and receive credit for the units of study completed.

These tables contain simplified details of some of the prizes and scholarships offered by the University. Further information regarding scholarships is available from the University scholarships website and from the Research Office website.

Additional criteria are attached to each award below and for full details you are advised to consult the administering unit. In particular, requirements of sufficient merit or of a higher year enrolment in particular subjects or degrees are common. The University may not offer an award every year. The values of the awards are indicative offer an award every year. The values of the awards are indicative only and may vary without notice.

The scholarships and prizes fall into two broad categories:

- **Prizes awarded on application** – See the Scholarships Office and Research Office websites for more information. Applications usually close in September each year for the following year.

- **Prizes awarded automatically** – Successful students are notified of these either by the Faculty or the Student Centre. Nearly all the prizes in these tables are awarded without application.

### Undergraduate prizes and scholarships

<td>C.E. Marshall Scholarship</td>
<td>$525</td>
<td>1</td>
<td>1</td>
<td>Proficiency in Junior Geology to a student proceeding to Intermediate Geology.</td>
</tr>
<tr>
<td>Professor Griffith Taylor Prize</td>
<td>$100</td>
<td>1</td>
<td></td>
<td>Awarded to the woman student who gains the highest marks in the GEOG 1001 and 1002 examinations in the Faculty of Science.</td>
</tr>
<tr>
<td>Professor James Macdonald Holmes Prize</td>
<td>$100</td>
<td>1</td>
<td>1</td>
<td>Awarded to the degree student who gains the highest marks in the GEOG 1001 and 1002 examinations, provided the student's work is of sufficient merit.</td>
</tr>
<tr>
<td>W.H. Maze Prize in Intermediate Geography</td>
<td>$250</td>
<td>1</td>
<td>1</td>
<td>Awarded to the most proficient student in two units of study from GEOG 2001, 2002, 2101, 2102, 2201 and 2202 if the student's work is of sufficient merit.</td>
</tr>
<tr>
<td>Rev. A.S. McCook Memorial Scholarship</td>
<td>$700</td>
<td>1</td>
<td>1</td>
<td>Awarded for merit in Senior Geography to a student proceeding to Geography or Geomorphology honours, to assist in the expenses for field work connected with the thesis.</td>
</tr>
<tr>
<td>Sheila Mitchell Swan Memorial Prize</td>
<td>$210</td>
<td>1</td>
<td></td>
<td>Awarded to the Senior Geology student who submits the best field report.</td>
</tr>
<tr>
<td>Quodling Testimonial Prize</td>
<td>$200</td>
<td>1</td>
<td></td>
<td>Awarded to a student in Senior Geology and/or Geophysics who has shown proficiency in petrology.</td>
</tr>
<tr>
<td>Ken Richards Memorial Scholarship</td>
<td>$1250</td>
<td>1</td>
<td>1</td>
<td>For an honours student with interest and aptitude in applied geosciences.</td>
</tr>
<tr>
<td>Slade Prize in Intermediate Geology Practical</td>
<td>$100</td>
<td>1</td>
<td></td>
<td>Proficiency in Intermediate Geology practicals.</td>

<tr>
<td>Molecular and Microbial Biosciences</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Allman Prize</td>
<td>$300</td>
<td>1</td>
<td></td>
<td>Awarded annually to the student in the clinical stream of the Honours year in the BSc (Nutrition) who obtains the top aggregate mark in NUTR 4001 and NUTR 4002.</td>
</tr>
<tr>
<td>G.S. Card Scholarship (in Biochemistry)</td>
<td>$650</td>
<td>1</td>
<td></td>
<td>Awarded for greatest proficiency in the units of study MBLG 2071 or MBLG 2971 and BCHM 2072/2972, provided that the student’s work is of sufficient merit.</td>
</tr>
<tr>
<td>Roslyn Flora Goulston Prize</td>
<td>$530</td>
<td>1</td>
<td></td>
<td>Awarded for greatest proficiency in 24 credit points of Senior Biochemistry (taken from BCHM3071/3971, BCHM3081/3981, BCHM3072/3972, BCHM3082/3982, BCHM3092/3992) to an undergraduate in science who intends proceeding to a BSc degree with honours in that subject.</td>
</tr>
<tr>
<td>Mannatech Australia Prize in Modern Metabolic Biochemistry</td>
<td>$1000</td>
<td></td>
<td>1</td>
<td>Established in 2005 by annual donation from Mannatech Australia, this prize is awarded annually to the School of Molecular and Microbial Biosciences to the student who attains the highest performance in their Honours year in the School, in the field of modern metabolic biochemistry, provided the work is of sufficient merit.</td>
</tr>
<tr>
<td>Sigma-Aldrich Molecular Biotechnology Third Year Award</td>
<td>$500</td>
<td>1</td>
<td></td>
<td>The award recognises the best overall grade performance in MOBT 3101 by a student enrolled in the BSc (Molecular Biotechnology) undergraduate degree. Students must receive a minimum Distinction average in this unit of study.</td>
</tr>
<tr>
<td>Slade Prize in Intermediate Biochemistry</td>
<td>$80</td>

Prize compositions

Details of these may be obtained from the Scholarships Office with which applications generally close in the third week of second semester.

Bursaries

Bursaries are awarded on the combined grounds of financial need and academic merit. Applications to the Financial Assistance Office usually close at the end of April.

Postgraduate Prizes and Scholarships

Scholarships awarded by the International Office

For local students enrolling into a higher research degree at the University. Applications close 31 October each year. Applications from the Research Office or web site: http://www.usyd.edu.au/su/reschols/welcome.html.

Scholarships awarded by the Faculty, Schools and Departments

Australian Postgraduate Awards (APAs)

For research students in the School of Biological Sciences. Awarded after application and seminar to the student who best communicates the aims of their research, its contribution to its field and its likelihood of timely completion.

Postgraduate Excellence Prize in Biological Sciences

For research students in the School of Biological Sciences. Awarded after application and seminar to the student who best communicates the aims of their research, its contribution to its field and its likelihood of timely completion.

Henry Chamberlain Russell Prize

Essay, thesis or research report on Astronomy.

International Postgraduate Research Scholarships

For local students enrolling into a higher research degree at the University. Applications close 31 October each year. Applications from the Research Office or web site: http://www.usyd.edu.au/su/reschols/welcome.html.

Joel King Heydon Memorial Prize

For the most meritorious PhD in the preceding 12 months in the School of Biological Sciences.

Postgraduate Excellence Prize in Chemistry

For research support for postgraduate candidates working in the area of food Chemistry.

Postgraduate Student Lectures

For research support for postgraduate candidates working in the area of food Chemistry.

Dr Joan R Clark Research Scholarship

Awarded to a meritorious candidate for the degree of Doctor of Philosophy in Chemistry.

Surface Coatings Association Australia Scholarship

For research support for postgraduate candidates working in the area of food Chemistry.

George Harris Scholarships

Awarded to a PhD student in Inorganic Chemistry to assist with costs of travel and subsistence while pursuing their research at a leading overseas university for a period of between 6 and 26 weeks.

Faculty of Science

John Coutts Scholarship

Awarded to the top Honours student in the Faculty of Science proceeding to postgraduate study at the University the following year.

Science Centenary Fund Scholarship

Awarded to the Honours student from the Faculty of Science who is ranked highest over four years and proceeds to a postgraduate research degree in the Faculty.

Geosciences

Deas-Thomson Scholarship in Geology

For proficiency in Geology Honours to the student who proceeds to postgraduate study with the School of Geosciences.

</table>
The Sydney Summer and Winter Schools

The Summer School

The Summer School is a fee-paying, intensive program offering high quality undergraduate and postgraduate units of study from most faculties. These units of study are the same as those offered in Semesters One and Two, but are taught as an intensive program over summer. Some classes commence in December, others commence in January and continue into February (including the exam week). Some units of study run for seven weeks others are shorter. Students can take a maximum of two units of study.

The Winter School

The Winter School is held every July during the academic year. The Winter School is a smaller, more intensive three week program.

Advantages

Attending classes at Sydney University during summer offers many advantages. You can

- use this time to accelerate your academic career and to finish your degree sooner
- devote your full attention to a single area of study
- take courses that might be outside your normal degree
- reduce your workload throughout the rest of the year
- repeat units of study in which you may have been unsuccessful
- combine study with a field trip in Australia or a tour overseas.

For high school graduates, you can

- sample a university program
- get a head start on your degree.

How to apply

Applications will only be accepted online. Our website is www.summer.usyd.edu.au

Some units have limited places and fill very quickly. All places are filled strictly on a first in first served basis so it is recommended that you apply early.

Applications open on 27 September 2006.
Applications close on 15 December 2006.

Census dates – Summer School 2007

Students can withdraw from their unit of study without academic penalty and receive a full refund until the census date. However, a late withdrawal fee may apply. As classes start throughout December to February there are three census dates for the Summer School. These are based on when the class commences.

ID | Session name | Classes begin | Census date
---|-------------|---------------|------------
42 | Summer Dec  | 11 December   | 2 January  
43 | Summer Main | 4 January     | 12 January 
44 | Summer Late | 12 January    | 6 February 

*42 Summer Dec: Allows for a unit to run for 3–9 weeks, provided that the 20 per cent criterion is met.
**44 Summer Late: Last exam must be held by 1 March.

Withdrawal and Refund policy

- For classes commencing in December 2006, students withdrawing from a Summer School unit of study from 28 November 2006 to 2 January 2007, will receive a refund of tuition fees but will be liable for a $500 late withdrawal fee.
- For classes commencing after 4 January 2007, students withdrawing from a Summer School unit of study from 16 December 2006 to 12 January 2007, will receive a refund of tuition fees but will be liable for a $500 late withdrawal fee.
- For classes commencing after 12 January 2007, students withdrawing from a Summer School unit of study from 16 December 2006 to 6 February 2007, will receive a refund of tuition fees but will be liable for a $500 late withdrawal fee.
- Students may withdraw from their Summer School unit(s) of study up until 4pm on the last day of the Teaching Period for that particular unit of study. However, there may be an academic penalty (please refer to our website). The Teaching Period for purposes of this policy is defined in hours of published classes from the first day through to the last day of classes, excluding any final examination or assessment.
- Students withdrawing from a Summer School unit of study after 4pm on the relevant census date will receive no refund of their tuition fee.

Transferring between Summer School units

There will be no penalty if a student changes between units of study in the Summer School before the commencement of class. However NO transfers will be allowed after the commencement of the class.

Summer School scholarships

Merit scholarships

Only four merit scholarships are available and are automatically awarded to the top four students who achieve the highest results in their Summer School unit of study.

Educational/Financial Disadvantage scholarships

Partial or full Summer School scholarships are available to local undergraduate students for the Summer School with a good academic record. To be eligible for consideration you will need to provide evidence of long-term and serious educational disadvantage based on two or more criteria, one of which must be financial hardship. Please check our website for further details. Applications close on 27 October 2006.

University of Sydney (Coursework) Rule 2000 (as amended)

1.3 This Rule governs all coursework award courses in the University. It is to be read in conjunction with the University of Sydney (Coursework) Rule 2000 (as amended) and the Resolutions of the Senate and the faculty resolutions relating to each award course in that faculty.

Rules relating to coursework award courses

1. Definitions In this Rule:
1.1 award course means a formally approved program of study which can lead to an academic award granted by the University.
1.2 coursework means an award course not designated as a research award course. While the program of study in a coursework award course may include a component of original, supervised research, other forms of instruction and learning normally will be dominant. All undergraduate award courses are coursework award courses.
1.3 credit means advanced standing based on previous attainment in another award course at the University or at another institution. The advanced standing is expressed as credit points granted towards the award course. Credit may be granted as specific credit or non-specific credit.
1.3.1 specific credit means the recognition of previously completed studies as directly equivalent to units of study;
1.3.2 non-specific credit means a 'block credit' for a specified number of credit points at a particular level. These credit points may be in a particular subject area but are not linked to a specific unit of study; and
1.3.3 credit points means a measure of value indicating the contribution each unit of study provides towards meeting award course completion requirements stated as a total credit point value.
1.4 dean means the dean of a faculty or the director or principal of an academic college or the chairperson of a board of studies.
1.5 degree means a degree at the level of bachelor or master for the purpose of this Rule.
1.6 embedded courses/programs means award courses in the graduate certificate/graduate diploma/master's degree by coursework sequence which allow unit of study credit points to count in more than one of the awards.
1.7 faculty means a faculty, college board, a board of studies or the Australian Graduate School of Management Limited as established in each case by its constitution and in these Rules refers to the faculty or faculties responsible for the award course concerned.
1.8 major means a defined program of study, generally comprising specified units of study from later stages of the award course and requiring a smaller number of credit points than a major.
1.9 minor means a defined program of study, generally comprising units of study from later stages of the award course and requiring the prior completion of a relevant undergraduate degree or diploma.
1.10 postgraduate award course means an award course leading to the award of a graduate certificate, graduate diploma, degree of master or a doctorate. Normally, a postgraduate award course requires the prior completion of a relevant undergraduate degree or diploma.
1.11 research award course means an award course in which students undertake and report systematic, creative work in order to increase the stock of knowledge. The research award courses offered by the University are: higher doctorate, Doctor of Philosophy, doctorates by research and advanced coursework, and certain degrees of master designated as research degrees. The systematic, creative component of a research award course must comprise at least 66 per cent of the overall award course requirements.
1.12 stream means a defined program of study within an award course, which requires the completion of a program of study specified by the award course rules for the particular stream, in addition to the core program specified by award course rules for the award course.
1.13 student means a person enrolled as a candidate for a course.
1.14 testamur means a certificate of award provided to a graduate, usually at a graduation ceremony.
1.15 transcript or academic transcript means a printed statement setting out a student's academic record at the University.
1.16 unit of study means the smallest stand-alone component of a student's award course that is recordable on a student's transcript. Units of study have an integer credit point value, normally in the range 3–24.
1.17 undergraduate award course means an award course leading to the award of an associate diploma, diploma, advanced diploma or degree of bachelor.
2. Authorities and responsibilities
2.1 Authorities and responsibilities for the functions set out in this Rule are also defined in the document Academic Delegations of Authority. The latter document sets out the mechanisms by which a person who has delegated authority may appoint an agent to perform a particular function.
2.1 The procedures for consideration of, and deadlines for submission of, proposals for new and amended award courses will be determined by the Academic Board.

Division 1: Award course requirements, credit points and assessment

3. Award course requirements
3.1 To qualify for the award of a degree, diploma or certificate, a student must:
3.1.1 complete the award course requirements specified by the Senate for the award of the degree, diploma or certificate concerned;
3.1.2 complete any other award course requirements specified by the Academic Board on the recommendation of the faculty and published in the faculty resolutions relating to the award course;

3.1.3 complete any other award course requirements specified by the faculty in accordance with its delegated authority and published in the faculty resolutions relating to the award course; and

3.1.4 satisfy the requirements of all other relevant by-laws, rules and resolutions of the University.

4. Units of study and credit points

4.1.1 A unit of study comprises the forms of teaching and learning approved by a faculty. Where the unit of study is being provided specifically for an award course which is the responsibility of another faculty, that faculty must also provide approval.

4.1.2 A faculty considering the inclusion of a unit of study in the tables of units available for an award course for which it is responsible may review the forms of teaching and learning of that unit, may consult with the approving faculty about aspects of that unit and may specify additional conditions with respect to inclusion of that unit of study.

4.2 A student completes a unit of study if the student:

4.2.1 participates in the learning experiences provided for the unit of study;

4.2.2 meets the standards required by the University for academic honesty;

4.2.3 meets all examination, assessment and attendance requirements for the unit of study; and

4.2.4 passes the required assessments for the unit of study.

4.3 Each unit of study is assigned a specified number of credit points by the faculty responsible for the unit of study.

4.4 The total number of credit points required for completion of an award course will be as specified in the Senate resolutions relating to the award course.

4.5 The total number of credit points required for completion of award courses in an approved combined award course will be specified in the Senate or faculty resolutions relating to the award course.

4.6 A student may, under special circumstances, and in accordance with faculty resolutions, be permitted by the relevant dean to undertake a unit or units of study other than those specified in the faculty resolutions relating to the award course and have that unit or those units of study counted towards fulfilling the requirements of the award course in which the student is enrolled.

5. Unit of study assessment

5.1 A student who completes a unit of study will normally be awarded grades of high distinction, distinction, credit or pass, in accordance with policies established by the Academic Board. The grades high distinction, distinction and credit indicate work of a standard higher than that required for a pass.

5.2 A student who completes a unit of study for which only a pass/fail result is available will be recorded as having satisfied the requirements for the unit of study.

5.3 In determining the results of a student in any unit of study, the whole of the student's work in the unit of study may be taken into account.

5.4 Examination and assessment in the University are conducted in accordance with the policies and directions of the Academic Board.

6. Attendance

6.1 A faculty has authority to specify the attendance requirements for courses or units of study in that faculty. A faculty must take into account any University policies concerning modes of attendance, equity and disabled access.

6.2 A faculty has authority to specify the circumstances under which a student who does not satisfy attendance requirements may be deemed not to have completed a unit of study or an award course.

Division 2: Enrolment

7. Enrolment restrictions

7.1 A student who has completed a unit of study towards the requirements of an award course may not re-enrol in that unit of study, except as permitted by faculty resolution or with the written permission of the dean. A student permitted to re-enrol may receive a higher or lower grade, but not additional credit points.

7.2 Except as provided in section 7.1, a student may not enrol in any unit of study which overlaps substantially in content with a unit that has already been completed or for which credit or exemption has been granted towards the award course requirements.

7.3 A student may not enrol in units of study additional to award course requirements without first obtaining permission from the relevant dean.

7.4 Except as prescribed in faculty resolutions or with the permission of the relevant dean:

7.4.1 a student enrolled in an undergraduate course may not enrol in units of study with a total value of more than 32 credit points in any one semester, or 16 credit points in the summer session; and

7.4.2 a student enrolled in a postgraduate award course may not enrol in units of study with a total value of more than 24 credit points in any one semester, or 12 credit points in the summer session.

Division 3: Credit, cross-institutional study and their upper limits

8. Credit for previous studies

8.1 Students may be granted credit on the basis of previous studies.

8.2 Notwithstanding any credit granted on the basis of work completed or prior learning in another award course at the University of Sydney or in another institution, in order to qualify for an award a student must:

8.2.1 for undergraduate award courses, complete a minimum of the equivalent of two full-time semesters of the award course at the University; and

8.2.2 for postgraduate award courses, complete at least 50 per cent of the requirements prescribed for the award course at the University.

These requirements may be varied where the work was completed as part of an embedded program at the University or as part of an award course approved by the University in an approved conjoint venture with another institution.

8.3 The credit granted on the basis of work completed at an institution other than a university normally should not exceed one third of the overall award course requirements.

8.4 A faculty has authority to establish embedded academic sequences in closely related graduate certificate, graduate diploma and master's degree award courses. In such embedded sequences, a student may be granted credit for all or some of the units of study completed in one award of the sequence towards any other award in the sequence, irrespective of whether or not the award has been conferred.

8.5 In an award course offered as part of an approved conjoint venture the provisions for the granting of credit are prescribed in the Resolutions of the Senate and the faculty resolutions relating to that award course.

9. Cross-institutional study

9.1 The relevant dean may permit a student to complete a unit or units of study at another university or institution and have that unit or those units of study credited to the student's award course.

9.2 The relevant dean has authority to determine any conditions applying to cross-institutional study.

Division 4: Progression

10. Repeating a unit of study

10.1 A student who repeats a unit of study shall, unless granted exemption by the relevant dean:

10.1.1 participate in the learning experiences provided for the unit of study; and

10.1.2 meet all examination, assessment and attendance requirements for the unit of study.

10.2 A student who presents for re-assessment in any unit of study is not eligible for any prize or scholarship awarded in connection with that unit of study without the permission of the relevant dean.

11. Time limits

11.1 A student must complete all the requirements for an award course within ten calendar years or any lesser period if specified by resolution of the Senate or the faculty.
Division 5: Discontinuation of enrolment and suspension of candidature

12. Discontinuation of enrolment
12.1 A student who wishes to discontinue enrolment in an award course or a unit of study must apply to the relevant dean and will be presumed to have discontinued enrolment from the date of that application, unless evidence is produced showing:

12.1.1 that the discontinuation occurred at an earlier date; and

12.1.2 that there was good reason why the application could not be made at the earlier time.

12.2 A student who discontinues enrolment during the first year of enrolment in an award course may not re-enrol in that award course unless:

12.2.1 the relevant dean has granted prior permission to re-enrol; or

12.2.2 the student is reselected for admission to candidature for that course.

12.3 No student may discontinue enrolment in an award course or unit of study after the end of classes in that award course or unit of study, unless he or she produces evidence that:

12.3.1 the discontinuation occurred at an earlier date; and

12.3.2 there was good reason why the application could not be made at the earlier time.

12.4 A discontinuation of enrolment may be recorded as ‘Withdrawn (W)’ or ‘Discontinued – not to count as failure (DNF)’ where that discontinuation occurs within the time-frames specified by the University and published by the faculty, or where the student meets other conditions as specified by the relevant faculty.

13. Suspension of candidature
13.1 A student must be enrolled in each semester in which he or she is actively completing the requirements for the award course. A student who wishes to suspend candidature must first obtain approval from the relevant dean.

13.2 The candidature of a student who has not re-enrolled and who has not obtained approval from the dean for suspension will be deemed to have lapsed.

13.3 A student whose candidature has lapsed must apply for re-admission in accordance with procedures determined by the relevant faculty.

13.4 A student who enrols after suspending candidature shall complete the requirements for the award course under such conditions as determined by the dean.

Division 6: Unsatisfactory progress and exclusion

14. Satisfactory progress
14.1 A faculty has authority to determine what constitutes satisfactory progress for all students enrolled in award courses in that faculty, in accordance with the policies and directions of the University and the Academic Board.

15. Requirement to show good cause
15.1 For the purposes of this Rule, ‘good cause’ means circumstances beyond the reasonable control of a student, which may include serious ill health or misadventure, but does not include demands of employers, pressure of employment or time devoted to non-University activities, unless these are relevant to serious ill health or misadventure. In all cases the onus is on the student to provide the University with satisfactory evidence to establish good cause. The University may take into account relevant aspects of a student’s record in other courses or units of study within the University and relevant aspects of academic studies at other institutions provided that the student presents this information to the University.

15.2 The relevant dean may require a student who has not made satisfactory progress to show good cause why he or she should be allowed to re-enrol.

15.3 The dean will permit a student who has shown good cause to re-enrol.

16. Exclusion for failure to show good cause
The dean may, where good cause has not been established:

16.1 exclude the student from the relevant course; or

16.2 permit the student to re-enrol in the relevant award course subject to restrictions on units of study, which may include, but are not restricted to:

16.2.1 completion of a unit or units of study within a specified time;

16.2.2 exclusion from a unit or units of study, provided that the dean must first consult the head of the department responsible for the unit or units of study; and

16.2.3 specification of the earliest date upon which a student may re-enrol in a unit or units of study.

17. Applying for re-admission after exclusion
17.1 A student who has been excluded from an award course or from a unit or units of study may apply to the relevant dean for re-admission to the award course or re-enrolment in the unit or units of study concerned after at least four semesters, and that dean may readmit the student to the award course or permit the student to re-enrol in the unit or units of study concerned.

17.2 With the written approval of the relevant dean, a student who has been excluded may be given credit for any work completed elsewhere in the University or in another university during a period of exclusion.

18. Appeals against exclusion
18.1 In this Rule a reference to the Appeals Committee is a reference to the Senate Student Appeals Committee (Exclusions and Re-admissions).

18.2.1.1 A student who has been excluded in accordance with this Rule may appeal to the Appeals Committee.

18.2.1.2 A student who has applied for re-admission to an award course or re-enrolment in a unit of study after a period of exclusion, and who is refused re-admission or re-enrolment, may also apply to the Appeals Committee.

18.2.2 The Appeals Committee shall comprise:

18.2.2.1 three ex officio members (the Chancellor, the Deputy Chancellor and the Vice-Chancellor and Principal);

18.2.2.2 the Chair and Deputy Chairs of the Academic Board;

18.2.2.3 two student Fellows; and

18.2.2.4 up to four other Fellows.

18.2.3 The Appeals Committee may meet as one or more subcommittees providing that each subcommittee shall include at least one member of each of the categories of:

18.2.3.1 ex officio member;

18.2.3.2 Chair or Deputy Chair of the Academic Board;

18.2.3.3 student Fellow; and

18.2.3.4 other Fellows.

18.2.4 Three members shall constitute a quorum for a meeting of the Appeals Committee or a subcommittee.

18.2.5 The Appeals Committee and its subcommittees have authority to hear and determine all such appeals and must report its decision to the Senate annually.

18.2.6 The Appeals Committee or a subcommittee may uphold or disallow any appeal and, at its discretion, may determine the earliest date within a maximum of four semesters at which a student who has been excluded shall be permitted to apply to re-enrol.

18.2.7 No appeal shall be determined without granting the student the opportunity to appear in person before the Appeals Committee or subcommittee considering the appeal. A student so appearing may be accompanied by a friend or adviser.

18.2.8 The Appeals Committee or subcommittee may hear the relevant dean but that dean may only be present at those stages at which the student is permitted to be present. Similarly, the dean is entitled to be present when the Committee or subcommittee hears the student.

18.2.9 If, due notice having been given, a student fails to attend a meeting of the Appeals Committee or subcommittee scheduled to consider that student’s appeal, the Appeals Committee or subcommittee, at its discretion, may defer consideration of the appeal or may proceed to determine the appeal.

18.2.10 A student who has been excluded in accordance with these resolutions and has lodged a timely appeal against that exclusion may re-enrol pending determination of that appeal if it has not been determined by the commencement of classes in the next appropriate semester.

Division 7: Exceptional circumstances

19. Variation of award course requirements in exceptional circumstances

19.1 The relevant dean may vary any requirement for a particular student enrolled in an award course in that faculty where, in the opinion of the dean, exceptional circumstances exist.
Division 8: Award of degrees, diplomas and certificates

20. **Classes of award**

20.1 Undergraduate diplomas may be awarded in five grades – pass, pass with merit, pass with distinction, pass with high distinction or honours.

20.2 Degrees of bachelor may be awarded in two grades – pass or honours.

20.3 Graduate diplomas and graduate certificates may be awarded in one grade only – pass.

20.4 Degrees of master by coursework may be awarded three grades – pass, pass with merit or honours.

21. **Award of the degree of bachelor with honours**

21.1 The award of honours is reserved to indicate special proficiency. The basis on which a student may qualify for the award of honours in a particular award course is specified in the faculty resolutions relating to the course.

21.2 Each faculty shall publish the grading systems and criteria for the award of honours in that faculty.

21.3 Classes which may be used for the award of honours are:

   21.3.1 First Class
   21.3.2 Second Class/Division 1
   21.3.3 Second Class/Division 2
   21.3.4 Third Class

21.4 With respect to award courses which include an additional honours year:

   21.4.1 a student may not graduate with the pass degree while enrolled in the honours year;
   21.4.2 on the recommendation of the head of the department concerned, a dean may permit a student who has been awarded the pass degree at a recognised tertiary institution to enrol in the honours year in that faculty;
   21.4.3 faculties may prescribe the conditions under which a student may enrol part-time in the honours year;
   21.4.4 a student who fails or discontinues the honours year may not re-enrol in it, except with the approval of the dean.

22. **University Medal**

22.1 An honours bachelor’s degree student with an outstanding academic record throughout the award course may be eligible for the award of a University Medal, in accordance with Academic Board policy and the requirements of the faculty resolutions relating to the award course concerned.

23. **Award of the degree of master with honours or merit**

23.1 The award of honours or pass with merit is reserved to indicate special proficiency or particular pathways to completion. The basis on which a student may qualify for the award of honours or the award with merit in a particular degree is specified in the Faculty Resolutions relating to that degree.

24. **Transcripts and testamurs**

24.1 A student who has completed an award course or a unit of study at the University will receive an academic transcript upon application and payment of any charges required.

24.2 Testamurs may indicate streams or majors or both as specified in the relevant faculty resolutions.

Division 9: Transitional provisions

25. **Application of this Rule during transition**

25.1 This Rule applies to all candidates for degrees, diplomas and certificates who commence candidature after 1 January 2001.

25.2 Candidates who commenced candidature prior to this date may choose to proceed in accordance with the resolutions of the Senate in force at the time they enrolled, except that the faculty may determine specific conditions for any student who has re-enrolled in an award course after a period of suspension.
University of Sydney (Doctor of Philosophy (PhD))
Rule 2004

Please also see the University of Sydney (Authority Within Academic Units) Rule 2003 (as amended).

Part 1 – Preliminary

Part 2 – Admission to candidature

Part 3 – Supervision

Part 4 – Candidature

Part 5 – Submission of thesis

Part 1 – Preliminary

Citation and commencement
1.1 This Rule is made by the Senate of the University of Sydney pursuant to section 37(1) of the University of Sydney Act 1989 for the purposes of the University of Sydney By-law 1999.

1.2 Commencement
1.2.1 This Rule commences on the day after it is made in accordance with Chapter 2 of the University of Sydney By-law 1999.

Purpose
2.1 This Rule:
2.1.1 repeals and replaces Part 10, Division 4 of the University of Sydney (Amendment Act) Rule 1999 in its entirety; and
2.1.2 deals with matters relating to the degree of Doctor of Philosophy.

Part 2 – Admission to candidature

3. Heads of department
3.1 A head of department may delegate to a specified member of the academic staff his or her responsibilities under these Rules by countersigning a specific recommendation in respect of a particular candidature or by making, and forwarding to the Registrar, a written statement of delegation of those powers.

4. Admission to candidature
4.1 An applicant for admission as a candidate for the degree shall, except as provided in 4.2 and 4.3 below, hold or have fulfilled all the requirements for:
4.1.1 the degree of master, or
4.1.2 the degree of bachelor with first or second class honours.

4.2 A faculty that the candidate is suitably prepared in the particular field of study to undertake candidature for the degree of Doctor of Philosophy.

4.3 The Academic Board has endorsed an interpretation of the qualifying examination as including completion of a period of relevant full-time or part-time advanced study and research towards a master’s degree in the University of Sydney, at such a standard as would demonstrate to the satisfaction of the faculty that the candidate is suitably prepared in the particular field of study to undertake candidature for the degree of Doctor of Philosophy.

4.4 The Academic Board may, in accordance with this Rule, admit as a candidate for the degree an applicant holding qualifications which, in the opinion of the faculty concerned and of the Academic Board, are equivalent to those prescribed in 4.1 or 4.2 above and such candidate shall proceed to the degree under such conditions as the Academic Board may prescribe.

4.5 An applicant for admission to candidature shall submit to the faculty concerned:
4.5.1 a proposed course of advanced study and research, approved by the head of the department in which the work is to be carried out, to be undertaken by the applicant in a department of the University, and
4.5.2 satisfactory evidence of adequate training and ability to pursue the proposed course.

4.6 The faculty may require a candidate, as part of the evidence of the candidate’s training and ability to pursue the proposed course, to pass a special examination.

4.7 A reference in this section to a department includes a reference to one or more departments, one or more schools, an interdepartmental committee and an interschool committee.

5. Probationary acceptance
5.1 A candidate may be accepted by a faculty on a probationary basis for a period not exceeding one year and upon completion of this probationary period, the faculty shall review the candidate’s work and shall either confirm the candidate’s status or terminate the candidature.

5.2 In the case of a candidate accepted on a probationary period under 5.1 above, the candidature shall be deemed to have commenced from the date of such acceptance.

6. Control of candidature
6.1 Each candidate shall pursue his or her course of advanced study and research wholly under the control of the University.

6.2 Where a candidate is employed by an institution other than the University, the faculty or college board may require a statement by that employer acknowledging that the candidature will be under the control of the University.

7. Other studies during the candidature
7.1 A candidate may be required by the head of department or the supervisor to attend lectures, seminar courses or practical work courses or to undertake courses and, if required, the assessment for such courses, subject to the approval of any other head of department concerned.

8. Credit for previous studies
8.1 A candidate who, at the date of admission to candidature, has completed not less than six months as a candidate for the degree of master in any faculty or board of studies of the University of Sydney, may be permitted by the faculty concerned to be credited for the whole or any part of the period of candidature completed for the degree of master as a period of candidature completed for the degree of Doctor of Philosophy, provided that the period of candidature for the degree of master for which credit is sought shall have been a course of full-time or part-time advanced study and research under a supervisor appointed by the faculty or board of studies concerned and directly related to the candidate’s proposed course of advanced study and research for the degree of Doctor of Philosophy.

8.2 A candidate who, at the date of admission has completed not less than six months as a candidate for a higher degree in another university or institution may be permitted by the Academic Board, on the recommendation of the faculty concerned, to be credited for the whole or any part of the period of candidature completed as a period completed for the degree of Doctor of Philosophy of the University of Sydney, provided that:
8.2.1 at the date of admission to candidature for the higher degree of the other university or institution concerned the candidate shall have fulfilled the requirements of admission to candidature set out in section 3 above;
8.2.2 the period of candidature for the higher degree of the other university or institution concerned for which credit is sought shall have been a course of full-time or part-time advanced study and research under a supervisor appointed by the
other university or institution concerned and directly related to the candidate’s proposed course of advanced study and research in the University of Sydney; the candidate shall have abandoned candidature for the higher degree of the other university or institution concerned for which credit is sought;

8.2.4 the amount of credit which may be so granted shall not exceed one year; and
8.2.5 no candidate who has been granted credit shall present a thesis for examination for the degree earlier than the end of the second year after acceptance.

8.3 The Faculty of Medicine may grant credit not exceeding one year to a candidate for the degree of Doctor of Philosophy in that Faculty who has submitted documented evidence of having previously completed supervised study towards the degree of Doctor of Medicine of the University of Sydney.

Part 3 – Supervision

9. Appointment and qualifications of supervisors and associate supervisors
9.1 The faculty or college board, on the recommendation of the head of department concerned, shall appoint a suitably qualified supervisor and associate supervisors for each candidate to take primary responsibility for the conduct of the candidature and to be responsible for the progress of the candidature to the head of department and the faculty or college board concerned in accordance with policy established by the Academic Board.

Part 4 – Candidature

10. Location
10.1 Subject to the annual approval of the supervisor, head of department and faculty or college board, the candidate shall pursue the course of advanced study and research either:
10.1.1 within the University including its research stations and teaching hospitals;
10.1.2 on fieldwork either in the field or in libraries, museums or other repositories;
10.1.3 within industrial laboratories or research institutions or other institutions considered by the faculty or college board concerned to provide adequate facilities for that candidature; or
10.1.4 within a professional working environment;
10.1.5 and shall attend at the University for such consultation with the supervisor and shall participate in such departmental and faculty or college seminars as shall annually be specified.
10.2 A candidate pursuing candidature outside Australia must also complete a minimum of two semesters of candidature within the University [but not necessarily immediately before submission, not necessarily as a continuous two-semester period] before submission of the thesis.
10.2.1 The corresponding period for candidates for whom the minimum length of candidature is four semesters is a minimum of one semester.
10.3 When recommending the detailed annual conditions for each candidate’s particular course of advanced study and research the supervisor and head of department must indicate whether they are satisfied that the proposed supervision arrangements will be satisfactory.

11. Progress
11.1 At the end of each year each candidate shall provide evidence of progress and attend a progress review interview to the satisfaction of the supervisor and head of department concerned and any Departmental or Faculty Postgraduate Review Committee.
11.2 On the basis of evidence provided and the interview, the head of department shall recommend the conditions of candidature to apply for the following year and may require the candidate to provide further evidence of progress at the end of one semester or such other period as the head of department considers appropriate.
11.3 If a candidate fails to submit evidence of progress or if the head of department considers that the evidence submitted does not indicate satisfactory progress, the faculty or college board may, on the head’s recommendation, call upon the candidate to show cause why that candidature should not be terminated by reason of unsatisfactory progress towards completion of the degree and where, in the opinion of the faculty or college board, the candidate does not show good cause the faculty or college board may terminate that candidature or may impose conditions on the continuation of that candidature.

Part 5 – Submission of thesis

12. The thesis
12.1 On completing the course of advanced study and research, a candidate shall present a thesis embodying the results of the work undertaken which shall be a substantially original contribution to the subject concerned.
12.1.2 The candidate shall state, generally in the preface and specifically in notes, the sources from which the information is derived, the animal and human ethical approvals obtained, the extent to which the work of others has been made use of, and the portion of the work the candidate claims as original.
12.2 A candidate may also submit in support of the candidature any publication of which the candidate is the sole or joint author. In such a case the candidate must produce evidence to identify satisfactorily the sections of the work for which the candidate is responsible.
12.3 Except where the candidature has been governed by an approved cotutelle agreement, a candidate may not present as the thesis any work which has been presented for a degree or diploma at this or another university, but the candidate will not be precluded from incorporating such in the thesis, provided that, in presenting the thesis, the candidate indicates the part of the work which has been so incorporated.
12.4 Theses shall be written in English, except that:
12.4.1 in the case of a candidature governed by an approved cotutelle agreement, the thesis may be written in English or in another language; and
12.4.2.1 in the Faculty of Arts, in the case of language departments, theses may be written either in English or in their target language as determined by the department, unless a department has specified by means of a Faculty resolution that it will consider applications to submit the thesis in a language other than:
12.4.2.1.1 English; or
12.4.2.1.2 a target language of the department.
12.4.2.2 Such applications should be made in writing; and approved by the head of department concerned and the Dean of the Faculty, before the commencement of candidature.
12.4.2.3 In considering applications a head of department shall take into account arrangements for supervision and examination.
12.5 A candidate shall submit to the Registrar four copies of the thesis in a form prescribed by resolution of the Academic Board and four copies of a summary of about 300 words in length.
12.6 The thesis shall be accompanied by a certificate from the supervisor stating whether, in the supervisor’s opinion, the form of presentation of the thesis is satisfactory.
13. Earliest date for submission
13.1 Except as provided below, a candidate may not submit a thesis for examination earlier than the end of the sixth semester of candidature.
13.2 A faculty or college board may permit a candidate holding any of the following qualifications of the University of Sydney or from such other institution as the faculty or college board may approve, to submit a thesis for examination not earlier than the end of the fourth semester of candidature:
13.2.1 a degree of master completed primarily by research;
13.2.2 both the degrees of Bachelor of Dental Surgery with honours and Bachelor of Science (Dental) with honours;
13.2.3 both the degrees of Bachelor of Medicine with honours and Bachelor of Science (Medical) with honours; or
13.2.4 both the degrees of Bachelor of Veterinary Science with honours and Bachelor of Science (Veterinary) with honours.
13.3 Notwithstanding 13.1 and 13.2 above, a faculty may, on the recommendation of the head of department and supervisor concerned, permit a candidate to submit a thesis for examination up to one semester earlier than prescribed if, in the opinion of the faculty, evidence has been produced that the candidate has made exceptional progress in his or her candidature.
13.4.1 Notwithstanding 13.1, 13.2 and 13.3 above, the Chair of the Academic Board may, on the recommendation of the dean...
of the faculty in which the candidate is enrolled, permit a candidate to submit a thesis for examination earlier than prescribed if, in the opinion of the Chair of the Academic Board, evidence has been produced that the candidate has made exceptional progress in his or her candidature.

13.4.2 The Chair of the Academic Board may take advice from the Chair of the Graduate Studies Committee and shall report any applications under this provision and the action taken to the next meeting of the Academic Board.

14. Latest date for submission
14.1 Except as provided in 14.1 to 14.3 below, a candidate shall submit the thesis for examination not later than the end of the eighth semester of candidature.

14.2 A candidate whose candidature has been part-time throughout shall submit the thesis for examination not later than the end of the 16th semester of candidature.

14.3 The time limits set out in 14.1 to 14.2 above, apply to candidates who commence candidature after 31 December 2000. Candidates who commenced candidature prior to this date may choose to proceed in accordance with the Rules in force at the time when they commenced candidature.

14.4 The relevant dean may permit a candidate to submit the thesis for examination after a period of time greater than the maximum periods specified.

15. Examination
15.1 The procedures for examination shall be prescribed by the Academic Board.

Applying for a course

Domestic applicants for undergraduate courses and programs of study
For the purpose of admission and enrolment 'domestic applicant' refers to citizens and permanent residents of Australia and citizens of New Zealand. If you are in this group and wish to apply for admission into an undergraduate course, you would generally apply through the Universities Admissions Centre (UAC). The deadline for application is the last working day of September in the year before enrolment. Go to the UAC website for more information.

Note that some faculties, such as Pharmacy, the Sydney Conservatorium of Music and Sydney College of the Arts, have additional application procedures.

Domestic applicants for postgraduate courses and programs of study
For the purpose of admission and enrolment 'domestic applicant' refers to citizens and permanent residents of Australia and citizens of New Zealand. Application is direct to the faculty which offers the course that you are interested in. Application forms for postgraduate coursework, postgraduate research and the master's qualifying or preliminary program and for non-award postgraduate study can be found at http://www.usyd.edu.au/studentcentre.

Please note that some faculties use their own specially tailored application forms for admission into their courses. Please contact the relevant faculty.

International applicants for all course types (undergraduate and postgraduate)
'International applicants' refers to all applicants other than Australian citizens, Australian permanent residents and citizens of New Zealand. In the majority of cases international applicants apply for admission
through the University’s International Office (IO). All the information international applicants need, including application forms, is available from the IO website.

Assessment
For assessment matters refer to the relevant department or school.

Careers Centre
The Careers Centre will help you with careers preparation and graduate recruitment.

Careers Centre
Ground Floor, Mackie Building K01

Counselling Service
The Counselling Service aims to help students fulfil their academic, individual and social goals through professional counselling. The Service provides short-term, problem-focused counselling to promote psychological wellbeing and to help students develop effective and realistic coping strategies. International students can access counselling assistance through the International Students Support Unit (ISSU). Each semester the Counselling Service runs a program of workshops designed to assist students master essential study and life management skills. Workshops are available to all local and international students. For details of workshops, activities and online resources provided by the service see the Counselling Service website via your MyUni student portal or the Services for Students website. Phone to make an appointment. Daily walk-in appointments are also available between 11am and 3pm.

Disability Services
Disability Services is the principal point of contact for advice on assistance available for students with disabilities. Students with a disability need to register with Disability Services to receive support and assistance. Disability Services works closely with academic and administrative staff to ensure that students receive reasonable accommodations in their areas of study. Assistance available includes the provision of note taking, interpreters and negotiation with academic staff regarding assessment and course requirement modifications where appropriate. For details on registering with the Service including documentation required and online resources see the Disability Services website via your MyUni student portal or http://www.usyd.edu.au/disability.

Enrolment

Students entering first year
Details of enrolment procedures will be sent to you with your UAC offer of enrolment. Enrolment takes place at a specific time and date, usually during the last week of January.

All other students
A pre-enrolment package is sent to all enrolled students in late September and contains instructions on the procedure for web-based pre-enrolment.

Environmental Policy
The University of Sydney’s Environmental Policy promotes sustainable resource and product use; and encourages the practice of environmental stewardship by staff and students. The policy is supported by the University wide Sustainable Campus Program.

Enquiries can be directed to the Manager, Environmental Strategies
Phone: +61 2 93512063
Email: sustainable@usyd.edu.au
or go to http://www.usyd.edu.au/sustainable where you can find out what the University is doing and how you can get involved, make suggestions or receive the Sustainable Campus Newsletter.

Examinations
The Examinations and Exclusions Office looks after the majority of examination arrangements and student progression. Some faculties, such as the Sydney Conservatorium of Music, make all examination arrangements for the units of study that they offer.

Financial Assistance Office
The University of Sydney has a number of loan and bursary funds to assist students experiencing financial difficulties. Loan assistance is available for undergraduate and postgraduate students enrolled in degree and diploma courses at the University. The assistance is not intended to provide the principle means of support but to help enrolled students in financial need with expenses such as housing bonds and rent; phone and electricity bills; medical expenses; buying textbooks and course equipment. Loans are interest free and are repayable usually within one year. Bursaries may be awarded depending on financial need and academic merit and are usually only available to local full-time undergraduate students. Advertised bursaries, including First Year Bursaries, are advertised through the MyUni student portal in January each year. For details of types of assistance and online resources provided by the service see the Financial Assistance website via your MyUni student portal or the Services for Students website.

Freedom of Information
The University of Sydney falls within the jurisdiction of the NSW Freedom of Information Act, 1989. The act:

- requires information concerning documents held by the University to be made available to the public;
- enables a member of the public to obtain access to documents held by the University; and
- enables a member of the public to ensure that records held by the University concerning his or her personal affairs are not incomplete, incorrect, out of date or misleading.

(Note that a ‘member of the public’ includes staff and students of the University.)

It is a requirement of the act that applications be processed and a determination made within a specified time period, generally 21 days. Determinations are made by the University’s Registrar.

While application may be made to access University documents, some may not be released in accordance with particular exemptions provided by the act. There are review and appeal mechanisms which apply when access has been refused.

The University is required to report to the public on its freedom of information (FOI) activities on a regular basis and to produce two documents: a Statement of Affairs (annually) and a Summary of Affairs (every six months). The Statement of Affairs contains information about the University, its structure, function and the kinds of documents held. The Summary of Affairs identifies the University’s policy documents and provides information on how to make an application for access to University documents.

Further information and copies of the current Statement and Summary may be found at http://www.usyd.edu.au/arms/foi

(Grievances) Appeals
You may consider that a decision affecting your candidature for a degree or other activities at the University has not taken into account all relevant matters.

In some cases the by-laws or resolutions of the Senate (see the University Calendar) provide for a right of appeal against particular decisions; for example, there is provision for appeal against academic decisions, disciplinary decisions and exclusion after failure.

A document outlining the current procedures for appeals against academic decisions is available at the Student Centre, at the SRC, and on the University’s policy online website (click on ‘Study at the University’, then click on ‘Appeals’ – see the Academic Board and Senate resolutions).

For assistance or advice regarding an appeal contact:

International Student Support Unit
The International Student Support Unit assists international students through the provision of orientation, counselling and welfare services to both students and their families. ISSU aims to help international students cope successfully with the challenges of living and studying in an unfamiliar culture, to achieve success in their studies and to make the experience of being an international student rewarding and enjoyable. For details of orientation activities, counselling and welfare services provided to both students and their families and online resources, see the MyUni student portal or the Services for Students website http://www.usyd.edu.au/stuserv. International students also have access to all University student support services.

Koori Centre and Yooroang Garang
Islander people in all aspects of tertiary education at the University of Sydney. The Cadigal Special Entry Program assists Indigenous Australians to enter undergraduate study across all areas of the University.

As well as delivering block-mode courses for Indigenous Australian students, the Koori Centre teaches Indigenous Australian Studies in various mainstream courses. In addition the Centre provides tutorial assistance, and student facilities such as: computer lab, Indigenous research library and study rooms for Indigenous Australian students across the University.

In particular the Koori Centre aims to increase the successful participation of Indigenous Australians in undergraduate and postgraduate degrees, develop the teaching of Aboriginal Studies, conduct research in the field of Aboriginal education, and establish working ties with schools and communities.

The Koori Centre works in close collaboration with Yooroang Garang: School of Indigenous Health Studies in the Faculty of Health Sciences at the University's Cumberland Campus. Yooroang Garang provides advice, assistance and academic support for Indigenous students in the faculty, as well as preparatory undergraduate and postgraduate courses.

Learning Centre
The Learning Centre helps students develop the generic learning and communication skills that are necessary for university study and beyond. The centre is committed to helping students achieve their academic potential throughout their undergraduate and postgraduate studies. The centre’s program includes a wide range of workshops on study skills, academic reading and writing, oral communication skills and postgraduate writing and research skills. Other services include an individual learning program, faculty-based workshops, computer-based learning resources, publications of learning resources and library facilities. For details of programs, activities and online resources provided by the centre see the website via your MyUni student portal or the Services for Students website.

### Library

The University of Sydney Library, the largest academic library in the Southern Hemisphere, is a network of 17 libraries located on nine campuses. The Library website provides access to services and resources, anywhere at anytime. The locations, opening hours and subject specialties of the libraries are listed on the website.

Over five million items are available via the Library catalogue, including more than 68,000 electronic journals and 281,000 electronic books. Past exam papers are also available online. Enrolled students are entitled to borrow from any of the University Libraries. More information is available at http://www.library.usyd.edu.au/borrowing.

Reading list items are available via the reserve service. Increasingly, reading list material is becoming available in electronic form. For details see the reserve service website.

Library staff are always available to support students in their studies. 'Ask a Librarian' is available in person, by email, or by using an online chat service.

A specialist librarian is available for all discipline areas and will provide training in finding high quality information. Courses cover a range of skills including research methodology, database searching, effective use of the Internet and the use of reference management software. See the subject contact page.

Library facilities include individual and group study spaces, computers, printers, multimedia equipment, photocopying and adaptive technologies. Check the 'Libraries' link on the home page to find out about services and facilities in specific libraries.

The Client Service Charter describes the Library's commitment to supporting students' learning, including those with special needs. See the Client Service Charter online.

Your comments and suggestions are always welcome.

### Mathematics Learning Centre

The Mathematics Learning Centre assists undergraduate students to develop the mathematical knowledge, skills and confidence that are needed for studying first level mathematics or statistics units at university. The Centre runs bridging courses in mathematics at the beginning of the academic year (fees apply). The Centre also provides on-going support to eligible students during the year through individual assistance and small group tutorials. For details of activities and online resources provided by the centre see the website via your MyUni student portal or the Services for Students website.

### Multimedia and Educational Technologies in Arts (META) Resource Centre
(Languages and E-Learning)

The centre provides access to recorded lectures, classwork and interactive self-paced learning materials for students of languages other than English (LOTE) and English as a second language (ESL). The self-study room provides interactive computer assisted learning and access to live multilingual satellite television broadcasts. Computer access labs provide Internet, email and word processing access. The centre also provides teaching rooms with state-of-the-art multimedia equipment, language laboratories and video conferencing facilities for Faculty of Arts courses.

### MyUni Student Portal

The MyUni student portal is the starting point and 'one-stop' environment for students to access all their web-based University information and services. MyUni automatically tailors what a student sees based on their login-in and offers students the option of further personalising content. Most importantly, MyUni allows students to complete tasks online that would previously have required attendance in person. The following are examples of MyUni services and information:

- support services for students in health, counselling, child care, accommodation, employment and wellbeing;
- student administration systems for obtaining exam results, enrolment and variations, timetabling, email services and links to courses and units of study information;
- links to the University's e-learning systems;
- library services;
- important messages and student alerts;
- information technology and support services;
- information for local, indigenous and international students; and
- campus maps, with descriptions of cultural, sporting and campus facilities.

Website: http://myuni.usyd.edu.au

### Part-time, full-time

#### Undergraduate students

Undergraduate students are usually considered full-time if they have a student load of at least 0.375 each semester. Anything under this amount is considered a part-time study load.

Note that some faculties have minimum study load requirements for satisfactory progress.
Postgraduate students (Coursework)
For postgraduate coursework students part-time or full-time status is determined by credit-point load. Enrolment in units of study which total at least 18 credit points in a semester is classed as full-time. Anything under this amount is a part-time study load.

Please note that classes for some coursework programs are held in the evenings (usually 6–9pm).

Postgraduate students (Research)
Full-time candidates for research degrees do not keep to the normal semester schedule, instead they work continuously throughout the year with a period of four weeks recreation leave. There is no strict definition of what constitutes full-time candidature but if you have employment or other commitments that would prevent you from devoting at least the equivalent of a 35-hour working week to your candidature (including attendance at the University for lectures, seminars, practical work and consultation with your supervisor) you should enrol as a part-time candidate. If in doubt you should consult your faculty or supervisor.

International students
Student visa regulations require international students to undertake full-time study. International students on visas other than student visas may be permitted to study part-time.

Policy online
In addition to the resolutions covering specific courses there are a number of University policies that apply to students. These include:

- The code of conduct for students
- Academic honesty in coursework
- Student plagiarism: Coursework assessment and examination of coursework

All of these policies can be accessed from the University's Policy online website.

Privacy
The University is subject to the NSW Privacy and Personal Information Protection Act 1998 and the NSW Health Records and Information Privacy Act 2002. Central to both acts are the sets of information protection principles (IPPs) and health privacy principles which regulate the collection, management, use and disclosure of personal and health information. In compliance with the Privacy and Personal Information Protection Act the University developed a Privacy Management Plan which includes the University Privacy Policy. The Privacy Management Plan sets out the IPPs and how they apply to functions and activities carried out by the University. Both the plan and the University Privacy Policy were endorsed by the Vice-Chancellor on 29 June 2000.

Further information and a copy of the plan may be found at http://www.usyd.edu.au/arms/privacy.

Any questions regarding the Freedom of Information Act, the Privacy and Personal Information Protection Act, the Health Records and Information Privacy Act or the Privacy Management Plan should be directed to:

Student Identity Cards
The student identity card functions as a library borrowing card, a transport concession card (when suitably endorsed) and a general identity card. The card must be carried at all times on the grounds of the University and must be shown on demand.

Student Services
The University provides personal, welfare, administrative and academic support services to facilitate your success at University. Many factors can impact on your wellbeing while studying at university and student services can assist you in managing and handling these more effectively. For details of services and online resources provided see your MyUni student portal or the Services for Students website:
http://www.usyd.edu.au/stuserv

The Sydney Summer School
Most faculties at the University offer units of study from undergraduate degree programs during summer. There are also some units of study available for postgraduate coursework programs from some faculties. As the University uses its entire quota of Commonwealth supported places in first and second semester, these units are full fee-paying for both local and international students and enrolment is entirely voluntary. However, Summer School units enable students to accelerate their degree progress, make up for a failed unit or fit in a unit which otherwise would not suit their timetables. New students may also gain a head start by completing subjects before they commence their degrees. Units start at various times from late November and run for up to six weeks (followed by an examination week). Notice of the units available is on the Summer School website and is usually circulated to students with their results notices. A smaller Winter School is also run from the Summer School office. It commences on 3 July and runs for up to three weeks (followed by an examination week). It offers mainly postgraduate and a few undergraduate units of study.

Information can be found on the Summer School website:

The University of Sydney Foundation Program (USFP)
The University of Sydney offers its foundation program to international students as a preparation for undergraduate degrees at several Australian universities. The Foundation Program is conducted by Taylors College on behalf of Study Group Australia and the University of Sydney. The Foundation Program allows both first and second semester entry to undergraduate courses at the University of Sydney and other universities within Australia.

Fax: +61 2 9267 0531
Timetabling Unit

The Timetabling Unit in the Student Centre is responsible for producing students’ class and tutorial timetables. Semester One timetables are available from the Wednesday of O Week through the MyUni website.

University Health Service

The University Health Service provides a full experienced general practitioner service and emergency medical care to all members of the University community. You can consult a doctor either by appointment or on a walk-in basis (for more urgent matters only). The Health Service bills Medicare or your overseas student health care provider (Worldcare or Medibank Private) directly for the full cost of most consultations.

See also the Glossary for administrative information relating to particular terms.
Student organisations and International students

Student organisations

International students

The following information is for international students studying onshore on an Australian Student Visa.

**Full-time study**
International students must maintain full-time enrolment at all times (a minimum of 18 credit points). However, in the following limited circumstances, part-time study is permitted:

- students studying in Australia on a different type of visa that does not carry study restrictions;
- students in their final semester who are required to take additional units to complete their course;
- cross-institutional students enrolled full-time at their home institution;
- students enrolled in an approved joint delivery program that involves enrolment at two institutions.

**Satisfactory academic progress**
The University is required to report to the Department of Immigration and Multicultural Affairs (DIMA) any International Student who fails to maintain satisfactory academic progress. This may result in automatic visa cancellation. It is important that International Students contact the International Office if they are experiencing academic difficulties.

**Distance/web-based study**
International students studying onshore in Australia are not permitted to enrol in distance or web-based courses. However, a small number of web-based units within a course taught largely in face-to-face mode are allowed. Contact the faculty to discuss enrolment options.

**Work permits**
International students with a work permit are permitted to work for up to 20 hours during semester and full-time during the University’s official vacation periods. Contact the International Office for more information.

**Change of address**
International Students must notify the University of their residential address within seven days of arrival and notify any change of address within seven days. This may be done via the University’s MyUni Web portal.

**Course transfers**
Sponsored students will need permission from their sponsors before transferring courses. Australian Government sponsored students (AusAID, Endeavour) and Asia Development Bank (ADB) sponsored students should contact the International Office in the early stages of considering a course transfer.

**Suspension/discontinuation**
The University is required to report to DIMA international students who discontinue or suspend their studies. Students who suspend their studies for severe medical or compassionate reasons should contact the International Office urgently.

**Overseas student health cover**
Australian Student Visa holders must maintain overseas health cover for the duration of their stay. The International Office arranges health cover for the first year but it is the individual student’s responsibility to maintain health cover for each subsequent year.

**Additional information**
For more information related to international students, please see the Glossary in this handbook.
Abbreviations

For a glossary of terms, describing the terminology in use at the University of Sydney, please see the glossary section.

Listed below are the more commonly used acronyms that appear in University documents and publications.

This glossary describes terminology in use at the University of Sydney.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

A

Academic Board
The senior academic body within the University. In conjunction with faculties, the Academic Board has responsibility for approving, or recommending to Senate for approval, new or amended courses and units of study and policy relating to the admission and candidature of students. (For further information, see the University Calendar.)

Academic cycle
The program of teaching sessions offered over a year. Currently the cycle runs from the enrolment period for Semester One through to the completion of the processing of results at the end of Semester Two. (See also Stage.)

Academic dishonesty
Academic dishonesty occurs when a student presents another person's ideas, findings or written work as his or her own by copying or reproducing them without due acknowledgement of the source and with intent to deceive the examiner. Academic dishonesty also covers recycling, fabrication of data, engaging another person to complete an assessment or cheating in exams. (See also Plagiarism.)

Academic record
The complete academic history of a student at the University. It includes, among other things; personal details; all units of study and courses taken; assessment results (marks and grades); awards and prizes obtained; infringements of progression rules; approvals for variation in course requirements and course leave; thesis and supervision details.

Access to a student's academic record is restricted to authorised University staff and is not released to a third party without the written authorisation of the student. (See also Academic transcript.)

Academic transcript
A printed statement setting out a student's academic record at the University. There are two forms of academic transcript: external and internal. (See also External transcript, Internal transcript.)

Academic year
The current calendar year in which a student is enrolled. (See also Academic cycle, Stage.)

Admission
Governed by the University's admission policy, this is the process for identifying applicants eligible to receive an initial offer of enrolment in a course at the University. Admission to most courses is based on performance in the HSC, with applicants ranked on the basis of their UAI. Other criteria such as a portfolio, interview, audition, or results in standard tests may also be taken into account for certain courses.

Admission basis
The main criteria used by a faculty in assessing an application for admission to a course. The criteria used include, among other things, previous secondary, TAFE or tertiary studies; work experience; special admission; and the Universities Admission Index (UAI).

Admission (Deferred)
An applicant who receives an offer of admission to a course may apply to defer enrolment in that course for one semester or one academic cycle.

Admission mode
A classification based on how a student was admitted to a course, for example 'UAC' or 'direct'.

Admission period
The period during which applications for admission to courses are considered.

Admission year
The year the student expects to begin the course (see also Commencement date.)

Advanced diplomas
(See Award course.)

Advanced standing
(See Credit.)

Advisor
A member of academic staff appointed in an advisory role for some postgraduate coursework students. (See also Associate supervisor, Instrumental supervisor/teacher, Research supervisor, Supervision.)

Aegrotat
In exceptional circumstances involving serious illness or death of a student prior to completion of their course, the award of aegrotat and posthumous degrees and diplomas may be conferred.

Alumni sidneiensis
A searchable database of graduates of the University from 1857 to 30 years prior to the current year.

Annual average mark (AAM)
The average mark over all units of study attempted in a given academic year (equivalent to the calendar year).

The formula for this calculation is:

\[ AAM = \frac{\sum (marks \times credit\ point\ value)}{\sum (credit\ point\ value)} \]

(sums over all units of study completed in the selected period)

Where the mark is the actual mark obtained by the student for the unit of study, or in the case of a failing grade with no mark – 0. Pass/fail assessed subjects and credit transfer subjects (from another institution) are excluded from these calculations; however, the marks from all attempts at a unit of study are included.

Annual progress report
A form which is used to monitor a research student's progress each year. The form provides for comments by the student, the supervisor, the head of the department and the dean (or their nominee). The completed form is attached to the student's official file.

Appeals
Students may lodge an appeal against academic or disciplinary decisions. An academic appeal (e.g. against exclusion) is managed by the Student Centre – Exclusions Office while it is under consideration and a record of the outcome of the appeal will be retained.
Assessment
The process of measuring the performance of students in units of study and courses. Performance may be assessed by examinations, essays, laboratory projects, assignments, theses, treatises or dissertations. (See also Result processing, Result processing schedule.)

Formative assessment
Formative assessment is used principally to provide students with feedback on their progress in learning. It reinforces successful learning, and is an opportunity for students to expose the limitations in their knowledge and understanding.

Summative assessment
Summative assessment is used to certify competence, or to arrange students in a rank order of merit. It certifies the attainment of a standard, and is used as the basis for progression to the next part of a program, or to graduation.

Associate supervisor
A person who is appointed in addition to the supervisor of a research student, who can provide the day-to-day contact with the candidate or provide particular expertise or additional experience in supervision. (See also Advisor, Instrumental supervisor/teacher, Research supervisor, Supervision.)

Assumed knowledge
For some units of study, a student is assumed to have passed a relevant subject at the HSC and this is called assumed knowledge. While students are generally advised against taking a unit of study for which they do not have the assumed knowledge, they are not prevented from enrolling in the unit of study. (See also Prerequisite.)

Attendance pattern
Attendance pattern is classified as full-time, part-time or external, this is dependant on the student's mode of attendance and the student load.

Attendance mode
A Department of Education, Science and Technology (DEST) classification defining the manner in which a student is undertaking a course, i.e. internal, external, mixed or offshore.

Australian Qualifications Framework (AQF)
The framework for recognition and endorsement of qualifications established by the Ministerial Council on Education, Employment, Training and Youth Affairs (MCEETYA).

AUSTUDY
Austudy provides financial help to students who are aged 25 years or more who meet the required criteria, and are undertaking an approved full-time course at an approved institution. (See also Youth Allowance.)

Automated Results Transfer System (ARTS)
This system was developed by the Australasian Conference of Tertiary Admissions Centres (ACTAC) to allow the electronic academic record of a student to be accessed, via an admission centre, by tertiary institutions.

Award course
(See Course.)

Board of Studies
An academic body which supervises a course or courses, and which is similar to a faculty except that it is headed by a chair rather than a dean and does not supervise PhD candidates.

Bursaries
Financial award made to a student, based primarily on need. (See also Scholarships.)

C
Calendar
The annual University publication which provides general and historical information about the University of Sydney, the statutes and regulations under which it operates and the Senate resolutions relating to constitutions and courses in each faculty.

Cadigal program
A program, named in recognition of the Aboriginal people of the land on which the University is located, designed to increase the successful participation of Aboriginal and Torres Strait Islander people in degree courses in all faculties at the University of Sydney.

Campus
The grounds on which the University is situated. There are 10 campuses of the University of Sydney:

- Burren Street (Institute of Transport Studies)
- Camperdown
- Darlington
- Camden (Agriculture and Veterinary Science)
- Conservatorium (Sydney Conservatorium of Music)
- Cumberland (Health Sciences)
- Mallett Street (Nursing)
- Rozelle (Sydney College of the Arts)
- St James (Law)
- Surry Hills (Dentistry)

Cancellation
Where enrolment is cancelled for non-payment of fees.

Candidature
Candidature commences when a student is admitted to a course of study leading to the award of a degree, diploma or certificate. There are maximum periods and in some cases minimum periods of candidature depending on the award course and whether the candidate is a full-time or part-time student.

Census date
The date at which a student's enrolment, load and HECS liability are finalised before this information is reported to DEST. (See also Commonwealth-supported Student, HECS-HELP)

Ceremony
(See Graduation ceremony.)

Chancellor
The non-executive head of the University. An honorary position, the Chancellor presides over meetings of the University's governing body, the Senate, and important ceremonial occasions such as graduations.

Clinical experience
Students undertake clinical placements in a professional environment as part of their course requirements. Many require University approved supervision. In order to undertake clinical placements a student may be required to fulfil additional requirements.

College of Health Sciences
Consists of the Faculties of Dentistry; Health Sciences; Medicine; Nursing; and Pharmacy.

College of Humanities and Social Sciences (CHASS)
Consists of the Faculties of Arts; Economics and Business; Education; Law; the Sydney College of the Arts; and the Sydney Conservatorium of Music.
Convocation
A combined degree is a single program with a single set of course resolutions leading to the award of two degrees (unless otherwise specified in the resolutions). (See also Combined course.)

Commencement date
The date a student commences candidature.

Commonwealth-supported student
Most of the students who study at the University of Sydney are Commonwealth supported. These students have most of the cost of their education paid by the government but must also contribute towards this cost themselves (their student contribution).

Compulsory subscriptions
Each enrolled student is liable to pay annual (or semester) subscriptions, as determined by the Senate, to the student organisations at the University. There are different organisations for undergraduate and postgraduate students.

The student organisations are specific to different campuses. The organisations at campuses other than Camperdown and Darlington include: the Conservatorium Student Association, the Cumberland Student Guild, the Orange Agricultural College Student Association and the Student Association of Sydney College of the Arts. (See also Compulsory subscription exemption, Joining fee, Life membership.)

Compulsory subscription exemption
Students of a certain age or those with disabilities or medical conditions may be exempt from the subscription to the sports body. Conscientious objectors to the payment of subscriptions to unions of any kind may apply to the Registrar for exemption. The Registrar may permit such a student to make the payment to the Jean Foley Bursary Fund instead. (See also Compulsory subscriptions.)

Confirmation of Enrolment form (COE)
This form is issued to each student after enrolment, showing the course and the units of study in which the student is enrolled, together with the credit point value of the units of study and the HECS weights. Until all fees are paid, it is issued provisionally. A new confirmation of enrolment form is produced every time a student's enrolment is varied.

Conjoint ventures
Two or more institutions cooperate to provide a unit or course of study to postgraduate coursework students. Arrangements exist between individual departments at the University of Sydney and individual departments at the University of New South Wales (UNSW) and the University of Technology Sydney (UTS), whereby students enrolled for a degree at one institution complete one or more units of study at the other institution to count towards the award program at their 'home' institution.

Continuing professional education
A process which provides a number of programs of continuing education courses for professionals as they move through their career. These programs are presently administered by the Centre for Continuing Education and a number of departments and foundations across the University. This process supports the whole of life learning concept and involves the maintenance of a long term relationship between the student and the University.

Convocation
The body comprising all graduates of the University.

Core unit of study
A unit of study that is compulsory for a particular course or subject area. (See also Unit of study.)

Corequisite
A unit of study which must be taken in the same semester or year as a given unit of study (unless it has already been completed). These are determined by the faculty or board of studies concerned, published in the faculty handbook and shown in FlexSIS. (See also Prerequisite, Waiver.)

Cotutelle Scheme
Agreement between the University and any overseas university for joint supervision and examination of a PhD student as part of an ongoing cooperative research collaboration. If successful, the student receives a doctorate from both universities with each testamur acknowledging the circumstances under which the award was made.

Course
An undertaking of study at the University of Sydney.

Award course
A formal course of study that will see attainment of a recognised award. Award courses are approved by Senate, on the recommendation of the Academic Board. The University broadly classifies courses as undergraduate, postgraduate coursework or postgraduate research. (See also Bachelor's degree, Course rules, Diploma, Doctorate, Major, Master's degree, Minor, PhD, Stream.)

Non-award course
Studies undertaken by students who are not seeking an award from the University. (See also Cross-institutional enrolment.)

Coursework
An award course not designated as a research award course. While the program of study in a coursework award course may include a component of original, supervised, other forms of instruction and learning normally will be dominant.

Research
A course in which at least 66 per cent of the overall course requirements involve students in undertaking supervised research, leading to the production of a thesis or other piece of written or creative work, over a prescribed period of time.

Course alias
A unique five character alpha-numeric code which identifies a University course.

Course code
(See Course alias.)

Course enrolment status
A student's enrolment status in a course is either 'enrolled' or 'not enrolled'. 'Not enrolled' reasons include: cancelled; suspended; under examination; or terminated. (See also Cancellation, Candidature, Course leave, Enrolment, Enrolment variation, Terminated, Under examination.)

Course leave
Students are permitted to apply for a period away from their course without losing their place. Course leave is formally approved by the supervising faculty for a minimum of one semester. Students on leave are regarded as having an active candidature, but they are not entitled to a student card. At undergraduate level, leave is not counted towards the total length of the course. Students who are absent from study without approved leave may be discontinued and may be required to formally reapply for admission. (See also Progression.)

Course rules
Rules which govern the allowable enrolment of a student in a course. Course rules may be expressed in terms of types of units of study taken, length of study, and credit points accumulated, e.g. a candidate...
may not enrol in units of study having a total value of more than 32 credit points per semester. Course rules also govern the requirements for the award of the course, e.g. a candidate must have completed a minimum of 144 credit points. (See also Award course, Corequisite, Prerequisite.)

Course suspension
(See Course leave.)

Course transfer
A transfer occurs when a student changes from one course in the University to another course in the University without the requirement for an application and selection process (e.g. from a PhD to a master's program in the same faculty).

Credit
The recognition of previous studies successfully completed at this University, or another university or tertiary institution recognised by the University of Sydney, as contributing to the requirements of the course to which the applicant requesting such recognition has been admitted. Credit may be granted as specified credit or non-specified credit.

Specified credit
The recognition of previously completed studies as directly equivalent to units of study.

Non-specified credit
A 'block credit' for a specified number of credit points at a particular level. These credit points may be in a particular subject area but are not linked to a specific unit of study. (See also AAM – Annual average mark, Waiver, Weighted average mark (WAM).)

Credit points
The value of the contribution each unit of study provides towards meeting course completion requirements. Each unit of study will have a credit point value assigned to it. The total number of credit points required for completion of award courses will be specified in the Senate Resolutions relevant to the award course.

Cross-institutional enrolment
An enrolment in units of study at one university to count towards an award course at another university. Cross-institutional enrolments incur a student-contribution liability (see Commonwealth-supported student) or tuition fee charge at the institution at which the unit of study is being undertaken. (See also Non-award course).

D
Data Audit Committee (DAC)
The Data Audit Committee's role is to oversee the integrity and accuracy of the course and unit of study data as strategic University data. It also advises the Academic Board on suggested policy changes related to course and unit of study data. A subcommittee of the VCAC Enrolment Working Party, it is chaired by the Registrar, with membership including the deans, the Student Centre, FlexSIS and the Planning Support Office.

Deadlines (Enrolment variations)
(See Enrolment variation.)

Deadlines (Fees)
The University has deadlines for the payment of fees (e.g. HECS, compulsory subscriptions, course fees). Students who do not pay fees by these deadlines may have their enrolment cancelled or they may have a barrier placed on the release of their record. (See also Barrier, Cancellation.)

Dean
The head of a faculty, or the principal or director of a college (such as the Sydney Conservatorium of Music or the Sydney College of Arts).

Dean's certificate
A statement from the Dean certifying that all requirements, including fieldwork and practical work, have been met and that the student is eligible to graduate. Not all faculties use Dean's Certificates. In faculties that do, qualified students have 'Dean's Certificate' noted on their academic record.

Defe rent (Deferral)
(See Admission (deferment), Course leave.)

Degree
(See also Award course, Bachelor's degree.)

Delivery mode
Indicates how students receive the instruction for a unit of study. The delivery mode must be recorded for each unit as distinct from the attendance mode of the student, i.e. an internal student may take one or more units by distance mode and an external student may attend campus for one or more units.

Distance education
Where subject matter is delivered in a more flexible manner, such as correspondence notes, and student may only attend campus if required. (See also Extended semester, Distance education, International – off shore.)

Intensive on campus
Attendance of scheduled lectures, tutorials etc at a campus of the University.

Department
(See School.)

Department of Education, Science and Training (DEST)
The Commonwealth Government department responsible for higher education.

Differential HECS
(See Higher Education Contribution Scheme (HECS).)

Diploma
The award granted following successful completion of diploma course requirements. A diploma course usually requires less study than a degree course. (See also Award course.)

Direct admissions
For some courses, applications may be made directly to the University. Applications are received by faculties or the International Office, and considered by the relevant department or faculty body. Decisions are recorded and letters are forwarded to applicants advising them of the outcome. (See also Admission, UAC.)

Disability information
Students may inform the University of any temporary or permanent disability which affects their life as a student. Disability information is recorded but it is only available to particular authorised users because of its sensitive nature.

Disciplinary action
Undertaken as the result of academic or other misconduct, e.g. plagiarism, cheating, security infringement, criminal activity.

Discipline
A defined area of study, for example, chemistry, physics, economics.

Discipline group
A DEST code used to classify units of study in terms of the subject matter being taught or being researched.
Discontinuation (course)
(See Enrolment variation.)

Discontinuation (unit of study)
(See Enrolment variation.)

Dissertation
A written exposition of a topic which may include original argument substantiated by reference to acknowledged authorities. It is a required unit of study for some postgraduate award courses in the faculties of Architecture and Law.

Distance education
Where a student does not attend campus on a daily basis for a given course or unit of study. (See also Delivery mode, Extended semester.)

Doctorate
A high-level postgraduate award. A doctorate course normally involves research and coursework; the candidate submits a thesis that is an original contribution to the field of study. Entry to a doctorate course often requires completion of a master's degree course. Note that the doctorate course is not available in all departments at the University. (See also Award course, PhD.)

Domestic Student
A student who is not an international student. (See also Local student.)

Double degree
A double degree is a program where students are permitted by participating faculties (and/or by specific resolutions within a single award) to transfer between courses in order to complete two awards.

Downgrade
Where a student enrolled in a PhD reverts to a master's by research, either on the recommendation of the University on the basis that the research they are undertaking is not at an appropriate level for a PhD; or at the student's own request, for personal or academic reasons.

Equivalent full-time student unit (EFTSU)
The equivalent full-time student unit (EFTSU) is a measure of student load based on the workload for a student undertaking a full year of study in a particular course. A student is then recorded as having generated one EFTSU. (See also Load, Stage.)

Equivalent full-time student load (EFTSL)
The equivalent full-time student load (EFTSL) for a year. It is a measure, in respect of a course of study, of the study load for a year of a student undertaking that course of study on a full-time basis (effective 1 January 2005).

Embedded courses
Award courses in the graduate certificate, graduate diploma and master's degree by coursework sequence which allow unit of study credit points to count in more than one of the awards, e.g. the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology and Master of Information Technology.

Enrolment
A student enrolls in a course by registering with the supervising faculty in the units of study to be taken in the coming year, semester or session.

Commencing
An enrolment is classified as commencing if a student has enrolled in a particular degree or diploma for the first time.

Continuing
Students already in a course at the University re-enrol each year or semester. Most continuing students are required to pre-enrol. (See also Pre-enrolment.)

Enrolment list
A list of all currently enrolled students in a particular unit of study. (See also Unit of study.)

Enrolment status
(See Course enrolment status.)

Enrolment Variation
Students may vary their enrolment at the beginning of each semester. Each faculty determines its deadlines for variations, but HECS liability depends on the HECS census date. (See also HECS.)

Examination
A set of questions or exercises evaluating on a given subject given by a department or faculty. (See Examination period, Assessment.)

Examiner (Coursework)
The person assessing either the written/oral examination, coursework assignments, presentations, etc of a student or group of students.

Exchange student
Either a student of the University of Sydney who is participating in a formally agreed program involving study at an overseas university or an overseas student who is studying here on the same basis. The International Office provides administrative support for some exchanges.

Exclusion
A faculty may ask a student whose academic progress is considered to be unsatisfactory to 'show good cause' why the student should be allowed to re-enrol. If the faculty deems the student's explanation unsatisfactory, or if the student does not provide an explanation, the student may be excluded either from a unit of study or from a course or faculty. An excluded student may apply to the faculty for permission to re-enrol. Normally, at least two years must have elapsed before such an application would be considered.

University policy relating to exclusion is set out in the University Calendar. (See also Progression, Senate appeals.)

Exemption
A decision made at a sub-unit of study level to allow a student to complete a unit of study without also completing all the prescribed components of coursework and/or assessment. (See also Credit, Waiver.)

Expulsion
The ultimate penalty of disciplinary action is to expel the student from the University. The effect of expulsion is:

- the student is not allowed to be admitted or to re-enrol in any course at the University;
- the student does not receive their results;
- the student is not allowed to graduate; and
- the student does not receive a transcript or testamur.

Extended semester
A distance-learning student may be allowed more time to complete a module or program if circumstances beyond the student's control, e.g. drought, flood or illness, affect the student's ability to complete the module or program in the specified time. (See also Distance education.)

External
(See Attendance mode, Distance education.)

External transcript
A certified statement of a student's academic record printed on official University security paper. It includes the student's name, any credit granted, all courses the student was enrolled in and the final course result and all units of study attempted within each course together with the result. It also acknowledges prizes the student has received.
Marks can be included or omitted, as required. (See also Academic transcript, Internal transcript.)

F

Faculty
A formal part of the University’s academic governance structure, consisting mainly of academic staff members and headed by a dean, which is responsible for all matters concerning the award courses that it supervises. Usually, a faculty office administers the faculty and student or staff inquiries related to its courses. The University Calendar sets out the constitution of each of the University’s faculties. (See also Board of Studies, Supervising faculty.)

Faculty handbook
The annual University publication for each faculty which provided detailed information about the faculty and its courses.

FEE-HELP Loan
Fee-paying students who are Australian citizens or holders of a Permanent Humanitarian Visa can gain assistance in paying their fees through the Commonwealth Government’s FEE-HELP program. There is a $50,000 limit to the amount students can borrow and a 20 per cent loan fee on the amounts borrowed through FEE-HELP.

Fee-paying students
Students who pay tuition fees to the University and are not liable for HECS.

Fellows of Senate
Members of the governing body of the University.

Flexible learning
(See Delivery mode, Distance education.)

Flexible start date
Full fee-paying distance students are not restricted to the same enrolment time frames as campus-based or HECS students.

Flexible Student Information System (FlexSIS)
The computer-based Flexible Student Information System at the University of Sydney. FlexSIS holds details of courses and units of study being offered by the University and the complete academic records of all students enrolled at the University.

Formative assessment
(See Assessment.)

Full-time student
(See also Attendance pattern, EFTSU.)

G

Grade
The outcome for a unit of study linked with a mark range. For example, a mark in the range 85–100 attracts the grade ‘high distinction’ (‘HD’). (See also Mark.)

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>HD</td>
<td>High distinction</td>
<td>A mark of 85–100.</td>
</tr>
<tr>
<td>D</td>
<td>Distinction</td>
<td>A mark of 75–84.</td>
</tr>
<tr>
<td>CR</td>
<td>Credit</td>
<td>A mark of 65–74.</td>
</tr>
<tr>
<td>P</td>
<td>Pass</td>
<td>A mark of 50–64.</td>
</tr>
<tr>
<td>R</td>
<td>Satisfied requirements</td>
<td>This is used in pass/fail only outcomes.</td>
</tr>
<tr>
<td>UCN</td>
<td>Unit of study continuing</td>
<td>Used at the end of semester for units of study that have been approved to extend into a following semester. This will automatically flag that no final result is required until the end of the last semester of the unit of study.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCON</td>
<td>Pass (concessional)</td>
<td>A mark of 46–49. Use of this grade is restricted to those courses that allow for a concessional pass of some kind to be awarded. A student may re-enrol in a unit of study for which the result was PCON. Each faculty will determine and state in its course regulations what proportion, if any, may count – e.g. “no more than one sixth of the total credit points for a course can be made up from PCON results”.</td>
</tr>
<tr>
<td>F</td>
<td>Fail</td>
<td>A mark of 0–49. This grade may be used for students with marks of 46–49 in those faculties which do not use PCON.</td>
</tr>
<tr>
<td>AF</td>
<td>Absent fail</td>
<td>Includes non-submission of compulsory work (or non-attendance at compulsory labs, etc) as well as failure to attend an examination.</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawn</td>
<td>Not recorded on an external transcript. This is the result that obtains where a student applies to discontinue a unit of study by the HECS census date (i.e. within the first four weeks of enrolment).</td>
</tr>
<tr>
<td>DNF</td>
<td>Discontinued not to count as failure</td>
<td>Recorded on external transcript. This result applies automatically where a student discontinues after the HECS census date but before the end of the seventh week of the semester (or before half of the unit of study has run, in the case of units of study which are not semester-length). A faculty may determine that the result of DNF is warranted after this date if the student has made out a special case based on illness or misadventure.</td>
</tr>
<tr>
<td>INC</td>
<td>Incomplete</td>
<td>This result is used when examiners have grounds (such as illness or misadventure) for seeking further information or for considering additional work from the student before confirming the final result. Except in special cases approved by the Academic Board, this result will be converted to a normal permanent passing or failing grade either: by the dean at the review of examination results conducted pursuant to section 2(4) of the Academic Board policy ‘Examinations and Assessment Procedures’; or automatically to an AF grade by the third week of the immediately subsequent academic session. Deans are authorised to approve the extension of a MINC grade for individual students having a valid reason for their incomplete status.</td>
</tr>
<tr>
<td>UCN</td>
<td>Incomplete</td>
<td>A MINC or INC grade is converted, on the advice of the dean, to UCN when all or many students in a unit of study have not completed the requirements of the unit. The students may be engaged in practicum or clinical placements, or in programs extending beyond the end of semester (e.g. honours).</td>
</tr>
</tbody>
</table>

Graduand
A student who has completed all the requirements for an award course but has not yet graduated. (See also Graduation, Potential graduand.)

Graduate
A person who holds an award from a recognised tertiary institution. (See also Graduand, Graduation.)

Graduate Certificate
(See Award course.)

Graduate Diploma
(See Award course.)

Graduate entry degree
A bachelor’s, or undergraduate degree, that requires another undergraduate degree as a prerequisite of entry. Examples of graduate entry degrees at the University of Sydney include: the Medical Program; Graduate Law and the Bachelor of Dentistry.

Graduation
The formal conferring of awards either at a ceremony or in absentia. (See also In absentia, Potential graduand.)

Graduation ceremony
A ceremony where the Chancellor confers awards upon graduands.
Group work
Means a formally established project to be conducted by a number of students in common, resulting in a single piece of assessment or a number of associated pieces of assessment. (See also Legitimate cooperation.)

Grand Weighted Average Mark (GWAM)
Is the WAM calculated over all units of study undertaken in a degree course (except those "Discontinued – Not to count as failure" and those with only a “Satisfied Requirements” result), weighted according to credit point value and the year-levels (1, 2, 3 or 4) of the units of study. The GWAM may be expressed as:

\[ GWAM = \frac{\sum (Mark \times Credit\ Points \times Year)}{\sum (Credit\ Points \times Year)} \]

H
Handbook
(See Faculty handbook.)

Head of department (HOD)
The head of the academic unit which has responsibility for the relevant unit of study, or equivalent program leader.

Higher doctorates
(See Award course.)

HECS (Higher Education Contribution Scheme)
Higher Education Contribution Scheme (HECS)
The Higher Education Contribution Scheme (HECS) was the previous Commonwealth Government student loan scheme. It ceased to operate on 1 January, 2005 and was replaced by HECS-HELP (see below).

HECS-HELP Loan
Commonwealth supported students who are Australian citizens or holders of a Permanent Humanitarian Visa can choose to pay their contributions upfront or to obtain a HECS-HELP loan from the Commonwealth. A HECS-HELP loan is repaid through the tax system once the student is working and their income reaches a threshold (currently around $35,000). Students who choose to pay their student contribution upfront receive a 20 per cent discount. The student’s contribution is calculated twice a year (before each semester).

Honorary degrees
A degree honoris causa (translated from the Latin as ‘for the purpose of honouring’) is conferred on a person whom the University wishes to honour. Long-standing full-time members of the University’s academic staff who are not graduates of the University may be considered by Senate, upon their retirement, for admission ad eundem gradum, to an appropriate degree of the University.

Honours
Some degrees may be completed ‘with Honours’. This may involve either the completion of a separate honours year or additional work in the later years of the course or meritorious achievement over all years of the course. Honours are awarded in a class (Class I, Class II – which may have two divisions or, Class III).

NSW Higher School Certificate (HSC)
The NSW Higher School Certificate (HSC), which is normally completed at the end of year 12 of secondary school. The UAI (Universities Admission Index) is a rank out of 100 that is computed from a student’s performance in the HSC.

In absentia
Latin for ‘in the absence of’. Awards are conferred in absentia when graduands do not, or cannot, attend the graduation ceremony scheduled for them. Those who have graduated in absentia may later request that they be presented to the Chancellor at a graduation ceremony. (See also Graduation.)

Instrumental supervisor/teacher
All students at the Sydney Conservatorium of Music and BMus students on the Camperdown Campus have an instrumental teacher appointed. (See also Advisor, Associate supervisor, Research supervisor, Supervision.)

Internal mode
(See Attendance mode.)

Internal transcript
A record of a student’s academic record for the University’s own internal use. It includes the student’s name, student identifier (SID), address, all courses in which the student was enrolled and the final course result, and all units of study attempted within each course together with the unit of study result. (See also Academic transcript, External transcript.)

International student
Any student who is not an Australian or New Zealand citizen or a permanent resident of Australia is an international student. An international student is required to hold a visa that allows study in Australia and may be liable for international tuition fees.

Fee-paying
A private International Student who is liable to pay tuition fees for their studies with the University.

Fee-paying – Outgoing exchange
An international fee-paying student undertaking short term study at a recognised overseas institution with which the University has a student exchange agreement. Exchange study counts towards the student's University of Sydney award and students remain enrolled in their University of Sydney course during the period of exchange.

International – cross-institutional
An international fee paying student undertaking non-award study at the University on a cross-institutional basis. They are liable to pay fees for the study they undertake at the University, but there is no compliance reporting requirement, which rests with their ‘home’ institution.

International – Sponsored
A private international student who is fully sponsored for his/her tuition; his/her sponsorship may also cover Overseas Health Cover and Compulsory Subscriptions.

Offshore studies
International offshore students undertake their program of study at one of the University’s offshore campuses and hence do not enter Australia; therefore they do not require a visa. They are distinct from international students who are on outbound exchange programs as they never enter Australia during their program of study.

Short course
An international fee-paying student undertaking a short course with the University of Sydney comprising such programs as international development programs, executive training or study visits. The study undertaken by these students is non-award and generally a student visa is not required.

Sponsored award
An international student sponsored by the Australian government, undertaking a program of study at the University. Currently Australian Development Scholarships holders, funded by AusAID, are the only students in this category. These students are fully sponsored for their tuition and other costs such as travel and health cover, and are paid a stipend.

Study Abroad
An international student who is undertaking short-term study at the
University under the Study Abroad scheme. Study Abroad students must have completed at least one year of study towards a degree at a recognised institution in their home country and are continuing towards the degree of their home institution. (See also Local student, Student type.)

J

Joining fee
Students enrolling for the first time pay a joining fee in addition to the standard subscription for the University of Sydney Union or equivalent student organisation. (See also Compulsory subscription.)

L

Learning Entitlement
Each student has a seven year full-time period during which they can remain Commonwealth supported. This seven year period is called their ‘learning entitlement’.

Leave
See Course leave.

Legitimate cooperation
Any constructive educational and intellectual practice that aims to facilitate optimal learning outcomes through interaction between students. (See also Group work.)

Life membership
Under some circumstances (e.g. after five full-time years of enrolments and contributions) students may be granted life membership of various organisations. This means they are exempt from paying yearly fees. (See also Compulsory subscriptions.)

Load
The sum of the weights of all the units of study in which a student is enrolled. The weight is determined by the proportion of a full year’s work represented by the unit of study in the degree or diploma for which the student is a candidate. Student load is measured in terms of Equivalent full-time student units (EFTSU). (See also Equivalent full-time student units (EFTSU).)

Local Student
Either an Australian or New Zealand citizen or Australian permanent resident. New Zealand citizens are required to pay their Higher Education Contribution Scheme (HECS) fees upfront. (See also Commonwealth-supported student, Domestic student, International student.)

M

Major
A field of study, chosen by a student, to represent their principal interest. This would consist of specified units of study from later stages of the award course. Students select and transfer between majors by virtue of their selection of units of study. One or more majors may be awarded upon the graduand’s assessment of study. (See also Award course, Minor, Stream.)

Major timetable clash
The term used when a student attempts to enrol in units of study which have so much overlap in the teaching times that it has been decided that students must not enrol in the units simultaneously.

Mark
An integer (rounded if necessary) from 0 to 100 indicating a student’s performance in a unit of study. (See also Grade.)

Master’s degree
A postgraduate award. Master’s degree courses may be offered by coursework, research only or a combination of coursework and research. Entry to the course often requires completion of an honours year at an undergraduate level. (See also Award course.)

Method of candidature
A course is either a research course or a coursework course and so the methods of candidature are ‘research’ and ‘coursework’. (See also Course – Coursework, Course – Research.)

Minor
Studies undertaken to support a Major. Requiring a smaller number of credit points than a major students select and transfer between minors (and majors) by virtue of their selection of units of study. One or more minors may be awarded upon the graduand’s assessment of study. (See also Award course, Major, Stream.)

Mixed mode
(See Attendance mode.)

MPhil
The Master of Philosophy (MPhil) is a master’s by research degree offered by some (but not all) of the University’s faculties. (See also Award course, Master’s degree.)

Mutually exclusive units of study
(See Prohibited combinations of units of study.)

MyUni
The University of Sydney’s student portal system. It provides students with access to information about the University and its courses, including access to email, library services, student support services, student self-administration and e-learning software such as Blackboard and WebCT.

N

Non-award course
(See Course.)

Non-standard session
A teaching session other than the standard February and August sessions – e.g. Summer School, in which units of study are delivered and assessed in an intensive mode during January. (See also Semester, Session.)

Orientation Week
Orientation or ‘O Week’, takes place in the week before lectures begin in Semester One. During O Week, students can join various clubs, societies and organisations, register for courses with departments and take part in activities provided by the University of Sydney Union.

P

Part-time student
(See Attendance mode, Attendance pattern, Equivalent full-time student units (EFTSU).)

Permanent home address
The address used for all official University correspondence with a student, both inside and outside of semester time (e.g. during semester breaks), unless the student provides a different overridden by semester address for use during the semester. (See also Semester address.)

PhD
The Doctor of Philosophy (PhD) and other doctorate awards are the highest awards available at the University. A PhD course is normally purely research-based; the candidate submits a thesis that is an original contribution to the field of study. (See also Award course, Doctorate.)
**Glossary**

**Plagiarism**
Presenting another person’s ideas, findings or work as one’s own by copying or reproducing them without the acknowledgement of the source. (See also Academic dishonesty.)

**Postgraduate**
A term used to describe a course leading to an award such as graduate diploma, a master’s degree or PhD which usually requires prior completion of a relevant undergraduate degree (or diploma) course. A ‘postgraduate’ is a student enrolled in such a course. (See also Course – Coursework, Course – Research.)

**Postgraduate Education Loans Scheme (PELS)**
An interest-free loans facility for eligible students who are enrolled in fee-paying, postgraduate non-research courses. It is similar to the deferred payment arrangements available under the Higher Education Contribution Scheme (HECS). This scheme was replaced by the FEE-HELP scheme on 1 January 2005. (See FEE-HELP Loan.)

**Potential graduan**
A student who has been identified as being eligible to graduate on the satisfactory completion of their current studies. (See also Graduan, Graduation.)

**Pre-enrolment**
Pre-enrolment – also known as provisional re-enrolment – takes place in October, when students indicate their choice of unit of study enrolment for the following year. After results are approved, pre-enrolment students are regarded as enrolled in those units of study for which they are qualified. Their status is ‘enrolled’ and remains so provided they pay any money owing and comply with other requirements by the due date. Students who do not successfully pre-enrol in their units of study for the next regular session are required to attend the University on set dates during the January/February enrolment period. (See also Enrolment.)

**Prerequisite**
A unit of study that is required to be successfully completed before another unit of study can be attempted. Prerequisites can be mandatory (compulsory) or advisory. (See also Assumed knowledge, Corequisite, Waiver.)

**Prizes**
Awarded in recognition of outstanding performance, academic achievement or service to the community or University.

**Probationary candidature**
A student who is enrolled in a postgraduate course on probation for a period of time up to one year. The head of department is required to consider the candidate’s progress during the period of probation and make a recommendation for normal candidature or otherwise to the faculty.

**Professional practice**
Students undertake placement in a professional practice as a part of their course requirements. May require University approved supervision. Professional placements are located in a wide range of professional practices environments, and may not require additional criteria to be fulfilled.

**Progression**
Satisfactory progression is satisfying all course and faculty rules (normally assessed on an annual basis) to enable the completion of the chosen award within the (maximum) completion time allowed. (See also Exclusion.)

**Prohibited combinations of units of study**
When two or more units of study contain a sufficient overlap of content, enrolment in any one such unit prohibits enrolment in any other identified unit. (See also unit of study.)

**Provisional re-enrolment**
(See Pre-enrolment.)

**Q**
**Qualification**
An academic attainment recognised by the University.

**Qualifier**
A mandatory (compulsory) prerequisite unit of study which must have a grade of pass or better. (See also Assumed knowledge, Corequisite, Prerequisite, Waiver.)

**R**
**Recycling**
The submission for assessment of one’s own work, or of work which substantially the same, which has previously been counted towards the satisfactory completion of another unit of study, and credited towards a university degree, and where the examiner has not been informed that the student has already received credit for that work.

**Registration**
In addition to enrolling with the faculty in units of study, students must register with the department responsible for teaching each unit. This is normally done during Orientation Week. Note that unlike enrolment, registration is not a formal record of units attempted by the student.

**Research course**
(See Course – Research.)

**Research supervisor**
A supervisor is appointed to each student undertaking a research postgraduate degree. The supervisor will be a full-time member of the academic staff or a person external to the University recognised for their association with the clinical teaching or the research work of the University. A research supervisor is commonly referred to as a supervisor. (See also Advisor, Associate supervisor, Instrumental supervisor/teacher, Supervision.)

**Result processing**
Refers to the processing of assessment results for units of study. For each unit of study, departments tabulate results for all assessment activities and assign preliminary results. (See also Assessment, Formative assessment, Examination period, Summative assessment.)

**Result processing schedule**
The result processing schedule will be determined for each academic cycle. All departments and faculties are expected to comply with this schedule. (See also Assessment, Examination period, Result processing.)

**Result**
The official statement of a student’s performance in each unit of study attempted as recorded on the academic transcript, usually expressed as a mark and grade. (See also Grade, Mark.)

**Research Training Scheme (RTS)**
The RTS provides Commonwealth-funded higher degree by research (HDR) students with an ‘entitlement’ to a HECS exemption for the duration of an accredited HDR course, up to a maximum period of four years full-time equivalent study for a doctorate by research and two years full-time equivalent study for a master’s by research.

**S**
**Scholarships**
Financial or other form of support made available to enable students to further their studies. (See also Bursaries.)
Glossary

School
A school or academic unit shall encourage and facilitate teaching, scholarship and research and coordinate the teaching and examining duties of members of staff in the subjects or courses of study with which it is concerned.

Semester
A half-yearly teaching session whose dates are determined by the Academic Board. Normally all undergraduate sessions will conform to the semesters approved by the Academic Board. Any offering of an undergraduate unit not conforming to the semester dates (non-standard session) must be given special permission by the Academic Board. (See also Session, Non-standard session.)

Semester address
The address to which all official University correspondence is sent during semester time, if it is different to the permanent address.

Senate
The governing body of the University. (See the University Calendar for more details of its charter and powers.)

Senate appeals
Senate appeals are held for those students who, after being excluded by a faculty from a course, appeal to the Senate for readmission. While any student may appeal to the Senate against an academic decision, such an appeal will normally be heard only after the student has exhausted all other avenues, i.e. the department, faculty, board of study and, in the case of postgraduates, the Committee for Graduate Studies. (See also Semester, Non-standard teaching period.)

Session
Any period of time during which a unit of study is taught. A session differs from a semester in that it need not be a six-month teaching period, but it cannot be longer than six months. Each session maps to either Semester One or Two for DEST reporting purposes. Session offerings are approved by the relevant dean, taking into account all the necessary resources, including teaching space and staffing. The Academic Board must approve variation to the normal session pattern. (See also Semester, Non-standard teaching period.)

Session address
(See Semester address.)

Short course
A fee paying student undertaking a short course with the University of Sydney comprising professional development, executive training etc. The study undertaken by these students is a non-award course.

Show cause
(See Progression, Exclusion.)

Special consideration
Candidates who suffer serious illness or misadventure which may affect performance in any assessment, may request that they be given special consideration in relation to the determination of their results.

Sponsorship
Financial support of a student by a company or government body.

Stage
A normal full-time course of study taken in a year. (See also Course rules, EFTSU, Progression.)

Stream
A defined award course, which requires the completion of set units of study as specified by the course rules for the particular stream, in addition to the core program specified by the course rules. A stream will appear with the award course name on testamurs, e.g. Bachelor of Engineering in Civil Engineering (Construction Management). (See also Award course, Major, Minor.)

Student
Student means a person enrolled as a candidate for an award course or unit of study.

Student identifier (SID)
A nine-digit number which uniquely identifies a student at the University.

Student ID Card
All students who enrol are issued with an identification card. The card includes the student's name, SID, the course code, a library borrower's bar code and a passport-style photo. The card identifies the student as eligible to attend classes and must be displayed at formal examinations. It must be presented to secure student concessions and to borrow books from all sections of the University Library.

Student progress rate (SPR)
A calculation which measures the rate at which load undertaken is passed annually in each award program.

Student type
Student type identifies whether a student is local or international and the type of study the student is undertaking. (See also International student, Domestic student, Exchange student.)

Study Abroad program
A scheme administered by the International Office which allows international students who are not part of an exchange program to take units of study at the University of Sydney, but not towards an award program. In most cases the units of study taken here are credited towards an award at their home institution. (See also Exchange student.)

Subject area
A unit of study may be associated with one or more subject areas. The subject area can be used to define prerequisite and course rules, e.g. the unit of study 'History of Momoyama and Edo Art' may count towards the requirements for the subject areas 'Art History and Theory' and 'Asian Studies'.

Summative assessment
See Assessment.

Summer School
(See Sydney Summer School.)

Supervising faculty
The faculty which has the responsibility for managing the academic administration of a particular course, i.e. the interpretation and administration of course rules, approving students' enrolments and variations to enrolments. Normally the supervising faculty is the faculty offering the course. However, in the case of combined courses, one of the two faculties involved will usually be designated the supervising faculty. Further, in the case where one course is jointly offered by two or more faculties (e.g. the Liberal Studies course), a joint committee may make academic decisions about candidature and the student may be assigned a supervising faculty for administration.

Supervision
Refers to a one-to-one relationship between a student and a nominated member of the academic staff or a person specifically appointed to the role. (See also Advisor, Associate supervisor, Instrumental supervisor/teacher, Research supervisor.)

Suppression of results
Results for a particular student can be suppressed by the University when the student has an outstanding debt to the University; or the student is facing disciplinary action. A student may also request a suppression for personal reasons.

Suspension
(See Course leave.)

Sydney Summer School
A program of accelerated, intensive study running for approximately six weeks during January and February each year. Both undergraduate and postgraduate units are offered. Summer School provides an opportunity for students at Sydney and other universities to catch up
on needed units of study, to accelerate completion of a course or to undertake a unit that is outside their award course. All units attract full fees and enrolled students are also liable for compulsory subscriptions. Some fee-waiver scholarships are available.

**Semester Weighted Average Mark (SWAM)**
Is the WAM calculated over all units of study undertaken in a semester (except those ‘Discontinued – Not to count as failure’ and those with only a ‘Satisfied Requirements’ result), weighted according to credit point value. The SWAM may be expressed as:

\[
SWAM = \sum \left( \frac{\text{Mark} \times \text{Credit points}}{\sum \text{Credit points}} \right)
\]

**T**

**Teaching department**
(See School.)

**Teaching end date**
Official finish date of formal timetabled classes.

**Teaching start date**
Official commencement date of formal timetabled classes.

**Terminated**
Term used when a student’s candidature has been officially closed because they are not able to complete the Course requirements. (See also Candidature.)

**Testamur**
A certificate of award provided to a graduand, usually at a graduation ceremony. The Award conferred will be displayed along with other appropriate detail.

**Thesis**
A major work that is the product of an extended period of supervised independent research. (See also Course – Research.)

**Timetable**
The schedule of lectures, tutorials, laboratories and other academic activities that a student must attend.

**Transcript**
(See Academic transcript.)

**Transfer**
(See Course transfer.)

**Tuition fees**
Tuition fees may be charged to students in designated tuition fee-paying courses. Students who pay fees are not liable for HECS.

**U**

**Universities Admissions Centre (UAC)**
The UAC receives and processes applications for admission to undergraduate courses at recognised universities in NSW and the ACT. Most commencing, local undergraduate students at the University apply through the UAC.

**Universities Admission Index (UAI)**
A measure of overall academic achievement in the HSC that assists universities in ranking applicants for university selection. The UAI is based on the aggregate of scaled marks in ten units of the HSC, and is a number between 0.00 and 100.00 with increments of 0.05.

**Under examination**
Indicates that a research student has submitted their written work (thesis) for assessment, and is awaiting the finalisation of the examiners’ outcome and recommendation.

**Undergraduate**
A term used to describe both a course leading to a diploma or bachelor’s degree and a student enrolled in such a course.

**Unit of study**
Unit of study or unit means a stand-alone component of an award course. Each unit of study is the responsibility of a department. (See also Prohibited combinations of unit of study.)

**Unit of study enrolment status**
The enrolment status indicates whether the student is still actively attending the unit of study (i.e. currently enrolled) or is no longer enrolled. (See also Discontinuation or Cancellation.)

**Unit of study level**
Units of study are divided into Junior, Intermediate, Senior, Honours, Year 5, and Year 6. Most majors consist of 32 Senior credit points in a subject area (either 3000 level units of study or a mix of 2000 and 3000 level units of study).

**University**
Unless otherwise indicated, University in this document refers to the University of Sydney.

**University Medal**
A faculty may recommend the award of a University Medal to a student qualified for the award of an undergraduate honours degree (or some master’s degrees), whose academic performance is judged to be outstanding.

**Upgrade**
Where a student enrolled in a master’s by research course is undertaking research at such a standard that either the University recommends that the student upgrade their degree to a PhD, or the student seeks to upgrade to a PhD and this is supported by the University.

**USYDnet**
The University of Sydney’s intranet system. It provides access to other services such as directories (maps, staff and student, organisations), a calendar of events (to which staff and students can submit entries), and a software download area.

**V**

**Variation of enrolment**
(See Enrolment variation.)

**Vice-Chancellor and Principal**
The chief executive officer of the University, responsible for its leadership and management. The Vice-Chancellor and Principal is head of both academic and administrative divisions.

**W**

**Waiver**
In a prescribed course, a faculty may waive the prerequisite or corequisite requirement for a unit of study or the course rules for a particular student. Unlike credit, waivers do not involve a reduction in the number of credit points required for a course. (See also Credit, Exemption.)

**Winter School**
An intensive session offered by the University during the mid-year break.

**Weighted average mark (WAM)**
This mark uses the unit of study credit point value in conjunction with an agreed ‘weight’. The formula for this calculation is:
Where $W_c$ is the weighted credit point value – ie, the product of the credit point value and the level of weighting of 1, 2, 3, or 4 for a first, second, third or fourth year unit of study respectively; and where $M_c$ is the greater of 45 or the mark out of 100 for the unit of study.

The mark is the actual mark obtained by the student for the unit of study, or in the case of a failing grade with no mark – 0. Pass/fail assessed subjects and credit transfer subjects (from another institution) are excluded from these calculations; however, the marks from all attempts at a unit of study are included. (Effective from 1 January 2004.)

In addition, faculties may adopt other average mark formulae for specific progression or entry requirements. If such a formula is not specified in the faculty resolutions, the formula outlined above is used. (See also WAM weight.)

**WAM weight**
A weight assigned to each unit of study to assist in the calculation of WAMs.

---

**Year of first enrolment (YFE)**
The year in which a student first enrols at the University. (See also Commencement date.)

**Youth Allowance**
Youth Allowance is payable to a full-time student or trainee aged 16–24 years of age who is enrolled at an approved institution such as a school, college, TAFE or university, and undertaking at least 15 hours a week face-to-face contact.
