Madrid is the capital and largest city of Spain. It is the third-most populous municipality in the European Union. The city is located on the river Manzanares both in the centre of the country and community of Madrid.

The concept of an Entertainment Center is to give children new inspiration when they play. The important thing is to make children enjoy this space and never feel bored.

The combination of lights and voids are major things in this project; also the circulation connected each floor is another important part. In this Entertainment Center, the parents could also have a good time there, the big glass view and nice coffee will let people have wonderful time.
