The Serenity Towers

Each apartment contains big windows facing the sun to take advantage of the natural sunlight, which reduces energy costs for the household. The design also ensures sufficient air flow and cross ventilation throughout the home and again reduces energy costs and improves the overall comfort and air quality. One of the unique qualities of the Serenity Towers is that apartments have equal amounts of space, thus to encourage fairness & equity amongst all residents to avoid differentiation of race or religion.

A Garden for every Apartment

In many architectural cultures in places such as Japan and China, the presence of a garden can bring harmonious energy and inner peace into a living space. The Serenity Apartments are designed to incorporate this cultural tradition in which to promote a healthy and happy lifestyle and to create a peaceful living environment for residents, each apartment comes with its own garden. This encourages households to embrace their own natural environment even in an apartment setting. Tenants will enjoy their own garden exclusively, they will also have access to the common rooftop garden, creating this space allows for interaction with neighbours and the opportunity to develop friendships.

Facilities

The Serenity Towers have taken into consideration of the possible needs of residents and aims to provide an all in one convenient location for residents and local businesses by providing facilities such as; cafes & restaurants, retail shops, grocery shops, internet cafes and Laundromat.

Common areas

The Serenity Towers offers modern Courtyards provided as a common area for all residents to enjoy to encourage relationship building, communication and friendship throughout the apartment neighbourhood. Creating opportunities for people to interact and communicate in a modern environment will allow for bonding of a strong neighboood and encourage peace through friendship and more open-minded thinking from traditional cultural beliefs.

HPLE Apartments - Jerusalem

Our Vision

• to provide for & to bring together multicultural families in Jerusalem by providing modern, sustainable and affordable living,
• to create opportunities for new living, new lifestyles, new experiences, new communities and new friendships for the people of Jerusalem, and
• to accommodate people of all religious backgrounds and beliefs to encourage the freedom of religion and to bring people together regardless of their backgrounds and religious beliefs.

Sustainable Design

The Serenity Towers offer spacious apartments designed to take advantage of the environment and surroundings. Each apartment containing windows facing the sun to take advantage of the natural sunlight, which reduces energy costs for the household. The design also ensures sufficient air flow and cross ventilation throughout the home and again reduces energy costs and improves the overall comfort and air quality.
