

The University of Sydney

Faculty of Agriculture, Food and Natural Resources Handbook 2005

University dates

University semester and vacation dates 2005

Summer School

Lectures begin	Tuesday 4 January
Lectures end	Friday 4 March

Semester 1

Lectures begin	Monday 7 March
AVCC Common Week/non-teaching Easter Period	Friday 25 March to Friday 1 April
Study vacation	Monday 13 June to Friday 17 June
Examination period	Monday 20 June to Saturday 2 July
Semester ends	Saturday 2 July
AVCC Common week/non-teaching period	Monday 4 July to Friday 8 July

Semester 2

Lectures begin	Monday 25 July
AVCC Common Week/non-teaching period	Monday 26 September to Friday 30 September
Study vacation	Monday 31 October to Friday 4 November
Examination period	Monday 7 November to Saturday 19 November
Semester ends	Saturday 19 November

Last dates for withdrawal or discontinuation 2005

Semester 1 units of study.

Last day to add a unit	Friday 18 March
Last day for withdrawal	Thursday 31 March
Last day to discontinue without failure (DNF)	Friday 29 April

Last day to discontinue (Discontinued – Fail)	Friday 10 June
---	----------------

Semester 2 units of study.

Last day to add a unit	Friday 5 August
Last day for withdrawal	Wednesday 31 August
Last day to discontinue without failure (DNF)	Friday 9 September

Last day to discontinue (Discontinued – Fail)	Friday 28 October
---	-------------------

Last day to withdraw from a non-standard unit of study.	Details in the session calendar on the Timetable Unit website. http://web.timetable.auth.usyd.edu.au/
---	--

Faculty of Agriculture, Food and Natural Resources Handbook

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Welcome from the Dean

Welcome to the Faculty of Agriculture, Food and Natural Resources. Our vision is: *To grow and excel in teaching, research and community service in the food, fibre and natural resource industries.*

The Faculty has a long and proud history in its teaching and research. It offers a diverse range of courses in the sciences and economics related to agricultural production, processing, marketing, and natural resource management. The combination of applied sciences and applied economics gives the Faculty its special character, and provides an environment to foster interactions between these disciplines, which are essential for the application and adoption of technology in agriculture and natural resource management.

Our students come from rural and urban backgrounds and are attracted by a broad range of interests. The teaching programs recognise the diverse destinations of our graduates, who enjoy high employment rates in wide-ranging occupations and express a high degree of career satisfaction.

All of the undergraduate degrees aim to give students an appreciation of the scientific and socio-economic framework of the agricultural and natural resources sectors, while affording students the opportunity to specialise in discipline areas of their choosing. In Fourth Year, students complete a research project which, as employers frequently comment, provides valuable experience in planning, researching and communicating a major piece of work, and equips graduates for the professional workplace. All students participate in at least one extended rural field trip and complete a program of professional experience, which puts the teaching into a practical context and allows the development of networks for future careers. Excursions and field-based teaching help students to get to know each other well, establish an esprit de corps in the Faculty, and build a good rapport between students and staff.

The teaching is closely linked to strong research programs, which attract substantial external funding and an outstanding cohort of postgraduate research students. The Faculty values its extensive links with industry and maintains a strong presence in the rural sector through the teaching and research programs, and the University's rural properties. The Faculty has an active international research program.

Agriculture extends well beyond crop and animal production to include natural resource management, produce handling, processing and quality, food systems, marketing, and agribusiness. The globalisation of food and fibre markets, and the integration of the food value chain, means that consumers are taking greater interest in how foods are produced and the impact of production on the environment, whereas farmers are increasingly taking notice of what happens beyond the farm gate. Agriculture faces the challenge of doubling food production in the next twenty years, and delivering diet-related health benefits to an aging population. The Faculty is playing an active role in meeting this challenge by providing leadership in research and training relating to food security and sustainable natural resource management.

I extend my best wishes for your studies and an enriching experience in the University of Sydney, and for your future professional career.

Professor Les Copeland

Dean of Agriculture, Food and Natural Resources

2. Undergraduate degrees

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Brief introduction to degree courses

Bachelor of Agricultural Economics

(Part-time study, day time only, may be available in certain circumstances)

Assumed knowledge: Mathematics.

The focus of this economics degree is on the development of analytical, quantitative, computing and communication skills with an emphasis on commodity markets and agricultural and natural resource issues. Skills highly regarded by employers are gained in fourth year through the completion of a research thesis, research exercises and research project reports. A wide range of elective courses is available.

Major studies: Include accounting, agribusiness management, agricultural economics, agricultural policy, agricultural science, commercial law, econometrics, economics, finance, geography, government, international trade, marketing, modern languages, natural resource economics.

Professional experience: You must complete 60 days of approved professional experience and field excursions before graduation. Overseas experience is encouraged.

Professional recognition: Undergraduates and graduates are eligible for membership of the Australian Agricultural and Resource Economics Society, the Economic Society of Australia, the Agribusiness Association of Australia and the American Agricultural Economics Association.

Career opportunities: Graduates are employed as applied economists and researchers with commodity and futures brokers, merchant banks and trading banks; Department of Agriculture, Fisheries and Forestry, ABARE, Meat and Livestock Australia and the Productivity Commission and they are also employed by accounting firms; management consultants, international agencies and agribusiness firms; the wider business community; large corporate farms; and in the media as economic journalists.

Bachelor of Horticultural Science

(Part-time study, day time only, may be available in certain circumstances)

Assumed knowledge: Mathematics, Chemistry and Biology.

The course has a strong scientific base. The focus of the degree is on the development of analytical, quantitative, computing and communication skills. Highly regarded skills are gained in the fourth year through the completion of a research thesis. Production horticulture deals with the application of scientific and economic principles to all phases of the production, postharvest care and marketing of fruit, vegetables, cut flowers and nursery stock. Urban/Amenity horticulture deals with the horticultural and ecological aspects of the management of parks, sports fields and golf courses, as well as plantings for streets etc. Environmental impact deals with habitat preservation and ex-situ conservation of rare and endangered species including their marketing; strategies for integrated management for control of pests, diseases and weeds; and environmental legislation and testing.

Major studies: Fruit, vegetable and ornamental production, postharvest biology and technology, urban horticulture and horticultural specialisations within areas of agribusiness, biometry, biotechnology, chemistry, economics, entomology, genetics and plant breeding, plant pathology, resource economics and soil science.

Professional experience: You must complete 60 days approved professional experience and field excursions with a focus towards

horticultural production industries (temperate, sub-tropical and tropical). Overseas experience is encouraged.

Professional recognition: For admission to professional membership by the Australian Society of Horticultural Science and the Australian Institute of Agricultural Science.

Career opportunities: Examples include employment in horticultural research, horticultural consultancy, management of horticultural enterprises and as horticultural advisers with private, state and local government bodies. Opportunities exist in production horticulture, postharvest technology, urban/amenity horticulture, sustainable horticulture, horticultural biotechnology, precision horticulture, viticulture, environmental impact analysis, endangered species conservation, habitat preservation, ornamental plant breeding for the world market, crop protection, plant ecology and irrigation science.

Bachelor of Land and Water Science

(Part-time study, day time only, may be available in certain circumstances)

Assumed knowledge: Mathematics, Chemistry and Biology.

The course has a strong scientific base. The focus of this four year applied degree is on the development of analytical, quantitative, computing and communication skills. Students learn how to apply the knowledge and principles of science to the understanding, management and conservation of our land and water resources. Highly regarded skills are gained in the fourth year through the completion of a research thesis.

Major studies: will include basic and applied aspects of biology, chemistry, geography, geographic information systems, geology, hydrology, soil science, statistics, sustainable agriculture and resource economics relevant to land and water science.

Professional experience: You must complete 60 days of approved professional experience and field excursions before graduation.

Professional recognition: Graduates are eligible for membership of professional societies including the Australian Institute of Agricultural Science.

Career opportunities: include technical experts and researchers in catchment management organizations, sustainable land and water management, environmental assessment, remediation and protection, landcare, environmental consultants; media researchers and journalists; national parks and wildlife services; educators.

Bachelor of Resource Economics

(Part-time study, day time only, may be available)

Assumed knowledge: Extension 1 Mathematics and Chemistry.

Major studies: Bio-economic modelling, economics, environmental economics, fishery economics, mineral and energy economics, water and land economics.

Professional experience: You must complete 60 days approved professional experience and field excursions. Overseas experience is encouraged.

Professional recognition: Graduates and undergraduates are eligible for membership of the Australian Agricultural and Resource Economics Society, the Economic Society of Australia, the Australia and New Zealand Society of Ecological Economics, the Australian Institute of Agricultural Science and Technology and the American Agricultural Economics Association.

2. Undergraduate degrees

Career opportunities: Include environmental consulting firms, 'green' organisations, mining and energy companies. State and Federal government opportunities include environmental agencies, land and water departments, agriculture departments, fisheries and forestry authorities. Economic analysis skills are transferable, allowing employment as economists in any sector of the economy.

Additional information: BResEc is a unique applied economics degree, blending a basic science foundation with a strong disciplinary base in economics. All students will take a year of basic science, complete sequences in economics, resource economics, and quantitative analytical economics; undertake electives in economics and/or science; and examine a wide range of natural resource management problems. Students will specialise in and complete a research project in a selected area of resource economics.

The focus is on developing broadly applicable analytical economic skills complemented with an adequate knowledge of ecological and other natural resource systems and skills in modelling those systems in order to contribute to the solution of challenging environmental and management problems.

The course is targeted at students interested in: economic management of natural resources systems, fishery and forestry economics, ecosystems, conservation issues, and sustainability.

Bachelor of Science in Agriculture

(Part-time study, day time only, may be available in certain circumstances)

Assumed knowledge: Mathematics, Chemistry and Biology.

The course has a strong scientific base and offers a broad training in the scientific disciplines. The focus of this four year applied degree is on the development of analytical, quantitative, computing and communication skills. Students learn how to apply the knowledge and principles of science to the understanding and management of the production and processing and marketing of agricultural products, and to the management and conservation of our natural resources. Highly regarded skills are gained in the fourth year through the completion of a research thesis.

Major studies: Agricultural biotechnology, agribusiness, agricultural chemistry, agricultural economics, agricultural entomology, agricultural genetics, agricultural microbiology, agronomy, animal science and production, biometry, cereal science, crop science, environmental science, farming systems, food chemistry, horticultural science, land and water management, plant breeding, plant pathology, resource economics, soil science. Special interdisciplinary programs may also be approved in fourth year.

Professional experience: You must complete 60 days of approved professional experience and field excursions before graduation.

Professional recognition: Membership of professional societies, such as the Australian Institute of Agricultural Science, is available.

Career opportunities: Examples include environmental scientists or research scientists in: environmental protection, land and water conservation, conservation of endangered species, sustainable agri-

culture, precision agriculture, plant breeding, horticulture, agronomy, integrated pest management, animal nutrition, molecular genetics (plant, animal and human); medical researchers; reproductive technologists in animal production enterprises and IVF clinics; biotechnologists (plant, animal and microbial); microbiologists (industrial and environmental); food scientists and cereal chemists; feedlot managers, managers of large scale intensive and extensive animal production enterprises; agricultural consultants (domestic and international); statisticians; media researchers and journalists; personnel for: biosoil programs, environmental protection groups, national parks and wildlife service and the forestry commissions; educators; applied marketing and agribusiness management.

Unit of study details for each degree course can be found in the units of study descriptions chapters of this book.

Progress through the years

Under normal circumstances, the degree requirements may be satisfied in four years. If you fail to achieve a satisfactory standard in a unit of study at the first attempt, you may repeat the unit. Should you not achieve a satisfactory standard at the second attempt, you must provide compelling evidence as to why you should be re-admitted to that unit of study and/or degree (see 'satisfactory progress' in chapter 8). Students repeating units of study which belong to the First, Second or Third Year groups of units of study may, with the permission of the Faculty, enrol in one or more units of study prescribed for the next higher year. The Faculty will normally grant permission for you to undertake units from the next year when:

- (i) the timetable arrangements are such that you can attend all lectures, practical classes, tutorials, seminars and excursions in all of the units of study undertaken;
- (ii) you have fulfilled all of the prerequisites; and
- (iii) you can satisfy the corequisites for the units belonging to the higher year group of units.

Prerequisites are units of study which you must pass before proceeding to another unit.

Corequisites are units of study which should be studied in the same year as another unit if you have not already passed in them.

In the year groupings on the following pages, prerequisites and corequisites for each of the specified units of study are listed. There are circumstances, however, in which the Faculty may waive the formal prerequisite and corequisite requirements if you are otherwise suitably qualified to enrol for a unit. The onus is on students to consult the various departments as to the waivers which may be granted for each unit. The approval of the Discipline Leader must be obtained before you can proceed to a unit of study unless you have passed the necessary prerequisites.

Bachelor of Agricultural Economics

Unit of Study	CP	A: Assumed knowledge P: Prerequisites Q: Qualifying C: Corequisites N: Prohibition	Session
The degree of Bachelor of Agricultural Economics is available for those wishing to specialise in the field of agricultural economics. Regulations governing candidature of the BAgEc degree are set out in the Resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below.			
Year 1			
The normal load is 48 credit points comprising 36 credit points of core units and 12 credit points of elective units.			
AGEC 1001	Agricultural Economics 1A	6	A HSC Mathematics Semester 1
AGEC 1002	Agricultural Economics 1B	6	A HSC Mathematics C AGECE1001 Semester 2
ECMT 1010	Business and Economic Statistics A	6	N ECMT1011, ECMT1012, ECMT1013, MATH1015, MATH1005, MATH1905, STAT1021 Semester 1, Semester 2

2. Undergraduate degrees

ECMT 1020	Business and Economic Statistics B	6	C ECMT1010 N ECMT1021, 1022 and 1023 NB: Other than in exceptional circumstances, it is strongly recommended that students do not undertake Business and Economic Statistics B before attempting Business and Economic Statistics A.	Summer, Semester 2
ECON 1001	Introductory Microeconomics	6	A Mathematics	Semester 1, Summer
ECON 1002	Introductory Macroeconomics	6	A Mathematics	Summer, Semester 2
and 12 credit points from Table 1.				
Year 2				
The normal load is 48 credit points comprising 36 credit points of core units and 12 credit points of elective units.				
AGEC 2001	Commodity Price Analysis 2	8	P AGEC1002 or (AGEC1003 and AGEC1004) or ECON1001	Semester 1
ECON 2001	Intermediate Microeconomics	8	P ECON1001 C ECMT1010 or 101X N ECON2901 NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.	Summer, Semester 1, Semester 2
ECON 2002	Intermediate Macroeconomics	8	P ECON1002. C ECMT1020 or 102X N ECON2902 NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.	Summer, Semester 1, Semester 2
AGEC 2003	Production Economics 2	8	P AGEC1001 or AGEC1031 or ECON2001 or (AGEC1003 and AGEC1004)	Semester 2
AGEC 2005	Applied Commodity Modelling 2	4	P (ECMT1010 and ECMT1020) or (MATH 1001 and 1002 and 1003 and 1005) N AGEC2006 and AGEC2007	Semester 1
and a minimum of 12 credit points from Table 1 and/or Table 2.				
Year 3				
The normal load is 48 credit points comprising 36 credit points of core units, including 16 credit points of ECON 3000 units, and 12 credit points of elective units.				
AGEC 3001	Agribusiness Management 3	8	P AGEC2003 or (AGEC1003 and AGEC1004)	Semester 1
AGEC 3002	Agricultural and Resource Policy	8	P (AGEC2001 & AGEC2003) or ECON2001 or ECON2901	Semester 2
AGEC 3004	Research Methods 3	4	P AGEC2003 and (AGEC2002 or AGEC2005) or (AGEC2006 and AGEC2007) or ECMT2021.	Semester 1
Plus two units of level 3 ECON, 8 credit points each. Prerequisite: ECON 2001, ECON 2002.				
and a minimum of 12 credit points from Table 2.				
Year 4				
The normal load is 48 credit points comprising 24 credit points of core units and 24 credit points of elective units chosen from the AGEC 4000 level units listed.				
AGEC 4012	Research Project 4A	8	P AGEC3003 or AGEC3004 C AGEC4013 and any other 24 credit points from AGEC Level 4000 units	Semester 1
AGEC 4013	Research Project 4B	8	P AGEC3003 or AGEC3004 C AGEC4012 and any other 24 credit points from AGEC Level 4000 units	Semester 2
AGEC 4010	Contemporary Issues 4A	4	C AGEC4011 and at least 12 other level 4 AGEC credit points	Semester 1
AGEC 4011	Contemporary Issues 4B	4	C AGEC4010 and at least 12 other level 4 AGEC credit points	Semester 2
Plus at least 24 credit points from the following units:				
AGEC 4003	Applied International Trade	8	P AGEC2001 or (ECON2001 and ECON2002) or (ECON2901 and ECON2902)	Semester 1
AGEC 4004	Applied Marketing	8	P AGEC2001 or (AGEC1003 & AGEC1004) or ECON2001 or ECON2901	Semester 2
AGEC 4005	Environmental and Resource Economics	8	P (AGEC2001 and AGEC2003) or (ECON2001 and ECON2002)	Semester 2
AGEC 4007	Spec Topics Agricult/Resource Economics	8	NB: Department permission required for enrolment.	Semester 1, Semester 2
AGEC 4008	Quantitative Planning Methods 4	4	P AGEC2003 C AGEC3001 or AGEC3031	Semester 1a
AGEC 4009	Agricultural Finance & Risk Management 4	4	P AGEC 2003 C AGEC3001 or AGEC3031	Semester 1b
AGEC 4033	Minerals and Energy Economics 4	4	P AGEC3031 or AGEC3002 N AGEC4005	Semester 2b
AGEC 4035	Environmental Economics 4	4	P AGEC3031 or AGEC3002 N AGEC4005	Semester 2a

2. Undergraduate degrees

AGEC 4036	Water Economics 4	4	P AGE3031 or AGE3002 N AGE34005	Semester 1b
AGEC 4037	Benefit Cost Analysis 4	4	P AGE3031 or AGE3002 N AGE34005	Semester 1a
Optional units of study in the BAgrEc degree				
Table 1				
ACCT 1001	Accounting IA	6	A HSC Mathematics NB: Restricted entry	Semester 1, Semester 2
ACCT 1002	Accounting IB	6	P ACCT1001 NB: Restricted entry	Summer, Semester 1, Semester 2
ACCT 1003	Financial Accounting Concepts	6	N Terminating unit. Cannot be counted with ACCT1001 and ACCT1002.	Semester 1
ACCT 1004	Management Accounting Concepts	6	N Terminating unit. Cannot be counted with ACCT1001 and ACCT1002.	Semester 2
BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Summer, Semester 1
BIOL 1002	Living Systems	6	A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. N BIOL1902	Semester 2
CLAW 1001	Commercial Transactions A	6		Semester 1, Semester 2
CLAW 1002	Commercial Transactions B	6	P CLAW1001	Semester 2
CROP 1001	Agricultural Science 1A	6	A HSC Chemistry N HORT1001, LWSC1001	Semester 1
CROP 1002	Agricultural Science 1B	6	C CROP1001 N HORT1002, LWSC1002	Semester 2
GEOG 1001	Biophysical Environments	6		Semester 1
GEOG 1002	Human Environments	6		Semester 2
First year GOVT.				
MATH 1011	Life Sciences Calculus	3	A HSC Mathematics N MATH (1001 or 1901 or 1906).	Semester 1
MATH 1012	Life Sciences Algebra	3	A HSC Mathematics N MATH (1002 or 1902).	Semester 2
MATH 1013	Differential and Difference Equations	3	A HSC Mathematics N MATH (1003 or 1903 or 1907).	Semester 2
MATH 1015	Life Science Statistics	3	A HSC Mathematics N MATH (1005 or 1905) or STAT (1021 or 1022) or ECMT Junior units of study.	Summer, Semester 1
MKTG 1001	Marketing Principles	6	N MKTG2001	Summer, Semester 1, Semester 2
MKTG 1002	Marketing Research 1	6	P MKTG1001 or MKTG2001. In addition either ECMT1010 or (one of ECMT1011, ECMT1012, ECMT1013 and one of ECMT1021, ECMT1022, ECMT1023) N MKTG2003	Semester 2
Modern Language (level 1) units with the approval of the Dean of Agriculture, Food and Natural Resources.				
Notes				
1. ACCT 1001 and ACCT 1003 are mutually exclusive.				
2. ACCT 1002 and ACCT 1004 are mutually exclusive.				
Students may count no more than 24 credit points of the following units of study towards the degree: First year units in Accounting, Agricultural Science, Biology, Commercial Law, Geography, Government, Marketing, and Mathematics (Life Sciences). Students may not count both Accounting IA and IB, and Financial Accounting Concepts and Management Accounting Concepts towards their degree.				
Table 2				
AGEC 4008	Quantitative Planning Methods 4	4	P AGE32003 C AGE33001 or AGE33031	Semester 1a
AGEC 4009	Agricultural Finance & Risk Management 4	4	P AGE3 2003 C AGE33001 or AGE33031	Semester 1b
AGRO 3001	Agromony 3	8	P AGRO2002 or CROP1001 or HORT1001 or LWSC1001	Semester 1

CROP 2001	Crop Science 2	6	P CROP1001 and CROP1002, or HORT1001 and HORT1002, or LWSC1001 and LWSC1002 and one of BIOM1001 and BIOM1002 NB: Department permission required for enrolment.	Semester 2
ECMT 2010	Regression Modelling	8	P ECMT1010 and ECMT1020	Semester 1
ECMT 2021	Analysis of Discrete Choice Data	8	P ECMT2010	Semester 2
HORT 3001	Horticultural Science 3	8	P CROP2001 or HORT2001 or AGRO2002	Semester 1
Any level 2 semester units of study in Economic History (ECHS) or Government (GOVT).				
Any level 2 or 3 semester units of study in Accounting (ACCT), Commercial Law (CLAW), Finance (FINC), Geography (GEOG), Marketing (MKTG), Modern Language (with approval of the Dean).				
Any level 2 or 3 semester units of study in Econometrics (ECMT), Economics (ECON).				
Units of study from the BScAgr or BHortSc degree, subject to the approval of the BAgEc coordinator and the Head of the Discipline concerned.				

Bachelor of Animal Science

<i>Unit of Study</i>	<i>CP</i>	<i>A: Assumed knowledge P: Pre-requisites Q: Qualifying C: Corequisites N: Prohibition</i>	<i>Session</i>
The degree of Bachelor of Animal Science is available for those wishing to specialise in the field of animal science. Regulations governing candidature for the BAnimSc degree are set out in the resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below. (Note – this degree is offered only to students enrolled prior to 2005. For units of study relating to the Bachelor of Animal and Veterinary Biosciences refer to the Faculty of Veterinary Science Handbook)			
Year 1 (commenced 2002)			
The normal load is 48 credit points of the core units listed.			
BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.
or			
BIOL 1101	Biology - Ecosystems to Genes	6	P HSC 2-unit Biology or equivalent. N BIOL (1001 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.
or			
BIOL 1901	Biology - Ecosystems to Genes (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1001 or 1101) NB: Department permission required for enrolment. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.
CHEM 1405	Chemistry	6	A HSC Chemistry
AGEC 1006	Economic Environment of Agriculture	6	A HSC Mathematics N AGECE1003, AGECE1004.
CROP 1001	Agricultural Science 1A	6	A HSC Chemistry N HORT1001, LWSC1001
BIOL 1002	Living Systems	6	A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. N BIOL1902
or			
BIOL 1902	Living Systems (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1002 or 1904 or 1905) NB: Department permission required for enrolment.
ANSC 2002	Animal Science 2	6	P CROP1001 and CROP1002 or HORT1001 and HORT1002 or LWSC1001 and LWSC1002
BIOM 1003	Biometry 1	6	A 70 or more in HSC Mathematics
CROP 1002	Agricultural Science 1B	6	C CROP1001 N HORT1002, LWSC1002

2. Undergraduate degrees

Year 2				
The normal load is 48 credit points of the core units listed.				
AGCH 2004	Agricultural Chemistry	6	P CHEM1405 N AGCH2003	Semester 1
BIOM 2001	Biometry 2	6	P BIOM1003 or equivalent	Semester 1
GENE 2001	Agricultural Genetics 2	6	P BIOL1201 and BIOL1202 or BIOL1001 and BIOL1002, BIOM1001	Semester 1, Semester 2
SOIL 2003	Soil Science 2	6		Semester 1
PLNT 2003	Plant Form and Function	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2903, BIOL2003, BIOL2903, CROP2001.	Semester 2
or				
PLNT 2903	Plant Form and Function (Advanced)	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P Distinction average in 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2003, BIOL2003, BIOL2903, CROP2001	Semester 2
ENTO 2002	Entomology and Parasitology	6		Semester 2
MICR 2026	Microbes and Animal Health	6	P 12 credit points of Junior Biology N MICR (2021 or 2921 or 2001 or 2901 or 2003 or 2011 or 2909) NB: Only available to students in the Bachelor of Animal Science	Semester 2
ANSC 2004	Animal Conservation Biology	6	N As the core component of this unit of study is run in conjunction with Veterinary Conservation Biology (VETS2015) students must consult timetables to determine if subject choices prohibit them from attending these classes	Semester 2
Year 3				
The normal load is 48 credit points comprising 24 credit points of the core units listed and 24 credit points of electives chosen from those listed.				
ANSC 3001	Animal Nutrition 3	8	P ANSC2002	Semester 2
ANSC 3002	Animal Reproduction 3	8	P ANSC2002	Semester 1
ANSC 3003	Animal Structure and Function 3A	8	P ANSC2002	Semester 1
And 24 credit points from the remaining Year 3 units of study:				
AGEC 2001	Commodity Price Analysis 2	8	P AGECE1002 or (AGECE1003 and AGECE1004) or ECON1001	Semester 1
AGEC 3001	Agribusiness Management 3	8	P AGECE2003 or (AGECE1003 and AGECE1004)	Semester 1
AGCH 3017	Food Chemistry and Biochemistry A	4	P AGCH2001 or AGCH2002 N May not be counted with AGCH3024, 3025 or 3026.	Semester 1
AGCH 3018	Food Chemistry and Biochemistry B	4	C AGCH 3017 N May not be counted with AGCH 3024, 3025 or 3026.	Semester 1
AGRO 3001	Agronomy 3	8	P AGRO2002 or CROP1001 or HORT1001 or LWSC1001	Semester 1
BIOM 3003	Statistical Modelling 3	4	P BIOM2001 or BIOM2002	Semester 1
AGCH 3012	Rural Environmental Chemistry	4	P AGCH2002 or ENVI 2001 and 2002 NB: This unit is offered to students enrolled in BSc(Environmental), BLWSc and, subject to numbers, may be available to BScAgr. A maximum quota of 30 may exist. Contact Professor Kennedy.	Semester 1
RSIS 3001	Rural Spatial Information Systems 3	4	P SOIL 2003, BIOM2001 or BIOM2002 NB: Department permission required for enrolment.	Semester 1
AGEC 2003	Production Economics 2	8	P AGECE1001 or AGECE1031 or ECON2001 or (AGECE1003 and AGECE1004)	Semester 2
AGEC 4004	Applied Marketing	8	P AGECE2001 or (AGECE1003 & AGECE1004) or ECON2001 or ECON2901	Semester 2

AGCH 3016	Agricultural Biotechnology 3	4	A AGCH2002, GENE2001, MICR2101, ANSC2002 and CROP2001, or the equivalent of these units.	Semester 2
AGCH 3020	Chemistry & Biochemistry of Ecosystems A	4	P AGCH (2001 or 2002) or CHEM (2001 or 2101 or 2202 or 2301 or 2302 or 2902) or BCHM (2002 or 2902) or ENVI (2001 or 2002). N May not be counted with AGCH 3030 or 3031.	Semester 2
AGCH 3021	Chemistry & Biochemistry of Ecosystems B	4	C AGCH 3020. N May not be counted with AGCH 3030 or 3031.	Semester 2
ANSC 3004	Animal Structure and Function 3B	8	P ANSC2002	Semester 2
ANSC 3005	Animal Biotechnology 3	4	P Students are expected to have knowledge of Genetics equivalent at least to Agricultural Genetics 2 (GENE2001) and knowledge of Animal Science equivalent to Animal Science 2 (ANSC2002)	Semester 2
MICR 3102	Agricultural Microbiology 3	8	P MICR2101	Semester 2
PPAT 3002	Plant Disease 3	4	P CROP2001, CROP2002, GENE2001	Semester 2
SOIL 3003	Soil Science 3	8	P SOIL2003 NB: Department permission required for enrolment.	Semester 2
Year 4				
The normal load is 48 credit points.				
ANSC 4001	Animal Production 4A	24	P ANSC3001, ANSC3002, ANSC3003	Semester 1
ANSC 4002	Animal Production 4B	24	P ANSC3001, ANSC3002, ANSC3003 C ANSC4001	Semester 2

Bachelor of Horticultural Science

<i>Unit of Study</i>	<i>CP</i>	<i>A: Assumed knowledge P: Prerequisites Q: Qualifying C: Corequisites N: Prohibition</i>	<i>Session</i>	
The degree of Bachelor of Horticultural Science is available for those wishing to specialise in the field of horticultural science. Regulations governing candidature of the BHortSc degree are set out in the Resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below.				
Year 1 (commenced 1995, revised 1997, 2004)				
The normal load is 48 credit points of the core units listed.				
AGEC 1006	Economic Environment of Agriculture	6	A HSC Mathematics N AGECE1003, AGECE1004.	Semester 1
BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Summer, Semester 1
or				
BIOL 1101	Biology - Ecosystems to Genes	6	P HSC 2-unit Biology or equivalent. N BIOL (1001 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
or				
BIOL 1901	Biology - Ecosystems to Genes (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1001 or 1101) NB: Department permission required for enrolment. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
HORT 1001	Horticultural Science 1A	6	A HSC 2 unit Chemistry or 3 unit Science N CROP1001, LWSC1001	Semester 1
BIOL 1002	Living Systems	6	A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. N BIOL1902	Semester 2

2. Undergraduate degrees

or				
BIOL 1902	Living Systems (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1002 or 1904 or 1905) NB: Department permission required for enrolment.	Semester 2
BIOM 1003	Biometry 1	6	A 70 or more in HSC Mathematics	Semester 2
HORT 1002	Horticultural Science 1B	6	C HORT1001 N CROP1002, LWSC1002	Semester 2
And 12 credit points of First year Chemistry.				
CHEM 1001	Fundamentals of Chemistry 1A	6	A There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. N CHEM 1101 or 1901 or 1903 or 1905 or 1906 or 1909	Semester 1
CHEM 1002	Fundamentals of Chemistry 1B	6	P CHEM (1001 or 1101) or equivalent N CHEM (1102 or 1902 or 1904 or 1907 or 1908)	Semester 2
or				
CHEM 1901	Chemistry 1A (Advanced)	6	P UAI of at least 96.4 and HSC Chemistry result >80, or Distinction or better in a University level Chemistry unit, or by invitation C Recommended concurrent unit of study: 6 credit points of Junior Mathematics N CHEM (1001 or 1101 or 1903 or 1905 or 1906 or 1909) NB: Department permission required for enrolment.	Semester 1
CHEM 1902	Chemistry 1B (Advanced)	6	P CHEM (1901 or 1903) or Distinction in CHEM1101 or equivalent C Recommended concurrent unit of study: 6 credit points of Junior Mathematics N CHEM (1002 or 1102 or 1904 or 1907 or 1908) NB: Department permission required for enrolment.	Semester 2
Year 2				
The normal load is 48 credit points of the core units listed.				
BIOM 2001	Biometry 2	6	P BIOM1003 or equivalent	Semester 1
PLNT 2001	Applied Plant Biochemistry	6	P 12 credit points of Junior Chemistry and 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 N PLNT2901, AGCH2001.	Semester 1
or				
PLNT 2901	Applied Plant Biochemistry (Advanced)	6	P A Distinction average in 12 credit points of Junior Chemistry and 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 N PLNT2001, AGCH2001	Semester 1
PLNT 2002	Aust Flora: Ecology and Conservation	6	P 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENV11001 N PLNT2902, BIOL2004 or BIOL2904.	Semester 1
or				
PLNT 2902	Aust Flora: Ecology & Conservation (Adv)	6	P Distinction average in 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENV11001 N PLNT2002, BIOL2004, BIOL2904.	Semester 1
SOIL 2003	Soil Science 2	6		Semester 1
CROP 2003	Crop Protection	6	P CROP1001 and CROP1002, or HORT1001 and HORT1002, or LWSC1001 and LWSC1002 and BIOL1001 and BIOL1002 or BIOL1003, or BIOL1201 and BIOL1202	Semester 2
HORT 2002	Horticultural Science 2	6	P HORT1001, HORT1002	Semester 2

MICR 2024	Microbes in the Environment	6	P 30 credit points of junior Science or Faculty of Food, Agriculture and Natural Resource units including 6 credit points of Junior Biology. N MICR (2021 or 2921 or 2001 or 2901 or 2003 or 2011 or 2909). NB: For progression on to Senior Microbiology units, students must also complete MBLG1001 and MICR2022.	Semester 2
PLNT 2003	Plant Form and Function	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENV11001 N PLNT2903, BIOL2003, BIOL2903, CROP2001.	Semester 2
or				
PLNT 2903	Plant Form and Function (Advanced)	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P Distinction average in 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENV11001 N PLNT2003, BIOL2003, BIOL2903, CROP2001	Semester 2
Year 3				
The normal load is 48 credit points chosen from the following elective units.				
AGCH 3025	Chemistry and Biochemistry of Foods A	6	P 6 credit points of Intermediate units in Agricultural Chemistry, Chemistry or Biochemistry N May not be counted with AGCH (3017, 3024).	Semester 1
AGCH 3026	Chemistry and Biochemistry of Foods B	6	P 6 credit points of Intermediate Chemistry, Biochemistry or Agricultural Chemistry C AGCH 3025 N AGCH3003, AGCH3005	Semester 1
AGCH 3030	Rural Environmental Chemistry A	6	P 6 credit points of either Intermediate Agricultural Chemistry, Chemistry, Biochemistry, Plant Science or Environmental Science N AGCH3020, AGCH3021, AGCH3022.	Semester 1
AGEC 2001	Commodity Price Analysis 2	8	P AGEC1002 or (AGEC1003 and AGEC1004) or ECON1001	Semester 1
AGEC 3001	Agribusiness Management 3	8	P AGEC2003 or (AGEC1003 and AGEC1004)	Semester 1
AGRO 3001	Agronomy 3	8	P AGRO2002 or CROP1001 or HORT1001 or LWSC1001	Semester 1
BIOM 3002	Experimental Design 3	4	P BIOM2001 or BIOM2002	Semester 1
BIOM 3003	Statistical Modelling 3	4	P BIOM2001 or BIOM2002	Semester 1
HORT 3001	Horticultural Science 3	8	P CROP2001 or HORT2001 or AGRO2002	Semester 1
HORT 3003	Postharvest Biology and Technology 3	4	P CROP 2001 or HORT 2001 or AGRO 2002	Semester 1
AGEC 2003	Production Economics 2	8	P AGEC1001 or AGEC1031 or ECON2001 or (AGEC1003 and AGEC1004)	Semester 2
AGEC 4004	Applied Marketing	8	P AGEC2001 or (AGEC1003 & AGEC1004) or ECON2001 or ECON2901	Semester 2
AGCH 3016	Agricultural Biotechnology 3	4	A AGCH2002, GENE2001, MICR2101, ANSC2002 and CROP2001, or the equivalent of these units.	Semester 2
AGCH 3031	Rural Environmental Chemistry B	6	P 6 credit points of either Intermediate Agricultural Chemistry, Chemistry, Biochemistry, Plant Science or Environmental Science N AGCH3020, AGCH3021, AGCH3022	Semester 2
CROP 3003	Agricultural Systems for Hort Science 3	4	N CROP3002	Semester 2a
HORT 3002	Flower and Nursery Crops 3	4	P CROP 2001 or HORT 2001 or AGRO 2002	Semester 2
PPAT 3002	Plant Disease 3	4	P CROP2001, CROP2002, GENE2001	Semester 2

2. Undergraduate degrees

SOIL 3004	The Soil Resource	6	P SOIL2003 or GEOL1002 or GEOL2004 or GEOG1001 or ENVI2001	Semester 2
Year 4				
The normal load is 48 credit points.				
HORT 4001	Horticultural Science 4A	24	P HORT3001	Semester 1
HORT 4002	Horticultural Science 4B	24	P HORT3001 C HORT4001	Semester 2

Bachelor of Land and Water Science

Unit of Study	CP	A: Assumed knowledge P: Pre-requisites Q: Qualifying C: Corequisites N: Prohibition	Session	
Regulations governing candidature of the BLWSc degree are set out in the Resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below.				
Year 1 (commenced 2000, reviewed 2004)				
The normal load is 48 credit points of the core units listed.				
BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Summer, Semester 1
or				
BIOL 1101	Biology - Ecosystems to Genes	6	P HSC 2-unit Biology or equivalent. N BIOL (1001 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
or				
BIOL 1901	Biology - Ecosystems to Genes (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1001 or 1101) NB: Department permission required for enrolment. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
ENVI 1002	Geomorphonic Environments	6	NB: This unit of study is available to students in the Bachelor of Science (Environmental) and the Bachelor of Land & Water Science only.	Semester 1
LWSC 1001	Land and Water Science 1A	6	N CROP1001 and HORT1001	Semester 1
AGEC 1031	Resource Economics 1	6	A Mathematics Extension 1 C ECON1001	Semester 2
BIOM 1003	Biometry 1	6	A 70 or more in HSC Mathematics	Semester 2
LWSC 1002	Land and Water Science 1B	6	C LWSC1001 Land and Water Science 1A N CROP1002 and HORT1002	Semester 2
And 12 credit points from Year 1 Chemistry.				
CHEM 1001	Fundamentals of Chemistry 1A	6	A There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. N CHEM 1101 or 1901 or 1903 or 1905 or 1906 or 1909	Semester 1
CHEM 1002	Fundamentals of Chemistry 1B	6	P CHEM (1001 or 1101) or equivalent N CHEM (1102 or 1902 or 1904 or 1907 or 1908)	Semester 2
Or from standard level CHEM 1101 Chemistry 1A and CHEM 1102 Chemistry 1B.				
Or from advanced level CHEM 1901 Chemistry 1A (Advanced) and CHEM 1902 Chemistry 1B (Advanced).				
Year 2				
The normal load is 48 credit points of the core units listed.				
AGCH 2003	Rural Environmental Chemistry (Intro)	6	P 12 credit points of Junior Chemistry. N AGCH2001, AGCH2002, CHEM2404	Semester 1

BIOM 2001	Biometry 2	6	P BIOM1003 or equivalent	Semester 1
PLNT 2002	Aust Flora: Ecology and Conservation	6	P 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2902, BIOL2004 or BIOL2904.	Semester 1
or				
PLNT 2902	Aust Flora: Ecology & Conservation (Adv)	6	P Distinction average in 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2002, BIOL2004, BIOL2904.	Semester 1
SOIL 2003	Soil Science 2	6		Semester 1
GEOG 2321	Fluvial and Groundwater Geomorphology	6	P GEOG(2311 or 2001) or 36 credit points of Junior study including GEOG1001 or ENVI (1001 or 1002) or GEOL (1001 or 1002 or 1501). Students in the Bachelor of Resource Economics should have 36 credit points of study in Biology (or Land and Water Science), Chemistry and Mathematics. Students in the Bachelor of Land and Water Science should have ENVI1001, 12 credit points of Chemistry, 6 credit points of Biology, BIOM1002. N GEOG (2002 or 2302 or 2303) or MARS2002	Semester 2
LWSC 2002	Sustainable Land and Water Management	6	P LWSC1001, LWSC1002.	Semester 2
MICR 2024	Microbes in the Environment	6	P 30 credit points of junior Science or Faculty of Food, Agriculture and Natural Resource units including 6 credit points of Junior Biology. N MICR (2021 or 2921 or 2001 or 2901 or 2003 or 2011 or 2909). NB: For progression on to Senior Microbiology units, students must also complete MBLG1001 and MICR2022.	Semester 2
PLNT 2003	Plant Form and Function	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2903, BIOL2003, BIOL2903, CROP2001.	Semester 2
or				
PLNT 2903	Plant Form and Function (Advanced)	6	A The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. P Distinction average in 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001 N PLNT2003, BIOL2003, BIOL2903, CROP2001	Semester 2
Year 3				
The load is 48 credit points comprising 36 cp of core units and 12 cp of elective units chosen from the areas listed.				
AGEC 3032	Introductory Land and Water Economics 3	4		Semester 1a, Semester 1b
AGRO 3001	Agronomy 3	8	P AGRO2002 or CROP1001 or HORT1001 or LWSC1001	Semester 1
LWSC 3001	Hydrology and Catchment Management 3	4	P LWSC2001	Semester 1
AGCH 3020	Chemistry & Biochemistry of Ecosystems A	4	P AGCH (2001 or 2002) or CHEM (2001 or 2101 or 2202 or 2301 or 2302 or 2902) or BCHM (2002 or 2902) or ENVI (2001 or 2002). N May not be counted with AGCH 3030 or 3031.	Semester 2

2. Undergraduate degrees

ENVI 3004	Environmental Impact Assessment	4	P Entry by permission of Course Coordinator only. N ENVI 3002. NB: Department permission required for enrolment. This unit of study is available to Study Abroad students and students enrolled in the Bachelor of Science (Marine Science), Bachelor of Resource Economics and Bachelor of Land & Water Science only.	Semester 2
SOIL 3004	The Soil Resource	6	P SOIL2003 or GEOL1002 or GEOL2004 or GEOG1001 or ENVI2001	Semester 2
SOIL 3008	Rural Spatial Information Systems	6		Semester 2
And 12 credit points of electives chosen with the approval of the course coordinator from biology, land science, water science, biophysical modelling, agricultural economics or political systems, especially from AGCH 3030, AGCH 3031, AGEC 3001, AGEC 3002, BIOL 2101, BIOM 3003, GEOG 3101, LWSC 3002, LWSC 3003.				
Year 4				
The load is 48 credit points.				
LWSC 4001	Land and Water Science 4A	24	P LWSC3001	Semester 1
LWSC 4002	Land and Water Science 4B	24	P LWSC3001 C LWSC4001	Semester 2

Bachelor of Resource Economics

<i>Unit of Study</i>	<i>CP</i>	<i>A: Assumed knowledge P: Prerequisites Q: Qualifying C: Corequisites N: Prohibition</i>	<i>Session</i>	
Regulations governing candidature of the BResEc degree are set out in the resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below.				
Year 1 (commenced 2000)				
The normal load is 48 credit points comprising 36 credit points of core units and 12 credit points of elective units.				
AGEC 1031	Resource Economics 1	6	A Mathematics Extension 1 C ECON1001	Semester 2
ECON 1001	Introductory Microeconomics	6	A Mathematics	Semester 1, Summer
And 12 credit points of elective units chosen from standard Biology or Land and Water Science.				
BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Summer, Semester 1
And				
BIOL 1002	Living Systems	6	A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. N BIOL1902	Semester 2
Or from advanced level BIOL 1901 and BIOL 1902;				
Or				
LWSC 1001	Land and Water Science 1A	6	N CROP1001 and HORT1001	Semester 1
And				
LWSC 1002	Land and Water Science 1B	6	C LWSC1001 Land and Water Science 1A N CROP1002 and HORT1002	Semester 2
and 12 credit points from Year 1 Chemistry.				
CHEM 1001	Fundamentals of Chemistry 1A	6	A There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. N CHEM 1101 or 1901 or 1903 or 1905 or 1906 or 1909	Semester 1
CHEM 1002	Fundamentals of Chemistry 1B	6	P CHEM (1001 or 1101) or equivalent N CHEM (1102 or 1902 or 1904 or 1907 or 1908)	Semester 2
Or from standard level CHEM 1101 Chemistry 1A and CHEM 1102 Chemistry 1B;				
Or from advanced level CHEM 1901 Chemistry 1A (Advanced) and CHEM 1902 Chemistry 1B (Advanced);				
And 12 credit points of core units from standard level Mathematics.				
MATH 1001	Differential Calculus	3	A HSC Mathematics Extension 1 N MATH 1011 or 1901 or 1906.	Summer, Semester 1
MATH 1002	Linear Algebra	3	A HSC Mathematics Extension 1 N MATH 1902 or 1012	Semester 1, Summer

2. Undergraduate degrees

MATH 1003	Integral Calculus and Modelling	3	A HSC Mathematics Extension 2 or MATH 1001 N MATH 1013 or 1903 or 1907	Summer, Semester 2
MATH 1005	Statistics	3	A HSC Mathematics N MATH (1905 or 1015) or ECMT Junior units of study or STAT (1021 or 1022)	Summer, Semester 2
Or from advanced level MATH 1901, MATH 1902, MATH 1903, MATH 1905.				
Year 2				
The normal load is 46 credit points of the core units listed.				
AGEC 2001	Commodity Price Analysis 2	8	P AGECE1002 or (AGECE1003 and AGECE1004) or ECON1001	Semester 1
AGEC 2005	Applied Commodity Modelling 2	4	P (ECMT1010 and ECMT1020) or (MATH 1001 and 1002 and 1003 and 1005) N AGECE2006 and AGECE2007	Semester 1
ECON 2001	Intermediate Microeconomics	8	P ECON1001 C ECMT1010 or 101X N ECON2901 NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.	Summer, Semester 1, Semester 2
GEOG 2311	Landscape Processes	6	P 36cp of Junior units of study, including GEOG1001 or ENVI (1001 or 1002), or GEOL (1001 or 1002). Students enrolled in the Bachelor of Resource Economics should have 36cp from Junior units of study in Biology (or Land and Water Science), Chemistry and Mathematics. N GEOG2001	Semester 1
AGEC 2003	Production Economics 2	8	P AGECE1001 or AGECE1031 or ECON2001 or (AGECE1003 and AGECE1004)	Semester 2
ECON 1002	Introductory Macroeconomics	6	A Mathematics	Summer, Semester 2
GEOG 2321	Fluvial and Groundwater Geomorphology	6	P GEOG(2311 or 2001) or 36 credit points of Junior study including GEOG1001 or ENVI (1001 or 1002) or GEOL (1001 or 1002 or 1501). Students in the Bachelor of Resource Economics should have 36 credit points of study in Biology (or Land and Water Science), Chemistry and Mathematics. Students in the Bachelor of Land and Water Science should have ENV11001, 12 credit points of Chemistry, 6 credit points of Biology, BIOM1002. N GEOG (2002 or 2302 or 2303) or MARS2002	Semester 2
Year 3				
The normal load is 48 credit points comprising 24 credit points of core units, an 8 credit point ECON 3000 level unit, & 16 credit points of elective units chosen from Table 1.				
AGEC 3031	Resource Economics 3	8	P AGECE2003	Semester 1
AGEC 3002	Agricultural and Resource Policy	8	P (AGECE2001 & AGECE2003) or ECON2001 or ECON2901	Semester 2
ECON 2002	Intermediate Macroeconomics	8	P ECON1002. C ECMT1020 or 102X N ECON2902 NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.	Summer, Semester 1, Semester 2
ECON 3000 level (option)				
Plus 16 credit points chosen from Table 1 below.				
Year 4				
The normal load is 50 credit points comprising 28 cp of core units, at least 12 cp of elective units chosen from Table 3, and other elective units				
AGEC 4030	Resource Economics Project 4A	6	C AGECE4031, AGECE4041 and at least 12 cp from AGECE4033/4034/4035/4036/4037 N May not be counted with AGECE4012 or AGECE4013	Semester 1
AGEC 4031	Resource Economics Project 4B	6	C AGECE4030, AGECE4041 and at least 12 cp from AGECE4033/4034/4035/4036/4037. N May not be counted with AGECE4012 or AGECE4013	Semester 2
AGEC 4041	Research Methods 4	4	P AGECE2003 and AGECE2005 N AGECE3004	Semester 1

2. Undergraduate degrees

ENVI 3003	Law and the Environment	4	P Entry by permission of Course Coordinator only. N ENVI 3001. NB: Department permission required for enrolment. This unit of study is available to Study Abroad students and students enrolled in the Bachelor of Science (Marine Science), Bachelor of Resource Economics and Bachelor of Land & Water Science only.	Semester 1
ECON 3000 level (option)				
Plus at least 12 credit points chosen from Table 3 below, and additional unit(s), if necessary, chosen from Table 2 below.				
Elective units of study in the BResEc degree				
Table 1: Electives for Year 3 students				
Units of study in the following discipline areas (level 2 unless otherwise specified):				
Agricultural Economics (level 3)				
Agricultural Chemistry				
Animal Science				
Biology				
Chemistry				
Crop Science				
Economics (level 2 or 3)				
Environmental Science				
Geography (level 2 or 3)				
Geology				
Land and Water Science				
Mathematics				
Marine Science				
Resource Economics (level 3)				
Soil Science.				
Table 2: Electives for Year 4 students				
Units of study in the following discipline areas (level 2 or 3 unless otherwise specified):				
Agricultural Economics (level 3 or 4)				
Agricultural Chemistry				
Animal Science				
Biology				
Chemistry				
Crop Science				
Economics				
Environmental Science				
Geography				
Geology				
Land and Water Science				
Mathematics				
Marine Science				
Resource Economics (level 3 or 4)				
Soil Science.				
Table 3: Resource Economics electives for Year 4 students				
AGEC 4036	Water Economics 4	4	P AGE3031 or AGE3002 N AGE4005	Semester 1b
AGEC 4037	Benefit Cost Analysis 4	4	P AGE3031 or AGE3002 N AGE4005	Semester 1a
AGEC 4033	Minerals and Energy Economics 4	4	P AGE3031 or AGE3002 N AGE4005	Semester 2b
AGEC 4035	Environmental Economics 4	4	P AGE3031 or AGE3002 N AGE4005	Semester 2a

Bachelor of Science in Agriculture

<i>Unit of Study</i>	<i>CP</i>	<i>A: Assumed knowledge P: Prerequisites Q: Qualifying C: Corequisites N: Prohibition</i>	<i>Session</i>
The degree of Bachelor of Science in Agriculture is available for those wishing to cover the whole field of agricultural science. Regulations governing candidature for the BScAgr degree are set out in the resolutions (see chapter 8). The degree requires a minimum time of four years. The units of study prescribed are summarised below.			
Year 1 (commenced 1995, revised 1997, 2004)			
The normal load is 48 credit points of the core units listed.			
AGEC 1006	Economic Environment of Agriculture	6	A HSC Mathematics N AGE1003, AGE1004.
			Semester 1

BIOL 1001	Concepts in Biology	6	A No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. N BIOL (1101 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Summer, Semester 1
or				
BIOL 1101	Biology - Ecosystems to Genes	6	P HSC 2-unit Biology or equivalent. N BIOL (1001 or 1901) NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
or				
BIOL 1901	Biology - Ecosystems to Genes (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1001 or 1101) NB: Department permission required for enrolment. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.	Semester 1
CROP 1001	Agricultural Science 1A	6	A HSC Chemistry N HORT1001, LWSC1001	Semester 1
BIOL 1002	Living Systems	6	A HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. N BIOL1902	Semester 2
or				
BIOL 1902	Living Systems (Advanced)	6	P UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. N BIOL (1002 or 1904 or 1905) NB: Department permission required for enrolment.	Semester 2
BIOM 1003	Biometry 1	6	A 70 or more in HSC Mathematics	Semester 2
CROP 1002	Agricultural Science 1B	6	C CROP1001 N HORT1002, LWSC1002	Semester 2
And 12 credit points of First year Chemistry.				
CHEM 1001	Fundamentals of Chemistry 1A	6	A There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. N CHEM 1101 or 1901 or 1903 or 1905 or 1906 or 1909	Semester 1
CHEM 1002	Fundamentals of Chemistry 1B	6	P CHEM (1001 or 1101) or equivalent N CHEM (1102 or 1902 or 1904 or 1907 or 1908)	Semester 2
Or				
CHEM 1901	Chemistry 1A (Advanced)	6	P UAI of at least 96.4 and HSC Chemistry result >80, or Distinction or better in a University level Chemistry unit, or by invitation C Recommended concurrent unit of study: 6 credit points of Junior Mathematics N CHEM (1001 or 1101 or 1903 or 1905 or 1906 or 1909) NB: Department permission required for enrolment.	Semester 1
CHEM 1902	Chemistry 1B (Advanced)	6	P CHEM (1901 or 1903) or Distinction in CHEM1101 or equivalent C Recommended concurrent unit of study: 6 credit points of Junior Mathematics N CHEM (1002 or 1102 or 1904 or 1907 or 1908) NB: Department permission required for enrolment.	Semester 2
Year 2				
The normal load is 48 credit points of the core units listed.				
BIOM 2001	Biometry 2	6	P BIOM1003 or equivalent	Semester 1
GENE 2001	Agricultural Genetics 2	6	P BIOL1201 and BIOL1202 or BIOL1001 and BIOL1002, BIOM1001	Semester 1, Semester 2

2. Undergraduate degrees

PLNT 2001	Applied Plant Biochemistry	6	P 12 credit points of Junior Chemistry and 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 N PLNT2901, AGCH2001.	Semester 1
or				
PLNT 2901	Applied Plant Biochemistry (Advanced)	6	P A Distinction average in 12 credit points of Junior Chemistry and 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 N PLNT2001, AGCH2001	Semester 1
SOIL 2003	Soil Science 2	6		Semester 1

3. Undergraduate units of study

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Bachelor of Agricultural Economics
Bachelor of Horticultural Science
Bachelor of Land and Water Science
Bachelor of Resource Economics
Bachelor of Science in Agriculture

Accounting in the Bachelor of Agricultural Economics

In addition to the units of study listed after this entry, the Discipline of Accounting and Business Law in the Faculty of Economics and Business offers the following level 3000 units. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- ACCT3003 Financial Statement Analysis
- ACCT3004 Auditing
- ACCT3005 IT Assurance and Control
- ACCT3006 eCommerce Business Models..

ACCT 1001 Accounting IA

6 credit points. **Session:** Semester 1, Semester 2. **Classes:** Three hours of lectures/tutorials. **Assumed Knowledge:** HSC Mathematics. **Assessment:** Mid-semester exam, Tutorial assignments, Research assignment, Practice Set, Final exam.

NB: Restricted entry

Introduces accounting and the double entry system of financial recording. Students are introduced to the skills necessary to prepare, interpret and analyse financial statements. Examines assumptions underlying the preparation of financial statements for external users. Development of skills necessary to understand, discuss, analyse and write about accounting-related topics. Designed as an introduction to accounting. No prior knowledge of accounting assumed.

ACCT 1002 Accounting IB

6 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** Three hours of lectures/tutorials. **Prerequisites:** ACCT1001. **Assessment:** Continuous assessment based on cases and problems that address relevant commercial and ethical issues. Assessment is on an individual and group basis including class presentations. Assessment also includes a final examination.

NB: Restricted entry

Accounting is about the recording, classification, reporting and interpretation of information to help make economic decisions. Accounting 1A introduces accounting and the double entry system for financial recording. Accounting 1B develops themes and competencies learnt in Accounting 1A. The primary focus of this unit of study is on conceptual and technical issues relating to management accounting and the information required by internal users to make strategic and operational decisions relating to managing a business. A second theme is the financial accounting information businesses are required to produce to assess a firm's financial state and performance. Students examine how commercial and ethical issues affect business decisions and how there are present and future consequences that will affect different groups of interest.

ACCT 1003 Financial Accounting Concepts

6 credit points. **Session:** Semester 1. **Classes:** Two lectures per week. **Assessment:** Group assignment; Mid-semester exam; Final exam.

Provides an introduction to the concepts underlying "external" accounting and is designed for students who are not majoring in accounting. The unit utilises a transaction-effect approach to the preparation of financial statements with basic bookkeeping minimalised. Accounting-method choices are analysed for their effect on the financial statements, and, thus, on decision-making.

ACCT 1004 Management Accounting Concepts

6 credit points. **Session:** Semester 2. **Classes:** 3 hours of lectures - one 2hr lecture and one 1 hour lecture per week. **Assessment:** Mid-semester exam; Final exam; Progressive assessment.

This unit is designed to explain how managers use accounting information, with an emphasis on identifying relevant accounting information for decision-making. Topics include: estimating cost functions, relevant costing, cost allocation, budgeting, short and long term decision making and managing within a changing environment.

ACCT 2001 Financial Accounting A

8 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** Three hours of lectures/tutorials. **Prerequisites:** ACCT1001, ACCT1002 and ECMT1010. **Assessment:** Quizzes; Presentation; Research project; Final exam.

This unit examines the accounting and reporting practices of reporting entities, particularly listed public companies. Emphasis is placed on developing an understanding of, and the ability to critically evaluate, the various regulatory requirements (professional and statutory) governing financial reporting. The unit commences with an overview of the financial reporting environment and theories that seek to explain the accounting policy choices of management. This framework provides a basis for examining a range of specific issues in financial accounting. Emphasis throughout the unit is on both the application of specific accounting techniques/rules and the conceptual/theoretical issues associated with alternative accounting methods.

ACCT 2002 Management Accounting A

8 credit points. **Session:** Summer, Semester 1. **Classes:** Three hours of lectures/tutorials. **Prerequisites:** ACCT1001 and ACCT1002. **Assessment:** Continuous assessment and final examination.

This course provides students with an introduction to the basics of management/cost accounting. Areas specifically covered include: cost terms and purposes, cost behaviour, cost-volume-profit analysis, cost estimation, basic and alternative product costing methods (including activity-based costing), detailed study of the mechanics of the budgeting process (master budgets, flexible budgets, standard costing and variance analysis), decision making using relevant costs/revenues and cost allocation.

ACCT 3001 Financial Accounting B

8 credit points. **Session:** Semester 1, Semester 2. **Classes:** Three hours of lectures/tutorials. **Prerequisites:** ACCT2001. **Assessment:** Mid-semester examination; Tutorial assessment; Case studies; Final exam.

This unit aims to provide students with an understanding of the issues and a working knowledge of the techniques that relate to certain advanced topics in financial reporting. Topics include accounting for a company's investments in subsidiaries, joint ventures and associates, segment reporting for diversified operations and disclosures in relation to corporate governance and related party transactions. Specific accounting issues in relation to group accounting include recognition and measurement of goodwill and outside equity interests, foreign currency transactions and translation, equity accounting and consolidated statements of cash flow. This unit attempts to develop students' understanding of disclosure and valuation issues in accounting and their ability to understand and critically evaluate current issues in accounting regulations and practice.

ACCT 3002 Management Accounting B

8 credit points. **Session:** Semester 2. **Classes:** Three hours of lectures/tutorials. **Prerequisites:** ACCT2002. **Assessment:** Continuous assessment and final examination.

Management Accounting B deals with the theory and practice of a selection of contemporary management accounting issues. The course begins by examining the influences that impact upon the design of an organisation and its management accounting system. Behavioural factors, rather than technical factors, are highlighted and a range of organisational settings and management levels are reviewed. The unit then examines advanced issues relevant to operational management accounting. While this section of the course builds on the foundations laid in Management Accounting A, the focus remains on the behavioural implications of accounting techniques for making decisions in organisations.

AGCH 2003 Rural Environment Chemistry (Intro)

6 credit points. Dr Caldwell. **Session:** Semester 1. **Classes:** 3 lec/week and 33 hours of lab/semester. **Prerequisites:** 12 credit points of Junior Chemistry. **Assessment:** One 2 hr exam, prac & quizzes.

This introductory unit of study consists of aspects of chemistry relevant in studies of basic and applied biological sciences including agriculture, food and the rural environment. Lecture topics include an introduction to quantitative aspects of biophysical, environmental and aquatic chemistry with particular reference to protocols for specimen sampling and maintenance of specimen quality; the principles of basic analytical methods such as spectroscopy, chromatography and electrochemistry; environmental aspects of water such as thermal properties and its behaviour as a solvent of hydrophobic

3. Undergraduate units of study

solutes, surfactants, neutral hydrophilic solutes, salts and other electrolytes, and gases. The lectures will also include environmental nutrient cycling (C, N, S, O, P, micronutrients) with reference to pesticides, herbicides, organic and inorganic pollutants affecting agricultural produce and the environment, and gases of environmental concern.

Eleven laboratory sessions will demonstrate aspects of analytical chemistry including: elemental analysis of foods and natural waters, spectrophotometry, chromatographic techniques, preparation of buffers, fundamentals of pH and conductance measurement, water as a solvent including the effect of surfactants and electrolytes. Students will analyse natural water samples using the skills acquired in earlier laboratory and write an environmental assessment from their findings. The introductory laboratory session for the unit will include a tutorial on safety procedures in a chemistry laboratory.

AGCH 2004 Agricultural Chemistry

6 credit points. Dr Caldwell (Coordinator), Prof Fraser. **Session:** Semester 1. **Classes:** 3 lec/wk. **Prerequisites:** CHEM1405. **Assessment:** One 2hr theory exam, one 1 hr theory of prac exam, lecture quizzes, laboratory reports.

This introductory unit of study consists of aspects of chemistry relevant in studies of basic and applied biological sciences including agriculture, food and the rural environment. Lecture topics include an introduction to quantitative aspects of bio-analytical chemistry; the principles of basic analytical methods such as spectroscopy, chromatography and electrochemistry; environmental aspects of water such as its behaviour as a solvent of hydrophobic solutes, surfactants, neutral hydrophilic solutes, salts and other electrolytes, and gases. A component of the unit will be devoted to basic biological chemistry and enzymology having particular emphasis on biochemical processes in animals.

Seven laboratory sessions will demonstrate aspects of analytical chemistry including: elemental analysis of foods and natural waters, spectrophotometry, chromatographic techniques, preparation of buffers, fundamentals of pH measurement. A further three or four laboratory sessions will demonstrate some features of biological polymers and some fundamental properties of enzymes.

AGCH 3016 Agricultural Biotechnology 3

4 credit points. Assoc. Prof. P J Sharp. **Session:** Semester 2. **Classes:** (2lec/wk, 6 tutorials, 5x4h practicals). **Assumed Knowledge:** AGCH2002, GENE2001, MICR2101, ANSC2002 and CROP2001, or the equivalent of these units. **Assessment:** Assignments (20%), 1 x 2hr exam (60%) Practical Book (20%).

The unit develops a basic understanding of the principles, practice and applications of biotechnology related to agricultural and environmental sciences. Students are introduced to the principles of molecular biology, recombinant technology, transformation of plants and animals, molecular diagnostics, bioinformatics and issues concerning bioethics. The theory of biotechnology is integrated into practical and tutorial sessions. Case studies will be drawn from the plant and animal sciences, bioremediation and gene therapy areas.

AGCH 3020 Chemistry & Biochemistry of Ecosystems A

4 credit points. Prof Kennedy (Coordinator), Dr Caldwell, Prof Copeland. **Session:** Semester 2. **Classes:** 3 lec & 1 tut/wk. **Prerequisites:** AGCH (2001 or 2002) or CHEM (2001 or 2101 or 2202 or 2301 or 2302 or 2902) or BCHM (2002 or 2902) or ENVI (2001 or 2002). **Assessment:** One 2-hr exam (60%), assignments and quizzes (40%).

This unit of study aims to give students an understanding of the chemical and biochemical processes in ecosystems. The lecture topics cover:

- * the biological carbon cycle - bioenergetics of autotrophy and heterotrophy, photosynthesis, fermentation, eutrophication;
- * the mineral nutrient cycles, uptake and utilization by organisms; pH balancing;
- * the biological nitrogen cycle - ammonification, nitrification of ammonia, denitrification of nitrate, nitrogen fixation, ammonia and nitrate assimilation;
- * the biological sulphur cycle - sulphate assimilation, sulphate reduction and dissimilation in soil and water;
- * the role of the nitrogen and sulphur cycles in the acidification of ecosystems; effects of acidification on plants and animals;
- * pesticides and herbicides, modes of action, metabolism and detoxification; environmental chemistry and fate of pesticides; the design of new pesticides and means of pest control;
- * heavy metals and plants, mechanisms of tolerance, hyperaccumulators, halophytes.

The tutorials are designed to provide students with an insight into environmental issues and methods for monitoring and remediation of contaminants including heavy metals and pesticides.

AGCH 3025 Chemistry and Biochemistry of Foods A

6 credit points. Dr Caldwell. **Session:** Semester 1. **Classes:** 3 lec/wk, 8 x 3 hr prac per semester. **Prerequisites:** 6 credit points of Intermediate units in Agricultural Chemistry,

Chemistry or Biochemistry. **Assessment:** One 2 hr theory exam, one 1 hr theory of prac exam, assignment and prac reports.

This unit of study aims to give students an understanding of the constituents of foods and fibres. The lecture topics cover:

- the chemistry, biochemistry and processing behaviour of major food constituents - oligosaccharides, polysaccharides, lipids and proteins;
- the relationship between molecular structure of constituents and their functionality in foods;
- natural fibres and gel-forming biopolymers - uses in foods, importance in dietary fibre and commercial products;
- enzymes in foods and food processing;
- wheat flour dough and protein chemistry during baking and cooking;
- anti-nutritional and toxic constituents of plants and foods; and
- flavour chemistry

The laboratory exercises aim to give students an understanding of the methods used in the analysis of foods and other biological materials, and will include:

- analysis of carbohydrates including starch and dietary fibre;
- spectroscopic, enzymic, and chromatographic methods.

AGCH 3026 Chemistry and Biochemistry of Foods B

6 credit points. Dr Caldwell. **Session:** Semester 1. **Classes:** 2 hr lec/seminar/workshop/wk; 24 hrs of prac/semester; site visits. **Prerequisites:** 6 credit points of Intermediate Chemistry, Biochemistry or Agricultural Chemistry. **Corequisites:** AGCH 3025. **Assessment:** Five written assignments, one 1 hr theory of prac exam, prac reports and poster presentation.

This unit of study aims to give students an understanding of global food systems and global food security. In the lecture/seminar/workshop component, topics covered will include the sustainable production of major food crops; the role of genetically modified crops in food sustainability and quality; principles and methods in food quality control and assessment; chemical and biochemical aspects of food quality in relation to food processing and nutritional values. The laboratory exercises aim to give students an understanding of the methods used in the analysis of foods and other biological materials, and will include:

- analysis and examination of protein functionality in foods;
- spectroscopic, enzymic, and chromatographic methods.

AGCH 3030 Rural Environmental Chemistry A

6 credit points. Prof Kennedy (Coordinator). **Session:** Semester 1. **Classes:** 6 day field trip in orientation week, 21 hr lec & 25 hr prac. **Prerequisites:** 6 credit points of either Intermediate Agricultural Chemistry, Chemistry, Biochemistry, Plant Science or Environmental Science. **Assessment:** One 2 hr exam, field trip and laboratory reports.

This unit commences with a field trip to the Namoi and the Macquarie Valleys, where agriculture largely based on irrigation has been developed. Environmental impacts on vegetation, soil and water of agricultural enterprises such as cotton farming and human settlement will be assessed in a professional field trip report. Field observations on pH, nutrient and salt content, pesticide, and microbial content will be made on water, sediment, soils and in constructed wetlands, with samples returned for more detailed laboratory analysis at the University. Lectures will complement the field trip, including environmental chemistry of heavy metals, their effects on organisms; mechanisms of tolerance and phytoremediation; risk assessment of pesticides including herbicides, their mode of action and environmental fate; analysis and monitoring of pesticide residues by GC, GC-MS and immunoassay (ELISA); maximum residue limits (MRLS) and residue surveys; remediation of pesticides in ecosystems; design of new pesticides and means of pest control. Laboratory sessions will be related to these lecture topics, including 6-7 sessions on atomic absorption analysis for nutrients and heavy metals, mercury analysis, pesticide analysis by GLC, HPLC, MS and ELISA.

AGCH 3031 Rural Environmental Chemistry B

6 credit points. Prof Kennedy (Coordinator). **Session:** Semester 2. **Classes:** 5-day field trip in AVCC common break; 21 hr lec and 30 hr prac and project/semester. **Prerequisites:** 6 credit points of either Intermediate Agricultural Chemistry, Chemistry, Biochemistry, Plant Science or Environmental Science. **Assessment:** One 2 hr exam, field-trip report and laboratory reports.

This field-oriented course will (i) provide understanding of chemical and biochemical processes in rural ecosystems and their sustainability, with particular reference to global warming, (ii) include a field trip and professional report to illustrate relevant case studies at several centres in eastern Australia (Canberra, Snowy Mountains, Murray and Murrumbidgee catchments) specialising in research related to global warming, acidification and water quality including salinisation (iii) conduct laboratory sessions and group research project to study a problem in a professional setting. Practical solutions will be sought by students, based on a field theory of action in ecosystems. Lectures will cover the environmental carbon, nitrogen and sulphur cycles, including bioenergetics of autotrophic and heterotrophic action; photosynthesis; nitrification and denitrification;

biological nitrogen fixation; sulphur metabolism; production of greenhouse gases; pH balancing and efficient nutrient uptake; acidification of ecosystems and effects on plants and animals; remediation and control of greenhouse emissions; bioremediation of acidification and salinisation. The laboratory sessions and the group project will illustrate these environmental processes, including greenhouse gas production, methane and NO_x, photosynthesis and nitrogen fixation, and monitoring of endocrine-disrupting compounds including pesticides using GLC, HPLC and ELISA.

AGCH 4002 Agricultural Chemistry 4A

24 credit points. Prof Kennedy, Prof Copeland, Dr Caldwell. **Session:** Semester 1. **Classes:** February. **Prerequisites:** AGCH3017 and AGCH3018 or AGCH3020 and AGCH3021 or AGCH3030 and AGCH3031. **Corequisites:** AGCH4003.

This is made up of the following six credit point modules or other third-year 6 cp units of study or modules approved by the student supervisor and Discipline Leader.

Principles of Chemical Instrumentation & Analysis

6 credit points. Coordinator: Dr Caldwell, Prof Kennedy. Offered: March. **Classes:** (28 hr lec, tutorials and demonstrations, & 50 hr prac). **Assessment:** One 2hr exam, laboratory reports and open book tests.

Lecture, reading list and laboratory topics include the theory and practice of advanced instrumentation and analytical techniques for raising the quality of agricultural products and the environment.

Principles and Practice of Enzymology

6 credit points. Coordinator: Prof Copeland, Prof Kennedy, Dr Caldwell. Offered: March. **Classes:** (18 hr lec, 60 hr prac and demonstrations). **Assessment:** One 2hr exam, assignment and laboratory reports.

Lecture, reading list and laboratory topics will include the theory and practice of enzymology including enzyme kinetics, mechanisms of enzyme catalysis, enzyme purification and study of functional properties.

Action in Rural Ecosystems

6 credit points. Coordinator: Prof Kennedy. Offered: March. **Classes:** (18 hr lec & 60 hr prac and demonstrations). **Assessment:** One 2hr exam, laboratory reports and open book tests.

Lecture, reading list and laboratory topics will cover action theory related to chemical and physical changes in action state in the environment, calculation of entropy and equilibrium from action theory, action and statistical mechanics, rates of non-equilibrium processes, action in agricultural meteorology and global warming, morphogenetic action in rural landscapes, plants and animals and the limits to productivity and yield.

AGCH 4003 Agricultural Chemistry 4B

24 credit points. **Session:** Semester 2. **Corequisites:** AGCH4002.

Research Project: Students carry out a research project under close supervision of a member of staff. Projects are usually available in one of the following areas of research interest: carbon and nitrogen metabolism in a variety of crop plants; biological nitrogen fixation and inoculant biofertilisers; applied enzymology; soil and water contamination by agrochemicals or heavy metals and their phyto- or bioremediation; risk assessment and environmental fate of agrochemicals; immunodiagnosics for monitoring pesticides and mycotoxins. **Assessment:** initial presentation, literature review, final presentation, thesis.

AGEC 1001 Agricultural Economics 1A

6 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk. **Assumed Knowledge:** HSC Mathematics. **Assessment:** One 2hr exam, one essay, assignments.

An introductory unit of study serving as a foundation for other units in agricultural and resource economics. The basic structure and nature of the resource and agricultural industries are outlined. Basic economic principles as they relate to the management of production in these sectors are introduced and illustrated both graphically and mathematically. Topics will include: the changing structure of the Australian agricultural and resource sectors; their international context; problems of structural adjustment and technical change; government intervention; the economic, physical and biological environment in which farm firms operate; principles of resource allocation; basic farm accounts and budgets, and farm risk management. Students are expected to make use of computers in completing class work submitted for assessment.

AGEC 1002 Agricultural Economics 1B

6 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 workshop)/wk. **Assumed Knowledge:** HSC Mathematics. **Corequisites:** AGECE1001. **Assessment:** One 2 hr theory exam, one 0.5 hr practical exam, one essay, assignments.

The unit focuses on the analytical formulation and numerical solution of empirical microeconomic problems in agriculture and the resource industries. Topics include: the measurement of the social value of alternative market equilibria; Marshallian surpluses and their limitations as measures of welfare; the rationale for and extent of government intervention in Australian and world agriculture. A wide range of problems in agriculture and resources is examined, with emphasis on formulating problems analytically and obtaining related numerical solutions. Computing workshops develop skills in using spreadsheets to solve numerical problems, and reporting results using a wordprocessor.

AGEC 1006 Economic Environment of Agriculture

6 credit points. Ms Liz Nolan, Ms Lynn Henry. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk, seminars/workshops. **Assumed Knowledge:** HSC Mathematics. **Assessment:** One two hour exam, one assignment, tutorial reports.

This unit of study introduces students to the basic principles of economics and to the major features of the economic environment impacting on and driving farm and off-farm agriculture. Topics discussed include the organization of economies and the role agriculture plays, the industrial structure of Australian agriculture, introductory principles of production economics and farm business management; elementary price theory and the factors affecting the demand and supply of agricultural commodities, nature and behaviour of markets for agricultural commodities; marketing of agricultural products; agricultural trade, resource and environmental management, and the political and administrative institutions affecting Australian agriculture.

6 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 workshop)/wk. **Assumed Knowledge:** Mathematics Extension 1. **Corequisites:** ECON1001. **Assessment:** One 2hr exam, one 0.5 hr practical exam, classwork and assignments.

This unit provides an introduction to the economics of natural resources. Classification of natural resources. History of resource utilisation and industries in Australia. Current significance and issues of natural resources in the Australian and global economies. The role of the economist in analysing resource issues. Resource economics vs general economics. Simple analytics of natural resource economics. Resources considered will include land (eg. agriculture, forestry, minerals and energy, land degradation), water (eg. irrigation, urban, fishing) and the environment (eg. atmosphere, biodiversity, pollution). Includes 2 days of excursion.

AGEC 2001 Commodity Price Analysis 2

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk. **Prerequisites:** AGEC1002 or (AGEC1003 and AGEC1004) or ECON1001. **Assessment:** One 3 hr exam, classwork and assignments.

This unit focuses on the nature of agricultural and resource commodity markets, market demand relationships, market supply relationships, price determination under alternative market structures, marketing margin relationships, derived demand for inputs, spatially and temporally related markets, market dynamics, price expectations, commodity futures markets and other topics. Applied examples from the agricultural and resource industries as well as the overall economy will be used throughout the semester as illustrations of the principles involved.

AGEC 2003 Production Economics 2

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 2 workshop)/wk. **Prerequisites:** AGEC1001 or AGEC1031 or ECON2001 or (AGEC1003 and AGEC1004). **Assessment:** One 3 hr exam, assignments, class work.

Production economics is concerned with production decisions on resource allocation at the firm, industry and economy levels. The topics include: the nature of agricultural resource industry production; production functions; factor substitution; principles of enterprise combination and multi-product production; firm objectives; constrained and unconstrained maximisation; cost functions and other duality relationships; economies of scale and size in farming; input demands and dual relationships; production over time; productivity and technical change; production under risk and the illustration of the principles involved through the use of practical applications and exercises involving both the agricultural and resource industries. In addition, basic decision analysis will be introduced including basic concepts of probability; concepts of utility; utility functions and elicitation of preferences.

Textbooks

D.L. Debertin Agricultural Production Economics (Macmillan, 2000) J. P. Doll and F. Orazem Production Economics: Theory with Applications (Wiley, 1984) Reference Books J.R. Anderson et al Agricultural Decision Analysis (Iowa State UP 1977)

AGEC 2005 Applied Commodity Modelling 2

4 credit points. **Session:** Semester 1. **Classes:** (2 lec & 1 tut/lab session)/wk. **Prerequisites:** (ECMT1010 and ECMT1020) or (MATH 1001 and 1002 and 1003 and 1005). **Assessment:** One 1 hr exam, one 1 hr prac exam, assignments.

The unit focuses on the concepts and basic procedures of regression analysis and the application of these methods to the analysis of economic data in the agricultural and resource sectors. Review of concepts of estimation and hypothesis testing. Simple regression model. Estimation and testing under classical assumptions. Multiple regression models and ordinary least squares estimation and testing under classical assumptions. Dummy variables. Lag variables. Deterministic model mis-specification. Single vs simultaneous equation models. Uses and limitations of graphical data analysis. Common departures from classical assumptions, their implications for estimation and improved methods of estimation. Students will learn the concepts and methods and develop skills in formulating and estimating models.

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 2 workshop)/wk. **Prerequisites:** AGEC2003 or (AGEC1003 and AGEC1004). **Assessment:** One 2hr exam, assignments.

This unit of study is designed to introduce the economic principles and techniques of business management as they apply to farm and agribusiness firms. The topics covered will include: management goals and objectives; budgeting; gross margins analysis; parametric budgeting; sources of management information and its analysis; simple systems simulation; applications of linear programming to farm and agribusiness planning; financial management; risk in planning and management; cash, credit, debt and taxation management; evaluation of investment and firm growth alternatives; acquisi-

tion and transfer of assets; the role of financial institutions in the rural credit market.

4 credit points. **Session:** Semester 1. **Classes:** (2 lec & 1 lab)/wk. **Prerequisites:** AGEC2003 and (AGEC2002 or AGEC2005) or (AGEC2006 and AGEC2007) or ECMT2021. **Assessment:** One 1.5 hr exam, assignments.

This unit deals with the nature of research and inquiry in applied economics. Topics covered will include: alternative philosophical perspectives on inquiry; scientific method; inductive thought and deductive logic; creativity; research as an orderly process of enquiry; preparation of research proposals; secondary data sources for agricultural and resource economists; collection of primary data; statistical design of sample surveys; questionnaire construction; interviewing techniques; and methods of analysis of survey data. Topics are illustrated with examples of research in theoretical economics, empirical discipline-advancing research, empirical exploratory research, and research using policy-evaluation modelling.

AGEC 3031 Resource Economics 3

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 2hr workshops)/wk. **Prerequisites:** AGEC2003. **Assessment:** One 2.5 hr exam, assignments.

This unit has two components. The first part deals with unpriced goods and services, how such goods and services arise as externalities, their implications for the efficiency of resource allocation, and methods of valuation to direct improved resource allocation. Examples will be drawn from environmental management. The second part of the unit deals with optimisation concepts and methods including the dynamic optimisation of natural resource use. It covers the mathematical formulation of the problem of optimal use of renewable and finite non-renewable resources over time, the nature and economic interpretation of optimality conditions, and numerical methods for identifying optimal solutions. Example applications may include mining, forest rotations, waste absorptive capacity, recruitment and harvesting of natural populations.

AGEC 3032 Introductory Land and Water Economics 3

4 credit points. **Session:** Semester 1a, Semester 1b. **Classes:** 4hr lec/wkshp/wk (8 wks). **Assessment:** Essay, classwork, 0.5 hr exam.

An overview is provided of the economic analysis of resource use, and its importance to the consideration of many environmental problems. Initial lectures sketch economic principles for analysing production and consumption, and applying these principles to land and water use. Property rights and time are focused on as key areas where basic economic principles require expansion in a natural resources context. These principles are then applied to benefit-cost analysis; economics of pollution; and optimising use of natural resources over time. These economic principles and tools are used to examine up to six natural resource problems, including: agricultural and urban water supply; blue-green algae; intractable waste; sustainable development; population and food supply; and the enhanced greenhouse effect. Workshops complement this theory.

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk. **Prerequisites:** AGEC2001 or (ECON2001 and ECON2002) or (ECON2901 and ECON2902). **Assessment:** One 2hr exam, assignments.

In this unit of study the basic economic principles underlying international trade in agricultural and resource commodities and the policies involved will be presented. Issues related to trade and development will also be considered. The main topics covered will include: trends in agricultural and resources trade; trade policies of importing and exporting nations, including issues such as food aid and surplus disposal programs; economic integration and impacts on international commodity trade; international trade policy making, including GATT and WTO; the impact of exchange rates and other macroeconomic variables on international trade in commodities.

AGEC 4004 Applied Marketing

8 credit points. **Session:** Semester 2. **Classes:** (2 lec & 2 tut)/wk. 3-5 excursions. **Prerequisites:** AGEC2001 or (AGEC1003 & AGEC1004) or ECON2001 or ECON2901. **Assessment:** One 2hr exam, assignments.

This unit of study is designed to provide an understanding of agricultural marketing. It emphasises firm-level marketing mix and marketing strategy decision making, marketing management and planning, market research and information, futures market and other risk sharing devices. The unit of study will also address the organisation and trends of food and fibre marketing in Australia, food and fibre industrial marketing including value-adding and market power in the supply chain, market efficiency and international marketing by agribusiness firms. The unit content is analytical, and draws heavily on applied microeconomics.

The unit will provide an understanding of marketing environment, agricultural marketing system, agribusiness marketing management, and organisation and management of marketing functions. Case studies of actual Australian and international agribusiness firms/industries will be utilised throughout the unit to illustrate the principles of marketing. The focus of workshops and tutorials this semester will be on supply chains.

The main learning outcomes of the unit are to grasp the fundamental concepts in marketing theory and apply them to the agribusiness industry, to further enhance students' analytical abilities in agricultural marketing and to foster their understanding of supply chains.

AGEC 4005 Environmental and Resource Economics

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 tut)/wk. **Prerequisites:** (AGEC2001 and AGEC2003) or (ECON2001 and ECON2002). **Assessment:** One 2 hr exam, assignments.

A unit of study in natural resource economics of relevance to agriculture and the resource industries. Issues discussed are: the environment as a source of environmental services; socially efficient resource allocation and Pareto welfare economics; market failure and

characteristics of environmental services; externalities, pollution, congestion; benefit cost analysis of public projects, including the modification of environmental services; non-depletable resources; depletable resources; irreversibility; sustainability. Applications include land degradation, fisheries, forestry, land-use planning and the enhanced greenhouse effect.

8 credit points. **Session:** Semester 1, Semester 2. **Classes:** 1 tut/wk. **Assessment:** One 2hr exam, assignments/essays, term paper.

NB: Department permission required for enrolment.

This unit deals with the specialised areas of agricultural and resource economics of particular interest to approved students. The student will read under the guidance of a member of staff and complete designated learning tasks.

AGEC 4008 Quantitative Planning Methods 4

4 credit points. **Session:** Semester 1a. **Classes:** (3 lec & 1 tut/lab session)/wk for first 7 weeks of semester. **Prerequisites:** AGEC2003. **Corequisites:** AGEC3001 or AGEC3031. **Assessment:** One 1.5 hr exam, assignments.

This unit examines the use of formal optimization methods at both the individual firm level and the sectoral level. Sectoral level planning applications considered include transportation and plant location studies; spatial equilibrium analyses; input-output analysis and computable general equilibrium analysis. Firm level applications include multi-period planning, queuing problems, inventory analysis, and replacement problems.

The first component of this unit is focused on concepts of risk measurement, risk attitudes and decision making under risk. Topics include: subjective probability, adjusting beliefs as a result of new information; alternative measures of risk; decision making under risk; expected utility theory; valuing information; stochastic dominance; E-V analysis; generalizations of expected utility theory; analysis of in-firm measures to cope with risk including diversification and flexibility; elements of quadratic programming; insurance, futures, options and other market instruments for managing risk. The second part examines issues of financial analysis and control. Topics include financial relationships between debt/equity levels and risk, optimal debt levels, cost of capital, investment, and capital budgeting. Financial and risk management practices in Australian agriculture are reviewed.

4 credit points. **Session:** Semester 1. **Classes:** 2 lec/wk. **Corequisites:** AGEC4011 and at least 12 other level 4 AGEC credit points. **Assessment:** One 2 hr exam, assignments.

A series of lectures, seminars and workshops designed to provide students with enhanced professional skills and increased awareness of contemporary issues. Initially, sessions will focus on communication skills, including report writing, preparation of policy briefs,

3. Undergraduate units of study

seminar and workshop presentations. Other sessions will be focussed on aspects of professional ethics, attitudes and responsibilities and leadership. Participatory activities such as team debates and mock inquiry hearings addressing issues of current relevance to agricultural/resource economists are used to develop the student's communication skills and knowledge of issues. Seminars by guest speakers on current issues may be scheduled.

AGEC 4011 **Contemporary Issues 4B**

4 credit points. **Session:** Semester 2. **Classes:** 2 lec/wk. **Corequisites:** AGE4010 and at least 12 other level 4 AGE4010 credit points. **Assessment:** One 2 hr exam, assignments.

This unit continues the series commenced in Contemporary Issues 4A. Through regular seminars by guest speakers and occasional workshops or other participatory activities, students examine a broad range of domestic and international issues of current relevance to Australian agricultural and resource economists.

AGEC 4012 **Research Project 4A**

8 credit points. **Session:** Semester 1. **Prerequisites:** AGE43003 or AGE43004. **Corequisites:** AGE4013 and any other 24 credit points from AGE4010 Level 4000 units. **Assessment:** Thesis or project reports.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on either a single research study (thesis) or several smaller research exercises. For a thesis, students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 25,000 words in length. Students undertaking research exercises typically work on individual and group exercises on three or four successive research topics, each under the guidance of a staff member, and each involving an individual or group report. Students are allocated to the thesis or the exercises form of research training on the basis of available resources and the advice and approval of the co-ordinator for the Research Project.

AGEC 4013 **Research Project 4B**

8 credit points. **Session:** Semester 2. **Prerequisites:** AGE43003 or AGE43004. **Corequisites:** AGE4012 and any other 24 credit points from AGE4010 Level 4000 units. See AGE4012

AGEC 4020 **Agricultural Economics 4A**

24 credit points. **Session:** Semester 1. **Prerequisites:** AGE42001, AGE42003. **Corequisites:** AGE42021 Agricultural Economics 4B.

Agricultural Economics 4A and 4B represent a full year's study of agricultural economics. Through core and elective components (48 credit points minimum), students will study the economic theory and analysis of agricultural markets, trade and policy.

Unless taken as separate units of study in third year,

- (i) the following components must be included:

Agricultural and Resource Policy 3 (8 credit points)

Benefit Cost Analysis 4 (4 credit points)

Research Methods 4 (4 credit points)

Applied Commodity Modelling 2 (4 credit points)

Applied International Trade 4 (8 credit points)

Research Project (8 credit points); and

- (ii) the following units may be included

Agribusiness Management 3 (8 credit points)

Agricultural Finance and Risk Management (4 credit points)

Applied Marketing 4 (8 credit points)

Contemporary Issues 4A (4 credit points)

Contemporary Issues 4B (4 credit points)

Environmental Economics 4 (4 credit points)

Water Economics 4 (4 credit points)

Quantitative Planning Methods 4 (4 credit points)

Up to 8 credit points as approved by the Head of Discipline.

Research Project will involve designing and undertaking a small economics research study under the supervision of a member of staff over two semesters. For contents of other components, see the description of that unit of study. Credit for components completed over the year will be allocated between Agricultural Economics 4A and 4B by the Head of Discipline..

Applied Marketing 4 (8 credit points)

Contemporary Issues 4A (4 credit points)

Contemporary Issues 4B (4 credit points)

Environmental Economics 4 (4 credit points)

Quantitative Planning Methods 4 (4 credit points)

Water Economics 4 (4 credit points)

Up to 8 credit points as approved by the Head of Discipline.

Research Project will involve designing and undertaking a small economics research study under the supervision of a member of staff over two semesters. For contents of other components, see the description of that unit of study. Credit for components completed over the year will be allocated between Resource Economics 4A and 4B by the Head of Discipline.

AGEC 4025 **Resource Economics 4B**

24 credit points. **Session:** Semester 2. **Prerequisites:** AGE42001, AGE42003 and 24 credit points of 3rd year Agr Sc. **Corequisites:** AGE42024.

See AGE42024 Resource Economics 4A.

AGEC 4030 Resource Economics Project 4A

6 credit points. **Session:** Semester 1. **Classes:** Up to 4 hours (Seminars)/wk. **Corequisites:** AGEC4031, AGEC4041 and at least 12 cp from AGEC4033/4034/4035/4036/4037. **Assessment:** 100% on submitted thesis.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting a single research study (thesis). Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 20,000 words in length. Students are allocated to a supervisor on the basis of available resources and the advice and approval of the coordinator for the Research Project.

AGEC 4031 Resource Economics Project 4B

6 credit points. **Session:** Semester 2. **Classes:** Up to 4 hours (Seminars)/wk. **Corequisites:** AGEC4030, AGEC4041 and at least 12 cp from AGEC4033/4034/4035/4036/4037.. **Assessment:** 100% on submitted thesis.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting a single research study (thesis). Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 20,000 words in length. Students are allocated to a supervisor on the basis of available resources and the advice and approval of the coordinator for the Research Project.

AGEC 4033 Minerals and Energy Economics 4

4 credit points. **Session:** Semester 2b. **Classes:** 2 hours/wk (lectures). **Prerequisites:** AGEC3031 or AGEC3002. **Assessment:** 2 essays; one 2 hr exam.

Economics of the exploration for and extraction of minerals and energy, the economics of their commodity markets and use (e.g. forecasting), and interaction with other related resources (e.g. mine site remediation, land use conflicts), recycling, institutional and policy issues (e.g. regulatory reform) and international markets.

J.M. Hartwick and N.D. Olewiler The Economics of Natural Resource Use 2nd edn (Addison-Wesley, 1998)

AGEC 4035 Environmental Economics 4

4 credit points. **Session:** Semester 2a. **Classes:** 2 hours/wk (lectures). **Prerequisites:** AGEC3031 or AGEC3002. **Assessment:** 2 essays; one 2 hr exam.

The course will provide theoretical and empirical background for a resource economist to be able to successfully function when faced with various environmental problems. The unit investigates economic aspects of a range of environmental issues. There will be a tendency to exemplify the studied concepts with environmental problems related to agriculture (soil salinity, algal blooms, overgrazing, etc) as well as with environmental problems typical to Australia. The guiding economic themes will be externalities, market failure, the importance of property rights, optimal allocation of pollution abatement, technical issues (e.g. measuring benefits without commodities [e.g. existence values]), and the processes from making choices relating to non-market goods. Some social issues with environmental impacts are studied through exploration of the problems of population size and distribution, economic growth, and environmental regulation.

AGEC 4036 Water Economics 4

4 credit points. **Session:** Semester 1b. **Classes:** 2 hours/wk (lectures). **Prerequisites:** AGEC3031 or AGEC3002. **Assessment:** 2 essays; one 2 hr exam.

This unit investigates economic aspects of the water industries: irrigation, residential, commercial and industrial uses of water, hydro-electricity generation, stormwater and sewerage. Issues considered include the selection and construction of water storages, aquifer water extraction and alternative water sources; economics of water use, waste water disposal and water quality; changing water technologies; property rights, water pollution, water allocation and water markets, catchment management; water policy reform. Both static and dynamic issues are investigated, and the interactions of water industries and water use with related sectors.

Textbooks

To be advised.

AGEC 4037 Benefit Cost Analysis 4

4 credit points. **Session:** Semester 1a. **Classes:** 2 hours/wk (lectures). **Prerequisites:** AGEC3031 or AGEC3002. **Assessment:** Essays; one 2 hr exam, classwork.

This unit reviews the relationship between welfare economics theory and its practical application in the assessment of the net welfare effects of projects and policy change. Issues covered include marginal and non-marginal changes; the complete specification of project effects (direct & indirect, beneficial & detrimental); appropriate procedures when costs or benefits cannot be measured; the choice of criterion for discriminating amongst projects, including capital-constrained decisions; accounting for benefits and costs over time, and selection of discount rates; uncertainty and risk; comparison of benefit-cost analysis outcomes to those of multi-criteria analysis, financial analysis and regional economic impact assessment.

AGEC 4041 Research Methods 4

4 credit points. **Session:** Semester 1. **Classes:** (2 lec & 1 tut)/wk. **Prerequisites:** AGEC2003 and AGEC2005. **Assessment:** One 1.5hr exam, assignments.

This unit deals with the nature of research and inquiry in applied economics. Topics covered will include: alternative philosophical perspectives on inquiry; scientific method; inductive thought and deductive logic; creativity; research as an orderly process of enquiry; preparation of research proposals; secondary data sources for agricultural and resource economists; collection of primary data; statistical design of sample surveys; questionnaire construction; interviewing techniques; and methods of analysis of survey data. Topics are illustrated with examples of research in theoretical economics, empirical discipline-advancing research, empirical exploratory research, and research using policy-evaluation modelling.

AGRF 4000 Professional Experience

0 credit points. **Session:** Semester 1, Semester 2.

Requirements for the 60 days outlined in 'Regulations'.

AGRF 4001 Special Program 4A

24 credit points. **Session:** Semester 1.

NB: Department permission required for enrolment.

Students may enrol in Special Program after consultation with, and with the approval of, the Dean. This interdisciplinary unit of study structure is available for students who wish to undertake Fourth Year optional units of study combinations which are not offered by any individual department or discipline.

AGRF 4002 Special Program 4B

24 credit points. **Session:** Semester 2.

NB: Department permission required for enrolment.

See Special Program 4A.

AGRO 3001 Agronomy 3

8 credit points. Assoc. Prof. Sutton. **Session:** Semester 1. **Classes:** (3 lec, 3hr prac & 2hr seminar)/wk, [Excursion wk3: one day field practical]. **Prerequisites:** AGRO2002 or CROP1001 or HORT1001 or LWSC1001. **Assessment:** One 2hr exam (40%), assignment (50%), presentations (10%).

This unit of study introduces the principles and practice of the management of vegetation and water resources. The unit will describe the resource base, examine the tools available to manage the resources and address issues of sustainable utilisation of the resources. Crop, pasture and natural ecosystems will provide the focus for the lecture topics. The implications of government regulation of resource utilisation for primary industry and the environment will be discussed. Workshops will provide experience in resource auditing and in the construction and operation of environmental models and decision support systems to see how these techniques aid in resource management. A module of this course will examine the extension and communication of information to rural stakeholders. Practical

3. Undergraduate units of study

sessions will allow students to develop skills in identification of pasture species, assessing pasture productivity and grazing

AGRO 4001 Agronomy 4A

24 credit points. Dr Campbell. **Session:** Semester 1. **Prerequisites:** AGRO3001. **Assessment:** Assessment: 3hr exam, review papers, assignments, practical reports, presentations.

Agronomy is the science of growing plants—from creating on-farm opportunities to environmental protection and ecosystem management. Plant physiology and plant nutrition are addressed with formal lecture and practical session courses while crop agronomy, pasture agronomy and sustainability involve excursions which allow the study of active field situations. Extensive opportunities are provided for field work and a personal research project is part of the program. This can be selected from a wide variety of topics; data may be gathered before or during the academic year.

Core units

Crop Agronomy and Sustainable Management (6 credit points)

Agronomy and Farming Systems (6 credit points)

Crop Nutrition and Physiology (6 credit points)

Research Project and Thesis (24 credit points)

Optional unit (6 credit points)

Optional unit (6 units) eg Precision Agriculture or other approved 6 credit point units, including some second semester third year units.

Crop Agronomy and Sustainable Management

A field-based unit on management of crops with particular reference to (i) cotton and rice; (ii) their farming system—including technical and economic analysis of their management and their roles and restrictions within existing and potential farming systems; and (iii) their end uses, and how to better meet the technical needs of markets.

Agronomy and Farming Systems

This unit explores issues for the sustainable management of farming systems. The course further develops the sustainability concepts introduced in Agronomy 3. This unit will cover the aspects of conventional agriculture that contribute to non-sustainability such as the loss of biodiversity and fertility, soil erosion and degradation, salinity, pesticide residues and resistance. The pastures component covers both sustainable intensive dairy pastures and less intensively managed pastures.

Crop Nutrition and Physiology

The unit develops nutritional principles for agricultural production, food systems and for environmental protection. This course emphasises practical techniques. Practical sessions cover an integrated series of experiments on growth of a crop as affected by nutrition, the physiology of nutrient distribution during growth, diagnosis of nutrient deficiencies, carbon fixation and hydroponics. Students set up and monitor their own nutrition experiment. Nutrient function and its relationship to plant growth, and consultancy problems are emphasised.

Excursions deal with waste management issues in the Sydney region, how useful agricultural products are produced, and utilisation of by-products.

The physiology of crop and pasture plants is an extension of the concepts introduced in Crop Science 2. The impact of environment and management on photosynthesis, respiration, water relations, and plant development will be discussed in relation to the formation of grain or forage, and the quality of major crop and pasture species. The use of instrumentation to measure the physiological responses of plants to stress will be featured in practical sessions.

Research Project and Thesis

Assessment: Literature review and thesis. [Also see AGRO 4002] Supervised research on a topic chosen by the student, in consultation with academic staff, in the area of agronomy. Students are encouraged to commence the research project during summer so that summer crops can be studied.

AGRO 4002 Agronomy 4B

24 credit points. Dr Campbell. **Session:** Semester 2. **Prerequisites:** AGRO3001.

Corequisites: AGRO4001.

See AGRO4001 Agronomy 4A which also includes reference to the research project and thesis.

ANSC 2002 Animal Science 2

6 credit points. Mrs I van Ekris, Dr M Hyde, Prof Maxwell, A/Prof R Taylor, Dr J Downing, A/Prof P Wynn, A/Prof D Evans, Dr M Collier, Dr D McNeill. **Session:** Semester 2. **Classes:** (1 lec and 2hr practical/tut) per week and 6 full days of seminars during semester. **Prerequisites:** CROP1001 and CROP1002 or HORT1001 and HORT1002 or LWSC1001 and LWSC1002. **Assessment:** One exam (35%), assignments. The unit of study is an integrated one designed to cater for students terminating studies in animal sciences at the end of Second Year and to provide the basis for students intending to specialise in animal production in later years. The classes will be as outlined below:

Animal Industries: A series of lectures which describes the characteristics of the animal production industries. Lectures will be reinforced by practical classes to be held at Camden.

Animal Structure and Function: A series of lectures, tutorials and practical classes which develop students understanding of the structure and function of agricultural animals.

Textbooks

W.O. Reece *Physiology of Domestic Animals* (Lea and Febiger, 1991) P. McDonald et al. *Animal Nutrition* 4th edn (Longman Scientific & Technical, 1988)

ANSC 2003 Animal Science 2 for Agr Economics

4 credit points. Mrs I van Ekris, Dr Hyde, Prof Maxwell, Dr J Downing, Camden staff. **Session:** Semester 2. **Classes:** 7 full day sessions integrating practical and theoretical aspects of animal production. **Assessment:** One exam, one assignment, a series of practical tasks.

A series of lectures which describes characteristics of the animal production industries—locations, breeds of animals, management practices, products, marketing. Lectures and practical classes form a portion of the unit of study Animal Science 2 undertaken in the BScAgr degree.

ANSC 3001 Animal Nutrition 3

8 credit points. Dr Hyde, Prof D Fraser. **Session:** Semester 2. **Classes:** 12hr tut, 12 pracs, 2 excursions, 18hr project. **Prerequisites:** ANSC2002. **Assessment:** One 2hr exam (25%), a case report (15%), a discussion paper (25%) and a student project (group and individual work) (35%).

This unit comprises an integrated series of lectures, tutorials and practical classes which are directed towards the assessment of nutritional adequacy and the avoidance and solving of nutritional problems. Topics covered include the composition of feeds, the digestibility and efficiency of utilisation of nutrients by the animal, the requirement of the animal for nutrients and interactions between nutrients that influence health and production.

Textbooks

P. McDonald et al. *Animal Nutrition* 5th edn (Longman Scientific and Technical, 1995) Others to be advised

ANSC 3002 Animal Reproduction 3

8 credit points. Prof G Evans, Prof Maxwell. **Session:** Semester 1. **Classes:** (3 lec)/wk; 52hr prac, 13hr tut. **Prerequisites:** ANSC2002. **Assessment:** One 3hr written exam (60%), prac (20%) assignments (20%).

A comprehensive program on basic and applied male and female reproductive biology with particular emphasis on domestic animals. The unit of study includes reproductive cycles, sexual differentiation, fertilisation, development, gestation and parturition. Applied aspects include tuition on semen collection and processing, control and management of reproduction, artificial insemination, embryo transfer, pregnancy diagnosis, and induction of parturition. Tuition is given on campus in Sydney and at the University Farms, Camden and includes lectures, tutorial and practical classes.

ANSC 3003 Animal Structure and Function 3A

8 credit points. A/Prof Taylor, Dr Hemsley, Dr Collier. **Session:** Semester 1. **Classes:** 100hr integrated prac/tut. **Prerequisites:** ANSC2002. **Assessment:** One 2hr exam (30%), tests (30%), 2 assignments (20% each).

This unit of study provides an integrated study of the structure and function of animals, with a detailed coverage of topics of particular importance to agricultural scientists, such as reproduction, digestion, animal welfare and behaviour.

Textbooks

K.M. Dyce, W.O. Sack and C.J.G. Wensing *Textbook of Veterinary Anatomy* (W.B. Saunders, Philadelphia, 1987) W.B. Currie (1995) *Structure and Function of Domestic Animals*. CRC or C. Starr and R. Taggart (2001) *Animal Structure and Function*. Brooks/Cole Handbook—a course handbook will be available for purchase. It contains details of assessment, lecture outlines, objectives, reference lists, details of practical classes, staffing, questions and diagrams

ANSC 3004 Animal Structure and Function 3B

8 credit points. A/Prof D Evans, Dr McGreevy, A/Prof Taylor, Dr Collier, Prof. D Fraser. **Session:** Semester 2. **Classes:** 100hr integrated teaching: dissections, projects,

tutorials, excursions and computer based learning. **Prerequisites:** ANSC2002. **Assessment:** One 2hr exam (30%), tests (30%), prac exam (20%), assignment (20%).

This unit of study provides an integrated study of the structure and function of livestock animals, covering topics which were not covered in ASF 3A. It will build on the concepts which were introduced and skills acquired in the ASF 3A unit of study and extend students' knowledge of the structure and function of the urinary tract, nerve, muscle, bone and skin, cardiovascular system and nervous system, avian structure and function, aquaculture and deer production. The concepts developed will be applied to analysis and resolution of problems in animal production.

Textbooks

Same as ANSC3003 Animal Structure and Function 3A Plus : J.E. Smallwood An Introductory Study of Bovine Anatomy, Smallwood (1973) Handbook—a course handbook will be available for purchase. It contains details of assessment, lecture outlines, objectives, reference lists, details of practical classes, staffing, questions and diagrams

ANSC 3005 Animal Biotechnology 3

4 credit points. A/Prof C Moran. **Session:** Semester 2. **Classes:** (1hr lect, 1 hr tut, 2 hrs of supervised reading, seminars, excursions, computer aided instruction)/wk. **Prerequisites:** Students are expected to have knowledge of Genetics equivalent at least to Agricultural Genetics 2 (GENE2001) and knowledge of Animal Science equivalent to Animal Science 2 (ANSC2002). **Assessment:** One 2 hour exam (60%), assignments (20%), seminar (20%).

Lectures, tutorials and supervised reading and computer aided instruction cover the application of biotechnology to animal productivity, disease control, the development of new products from domestic animals and the impact of micro-organism and plant biotechnology on animals. Included are aspects of molecular genetics, cell biology and recombinant DNA technology; regulation and monitoring of gene expression; the techniques and outcomes of genetic mapping and genomics in gene discovery, techniques and outcomes of transgenesis, including nuclear transfer, knockout mutagenesis and production of human and animal pharmaceutical proteins; gene transfer for modulating tissue function and repair of inherited and acquired defects; production and use of recombinant proteins, bioinformatics, including techniques for storing, retrieving and analysing molecular and genomic information; intellectual property protection, risks and benefits; ethical implications of biotechnology.

ANSC 4001 Animal Production 4A

24 credit points. Dr W Muir, Dr J Downing. **Session:** Semester 1. **Prerequisites:** ANSC3001, ANSC3002, ANSC3003.

Location: Werombi Road, Camden.

The year is devoted to advanced Animal Production and a certain degree of specialisation by medium of project work is compulsory. Students are in residence at the University Farms, Camden, for a whole year, where advanced lecture and practical courses are taken in the following subjects: poultry, genetics, and dairying. About 30 per cent of the time available is spent on project work, for which students undertake projects in the various sections of the Discipline of Animal Science at Camden or Sydney or other agricultural institutes outside the University.

Asian Studies in the Bachelor of Agricultural Economics

ASNS 2601 Asian Studies 1A

4 credit points. Ms Yasumoto. **Session:** Semester 1.

Students attend classes for JPNS 1111. See unit description.

ASNS 2602 Asian Studies 1B

4 credit points. Ms Yasumoto. **Session:** Semester 2. **Prerequisites:** ASNS 2601.

Students attend classes for either JPNS 1012 or JPNS 1112. See relevant course descriptions.

ASNS 2603 Asian Studies 2A

4 credit points. Ms Yasumoto. **Session:** Semester 1. **Prerequisites:** ASNS2602. Students attend classes for either JPNS 2011 or JPNS 2111. See relevant course descriptions.

ASNS 2604 Asian Studies 2B

4 credit points. Ms Yasumoto. **Session:** Semester 2. **Prerequisites:** ASNS2603. Students attend classes for either JPNS 2012 or JPNS 2112. See relevant course descriptions.

ASNS 3601 Asian Studies 3A (Japanese)

4 credit points. Ms Yasumoto. **Session:** Semester 1. **Prerequisites:** ASNS 2604. Students attend classes for either JPNS 2201 (see relevant course description) or one Japanese Studies elective unit of study (consult School of Asian Studies).

ASNS 3602 Asian Studies 3B (Japanese)

4 credit points. Ms Yasumoto. **Session:** Semester 2. **Prerequisites:** ASNS3601. Students attend classes for either JPNS 2202 (see relevant course description) or one Japanese Studies elective unit of study (consult School of Asian Studies).

BIOL 1001 Concepts in Biology

6 credit points. **Session:** Summer, Semester 1. **Classes:** 3 lec & usually 3 hrs prac/wk. **Assumed Knowledge:** No previous knowledge required. Students who have not taken HSC Biology are recommended to take the Biology Bridging Course. **Assessment:** One 2.5hr exam, assignments, classwork.

NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.

Concepts in Biology is an introduction to the major themes of modern biology. We start with introductory cell biology, which particularly emphasises how cells obtain and use energy. We then discuss the structure and function of microorganisms. The significance of molecular biology is covered working from the role of DNA in protein synthesis and development through to modern techniques and their uses. The genetics of organisms is then discussed, leading to consideration of theories of evolution and the origins of the diversity of modern organisms. We bring all the abovementioned concepts together to develop an understanding of interactions between organisms in biological communities or ecosystems. Finally we discuss the significance of human impact on other living organisms, with particular reference to finding solutions to problems in areas such as global warming, introduced pests, and extinctions. The unit is designed so that lab classes and the field trip integrate with the lectures. Lab activities are carried out in groups so that team work skills are developed. This unit also incorporates a number of key generic skills such as written communication skills, discussion and data interpretation, and experimental design and hypothesis testing skills.

Textbooks

Knox R B et al. Biology. McGraw-Hill, 3rd ed, 2005.

A Study Guide for the unit will be available for purchase from the Copy Centre during the first week of semester.

BIOL 1002 Living Systems

6 credit points. **Session:** Semester 2. **Classes:** (3 lec & 2 hrs prac)/wk. **Assumed Knowledge:** HSC 2-unit Biology. Students who have not undertaken an HSC biology course are strongly advised to complete a biology bridging course before lectures commence. **Assessment:** One 2.5hr exam, assignments, classwork.

Living Systems deals with the biology of all sorts of organisms, from bacteria to large plants and animals, and emphasises the ways in which they can live in a range of habitats. The importance of energy in living systems, and how elements are used and recycled in biological communities, are described. The unit of study includes lectures and laboratory classes on the physiology of nutrition and growth, basic physiological processes of animals and plants, the ways in which organisms control and integrate their activities, and their reproduction. Finally applications of knowledge of genetics and ecology to practical problems in agriculture and conservation are introduced. It is recommended that BIOL (1001 or 1101 or 1901) be taken before this unit of study. This unit of study, together with BIOL (1001 or 1101 or 1901) provides entry to all Intermediate units of study in biology in the School of Biological Sciences.

Textbooks

Knox R B et al. Biology. McGraw-Hill, 3rd ed, 2005.

A Study Guide for the unit will be available for purchase from the Copy Centre during the first week of semester.

BIOL 1101 Biology - Ecosystems to Genes

6 credit points. **Session:** Semester 1. **Classes:** 3 lec & 3 hrs. prac/wk. **Prerequisites:** HSC 2-unit Biology or equivalent. **Assessment:** One 2.5hr exam, assignments, classwork.

3. Undergraduate units of study

NB: It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.

Biology - Ecosystems to Genes builds on a satisfactory prior knowledge of the HSC 2-unit Biology course. A brief revision of the basic concepts of the high school course is given. Biology - Ecosystems to Genes builds on the main themes introduced in HSC Biology to provide a background to the breadth of biology, including genetics of organisms, theories of evolution/origins of diversity of modern organisms, diversity of microorganisms, cell biology with emphasis on how cells obtain and use energy, modern molecular biology and interactions between organisms in biological communities. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all other Junior units of study in Biology.

Textbooks

Knox R B et al. *Biology*. McGraw-Hill, 2nd ed, 2001

BIOL 1901 Biology - Ecosystems to Genes (Advanced)

6 credit points. **Session:** Semester 1. **Classes:** 3 lec & 3 hrs prac/wk. **Prerequisites:** UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. **Assessment:** One 2.5hr exam, assignments, classwork.

NB: Department permission required for enrolment. It is recommended that BIOL (1001 or 1101 or 1901) be taken before all Semester 2 Junior units of study in Biology.

This unit of study is a more demanding alternative component of Biology - Ecosystems to Genes.

BIOL 1902 Living Systems (Advanced)

6 credit points. **Session:** Semester 2. **Classes:** (3 lec & 2 hrs prac)/wk. **Prerequisites:** UAI of at least 93 and HSC Biology result in the 90th percentile or better, or Distinction or better in a University level Biology unit, or by invitation. **Assessment:** One 2.5hr exam, assignments, classwork, independent project.

NB: Department permission required for enrolment.

This unit of study is a more demanding alternative component of Living Systems.

BIOM 1003 Biometry 1

6 credit points. A/Prof Mick O'Neill. **Session:** Semester 2. **Classes:** (2 lec & 1 tut)/wk. **Assumed Knowledge:** 70 or more in HSC Mathematics. **Assessment:** Assignments (50%), exam (50%).

It is a core first year unit for all our science-based degrees. It provides a foundation of quantitative skills to be used in further study in applied statistics in later years and in other Units within the Agricultural, Animal, Land & Water, or Horticultural Science degrees. It creates an awareness of the role of experimental design and statistical analysis in the research process. It examines some useful mathematical techniques such as least squares, differentiation and integration as applied to growth curves and linear and nonlinear modelling, especially via the use of computers. Basic statistical topics covered include: describing biological data and variability, sampling and estimation, framing biological hypotheses; estimating a single treatment mean via a confidence interval and testing for a particular mean via a z-test or t-test; estimating or testing the difference between two treatment means. The spreadsheet package Excel and the statistical package GenStat will be used for mathematical and statistical analysis and for graphical presentation.

BIOM 2001 Biometry 2

6 credit points. A/Prof M O'Neill, Ms K Bartimote. **Session:** Semester 1. **Classes:** (3 lec, 2 prac & 1 tut)/wk. **Prerequisites:** BIOM1003 or equivalent. **Assessment:** Assignments (50%), one 3 hr theory/prac exam (50%). All open book.

This unit of study extends the techniques considered in Biometry 1, and considers problems of statistical design and analysis encountered in research in the biological, agricultural, horticultural, animal and environmental sciences. In practical classes the computer packages Minitab, GenStat and Excel are used extensively to analyse experimental data. We commence with a revision of one and two sample t tests. We then consider the concepts of randomisation and replication; sampling and experimental units; controlling variability by blocking; analysis of variance for simple and factorial treatment

designs; residual diagnostic techniques. Specific experimental designs studied include completely random and randomised complete block designs; Latin square designs; split-plot designs. Next we consider linear relationships (regression, correlation) between two biological measurements; multiple linear regression; stepwise regression; analysis of covariance. We finish with a review of non-parametric analyses and the analysis of two-way contingency tables.

Textbooks

Reference book: Mead, R, Curnow, RN and Hasted, AM (2003) *Statistical Methods in Agriculture and Experimental Biology*, 2nd ed. London: Chapman & Hall.

BIOM 3002 Experimental Design 3

4 credit points. A/Prof M O'Neill. **Session:** Semester 1. **Classes:** (2 lec & 3 prac)/wk. **Prerequisites:** BIOM2001 or BIOM2002. **Assessment:** Assignments, Quizzes and Examinations. All open book.

This unit is designed for students who are interested in majoring in Biometry, or for students from other disciplines with an interest in further development of their skills in experimental design and analysis. It builds on the topics introduced in Biometry 2, and aims to give students sufficient skills and confidence to complete the analysis of their own research data in Fourth Year with a high degree of competence.

After some revision of standard statistical techniques, the unit synthesises work on regression analysis and analysis of variance into the general linear model. This leads to the analysis of treatment designs which are structured: complete and incomplete factorial designs, and designs intended to model treatment response or to compare groups of treatments. Some special techniques and designs will be considered, such as the use of Residual Maximum Likelihood in the analysis of data collected from repeated observations on the same experimental unit.

BIOM 3003 Statistical Modelling 3

4 credit points. A/Prof M O'Neill. **Session:** Semester 1. **Classes:** (2 lec, 3 prac)/wk.

Prerequisites: BIOM2001 or BIOM2002. **Assessment:** Assignments, Quizzes and Examinations. All open book.

This unit is designed for students who are interested in majoring in Biometry, or for students from other disciplines with an interest in further development of their skills in advanced statistical modelling techniques, especially in analysis of observational data. We also consider various techniques for the analysis of non-normal data, such as dealing with counts and proportions. It builds on the topics introduced in Biometry 2, and aims to give students sufficient skills and confidence to complete the analysis of their own research data in Fourth Year with a high degree of competence.

After some revision of standard statistical techniques, we first consider the fitting of nonlinear models, such as used in modelling biological growth. Next we consider various forms of generalised linear models for analysing non-normal data, specifically logistic regression for analysing binary and proportion data, as well as Poisson regression (loglinear modelling) for analysing count data. Other special forms of analysis are considered such as time series analysis

BIOM 4001 Biometry 4A

24 credit points. A/Prof M O'Neill. **Session:** Semester 1. **Classes:** As arranged. **Prerequisites:** BIOM3002 and BIOM3003.

This Fourth Year major trains people for careers as biometricians or statisticians. Much of the applied work encountered in the first three years of Biometry is synthesised into a more formal statistical framework. This major will also cover some modern techniques used by biometricians, and provide some mathematical training necessary to pursue theoretical studies in biometry. Some of the First Semester modules may be replaced by Units of Study offered in the School of Mathematics and Statistics (with the approval of the Discipline Leader).

This unit is made up of the following four six-credit point modules: Matrix Algebra and Linear Models, Biometrical Methods, Multivariate Analysis and Statistical Computing.

Matrix Algebra and Linear Models (6 credit points)

Assessment: Assignments, reports and quizzes.

This module provides the theoretical framework for the use of matrices in constructing models for designed experiments and in the subsequent analysis of experimental data. Topics include the rank, determinant and inverse of a matrix, orthogonal matrices, partitioned matrices, eigenvalues and eigenvectors. These are applied to the general linear model framework and studied in depth for common experimental designs.

Biometrical Methods (6 credit points)

Assessment: Assignments, reports and quizzes.

This module provides the theoretical framework for biometrical research. Topics include common distributions and their properties (moments and moment generating functions); the concept of maximum likelihood and residual maximum likelihood; the theory of estim-

ation including concepts of bias and minimum variance; alternative methods of analyzing data (e.g. non-parametric analysis).

Multivariate Analysis (6 credit points)

Assessment: Assignments, reports and quizzes.

This module examines various ways of analyzing multivariate data, from multivariate t-tests to a MANOVA alternative to several ANOVAs of correlated variables; principal component and canonical variate analysis, cluster analysis and ordination methods, contingency tables and correspondence analysis.

Statistical Computing & Consulting (6 credit points)

Assessment: Assignments, reports and quizzes.

Biometrical analysis and research are underpinned by various computing techniques. This unit is designed to get students to a level whereby they can confidently select a computing technique for a particular problem and perform any programming necessary. Topics include programming in Excel using macros and visual basic; programming using Fortran or an equivalent; the use of S Plus or R; the use of Mathematica in teaching and research. Part of this module involves assisting in consultations with clients and writing consulting reports.

BIOM 4002 Biometry 4B

24 credit points. A/Prof M. O'Neill. **Session:** Semester 2. **Prerequisites:** Appropriate level of biometrical knowledge. **Assessment:** Initial presentation, literature review, final presentation, thesis.

Research project.

CHEM 1001 Fundamentals of Chemistry 1A

6 credit points. **Session:** Semester 1. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Assumed Knowledge:** There is no assumed knowledge of chemistry for this unit of study, but students who have not undertaken an HSC chemistry course are strongly advised to complete a chemistry bridging course before lectures commence. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

The aim of the unit of study is to provide those students whose chemical background is weak (or non-existent) with a good grounding in fundamental chemical principles together with an overview of the relevance of chemistry. There is no prerequisite or assumed knowledge for entry to this unit of study.

Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM 1002 Fundamentals of Chemistry 1B

6 credit points. **Session:** Semester 2. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Prerequisites:** CHEM (1001 or 1101) or equivalent. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

CHEM1002 builds on CHEM1001 to provide a sound coverage of inorganic and organic chemistry.

Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM 1101 Chemistry 1A

6 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Assumed Knowledge:** HSC Chemistry and Mathematics. **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

Chemistry 1A is built on a satisfactory prior knowledge of the HSC Chemistry course. A brief revision of basic concepts of the high school course is given. Chemistry 1A covers chemical theory and physical chemistry.

Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM 1102 Chemistry 1B

6 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Prerequisites:** CHEM (1101 or 1901) or a Distinction in CHEM1001 or equivalent. **Corequisites:** Recommended concurrent units of study: 6 credit points of Junior Mathematics. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

Chemistry 1B is built on a satisfactory prior knowledge of Chemistry 1A and covers inorganic and organic chemistry. Chemistry 1B is an acceptable prerequisite for entry into Intermediate Chemistry units of study.

Lectures: A series of 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM 1405 Chemistry

6 credit points. Dr Adrian George. **Session:** Semester 1. **Classes:** 52 lectures and nine 3 hour practical classes. **Assumed Knowledge:** HSC Chemistry. **Assessment:** Theory examination 75% together with 25% for laboratory exercises and continuous assessment quizzes.

This is a one semester unit of study designed to provide (i) a suitable foundation for subsequent units of study such as biochemistry, animal nutrition, physiology and pharmacology, and (ii) a chemical background that will aid in the understanding, diagnosis and treatment of disease. It covers chemical theory, inorganic, physical, and organic chemistry with many examples from biological areas. It pre-supposes a satisfactory prior knowledge of HSC Chemistry.

Full detailed information is available from the School of Chemistry. A total of 52 lectures comprising 28 lectures in inorganic and physical chemistry and 24 lectures in organic chemistry.

Textbooks

Detailed information about prescribed texts is available from the School of Chemistry.

CHEM 1901 Chemistry 1A (Advanced)

6 credit points. **Session:** Semester 1. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Prerequisites:** UAI of at least 96.4 and HSC Chemistry result >80, or Distinction or better in a University level Chemistry unit, or by invitation. **Corequisites:** Recommended concurrent unit of study: 6 credit points of Junior Mathematics. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

NB: Department permission required for enrolment.

Chemistry 1A (Advanced) is available to students with a very good HSC performance as well as a very good school record in chemistry or science. Students in this category are expected to do Chemistry 1A (Advanced) rather than Chemistry 1A.

The theory and practical work syllabuses for Chemistry 1A and Chemistry 1A (Advanced) are similar, though the level of treatment in the latter unit of study is more advanced, presupposing a very good grounding in the subject at secondary level. Chemistry 1A (Advanced) covers chemical theory and physical chemistry.

Lectures: A series of about 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

CHEM 1902 Chemistry 1B (Advanced)

6 credit points. **Session:** Semester 2. **Classes:** 3 lec & 1 tut/wk & 3hrs prac/wk for 10 wks. **Prerequisites:** CHEM (1901 or 1903) or Distinction in CHEM1101 or equivalent. **Corequisites:** Recommended concurrent unit of study: 6 credit points of Junior Mathematics. **Assessment:** Theory examination (75%), laboratory exercises and continuous assessment quizzes (25%).

NB: Department permission required for enrolment.

Chemistry 1B (Advanced) is built on a satisfactory prior knowledge of Chemistry 1A (Advanced) and covers inorganic and organic chemistry. Chemistry 1B (Advanced) is an acceptable prerequisite for entry into Intermediate Chemistry units of study.

Lectures: A series of about 39 lectures, three per week throughout the semester.

Textbooks

A booklist is contained in the booklet Junior Chemistry distributed at enrolment. Further information can be obtained from the School.

Commercial Law in the Bachelor of Agricultural Economics

In addition to the units of study listed after this entry, the Discipline of Accounting and Business Law in the Faculty of Economics and Business offers the following level 3000 units. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- CLAW3001 Australian Taxation System

- CLAW3002 Taxation Strategies in a Business Environment.

CLAW 1001 Commercial Transactions A

6 credit points. **Session:** Semester 1, Semester 2. **Classes:** Three lectures and one tutorial per week. **Assessment:** Exam, Mid-Semester Test, Tutorial Assessment, Case Analysis.

This unit of study is concerned with the fundamental elements of business law. It commences with an overview of the Australian legal system (sources of law, parliament, courts, statutory interpretation, doctrine of precedent), including an examination of those provisions in the Commonwealth Constitution relevant to business and commercial activities. The unit continues with a detailed study of those aspects of the law of contract that underlie all commercial transactions and are the essence of commercial law (formation of contract, terms of a contract, factors affecting the validity and enforcement of contracts, termination, remedies for breach of contract). Basic elements of the law of agency, criminal law and the law of torts (in particular, negligence and negligent misstatement) are also examined. The unit concludes with an examination of some of the key provisions of the Trade Practices Act 1974 (Cth) including those

3. Undergraduate units of study

relating to misleading and deceptive conduct and manufacturers' liability.

CLAW 1002 Commercial Transactions B

6 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** CLAW1001. **Assessment:** Tutorial assessment; Mid-semester exam; Final exam.

Commerce today covers a diverse range of items - from securities to patents and all forms of property in between. An understanding of what the forms of property are and how to gain or sell an interest is essential to everything from tax through marketing to e-commerce. This unit provides a detailed overview of the types of property found in standard commercial transactions and the methods for acquiring or divesting an entity with an interest in that property. The unit focuses on all forms of personal property, real property (land) and intellectual property. Students will gain both an understanding of the transactions and the property as well as analytical skills in assessing and working out problems and case studies to do with commercial property.

CLAW 2001 Corporations Law

8 credit points. **Session:** Semester 1, Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** Any 4 full semester first year units of study including CLAW1001. **Assessment:** Mid-semester exam (take home); Final exam.

This unit begins with a brief comparison of business entities, especially partnership. The concept and process of incorporation are examined. Company finance, both equity and debt finance, and the maintenance of the company's share capital will be studied as well as the topics of accounts, auditors, and companies in financial difficulty. The management of companies and directors' duties will be explored as well as the rights and remedies of company shareholders. Company takeovers, prospectus provisions and securities regulation will also be discussed but studied in more depth in the elective, CLAW2003 Stock Markets and Derivatives Law.

CLAW 2002 Bankruptcy and Insolvency

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** CLAW2001. **Assessment:** Test; Assignment; Classwork; Final exam.

This unit is concerned with the law relating to the bankruptcy of individuals and corporate insolvency. In relation to bankruptcy, the unit explores the mechanisms by which formal bankruptcy may occur (creditor and debtor petitions), the role of the trustee, creditors and the bankrupt in the administration of the bankrupt estate and the property available for distribution to creditors. It goes on to examine arrangements with creditors outside formal bankruptcy (Part IX debt agreements, Part X arrangements). In the case of corporate insolvency the areas examined include receivers and other controllers, voluntary administration and deeds of company arrangement, schemes of arrangement, winding up, the liability of company officers and professional advisers, and group insolvency. The structure of the insolvency profession and proposals for reform are also explored.

CLAW 2003 Stock Markets and Derivatives Law

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** CLAW2001. **Assessment:** Assignment; Test; Final exam.

This unit begins with a study of the powers of the Australian Securities and Investment Commission with reference to recent ASIC investigations. The functions of the Australian Stock Exchange and those of securities dealers and investment advisers are examined as well as the relationship between broker and client. The market offences of market manipulation and insider trading are explored. Public funding of companies and prospectus provisions are studied along with the liability of officers and independent experts concerning the prospectus. The topic of mergers and acquisitions examines acquisitions, relevant interests, takeover schemes and announcements, and the liability of parties to a takeover. Exchange traded futures and options and OTC derivatives are also examined.

CLAW 2004 Banking and Finance Law

8 credit points. **Session:** Semester 1. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** CLAW1001. **Assessment:** Tests; Assignments.

Students are introduced to the regulatory structure and its impact on banking practice. The relationship between banker and customer and the duties of the parties are analysed. Issues relating to financial advice, electronic banking, risk management securitisation and loan security are discussed. Students also become familiar with the legal implications of trading negotiable instruments and raising funds by means of international loans, project financing and syndication.

CLAW 2005 Trade Practices and Consumer Law

8 credit points. **Session:** Semester 1. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** CLAW1001. **Assessment:** Test; Assignment; Tutorial work; Final exam.

This unit is concerned with the provisions in the Trade Practices Act 1974 (Cwth) dealing with restrictive trade practices, unconscionable conduct and consumer protection. Topics to be studied in depth include: anti-competitive agreements, misuse of market power, exclusive dealing, resale price maintenance, mergers and acquisitions, misleading or deceptive conduct, unfair practices, product safety and product information, conditions and warranties in consumer transactions, liability of manufacturers and importers and unconscionable conduct. Comparable state legislation is also studied.

CLAW 2006 Legal Issues for e-Commerce

8 credit points. **Session:** Semester 1, Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** 48 credit points. **Assessment:** Literature review; Business report; Optional assignments.

Commerce and business in an electronic environment has arrived and is in constant use. This unit focuses on the transactional and financial aspects of electronic commerce. The unit includes detailed coverage of legal aspects of electronic finance - Internet banking and digital cash and cards, electronic trade; contracts and digital signatures, taxation of electronic commerce and electronic property issues; copyright, patents and trade marks for digital property. The unit assumes no previous legal training or knowledge of the electronic media. The unit also covers basic introductory legal skills such as legal research, writing and citation as well as an introduction to electronic commerce, the history and operation of the Internet and major tools used in electronic commerce.

CROP 1001 Agricultural Science 1A

6 credit points. Assoc. Prof Rose, Prof. Burgess, Prof. Nicholas. **Session:** Semester 1. **Classes:** (3 lec & 3 prac)/wk. **Assumed Knowledge:** HSC Chemistry. **Assessment:** One 2hr exam, prac, assignments.

This unit of study introduces the principles and practices of modern agriculture and examines the relationships between plants, animals and natural resources that make up agricultural production systems. The concepts of environmental and economic sustainability of agricultural systems will be introduced.

Topics covered include Australian farming systems, regional agricultural industries, farming operations and plant identification.

Textbooks

Reference books V. Squires and P. Tow (eds) Dryland Farming: a Systems Approach (Sydney University Press, 1992) C.J. Pearson et al. A Plain English Guide to Agricultural Plants (Longman Cheshire, 1993) M.W. Denny Air and Water: The Biology and Physics of Life's Media (Princeton University Press, 1993)

CROP 1002 Agricultural Science 1B

6 credit points. Assoc. Prof. Rose, Dr Sharma, Dr Cook. **Session:** Semester 2. **Classes:** (3 lec & 3 prac)/wk. **Corequisites:** CROP1001. **Assessment:** One 2 hr exam, prac, assignments.

This unit of study develops the theme of environmental sustainability of agricultural production, and examines the physical principles which underpin agricultural systems. It examines the broad ecological relationships between the plants, animals and natural resources used in agriculture, and deals with some of the problems facing agriculture in the future. In addition, the static and dynamic forces involved in agricultural structures and equipment, the behaviour and properties of water in agricultural systems and the physical aspects of weather and the changing Australian climate will be discussed.

Textbooks

Reference books V. Squires and P. Tow (eds) Dryland Farming: a Systems Approach (Sydney University Press, 1992) C.J. Pearson et al. A Plain English Guide to Agricultural Plants (Longman Cheshire, 1993) M.W. Denny Air and Water: The Biology and Physics of Life's Media (Princeton University Press, 1993)

CROP 2001 Crop Science 2

6 credit points. Dr Campbell. **Session:** Semester 2. **Classes:** (3 lec & 3 prac)/wk. **Prerequisites:** CROP1001 and CROP1002, or HORT1001 and HORT1002, or LWSC1001 and LWSC1002 and one of BIOM1001 and BIOM1002. **Assessment:** One 3hr exam, lab work, report on field experiment.

NB: Department permission required for enrolment.

This unit of study introduces students to the various aspects of plant physiology and its relevance to the production of crops and pastures.

The major sections of the course deal with:

- (i) the physiology of seeds in the context of crop establishment;
- (ii) anatomy of plants and its relevance to the physiology of the whole plant;
- (iii) the processes of crop growth, including the capture of light, the use of water and the role of nutrients;
- (iv) the physiology of ripening and quality of products.

This unit will be withdrawn in 2006. Enrolment in this unit in 2005 is available only with the Dean's permission.

Textbooks

B.J. Atwell, P.E. Kriedemann, C.G.N. Turnbull (eds) Plants in Action (Macmillan Education, 1999)

H. Marschner Mineral Nutrition of Higher Plants 2nd ed. (Academic Press, 1995)

K. Esau Anatomy of Seed Plants (Wiley, 1977)

CROP 2003 Crop Protection

6 credit points. Professor Burgess. **Session:** Semester 2. **Classes:** (2 Lec, 2 prac + 1 tutorial)/wk. **Prerequisites:** CROP1001 and CROP1002, or HORT1001 and HORT1002, or LWSC1001 and LWSC1002 and BIOL1001 and BIOL1002 or BIOL1003, or BIOL1201 and BIOL1202. **Assessment:** One 2hr theory exam, laboratory work, one essay, quizzes.

This unit of study considers the impact of diseases, pests and weeds on plant production and the various strategies for protecting plants from resultant damage. Environmental issues associated with pest control are emphasized.

CROP 3002 Agricultural Systems & Irrigation Sci 3

8 credit points. Assoc. Prof. Sutton. **Session:** Semester 2. **Classes:** (3 lec, 2hr prac & 1 seminar)/wk. **Assessment:** One 2hr exam(60%), assignments(40%).

This unit of study introduces the principles and practice of both agricultural systems and irrigation science, with about half of the course being devoted to each. The course recognises that computer based decision aids are widespread in science and commerce. Selected examples of these will be used to illustrate the principles of efficient water use in irrigated and rainfed cropping systems and to develop efficient management strategies for them.

Irrigation farming must meet stringent environmental constraints. This unit will help you understand the scientific principles of irrigated crop water management which farm managers will need to apply to meet these constraints in a commercial environment.

Textbooks

Reference books M.E. Jensen Design and Operation of Farm Irrigation Systems (ASAE, 1980)

CROP 3003 Agricultural Systems for Hort Science 3

4 credit points. Assoc. Prof. Sutton. **Session:** Semester 2a. **Classes:** (3 lec, 1 seminar & 2 hr prac)/wk for 1st half of semester. **Assessment:** One 2hr exam (60%), assignments (40%).

This unit of study compliments Horticultural Science 2. It builds on the irrigation component of that unit of study and uses irrigation as one of the agricultural systems which you will learn to simulate and use as a basis for developing computer based aids to decision making.

The unit of study introduces the principles and practice of agricultural systems. It recognises that computer based decision aids are widespread in science and commerce. Selected examples of these will be used to illustrate the principles of efficient water used in irrigated and rainfed cropping systems and to develop efficient management strategies for them.

Economic History in the Bachelor of Agricultural Economics

Units offered to students in their Second and Third Years of study by the Discipline of Economic History in the Faculty of Economics and Business. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- ECHS2302 Asia-Pacific: Growth and Change
- ECHS2303 Economic Development of Southeast Asia
- ECHS2304 Economic Development of Modern Japan
- ECHS2312 Topics in Modern European Social History
- ECHS2324 The Asian Firm
- ECHS2328 The Politics of e-Commerce

Econometrics in the Bachelor of Agricultural Economics

In addition to the units of study listed after this entry, the Discipline of Econometrics and Business Statistics in the Faculty of Economics and Business offers the following level 2000/3000 units. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- ECMT2720 Management Science
- ECMT3210 Statistical Modelling
- ECMT3710 Management Science Models and Methods
- ECMT3720 Stochastic Modelling for Management.

ECMT 1010 Business and Economic Statistics A

6 credit points. **Session:** Semester 1, Semester 2. **Assessment:** Quizzes; Tutorial questions; Exams; Assignment.

This unit provides an introduction to basic statistics and its applications in economics and business disciplines. Topics include: methods for data management; analysis and interpretation of data; probability; the normal distribution; an introduction to sampling theory and hy-

pothesis testing; and the concepts of regression analysis. A key component is the provision of instruction and experience in the use of computers and statistical software as an aid in the analysis of data. Students are expected to use data resources on the World Wide Web, retrieve data and analyse this data using Excel.

ECMT 1020 Business and Economic Statistics B

6 credit points. **Session:** Summer, Semester 2. **Corequisites:** ECMT1010. **Assessment:** Two quizzes; Tutorial questions; Mid-semester examination; Assignment; Final exam. **NB:** Other than in exceptional circumstances, it is strongly recommended that students do not undertake Business and Economic Statistics B before attempting Business and Economic Statistics A.

This unit broadens the knowledge gained in the unit, ECMT1010 Business and Economic Statistics A by introducing further tools (and their applications) for use in economics, finance, marketing and accounting. This unit features practical applications. Possible topics include: further aspects of hypothesis testing including goodness-of-fit models; regression analysis including a brief introduction to logit models, time series and its applications to economics and finance; input-output analysis; index numbers and mathematics of finance. The material is further complemented by mathematical topics including matrices and partial differentiation. In addition, students are expected to use data resources on the World Wide Web, retrieve data and analyse this data using Excel.

ECMT 2010 Regression Modelling

8 credit points. **Session:** Semester 1. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT1010 and ECMT1020. **Assessment:** Workbooks; Project; Mid-semester exam; Final exam.

Students undertaking this unit have some background in basic statistics including an introduction to regression analysis. Using this knowledge as a base, an extensive discussion of basic regression theory and some of its extensions is provided. The unit covers how linear regression models can be applied to data to estimate relationships, to forecast, and to test hypotheses that arise in economics and business. Guidelines for using econometric techniques effectively are discussed and students are introduced to the process of model building. It is essential that the discussion of regression modelling be complemented with practice in analysing data. An important task is the computing component using econometric software.

ECMT 2021 Analysis of Discrete Choice Data

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT2010. **Assessment:** Workbooks; Project; Mid-semester Exam; Final exam.

Data that are qualitative or discrete present particular problems for data analysts. What influences an individual to work part-time rather than full-time, or use public transport rather than drive to work, or to choose one brand of detergent over another? Why do certain firms choose particular accounting procedure over another? In these examples of modelling choice data, standard linear regression models are inappropriate. This unit considers the specification, estimation and use of statistical models that are necessary to analyse such questions. These may include the logit, probit and multinomial logit models. Special emphasis is placed on illustrating the appropriate application of such models using case studies and data drawn from marketing, accounting, finance and economics.

ECMT 2030 Financial Econometrics

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT2010. **Assessment:** Two assignments; Final exam.

Over the last decade econometric modelling of financial data has become an important part of the operations of merchant banks and major trading houses and a vibrant area of employment for econometricians. This unit provides an introduction to some of the widely used econometric models for financial data and the procedures used to estimate them. Special emphasis is placed upon empirical work and applied analysis of real market data. Topics covered may include the statistical characteristics of financial data, the specification, estimation and testing of asset pricing models, the analysis of high frequency financial data, and the modelling of volatility in financial returns.

ECMT 2720 Management Science

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT1010 and ECMT1020. **Assessment:** Two assignments; Test; Final exam.

NB: Students who wish to take only part of the sequence of units of study in Management Science should apply to the Chair of the Econometrics and Business Statistics Discipline for any exemption from the stated prerequisites and corequisites.

Management science is an approach to decision making that is suitable in areas where the manager has little experience or where the problem for decision is complex. It provides an effective decision-making approach to problems important enough to justify the time and effort of quantitative analysis. This unit considers modelling in

3. Undergraduate units of study

areas that practising managers might encounter in their roles as decision makers. The intended outcome of the unit is to increase the effectiveness of management decision making. The focus throughout is on practical solutions using readily available spreadsheet software. Topics may include resource allocation, capacity planning, logistics, and project planning.

ECMT 3010 **Econometric Models and Methods**

8 credit points. **Session:** Semester 1. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT2010. **Assessment:** Two Class tests; Assignment; Final exam. This unit extends methods of estimation and testing developed in association with regression analysis to cover econometric models involving special aspects of behaviour and of data. In particular, motivating examples are drawn from dynamic models, panel data and simultaneous equation models. In order to provide the statistical tools to be able to compare alternative methods of estimation and testing, both small sample and asymptotic properties are developed and discussed.

ECMT 3020 **Applied Econometrics**

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT3010. **Assessment:** Project; Final exam. Econometric theory provides the techniques needed to qualify the strength and form of relationships between variables. Applied econometrics is concerned with the strategies that need to be employed to use these techniques effectively. This unit illustrates how econometric models and methods can be applied to data to solve problems that arise in economics and business. General principles for undertaking applied work are discussed and necessary research skills developed. In particular, the links between econometric models and the underlying substantive knowledge or theory associated with the particular application are stressed. Topics may include error correction models, systems of consumer demand equations, and structural and vector auto-regressive (VAR) macroeconomic models. Research papers involving empirical research are studied and an integral component of the unit is a major project involving a substantial piece of econometric modelling.

ECMT 3030 **Forecasting for Economics and Business**

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT2010. **Assessment:** Assignments; Two tests; Final exam. The need to forecast or predict future values of economic time series arises frequently in many branches of applied economic and commercial work. It is, moreover, a topic which lends itself naturally to econometric and statistical treatment. The specific feature which distinguishes time series from other data is that the order in which the sample is recorded is of relevance. As a result of this, a substantial body of statistical methodology has developed. This unit provides an introduction to methods of time series analysis and forecasting. The material covered is primarily time domain methods designed for a single series and includes the building of linear time series models, the theory and practice of univariate forecasting and the use of regression methods for forecasting. Throughout the unit a balance between theory and practical application is maintained.

ECMT 3210 **Statistical Modelling**

8 credit points. **Session:** Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECMT2010. **Assessment:** Assignments; Tests; Final exam. This unit provides an accessible foundation in the principles of probability and mathematical statistics that underlie the statistical techniques employed in the fields of econometrics and management science. These principles are applied to various modelling situations and decision making problems in business and economics.

Economics in the Bachelor of Agricultural Economics

In addition to the units of study listed after this entry, the Discipline of Economics in the Faculty of Economics and Business offers the following level 2000/3000 units. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- ECON2901 Intermediate Microeconomics Honours
- ECON2902 Intermediate Macroeconomics Honours
- ECON2903 Mathematical Economics A
- ECON2904 Mathematical Economics B
- ECON3901 Advanced Microeconomics: Theory and Policy
- ECON3902 Advanced Macroeconomics: Theory and Policy

ECON 1001 **Introductory Microeconomics**

6 credit points. **Session:** Semester 1, Summer. **Classes:** Two lectures and one tutorial per week. **Assumed Knowledge:** Mathematics. **Assessment:** Assignments; Mid-semester exam; Final exam. Introductory Microeconomics addresses the economic decisions of individual firms and households and how these interact in markets. It is a compulsory core unit for the Bachelor of Economics and Bachelor of Commerce and an alternative core unit for the the Bachelor of Economic and Social Science. Economic issues are pervasive in contemporary Australian society. Introductory Microeconomics introduces students to the language and analytical framework adopted in Economics for the examination of social phenomena and public policy issues. Whatever one's career intentions, coming to grips with economic ideas is essential for understanding society, business and government. Students are given a comprehensive introduction to these ideas and are prepared for the advanced study of microeconomics in subsequent years.

ECON 1002 **Introductory Macroeconomics**

6 credit points. **Session:** Summer, Semester 2. **Classes:** Two lectures and one tutorial per week. **Assumed Knowledge:** Mathematics. **Assessment:** Assignments; Mid-semester exam; Final exam. Introductory Macroeconomics addresses the analysis of the level of employment and economic activity in the economy as a whole. It is a compulsory core unit for the Bachelor of Economics (BEc) and for the Bachelor of Commerce and an alternative core unit for the Bachelor of Economic and Social Science. Introductory Macroeconomics examines the main factors that determine the overall levels of production and employment in the economy, including the influence of government policy and international trade. This analysis enables an exploration of money, interest rates and financial markets, and a deeper examination of inflation, unemployment and economic policy.

ECON 2001 **Intermediate Microeconomics**

8 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECON1001. **Corequisites:** ECMT1010 or 101X. **Assessment:** Assignments; Mid-semester exam; Final exam. *NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.* The aim of Intermediate Microeconomics is the development of theoretical and applied skills in economics. It covers applications and extensions of the theory of consumer choice, firm behaviour and market structure. Emphasis is given to the economics of information and choice under uncertainty; industry structures other than monopoly and perfect competition; markets for factors of production; general equilibrium and economic efficiency; market failure and the role of government. This unit provides a basis for the more specialised options that comprise third year economics.

ECON 2002 **Intermediate Macroeconomics**

8 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** Three lectures and one tutorial per week. **Prerequisites:** ECON1002. **Corequisites:** ECMT1020 or 102X. **Assessment:** Assignments; Mid-semester exam; Final exam. *NB: Certain combinations of Maths/Stats may substitute for Econometrics -- consult the Chair of the Discipline of Economics.* This unit of study develops models of the goods, money and labour markets, examines issues in macroeconomic policy. Macroeconomic relationships, covering consumption, investment, money and employment, are explored in detail. Macro-dynamic relationships, especially those linking inflation and unemployment, are also considered. Exchange rates and open economy macroeconomics are also addressed. In the last part of the unit, topics include the determinants and theories of economic growth, productivity and technology, the dynamics of the business cycle, counter-cyclical policy and the relationship between micro and macro policy in the context of recent Australian experience.

ECON 2903 **Mathematical Economics A**

4 credit points. **Session:** Semester 1. **Classes:** Two lectures per week. **Corequisites:** ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam. *NB: Classes start in Week 3* This unit provides an introduction to mathematical techniques commonly employed by economists. Topics include: limits, continuity, differentiation of single- and multi-variable functions, unconstrained and constrained optimisation.

ECON 2904 **Mathematical Economics B**

4 credit points. **Session:** Semester 2. **Classes:** Two lectures per week. **Prerequisites:** ECON2903. **Corequisites:** ECON 2902. **Assessment:** Assignments; Mid-semester exam; Final exam. *NB: Classes start in Week 3* This unit follows on from ECON2903 Mathematical Economics A. Topics include: integration techniques, linear algebra (with applications to comparative statics and optimisation) and economic dynamics.

ECON 3001 Capital and Growth

8 credit points. **Session:** Semester 1. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901, ECOP2001, plus one of ECON2002, ECON2902, ECOP2002. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit is an introduction to economic growth including its causes and consequences. The role of capital, technological progress, and other determining factors of the development of economies are studied from the point of view of alternative economic theories. The potential effects of growth and structural change on welfare, income distribution, and employment are looked at in the same contexts with some consideration of the empirical evidence. The role of alternative economic policies and economic institutions in promoting growth is also discussed.

ECON 3002 Development Economics

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2002, ECON2901, ECON2902. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit examines the role of the state, rationale for planning and market mechanisms in developing economies, and also the sociocultural preconditions and economic requirements for a market economy. It focuses on a wide range of developmental problems and issues from both microeconomic and macroeconomic points of view. It closely studies the integration process of the traditional segment of a developing society into its modern counterpart in countries selected from Asia, Africa, Latin America, the Caribbean, and the Pacific regions.

ECON 3003 Hierarchies, Incentives & Firm Structure

8 credit points. **Session:** Semester 1. **Classes:** Three lectures per week. **Prerequisites:** Either ECON2001 or ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam.

NB: Department permission required for enrolment.

This unit deals with the coordination and motivation problems faced by firms. More specifically this unit examines: whether firms use price or command mechanisms to allocate resources within firms; the problems associated with designing incentive contracts; the principles of efficient contract design and; the real world applications of those principles. The final section deals with the manner in which the coordination and motivation problems faced by firms determines their financial, vertical and horizontal structure.

ECON 3004 History of Economic Thought

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2002, ECON2901, ECON2902, ECOP2001, ECOP2002. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit deals with the evolution of economic ideas from the late seventeenth century to the present day, with emphasis on the intellectual and social background that influenced the more important contributions. After a discussion of mercantilism and physiocracy, the work of Adam Smith and Ricardo are studied in detail. Nineteenth century economics is studied with special reference to the early criticisms of Ricardo, the work of John Stuart Mill and Marx, and the marginal revolution. Developments of the twentieth century, subsequently covered, include production, capital and distribution theory, the imperfect competition and Keynesian revolutions, and post-war developments.

ECON 3005 Industrial Organisation

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit of study examines the nature of inter-firm rivalry in industries with market power. It explores the various ways in which firms can increase their market power by: extracting more surplus from consumers, by colluding with rivals or by excluding entrants. The unit also analyses the international competitiveness of industries in the context of industry assistance and the prevalence of foreign multinationals. Competition policy is also discussed.

ECON 3006 International Trade

8 credit points. **Session:** Summer, Semester 1. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit of study provides a systematic analysis of the theory of international trade and trade policy. Initially differences between countries are emphasised as the source of trade and the gains from trade. Models that are examined include the Classical-Ricardian model, the Heckscher-Ohlin model and the Specific-Factors model. Next economics of scale and imperfect competition are introduced as sources of trade and gains from trade. The unit concludes with an examination of empirical studies aimed at testing trade theories. The analysis of trade policy begins with a discussion of the instruments of trade policy, in particular, tariffs and quotas and their effect

on welfare. This discussion is then extended to the case of imperfect competition and strategic trade policy.

ECON 3007 International Macroeconomics

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2002, ECON2902. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit studies macroeconomic theory and policy in a global trading world. The microfoundations of the various sectors are examined in the context of an open economy. The evolution of international money and capital markets is described, the operation of the foreign exchange market is examined, showing how its microstructure affects its macro performance. Theories and tests of the efficiency of international capital markets are surveyed, as well as core theories and tests of exchange rate and asset price determination. The unit develops the macroeconomic implications of monetary and fiscal policies for small and large open economies for different regimes.

ECON 3008 Labour Economics

8 credit points. **Session:** Semester 1. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901, ECOP2001, plus one of ECON2002, ECON2902, ECOP2002. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit aims to provide an understanding of labour markets and related issues such as work conditions, pay and employment levels. Labour supply and demand, theories of wage determination, labour mobility and discrimination are examined. It also analyses the role of trade unions and labour market contracts. These topics are applied to current issues in Australian labour markets such as enterprise bargaining, the role of centralised wage fixing systems, training and other labour market programs. Policies designed to improve the functioning of the labour market are examined and particular attention is given to the problem of persistent unemployment.

ECON 3009 Markets, Regulation & Government Policy

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901, ECOP2001 plus one of ECON2002, ECON2902, ECOP2002. **Assessment:** Assignments; Mid-semester exam; Final exam.

NB: Department permission required for enrolment.

This unit addresses contemporary economic issues drawn from a particular area. The focus of the unit varies from year to year. Examples include housing economics, health economics, trade practices or economies in transition. The unit shows how economic analysis is used to provide an understanding of particular markets, emphasising the institutional setting and the economic rationales for government intervention.

ECON 3010 Monetary Economics

8 credit points. **Session:** Semester 1. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901, ECON2002, ECON2902. **Assessment:** Assignments; Mid-semester exam; Final exam.

This unit studies the crucial role that money plays in an economy and examines theory, policy and empirical testing. It analyses why money is used, why it differs from other goods and assets. The microfoundations of money demand and supply are developed. Theories of interest rates and the transmission mechanism are developed. The role and operation of banks in the financial intermediation process and the control and supervision of financial institutions by the Central Bank are also considered. Monetary Policy is intensively analysed.

ECON 3011 Public Finance

8 credit points. **Session:** Semester 1. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam.

Public Finance is about the taxing and spending decisions of governments. The unit covers a wide range of public finance topics. After an introduction to welfare economics and the role of government in the economy, the unit focuses on the revenue side of the budget: tax incidence, efficient and equitable taxation, the Australian system of revenue raising, issues of tax reform and the theory and practice of public utility pricing. It then focuses on the expenditure side of the government budget: public goods, externalities, and programs aimed at redistribution. It also introduces techniques of policy evaluation.

ECON 3012 Strategic Behaviour

8 credit points. **Session:** Semester 2. **Classes:** Three lectures per week. **Prerequisites:** One of ECON2001, ECON2901. **Assessment:** Assignments; Mid-semester exam; Final exam.

To think and act strategically, one needs to evaluate the effect of one's actions on the actions of others. As most economic decisions are strategic, such as the decision to lower a price or introduce a new tax, economics, if it is to avoid simplistic models, requires a theoretical framework capable of illuminating strategic behaviour. This unit offers a comprehensive, critical introduction to the theory which purports, not only to satisfy this theoretical need, but also potentially

3. Undergraduate units of study

to unify the social sciences: game theory. After examining important concepts of game theory, the unit investigates the repercussions for the theory of bargaining and for the evolution of social institutions.

ENTO 2002 **Entomology and Parasitology**

6 credit points. A/Prof Nick Sangster. **Session:** Semester 2. **Classes:** 2 lec & 3 prac/wk; individual insect collection (1 hr/wk). **Assessment:** One 2 hr exam (50%), prac quizzes, test (35%), insect collection (15%).

This unit provides an introduction to insects and animal parasites. In Entomology, lectures include physiology, ecology and principles of insect control. In Parasitology, there will be three lectures per week covering the range of Helminths (round and flatworms) infecting the internal organs of farm animals, including life cycles, parasite identification and biology, host/parasite relationships and control of parasite infections.

Entomology practicals deal with insect morphology and taxonomy including some information on economically important insect pests. Students must make a small but representative insect collection. Parasitology practicals will deal with parasite identification, lifecycles and isolation of parasites and/or their eggs from faeces.

ENTO 4001 **Agricultural Entomology 4A**

24 credit points. A/Prof H Rose. **Session:** Semester 1. **Prerequisites:** ENTO1001. **Corequisites:** ENTO4002.

The entomology specialisation prepares students for careers in entomology and crop protection. Students are required to complete a relevant 24 credit point research project and take the following two core units and two other relevant 6 credit point units of study, approved by the program coordinator.

Insect Taxonomy 6 credit points.

This unit is designed to provide experience in systematics and taxonomy of insects. Under the tutelage of entomologists from the Australian Museum, and the Macleay Museum, students will be exposed to the theory of modern systematics as well as classifying insects to family level of some orders. Students are required to make a representative collection of insects.

Ecology 6 credit points.

This unit of study is given by the School of Biological Sciences (BIOL 3024).

Research Project 24 credit points.

A research project will be undertaken under the supervision and approval of the program coordinator in any area of entomology.

ENTO 4002 **Agricultural Entomology 4B**

24 credit points. A/Prof H Rose. **Session:** Semester 2. **Prerequisites:** ENTO1001. **Corequisites:** ENTO4001.

See ENTO4001 Agricultural Entomology 4A

Textbooks

See ENTO4001 Agricultural Entomology 4A

ENVI 1002 **Geomorphic Environments**

6 credit points. Dr Stephen Gale. **Session:** Semester 1. **Classes:** 3 lec & prac/tut/wk. **Assessment:** One 2hr exam, class work.

NB: This unit of study is available to students in the Bachelor of Science (Environmental) and the Bachelor of Land & Water Science only.

This unit of study introduces Earth's geophysical environments, from the origin and development of the planet through to its evolution and structure. Following this, the unit investigates the evolution of the physical environment, with particular examination given to the hydrosphere and landforms.

ENVI 3003 **Law and the Environment**

4 credit points. **Session:** Semester 1. **Classes:** 3 lec/wk. **Prerequisites:** Entry by permission of Course Coordinator only. **Assessment:** Continual throughout semester.

NB: Department permission required for enrolment. This unit of study is available to Study Abroad students and students enrolled in the Bachelor of Science (Marine Science), Bachelor of Resource Economics and Bachelor of Land & Water Science only.

This unit encompasses the core material of ENVI 3001 and covers topics in environmental ethics, law, planning, regulation and management for the built and natural environments.

ENVI 3004 **Environmental Impact Assessment**

4 credit points. **Session:** Semester 2. **Classes:** 3 lec/wk. **Prerequisites:** Entry by permission of Course Coordinator only. **Assessment:** Continual throughout semester.

NB: Department permission required for enrolment. This unit of study is available to Study Abroad students and students enrolled in the Bachelor of Science (Marine Science), Bachelor of Resource Economics and Bachelor of Land & Water Science only.

This unit encompasses the core material provided in ENVI 3002 and covers topics in environmental impact and risk assessment.

Finance in the Bachelor of Agricultural Economics

Units offered by the Discipline of Finance in the Faculty of Economics and Business follow this entry. BAgEc students are not normally permitted to enrol in Honours units.

FINC 2001 **Corporate Finance I**

8 credit points. **Session:** Summer, Winter, Semester 1, Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** ECON 1001, ECON 1002; ECMT 1010, ACCT 1001 (or ACCT 1003). **Assessment:** One 3hr exam, Assignments, Mid-semester test.

NB: Study in Finance commences in second year.

This unit provides an introduction to basic concepts in corporate finance and their application to (1) valuation of risky assets including stocks, bonds and entire corporations, (2) pricing of equity securities, and (3) corporate financial policy decisions including dividend, capital structure and risk management policies. An emphasis is placed on the application of ideas and current practices in each of these areas.

FINC 2002 **Corporate Finance II**

8 credit points. **Session:** Summer, Semester 2. **Classes:** Two hours of lectures, one workshop and one tutorial per week. **Prerequisites:** FINC2001. **Assessment:** One 3hr exam, Assignments, Mid-semester test.

This unit builds on FINC2001 Corporate Finance I, by extending basic concepts in corporate financing, investing and risk management. The first half of the unit is devoted to current theories of corporate financing and their practical application in corporate investment and capital budgeting. The second half of the unit examines securities and securities markets with an emphasis on pricing, investment characteristics and, importantly, their use by corporations to manage risk. The securities examined include: bonds and related fixed income products; futures; options; and securities denominated in foreign currencies. The goal of the unit is to broaden students' knowledge of corporate finance in preparation for further study in finance in third year.

FINC 2004 **Introductory Mathematical Finance**

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week; Additional workshops as required. **Assumed Knowledge:** It is recommended that students reach the level of HSC 3 Unit mathematics prior to undertaking the unit. It is also recommended but not required that students either undertake the Maths/Stats major or avail themselves of units offered in mathematics and statistics. Other recommended units providing a useful background include ECON 2001, ECON 2901 and ECON 2903. **Prerequisites:** FINC2001. **Assessment:** One 3hr exam, Assignments, Mid-semester test.

The principle objective of this unit is to introduce students to the basic elements of mathematical finance. Students are exposed to key areas in the modern theory of finance and corporate financial policy with specific emphasis on their development and treatment from mathematical and statistical foundations. The unit provides necessary mathematics background. Topics that are introduced from a more mathematical perspective include: principles of modern financial valuation and analysis; asset pricing theory and market efficiency; theory of portfolio selection and management; and measurement and management of financial risk.

FINC 3001 **International Financial Management**

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004. **Assessment:** Two 2 hr exams; Project; Assignments.

Markets are increasingly globalised. There are very few businesses or industries that are not required to deal with issues such as foreign currency, foreign competition and direct investment. This unit is designed to allow students to extend their understanding of basic principles in finance to an international environment. Globalisation of markets introduces risks but also opens up profitable opportunities. Topics covered include: foreign currency valuation and markets; international parity conditions; measuring and managing foreign exposure; international portfolio management; capital budgeting and foreign direct investment; international tax management and international financing strategy.

FINC 3002 **Derivative Securities**

8 credit points. **Session:** Semester 1. **Classes:** Two hours of lectures and one tutorial per week. **Assumed Knowledge:** Calculus, regression, probability theory, random distributions. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004. **Assessment:** One Report/sem; Exams; Assignment.

Options, futures and swaps are derivatives of underlying securities such as commodities, equities and bonds. These types of securities are increasingly used to manage risk exposure and as a relatively low-cost-way of taking a position in a security or portfolio. They are also being used as part of senior management compensation as a way of attempting to align the interests of shareholders with that of management. This unit is designed to provide an introduction to this important area of finance without requiring a high level of mathematical sophistication. However, a strong quantitative base is an advantage.

FINC 3003 **Mergers and Acquisitions**

8 credit points. **Session:** Semester 1. **Classes:** Two hours of lectures and one tutorial per week; Additional workshops as required. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004. **Assessment:** Final exam, Tutorial work, Project.

Mergers and acquisitions are one of the most important activities undertaken by investment banks as they are used by businesses to secure growth. The analysis of mergers and acquisitions tools from modern financial economics is needed. This unit commences with a review of existing business valuation techniques. The unit then examines capital structure decisions and management incentive issues (corporate control) before examining the motives for mergers and acquisitions. Some acquisitions are motivated by value improvement created by correcting incentive problems. Many bad acquisitions however are motivated by bad incentives that decrease value. Corporate governance is concerned with structuring companies to maximise the value of organisation. The emphasis in this unit is a practical one by providing the wherewithal to (re)structure a business, or to provide advice on how wealth can best be created. It aims to prepare students for a career in mergers and acquisitions, as a corporate advisor in a merchant bank or as an analyst employed in broking or funds management.

FINC 3004 Trading and Dealing in Security Markets

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004. **Assessment:** Mid-semester exam; Final exam; Tutorial work; Project.

This unit is concerned with the processes which turn orders into trades in securities markets, and the forces which mould and affect both order flow and order execution. The unit is an introduction to some fundamental market design and structure ideas.

The increased worldwide emphasis on capital markets and stock exchanges have brought market microstructure into the limelight. This unit provides insights into the lessons from securities market microstructure that can be used to gain a better understanding of today's global financial markets. At the end of the unit, students should be able to understand (1) how the international markets for foreign exchange, swaps, bonds and equities are organised, (2) how trading is conducted in these markets and how these transactions are cleared, (3) how the markets are regulated, if they are supervised and what risks different counterparties face in these markets. The unit aims to equip students to independently analyse international investment and financing alternatives and to estimate expected returns and costs taking into account liquidity risk, price volatility and credit risk.

FINC 3005 Financial Valuation: Case Study Approach

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures per week; One workshop session (not every week). **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004. **Assessment:** Case study, Workshop work, Exam, Small project.

This unit focuses on the application of financial principles and methods to develop up-to-date problem solving techniques using an applied case study approach. The unit pulls together important contributions from earlier units in the Finance major. Cases include: issues in capital budgeting and cost of capital; financial decision making; and valuation of projects and companies. In addition to lectures, the unit is based around computer lab workshops. There is a strong emphasis on working in teams to solve common problems.

FINC 3007 Investments and Portfolio Management

8 credit points. **Session:** Semester 1. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004.

This unit is designed to provide a comprehensive analytical approach to the modern theory of investments. Topics covered include: the valuation of bonds and stocks; mean-variance analysis; Markowitz type portfolio analysis; duration and convexity analysis; term structure of interest rates; option pricing; portfolio insurance; performance evaluation; and forecasting. Basic statistics and probability concepts are reviewed at the beginning to ensure that all students have adequate understanding. Although analytical aspects of investments theory are stressed, there is also an equal amount of emphasis on the intuitive as well as practical aspects of the subject.

FINC 3008 Bank Financial Management

8 credit points. **Session:** Semester 2. **Classes:** Two hours of lectures and one tutorial per week. **Prerequisites:** FINC 2001; FINC 2002 or FINC 2004; ECON 2001 or ECON2901; ECON 2002 or ECON 2902.

The central objective of this unit is to expose students to the basic principles of commercial bank management. The topics that are covered include: the theory and practice of banking from a financial management perspective; banks and the financial services industry; regulatory restrictions and financial management; performance analysis and strategic planning; asset management and liquidity; investment and loan management; liability and deposit management; capital structure and dividend decisions; and financial management implications of electronic banking, international banking, and other developments.

GENE 2001 Agricultural Genetics 2

6 credit points. Dr Sharp, Dr Darvey, Assoc. Prof. Moran, Assoc. Prof. Nicholas. **Session:** Semester 1, Semester 2. **Classes:** (3 lec, 1 tut & 2 prac)/wk. **Prerequisites:** BIOL1201 and BIOL1202 or BIOL1001 and BIOL1002, BIOM1001. **Assessment:** One 3hr exam, tests, assignments.

This lecture and practical unit of study provides an introduction to the genetics and breeding of plants and animals. It provides an understanding for parallel and following courses. Lectures cover the basics of gene transmission and interaction, cytogenetics, molecular genetics, population and quantitative genetics, as well as the more applied aspects of plant and animal breeding and biotechnology. Practicals emphasise, with agricultural examples, the procedures of genetic and cytogenetic analysis, and the use of computers in simulation procedures in population genetics, quantitative inheritance and selection programs, and provide exposure to current plant and animal breeding and biotechnology.

GENE 4001 Agricultural Genetics 4A

24 credit points. Dr Darvey, Prof Sharp, A/Prof Moran, Prof Nicholas. **Session:** Semester 1. **Prerequisites:** BIOM2001, GENE2001.

The coursework is designed for students wishing to concentrate on those areas of genetics or breeding that are seen as most relevant to their present interests and career prospects. Students should consult with the relevant discipline groups and Discipline Leaders in determining module combinations. Modules at Cobbitty may be run in intensive mode either during or between semesters. This unit of study is made up of a selection of the following modules, or any two other 6 credit point units with the approval of Discipline Leaders.

Cytogenetics

6 credit points. Coordinator: Dr Darvey. Location: Cobbitty. **Assessment:** one 3hr exam, assignments, practical reports, presentation. Lectures in cytology and cytogenetics, with special emphasis on cereals and the application of chromosome engineering to plant breeding. The laboratory unit includes routine cytological procedures and tissue culture technology.

Plant Breeding

6 credit points. Coordinator: Dr Darvey. Location: Cobbitty. **Assessment:** one 3hr exam, assignments, practical reports, presentation. Lectures and practical work devoted to the theory, philosophy and practice of plant breeding, screening techniques, conservation of genetic variability, breeding for disease resistance, the use of tissue culture in breeding, with examples from both field and horticultural crops.

Population and Quantitative Genetics

6 credit points. Coordinator: Assoc Prof Moran. Location: Camden. **Assessment:** one 3hr exam, assignments, practical reports, presentation.

A series of lectures and practical periods dealing with population genetics, quantitative inheritance and animal breeding given by the Faculty of Veterinary Science.

Molecular Genetics and Breeding

6 credit points. Coordinator: Prof Sharp. Location: Cobbitty. **Assessment:** one 3hr exam, assignments, practical reports, presentation. Lectures and laboratory work covering the structure and function of plant genomes and genes, the technology and results of DNA transformation, and then analysis of agronomic traits by both molecular techniques and by genetic mapping using molecular and other genetic markers.

Animal Genetics

6 credit points. Coordinator: Prof Nicholas. Location: Camperdown. **Assessment:** one 3hr exam, assignments, practical reports, presentation.

Lectures covering those aspects of genetics that are relevant to animals, with particular emphasis on genetic basis of animal disease. Topics include biochemical disorders, chromosomal abnormalities, non-Mendelian disorders, immunogenetics, pharmacogenetics, genetic variation in pests, parasites and pathogens, and genetic and environmental control of disease. Given by the Faculty of Veterinary Science.

Applications of Recombinant DNA Technology

6 credit points. Coordinator: Dr Lyon. Location: Camperdown. **Assessment:** one 2hr exam, assignment, practical report.

Lectures, practicals and tutorials on the application of DNA technology and the genetic manipulation of prokaryotic and eukaryotic organisms. Given by the School of Biological Sciences.

Bioinformatics and Genomics

6 credit points. Coordinator: Dr N Firth. Location: Camperdown. **Assessment:** one 2hr exam, assignment, practical report.

Lectures, practical assignments and tutorials on the application of bioinformatics to the storage, retrieval and analysis of biological information. The emphasis is on macromolecule sequences, other

3. Undergraduate units of study

biological information is considered. Together with classical taxonomy and biodiversity. Given by the School of Biological Sciences.

GENE 4002 Agricultural Genetics 4B

24 credit points. Prof Sharp. **Session:** Semester 2. **Prerequisites:** BIOM2001, GENE2001. **Corequisites:** GENE4001. **Assessment:** Assessment: initial presentation, literature review, final presentation, thesis. Research Project. See GENE4001 Agricultural Genetics 4A.

Geography units

Geography is a varied and versatile subject covering a broad spectrum of knowledge. It was once concerned principally with the description of the earth, but modern geography now embraces society's relationship with the earth within a scientific and highly-structured framework. Currently there are three main elements of Geography actively pursued by the Division. Aspects of Physical Geography deal with phenomena such as landforms, plants and soil as elements of physical landscapes. Human geography consists mainly of social and economic geography and is concerned with such features as rural and urban settlements, cultural influences and way of life. Economic geography includes the study of agriculture, industry, transport, marketing and resources. Environmental geography is concerned with the human/land relationships. This was a traditional theme used as early as in Griffith Taylor's time in the 1920s. It has come to the forefront with contemporary concerns for the environment. However, these three divisions are arbitrary, and some courses involve integration of various aspects of them all.

As theoretical understanding and quantitative precision have advanced, geography has developed as a useful discipline for analysing and proposing solutions to practical problems. Geographers have proved their value in such fields as local government, town and regional planning, decentralisation and environmental management.

Conducted field excursions

Students in Junior courses are required to attend two one-day excursions to localities within about 150 km of Sydney. In Intermediate and Senior courses, students are required to take part in long excursions, of about a week's duration, based on a centre remote from Sydney. However, in physical and environmental geography, there may be the chance of substituting for this remote excursion by having a number of days each semester in the field (up to five days each semester). Those who wish to apply for an interest-free loan to enable them to meet the costs of excursions should consult the SRC and the financial assistance section of the central administration.

Excursion work will be assessed by written assignment and/or examination. Exemption from excursions will only be granted under exceptional circumstances. Requests for exemption must be submitted in writing to the Head of Division.

Geography handbook

Further details of unit descriptions, departmental activities, excursions, and other relevant material are contained in the Geography Handbook available from the Enquiry Office in the Madsen Building.

Geography Senior units

The Division offers six senior units of study in 3 streams. Each unit of study consists of three lectures and the equivalent of nine hours assigned work (which may comprise tutorials, practicals, individual course work and/or fieldwork) weekly. All students are required to attend compulsory one to three day field excursions associated with each unit of study which are held within the semester. Some units hold two or three such excursions.

Unit descriptions can be found in the Faculty of Science Handbook.

- GEOG3002 Environmental Geomorphology
- GEOG3101 Catchment Management
- GEOG3201 Asia Pacific Field School
- GEOG3202 Sustainable Cities and Resource Regions
- GEOG3203 Globalisation and Regions in Transition.

GEOG 1001 Biophysical Environments

6 credit points. Assoc. Prof. Short, Dr Gale. **Session:** Semester 1. **Classes:** 3 lec & 3hr prac/wk. **Assessment:** One 2hr exam, 1500w report, prac assignments.

This unit of study provides an introduction to the earth's biophysical environments. It begins by considering the earth's place in the universe, its origin and its development, and the nature and evolution of the earth's structure. This is followed by an investigation of the evolution of the earth's physical environment and its development to its present stage over time. With this background, the unit of study goes on to examine the earth's hydrosphere and atmosphere and the major landforms produced by the interaction of atmospheric and ocean processes with the earth's surface, including fluvial, arid, coastal and glacial systems.

GEOG 1002 Human Environments

6 credit points. Prof. Connell & Dr W Pritchard. **Session:** Semester 2. **Classes:** 3 lec & 3hr prac/wk. **Assessment:** One 2hr exam, 2000w essay, prac exercises.

Human Environments develops understanding of processes and consequences of interactions among people and between people and their environments. Questions, challenges and issues that stem from the relationships and transformations in the built, natural, social and spatial environments are introduced and scrutinised. Social structures and development are explored and principles of human geography are presented through study of the location and distribution of economic activities with special reference to Australia and the Asia-Pacific region.

GEOG 2101 Environmental Change and Human Response

*** No info available for 2005. ***

GEOG 2102 Resource and Environmental Management

*** No info available for 2005. ***

GEOG 2201 Cultural and Economic Geography

8 credit points. Prof Connell, Dr W Pritchard. **Session:** Semester 1. **Classes:** 3 lec & 5hr tut or prac or fieldwork/wk. **Prerequisites:** 36 credit points of Junior units of study, including GEOG 1001 or 1002 or ENVI 1002 or ECOP 1001 or 1002. **Assessment:** One 2hr exam, two 2000w essays, tut papers, prac and fieldwork reports. **NB: Other Information:** As for GEOG 2001

Human Geography stream: This unit of study exams the spatial processes that underpin cultural and economic activity. Two themes dominate: firstly cultural and economic activities are defined by multiple sets of spatial relations; and secondly, that economic and cultural processes and practices are by necessity inter-related. These arguments provide the entry points for debate on the social construction of economic and cultural spaces, with specific attention to topics including urban change and gentrification; ethnicity; the geographies of global financial flows; and the development of industrial clusters. The unit also develops arguments relating to the economic and cultural geographies of food production and consumption.

GEOG 2202 Urban and Political Geography

8 credit points. Lecturers to be advised. **Session:** Semester 2. **Classes:** 3 lec & 5hr tut or prac or fieldwork/wk. **Prerequisites:** 36 credit points of Junior units of study, including GEOG 1001 or 1002 or ENVI 1002 or ECOP 1001 or 1002. **Assessment:** One 2hr exam, two 2000w essays, tut papers, prac and fieldwork reports. **NB: Other Information:** As for GEOG 2001.

Human Geography stream: This unit of study starts by examining urban processes and problems in developed and developing countries. For developed countries, the focus is on urban economies, suburbs, urban politics, and the nature of the built environment. For developing countries, urbanisation trends and the ideologies of planning policies are considered. The unit of study considers the political constructions of space, with specific reference to issues of sovereignty and the changing character of political borders and divisions. Topics include diasporas, refugee policies, the role of culture in nationalism, and global geopolitical trends.

GEOG 2321 Fluvial and Groundwater Geomorphology

6 credit points. Dr Melissa Neave (School of Geosciences), Dr Willem Vervoot (Faculty of Agriculture, Food and Natural Resources). **Session:** Semester 2. **Classes:** 2 lec & 1 2 or 3 hour prac per week. **Prerequisites:** GEOG(2311 or 2001) or 36 credit points of Junior study including GEOG1001 or ENVI (1001 or 1002) or GEOL (1001 or 1002 or 1501). Students in the Bachelor of Resource Economics should have 36 credit points of study in Biology (or Land and Water Science), Chemistry and Mathematics. Students in the Bachelor of Land and Water Science should have ENVI1001, 12 credit points of Chemistry, 6 credit points of Biology, BIOM1002. **Assessment:** One 2 hr exam, one quiz, one field report, practical exercises.

This unit of study provides an introduction to the fundamentals of fluvial geomorphology (the study of surface water as an agent of landscape change) and groundwater hydrology. The fluvial geomorphology section of the unit will describe the movement of water in stream channels and investigate the landscape change associated with that movement. Topics to be covered will include open channel flow hydraulics, sediment transport processes and stream channel morphology. Practical work will focus on the collection and analysis of field data. The quantity and quality of the groundwater resources are closely linked to geology and fluvial geomorphology. The groundwater section of this unit is based around four common

groundwater issues: contamination, extraction, dryland salinity and groundwater-surface water interaction. In the practical component, common groundwater computer models such as FLOWTUBE and MODFLOW will be used to further explore these problems.

Government in the Bachelor of Agricultural Economics

In addition to the Level 1000 units which follow this entry, the Discipline of Government and International Relations in the Faculty of Economics and Business also offers the following units of study to students in their Second and Third Years of study. Refer to the Faculty of Economics and Business Handbook for unit descriptions.

- GOVT2091 Government 2 Honours
- GOVT2101 Human Rights and Australian Politics
- GOVT2104 The Australian Political Party System
- GOVT2106 Australian Foreign & Defence Policy
- GOVT2201 International Politics of Economic Relations
- GOVT2205 International Security in the 21st C
- GOVT2206 International Organisations
- GOVT2209 International Relations Theory
- GOVT2301 Social Change and Politics
- GOVT2404 Europe in World Affairs
- GOVT2410 Globalisation and National Governance
- GOVT2502 Policy Analysis
- GOVT2504 Government and Business
- GOVT2507 Public Sector Management
- GOVT2605 Ethics and Politics
- GOVT2606 Modernity and Politics
- GOVT2701 Politics and Society in Modern Middle East
- GOVT2702 Israel, Palestinians and the Arab States
- GOVT2703 Consultation: Community, Business, Govt.

GOVT 1101 Australian Politics

6 credit points. **Session:** Summer, Semester 1, Semester 2. **Classes:** Two lectures and one tutorial per week. **Assessment:** Essay; Exam; Participation; Paper.

This unit introduces students to debates about the nature and limits of Australian democracy, to the major institutions of Australian politics, and to the distribution of power in Australian society. Major institutions and forces such as parliament, executive government, the federal system, political parties and the media are examined as arenas of power, conflict and consensus. Who rules? How? Which groups are excluded?

GOVT 1202 World Politics

6 credit points. **Session:** Summer, Semester 2. **Classes:** Two lectures and one tutorial per week. **Assessment:** Assignment; Essay; Exam; Participation.

This unit introduces the core content of the field of international relations. The first part of the unit presents the realist, liberal, Marxist and constructivist paradigms of international relations. The second part of the unit discusses the key actors and processes political scientists define in the field, including the state, decision makers, bureaucratic organisations, and classes. The final part of the unit focuses on international security, international political economy, and global problems.

GOVT 1406 International Business and Politics

6 credit points. **Session:** Semester 2. **Classes:** Two lectures and one tutorial per week. **Assessment:** Assignment; Essay; Exam; Participation.

This unit introduces students to the international business environment, particularly those forces that shape international business relations and markets: international political relations, international trade, international financial markets, and the global economic and political architecture. The unit surveys issues associated with global

marketplaces, trade and investment, culture, internationalisation, the international monetary system, foreign exchange, trade agreements, markets in Asia, international investment risk, risk analysis for international business, and risk mitigation. The unit is especially concerned with international business as it relates to international business and politics in Asia.

GOVT 1609 Ethnicity, Nationalism and Citizenship

HORT 1001 Horticultural Science 1A

6 credit points. Assoc. Prof. Rose, Prof. Burgess, Assoc. Prof. Maxwell, Dr McConchie.

Session: Semester 1. **Classes:** (3 lec & 3 prac)/wk, excursion. **Assumed Knowledge:** HSC 2 unit Chemistry or 3 unit Science. **Assessment:** One 2hr exam, prac, assignments. This unit of study introduces the principles and practices of modern horticulture and agriculture and examines the relationships between the plants, animals and natural resources which make up production systems. The concepts of environmental and economic sustainability of horticultural and agricultural systems will be introduced.

Topics covered include Australian farming systems, regional horticultural and agricultural industries, farming operations and plant identification.

Textbooks

Reference books V. Squires and P. Tow (eds) Dryland Farming: a Systems Approach (Sydney University Press, 1992) C.J. Pearson et al. A Plain English Guide to Agricultural Plants (Longman Cheshire, 1993) M.W. Denny Air and Water: The Biology and Physics of Life's Media (Princeton University Press, 1993)

HORT 1002 Horticultural Science 1B

6 credit points. Assoc. Prof. Rose, Dr Sharma, Dr Cook. **Session:** Semester 2. **Classes:** (3 lec & 3 prac)/wk. **Corequisites:** HORT1001. **Assessment:** Assessment one 2 hr exam, prac, assignments.

This unit of study develops the theme of environmental sustainability of horticultural and agricultural production, and examines the physical principles which underpin these production systems and the broad ecological relationships between plants, animals and natural resources used in horticulture and agriculture. Current and future ecological issues facing horticulture and agriculture are discussed. In addition, the static and dynamic forces involved in horticultural and agricultural structures and equipment, the behaviour and properties of water, and the physical aspects of weather and the Australian climate will be discussed.

Textbooks

See HORT1001 Horticultural Science 1A

HORT 2002 Horticultural Science 2

6 credit points. Jenny Jobling. **Session:** Semester 2. **Classes:** 2 lec/wk, 3hr lab/wk. **Prerequisites:** HORT1001, HORT1002. **Assessment:** One 2hr exam (60%), Practical Book (15%) Assignments (25%). Two assignments during the course.

The unit of study covers topics on perennial fruit production, nursery management and plant identification. Topics in fruit production cover crop physiology and growth with special emphasis on management activities during winter/spring. Nursery management includes a discussion of the major aspects of pot plant production, including protected cropping and environmental auditing. Plant identification will build on knowledge and skills learnt in Hort 1001 to provide students with detailed foundation of plant use in ornamental horticulture, based around plant families.

Textbooks

KA Handreck and ND Black Growing Media for ornamental Plants and Turf. 1994 UNSW Press Randwick Australia.

P Baxter and P Tankard Growing Fruit in Australia. 1990 Macmillan Press Australia,

HORT 3001 Horticultural Science 3

8 credit points. Jenny Jobling. **Session:** Semester 1. **Classes:** 3 lec, 1 prac/wk. **Prerequisites:** CROP2001 or HORT2001 or AGRO2002. **Assessment:** One 3hr exam (60%), assignments (40%).

Emphasis is given to the scientific and physiological basis for fruit and winegrape production and to the sustainable production of vegetables. There is also a component that covers urban horticulture. This looks at the botany of the main species used in urban plantings; the physiology, ecology and management of urban landscapes. The unit develops skills in the evaluation of the technical and environmental status of established orchards, vineyards, vegetable crops and urban landscapes.

Textbooks

Reference books:

P Baxter Growing Fruit in Australia (Macmillan Australia, 1997)

A Bradshaw, B Hunt and T Walmsley Trees in the Urban Landscape (Spon, 1995)

HORT 3002 Flower and Nursery Crops 3

4 credit points. Dr McConchie. **Session:** Semester 2. **Classes:** (2 lec, 2 prac)/wk [Excursions: Weeks 2, 4 Thursday (all day); Weeks 5, 11 Thursday (afternoon)]. **Prerequisites:** CROP 2001 or HORT 2001 or AGRO 2002. **Assessment:** One 2 hr exam (60%), assignments (40%).

3. Undergraduate units of study

A discussion of the major aspects of the production of cut-flower and nursery crops, including protected cropping and glasshouse management. The unit will provide students with a detailed appreciation of the need for and methods of developing more precise production technology.

Textbooks
Reference book

K Handreck and N Black Growing Media for Ornamental Plants and Turf (NSW Univ Press), 1991

HORT 3003 Postharvest Biology and Technology 3

4 credit points. Dr R McConchie. **Session:** Semester 1. **Classes:** (1 lec, 1 tut, & 2 prac)/wk. **Prerequisites:** CROP 2001 or HORT 2001 or AGRO 2002. **Assessment:** Assignments (40%), two 1 hr exams (60%).

The unit develops understanding and skills relevant to the maintenance of quality during the harvesting, handling, storage and marketing of fresh plants and plant parts. The subject integrates the postharvest physiology of products that are handled or marketed in a living state, with the technological and economic challenges associated with delivering them from the field to the consumer. Case study examples will be drawn from fruits, vegetables, cut flowers, nursery and foliage crops, turf and edible fungi. Students will study all operations from harvesting to consumer evaluation.

HORT 4001 Horticultural Science 4A

24 credit points. **Session:** Semester 1. **Prerequisites:** HORT3001.

This specialist year trains people for careers in professional aspects of horticultural science and extension. It provides an excellent background for entry into all aspects of horticultural production, research, and consultancy ranging across all discipline areas of horticulture including viticulture. Emphasis is given to identifying ways of minimizing the impact of horticultural practices on the environment so that graduates are able to meet the national demand for sustainable horticultural practices.

Of the following, Issues A and Issues B are compulsory while plus Advanced Horticultural Production, Viticulture, Vineyard and Winegrape Management, Plant Breeding, Soil Biology, Postharvest Biology and Technology, Flower and Nursery Production, Turf Management or Urban Horticulture are electives (two to be taken).

Issues A

6 credit points Coordinator Dr Robyn McConchie. Classes: March Semester: (3 lect and 3 prac)/wk

This is a compulsory unit. Students attend a series of discussion workshops on minimizing the environmental impact of horticultural enterprises and undertake a major horticultural systems analysis designed to provide them with a broad overview of current issues affecting the horticultural industries. In addition students will add to their general horticultural knowledge through plant identification and use workshops. **Assessment:** one 1 hr exam (35%), practical tests (15%), Issues seminar (15%), Hort Systems consulting report (35%)

Issues B

6 credit points Coordinator Dr Robyn McConchie. Classes: July Semester: (3 lect and 3 prac)/wk

This is a compulsory unit. Students attend a series of discussion workshops with a guest speaker who will broaden your appreciation of horticultural issues plus give you an insight into the career opportunities for horticultural scientists. Students will be required to write a critical essay of 5000 words on a topic selected from a list which covers the main efficiency, marketing and environmental issues affecting horticulture. In addition students will add to their general horticultural knowledge through plant identification and plant use workshops. **Assessment:** one 1 hr exam (35%), practical tests (15%), Issues seminar (15%), Issues Critical Essay (35%).

Advanced Horticultural Production

6 credit points. Coordinator: John Eisman. Classes: March or July. Classes: External Assignments and I residency weekend. **Assessment:** assignments.

See Faculty of Rural Management Handbook.

Viticulture

6 credit points. Coordinator: Peter Hedberg. Classes: March. External Mode

Provides a perspective of regional viticultural resources, site selection, and a case study of growing season management. Includes a two day residential school in April.

See Faculty of Rural Management Handbook.

Winegrape Vineyard Management

6 credit points. Coordinator: Peter Hedburg. Classes: July.

Uses a case study approach to develop skills in detailed vineyard design and planning, including budgeting. Students are recommended to undertake the Viticulture unit as prior learning. Includes a two day residential school and tour at Orange in September.

See Faculty of Rural Management Handbook.

Plant Breeding

6 credit points
See GENE 4001.

Soil Biology and Diversity

6 Credit Points
See PPAT 4001.

Postharvest Biology and Technology

4 credit points. Coordinator: Dr Robyn McConchie. Classes: March Semester: (3 lect and 3 prac)/wk.

The unit develops understanding and skills relevant to the maintenance of quality during the harvesting, handling, storage and marketing of fresh plants and plant parts. The subject integrates the postharvest physiology of products that are handled or marketed in a living state, with the technological and economic challenges associated with delivering them from the field to the consumer. Case study examples will be drawn from fruits, vegetables, cut flowers, nursery and foliage crops, turf and edible fungi. Students will study all operations from harvesting to consumer evaluation. **Assessment:** Practical reports (30%), Written examination (60%), Assignment (10%).

Flower and Nursery Production

4 credit points. Coordinator: Dr Robyn McConchie. Classes: July Semester: (2 lect and 2 prac)/wk.

A lecture and practical unit on the production of nursery and cut flower crops, and on methods used in research on precision horticulture in nursery and cut flower crops. Precision horticulture aims to achieve the most efficient use of inputs and to minimise the (adverse) environmental impact of horticultural crop production. The practical component emphasises the measurement of characteristics related to production efficiency. **Assessment:** one 3 hr exam (60%), lab book (5%), viva (10%), assignments (25%).

Turf Management

4 credit points. Coordinator: Dr Peter Martin. Classes: March Semester (2 lect and 2 prac)/wk.

Students address the scientific issues underlying the design, construction, grassing and maintenance of turf facilities including: water management, physiology of growth under turf conditions, environmental legislation and emerging issues for turf management. **Assessment:** to be advised.

Urban Horticulture

4 credit points. Coordinator: Dr Peter Martin. Classes: March Semester: (2 lect and 2 prac)/wk.

Urban Horticulture covers the horticultural botany of the main species used in urban plantings; the physiology, ecology and management of urban trees; scientific aspects of the design and management of sports fields, parklands and open areas, including management of native vegetation; and the environmental impact of urban horticultural activities and appropriate remedial strategies. **Assessment:** one 3 hr exam (50%), prac reports (25%) and assignments (25%).

Research Project

24 credit points.

A research project will be undertaken under the supervision and approval of the program coordinator in any area of horticulture.

HORT 4002 Horticultural Science 4B

24 credit points. Dr R McConchie. **Session:** Semester 2. **Prerequisites:** HORT3001. **Corequisites:** HORT4001.

See HORT4001 Horticultural Science 4A.

LWSC 1001 Land and Water Science 1A

6 credit points. Assoc Prof Rose, Prof Burgess. **Session:** Semester 1. **Assessment:** One 2 hr exam, assignments, weekly class practical tests.

This unit of study introduces the principles and practices of modern primary industries and examines the relationships between the plants, animals and natural resources that make up production systems. The concepts of environmental and economic sustainability of production systems will be introduced.

Topics covered include introduction to ecological systems, regional resources and primary industries, technology and ecosystem disturbance and plant identification.

Textbooks

V Squires and P Tow (eds) Dryland farming: a systems approach (Sydney University Press), 1992 SCARM (1998) Sustainable agriculture: assessing Australia's recent performance (CSIRO)

LWSC 1002 Land and Water Science 1B

6 credit points. Assoc Prof Rose, Dr Sharma, Dr Cook. **Session:** Semester 2. **Corequisites:** LWSC1001 Land and Water Science 1A. **Assessment:** One 2 hr exam, assignments, weekly class practical tests.

This unit of study develops the theme of environmental sustainability of primary production and examines the physical principles that underpin production systems. It examines the broad ecological relationships between the plants, animals and natural resources used in production systems, and deals with some of the problems facing

primary production in the future. In addition the static and dynamic forces involved in structures and equipment, the behaviour and properties of water in biological systems and the physical aspects of weather and the changing Australian climate will be discussed.

Topics covered include climatology, environmental physics, ecosystems management, global issues of ecological significance and plant identification.

Textbooks

Reference Books V. Squires and P. Tow (eds) *Dryland farming: a systems approach* (Sydney University Press), 1992 SCARM (1998) *Sustainable agriculture: assessing Australia's recent performance* (CSIRO) M.W. LWSC 2002 Sustainable Land and Water Management

6 credit points. Dr D Al Bakri (coordinator), Dr RW Vervoort. **Session:** Semester 2. **Classes:** 2 hrs lectures, 4 hrs (practical/fieldwork)/wk. **Prerequisites:** LWSC1001, LWSC1002. **Assessment:** Practical reports 20%, Field report 30%, 3hr exam 50%. This unit introduces students to the principles and practices of sustainable development and integrated catchment management. Students' appreciation of the principles will be facilitated through theoretical and practical case studies focusing on problems and issues facing land and water users and managers in Australia. This unit builds on knowledge gained in LWSC 1001, LWSC 1002 and SOIL 2001 and establishes the foundation for LWSC 3001 (Limnology and Water Quality) and GEOG 2303 (Groundwater Hydrology). The unit provides one of the essential building blocks for developing the conceptual framework for, and linking the other units to the central themes of, the Bachelor of Land and Water Science. The unit consists of two parts. The first part will involve a series of lectures and practical exercises. The second part of the unit is a 5-day field trip traveling from Sydney to Orange and through the Lachlan valley to the Jemalong irrigation district. During the fieldtrip, students will examine the interactions between the socio-economic and biophysical systems of the landscape, undertake data gathering and perform practical exercises in relation to a wide range of land and water issues and problems. After completion of this unit, the students should be able to: Explain the principles underlying the concepts of sustainable development and ICM, identify main land and water degradation issues in Australia and define relevant causes, effects and management options, describe the relevance of the landscape Genesis model to sustainable catchment and resource management, and explain how the salt balance and water balance are linked and their implications in relation to secondary dryland and irrigated salinity, perform techniques and procedures to estimate water/salt balances and catchment loading.

LWSC 3001 Hydrology and Catchment Management 3

4 credit points. Dr Al Bakri. **Session:** Semester 1. **Classes:** (2 lec/3 prac)wk. **Prerequisites:** LWSC2001. **Assessment:** 3 practical exercises (50%), written exam (50%). This unit of study is designed to provide students a thorough understanding of the main water quality problems and related limnological issues in Australia and the underlying hydrological processes. The unit builds on the knowledge gained in LWSC2001 and GEOG 2303. It concentrates on sources and pathways of pollutants reaching streams, lakes and reservoirs, the interactions between runoff and water quality, and pollution control within the context of integrated catchment management (ICM). The unit also covers aspects of rainfall-runoff hydrology with particular emphasis on how rainfall in a catchment is transformed into stream flow through different pathways, and how these pathways influence the timing, quantity and quality of the stream flow. On completion of this unit of study, the students should be able to: identify the different water quality issues and pollution problems in Australian water bodies, explain underlying causes and processes; relate the interaction between flow and water quality and evaluate their implications on catchment management. The students will also be able to employ limnological modelling to predict heat budget distribution; catchment loading and mass balance of given pollutants, describe stream flow duration and frequency, and select appropriate pollution control and management strategies.

LWSC 3002 Irrigation Technology 3

4 credit points. Assoc. Prof. Sutton. **Session:** Semester 2b. **Classes:** (3 lec & 3 lab)/wk for half a semester. **Prerequisites:** LWSC1001 and LWSC1002. **Assessment:** One 2 hr exam (50%), Practical exercises and a written assignment (50%).

Irrigation Technology explores the major methods of applying irrigation (flood, furrow, sprinkler and micro-irrigation) and associated water management and delivery issues. The underlying processes in each method are examined in detail and the basis of current inefficiencies and future efficiencies is identified. Practical steps for achieving maximum efficiency from each method are developed.

Textbooks

Reference book:

M.E. Jensen. *Design and Operation of farm Irrigation Systems* (ASAE 1980)

LWSC 3003 Efficient Crop Water Management Princ 3

4 credit points. Assoc. Prof. Sutton. **Session:** Semester 2a. **Classes:** (3 lec & 3 lab)/wk for half a semester. **Prerequisites:** LWSC1001 and LWSC 1002. **Assessment:** One 2 hr exam (50%), Practical exercises and a written assignment (50%).

The unit examines the processes governing water movement through the water balance applied to a cropping system. Methods of measurement and modelling of key parameters and processes, as well as the entire system, are described and pursued in workshops. The scientific basis for improved management options is identified and practical implementation of these options is explored. The principles explored apply to both rainfed and irrigated agriculture. For the latter, the approach taken is to ensure maximum beneficial use of rainwater and minimum dependence on irrigation.

LWSC 4001 Land and Water Science 4A

24 credit points. Dr Vervoort. **Session:** Semester 1. **Prerequisites:** LWSC3001. **Assessment:** For Advanced Field and Laboratory Soil Physics (see Agriculture Handbook) For Law and the Environment (see Science Handbook) For Advanced Hydrology: presentation (10%), prac reports(30%), 3 hr exam (60%).

Land and Water Science trains people to work in the natural resource environment, with particular emphasis on integrated catchment management. It also provides entry in to arrange of research fields related to land and water management in particular Soil Science and Hydrology. In order to graduate students are required to complete a 24 cp research project (see LWSC 4002) and take the following four modules:

Advanced Hydrology: Delivering catchment outcomes

6 credit points. Coordinator: Dr. R.W. Vervoort. **Session:** 1(3hr Lec, 3hr prac per week) **Assessment:** Presentation (10%), Practical Reports (40%), 3hr Exam (50%)

This unit of study is designed to give students insight into the problems related to catchment-scale modeling and policy making at the catchment level. The unit builds on the theoretical knowledge gained in LWSC 3001 and GEOG 2303. The unit explores several ways to simulate catchment processes and how risk assessment in natural resource management takes places. In particular the unit tries to stimulate discussion on the possibilities and impossibilities of assessing the impact of management and policies in a catchment. By the end of this unit the student should be able to apply salinity and groundwater risk assessment tools, apply catchment-scale simulation models to predict management and policy impact, thoroughly understand catchment policy making and legislation and understand the difficulties in predicting catchment level outcomes.

The unit will consist of lectures and practicals. In the practicals several models will be explored and used to demonstrate the lecture material.

K.J. Beven. *Rainfall-runoff modelling*, The primer. John Wiley and Sons, 2001

Advanced Field and Laboratory Soil Physics

For this 6 credit point unit see SOIL 4002

Elective components (12 cp)

This component will be decided in consultation with the degree coordinator and can be chosen from components of the following 4th year units in the faculty

Such as AGCH 4002, AGRO 4001, BIOM 4001, SOIL 4002

LWSC 4002 Land and Water Science 4B

24 credit points. Dr Vervoort. **Session:** Semester 2. **Prerequisites:** LWSC3001. **Corequisites:** LWSC4001. **Assessment:** Assessment of both the literature study and the research thesis will be based on three independent readers. The assessment will take into account the individual effort of each student through a supervisors mark.

This unit constitutes the research project of the 4th year Land and Water Science degree. It involves the submission of a literature review at the end of 1st semester and submission of a research thesis at the end of 2nd semester. During the research work, up to 3 months between July and September can be spent outside the University at an approved institution, if no clashes exist with the LWSC 4001 component. Approval of outplacement has to be sought from the unit coordinator.

3. Undergraduate units of study

MATH 1001 Differential Calculus

3 credit points. **Session:** Summer, Semester 1. **Classes:** 2 lec & 1 tut/wk. **Assumed-Knowledge:** HSC Mathematics Extension 1. **Assessment:** One 1.5 hour examination, assignments and quizzes.

MATH 1001 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit of study looks at complex numbers, functions of a single variable, limits and continuity, vector functions and functions of two variables. Differential calculus is extended to functions of two variables. Taylor's theorem as a higher order mean value theorem.

There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

Textbooks

As set out in the Junior Mathematics Handbook.

MATH 1002 Linear Algebra

3 credit points. **Session:** Semester 1, Summer. **Classes:** 2 lec & 1 tut/wk. **Assumed-Knowledge:** HSC Mathematics Extension 1. **Assessment:** One 1.5 hour examination, assignments and quizzes.

MATH1002 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering. This unit of study introduces vectors and vector algebra, linear algebra including solutions of linear systems, matrices, determinants, eigenvalues and eigenvectors.

There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

Textbooks

As set out in the Junior Mathematics Handbook

MATH 1003 Integral Calculus and Modelling

3 credit points. **Session:** Summer, Semester 2. **Classes:** 2 lec & 1 tut/wk. **Assumed-Knowledge:** HSC Mathematics Extension 2 or MATH 1001. **Assessment:** One 1.5 hour examination, assignments and quizzes.

MATH 1003 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit of study first develops the idea of the definite integral from Riemann sums, leading to the Fundamental Theorem of Calculus. Various forms of integration are considered, such as integration by parts. The second part is an introduction to the use of first and second order differential equations to model a variety of scientific phenomena.

There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

Textbooks

As set out in the Junior Mathematics Handbook

MATH 1005 Statistics

3 credit points. **Session:** Summer, Semester 2. **Classes:** 2 lec & 1 tut/wk. **Assumed-Knowledge:** HSC Mathematics. **Assessment:** One 1.5 hour examination, assignments and quizzes.

MATH 1005 is designed to provide a thorough preparation for further study in mathematics and statistics. It is a core unit of study providing three of the twelve credit points required by the Faculty of Science as well as a Junior level requirement in the Faculty of Engineering.

This unit offers a comprehensive introduction to data analysis, probability, sampling, and inference including t-tests, confidence intervals and chi-squared goodness of fit tests.

There are comprehensive details of this unit of study in the Junior Mathematics Handbook distributed at the time of enrolment.

As set out in the Junior Mathematics Handbook

Mathematics units in the Bachelor of Agricultural Economics

Units offered by the School of Mathematics and Statistics in the Faculty of Science are listed here. Refer to the Faculty of Science Handbook for unit descriptions.

- MATH1011 Life Sciences Calculus, 3 cp
- MATH1012 Life Sciences Algebra, 3 cp
- MATH1013 Life Sciences Difference and Differential Equations, 3 cp
- MATH1015 Life Sciences Statistics, 3 cp.

MICR 2024 Microbes in the Environment

6 credit points. Dr Andrew Holmes. **Session:** Semester 2. **Classes:** 2 lectures and 3 prac/week. **Prerequisites:** 30 credit points of junior Science or Faculty of Food, Agri-

culture and Natural Resource units including 6 credit points of Junior Biology. **Assessment:** One 2hr exam, weekly on-line quiz, project report and seminar.

NB: For progression on to Senior Microbiology units, students must also complete MBLG1001 and MICR2022.

This unit introduces the diversity of microbes found in soil, water, air, plants and animal environments. Through an examination of their physiology and genetics it explores their interactions with plants, animals and each other, and their roles as decomposers and recyclers in the environment. The soil is a rich microbial environment, and the concept of soil health and its relationship to plant growth is discussed. Practical classes introduce techniques and skills in isolating, quantifying and culturing microbes, designing and interpreting experiments to study microbial growth, and in preparing and presenting data.

Textbooks

Atlas RM and Bartha R (1997) Microbial Ecology: Fundamentals and applications. 4th Edition. Benjamin/Cummings Scientific Publishing, Menlo Park, CA

MICR 2026 Microbes and Animal Health

6 credit points. Dr Andrew Holmes. **Session:** Semester 2. **Classes:** 2 lec & 3 prac/wk. **Prerequisites:** 12 credit points of Junior Biology. **Assessment:** one 2hr exam, weekly on-line quiz, project report and seminar.

NB: Only available to students in the Bachelor of Animal Science

This unit introduces the diversity of microbes found in soil, water, air, plants and animal environments. Through an examination of their physiology and genetics it explores their interactions with plants, animals and each other, and their roles as decomposers and recyclers in the environment. There are numerous interactions between animals and microbes that are present in healthy and diseased animals. The basis of these interactions and their influence on animal development, growth, well-being and production will be explored. Practical classes introduce techniques and skills in isolating, quantifying and culturing microbes, designing and interpreting experiments to study microbial growth, and in preparing and presenting data. Students will understand the interactions of microbes and the host through an in-vivo study and, using a Web-CT host/microbe interaction simulation.

MICR 3102 Agricultural Microbiology 3

8 credit points. Dr New (Co-ordinator), Dr Carter, Prof. Reeves. **Session:** Semester 2. **Classes:** (3 lec, one 4 hr prac & 1 tut)/wk. **Prerequisites:** MICR2101. **Assessment:** One 2 hr theory exam, prac, 2 assignments.

This is a unit of study in molecular microbiology and applied microbiology for students wishing to gain more knowledge in microbiology or those wishing to specialise in Microbiology in Fourth Year.

Molecular microbiology of bacteria, including genetics, regulation and manipulation of the bacterial genome, prokaryote structure, taxonomy and evolution; human and animal health and disease; food microbiology; industrial microbiology.

As for MICR2101 Agricultural Microbiology 2

MICR 4101 Agricultural Microbiology 4A

24 credit points. Dr New (Coordinator). **Session:** Semester 1. **Classes:** 3 lec & 8 prac per wk. **Prerequisites:** MICR3102. **Corequisites:** MICR4102. **Assessment:** One 1.5 h & one 2 hr theory exam, prac, research project.

The coursework for this unit follows substantially the same syllabus as the senior unit of study for Science students, General and Medical Microbiology (MICR3001). As well as lectures and practical classes there is a variety of other activities, including workshops on library searches and laboratory instrumentation, mini lectures on data handling and laboratory safety, poster presentations, skills testing and tutorials. The unit of study covers two general areas:

Medical Microbiology: medical bacteriology, virology and parasitic diseases, epidemiology.

General Microbiology: microbial growth and metabolism, microbial ecology, food microbiology.

In addition to the coursework, students undertake a research project which runs over both the March and July semesters and accounts for roughly half of the final mark.

MICR 4102 Agricultural Microbiology 4B

24 credit points. Dr New (Coordinator). **Session:** Semester 2. **Classes:** 3 lec & 8 prac per week. **Prerequisites:** MICR3102. **Corequisites:** MICR4101. **Assessment:** One 1 hr & one 2 hr theory exam, prac, seminar, research project.

The coursework for this unit follows substantially the same syllabus as the senior unit of study for Science students, Molecular and En-

environmental Microbiology (MICR3002). As well as lectures and practical classes there is a variety of other activities, including workshops, mini lectures, poster presentations, skills testing and tutorials. The unit of study covers two general areas:

Molecular Microbiology: aspects of bacterial structure and physiology, principles of molecular pathogenicity.
Environmental Microbiology: microbial ecology, plant microbiology. In addition to the coursework, students undertake a research project which runs over both the March and July semesters and accounts for roughly half of the final mark.

Marketing in the Bachelor of Agricultural Economics

Units of study offered by the Discipline of Marketing in the Faculty of Economics and Business follow this entry.

MKTG 1001 Marketing Principles

6 credit points. Paul Henry (S1), Charles Areni (S2). **Session:** Summer, Semester 1, Semester 2. **Classes:** One lecture and one tutorial per week. **Assessment:** Marketing plan; Group presentation; Tutorial assignment; Two exams.

This unit examines the relationships among marketing organisations and final consumers in terms of production-distribution channels or value chains. It focuses on consumer responses to various marketing decisions (product mixes, price levels, distribution channels, promotions, etc.) made by private and public organisations to create, develop, defend, and sometimes eliminate, product markets. Emphasis is placed on identifying new ways of satisfying the needs and wants, and creating value for consumers. While this unit is heavily based on theory, practical application of the concepts to "real world" situations is also essential. Specific topics of study include: market segmentation strategies; market planning; product decisions; new product development; branding strategies; channels of distribution; promotion and advertising; pricing strategies; and customer database management.

MKTG 1002 Marketing Research I

6 credit points. Iain Black. **Session:** Semester 2. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. In addition either ECMT1010 or (one of ECMT1011, ECMT1012, ECMT1013 and one of ECMT1021, ECMT1022, ECMT1023). **Assessment:** Group project; Tutorial participation portfolio; Individual critique; Exams (mid-semester and final).

Fundamental to marketing is a requirement to understand who your customers are and what they want. Marketing research is the essential activity of discovering information and presenting it in a useful format to marketing decision makers. This unit introduces the skills and knowledge necessary to allow students to accurately formulate research questions and then discover answers ensuring that these are accurate, reliable and timely. Particular focus is given to different approaches to and aspects of data collection, including: qualitative research; secondary data collection; questionnaire design; sampling; experimental design; validity and basic data analysis.

MKTG 2002 Consumer Behaviour

8 credit points. Paul Henry. **Session:** Semester 2. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Consumer behaviour audit; Group presentation; Case analyses; Two exams.

This unit examines the psychological, social, and cultural aspects of consumer behaviour on the marketing decisions of public and private organisations. Concepts and principles are drawn from disciplines such as cognitive psychology, social psychology, sociology, anthropology, and demography to discover and understand various aspects of consumer behaviour. Specific topics of study include: cultural, demographic and psychographic influences; reference group influences; household decision processes and consumption behaviour; consumer perception and learning; motivation, personality and emotion; consumer attitudes; and purchase decision processes.

MKTG 3001 Marketing Research II

8 credit points. Jeffrey Lim. **Session:** Summer, Semester 1. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. In addition either ECMT1010 or (one of ECMT1011, ECMT1012, ECMT1013 and one of ECMT1021, ECMT1022, ECMT1023). **Assessment:** Participation; Individual assignment; Group presentation; Group project; Exam.

It is paramount for marketers today to be able to drive the research process and utilise the information efficiently. This unit aims to equip students with the necessary research and analytical skills to help organisations implement sound marketing decisions, tactics, and strategies. Students undertaking this unit are provided with the opportunity to get hands-on experience with a variety of quantitative tools. The impact or influence of new technologies (e.g. the Internet) on the market research industry is also a focus. Research practitioners need to embrace these developments to keep up with the ever-changing structure of today's society.

MKTG 3002 Marketing Communications

8 credit points. Marylouise Caldwell. **Session:** Semester 2. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Assignment; Quiz; Project; Participation; Exam.

This unit offers an introduction to and overview of current theory and practice of marketing communications. It includes aspects of advertising in the main media (television, radio, print, outdoor, cinema), sales promotion, personal selling and new media, such as the Internet. The unit provides students with a sound theoretical/conceptual foundation as well as the strategic/practical perspectives of integrated marketing communications planning and implementation.

MKTG 3004 New Products Marketing

8 credit points. Rohan Miller. **Session:** Semester 2. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Group Presentation; Group project; Two exams.

New products and services are crucial to successful growth and increased profits in many industries. The goal is to help students learn how to develop and market new products and services in both the private and public sectors. A product development assignment is carried out to reinforce the material covered and to provide realistic examples of how new products are designed, tested and launched.

MKTG 3005 Marketing and the Law

*** No info available for 2005. ***

MKTG 3006 International Marketing

8 credit points. Ulku Yuksel. **Session:** Winter, Semester 1. **Classes:** One lecture and one tutorial per week. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Participation; Case presentation; International business theatre; Examination.

This unit introduces students to international marketing using the marketing concept. It firstly considers environmental factors and then studies how marketing strategies are affected by those environmental factors. It gives students an awareness and understanding of international marketing concepts and highlights their importance in a rapidly changing global economy. Additionally the unit develops students' skills in designing and implementing marketing strategies in diverse international contexts.

MKTG 3007 Services Marketing

8 credit points. Kaleel Rahman. **Session:** Semester 1. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Group project; Group presentation; Participation; Exam.

This unit provides an understanding of the concepts and processes specifically applicable to services marketing. Services are by nature different from products, and therefore lead to a set of different marketing challenges faced by service-based organisations such as those in tourism, hospitality, health care, aviation, banking, financial, accounting, medical and legal services industries. The unit focuses on those aspects of services that require differential understanding and execution than in a product-marketing environment. Customer care, relationship marketing, and how to use service as a competitive advantage are the other primary areas of interest covered by the unit.

MKTG 3010 Electronic Marketing

8 credit points. Jeaney Yip. **Session:** Semester 2. **Prerequisites:** MKTG1001 or MKTG2001. **Assessment:** Paper; Group project; Group presentation; Exam.

This unit explores how new technologies can be embraced effectively for marketing purposes. The unit builds upon the principles and concepts of traditional marketing studied in MKTG1001 Marketing Principles. It focuses on the applicability of those concepts in the electronic environment, namely the Internet. It aims to show how the Internet, as a new and evolving medium with its innovative interface, can play a role in marketing in important areas such as segmentation and targeting, consumer behaviour, market research, and the marketing mix. It also aims to show why companies do or do not embrace this new technology and their implications for those decisions.

PLNT 2001 Applied Plant Biochemistry

6 credit points. Prof Les Copeland (Coordinator), Dr Rosanne Quinnell. **Session:** Semester 1. **Classes:** Classes (3 lec or tut; 3 prac or sem)/wk. **Prerequisites:** 12 credit points of Junior Chemistry and 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202. **Assessment:** One 2-hr exam (50%), laboratory reports (20%) case study presentation (15%), self-directed learning exercises (15%).

This unit of study explores the fundamentals of plant biochemistry, from what plants are made of to how plants regulate their metabolic processes. The specialised nature of these metabolic processes, which enable plants to respond to different biotic and abiotic environmental influences, is featured. The unit covers basic chemistry and metabolic reactions of the main plant constituents, how storage reserves are mobilized to provide energy and substrates for growth and development, and how metabolic pathways are controlled and respond to influences from the plant environment. Special attention is given to these processes in economic plants, and their relevance

3. Undergraduate units of study

to foods and fibres. The unit of study complements intermediate units of study in plant science, molecular and cell biology, genetics and biotechnology, and leads on to advanced plant modules offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources. Learning in the unit is by lectures and laboratory work, augmented by independent library research and group projects and discussions to provide insights into how molecular and biochemical approaches lead to understanding of plant functions. Students will be expected to access the WebCT site at least once a week for information on: learning resources, information bulletins, tutorial modules on making oral and written presentations, links to library, academic policies, Laboratory Safety tutorials, student support, Learning Centre. Students will additionally engage in the equivalent of 1 hour per week of tutor-assisted self-directed learning on biochemical calculations and assigned readings.

Textbooks

A Study Guide for the unit will be available for purchase from the Copy Centre at a cost of \$10 during the first week of Semester.

PLNT 2002 Aust Flora: Ecology and Conservation

6 credit points. Dr Glenda Wardle & Dr Murray Henwood. **Session:** Semester 1. **Classes:** (2 lec & 3 prac)/wk, audiovisual. **Prerequisites:** 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001. **Assessment:** One 2-hr exam (40%), laboratory reports (20%) herbarium (20%), one 2-hr practical exam (20%).

This unit provides a broad understanding of the evolution, classification and diversity of terrestrial plants and the principles of plant ecology in an Australian context. The major types of Australian vegetation are discussed across a range of temporal and spatial scales, and their current distribution related to their environment and origins. Selected contemporary issues in plant conservation from Australian natural and managed systems are explored. There is a strong emphasis on practical skills such as phylogenetic inference, plant identification and the collection and analysis of ecological data. The practical component of the unit of study uses examples taken from the Australian flora (including plants of horticultural significance) and major crop plants. Important elements of this unit are half-day field trips to the Royal National Park (or production systems at Camden), the Royal Botanic Gardens Sydney and the construction of student herbaria. The unit of study complements intermediate units of study in plant science, zoology, molecular and cell biology, genetics and biotechnology, and leads on to advanced plant and ecology modules offered through the School of Biological Sciences and the Faculty of Agriculture, Food and Natural Resources.

Textbooks

A Laboratory Manual for the unit will be available for purchase from the Copy Centre during the first week of Semester.

PLNT 2003 Plant Form and Function

6 credit points. A/Prof Bruce Sutton, A/Prof Robyn Overall. **Session:** Semester 2. **Classes:** 2 lectures, 1hr tutorial and 1 prac, A/V session (2-3hr) or field trip (6hr) per wk. **Assumed Knowledge:** The content of BIOL (1002 or 1902) is assumed knowledge and students entering from BIOL (1003 or 1903) will need to do some preparatory reading. **Prerequisites:** 12 credit points of Junior Biology or in 2005 (or with the Dean's permission in 2006), BIOL1201 and BIOL1202 or BIOL1001 and ENVI1001. **Assessment:** One 2hr theory exam (40%), prac exam (20%), anatomy project (10%), quizzes (5%), physiology report (10%), field report (15%).

This unit of study investigates the structure of cells, tissues and organs of flowering plants and relates them to function. Topics include: how photosynthesis, translocation, water transport and nutrition relate to the structures that carry out these processes. Most of the information on plant structure will be provided in self-instructional audiovisual sessions augmented by small group discussions. This is integrated with experiments carried out in the laboratory or on field excursions to investigate the physiological aspects of plant structures. There is a focus on recent advances in plant molecular biology where they have been critical in enhancing our understanding of the form and function of plants. The physiological and anatomical responses of plants to extreme environments such as drought and salinity will also be addressed. Attention will be paid to the anatomy and physiology of crop, horticultural and Australian native plants. This unit of study complements Applied Plant Biochemistry, Australian Flora: ecology and conservation and Cell Biology and leads onto senior units of study in plant sciences, including Plant Growth and Development. It is essential for those seeking a career in plant molecular biology.

PPAT 3002 Plant Disease 3

4 credit points. Prof Burgess, Dr Summerell, Prof Park, Dr Wellings. **Session:** Semester 2. **Classes:** (2 lec & 2 prac)/wk. **Prerequisites:** CROP2001, CROP2002, GENE2001. **Assessment:** One 2 hr theory exam, one 1 hr prac exam, assignment, 3 short written quizzes.

This unit of study provides an introduction to the common plant diseases which limit agricultural and horticultural production or their control. Topics include symptoms and recognition of diseases and disorders and diagnostic procedures as well as biology, epidemiology and control of the major pathogens, fungi, viruses, bacteria and nematodes. An introduction to breeding for resistance and the application of molecular based technologies in plant disease studies and control will also be included.

PPAT 4001 Plant Pathology 4A

24 credit points. Prof Burgess, Dr Summerell, Dr Liew, Ms Smith-White. **Session:** Semester 1. **Prerequisites:** PPAT3002.

The plant pathology specialisation prepares students for careers in professional plant pathology and in extension in plant pathology and crop protection. It provides an excellent background for entry into research careers especially in the field of fungal plant pathology. Experience in the field and in diagnostic procedures, especially the application of molecular based diagnostics, provides a very appropriate background for diagnostic and extension type careers. Students are required to complete a relevant 24-unit research project (PPAT4002) (Plant Pathology 4B) and take the following three core modules and one other relevant 6-credit point module or unit of study, approved by the program coordinator.

Soil Biology and Biodiversity (6 credit points).

An introduction to the diversity of organisms found in the soil, and the ecological principles governing their activities and interactions. Practical applications are illustrated with particular reference to soilborne plant diseases. Practical classes demonstrate important

techniques for working with soil organisms and soilborne diseases, and for controlling the soil environment, especially soil water, to manipulate biological activity. Topics covered include the nature of the soil biota; isolation, identification and quantification of soil organisms; pathogenic and mutualistic interactions between fungi and roots; mycorrhizae; the nature and control of soilborne plant diseases; effects of water potential and temperature on the activity and survival of soil fungi; temporal and spatial distribution of soil fungi and soilborne diseases; and the soil biology of conservation farming. Assessment is based on a theory examination and laboratory notebook.

Advanced Field and Laboratory Studies (6 credit points).

Diagnostic Plant Pathology Module - This module is concerned with the diagnosis of plant diseases in agricultural and horticultural crops as well as in natural ecosystems. It will include at least one excursion as well as laboratory classes. Assessment is based on the laboratory notebook and one written assignment of 1500 words plus references and diagrams on a major bacterial pathogen.

Mycology Module - This module will include lectures, tutorials and laboratory studies in fungal taxonomy and biology including sexual compatibility studies. Assessment is based on the laboratory notebook and a written assignment of 1500 words plus references and diagrams on a topic of choice approved by Professor Burgess.

Molecular Plant Pathology and Fungal Biology (6 credit points). This unit of study focuses on various aspects of plant pathology and mycology involving molecular techniques. Students are introduced to fundamental concepts in molecular biology, molecular techniques, plant-microbe interactions, pathogen populations, molecular diagnostics and molecular phylogenetics. Emphasis is placed on the complementarity between theoretical and conceptual understanding and practical laboratory exercises. Assessment is based on two papers and a laboratory assessment.

SOIL 2003 Soil Science 2

6 credit points. Dr Cattle, Prof. McBratney, Dr Singh. **Session:** Semester 1. **Classes:** (3 lec & 3hr prac)/wk. **Assessment:** One 3hr theory exam, one 1hr prac exam, quizzes and prac book.

This unit of study is concerned with the fundamental properties of soil, the factors of soil formation, and the processes that operate in the soil system. The components of the unit of study are: pedology; soil physics and soil chemistry. These components are synthesised by reference to common soil profiles. The study of soil in the field starts with field description and assessment of essential characteristics. The physics of water and gas movement, temperature, density, swelling and strength are considered. Soil chemistry includes properties of organic matter, cation exchange capacity, nitrogen, phosphorus, potassium and acidity. Common soil types of N.S.W. are studied in relation to their formation, properties and classification.

Textbooks

SOIL 3004 The Soil Resource

6 credit points. Balwant Singh (Coordinator), Alex McBratney, Stephen Cattle. **Session:** Semester 2. **Classes:** (2 lectures and 2 hr prac)/wk. **Prerequisites:** SOIL2003 or GEOL1002 or GEOL2004 or GEOG1001 or ENVI2001. **Assessment:** Fieldtrip participation (5%), Soil mapping report (25%), Laboratory report (15%), Examination (55%). The unit of study is designed to provide a detailed knowledge of the important features and problems of Australian soils. By the end of this unit of study, students will develop skills in describing and interpreting soil profile features in the field. They will become familiar with quantitative soil data handling procedures and be able to do quantitative soil mapping; and measure common soil properties in the laboratory. They will also learn to work in a team environment and write a report on soil mapping and laboratory analysis.

The lecture topics include- Features, geography and management of Australian soils; Digital soil mapping - concepts and spatial prediction of soil classes; Soil quality, soil health and soil function - physical, biological and chemical indicators of soil sustainability; Soil structure: The elements of soil structure and methods of their

assessment; The degradation and amelioration of soil structure and its effect on agriculture; Soil water erosion - detachment, entrainment, runoff and deposition; Soil acidification: effects of soil acidity in soils, forms of soil acidity, sources of soil acidity, buffering mechanisms in soils, soil pH and Al availability, extent of soil acidity in Australia and remediation of soil acidity; Soil salinity: causes, sources of salts, nature of soil salinity, salinity parameters in soil and water, effects of salinity on plant growth, management of soil salinity; Soil contamination: concepts/definitions, sources of contaminants, effects of contaminants, major contaminants in soil, remediation of contaminated soils.; soil carbon accounting.

Textbooks

A laboratory manual will be made available to the students.

Brady NC & Weil Rather Nature and Properties of Soils. 13th ed. (or any later edition) Prentice Hall, New Jersey, 2002

Isbell RF McDonald WS & Ashton LJ, Concepts and Rationale of the Australian Soil Classification. Australian Collaborative Land Evaluation Program, CSIRO Publishing, Canberra, 1997

White RE, Principles and Practice of Soil Science: the Soil as a Natural Resource. 3rd ed., Blackwell Science, Oxford, 1997

McKenzie N, Jacquier D, Isbell, R & Brown K. Australian Soils and Landscapes: An Illustrated Compendium. CSIRO publishing, Melbourne, 2004

A more comprehensive reading list will be provided in the laboratory manual

SOIL 3008 Rural Spatial Information Systems

6 credit points. Dr Odeh. **Session:** Semester 2. **Classes:** 2 lec & 2hr prac/wk (wks 1-13), four-day field trip in AVCC common break. **Assessment:** One 2 hr exam, field excursion and lab prac reports, presentation and essay topic.

The lecture material will present several themes: i) Principles of Geographical Information Science (GISc): brief history of GISc, ontology and epistemology of spatial phenomena, basic Geographical Information Systems (GIS) structure, coordinate systems and map projections and datums; ii) Fundamentals of remote sensing and geo-image analysis; iii) Geospatial data sources and acquisition methods, including existing maps and their digitisation, remote sensing images, digital elevation models (DEM) and global positioning systems (GPSs); iv) Processing of geospatial data: spatial data in the computer, building and accessing an entity in the database and continuous fields, data analysis using entities and continuous fields for decision support, etc.; v) Spatial statistics: quality of spatial data, spatial analysis of geospatial data, geostatistics, introduction to spatial-temporal modelling. Software packages for geographical information systems will be reviewed.

Practical exercises will focus on applications to land-cover assessment, subcatchment and regional hydrology, and soil quality assessment for decisions regarding sustainable rural land use planning and management. Two of the 4 days of the mid-Semester field excursion will be spent in Canberra visiting various government agencies which research and maintain GIS coverages of major rural environments. The remaining fieldwork will be at University farms at Camden or Arthursleigh, and will involve training in the field use of low and high-resolution GPS for geo-rectification, for ground truthing satellite-derived land cover maps and for the creation of digital elevation models and landform attributes.

SOIL 4002 Soil Science 4A

24 credit points. Prof McBratney. **Session:** Semester 1. **Prerequisites:** SOIL 3003.

The soil science specialisation trains people for careers in professional soil science and extension. It provides an excellent background for entry into all aspects of soil science research ranging from physics through mineralogy and chemistry to pedology. Increasing emphasis is being given to aspects of soil sustainability and environmental soil science in order that graduates can meet the growing national demands in this area.

The prerequisite for this unit of study is Soil Science 3. Students are required to complete Soil Science 4B (a relevant 24-unit research project) and Soil Science 4A which consists of the following four modules: (Advanced Soil Chemistry, Advanced Field and Laboratory Soil Physics, Advanced Pedology, and either An Introduction to Precision Agriculture or any other 6 cp third or fourth-year unit of study or module approved by the Discipline Leader.)

This unit is made up of the following three six credit point modules: (Advanced Soil Chemistry, Field and Laboratory Soil Physics, Ad-

3. Undergraduate units of study

vanced Pedology) and any other third- or fourth-year 6 cp unit of study or module approved by the Discipline Leader.

Field and Laboratory Soil Physics

6 credit points. Coordinator: Prof. McBratney. Offered: March. Classes: (3 lec, 1 tit. & 4hr prac)/6.5 wks, 5 days in the field (prior to beginning of March). Assessment: one 3hr exam, field report in form of webpage, lab report, presentation.

The emphasis is to examine the quantitative aspects of soil physics particularly in relation to the transfer of energy, gas, water, solids and solutes in soil.

Lecture and lab topics include heat flow, gas movement, soil water energetics, saturated and unsaturated flow of soil water, infiltration, solute movement, water and wind erosion as well as the fundamentals of numerical computer modelling of soil physical processes.

Five days' field-work, in the week prior to the beginning of March Semester, involves field measurement of soil physical properties such as shear strength, electrical conductivity, temperature, evaporation, hydraulic conductivity and infiltration rates and moisture content.

Advanced Pedology

6 credit points. Coordinator: Dr Cattle. Offered: March. Classes: (3 lec, & 5hr prac)/6.5 wks, 5 days in the field (prior to beginning of March). Assessment: one 3hr exam, prac reports, field trip report, presentation.

This unit of study centres on a weathering study which traces the changes from a rock parent material up through the soil profile. The methods of study include particle-size analysis and extraction of a fine-sand fraction for optical identification and quantification of the mineral species present. Thin sections of the rock and profile are examined and the main features identified and quantified. The data from the sand analysis, micromorphological investigations and clay mineral assessments are used to provide an understanding of the pedogenesis of the particular soil. A field trip to study the variety of soil types in their environmental setting is made two weeks prior to the commencement of the March semester.

A detailed study, including exercises, is made of the USDA soil classification system, Soil Taxonomy and the World Reference Base for soil resources (WRB).

Advanced Soil Chemistry

6 credit points. Coordinator: Dr Singh. Offered: July. Classes: (3 lec, 1 tut & 8hr prac)/6.5 wks (1st half). Assessment: one 3hr exam, lab report and presentation.

Specific topics include the structure and chemistry of inorganic components, surface charge of soil minerals, chemistry of soil organic matter, ion exchange, ion sorption, soil solution-solid phase equilibria and redox chemistry of soils.

SOIL 4003 Soil Science 4B

24 credit points. Prof McBratney. **Session:** Semester 2. **Prerequisites:** SOIL3003.

Corequisites: SOIL4002. **Assessment:** Initial presentation, literature review, final presentation, thesis.

Research Project

See SOIL4002 Soil Science 4A.

4. Postgraduate course requirements

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

The higher degrees in the Faculty of Agriculture, Food and Natural Resources are:

DAgrEc: Doctor of Agricultural Economics
 DScAgr: Doctor of Science in Agriculture
 PhD: Doctor of Philosophy
 MAgrEc: Master of Agricultural Economics
 MScAgr: Master of Science in Agriculture
 MAgr: Master of Agriculture.

The regulations governing the award of these degrees are printed in the Calendar and in this Handbook. Prospective candidates should consult with the Discipline Leader concerned before submitting an application for admission to candidature.

All candidates would normally begin in Semester 1 (near the end of February). In some cases candidates may be able to commence in Semester 2 (late July).

The following statements summarise part only of the regulations governing the award of these degrees.

Doctor of Agricultural Economics and Doctor of Science in Agriculture

The degrees of Doctor of Agricultural Economics and Doctor of Science in Agriculture shall not be conferred until the candidate is a graduate of eight years' standing from the degree which qualified him or her for candidature. The degree may be awarded for published work which, in the opinion of the examiners, has been generally recognised by scholars in the field concerned as a distinguished contribution to knowledge.

Doctor of Philosophy

The degree of Doctor of Philosophy is a research degree awarded for a thesis considered to be a substantially original contribution to the subject concerned. Some coursework may be required (mainly in the form of seminars) but in no case is it a major component.

Applicants should normally hold a master's degree or a bachelor's degree with first or high second class honours of The University of Sydney, or an equivalent qualification from another university or institution.

The degree may be taken on either a full-time or part-time basis.

In the case of full-time candidates, the minimum period of candidature is two years for candidates holding a master's degree or equivalent, or three years in the case of candidates holding a bachelor's degree with first class or second class honours; the maximum period of candidature is normally four years. The first 12 months of candidature is normally on probation.

Part-time candidature may be approved for applicants who can demonstrate that they are engaged in an occupation or other activity which leaves them substantially free to pursue their candidature for the degree. They should be able to devote at least 20 hours per week to candidature including at least one day per week during each year of candidature or an equivalent annual period made up in blocks. Normally the minimum period of candidature will be determined on the recommendation of the Faculty but in any case will not be less than three years; the maximum period of candidature is normally eight years.

Master of Agricultural Economics, Master of Science in Agriculture and Master of Agriculture

Graduates of The University of Sydney who have completed units of study acceptable to the Faculty of Agriculture, Food and Natural Resources or persons who, in the opinion of the Faculty, have qualifications equivalent to those required of a graduate of The University of Sydney, may apply for admission as candidates for the degree of master.

Master of Agricultural Economics and Master of Science in Agriculture

Candidates engage in research culminating in a thesis for two to three years full-time or pro rata part-time. Some honours graduates (or equivalent) may be eligible for a minimum candidature of one year full-time. A candidate may be required to serve a period of probation for not more than one year and to complete such work during the period as may be prescribed.

Master of Agriculture

Candidates engage in units of advanced study in some branch of agriculture for one year full-time or pro rata part-time. Candidates proceed by coursework including a research project comprising between 15 and 50 per cent of the year's work in the areas of study agricultural chemistry, agricultural entomology, agricultural genetics, agronomy, animal science, biometry, cereal chemistry, cereal science, horticultural science, microbiology, plant breeding, plant pathology, plant protection, soil conservation, soil contamination, soil science and turf management. For the degree in agricultural economics, a research project is an optional component. The first semester of candidature is normally on probation.

Diplomas

The following postgraduate diplomas are awarded by the Faculty of Agriculture, Food and Natural Resources:

GradDipAgrEc: Graduate Diploma in Agricultural Economics
 GradDipAgrSc: Graduate Diploma in Agricultural Science.

The Graduate Diploma in Agricultural Science shall be awarded in the following subject areas and the testamur for the diploma shall specify the subject area: agricultural chemistry; agricultural entomology; agricultural genetics; agronomy; animal science; biometry; horticultural science; microbiology; plant pathology; plant protection, soil science and turf management.

Graduates of The University of Sydney who have completed units of study acceptable to the Faculty of Agriculture, Food and Natural Resources or persons who, in the opinion of the Faculty, have qualifications equivalent to those required of a graduate of The University of Sydney, may apply for admission as candidates for a diploma.

Candidates engage in units of advanced study in some branch of agriculture, for one year full-time or pro rata part-time. Candidates proceed by coursework including a research project comprising between 15% and 50% of the year's work except that in agricultural economics a research project is an optional component of the coursework required. The first semester of candidature is normally on probation.

5. Advanced units of study

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Agricultural Chemistry and Cereal Chemistry

AGCH 5001 Chem & Biochem of Biol Macromolecules A

8 credit points. **Session:** Semester 1.
See AGCH5004

AGCH 5002 Chem & Biochem of Biol Macromolecules B

8 credit points. **Session:** Semester 2.
See AGCH5004

AGCH 5003 Chem & Biochem of Biol Macromolecules C

4 credit points. **Session:** Semester 1.
See AGCH5004

AGCH 5004 Chem & Biochem of Biol Macromolecules D

4 credit points. **Session:** Semester 2.
Lectures and laboratory classes including material on the physical behaviour of natural macromolecules and the structure and function of polysaccharides, proteins and nucleic acids. The 8 credit point units will include additional material on the mechanism of enzyme action, the chemistry and biochemistry of nucleic acids and gene expression, and the regulation of metabolism.

AGCH 5005 Meth of Analysis of Agr and Food Prods A

8 credit points. **Session:** Semester 1.
See AGCH5008

AGCH 5006 Meth of Analysis of Agr and Food Prods B

8 credit points. **Session:** Semester 2.
See AGCH5008

AGCH 5007 Meth of Analysis of Agr and Food Prods C

4 credit points. **Session:** Semester 1.
See AGCH5008

AGCH 5008 Meth of Analysis of Agr and Food Prods D

4 credit points. **Session:** Semester 2. **Classes:** July.
These units (AGCH5005, 5006, 5007, 5008) teach the theory and practice of advanced analytical techniques for measuring the quality of agricultural products and the environment. They consist of laboratory analyses of the compounds in food that are important in nutrition, as well as procedures for assessing the quality of food, soil and water with respect to residues of agricultural chemicals. Exercises using computer simulation will be included to model processes of environmental chemistry and the factors affecting the persistence of some compounds.

AGCH 5009 Cereal Chemistry A

8 credit points. **Session:** Semester 1.
See AGCH5012

AGCH 5010 Cereal Chemistry B

8 credit points. **Session:** Semester 2.
See AGCH5012

AGCH 5011 Cereal Chemistry C

4 credit points. **Session:** Semester 1.
See AGCH5012

AGCH 5012 Cereal Chemistry D

4 credit points. **Session:** Semester 2.
Lectures and practical classes on the uses of various cereal, legume and oil-containing seeds including descriptions of the chemical structures, location, properties, isolation and analysis of commercially significant components such as proteins, polysaccharides and lipids as well as harmful substances, such as enzyme inhibitors, alkaloids, mycotoxins.

AGCH 5013 Research Methods in Ag & Bio Chemistry

8 credit points. **Session:** Semester 1.
This unit deals with recent developments in experimental techniques and analytical methods in agricultural and biological chemistry. Candidates prepare discussion papers and short essays (of approximately 1000 words) on topics of their choice, selected from a reading list which covers a wide range of basic and applied areas of biological chemistry.

AGCH 5025 Research Project B1 (Agricultural Chem)

12 credit points. **Session:** Semester 1. **Corequisites:** AGCH5026.
Candidates either undertake a program of extended laboratory experiments in biological chemistry and analyses of food and agricultural products or they elect to carry out a short research project in close association with a member of the academic staff. Projects are usually available in one of the following areas of research interest within the Department of Agricultural Chemistry and Soil Science: carbohydrate and nitrogen metabolism in a variety of crop plants; symbiotic nitrogen fixation; biochemistry of herbicides and pesticides; nutritional aspects of seed proteins; organic and inorganic residues in agricultural products.

AGCH 5026 Research Project B2 (Agricultural Chem)

12 credit points. **Session:** Semester 2. **Corequisites:** AGCH5025.
See AGCH 5025

AGCH 5027 Research Project A1 (Agricultural Chem)

8 credit points. **Session:** Semester 1. **Corequisites:** AGCH5028.
See AGCH 5025

AGCH 5028 Research Project A2 (Agricultural Chem)

8 credit points. **Session:** Semester 2. **Corequisites:** AGCH5027.
See AGCH 5025

AGCH 5029 Research Project B1 (Cereal Chemistry)

12 credit points. **Session:** Semester 1. **Corequisites:** AGCH5030.
See AGCH5025

AGCH 5030 Research Project B2 (Cereal Chemistry)

12 credit points. **Session:** Semester 2. **Corequisites:** AGCH5029.
See AGCH5025

AGCH 5031 Research Project A1 (Cereal Chemistry)

8 credit points. **Session:** Semester 1. **Corequisites:** AGCH5032.
Candidates either undertake a program of extended laboratory experiments in biological chemistry and analyses of food and agricultural products or they elect to carry out a short research project in close association with a member of the academic staff. Projects are usually available in one of the following areas of research interest within the Department of Agricultural Chemistry and Soil Science: carbohydrate and nitrogen metabolism in a variety of crop plants; symbiotic nitrogen fixation; biochemistry of herbicides and pesticides; nutritional aspects of seed proteins; organic and inorganic residues in agricultural products.

AGCH 5032 Research Project A2 (Cereal Chemistry)

8 credit points. **Session:** Semester 2. **Corequisites:** AGCH5031.
See AGCH5031

Cereal Science

To enable employees in the cereal industries to upgrade their knowledge of cereal constituents and enhance their analytical, problem-solving and communication skills.

AGCH 5014 Chemistry and Biochemistry Grains A

8 credit points. Department of Agricultural Chemistry and Soil Science. **Session:** Semester 1, Semester 2. **Assessment:** examination, assignment, reports on lab work. Material covered in this unit will include some or all of reading program, intensive lecture program, regular lecture program and laboratory work. Areas covered will include the chemistry and biochemistry of carbohydrates, amino acids and proteins, and fatty acids and lipids in grains; the relationship of the chemical characteristics of these compounds and anti-nutritional and toxic compounds to end uses in foods, feeds and other processed products; and laboratory exercises including sample preparation, chemical and biochemical analysis using a range of chromatographic, electrophoretic, spectroscopic and enzymic methods.

AGCH 5015 Chemistry and Biochemistry Grains B

8 credit points. **Session:** Semester 1, Semester 2. **Assessment:** one written assignment, reports on lab work.
See AGCH5014

AGCH 5023 Current Issues in Cereal Science A1

4 credit points. **Session:** Semester 1. **Classes:** February. **Assessment:** symposium presentation, one review paper.

Students will participate with invited speakers in a symposium on topical issues in the grains industry. In addition to giving their oral presentation, students will prepare a review paper on one of the issues covered.

AGCH 5024 Current Issues in Cereal Science A2

4 credit points. **Session:** Semester 2. **Assessment:** See AGCH5023.

See AGCH5023

AGCH 5033 Research Project (Cereal Science)

12 credit points. **Session:** Semester 1. **Corequisites:** AGCH5034.

Students will complete a short research project which may be undertaken in their place of employment if suitable facilities are available. Each student will be assigned an academic supervisor from the Department of Agricultural Chemistry and Soil Science who will visit the site where the work will be performed, and assist in the planning of the project, provide advice during the work, and supervise the preparation of oral and written reports. Students should discuss prospective projects with the Degree Coordinator as soon as possible after enrolment. The project would normally be completed within 2 - 3 years.

AGCH 5034 Research Project (Cereal Science)

12 credit points. **Session:** Semester 2. **Corequisites:** AGCH5033.

See AGCH5033

AGCH 5035 Research Methods & Communication Skills

4 credit points. **Session:** Semester 1. **Classes:** February. **Corequisites:** AGCH5036. **Assessment:** essay, oral presentation.

Students will attend a 3-day workshop, or a series of 3 hour sessions on research methodology and oral and written scientific communication. Subsequently they will research the literature and prepare an essay of approximately 5000 words and a 20 minute oral presentation on separate topics of their choice selected from a list which covers basic and applied aspects of cereal science.

AGCH 5036 Research Methods & Communication Skills

4 credit points. **Session:** Semester 2. **Classes:** July. **Corequisites:** AGCH5035. **Assessment:** See AGCH5035.

See AGCH5035

Agricultural Economics**Agricultural Economics - Advanced Units of Study**

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5001 Research Project A (Ag Economics)

16 credit points. **Session:** Semester 1, Semester 2. **Assessment:** Thesis.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a research project. Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 20,000 words in length.

AGEC 5002 Research Project B (Ag Economics)

8 credit points. **Session:** Semester 1, Semester 2. **Corequisites:** AGECE5017. **Assessment:** Thesis.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a research project. Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 10,000 words in length.

AGEC 5003 Agribusiness Management (Advanced)

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 2 workshop)/wk. **Assessment:** One 2 hr exam, assignments.

The unit is designed to introduce the economic principles and techniques of business management as they apply to farm and agribusiness firms. The topics covered will include: management goals and objectives; budgeting; gross margins analysis; parametric budgeting; sources of management information and its analysis; simple systems simulation; applications of linear programming to farm and agribusiness planning; financial management; risk in planning and management; cash, credit, debt and taxation management; evaluation of investment and firm growth alternatives; acquisition and transfer of assets; the role of financial institutions in the rural credit market.

An integrated set of workshops is used to provide practical experience in firm planning utilising budgeting, gross margins analysis, linear programming, simulation methods and other techniques of analysis. Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5004 Agricultural & Resource Policy Advanced

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 tut)/wk. **Assessment:** one 2.5hr exam, assignments.

The topics discussed include: basic theoretical frameworks for economic evaluation of policy formation (including Pareto welfare economics and public choice theory), market and government failure; the institutional structure of agricultural and resource policy formulation in Australia; microeconomic issues in agricultural and resource policy; and issues arising from linkages between agriculture and the resource industries and with the rest of the economy. Students will be expected to read widely.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5005 Applied Commodity Modelling (Advanced)

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 lab session)/wk. **Assessment:** one 1.5hr exam, one 1.5hr prac exam, assignments.

The application of methods of data analysis to the agricultural and resource sectors is the focus of this unit. Topics covered will include: formulation and econometric estimation of production relationships; demand; supply; expectations models and simple simultaneous representations of commodity sectors; time series forecasting applied to commodity and futures markets; and a suitable selection from an introduction to dynamic multipliers, dynamic elasticities, and econometric simulation. Use will be made of a variety of data analysis and econometric computer packages. Emphasis will also be placed on electronic and graphical approaches to data analysis along with consideration of the limitations and problems of the particular techniques.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5006 Applied International Trade (Advanced)

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk. **Assessment:** One 2hr exam, assignments.

The basic economic principles underlying international trade in agricultural and resource commodities and the policies involved will be presented. Issues related to trade and development will also be considered. The main topics covered will include: trends in agricultural and resources trade; trade policies of importing and exporting nations, including issues such as food aid and surplus disposal programs; economic integration and impacts on international commodity trade; international trade policy making, including GATT and WTO; the impact of exchange rates and other macroeconomic variables on international trade in commodities.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5007 Applied Marketing (Advanced)

8 credit points. **Session:** Semester 2. **Classes:** (2 lec & 2 tut)/wk. 3-5 excursions. **Assessment:** one 2hr exam, assignments.

This unit of study is designed to provide an understanding of agricultural marketing. It emphasises firm-level marketing mix and marketing strategy decision making, marketing management and planning, market research and information, futures market and other risk sharing devices. The unit of study will also address the organisation and trends of food and fibre marketing in Australia, food and fibre industrial marketing including value-adding and market power in the supply chain, market efficiency and international marketing by agribusiness firms. The unit content is analytical, and draws heavily on applied microeconomics.

The unit will provide an understanding of marketing environment, agricultural marketing system, agribusiness marketing management, and organisation and management of marketing functions. Case studies of actual Australian and international agribusiness firms/industries will be utilised throughout the unit to illustrate the principles

5. Advanced units of study

of marketing. The focus of workshops and tutorials this semester will be on supply chains.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5008 Commodity Price Analysis (Advanced)

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut)/wk. **Assessment:** One 3 hr exam, classwork and assignments.

This unit focuses on the nature of agricultural and resource commodity markets, market demand relationships, market supply relationships, price determination under alternative market structures, marketing margin relationships, derived demand for inputs, spatially and temporally related markets, market dynamics, price expectations, commodity futures markets and other topics. Applied examples from the agricultural and resource industries as well as the overall economy will be used throughout the semester as illustrations of the principles involved.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5009 Contemporary Issues in Agr Economics Adv

4 credit points. **Session:** Semester 1, Semester 2. **Classes:** (2 lec)/wk. **Assessment:** one 2 hr exam, assignments.

A seminar series designed to provide students with a broad overview of current issues affecting the agricultural and resource industries. Seminars will cover the appraisal of current Australian agricultural and resource industry policy and international issues affecting Australia's agricultural and resource industries.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5010 Natural Resource Economics (Advanced)

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 tut/lab)/wk. **Assessment:** one 2hr exam, assignments.

A unit in natural resource economics of relevance to agriculture and the resource industries. Issues discussed are: the environment as a source of environmental services; socially efficient resource allocation and Pareto welfare economics; market failure and characteristics of environmental services; externalities, pollution, congestion; benefit cost analysis of public projects, including the modification of environmental services; non-depletable resources; depletable resources; irreversibility; sustainability. Applications include land degradation, fisheries, forestry, land-use planning and greenhouse effect.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5011 Production Economics (Advanced)

8 credit points. **Session:** Semester 2. **Classes:** (3 lec and 2 workshops)/wk. **Assessment:** one 3 hr exam, assignments, classwork.

Production economics is concerned with production decisions on resource allocation at the firm, industry and economy levels. The topics include: the nature of agricultural resource industry production; production functions; factor substitution; principles of enterprise combination and multi-product production; firm objectives; constrained and unconstrained maximisation; cost functions and other duality relationships; economies of scale and size in farming; input demands and dual relationships; production over time; productivity and technical change; production under risk and the illustration of the principles involved through the use of practical applications and exercises involving both the agricultural and resource industries. In addition, basic decision analysis will be introduced including basic concepts of probability; concepts of utility; utility functions and elicitation of preferences.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5012 Quant Business Management & Finance Adv

8 credit points. **Session:** Semester 1. **Classes:** (3 lec & 1 tut/lab session)/wk. **Assessment:** Two 1.5 hr exams, assignments.

The application of applied optimising methods to decision-making in the agricultural and resource sectors is the focus of this course. Topics covered include: an overview of the applications of optimising models; linear, quadratic and nonlinear programming; queueing theory; inventory models; replacement models; agricultural sector models; transport and location models; spatial equilibrium systems; input-output analysis and computable general equilibrium models; and model validation and verification. Issues of financial analysis and control, financial relationships, investment, capital budgeting, risk management and risk in investment decision making will also be covered.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

To be advised in class.

AGEC 5014 Exploit & Conservation Natural Resources

8 credit points. **Session:** Semester 1, Semester 2. **Classes:** (1 tut)/wk. **Assessment:** one 2hr exam, assignments, term paper.

Concepts of economic optimal use of natural resources over time. Efficiency and equity considerations. Dynamic modelling of biological populations including forestry, fisheries and predator-prey systems, and physical environmental models including the atmosphere and river systems. Mathematical methods including dynamic programming, optimal control theory and stochastic optimisation for determining optimal exploitation strategies of renewable and non-renewable natural resources. Competitive firm, monopolistic firm and industry models. Resource pricing.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

Textbooks

J.M Conrad and C.W.Clark Natural Resource Economics: Notes and Problems (Cambridge Press 1987)

P.A. Neher Natural Resource Economics: Conservation and Exploitation (Cambridge Press 1990)

AGEC 5015 Applied Commodity Modelling (Advanced)

4 credit points. **Session:** Semester 1. **Classes:** (2 lec & 1 tut/lab)/wk. **Assessment:** one 1hr exam, 1hr prac exam, assignments.

The unit focuses on the concepts and basic procedures of regression analysis and the application of these methods to the analysis of economic data in the agricultural and resource sectors. Review of concepts of estimation and hypothesis testing. Simple regression model. Estimation and testing under classical assumptions. Multiple regression models and ordinary least squares estimation and testing under classical assumptions. Dummy variables. Lag variables. Deterministic model mis-specification. Single vs simultaneous equation models. Uses and limitations of graphical data analysis. Common departures from classical assumptions, their implications for estimation and improved methods of estimation. Students will learn the concepts and methods and develop skills in formulating and estimating models.

Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5016 Research Methods (Advanced)

4 credit points. **Session:** Semester 1. **Classes:** (2 lec, 1 lab)/wk. **Assessment:** One 1.5hr exam, assignments.

This unit deals with the nature of research and inquiry in applied economics. Topics covered will include: alternative philosophical perspectives on inquiry; scientific method; inductive thought and deductive logic; creativity; research as an orderly process of enquiry; preparation of research proposals; secondary data sources for agricultural and resource economists; collection of primary data; statistical design of sample surveys; questionnaire construction; interviewing techniques; and methods of analysis of survey data. Topics are illustrated with examples of research in theoretical economics, empirical discipline-advancing research, empirical exploratory research, and research using policy-evaluation modelling. Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

AGEC 5017 Research Project B1 (Ag Economics)

8 credit points. **Session:** Semester 1, Semester 2. **Corequisites:** AGEC5002.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a research project. Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 10,000 words in length.

AGEC 5018 Research Project C1 (Ag Economics)

4 credit points. **Session:** Semester 1. **Corequisites:** AGECS019.

In this unit of study, students develop skills in economic research by designing, undertaking and reporting on a research project. Students undertake research on an approved topic under the supervision of a member of staff and prepare a report of approximately 10,000 words in length.

AGEC 5019 Research Project C2 (Ag Economics)

4 credit points. **Session:** Semester 2. **Corequisites:** AGECS018.

See AGECS018 (Must do both 5018 and 5019).

AGEC 5023 Spec Topics Agr/Resource Economics (Adv)

8 credit points. **Session:** Semester 1, Semester 2. **Assessment:** one exam, assignments and/or essays.

This unit deals with specialised areas of agricultural or resource economics of particular interest to approved students. Examples could include economics of agricultural transport, advanced production economics and agricultural household studies. The student will read under the guidance of staff and complete designated learning tasks.

Agronomy

AGRO 5001 Advanced Crop Agronomy

8 credit points. Dr Campbell. **Session:** Semester 1. **Assessment:** one 3hr exam, assignments.

A field-based unit on crop management with particular reference to grain legume and fibre crops. Analyses will be in the context of (i) their ecology, underlying physiology and nutrition; (ii) their farming system, including technical and economic analysis of their management and their roles and restrictions within existing and imaginable farming systems; and (iii) their end uses, and how to better meet the technical needs of markets. Remote sensing and geographic information systems technology are used to monitor crop area and production, computer-based decision support systems to assist crop management, and professional diagnosis of hypothetical problems in crop production to develop analytical skills.

The unit involves two field trips. The first, of five days, begins in the first week of February Semester. This allows study of two crops. A second field trip is organised to research broader issues of management of traditional and alternative field-crop ecosystems identified by students.

AGRO 5002 Advanced Pasture Agronomy

*** No info available for 2005. ***

AGRO 5003 Crop Physiology (Advanced)

6 credit points. Assoc. Prof. Sutton. **Session:** Semester 2. **Assessment:** one 2hr exam, assignments.

This unit examines the physiology of plants important in agriculture. The impact of environment and management on photosynthesis, respiration, water relations and plant development will be discussed in relation to the formation of grain or forage, and the quality of major crop and pasture species. The use of instrumentation to measure the physiological responses of plants to stress will be featured in practical sessions.

AGRO 5004 Plant Nutrition (Advanced)

4 credit points. Dr Campbell. **Session:** Semester 1. **Assessment:** one 3hr exam, assignments.

This course examines how plants acquire nutrients and distribute nutrients between organs during growth. Nutrient function, nutrient genotype interactions and diagnosis of nutrient deficiencies/toxicities are interrelated concepts. Other topics include: prediction of macronutrients and micronutrient requirements; legume nutrition; heavy metals; environmental considerations, – eg, leaching of nitrate. Practical classes deal with diagnostic techniques.

AGRO 5005 Readings in Plant Nutrition

2 credit points. Dr Campbell. **Session:** Semester 1, Semester 2. **Assessment:** essay.

The unit offers the student the opportunity to read extensively in an area of plant nutrition. Discussions are held to guide students in synthesising the knowledge gained in the chosen topic.

AGRO 5006 Research Project (Agronomy)

24 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5007 Research Project A (Agronomy)

16 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5008 Research Project B (Agronomy)

8 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5009 Research Project C1 (Agronomy)

12 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5010 Research Project C2 (Agronomy)

12 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5011 Research Project A1 (Agronomy)

8 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5012 Research Project A2 (Agronomy)

8 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5013 Research Project B1 (Agronomy)

4 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

AGRO 5014 Research Project B2 (Agronomy)

4 credit points. **Session:** Semester 1, Semester 2.

NB: The total number of credit points for research projects cannot exceed 24 credit points for the degree.

Candidates will conduct and report on a well-defined investigation into an area of interest in agronomy.

Animal Science

ANSC 5002 Animal Genetics (Advanced)

8 credit points. Prof Nicholas, A/Prof Moran. **Session:** Semester 1. **Classes:** (3 lec & 1 prac)/wk. **Assessment:** one 3hr exam, assignments.

A series of lectures and practical classes providing a firm basis in population and quantitative genetics, leading to more advanced applications in animal breeding. Single-locus population genetics theory, including the theory of selection and random drift, precedes the exposition of quantitative theory, including partitioning of phenotypic and genetic variances and parameter estimation.

Selection indexes (both single trait and multi-trait) are dealt with extensively and BLUP (Best Linear Unbiased Prediction) is discussed. Practical classes are based on computer simulation or analysis of illustrative data. Excursions illustrate the applications of genetics in commercial and research settings.

ANSC 5004 Poultry Production (Advanced)

8 credit points. **Session:** Semester 1. **Assessment:** one 3hr exam.

Avian biology, with emphasis on the unique features of the digestion, absorption and utilisation of nutrients, and on the physiology of egg formation. Commercial production of broilers and table eggs, with consideration of environmental requirements, housing and disease control.

ANSC 5009 Animal Health (Advanced)

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 tut)/wk. **Assessment:** one 3hr exam.

Biology and immunology of host responses to infectious and parasitic diseases; definition of general disease states; examination of

5. Advanced units of study

several livestock diseases of major economic significance; the development of livestock management programs which minimise the occurrence of or eradicate the above diseases; the use of commercial biological and chemical products to control animal health.

ANSC 5010 Pig Production (Advanced)

8 credit points. **Session:** Semester 2. **Assessment:** one 3hr exam, assignments. A series of lectures and practical classes with emphasis on the efficiency of pig meat production. All aspects of the production cycle are covered including management of the breeding sow and growing pig. Environmental requirements, housing, feeding practices and disease control are considered. Application of computer-based models to commercial piggeries.

ANSC 5011 Livestock Genetics

4 credit points. Prof Nicholas, A/Prof Moran. **Session:** Semester 1. Lectures in livestock genetics with special emphasis on the genetic basis of animal disease.

ANSC 5012 Animal Biotechnology (Advanced)

8 credit points. A/Prof Moran, A/Prof Taylor, Prof Nicholas, Dr Thomson. **Session:** Semester 2. **Classes:** (3lec & 1tut)/wk. **Assessment:** one 3hr exam, assignments. A series of lectures, tutorials and supervised reading and computer aided instruction covering the application of biotechnology to animal productivity, disease control, the development of new products from domestic animals and the impact of micro-organism and plant biotechnology on animals. Included are molecular genetics, cell biology and recombinant DNA technology, in principle and application; the techniques and outcomes of genetic mapping and genomics in gene discovery; techniques and outcomes of transgenesis, including nuclear transfer, knockout mutagenesis and production of human pharmaceutical proteins; gene therapy for modulating tissue function and repair of inherited and acquired defects; production and use of recombinant proteins; bioinformatics, including techniques for storing, retrieving and analysing molecular and genomic information; intellectual property protection; risks and benefits; ethical implications of biotechnology.

ANSC 5013 Research Project (Animal Science) A1

8 credit points. **Session:** Semester 1. Candidates will conduct and report on a well-defined investigation into an aspect of animal production.

ANSC 5014 Research Project (Animal Science) A2

8 credit points. **Session:** Semester 2. See ANSC5013

ANSC 5015 Special Topics in Animal Science

8 credit points. **Session:** Semester 1, Semester 2. This unit deals with specialised areas of particular interest to each candidate. The unit of study may include tutorials, seminars, essays and directed reading on selected topics.

ANSC 5016 Research Project (Animal Science) A3

8 credit points. **Session:** Semester 1, Semester 2. See ANSC5013

Biometry

BIOM 5001 Advanced Biometry

8 credit points. Assoc. Prof. O'Neill. **Session:** Semester 1. **Assessment:** one 3hr exam, assignments. This unit explores experimental design and analysis, using balanced and unbalanced data sets. Examples are taken from current experiments conducted in the Department or the Faculty. It also extends statistical theory to more difficult design problems. Topics here include bivariate distributions, maximum likelihood estimation, likelihood ratio tests.

BIOM 5002 Applied Multivariate Analysis

8 credit points. Dr Thomson. **Session:** Semester 2. This unit develops methods for analysing several agronomic variables simultaneously, in designed experiments.

BIOM 5003 Data Management

4 credit points. Ms K Bartimote. **Session:** S1 Late Int, S1 Intensive. **Classes:** External Interaction + 2-week Intensive Block. **Assumed Knowledge:** HSC Mathematics. **Assessment:** Assignments, Quizzes and Examination. All open book. This unit of study provides students with basic computing and quantitative skills for their subsequent research in Turf Management. It introduces the spreadsheet package Excel and the statistical packages Minitab and GenStat as vehicles for mathematical and statistical analysis and for graphics presentation. The word processing package Word will also be used heavily for report writing, and communication will be reliant on e-mail and access to the Univer-

sity's website. Basic statistical topics covered include: describing biological data and variability, overview of types of variables and associated analysis techniques, sampling and estimation, framing biological hypotheses; estimating a single treatment mean via a confidence interval and testing for a particular mean via a z-test or t-test, 2-sample t-tests and ANOVA. Many of the techniques to be introduced will rely on an assumption of normality (and others), hence avenues for analysis will be explored when these assumptions are violated. Students will also gain an appreciation for the importance of experimental design through relevant examples.

Textbooks

[Optional] Glover, T. & Mitchell, K. (2002) An Introduction to Biostatistics. New York: McGraw Hill.

Mead, R., Curnow, R.N., and Hasted, A.M. (1993) Statistical Methods in Agriculture and Experimental Biology, 2nd ed. London: Chapman & Hall.

BIOM 5004 Designing Experiments in Agriculture

8 credit points. Assoc. Prof. O'Neill, Dr Thomson. **Session:** Semester 1. **Assessment:** one 2hr exam, assignments. This unit looks at the principles and techniques underlying the modern statistical approach to designing experiments in agricultural research. Emphasis is placed on students learning how to advise experimenters on design problems, in consultation with Faculty members.

BIOM 5005 Statistical Modelling in Agriculture

8 credit points. Assoc. Prof. O'Neill, Dr Thomson. **Session:** Semester 2. **Assessment:** one 2hr exam, assignments. This unit looks in depth at how statistical models can be of use in agricultural research. Topics covered include linear and non-linear models, time series methods, and spatial analyses of field experiments.

BIOM 5008 Research Project (Biometry) A2

8 credit points. **Session:** Semester 1, Semester 2. Candidates will conduct and report on a well-defined investigation into an area of interest in biometry.

BIOM 5009 Research Project (Biometry) B1

4 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. Candidates will conduct and report on a well-defined investigation into an area of interest in biometry.

BIOM 5010 Research Project (Biometry) B2

4 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** BIOM5009. Candidates will conduct and report on a well-defined investigation into an area of interest in biometry.

Turf Management

AGEC 5020 Business Topics in Turf Management

4 credit points. **Session:** Semester 2. **Assessment:** One 2 hr exam, assignments. This unit involves a minimum of 25 hours of formal lectures and practical classes with additional directed reading of relevance to particular student groups. The unit will focus on the management economics of organisations providing market-priced and non-priced services such as recreation. Topics may include market assessment and marketing strategies, pricing strategies, financial planning and control, and resource management.

Textbooks

To be advised in class.

CROP 5001 Turf Management

6 credit points. Dr Martin. **Session:** Semester 1. **Classes:** February. **Assessment:** one 3hr exam, assignments and prac exercises. Lectures, workshops and field visits centred on the theme of 'turf: a self-contained system'. Students will address the scientific issues underlying the design, construction, grassing and maintenance of turf facilities: construction of desired soil profiles; structure, nutrition and drainage of soils under turf management; the micro- and macro-environment of turf; water management and physiology of growth under turf conditions.

CROP 5002 Advanced Turf Management

8 credit points. Dr Martin. **Session:** Semester 2. **Classes:** July. **Prerequisites:** CROP5001 Turf Management. **Assessment:** one viva voce exam (1 hr), assignments and prac. exercises. Lectures, discussions and practical experiments to gain advanced expertise in laboratory and field aspects of the plant sciences underlying turf management. Topics include germination and establishment, stress physiology, irrigation and water use, root growth, growth analysis, canopy photosynthesis, fertilizer and pesticide management, environmental legislation and emerging issues for turf management.

CROP 5003 Turf Species and Varieties

4 credit points. Dr Martin. **Session:** Semester 2. **Assessment:** one 2hr theory exam, prac exam, plant collection.

This unit, which is given as intensive workshops, has three aims: to provide an overview of plant variation, ecotypic differentiation and taxonomy; to teach skills in plant identification (use of botanical terminology and use of conventional and vegetative taxonomic keys); and to recognise commercially-important turf species and varieties and weeds. Information is also provided on biochemical methods of identifying grasses; development of new cultivars by breeding and/or selection; comparative testing of grasses: plant variety rights and cultivar registration.

CROP 5004 Applied Plant Ecology

4 credit points. Dr Michael, Dr Martin. **Session:** Semester 2. **Assessment:** one 3hr exam, assignments and an individual seminar.

Aspects of plant protection and their effects on the environment. Interaction between weeds, pests and diseases; contamination of groundwater; herbicide and pesticide safety and other topical issues. In addition to written assignments, each student will be required to choose a topic in consultation with the lecturer and subsequently present a seminar for the class on that topic. For example, a golf course manager might address the ecological management of pest susceptible, regularly cut turf grasses growing on soils of low cation exchange capacity outside the usual thermal limits of the grasses.

CROP 5005 Irrigation Science

4 credit points. Coordinator Assoc. Prof. Sutton. **Session:** Semester 2. **Classes:** (1 lec & 3 prac/workshop)/wk. **Assessment:** one 2000w report, one 1500w essay.

The unit covers the scientific basis of irrigation practice. Modification of productivity potential through irrigation. Objectives of irrigation. Biological, physical and technical aspects of irrigation science, including furrow, flood, sprinkler and drip systems. Efficiency of water use and the proper use of instrumentation for irrigation management.

Textbooks

Reference book

M. E. Jensen Design and Operation of Farm Irrigation Systems (American Society of Agricultural Engineers, 1980)

CROP 5006 Crop Protection (Advanced)

4 credit points. **Session:** Semester 2. **Classes:** July. **Assessment:** one 2 hr theory exam, laboratory work.

This unit considers the impact of weeds, insects and other invertebrates and disease on plant production and the various strategies for protecting plants from resulting damage. Environmental issues associated with pest control are emphasised. Topics covered include; crop loss assessment and economic threshold of damage; the origins of pest and disease problems and epidemiology; the major pest and disease problems in Australia; the use of pesticides and resistance to them; legislative aspects, and the role of quarantine and biological control agents for weeds, insects and pathogens. Laboratory work includes the biology of important fungal plant pathogens, the technology of spray application and case studies in integrated pest management.

CROP 5009 Diagnostic Methods in Turf Management

2 credit points. Coordinator Dr Martin. **Session:** Semester 1. **Classes:** 7 lec & seven 3hr prac. **Prerequisites:** CROP5001 Turf Management, CROP5010 Turf Nutrition. **Assessment:** one 1.5hr exam, an assignment and a prac exam.

Following an overview of the main chemical, physical and biological diagnostic tests used in the formulation of advice by turf consultants and in decision-making by turf managers, the course will provide an introduction to the theoretical basis and practical application (including interpretation guidelines) of selected chemical methods used for diagnostic purposes in the turf industry for soils, irrigation waters and plant tissues.

Textbooks

Reference book

G.E. Rayment and F.R. Higginson Australian Laboratory Handbook of Soil and Water Chemical Methods (Iskanta Press, 1992)

CROP 5010 Turf Nutrition

4 credit points. **Session:** Semester 1. **Assessment:** one 2hr exam, assignments.

Essential and non-essential elements. Mineral toxicities. Physiology of nutrient uptake and use by grasses. The soil as a source of plant nutrients. Plant-soil interactions with special emphasis on root dynamics, soil water status and the rhizosphere. Quantitative aspects of turf nutrition and design of fertilizer programs.

CROP 5011 Research Project 1 (Turf)

10 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July.

Candidates will conduct and report on a well-defined investigation into an area of interest in turf management.

CROP 5012 Research Project 2 (Turf)

10 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. See CROP5011

CROP 5013 Research Project A1 (Turf)

6 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** CROP5014.

Candidates will conduct and report on a well-defined investigation into an area of interest in turf management.

CROP 5014 Research Project A2 (Turf)

6 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. See CROP5013

Agricultural Entomology**ENTO 5002 Special Topics in Entomology**

8 credit points. **Session:** Semester 2. **Assessment:** assignment.

The course deals with specialised areas of particular interest to each candidate. Candidates will be given a selected reading list and will prepare discussion papers and essays on these topics.

ENTO 5003 Taxonomy and Biogeography of Insects

8 credit points. **Session:** Semester 1. **Classes:** (2 lec & 6 prac)/wk. **Assessment:** one 3hr exam & one 3hr prac exam, assignment.

The classification, life cycle and general biology of some orders of insects will be considered. Candidates will be given an introduction into the philosophy of taxonomy. Lectures will deal with insect zoogeography and phylogeny. Practical classes will give students good working knowledge of some insect orders. The collection will supplement the practical classes.

ENTO 5004 Insect Ecology (Advanced)

8 credit points. **Session:** Semester 2. **Classes:** (2 lec & 6 prac)/wk. **Assessment:** one 3hr exam, assignment.

Ecological principles will be dealt with as they apply to conservation, sustained-yield harvesting and pest management (classical and managed biological control, sterile male techniques, behavioural and integrated systems). The remainder of the course will emphasise behavioural mechanisms of importance to ecological systems. Further topics to be covered range from foraging theory and predator-prey interactions to interference mechanisms and opportunistic responses.

ENTO 5005 Insect Collection

4 credit points. **Session:** Semester 2. **Assessment:** Insect collecting and mounting.

Students are shown how to collect, mount and store insects. A representative insect collection is required.

ENTO 5006 Research Methods in Entomology A1

8 credit points. **Session:** Semester 1.

This will involve analytical laboratory work, management of experimental data and writing up of data for critical review.

ENTO 5007 Research Methods in Entomology A2

8 credit points. **Session:** Semester 2.

See ENTO5006.

Agricultural Genetics and Plant Breeding**GENE 5001 Biotechnology**

4 credit points. Assoc. Prof. Sharp. **Session:** Semester 1, Semester 2.

A series of lectures and practical periods covering: techniques and potential uses of plant transformation in manipulating plant quality and agronomic characteristics; the use of molecular techniques in the diagnosis of plant diseases in plant breeding; the construction and use of genetic maps for selection in plant breeding programs.

GENE 5002 Breeding for the Environment

4 credit points. Dr Darvey. **Session:** Semester 1, Semester 2. **Assessment:** Literature review, assignments.

Lectures and practical periods dealing with management of pests, diseases (fungi, bacteria and viruses) and environmental pollutants. Deals briefly with soil degradation and weed control. The plant breeding options will be discussed, including the selection, identification and transfer of genes for resistance to diseases, mineral toxicities, etc. The details of the National Rust Program and its philosophy for the genetic control of the rusts will be elaborated at both a theoretical and practical level. The greenhouse effect and the management options for rapidly altering breeding strategies in response to a changing environment will also be discussed.

GENE 5003 Cytogenetics and Genetic Manipulation

4 credit points. Dr Darvey. **Session:** S2 Intensive. **Classes:** (mid year break, Jun/July). **Assessment:** one 2hr exam.

Lectures and lab work in cytogenetics emphasising cereals and genetic means for manipulation and alien incorporation. Cytogenetics component includes chromosome identification; aneuploidy; poly-

5. Advanced units of study

ploidy; genome origins; genetic control of chromosome pairing; gene mapping; and cytogenetics of crop species. Genetic manipulation component includes: alien genetic transfer; induced mutation; alternative methods for the production of haploids; genetic and cytoplasmic male sterility; alternative systems for hybrid production; wide-species crosses; and identification of useful genes (apomixis, meiotic, restitution, endosperm and embryo quality from wide species crosses, parthogenesis, semigamy, etc.). Practical component includes: techniques for chromosome identification (Feulgen staining, C-banding, N-banding, autoradiography); various tissue culture techniques including somaclone production and anther culture; and various other laboratory and greenhouse techniques including mutation breeding, chromosome doubling, etc. Visits are made to key research centres including the CSIRO Division of Plant Industry in Canberra in conjunction with the biotechnology unit.

GENE 5004 Germplasm Management

4 credit points. Dr Darvey. **Session:** Semester 1, Semester 2. **Assessment:** literature review, assignments.

Lectures on strategies and methods for germplasm collection, storage, evaluation, and utilisation; and on germplasm databases. A review of major international germplasm centres is also included.

GENE 5005 Plant Breeding A

8 credit points. Dr Darvey. **Session:** S2 Intensive. **Classes:** mid-year break (Jun/July). **Assessment:** open book exam, seminar assignments.

Lectures and laboratory work on the theory and philosophy of plant breeding. Special emphasis is placed on present and future technologies with respect to anther culture, mutation breeding, breeding for disease resistance, somaclonal variation, apomixis, interspecific hybridisation, the wheat x maize system for haploid production, hybrid producing systems and microspore culture for the production of transgenic plants. The unit aims to develop perspective in relation to research priorities and realistic research objectives. It also considers various aspects of program design and efficiency, including the cost of establishing and maintaining programs, returns to growers, and sources of income (PVR, patents, hybrid seed, etc.).

GENE 5006 Plant Breeding B

4 credit points. **Session:** Semester 1, Semester 2. **Assessment:** Literature review, assignments.

A review of various plant breeding programs, obtained from field trips to public and private breeding centres in eastern Australia, including the Phytotron in Canberra. The unit includes practical hands-on field experience. It also includes various aspects of plot design and automated data analysis, which are mainly presented during the visit to the Plant Breeding Institute at Narrabri.

GENE 5007 Introductory Plant Breeding

4 credit points. Dr Darvey. **Session:** Semester 1, Semester 2.

Approximately 30 lectures and 30 hours of laboratory work devoted to the theory of plant breeding, conservation of genetic variability, breeding for resistance to disease and measurements and analysis of data.

GENE 5008 Quantitative Genetics

4 credit points. **Session:** Semester 1, Semester 2.

A series of lectures and practical periods, dealing with population genetics and quantitative inheritance in plants or animals (PBI, Cobbitty if plants, or Department of Animal Science if animals)

GENE 5011 Research Project Additional

4 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July semester.

An attempt is made to tailor the project to the student's requirements, thus discussion of project requirements is welcome prior to enrolment.

GENE 5012 Research Project (Agr Genetics) A1

8 credit points. **Session:** Semester 1. **Classes:** February semester.

Candidates will conduct and report on a well-defined investigation into an area of interest in agricultural genetics.

GENE 5013 Research Project (Agr Genetics) A2

8 credit points. **Session:** Semester 2. **Classes:** July semester.

See GENE5012

GENE 5014 Research Project (Plant Breeding) A1

8 credit points. **Session:** Semester 1. **Classes:** February semester.

An attempt is made to tailor the project to the student's requirements, thus discussion of project requirements is welcome prior to enrolment. Projects may be carried out at any of the Plant Breeding Institute locations (Campus, Cobbitty, Narrabri); however Australian students with access to approved research facilities (other universi-

ties, public or private breeding centres or laboratories, CSIRO, etc.) will be exempted from this requirement, subject to adequate supervision.

GENE 5015 Research Project (Plant Breeding) A2

8 credit points. **Session:** Semester 2. **Classes:** July semester.

See GENE5014.

Horticultural Science

HORT 5006 Special Topics in Horticultural Science

4 credit points. **Session:** Semester 1, Semester 2.

This unit deals with specialised areas of horticultural science of particular interest to each candidate. Examples of areas could include plastic recycling in horticulture or environmental risk of herbicides used by nurseries. Candidates will be given a selected reading list and will prepare discussion papers and/or essays.

HORT 5010 Urban Horticulture (Advanced)

4 credit points. Dr Martin. **Session:** Semester 1. **Classes:** (3 lec 3 prac)/wk. **Assessment:** one 2 hr exam (50%) prac reports (25%) assignments (25%).

The unit covers the physiology, ecology, and management of urban trees; scientific aspects of design and management of sports field, parklands, and open areas, including management of native vegetation; and the environmental impact of urban horticultural activities and appropriate remedial strategies.

HORT 5011 Research Project (Horticultural Science)

24 credit points. **Session:** Semester 1, Semester 2. **Classes:** February and July.

Candidates will conduct and report on a well-defined investigation into an area of interest in horticulture.

HORT 5012 Flower and Nursery Crops (Advanced)

4 credit points. Dr McConchie. **Session:** Semester 2. **Classes:** (2 lec, 2 prac)/wk. **Assessment:** one 2hr exam (60%), assignments (40%).

A discussion of the major aspects of the production of cut-flower and nursery crops, including protected cropping and glasshouse management. The unit will provide students with a detailed appreciation of the need for and methods of developing more precise production technology for these industries.

HORT 5015 Postharvest Biology and Technology (Adv)

4 credit points. Dr McConchie. **Session:** Semester 1. **Classes:** (3 lec 3 prac)/wk. **Assessment:** two 1 hr exams (60%) assignments (40%).

The unit focuses on understanding the maintenance of quality during the harvesting, handling, storage and marketing of fresh horticultural produce. The subject addresses the technical issues and economic challenges associated with the delivery of living products to the consumer. Students will draw on examples from fruit, vegetable, cut flower, nursery, mushroom and turf crops.

HORT 5016 Issues in Horticultural Sciences A

4 credit points. **Session:** Semester 1. **Classes:** (1 lec, 1 sem, 1 lab)/wk. **Corequisites:** HORT5017. **Assessment:** one 1 hr exam, essay and/or a design and report.

Students attend a series of workshops, seminars and excursions designed to provide them with a broad overview of current issues affecting the horticultural industries, and prepare an essay of 5000 words and/or a design and a report, and give a seminar on a topic of their choice, selected from a list which covers the main efficiency, marketing and environmental issues affecting Australian horticulture.

HORT 5017 Issues in Horticultural Sciences B

4 credit points. **Session:** Semester 2. **Classes:** (1 lec, 1 sem, 1 lab)/wk. **Corequisites:** HORT5016. **Assessment:** one 1 hr exam, essay and/or a design and report.

See HORT5016

HORT 5018 Research Project 1 Horticultural Science

12 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July.

Candidates will conduct and report on a well-defined investigation into an area of interest in horticulture

HORT 5019 Research Project 2 Horticultural Science

12 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** HORT5018.

Candidates will conduct and report on a well-defined investigation into an area of interest in horticulture.

HORT 5020 Research Project 3 Horticultural Science

6 credit points. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** Either HORT5018 or HORT5019.

Candidates will conduct and report on a well-defined investigation into an area of interest in horticulture.

Microbiology

MICR 5001 Microbiology A (Advanced)

12 credit points. Dr Ferenci. **Session:** Semester 1. **Classes:** 3 lec & 8 hrs of prac/wk. **Corequisites:** MICR 5002 Microbiology A (Advanced).. **Assessment:** one 1 hr and one 2 hr theory exam, prac.

The coursework for this unit follows substantially the same syllabus as the senior unit of study for Science students, General and Medical Microbiology (MICR 3001). The unit of study covers two general areas:

Medical Microbiology - medical bacteriology, virology and parasitic diseases, epidemiology, public health, emerging and re-emerging diseases.

General Microbiology - microscopy, microbial growth and metabolism, microbial ecology.

MICR 5002 Microbiology B (Advanced)

12 credit points. Dr Ferenci. **Session:** Semester 2. **Classes:** 3 lec & 8 prac per week. **Corequisites:** MICR 5001 Microbiology A (Advanced).. **Assessment:** one 1 hr and one 2 hr theory exam, prac.

The coursework for this unit follows substantially the same syllabus as the senior unit of study for Science students, Molecular and Environmental Microbiology (MICR 3002). As well as lectures and practical classes there is a variety of other activities, including workshops, mini lectures, poster presentations, skills testing and tutorials. The unit of study covers two general areas:

Molecular Microbiology: aspects of bacterial structure and physiology, principles of molecular pathogenicity.

Environmental Microbiology: microbial ecology, plant microbiology.

MICR 5005 Research Project (Microbiology) A1

8 credit points. Dr Ferenci. **Session:** Semester 1. **Corequisites:** MICR 5006.

Candidates are required to undertake a project, which will normally span 2 semesters, and submit a report in some advanced aspect of agricultural microbiology related to the area of interest.

MICR 5006 Research Project (Microbiology) A2

8 credit points. Dr Ferenci. **Session:** Semester 2. **Corequisites:** MICR 5005. See MICR5005.

MICR 5007 Research Project (Microbiology) B1

12 credit points. Dr Ferenci. **Session:** Semester 1. **Corequisites:** MICR5008.

Candidates are required to undertake a project and submit a report in some advanced aspect of Microbiology related to the area of interest.

MICR 5008 Research Project (Microbiology) B2

12 credit points. Dr Ferenci. **Session:** Semester 2. **Corequisites:** MICR5007.

Candidates are required to undertake a project and submit a report in some advanced aspect of Microbiology related to the area of interest.

MICR 5009 Special Aspects of Microbiology A1

4 credit points. Dr Ferenci. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** MICR5010.

The unit of study may include tutorials, seminars, essays and directed reading on selected topics.

MICR 5010 Special Aspects of Microbiology A2

4 credit points. Dr Ferenci. **Session:** Semester 1, Semester 2. **Classes:** February or July. **Corequisites:** MICR5009.

The unit of study may include tutorials, seminars, essays and directed reading on selected topics.

Plant Pathology and Plant Protection**CROP 5006 Crop Protection (Advanced)**

4 credit points. **Session:** Semester 2. **Classes:** July. **Assessment:** one 2 hr theory exam, laboratory work.

This unit considers the impact of weeds, insects and other invertebrates and disease on plant production and the various strategies for protecting plants from resulting damage. Environmental issues associated with pest control are emphasised. Topics covered include; crop loss assessment and economic threshold of damage; the origins of pest and disease problems and epidemiology; the major pest and disease problems in Australia; the use of pesticides and resistance to them; legislative aspects, and the role of quarantine and biological control agents for weeds, insects and pathogens. Laboratory work includes the biology of important fungal plant pathogens, the technology of spray application and case studies in integrated pest management.

PPAT 5002 Defence Mechanisms of Plants

6 credit points. **Session:** Semester 1. **Assessment:** Two papers and a laboratory assessment.

This unit of study focuses on various aspects of plant pathology and mycology involving molecular techniques. Students are introduced to fundamental concepts in molecular biology, molecular techniques,

plant-microbe interactions, pathogen populations, molecular diagnostics and molecular phylogenetics. Emphasis is placed on the complementarity between theoretical and conceptual understanding and practical laboratory exercises.

PPAT 5004 Research Methods in Plant Pathology A

16 credit points. **Session:** Semester 2.

This unit involves analytical laboratory work and the management of experimental data, together with essay assignments on a range of topics in experimental plant pathology. A written report is required on the experimental work.

PPAT 5005 Soil Biology and Biodiversity

6 credit points. Prof. Burgess. **Session:** Semester 1. **Assessment:** one 3hr exam, assignment.

An introduction to the diversity of organisms found in the soil, and the ecological principles governing their activities and interactions. Practical applications are illustrated with particular reference to soilborne plant diseases. Practical classes demonstrate important techniques for working with soil organisms and soilborne diseases, and for controlling the soil environment, especially soil water, to manipulate biological activity. Topics covered include the nature of the soil biota; isolation, identification and quantification of soil organisms; pathogenic and mutualistic interactions between fungi and roots; mycorrhizae; the nature and control of soilborne plant diseases; effects of water potential and temperature on the activity and survival of soil fungi; temporal and spatial distribution of soil fungi and soilborne diseases; and the soil biology of conservation farming.

PPAT 5006 Special Topics in Plant Pathology

8 credit points. **Session:** Semester 2.

This unit deals with specialised areas of particular interest to each candidate. Candidates will be given a reading list on which essays and/or seminars will be presented.

PPAT 5012 Research Methods in Plant Pathology B1

6 credit points. **Session:** Semester 1.

This unit involves analytical laboratory work and the management of experimental data, together with essay assignments on a range of topics in experimental plant pathology. A written report is required on the experimental work.

PPAT 5013 Research Methods in Plant Pathology B2

6 credit points. **Session:** Semester 2.

See PPAT5012

PPAT 5014 Adv Field/Lab Studies in Plant Disease

6 credit points. Professor Burgess, Dr Summerell, Dr Park, Dr Wellings and external specialists. **Session:** Semester 1.

This module is designed to provide experience in field studies on the diagnosis and control of plant disease and diagnostic procedures for all types of pathogens. It will include studies in modern approaches to fungal taxonomy and identification, including molecular techniques. It will also include an introduction to modern methods for breeding for resistance to pathogens. An introduction to scientific investigations and literature surveys including computer research techniques will also be included

Soil Science, Soil Conservation and Soil Contamination**AGEC 5010 Natural Resource Economics (Advanced)**

8 credit points. **Session:** Semester 2. **Classes:** (3 lec & 1 tut/lab)wk. **Assessment:** one 2hr exam, assignments.

A unit in natural resource economics of relevance to agriculture and the resource industries. Issues discussed are: the environment as a source of environmental services; socially efficient resource allocation and Pareto welfare economics; market failure and characteristics of environmental services; externalities, pollution, congestion; benefit cost analysis of public projects, including the modification of environmental services; non-depletable resources; depletable resources; irreversibility; sustainability. Applications include land degradation, fisheries, forestry, land-use planning and greenhouse effect. Some of the coursework may cover material dealt with at the undergraduate level but additional workshops, seminars, tutorials, assignments and/or assessments will be provided as appropriate to the postgraduate program.

SOIL 5001 Adv Methods of Studying & Analysing Soil

6 credit points. Prof McBratney, Dr Singh, Dr Cattle. **Session:** Semester 2b. **Classes:** (3 lec, 1 tut & 8hr prac)/7wk (2nd half). **Assessment:** one 3hr exam, lab report, problem sets, essay.

Seven weeks of lectures and practicals concerning new and advanced methods for studying soil. Topics include electronic microscopy, advanced X-ray analysis, soil dating techniques including ¹³C and thermoluminescence, dynamic simulation modelling of carbon

5. Advanced units of study

turnover, quality control of routine analytical techniques and measurement of soil microbial biomass.

SOIL 5002 Advanced Pedology

6 credit points. **Session:** Semester 1.
Prof. McBratney for description.

SOIL 5003 Chemistry of the Soil Environment

6 credit points. **Session:** Semester 2a. **Classes:** (3 lec, 1 tut & 8hr prac)/7wks (first half). **Assessment:** one 2hr exam, prac report, problem sets, essay.
Topics include cation exchange capacity and pH dependent charge, soil charge characteristics, soil chemical analyses and their interpretation, formation of acid soil—Al and Mn toxicities, chemistry and adsorption/desorption of K, P and S in soil, soil solution and speciation of ionic components, soil salinity and sodicity, oxidation/reduction reactions in soil and chemistry of soil organic matter and nitrogen.

SOIL 5004 Form Eval & Management of Soil Resource

8 credit points. Prof. McBratney. **Session:** Semester 2. **Classes:** (4 lec & 3hr prac)/wk, 5 days in the field. **Assessment:** one 3hr exam, report, field and lab work.
Lectures on classification of soil, soil survey, pedological processes, geomorphology and soil stratigraphy, aerial photography, geostatistics and their application to land evaluation for rural purposes, the forms of land degradation occurring in Australia, and management conducive to sustainable soil husbandry.
Field work involves landscape description and the description, mapping and sampling of soil profiles for the purpose of assessing land use capability and field variability of soil properties.
Laboratory work involves routine physical and chemical tests of samples taken in the field relevant to assessment of the land-use potential and the quantification of the soil variability at the survey site.

SOIL 5005 Physical Modelling of Soil Environment

6 credit points. Prof. McBratney. **Session:** Semester 1a. **Classes:** (2 lec, 1 tut & 5hr prac)/7wks, 5 days in the field (first half). **Assessment:** one 2hr exam, field and prac reports, problem sets, essays.
The emphasis is to examine the quantitative aspects of soil physics particularly in relation to the transfer of energy, gas, water, solids and solutes in soil.
Lecture and laboratory topics include heat flow, gas movement, soil water energetics, saturated and unsaturated flow of soil water, infiltration, solute movement, water and wind erosion as well as the fundamentals of numerical computer modelling of soil physical processes.
Field work involves field measurement of soil physical properties such as hydraulic conductivity and infiltration rates and moisture content.

SOIL 5006 Soil Contamination

10 credit points. Dr Singh. **Session:** Semester 2. **Classes:** (4 lec & 1 prac)/wk; 5 days of fieldwork. **Assessment:** one 3hr exam, essay, field and lab work.
The unit explores topical environmental issues concerned with soil contamination and considers causes of soil contamination; sampling of contaminated soil, analysis and interpretation; hazards posed to biological systems; and soil and waste management strategies in pollution prevention and land reinstatement. Amongst the topics considered are sewage sludge (heavy metals and organics), agrochemicals (pesticides and nitrogenous fertilisers), acid rain (aluminium toxicity), industrially-contaminated land (petrochemicals, cyanides, phenols, asbestos, catalysts, PAHs, PFA, strong acids/bases), domestic waste (methane, plastics, metalliferous materials), mines and mine wastes (coal, oil shale, metal ore mining) and reinstatement of spoiled soils (soil storage/emplacement, slope stability, vegetation establishment, use of ameliorants, end-use sensitivity).
Laboratory classes will involve the study and determination of soil contaminants and investigations into their retention, movement and phytotoxicity. Site visits will provide an opportunity to view problems and practical solutions in the field.

SOIL 5007 Soil Mineralogy, Pedogenesis & Taxonomy

6 credit points. **Session:** Semester 1b. **Classes:** (3 lec, 1 tut & 8 hr prac)/7wks. **Assessment:** one 2hr exam, prac reports.
This unit centres on a weathering study which traces the changes from a rock parent material up through the soil profile. The methods of study include particle-size analysis and extraction of a fine-sand fraction for optical identification and quantification of the mineral species present. Thin sections of the rock and profile are prepared, examined and the main features identified and quantified. The data from the sand analysis, micromorphological investigations and clay mineral assessments are used to provide an understanding of the pedogenesis of the particular soil. A detailed study, including exer-

cises, is made of the USDA soil classification system, Soil Taxonomy.

SOIL 5008 Soil Properties and Processes

8 credit points. Prof. McBratney, Dr Cattle. **Session:** Semester 1. **Classes:** (4 lec & 4hr prac)/wk, 1 day in the field. **Assessment:** one 3hr exam, class work, prac book.
This unit includes the fundamental properties of soil, the factors of soil formation, and the processes that operate in the soil system. Components comprising pedology, soil physics, soil chemistry and soil biology are synthesised by reference to common soil horizons and profiles from N.S.W. Field studies start with description and assessment of essential characteristics. The physics of water and gas movement, temperature, density, swelling and strength are considered. The chemistry of soil solids, surfaces and solutions are discussed as well as macronutrients and micro-nutrients and problems such as salinity, acidity and waterlogging. There is also some discussion of soil microorganisms and microbiological transformations in the soil.

SOIL 5009 Strategies for Soil Conservation

10 credit points. **Session:** Semester 2. **Classes:** 10 days in the field (semester breaks). **Assessment:** assignment, seminar.
Candidates will investigate and integrate biological, chemical, physical, economic and sociopolitical constraints on soil conservation in the context of a particular enterprise, farming system or geographic region. This will involve the design and execution of a field-sample survey. The concepts of land care and sustainable development will be investigated thoroughly.

SOIL 5010 Research Project A (Soils)

8 credit points. **Session:** Semester 1, Semester 2. **Corequisites:** SOIL5012.
Candidates will conduct and report on a well-defined investigation into an area of interest in soil science or soil conservation.

SOIL 5011 Research Project (Soils)

16 credit points. **Session:** Semester 1, Semester 2.
Candidates will conduct and report on a well-defined investigation into an area of interest in soil science or soil contamination.

SOIL 5012 Research Project A1 (Soils)

8 credit points. **Session:** Semester 1, Semester 2. **Corequisites:** SOIL5010.
Candidates will conduct and report on a well-defined investigation into an area of interest in soil science or soil conservation or soil contamination.

6. Postgraduate research and scholarships

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Postgraduate research institutes

Plant Breeding Institute

The Plant Breeding Institute associated with the Faculty promotes the science of plant breeding, and the improvement of crop plants available for cultivation in New South Wales. The Institute is advised by a council composed of the Vice-Chancellor, members of the NSW Wheat Research Foundation, members of the Faculty of Agriculture, Food and Natural Resources, and other relevant industry representatives. The Professor of Plant Breeding is the Director of the Institute.

Institute of Advanced Studies

The Institute of Advanced Studies was established within the Faculty of Agriculture, Food and Natural Resources in 1974 to advise the Senate regarding several bequests. The Institute will use the funds to further the development of postgraduate studies and research in the Faculty, and be responsible for the administration of the scholarship program of the Faculty. It is intended that the Institute shall promote the attraction of additional income.

The directors of the Institute are appointed from and by full-time permanent members of the Faculty of Agriculture, Food and Natural Resources. The Dean and Associate Dean (Postgraduate) are ex officio directors.

Summary of scholarships and prizes

The table in this chapter (Table 6.1: Summary of scholarships and prizes) is a summary only; for full details concerning the conditions governing the awards of these prizes and scholarships contact the Research Office.

Awards not restricted to graduates in Agriculture

Travelling scholarships

Baillieu Research Scholarship*
 HS Carslaw Memorial Scholarship
 William and Catherine McIlrath Scholarship
 The Rhodes Scholarship
 The Gowrie Postgraduate Research Scholarships
 The JB Watt Travelling Scholarship
 The James King of Irrawang Travelling Scholarship*
 The GHS and IR Lightoller Scholarship*
 The Charles Gilbert Heydon Travelling Fellowship in Biological Sciences
 The Eleanor Sophia Wood Travelling Fellowships
 The Herbert Johnson Travel Grants*
 The Commonwealth Scholarship and Fellowship Plan Awards

*Grants in aid

Other scholarships are available. Enquiries about scholarships should be made at the Research Office. International students should make their enquiries at the International Office. Enquiries about scholarships offered by other universities should be addressed to the registrar of the university concerned. Scholarship conditions may change without notice.

Postgraduate scholarships and prizes

The University of Sydney on the recommendation of the Faculty awards postgraduate scholarships to candidates proceeding by research and thesis to the degrees of Doctor of Philosophy, Master of Science in Agriculture and Master of Agricultural Economics. The terms and conditions for the Thomas Lawrance Pawlett Postgraduate

Scholarship, the Christian Rowe Thornett Scholarship, the Alexander Hugh Thurburn Scholarship, the WC Turland Postgraduate Scholarship and the FH Loxton Studentship are listed below. They are normally offered annually, when available, as soon as possible after the award of the Australian Postgraduate Awards upon which value the stipend is based.

Common terms and conditions of award

The scholarships are awarded under the following general terms and conditions of award:

1. The object of the scholarships shall be the encouragement and promotion of the scientific study of agriculture within the Faculty.
2. The scholarships shall be awarded by the Faculty of Agriculture, Food and Natural Resources, to University graduates, graduands or persons holding equivalent qualifications who are eligible for admission to candidature for a higher degree by research and thesis and who enrol as full-time candidates.
3. In awarding the scholarships, consideration shall be given to the work of the applicants during their undergraduate courses, their postgraduate careers, if any, and their special aptitude and ability to carry out the object of the scholarship.
4. The annual value of the scholarship shall be equal to the value of the Australian Postgraduate Awards and shall provide the same allowances as those awards.
5. The maximum tenure of the scholarships shall be, in the case of a candidate:
 5. (a) for the degree of Master, for up to two years, or
 5. (b) for the degree of Doctor of Philosophy, for three years and in exceptional circumstances may be extended by up to six months.
7. The tenure of the scholarships may be, in the case of a candidate:
 7. (a) who has been enrolled previously for a higher degree in the Faculty, reduced by the time credited towards the degree for which the candidate enrolls, or
 7. (b) who is or has been enrolled for the same degree for which the scholarship is awarded, reduced by the time the candidate has been enrolled for that degree.
9. The scholar shall furnish progress reports to the Faculty annually at the end of the academic year and at other times if directed.
10. The scholar shall acknowledge the tenure of the scholarship in any thesis or other publication which shall result from such tenure.
11. No scholar shall, except with the approval of the Faculty, occupy any salaried position or hold any other award during the term of appointment. The scholar may undertake teaching assistance consistent with the University Postgraduate Research Award conditions.

Specific terms

The following specific terms and conditions of award apply:

Thomas Lawrance Pawlett Scholarships

Dr Thomas Lawrance Pawlett of Cremorne bequeathed the income from his residuary estate to the University for the purpose of encouraging and promoting the scientific study of agriculture in connection with the said University for the founding of a research or travelling scholarship or scholarships in agriculture, to be called the Thomas Lawrance Pawlett Scholarship.

There are three types of scholarship established under the foundation: the Thomas Lawrance Pawlett Postgraduate Scholarship, the Thomas Lawrance Pawlett Postdoctoral Scholarship and the Thomas Lawrance Pawlett Visiting Scholarship.

6. Postgraduate research and scholarships

Scholarship	Value \$	Closing date	Other information
Tenable at the University of Sydney			
Australian Postgraduate Awards	18,484 in 2004	31 October	Graduates with Hons I. For research in any field
University of Sydney Postgraduate Awards	as for APA	31 October	Graduates with Hons I. For research in any field
Henry Bertie and Florence Mabel Gritton Postgraduate Research Scholarships	as for APA	January and July	For research in chemistry in relation to industry and agriculture
Richard Claude Mankin Scholarship – Postgraduate	as for APA	January	For research into water conservation.
James Vincent Scholarship in Microbiology	up to 1000	31 March	APA or similar scholarship holders working in applied microbiology
Awards restricted to candidates in Agriculture			
McCaughey Memorial Institute Scholarship	as for APA	as advertised	Graduates to conduct research in agricultural sciences with particular relevance to rice
Norman Scott Noble Scholarship	up to 1000	mid May	Travel grant or grant-in-aid to candidates in the discipline of agricultural entomology
Irvine Armstrong Watson Scholarship	up to 500	mid May	Travel grant or grant-in-aid to candidates in the disciplines of agricultural genetics, biometry, plant breeding or plant pathology
Faculty scholarships			
The following five are identical (except that the FH Loxton is restricted to males) and are awarded annually depending on the availability of funds.			
Thomas Lawrence Pawlett Postgraduate Scholarship	as for APA	31 October	Graduates for full-time research within Faculty (preference to Hons I or II Div. 1 or equivalent)
Christian Rowe Thornett Scholarship	as above	31 October	as above
Alexander Hugh Thurburn Scholarship	as above	31 October	as above
WC Turland Postgraduate Scholarship	as above	31 October	as above
FH Loxton Postgraduate Scholarship	as above	31 October	as above. Restricted to males

Thomas Lawrence Pawlett Postgraduate Scholarship

The scholarship is awarded under the following specific condition:

1. The name of the scholarship shall be the Thomas Lawrence Pawlett Postgraduate Scholarship.

Christian Rowe Thornett Scholarship

The scholarship was established in 1975 by a bequest from Mrs Christian Rowe Thornett for the teaching and development of agricultural science.

The scholarship is awarded under the following specific condition:

1. The name of the scholarship shall be the Christian Rowe Thornett Scholarship.

Alexander Hugh Thurburn Scholarship

In 1972 the Faculty of Agriculture received a bequest from Mary Esme Thurburn, who established a scholarship in memory of her husband.

The scholarship is awarded under the following specific condition:

1. The name of the scholarship shall be the Alexander Hugh Thurburn Scholarship.

WC Turland Postgraduate Scholarship

The scholarship was established in 1976 by a bequest from WC Turland.

It is awarded under the following condition:

1. The name of the scholarship shall be the WC Turland Postgraduate Scholarship.

FH Loxton Postgraduate Scholarship

Established in 1960 under the will of FH Loxton, who bequeathed a portion of the income of his residuary estate to the University for the purpose of establishing and maintaining studentships and or scholarships tenable in the Faculties of Veterinary Science, Agricultural Science and Engineering in particular in the Department of Chemical Engineering. These studentships and scholarships shall be awarded to male persons only by the Faculty of Veterinary Sci-

ence, the Faculty of Agriculture, Food and Natural Resources or the Department of Chemical Engineering.

The scholarships shall be awarded in any of the following categories, at Faculty discretion:

- Postgraduate Research Scholarships
- Postgraduate Supplementary Scholarships
- Postgraduate Short term Research/Thesis Completion Scholarships
- Undergraduate Scholarships
- Postdoctoral Fellowships

1. The name of the scholarships shall be the FH Loxton Postgraduate Studentships.
2. The scholarships are for postgraduate research and shall be awarded on the basis of academic merit.
3. The scholarships are of the annual value of an Australian postgraduate award (APA). A relocation allowance and a thesis allowance are payable in line with APA entitlements.
4. The scholarships are tenable for up to two years for a Masters degree and up to three years for a PhD degree subject to satisfactory annual progress judged by the Faculty concerned, or the Department in the case of Chemical Engineering. In exceptional circumstances, a further extension of six months may be granted to PhD candidates. Periods of study already undertaken towards the degree prior to the commencement of the award will be deducted from the maximum period of tenure.

(Remaining conditions for Agriculture are the same as for Turland, Pawlett etc)

Grants in Aid

Grants-in-aid are designed to provide supplementary living allowances, travel grants or grants-in-aid. Applicants must be:

- (1) enrolled full-time in a higher degree at The University of Sydney (some grants-in-aid are also open to part-time students and graduates); and
- (2) citizens or permanent residents of Australia.

Applicants are required to complete a single application form for the awards and they will be considered for the award(s) for which they are eligible.

If seeking one of the awards designed to support overseas travel, it is essential that applicants justify in their applications why support for overseas travel is being sought. Applicants should state whether their research can be undertaken in Australia and, if not, why it is necessary for them to travel overseas for purposes of study. Applicants should provide an outline of their proposed travel plans, indicating the extent to which the period of overseas study is necessary and is regarded to be integral to their total research program, in addition to details of current financial support and the amount of

funding sought from the scholarships. If necessary, a separate sheet should be attached to the application form.

Applications must be lodged no later than the closing date of mid May in each year.

These awards, details of which follow, are currently offered as grants-in-aid only in the Faculty of Agriculture, Food and Natural Resources:

Award	Maximum value \$
Norman Scott Noble Scholarship	1000
Irvine Armstrong Watson Scholarship	500

Note: The selection committees reserve the right to share any of the above awards.

Norman Scott Noble Scholarship

Established in 1987 by a donation of \$14 000 by Mrs Mabel Noble in memory of her husband, Dr Norman Scott Noble, a distinguished graduate of the Faculty of Agriculture.

The scholarship is awarded under the following conditions:

1. The name of the scholarship shall be the Norman Scott Noble Scholarship.
2. The objects of the scholarship shall be to further studies in agricultural entomology and to encourage and promote the discipline at The University of Sydney.
3. The scholarship shall be awarded by the Faculty of Agriculture, Food and Natural Resources on the recommendation of the Dean, who shall act on the advice of the appropriate professors, associate professors, readers and the candidate's supervisor in recommending the award and in determining the value of the scholarship.
4. The scholarship may only be awarded to a candidate enrolled in the Faculty of Agriculture, Food and Natural Resources for a higher degree or a diploma in the discipline of agricultural entomology.
5. The scholarship may be held in conjunction with any other postgraduate award and may be in the form of a travel grant or a grant-in-aid for the holder for expenses incurred in connection with the holder's research.
6. More than one scholarship may be awarded in any one year if sufficient funds are available. The maximum amount available for the award of the scholarships in any year shall be \$1,000.
7. A candidate may be awarded the scholarship more than once, provided that the total value of the awards to any one candidate does not exceed \$3000.

Applications for the scholarship shall be lodged at the Research Office by mid May each year.

Irvine Armstrong Watson Scholarship

The scholarship was established in 1987 by a donation of \$5000 by Mrs Loloma Watson and family in memory of their husband and father, Emeritus Professor Irvine Armstrong Watson.

The scholarship is awarded under the following conditions:

1. The name of the scholarship shall be the Irvine Armstrong Watson Scholarship.
2. The object of the scholarship shall be to further studies in the disciplines of agricultural genetics, biometry, plant breeding or plant pathology.
3. The scholarship shall be awarded by the Faculty of Agriculture, Food and Natural Resources on the recommendation of the Dean, who shall act on the advice of the appropriate professors, associate professors, readers and the candidate's supervisor in recommending the award and in determining the value of the scholarship.
4. The scholarship may only be awarded to a candidate enrolled in the Faculty of Agriculture, Food and Natural Resources for a higher degree or a diploma in one of the disciplines of agricultural genetics, biometry, plant breeding or plant pathology.

5. The scholarship may be held in conjunction with any other postgraduate award and may be in the form of a travel grant or a grant-in-aid for the holder for expenses incurred in connection with the holder's research.

6. More than one scholarship may be awarded in any one year if sufficient funds are available. The maximum amount available for the award of the scholarships in any year shall be \$500.

7. A candidate may be awarded the scholarship more than once, provided that the total value of the awards to any one candidate does not exceed \$1000.

Applications for the scholarship shall be lodged at the Research Office by mid May each year.

7. Other Faculty information

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

This chapter of the handbook contains information specific to the Faculty and some general information. For further details about discontinuation and examinations, as well as general information about the organisation of the University, assistance for students with disabilities, child care facilities, accommodation, health, counselling, financial assistance, careers advice and a range of other matters, see The University of Sydney Diary, available free from Student Union outlets. See the Web site (<http://www.usyd.edu.au>).

Enrolment

New students and re-enrolling students who do not satisfy the pre-enrolment conditions collect their enrolment forms from the Faculty Office in the McMillan Building where they choose units of study and lodge a registration form.

Confirmation of enrolment

All the information provided when you enrol is added to the University's computerised student record system. This includes your degree, academic year and the subjects you are taking. It is important that this information be recorded correctly at the beginning of the year, and amended should a change occur in any of the details during the year. Any subject enrolment has a financial implication under the Higher Education Contribution Scheme (HECS).

To enable you to see what enrolment data has been recorded, you will be sent a 'confirmation of enrolment' notice shortly after completion of enrolment. You should check this carefully. If the information is correct you should keep the notice as a record of your current enrolment. Should the notice be incorrect in any detail, you should apply at the Faculty Office immediately to have your record

amended. A new confirmation will then be prepared and sent to you. You will also receive, about two months after the beginning of each semester, a statement showing your HECS/fee assessment for that semester. If there appears to be an error in this assessment, you should follow the directions for correction of the assessment which are included on the statement.

If you wish to:

- change a subject in which you are enrolled;
- discontinue a subject

you may do so on the Web within a limited range of dates, prior to and early in each semester. Outside those dates, you should apply at the Faculty Office using your confirmation of enrolment form to obtain approval. Your record at the University will not be correct unless you do this. It is not sufficient, for instance, to tell a professor or the lecturer, or even the Faculty Office that you discontinued a subject. Unless an enrolment change is approved on the Web or at the Faculty Office (both of which should generate a new confirmation of enrolment form) it will not be accepted by the University and in some cases you will still incur a financial liability under HECS.

If you wish to:

- discontinue enrolment totally

you must apply at the Faculty Office using your confirmation of enrolment form to provide written advice.

Examinations

There are two formal examination periods each year:

Period	Held	Approximate duration
Semester 1	June	2 weeks
Semester 2	November	2 weeks

In addition individual faculties and departments may examine at other times and by various methods of assessment, such as essays, assignments, viva voce, practical work. Some departments do not examine during the February semester.

The following information applies to the Bachelor of Agricultural Economics, Bachelor of Horticultural Science, Bachelor of Land and Water Science, Bachelor of Resource Economics and Bachelor of Science in Agriculture degrees.

Notification of examination results

The results of semester examinations are available on the Intranet, displayed on Faculty noticeboards and posted directly to you at the end of each semester.

Disclosure of examination marks

Final marks will appear on your semester result notice. Marks may also be obtained from the Faculty for the major components of assessment which make up the final marks. You are entitled to information about any details of the assessment procedures used to determine the final result.

Your examination scripts may be retrieved for up to 6 months after the completion of assessment in each unit. This does not apply to examination papers which involve the repeated use of the same material in successive examinations.

Examination grades

Each subject taken will be allotted one of the following grades at examinations:

Grade	Percent
High Distinction	85–100
Distinction	75–84
Credit	65–74
Pass	50–64
Fail	0–49

The need to seek early advice

Many students in need of advice fail to make full use of the assistance available to them. If you believe that your performance during a course, or your preparation for your examinations, has been adversely affected by medical, psychological or family circumstances, you should seek advice as early as possible. Members of the teaching staff, the University Counselling Service and the University Health Service are all available for consultation and can give advice on appropriate action to take.

Special Consideration Procedure

If you believe that your performance has been adversely affected by illness or other misadventure, you should submit a special consideration form to the Faculty Office. Only well-attested serious illness or misadventure during a semester or occurring at the time of an examination will warrant special consideration for academic performance. Occasional brief or trivial illness would not normally be regarded as sufficient to explain an absence or a poor performance and students are discouraged from submitting certificates for absences totaling less than one week, although frequent recurrent short absences would need documentation.

To apply for special consideration:

- (a) Obtain a special consideration application pack from the Faculty Office, University or Faculty Web site or the Student Centre.
- (b) Complete the special consideration forms:
 - i) For consideration due to serious illness have a registered medical practitioner or counsellor complete the Professional Practitioner's Certificate
 - ii) For consideration due to misadventure attach the appropriate documentation
- (c) Lodge the form with the Faculty Office
- (d) Applications must be received within one week from the end of the period (ie assignment due date or date of examination) for which consideration is being sought.
- (e) Retain the receipt that will be given on lodgement of the form

Any application must be accompanied by appropriate medical certificates or other relevant documents. The Professional Practitioner Certificate must include:

- (a) dates of consultation
- (b) an evaluation by the practitioner, psychologist etc, as to the severity, duration and effect on the student's ability to attend classes, learn or complete assessment requirements
- (c) a description of the nature and seriousness of the student's problems, within the limits of confidentiality, so that an academic assessment can be made of the possible effects of the illness or accident on the student's performance
- (d) any other relevant information relating to the student's illness, trauma etc
- (e) any other documentation that may be relevant; and
- (f) the Practitioner authorises the University to contact them to confirm the authenticity of the certificate.

Faculty Computer Laboratories

The Faculty currently has four computer Laboratories. They are used by undergraduate and postgraduate students undertaking Units given by the Faculty of Agriculture, Food and Natural Resources. They can be used by arrangement with the Faculty's Network Manager, Mr Kyle Kiefer (9351 3947). Please consult the timetable on the entrance doors before proceeding into the laboratory. During some small classes casual access may be permitted, but please check with supervising staff first.

a) Watt Computer Laboratory, located in room 3007 of the Ross St Building (A04). This laboratory has 27 PCs and is opened automatically at 7am and closed automatically at 7pm Monday to Friday (except for public holidays). There are a limited number of swipe cards available from the University Security Office for weekend access – please consult the undergraduate intranet for a list of eligible students.

b) Ross Street Computer Laboratory, located on the ground floor of the Ross St Building (A03) and consisting of 30 PCs. This laboratory is not opened automatically, but is generally available Monday to Friday.

c) Woolley Computer Laboratory, located on the ground floor of the Woolley Building (A20) and consisting of 10 PCs. This laboratory is not opened automatically, but fourth year and postgraduate students can be given a code for out of hours use.

d) GIS Computer Laboratory, located in Room 303 of the Macmillan Building (A05). This laboratory is not opened automatically and is generally restricted to students in certain disciplines.

Summer School

Web: www.summer.usyd.edu.au (<http://www.summer.usyd.edu.au>)

Most faculties at the University offer units of study from degree programs during January/February. As the University uses all of its HECS quota in first and second semester, these units are full fee-paying and entirely voluntary. However, Summer School units enable students to accelerate their degree progress, make up for a failed unit or fit in a unit which otherwise would not suit their timetables. New students may also gain a head start by completing requisite subjects before they commence their degrees. Units start in January and run for up to six weeks (followed by an examination week). Notice of the units available is contained in the various Faculty Handbooks and is usually circulated to students with their results notices. Fee waiver scholarships are available. See website for details.

Ancillary fees and charges

The following fees and charges from 2004 can be a guide for similar charges in 2005.

Printing Charges

All students have free access to the Ross Street, Watt, McMillan and Woolley computer laboratories of the Faculty and a printing allocation to cover what may be expected by way of assignments and computer output from practical classes. Currently the limits are 125 pages per year for first to third year undergraduate students and 500 for fourth year students. Students may top up their limit (\$10 per 125 pages). For postgraduate students no limit to printing is set.

Manuals and Notes

Manuals and lecture notes are sold to students at below cost (combined charges are \$20 for each unit of study). Students are advised of charges at the beginning of the respective unit. Students may access these materials electronically or from a copy kept in the Faculty.

Excursions

Students are required to contribute towards the cost of accommodation for excursions in elective Third and Fourth Year units in Soil Science and Agricultural Chemistry (approximately \$100–250, depending on the excursion). The balance of the accommodation costs, transport and some meals are covered by the Faculty.

Other

Ancillary fees and charges in MICR and ANSC units are determined by the School of Molecular and Microbial Biosciences, Faculty of Science and the Faculty of Veterinary Science respectively.

Scholarships and prizes

See also the section on financial assistance in The University of Sydney Diary.

7. Other Faculty information

Table 7.1: Scholarships and prizes

Prize or scholarship	Value \$	Qualification
ABARE Scholarship	9750	See details listed before the prize details
James S Ashton Memorial Scholarship	3000	See details listed before the prize details
Commonwealth Bank Scholarship	3000	See details listed before the prize details
The Australian Cotton CRC Scholarship	6700	See details listed before the prize details(under review)
Grain Growers Association Scholarship	6000	See details listed before the prize details
Native Cockroach Research Scholarship	3000	See details listed before the prize details
Oasis Horticulture P L Scholarship in Horticulture	3000	See details listed before the prize details
Undergraduate Scholarships for HSC entrants	6700	See details listed after the prize details
Belmore Scholarships	500	Proficiency in First Year
	500	Proficiency in First Year Chemistry
	500	Proficiency in Second Year
	500	Proficiency in Soil Science 2 and Agricultural Chemistry 2
Brian G Davey Memorial Scholarships in Soil Science	400	Proficiency in Soil Science 2 and 3
Golden Jubilee Scholarship in Agri Science	500	Proficiency in Third Year
Martin McIlrath Scholarships*	490	Proficiency in HSC and First, Second and Third Years (men only). Preference to sons of ex-servicemen
John Mercer Busary	1000	See details listed before the prize details
ABARE Prizes	300	Highest honours aggregate at graduation in BAgREc and highest honours aggregate at graduation in BResEc
John Arthur Cran	100	Proficiency in HSC
Bruce Davidson Prize in Resource Economics	300	Proficiency in an essay or thesis in natural resource economics
Bruce R. Davidson Memorial Prize in Resource Economics	200	Proficiency in First Year Examinations
Cotton Research & Development Corporation Prize	500	Proficiency in Fourth Year Agronomy
Dairy Research Foundation	400	Proficiency in Fourth Year Animal Production
Clifford Dawson Holliday	200	Proficiency in Third Year Examinations
John Neil Downing Memorial	350	Proficiency in professional experience
John and Beatrice Froggatt	1000	Proficiency in Agricultural Entomology 1 and Fourth Year Agricultural Entomology
WW Froggatt Memorial	200	Proficiency in Agricultural Entomology project in Fourth Year
DL Jackson	400	Proficiency in Agricultural Science I or Horticultural Science 1 or Land and Water Science 1
FC McCleery Memorial Award	200	Fellowship and Leadership in the Faculty (Third Year students)
Theresa G Makinson	100	Proficiency in Horticultural Science in Fourth Year
Warren F. Musgrave Prize in Resource Economics	200	Proficiency in Second Year Examinations
Sibella Macarthur Onslow	200	Proficiency in Agronomy in Fourth Year
FL Partridge**	400	For students in Third and Fourth Years in need of financial assistance
Poultry Research Foundation	700	Proficiency in Fourth Year Animal Production
Alan Randall Prize in Resource Economics	200	Proficiency in Third Year Examinations
Ridley AgriProducts Prize in Animal Nutrition	250	Proficiency in Animal Nutrition 3
Joyce Winifred Rouse	40	Proficiency in Agricultural Chemistry in Fourth Year
SUAGA Prize	n.a.	President, AGSOC
Sydney Chinese Association	100	Proficiency in Microbiology 3 (Science) or Agricultural Microbiology 3
GW Walker Memorial Essay	100	Most proficient essay in the unit Applied Marketing
Professor WL Waterhouse	80	Proficiency in Agricultural Genetics 2 & Plant Disease 3
Sir Robert Watt Memorial Prize	80	Proficiency in Crop Science 2
Weed Society of NSW Prize	100	Proficiency in Weed Science
NH White Memorial Prize	100	Proficiency in Plant Pathology in Fourth Year
AR Woodhill Prize in Entomology	300	Proficiency in Agricultural Entomology in First Year
Arthur Yates and Co Pty Ltd (2 prizes)	100	Proficiency in Agricultural Genetics in Fourth Year
	100	Proficiency in Horticultural Science in Fourth Year

* Applicant required to submit an application to the Scholarships Office.

** Applicant required to submit an application to the Scholarships Office.

HSC scholarships and prizes

These scholarships and prizes are awarded on the basis of HSC results and no applications are required. Further information can be obtained from the Scholarships Office.

University bursaries

Bursaries are awarded on the combined grounds of financial need and academic merit and application may be made in March to the Financial Assistance Office (open Monday to Thursday from 9.30 am to 2.30 pm). In addition interest-free loans are available to students who are able to demonstrate financial need.

Other scholarships and prizes

University of Sydney (UoS) Scholarships

The University of Sydney Scholarships are available in all undergraduate degree programs.

University of Sydney Scholarships are awarded at the following levels:

- 'With Merit': minimum UAI of 95 (plus other achievements worth approximately \$5,000 per year, available for maximum 5 years (must maintain excellent academic record); approximately 50 scholarships are awarded each year.
- 'Entry Scholarships': minimum UAI of 95 (plus other achievements), worth approximately \$3,000 (awarded for one year only); approximately 100 scholarships are awarded each year.

Access scholarships

Access scholarships give access to the University to students who have been disadvantaged in some way. They are available to students who have a competitive UAI who also meet criteria related to financial disadvantage, disability or rural/remote location. The scholarships are worth approximately \$3,000 for up to five years.

Application forms and further information can be obtained from school career advisers in July, from the website (<http://www.usyd.edu.au/study/scholarships.shtml>) or from the University's Scholarships unit. Applications close in September each year.

Other scholarships

These include Council of Education Scholarship, The Freemasons' Scholarship, Martin McIlrath Scholarships for Undergraduates in Agriculture, Spero Gravas Scholarship and James Robinson Orange Memorial Prize. Information on these scholarships is available from the Scholarships Web site or Scholarships unit and applications close end of April.

Prize compositions

Details of these may be obtained from the Scholarships Web site or Scholarships unit with whom applications generally close in the first week of second semester.

Faculty resolutions

A candidate who presents for re-examination in any subject shall not normally be eligible for any prize or scholarship awarded in connection with such examination.

Undergraduate scholarships

James S Ashton Memorial Scholarship

Established in 1995 by donations through the initiative of Professor Fred and Claire Hilmer with the assistance of Susan and James W. Ashton in memory of their son James S. Ashton (BScAgr, 1993), to encourage and assist outstanding undergraduate students in Agriculture.

The scholarship may be awarded annually, on the recommendation of the Dean on the advice of a Faculty Selection Committee, to a student who enrolls full time in the Fourth Year of the BAnim Sc or BScAgr degree, provided the student's work is of sufficient merit. The student will show potential for making a significant contribution to the application of science and technology to the animal industries. While the student's overall academic record must be of sufficient merit it is not intended that the scholarship be limited to the applicant with the strongest academic record. Additional criteria will include performance in project work and work experience in animal science and related areas and participation in community and University activities which would demonstrate evidence of integrity of character, diligence and regard for fellow students. At the time of award, the recipient may not be in receipt of any other substantial scholarship award.

Value \$3000.

Application forms are available at the Faculty Office.

The Australian Bureau of Agricultural and Resource Economics (ABARE) Scholarship

ABARE offers two-year undergraduate scholarships. The first two were awarded in 2001 to Third Year BAgrEc students. Assuming a high calibre of applicants, there could be a continuum of two current scholarships with two new ones commencing each year. The total value of each scholarship is \$9,750.

Terms and conditions

1. The Faculty awards the ABARE Scholarships to two third year full-time Bachelor of Agricultural Economics or Bachelor of Resource Economics students
2. The Scholarships are available only to Australian citizens or permanent residents of Australia.
3. The scholarships will be awarded on the basis of the recipients' career aspirations, interpersonal and communication skills, initiative, level of self motivation and academic performance in first and second year. The Faculty of Agriculture, Food and Natural Resources will prepare a short-list of University of Sydney applicants, based normally on a minimum WAM of 65 (credit level), for joint interview by ABARE staff and one or more nominated members of the Faculty of Agriculture, Food and Natural Resources. (An applicant who did not have a minimum WAM of 65, but who provided evidence that they met all other criteria, would be eligible for short-listing).
4. The scholarships comprise three payments, the first payable on award of the scholarship, which is usually in the July Semester of Third Year. The second and third payments early in the February and July Semesters of Fourth year, subject to continued satisfactory academic progress.
5. The value of the scholarships shall reflect the value of the Faculty of Agriculture, Food and Natural Resources undergraduate scholarship scheme.
6. The scholarship holders will forward semester results to the ABARE Officer appointed as soon as they become available.
7. The scholarship holders will consult with the Faculty prior to selection of any substantial elective component of the course-work.
8. There shall be no bonding or other commitment to employment between ABARE and a scholar, but scholarship holders may be encouraged to undertake paid vacation employment with ABARE between the third and fourth academic years. Such work may be credited towards the student/s Professional Experience requirements subject to the usual guidelines.
9. A scholarship is intended for continuous progress between third and fourth year, but ABARE may consider a request for an interruption in a scholar's progress towards the degree for some exceptional purpose, and if such request is approved, the scholarship shall be suspended during such interruption.
10. The Faculty of Agriculture, Food and Natural Resources reserves the right to revoke a scholarship at any time, following consultation with ABARE, if a scholarship holder does not maintain a credit average or if there is a substantive change in enrolment which affects the basis of eligibility.
11. A scholarship holder may be required to relinquish the scholarship, if they accept any other scholarship of comparable or greater value without prior permission from the Faculty and ABARE.

Application forms are available at the Faculty Office.

The Australian Cotton Cooperative Research Centre Scholarship

The Australian Cotton CRC has offered two undergraduate scholarships each for two years. The first was awarded in 2001 to a Third Year BScAgr student and the second in 2003.

Terms and conditions

1. The Faculty of Agriculture, Food and Natural Resources awards the Scholarship to a third year full-time Bachelor of Science in Agriculture student who is a permanent resident of Australian.
2. The scholarship will be awarded on the basis of the applicant's career aspirations, interpersonal and communication skills, initiative, level of self motivation and academic performance

7. Other Faculty information

in first and second year. The Faculty of Agriculture, Food and Natural Resources will prepare a short-list of University of Sydney applicants, based normally on a minimum WAM of 65 (credit level) in first year and a WAM of 70 in Second and Third years, for joint interview by the Cotton CRC representatives and one or more nominated members of the Faculty. (An applicant who did not have a minimum WAM of 65/70, but who provided evidence that they met all other criteria, would be eligible for short-listing).

3. The scholarship payments shall be made at regular intervals, normally from approximately 1 March to 30 November, subject to continued satisfactory academic progress.
4. The value of the scholarship shall reflect the value of the Faculty Undergraduate scholarship scheme.
5. The scholarship holder will forward semester results to the Cotton CRC Officer as soon as they become available.
6. The scholarship holder will consult with the Faculty prior to selection of any substantial elective component of the course-work.
7. There shall be no bonding or other commitment to employment between the Cotton CRC and a scholar, but the scholarship holder may be encouraged to apply for a Summer Scholarship with the Cotton CRC between the third and fourth academic years. Such work may be credited towards the student's Professional Experience requirements subject to the usual guidelines.
8. A scholarship is intended for continuous progress between third and fourth year.
9. The Faculty reserves the right to revoke the scholarship at any time, following consultation with the Cotton CRC, if the scholarship holder does not maintain the academic standard or if there is a substantive change in enrolment which affects the basis of eligibility.

The scholarship holder may be required to relinquish the scholarship, if they accept any other scholarship valued at \$3000 or above without prior permission from the Faculty and the Cotton CRC. Faculty of Agriculture, Food and Natural Resources Undergraduate Scholarship holders are not eligible to apply.

Application forms are available at the Faculty Office.

Commonwealth Bank Group Customer Service Division Scholarship

The Commonwealth Bank offers two-year undergraduate scholarships valued at \$3,000 per year. The first was awarded in 1996 to a Third Year BAgEc student. Assuming a high calibre of applicants, there will be a continuum of scholarships with a new one commencing each year. The linking of the scholarship to paid vacation employment, between third and fourth year, which can count as professional experience, is a particularly attractive aspect of the scholarships.

This scholarship has been established by the Commonwealth Bank to allow industry to contribute to the tertiary education of students destined for a career in business and finance and with relevance to the agricultural sector. Scholarship holders will attain a more relevant background on completion of their degree, a significant insight into the industry and as a result a jump start in their chosen career path.

The scholarship is awarded on the basis of the applicant's career aspirations, interpersonal and communication skills, initiative, level of self motivation and self confidence and academic performance in first and second years and the first semester of third year.

Terms and conditions

- Commonwealth Bank – Institutional & Business Services awards the Commonwealth Bank – Institutional & Business Services Scholarship to a student undertaking the Bachelor of Agricultural Economics degree full-time at the University of Sydney.
- The Faculty of Agriculture will prepare a short-list of applicants, based on academic performance and relevant criteria for consideration by Commonwealth Bank staff.
- The Scholarship comprises a Savings Account to the value of \$3,000 per annum to the scholarship holder for the third and fourth years of the degree to assist in the payment of education expenses. The scholarship holder must open a Savings Account, as directed by Commonwealth Bank, to receive payment.

- The scholarship holder must undertake paid vacation employment with Commonwealth Bank between the third and fourth academic years with vacation employment commencing after the last examination of the year and extending to the last week prior to the beginning of lectures of the ensuing academic year.
- During vacation employment the scholarship holder will be employed on a contract basis.
- The scholarship holder will forward semester results to Human Resources, Institutional and Business Services of Commonwealth Bank as soon as they become available.
- Commonwealth Bank can revoke the scholarship at any time if the scholarship holder does not maintain a credit average and/or performance is unsatisfactory during vacation employment or if any other situation arises which warrants reconsideration of the award of the scholarship, including a change of enrolment not approved by the Commonwealth Bank.
- Upon completion of studies, the scholarship holder is expected to work for Commonwealth Bank – Institutional and Business Services for a reasonable period of time if a suitable full-time position is identified. Current roles will be in the Business Banking division of Institutional and Business Services.
- The scholarship holder will not accept any other scholarship without obtaining prior written permission from Commonwealth Bank.
- The scholarship holder will not accept employment with a competitor whilst holding the Commonwealth Bank – Institutional & Business Services Scholarship.

The EJ Holtsbaum University of Sydney Faculty of Agriculture, Food and Natural Resources Scholarship

The EJ Holtsbaum Agricultural Research Institute was established in 2003 following the gift by Mr EJ Holtsbaum to the University of his property 'Nowley'. Mr Holtsbaum, whose family owned Nowley since 1964, made the gift with the view that the farm would continue to prosper under the University's stewardship, and serve as a centre on the Liverpool Plains for the creation and dissemination of innovative technology for agricultural production and natural resource management. Surplus profits from the operation of Nowley are to be allocated for scholarships. Recipients shall be of high academic merit and show the intention to establish a career in agriculture (in whatever form). The intention of the scholarships is to help students fund their studies, and to encourage in recipients a sense of giving something back to the land through their degree, should they have the opportunity to do so.

The Grain Growers Association Limited Scholarship

(Under review)

Grain Growers Association Ltd offers an undergraduate scholarship to a Fourth Year BAgEc, BLWSc, BScAgr or BResEc student in the Faculty of Agriculture, Food and Natural Resources. Assuming strong interest, a high calibre of applicants and a positive outcome, there could be two scholarships awarded in 2005 and future years.

Terms and conditions

1. The Faculty awards the Grain Growers Association Ltd Scholarship to a fourth year full-time Bachelor of Agricultural Economics, Bachelor of Land and Water Science, Bachelor of Science in Agriculture or Bachelor of Resource Economics student.
2. The scholarship will be awarded on the basis of the applicant's career aspirations, interpersonal and communication skills, initiative, level of self motivation and academic performance in first, second and third year. The Faculty will prepare a short-list of University of Sydney applicants, based normally on a minimum WAM of 65 (credit level), for joint interview by Grain Growers Association staff and one or more nominated members of the Faculty. (An applicant who did not have a minimum WAM of 65, but who provided evidence that they met all other criteria, would be eligible for short-listing).
2. (a) The value of the scholarship stipend in 2003 was \$6,000 per annum.
3. (b) The value of the scholarship stipend may be adjusted annually.
3. (c) A scholarship shall run from approximately 1 March to 30 November.
4. (d) The scholarship payments shall be made at regular intervals.

5. The scholarship holder will forward semester results to the Grain Growers Association Officer appointed as soon as they become available.
6. The scholarship holder will consult with the Faculty prior to selection of any substantial elective component of the coursework.
7. There shall be no bonding or other commitment to employment between Grain Growers Association, but the scholarship holder is expected to participate in a meeting of the Association or Board, if asked, or prepare an article for the Association newsletter.
8. A scholarship is intended for one calendar year, but Grain Growers Association may consider a request for an interruption in a scholar's progress towards the degree for some exceptional purpose, and if such request is approved, the scholarship shall be suspended during such interruption.
9. The Faculty reserves the right to revoke the scholarship at any time, following consultation with Grain Growers Association, if the scholarship holder does not maintain a credit average or if there is a substantive change in enrolment which affects the basis of eligibility.
10. The scholarship holder may be required to relinquish the scholarship, if they accept any other scholarship of \$3,000 or more without prior permission from the Faculty and Grain Growers Association.

Application forms are available at the Faculty Office.

Native Cockroach Research Scholarship

Established by Dr H A Rose in 1996 for Entomology research to encourage and assist students interested in Australian native cockroaches. The scholarship will be awarded on the basis of the applicant's career aspirations, written communication skills, initiative, level of self motivation, commitment to the area and academic performance.

A candidate is expected to:

- Enrol full-time in the Fourth Year of the BScAgr degree.
- Specialise in Agricultural Entomology 4.
- Undertake his/her project (16 or 24 credit points) on some aspect of the biology of native cockroaches.
- normally have completed the first three years in minimum time, have a minimum Second/Third year WAM of 65 (credit level) and be strong enough academically to complete the degree over the four year period. (An applicant who did not have a minimum WAM of 65, but met all other criteria, would be eligible for consideration.)

An interview will be conducted, if necessary, for ranking.

Application forms are available at the Faculty Office.

Oasis Horticulture Pty Ltd Scholarship in Horticulture

Oasis Horticulture has offered two-year undergraduate scholarships. The first was awarded in 1998. Assuming a high calibre of applicants, it is envisaged that there would be a new scholarship commencing each year. The linking of the scholarship to paid vacation employment, which can count as professional experience, is a particularly attractive aspect of the scholarship.

Oasis Horticulture Pty Ltd, situated at Winmalee in the foothills of the Blue Mountains, is one of Australia's largest wholesale nurseries. The company is well known for Flower and Vegetable seedlings as well as potted lines. Oasis Horticulture has an intensive Research and Development Department. Its Propagation Department is responsible for the vegetative propagation of several million young plants annually.

Terms and conditions

1. The Faculty of Agriculture, Food and Natural Resources awards the Oasis Horticulture Pty Ltd Scholarship in Horticulture to a third year full-time Bachelor of Horticultural Science or Bachelor of Science in Agriculture student of The University of Sydney.
2. The scholarship will be awarded on the basis of the applicant's demonstrated commitment to horticulture, career aspirations,

interpersonal and communication skills, initiative, level of self motivation and academic performance in the first three semesters of enrolment. The Faculty of Agriculture, Food and Natural Resources will prepare a short-list of applicants, based normally on a minimum WAM of 65 (credit level), for joint interview by Oasis Horticulture representatives and one or more nominated members of the Faculty of Agriculture. (Applicants who do not have a minimum WAM of 65, but who provided evidence that they meet all other criteria, will be eligible for short-listing).

3. The scholarship comprises four payments of \$1,500 payable at the beginning and middle of the scholarship holder's third and fourth years of study (March and September).
4. The scholarship holder will forward semester results to Oasis Horticulture as soon as they become available.
5. The scholarship holder will consult with the Faculty and Oasis Horticulture prior to selection of any substantial elective component of the coursework.
6. The scholarship holder must undertake paid vacation employment with Oasis Horticulture between the second and third (4–8 weeks) and the third and fourth (4–8 weeks) academic years or 8–16 weeks at some vacation time mutually agreeable to Oasis Horticulture and the student.
7. During vacation employment the scholarship holder will be employed as a full-time staff member of Oasis Horticulture, at a location selected by the company following consultation with the scholarship holder.
8. The Faculty and Oasis Horticulture expect the scholarship holder to undertake limited extracurricular activities and training, particularly public speaking and presentation skills, and develop a network of contacts in the horticultural industry and in particular in the nursery and related sectors.
9. The Faculty reserves the right to revoke the scholarship at any time, following consultation with Oasis Horticulture, if the scholarship holder does not maintain a credit average and/or performance is unsatisfactory during vacation employment or if there is a substantive change in enrolment which affects the basis of eligibility.
10. The scholarship holder will not accept any other scholarship without prior permission from the Faculty and Oasis Horticulture.

Application forms are available at the Faculty Office.

More undergraduate scholarships

Belmore Scholarships

In 1871 the Earl of Belmore made a gift for the purpose of providing a gold medal for proficiency in geology and practical chemistry with special reference to agriculture. His Lordship stated that should additional branches connected with agriculture be thereafter taught in the University, the examination for the medal might be made to embrace them. Upon the establishment of a Chair of Agriculture in 1910, it was decided to award the income of the fund as a scholarship. Four scholarships of \$500 each are awarded annually on the recommendation of the Dean of the Faculty to students in the Faculty. Two are tenable by students enrolling in the second year of the BAnimSc, BHortSc, BLWSc, BResEc or BScAgr degree, the first being awarded to the student showing greatest proficiency in the first-year examinations and the second awarded for greatest proficiency in the first-year Chemistry units of study. A further two are tenable by students enrolling in the third year of the BAnimSc, BHortSc, BLWSc or BScAgr degree, the first being awarded to the student showing greatest proficiency at the second year examinations and the second awarded for greatest proficiency in Soil Science 2 and Agricultural Chemistry 2. A student enrolling in the third year of the BResEc degree is also eligible for the second-year general proficiency scholarship. In each case the student's work must be of sufficient merit. Two scholarships may not be awarded to the same person in any one year.

Brian G Davey Memorial Scholarships in Soil Science

Established in 1989 at the request of Mrs Leith Davey in memory of her husband Dr Brian G. Davey, Senior Lecturer in Soil Science until his death in 1989.

Two scholarships may be awarded annually on the recommendation of the Sciences Discipline Leader. One may be awarded to the most

7. Other Faculty information

proficient student who achieves the highest aggregate mark in the units of study Soil Science 2 and Soil Science 3 in the Faculty of Agriculture, Food and Natural Resources and who enrolls in the fourth year subject Soil Science 4 for a Bachelor of Science in Agriculture or a Bachelor of Land and Water Science degree, provided the student's work is of sufficient merit. The other scholarship may be awarded to the most proficient student who achieves the highest aggregate mark in the units of study Soil Science 2 and Soil Science 3 in the Faculty of Science who enrolls in Soil Science Honours for a Bachelor of Science degree, provided the student's work is of sufficient merit. The scholarships may be shared. If sufficient funds are available more than two scholarships may be awarded in any one year. Value \$400 per annum each.

Golden Jubilee Scholarship in Agricultural Science

In 1960, which was the golden jubilee year of the foundation of the School of Agriculture in this University and of the Australian Institute of Agricultural Science, a committee was formed to raise a fund to endow an annual scholarship in agricultural science.

Established in 1961 by the gift of £1574 18 s 0 d from the Jubilee Scholarship Fund Appeal. Awarded annually for the study of agricultural science in the fourth year, to a student at the end of third year, on the basis of academic achievement, application to the course of study and aptitude for agricultural science. Value \$500.

Martin McIlrath Scholarships for Undergraduates in Veterinary Science and Agriculture

The scholarships tenable in the first year are awarded on the results of the HSC examination and those in higher years on the results of the annual examinations of the preceding years. In the award of the scholarships preference is given to ex-servicemen and male descendants of ex-servicemen. Women are eligible to apply if they are current or ex-members of the armed forces. Each scholarship is tenable for one year. The scholarships are awarded by the Trustees on the recommendation of the Faculty concerned and after consideration of the question of preferred eligibility. Please note that these scholarships will only be awarded in any one year when there are eligible applicants in both the Faculties of Agriculture, Food and Natural Resources and Veterinary Science.

Value: Approximately \$2000, tenable for 1 year.

This application form is available from www.usyd.edu.au/study/scholarships (<http://www.usyd.edu.au/study/scholarships>)

John Mercer Bursary (Agriculture)

This bursary has been created by donation of the family, friends, colleagues and students of the late John R Mercer, Senior Lecturer in Animal Nutrition at the University. The bursary is available to one or more students enrolled in animal science subjects in Third or Fourth years of the Bachelor of Science in Agriculture degree or the Bachelor of Animal Science degree who have demonstrated sufficient academic merit and are in financial need. Preference may be given to students with a demonstrable interest in Animal Nutrition. The award will be made on the recommendation of the Dean of the Faculty of Agriculture, Food and Natural Resources. A total of \$1,000 is available annually.

See the Web site (<http://www.usyd.edu/fin-assist/>).

Undergraduate prizes

ABARE Prize

Established in 1995 by ABARE for a prize in support of academic excellence in the field of agricultural economics. Two prizes are awarded annually on the recommendation of the Agricultural and Resource Economics Discipline Leader. One prize is awarded to the student who attains the highest honours aggregate on graduation in the degree of Bachelor of Agricultural Economics and from 2004 another prize to the student who attains the highest honours aggregate on graduation in the degree of Bachelor of Resource Economics. Value \$300.

John Arthur Cran Prize

Established in 1959 by the offer of an annual donation by Mrs Esther Cran in memory of her husband John Arthur Cran. In 1983 the University received a bequest of \$1000 from Mrs Cran with the intent that the prize be awarded in perpetuity.

The prize may be awarded annually on the recommendation of the Dean of the Faculty of Agriculture, Food and Natural Resources to the most proficient candidate at the Higher School Certificate or equivalent examination who enrolls full-time in the first year of candidature for one of the following degrees Bachelor of Science in Agriculture, Bachelor of Animal Science, Bachelor of Agricultural Economics, Bachelor of Horticultural Science, Bachelor of Land and Water Science or Bachelor of Resource Economics provided that the student's work is of sufficient merit. Value \$100.

Cotton Research and Development Corporation Prize

Established in 2001 by an annual donation of \$500 from the Cotton Research and Development Corporation.

Awarded annually, on the recommendation of the Sciences Discipline Leader, after consulting academic staff most concerned, to the most proficient student in fourth year Agronomy in the BScAgr degree, provided that the candidate's work is of sufficient merit. The Sibella Macarthur Onslow Memorial Prize may not be awarded to the winner of the CRDC prize. Value \$500.

Bruce Davidson Prize in Resource Economics

Established in 1995 by donations from the family of Bruce Robinson Davidson and former students and colleagues in recognition of his pioneering research in water resource economics in Australia, and as a tribute to his outstanding contributions as a teacher and researcher in agriculture and agricultural economics.

Awarded annually, on the recommendation of the Agricultural and Resource Economics Discipline Leader, to an undergraduate student enrolled in the Faculty of Agriculture, Food and Natural Resources who submits the best essay or thesis in the area of natural resource economics. Value \$300.

Bruce R. Davidson Memorial Prize in Resource Economics

Established in 2002 by a donation from Dr David Godden in recognition of Dr Davidson, a former member of this Faculty, for his extensive research in resource economics in Australia.

Awarded annually, on the recommendation of the Agricultural and Resource Economics Discipline Leader, to the Bachelor of Resource Economics student showing the greatest proficiency at the first year examinations. Value \$200.

Dairy Research Foundation Prize in Animal Science

Established in 1977 by an offer from the Dairy Science Research Foundation of an annual donation for a prize in animal science with particular reference to dairying.

Awarded annually in the Faculty of Agriculture, Food and Natural Resources on the recommendation of the Sub Dean (Agriculture Teaching) in the Faculty of Veterinary Science to the student enrolled in the fourth year subject Animal Production who achieves the highest proficiency with particular reference to dairying, provided the student's work is of sufficient merit. Value \$400.

Clifford Dawson Holliday Prize

Founded in 1954 by a bequest of £1000 from Andrew Holliday for a prize to be known as the Clifford Dawson Holliday Prize in Agriculture. Awarded annually to the most proficient candidate at the third year annual examinations in the Faculty of Agriculture, Food and Natural Resources. Value \$200.

John Neil Downing Memorial Prize

Established by RG Downing BSc(Agr), by gifts of £25 in 1948 and £500 in 1949, for a prize in memory of his son, Lieutenant John Neil Downing, who was killed in action.

The prize, which may be shared, is awarded annually on the recommendation of the Dean of the Faculty of Agriculture, Food and Natural Resources to the student in the Faculty of Agriculture, Food and Natural Resources who shows greatest proficiency in the professional experience requirement, provided the student's work is of sufficient merit. Value \$350.

John and Beatrice Froggatt Prize

Established in 1986 by a bequest of \$10,000 from the estate of Mrs Beatrice E Froggatt of Killara who died in 1985.

Awarded annually on the recommendation of the Sciences Discipline Leader to the student with the highest aggregate in the units of study Agricultural Entomology 1 and Fourth year Agricultural Entomology, provided that the student's work is of sufficient merit. The prize may be shared. Value \$1000.

WW Froggatt Memorial Prize

Established in 1979 by a bequest of \$1000 from the estate of Joyce Chiosso Froggatt in memory of her father.

Awarded annually on the recommendation of the Sciences Discipline Leader to the student in fourth year Agricultural Entomology who shows the greatest proficiency in a research project in entomology, if the student's work is of sufficient merit. Value \$200.

DL Jackson Memorial Prize

Established in 1975 by public subscription in memory of D L Jackson, Senior Lecturer in the Department of Agronomy and Horticultural Science.

To be awarded annually on the recommendation of the Sciences Discipline Leader after consulting the professor most concerned to the most proficient student in the unit of study Agricultural Science 1, Horticultural Science 1 or Land and Water Science 1 provided that the candidate's work is of sufficient merit. Value \$400.

FC McCleery Memorial Award

Established in 1979 by a series of donations over a number of years by the Reverend AB Catley, a graduate of the Faculty of Agriculture, for an award in that Faculty. The award honours the memory of FC McCleery, BScAgr (1925), the former Chief Biometrician in the NSW Department of Agriculture. FC McCleery was judged by his peers, both when a student at this University and in his later professional career, to be a man of great integrity who contributed greatly in both fields by his leadership and fellowship. Throughout his professional career he remained interested in a wide range of subjects from classical Greek literature to modern theology.

The award shall be made annually after a ballot, conducted by the Dean, of third year students in the Faculty of Agriculture, Food and Natural Resources to the person amongst their number who they judge at that ballot to have contributed most to the life of the Faculty by way of leadership and fellowship. Only those students who have completed the first two years of their degree course in minimum time shall be eligible for nomination. Value \$200.

Theresa G Makinson Prize

Established in 1972 by the donation of \$500 from Miss KJ Laurence, to establish a prize in memory of her aunt, Theresa Genevieve Makinson, 1885–1939.

Awarded annually, on the recommendation of the Sciences Discipline Leader after consulting the professor most concerned, to the most proficient student in fourth year Horticultural Science, provided that the candidate's work is of sufficient merit. Value \$100.

Warren F Musgrave Prize in Resource Economics

Established in 2002 by a donation from Dr David Godden in recognition of Professor Musgrave, a former student of this Faculty, for his extensive research in resource economics in Australia.

Awarded annually, on the recommendation of the Agricultural and Resource Economics Discipline Leader, to the Bachelor of Resource Economics student showing the greatest proficiency at the second year examinations. Value \$200.

Sibella Macarthur Onslow Memorial Prize

Established in 1944 by a gift of £360 from members of the Victorian League of New South Wales and other friends of Miss Sibella Macarthur Onslow.

Awarded annually on the recommendation of the Sciences Discipline Leader, after consulting academic staff most concerned, for greatest proficiency in the Fourth year subject Agronomy, provided the student's work is of sufficient merit. Value \$200.

FL Partridge Prize

Founded in 1928 by a gift of shares from an anonymous donor to establish the 'FL Partridge Endowment' in memory of FL Partridge. The endowment is used to provide a prize in the Faculty of Agriculture, Food and Natural Resources in accordance with the following conditions:

1. The FL Partridge Prize shall be awarded to undergraduates in the Faculty of Agriculture, Food and Natural Resources who have passed the second year examination in that Faculty.
2. The prize shall be of the annual value of \$400 and shall be tenable in the third and fourth years of the agricultural curriculum, provided the holder is diligent and of good conduct and passes creditably all the examinations of the course.
3. The prize will only be awarded to students in such necessitous circumstances that they would have difficulty in completing the agricultural curriculum without some financial assistance.
4. Where there are two or more candidates who fulfil the last condition the prize will be awarded to the student who at the end of the second or third year has the best academic record.
5. Any unexpended income shall be used to create a fund for the carrying out of such research work within the Faculty as the Faculty may determine.
6. Applications for the FL Partridge Prize must reach the Registrar before the end of March in each year.

Poultry Research Foundation Prize in Animal Science

Established in 1977 by an offer from the Poultry Science Research Foundation of an annual donation for a prize in Animal Science with particular reference to Poultry.

Awarded annually in the Faculty of Agriculture, Food and Natural Resources on the recommendation of the Sub Dean (Agriculture Teaching) in the Faculty of Veterinary Science, in consultation with the Director of the Poultry Research Foundation, to the student enrolled in the fourth year subject Animal Production who achieves the highest level of proficiency with particular reference to poultry, among those who have demonstrated a significant commitment to the poultry industry through active involvement in industry visits throughout the year, and the completion of their final year research project in an area relating to poultry science. Value \$700.

Alan Randall Prize in Resource Economics

Established in 2002 by a donation from Dr David Godden in recognition of Professor Randall, a former student of this Faculty, for his research in international resource economics.

7. Other Faculty information

Awarded annually, on the recommendation of the Agricultural and Resource Economics Discipline Leader, to the Bachelor of Resource Economics student showing the greatest proficiency at the third year examinations. Value \$200.

Ridley AgriProducts Prize in Animal Nutrition

Established in 2000 by the offer of an annual donation by Ridley AgriProducts to promote closer links with students in the BScAgr degree (and BAnimSc). Awarded annually on the recommendation of the recommendation of the Sub Dean (Agriculture Teaching) in the Faculty of Veterinary Science to the student who is a permanent resident or citizen of Australia and who demonstrates the greatest proficiency in the unit Animal Nutrition 3, provided the work is of sufficient merit. Value \$250

Joyce Winifred Rouse Prize

The prize was established in 1987 by a donation from Randolph G. Rouse on behalf of his wife.

Awarded annually on the recommendation of the Sciences Discipline Leader to the most proficient student in fourth year Agricultural Chemistry in the BScAgr degree or the BSc degree provided that the candidate's work is of sufficient merit. Value \$40.

Sydney University Agricultural Graduates' Association Prize

Established in 1994 by an offer of an annual donation from the Sydney University Agricultural Graduates' Association to recognise undergraduates who contribute time and effort to the leadership and fellowship of agricultural students.

The prize shall be awarded annually to the student elected as President of the Sydney University Agricultural Society. The prize shall be a commemorative object selected by SUAGA.

Sydney Chinese Association Prize

Established in 1969 by a gift of \$200 by the Sydney Chinese Association.

Awarded annually on the recommendation of the Professor of Microbiology to the third year student in the Faculty of Science or Agriculture, Food and Natural Resources who shows the greatest proficiency in the unit of study (MICR 3001 or 3901) and (MICR 3002 or 3902) Microbiology 3 or MICR 3102 Agricultural Microbiology 3. Value \$100.

GW Walker Memorial Essay Prize

Founded in 1944 and 1945 by amounts of £50 each received from the New South Wales Council of Agriculture Associations, Lindley Walker Wheat Coy Ltd, and the Flour Mill-Owners' Association of New South Wales, as a memorial to George W Walker.

Awarded annually on the recommendation of the Agricultural and Resource Economics Discipline Leader to the student who presents the best essay in the unit of study Applied Marketing, provided the essay is of sufficient merit. Value \$100.

Professor WL Waterhouse Prize

In 1953 a sum of £150 was handed to the Senate by the Sydney University Agricultural Graduates' Association as part of subscriptions received in making a presentation to Professor WL Waterhouse on his retirement. The money was used to establish a prize to perpetuate the name and work of Professor Waterhouse.

Awarded annually to the most proficient student in the units of study Agricultural Genetics 2 and Plant Disease 3, provided that the candidate's work is of sufficient merit. Value \$80.

Sir Robert Watt Memorial Prize

Established in 1966 by the gift of \$500 from Lady Madge Watt and her daughter in memory of Emeritus Professor Sir Robert Watt, the first Professor of Agriculture at this University.

Awarded annually on the recommendation of the Sciences Discipline Leader, after consulting the professor most concerned, to the most proficient student in the second year unit Crop Science 2, provided the candidate's work is of sufficient merit. Value \$80.

Weed Society of New South Wales Prize

Founded in 1971 by the offer of an annual gift from the Weed Society of New South Wales.

Awarded annually on the recommendation of the Sciences Discipline Leader after consulting the professor most concerned to the most proficient undergraduate student in the area of Weed Science currently assessed in the unit of study Crop Protection, provided that the candidate's work is of sufficient merit. Value \$100.

NH White Memorial Prize

Established in 1995 by donations from the former students and colleagues of Neville Hewlett White as a tribute to his outstanding contributions as a teacher and researcher in Plant Pathology. Awarded annually on the recommendation of the Sciences Discipline Leader to the most proficient student specialising in the discipline of Plant Pathology within the fourth year of the BScAgr program. Value \$100.

AR Woodhill Prize in Entomology

Established in 1966 by the gift of \$1000 from Mrs Woodhill and the colleagues and students of Dr A.R. Woodhill.

Awarded annually on the recommendation of the Sciences Discipline Leader to the most proficient student in the unit of study Agricultural Entomology 1 offered in the degrees of Bachelor of Animal Science, Bachelor of Science in Agriculture or Bachelor of Horticultural Science provided that the candidate's work is of sufficient merit. The prize may be shared. Value \$300.

Arthur Yates and Co. Pty Ltd Prize

Established in 1977. Two prizes of \$100 each are awarded annually, the first on the recommendation of the Sciences Discipline Leader after consulting academic staff most concerned to the most proficient student in Horticultural Science in Fourth Year, provided that the candidate's work is of sufficient merit, and the second on the recommendation of the Director of the Plant Breeding Institute after consulting academic staff most concerned to the most proficient student in Agricultural Genetics in Fourth Year, provided that the candidate's work is of sufficient merit.

Undergraduate scholarships in Agriculture, Food and Natural Resources

Established in 1991, by funding from companies, organisations and individuals, referred to hereafter as 'cooperating companies', to encourage and assist candidates for the degrees of Bachelor of Agricultural Economics, Bachelor of Animal Science, Bachelor of Horticultural Science, Bachelor of Land and Water Science, Bachelor of Resource Economics or Bachelor of Science in Agriculture.

The scholarship shall be awarded under the following conditions:
1. Each scholarship shall be named an Undergraduate Scholarship in Agriculture, Food and Natural Resources, except where a 'cooperating company' requests that its name be used as an identifier within the scheme.
2. The scholarships shall be open to citizens and permanent residents of Australia who qualify in the final year of secondary schooling to

enter the Faculty of Agriculture, Food and Natural Resources at The University of Sydney.

Tenure

3. (a) Each scholarship shall be tenable for the specific agricultural degree for which it is offered, where applicable, and shall not be transferable to the other degree except in exceptional circumstances.

(b) The scholarships shall be tenable for the duration of each recipient's degree program, provided that the scholar meets all the obligations of the program and maintains satisfactory academic progress.

Advisory committee

4. (a) There shall be an Advisory Committee consisting of the following persons:

(i) no fewer than five representatives of separate cooperating companies;

(ii) no fewer than two heads of disciplines in the Faculty including the Agricultural and Resource Economics Discipline Leader (or nominees);

(iii) no more than three members of the Institute of Advanced Studies within the Faculty;

(iv) the Dean of the Faculty; and

(v) the Executive Director of the Undergraduate Scholarships in Agriculture, Food and Natural Resources Program.

(b) The Advisory Committee shall elect its own chairperson.

(c) The Advisory Committee shall advise the Faculty on the conduct and management of the program, including scholar selection, the nature and organisation of the industrial experience component, and such other matters as it consider pertinent to the effective operation of the program.

(d) The Executive Director of the program shall be a member of the Faculty, nominated by the Dean, appointed by the Advisory Committee.

(e) The Executive Officer of the program shall be a member of the University's administrative staff, nominated by the Dean, and shall attend meetings of the Advisory Committee.

Annual meeting of cooperating companies

5. There shall be an annual general meeting of cooperating companies during the first semester of each academic year, when:

(a) the Advisory Committee shall report on the operation of the program over the previous year;

(b) the membership of the Advisory Committee for the coming year shall be determined; and

(c) any matters relating to the program may be raised and decisions thereon made for implementation by the Advisory Committee.

Awarding of the scholarships

6. (a) The scholarships shall be awarded on the basis of academic merit (as indicated by the applicants' performance at the NSW Higher School Certificate Examination, or equivalent), leadership potential and personal qualities.

(b) The scholarships shall be awarded on the recommendation of selection panels consisting of at least one representative from cooperating companies and at least one member of the Faculty appointed by the Dean.

7. There shall be no bonding or other commitment to employment between a cooperating company and any scholar.

8. A scholarship is intended for a continuous four-year degree program, but the Advisory Committee may consider a request for an interruption in a scholar's progress towards the Bachelor degrees for some exceptional purpose, and, if such request is approved, the scholarship shall be suspended during such interruption.

Cost

9. (a) Cooperating companies shall make a donation to The University of Sydney Undergraduate Scholarship in Agriculture Program, for each year and for each scholarship place supported, comprising the annual scholarship stipend together with an administration levy of \$600 + GST.

(b) Transfers of funds from cooperating companies to the University shall be made by 31 January in the year to which the scholarship place applies.

(c) The administrative levy will be reviewed each year.

Benefits to cooperating companies

10. Each current cooperating company shall be entitled to:

(a) access to the whole pool of Undergraduate Scholars in Agriculture, Food and Natural Resources for professional work experience in the cohort or cohorts contemporaneous with the year or years of its support; and

(b) inclusion of the company's name on a roll of cooperating companies to be set up in the Faculty Office.

Value and payments

11.(a) The value of the scholarship stipend in 2004 was \$6900 per annum.

(b) The value of the scholarship stipend shall be adjusted annually by the Advisory Committee after considering movements in the consumer price index.

(c) A scholarship shall run from 1 March to the following 30 November.

The scholarship payments shall be made at regular intervals.

The contribution to the stipend for the cooperating companies in 2004 was \$6500, with the Faculty contributing the stipend shortfall.

NSW Farmers' Association Tertiary Scholarships

You may apply direct to the Association for one of five competitive scholarships available across the State.

A candidate is expected to:

- Have been a full member of the New South Wales Farmers' Association during 2003 and 2004, or have a parent/partner who holds such membership
- Provide information on tertiary academic standards
- Enrol full-time in the 2nd, 3rd or 4th year of a bachelor degree in 2005
- Demonstrated commitment to agricultural/rural communities.

Application forms from the Association at Membership Services on (02) 9251 1700, fax (02) 9221 6913.

Value: in 2004 was \$5,000.

Closing Date: 31 January

Libraries

University of Sydney Library

Web: www.library.usyd.edu.au (<http://www.library.usyd.edu.au>)

The University of Sydney Library is the largest academic library in the Southern Hemisphere. It is made up of network of 21 Libraries. The specialist libraries for research in Agriculture are:

Badham Library: www.library.usyd.edu.au/libraries/badham/ (<http://www.library.usyd.edu.au/libraries/badham/>)

Camden Library: www.library.usyd.edu.au/libraries/camden/ (<http://www.library.usyd.edu.au/libraries/camden/>)

Orange Library: www.library.usyd.edu.au/libraries/orange/ (<http://www.library.usyd.edu.au/libraries/orange/>)

Your student card will allow you to borrow from any of the Libraries in the system. Location maps for these Libraries, opening hours and contacts are listed at the URLs above.

Many of the other Libraries will have information of interest to you too. Please check the ILibrary Website (<http://www.library.usyd.edu.au/libraries/>) for a complete list of Libraries.

The Library provides access to services including the Library catalogue (<http://opac.library.usyd.edu.au>) and a range of databases (<http://www.library.usyd.edu.au/databases/>), used to find references to journal articles.

It is possible to access many of these databases from outside campus, please check the website (<http://www.library.usyd.edu.au/databases/wam.html>) for more information, or contact your Faculty Liaison Librarian.

For more information and pointers to great information sources check out the:

Agriculture and Rural Management Subject Guide

Web: www.library.usyd.edu.au/subjects/agriculture/ (<http://www.library.usyd.edu.au/subjects/agriculture/>)

Veterinary Education and Information Network (VEIN)

Web: vein.library.usyd.edu.au (<http://vein.library.usyd.edu.au>) for animal science information.

Your Faculty Liaison Librarian

Information specialists are available to assist you with your information needs.

Mathematics Learning Centre

Head Jacqueline M Nicholas

The Mathematics Learning Centre offers help to undergraduate students who enter the University with insufficient preparation in mathematics to enable them to cope with the mathematical requirements of their chosen course.

In the Faculty of Agriculture, Food and Natural Resources, units in Agricultural Economics, Biometry, Economics and Econometrics all assume a certain level of knowledge of mathematics. Generally, students entering the Faculty are assumed to have taken HSC 2-unit mathematics or its equivalent. If you know that you lack this assumed knowledge, or if you are doubtful whether you are well enough prepared, you should contact the Mathematics Learning Centre.

Staff at the Centre can help you decide which topics you need to do extra work on. Resources are provided for individual study, with guidance from the Centre's staff, and small tutorials can be arranged for students who are having difficulties. Introductory and bridging courses are organised during the summer.

The Centre is on the fourth floor of the Carslaw Building, Room 455. Any student seeking assistance should call at the Centre, or phone (02) 9351 4061. See Web site (<http://www.usyd.edu.au/su/mlc>)

Faculty societies

The Sydney University Agricultural Society

AgSoc is an association for the undergraduates of the Faculty of Agriculture, Food and Natural Resources, as well as students from rural backgrounds and anyone with an interest in Agriculture. It is run by a student-elected committee from within the faculty, which organises social and sporting events. Details of how to join will be explained during Orientation Week.

Why should you join?

There is a small annual membership fee to become part of AgSoc, which entitles you to vote, hold office, participate in Faculty sports and obtain great discounts to all social functions as well as on the large range of 'Agger' merchandise.

Functions include formal events such as the annual dinner-dance, as well as numerous harbour cruises, barbecues and other informal occasions.

Membership of many faculty societies is compulsory. This is not the case in Agriculture, yet large numbers of students join for every year of their degree, an indication of the close social interaction and love of a good time that makes Agriculture the envy of the larger faculties.

The AgSoc 2005 Committee encourages all members of the Faculty to become involved.

Sydney University Agricultural Graduates' Association

The Sydney University Agricultural Graduates' Association (SUAGA) is a graduate society. All graduates of the Faculty of Agriculture, and all current and former members of the academic staff of the Faculty, are eligible for membership. Some of the more important aims of the Association are to maintain and foster the relationship between agriculture graduates and the University, to promote social and cultural relationships among the graduates and to take an interest in any matters that may be of benefit to the Faculty of Agriculture.

Institutes and Advisory Councils

Advisory Council of the Plant Breeding Institute within the Faculty of Agriculture, Food and Natural Resources

1. (1) There shall be an institute to be known as the Plant Breeding Institute within the Faculty of Agriculture, Food and Natural Resources.

(2) The Institute shall undertake, promote and develop the science of plant breeding and allied areas.

2. (1) The Institute shall have an advisory Council comprising:
(a) the Vice-Chancellor and Principal, the Dean of the Faculty of Agriculture, Food and Natural Resources and the Director of the Plant Breeding Institute or their nominees;

(b) not more than three trustees of the New South Wales Wheat Research Foundation appointed by the Dean on the recommendation of the Foundation and three additional members of the broader industry sectors serviced by the Institute appointed by the Dean on the recommendation of the Director;
(c) not more than three members of the full-time staff of the University appointed by the Dean on the recommendation of the Faculty of Agriculture, Food and Natural Resources, two of whom shall be staff of the Plant Breeding Institute.

(2) Each member shall hold office for a period of three years and shall be eligible for reappointment.

(3) The Council shall provide advice to the Plant Breeding Institute on:

- industry trends
- areas for research expansion /development
- services required for industry (including educational services for the users of the PBI's products)
- strengths and weaknesses in the Plant Breeding Institute's programs

(4) The Council shall have such other functions as may be assigned by the Dean.

3. (1) The Council shall elect annually from amongst its members an honorary Chairperson.

(2) All questions which come before the Council shall be decided at any meeting duly convened, at which a quorum is present, by a majority of the votes of the members present.

(3) Chairperson at any such meeting shall have one vote.

(4) At any such meeting seven members shall form a quorum.

4. (1) There shall be a Director of the Plant Breeding Institute appointed under normal University procedures for appointing a Head of Department/School.

(2) The Director shall have functions and duties set out in the relevant position statement, and any other functions or duties delegated from time to time.

5. The Director shall report to the Dean. In addition, the Director shall present to the Council an Annual Report that includes an overview of the financial situation.

The Institute of Advanced Studies within the Faculty of Agriculture, Food and Natural Resources

[Under review]

1. The name of the Institute shall be the Institute of Advanced Studies within the Faculty.

2. (i) The Institute shall advise the Senate regarding the funds of the Joane Josephine Harris Bequest, the Thomas Lawrance Pawlett Bequest, the Mrs Christian Rowe Thornett Bequest, the Alexander Hugh Thurburn Fund, the Turland Endowment and the portion of the funds of the FH Loxton Bequest which has been allocated to the Faculty.

(ii) The Institute shall promote the attraction of additional income.

3. (i) The Institute shall further the development of postgraduate studies and research in the Faculty.

(ii) The Institute shall be responsible for the administration of the scholarship program in the Faculty.

4. The names of the donors shall be perpetuated by their association with the various projects that the Institute initiates.

5. (i) One director of the Institute from each department shall be appointed by the Faculty from the full-time permanent members of the Faculty.

(ii) The Dean and the Associate Dean (Postgraduate Studies) of the Faculty shall be ex officio directors.

(iii) Directors shall be appointed biennially at the November meeting of the Faculty in the year in which a term ends. For 1994 and every fourth year thereafter, there shall be one director appointed from each of the Departments of Animal Science, Microbiology and the Plant Breeding Institute. For 1996 and every fourth year thereafter there shall be one director appointed from each of the Departments of Agricultural Chemistry and Soil Science, Agricultural Economics and Crop Sciences.

(iv) Directors shall be eligible for re-appointment.

(v) A casual vacancy in the office of Director shall be filled by the Faculty from the department concerned and the director so appointed shall hold office for the remainder of the term of the person being replaced.

(vi) The office of a director who is unable to attend meetings for six months or more shall be declared vacant; a replacement appointment for director from the department concerned shall be required for the remainder of the term.

6. (i) The directors shall elect from amongst their number a Chair of the Institute.

(ii) The election of the Chair shall be held at the first meeting of the Institute after 1 January following the biennial appointment of directors and the Chair so elected shall hold office from the time of the election until a successor is elected.

(iii) The Chair shall be eligible for re-election.

(iv) A casual vacancy in the Chair shall be filled by a like method of election of a duly convened meeting of the Institute to be held as soon as conveniently may be and the Chair so elected shall hold office for the remainder of the term of the person replaced.

7. The directors shall submit recommendations for postgraduate activities to the Faculty for consideration and recommendation to Senate for approval.

EJ Holtsbaum University of Sydney Agricultural Research Institute

The E J Holtsbaum University of Sydney Agricultural Research Institute (HARI) has been established in conjunction with the gift by Mr EJ Holtsbaum to the University of his property 'Nowley'. Mr Holtsbaum, whose family owned Nowley since 1964, made the gift with the view that the farm would continue to prosper under the University's stewardship, and serve as a centre on the Liverpool Plains for the creation and dissemination of innovative technology for agricultural production and natural resource management.

Nowley is located in the Spring Ridge district on the central/north west slopes of NSW, in a versatile and reliable dryland cropping region. The property of 2083 ha supports a successful mixed farming enterprise centred on crops of wheat, barley and canola in winter, sorghum and sunflower in summer, and a Shorthorn cattle herd of breeders, replacement heifers and bulls. Nowley has mostly fertile basaltic soils, an average annual rainfall of about 600 mm with a relatively even summer and winter distribution. The extreme variation in soil types and parent materials, and the proximity of a large, natural water body (Lake Goran), means that the property offers unique opportunities to study the impacts of parent material and topography on soil type, and consequently on agricultural opportunities. Stands of remnant native forest on sections of the property provide invaluable undisturbed reference sites for comparative studies of agricultural and native ecosystems, and the influence of human impacts. Nowley will considerably enhance the Faculty's academic programs by giving students a strong sense of the interaction of landscape and agriculture. While continuing to operate as a fully commercial enterprise, Nowley will provide an excellent field site for undergraduate and postgraduate students to learn and research about crop and livestock management in mixed farming systems, plant improvement, and natural resource management.

Objectives of the Holtsbaum Agricultural Research Institute

The objectives of HARI are aligned with a Statement of Intention made by Mr Holtsbaum in conjunction with his gift.

"Nowley is to be used for the purposes of the Faculty of Agriculture, Food and Natural Resources (hereafter referred to as "the Faculty") including in particular but not limited to:

- *research for the benefit of primary producers, researchers, students and other parties interested in agriculture*
- *provision of funds for scholarships to the Faculty.*

A wide range of enterprises should be trialled and evaluated as the need or otherwise arises in conjunction with the 'bread and butter' activities of the day. The results of these activities to be carried out at "Nowley" to be available to farmers, faculty students, research workers and other parties with an interest in agriculture. The future mix of enterprises on the property will be determined to produce a viable income. After retention of profits or part thereof to provide working capital, any surplus is to be directed into a scholarship fund for the Faculty or for the benefit of teaching and research in agriculture as determined by the Dean in consultation with the Management Advisory Board. The property's well-being is of paramount importance and number one priority".

Management of the Holtsbaum Agricultural Research Institute

The purchase of plant and equipment, working capital and additional land by the University was financed by the creation of an internal Property Trust known as the 'Nowley Property Pool'. In recognition of the gift by Mr Holtsbaum, and additional funds invested in the Nowley Property Pool by the Faculty, the latter will be allocated approximately 74% of the units in the Pool, with Livingston Farm to purchase the remaining 26% of the units in the Pool.

Net operating surpluses will be distributed proportionately to unit holders in the Nowley Property Pool. The Properties & Investments Office will be responsible to the Management Advisory Committee for the day to day operation of the property, which will be managed as part of the rural property portfolio. Research and innovative trials by the Faculty will be oversighted by the Management Advisory Board.

In the event a situation arises where the Advisory Board recommends that the property be disposed of, it will be done so in a manner that will realise the Faculty the highest sum of money attainable on the day. The proceeds may be invested in a similar venture or one suitable to the Faculty and Management of the day. Whatever the new venture, the name "EJ Holtsbaum" is to be preserved.

Holtsbaum Agricultural Research Institute Management Advisory Board: Terms of Reference

To oversight the management of the Holtsbaum Agricultural Research Institute in order to ensure that it:

- it operates as a financially viable enterprise
- facilitates research for the benefit of primary producers, researchers, students and other parties interested in Agriculture
- provides funds for the provision of scholarships and other activities for the benefit of teaching and research in the Faculty.

The Management Advisory Board will:

- receive financial statements relating to the property
- receive reports from the Dean of the Faculty relating to the use of the property for teaching, research and outreach activities.
- receive reports from the Properties & Investments Office relating to operational and financial aspects of the enterprise.
- advise the Dean of the Faculty on the distribution of the E J Holtsbaum Trust's share of the profits from the Nowley Property Pool for scholarships and other activities for the benefit of teaching and research programmes.

The Management Advisory Board will meet at least twice per year.

The HARI Management Advisory Board will consist of

1. The Dean of the Faculty
2. A representative of the Faculty
3. The working Manager
4. Two practising agriculturists within reasonable proximity of "Nowley"
5. The Director, University Properties and Investments.

According to Mr Holtsbaum's Statement of Intention of, "practising agriculturists" are to provide local knowledge. Their term of appoint-

7. Other Faculty information

ment should be at least 3 years, and they should be "quiet achievers" in their own right, demonstrating an ability to run a sound and profitable enterprise or having exceptional expertise in a field or fields relevant to the prevailing pursuit/s on Nowley. The initial appointments have been made by Mr Holtsbaum, and will be made subsequently by the Advisory Board. They shall not be nominated by farmer bodies, Boards or vested interests or politicians. The positions are honorary, apart from reimbursement for out-of-pocket expenses.

Scholarships

Should the Management Advisory Board determine there is sufficient money available for scholarship allocation the following suggestions are made, in addition to conditions that normally apply in the University for the award of scholarships. The recipient shall be of high academic merit and show the intention to establish a career in agriculture (in whatever form). The Scholarship would be known as "The EJ Holtsbaum University of Sydney Faculty of Agriculture, Food and Natural Resources Scholarship".

The intention of the scholarships is to help students fund their studies, and to encourage in recipients a sense of giving something back to the land through their degree, should they have the opportunity to do so.

Allocation of money for scholarships will be determined by the Faculty, in consultation with the Management Advisory Board.

8. Regulations

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Resolutions of the Senate

Constitution of The Faculty of Agriculture, Food and Natural Resources

1. The Faculty of Agriculture, Food and Natural Resources shall comprise the following persons:

(a) the Professors, Readers, Associate Professors, Senior Lecturers, Lecturers and Associate Lecturers, being full-time and fractional permanent or full-time and fractional temporary members of the teaching staff in the Faculty;

(b) the Deans of the Faculties of Veterinary Science, Science, Economics and Business, Rural Management, Arts, and Law;

(c) nominees of the respective Deans of Veterinary Science, Science, and Economics and Business should be members of the academic staff in relevant areas of undergraduate and postgraduate teaching; the numbers of members so nominated to be seven (7) for Veterinary Science, six (6) for Science, and six (6) for Economics and Business;

(d) the Director of the IA Watson Grains Research Centre;

(e) the Director of the Australian Centre for Agricultural Health and Safety;

(f) not more than three persons distinguished in the field of agriculture appointed by the Senate on the nomination of the Dean of the Faculty with the approval of the Faculty;

(g) not more than four students elected in the manner prescribed by resolution of the Senate; and

(h) such other persons, if any, being full-time members of the research staff assigned to the Faculty and holding a position at the level of Research Fellow and above, after they have been employed in the Faculty for more than three years.

2. (a) A person appointed pursuant to section 1(f) shall be appointed for a period of three years and shall be eligible for reappointment for one period of three years.

(b) The persons, if any, appointed under section 1(h) shall be members of the Faculty for so long as they remain full-time members of the senior research staff in the Faculty.

Degrees and Diplomas in the Faculty of Agriculture, Food and Natural Resources

1. The degrees in the Faculty of Agriculture, Food and Natural Resources shall be:

(a) Bachelor of Science in Agriculture (BScAgr)

(b) Bachelor of Animal Science (BAnimSc)

(c) Bachelor of Agricultural Economics (BAgrEc)

(d) Bachelor of Horticultural Science (BHortSc)

(e) Bachelor of Land and Water Science (BLWSc)

(f) Bachelor of Resource Economics (BResEc)

(g) Master of Agriculture (MAgr)

(h) Master of Science in Agriculture (MScAgr)

(i) Master of Agricultural Economics (MAgrEc)

(j) Doctor of Philosophy (PhD)

(k) Doctor of Science in Agriculture (DScAgr)

(l) Doctor of Agricultural Economics (DAgrEc).

2. The diplomas in the Faculty of Agriculture, Food and Natural Resources shall be:

(a) Graduate Diploma in Agricultural Economics (GradDipAgrEc)

(b) Graduate Diploma in Agricultural Science (GradDipAgrSc).

Bachelor degrees in the Faculty of Agriculture, Food and Natural Resources

These Resolutions must be read in conjunction with The University of Sydney (Undergraduate Courses) Rule 2000, which set out the requirements for all undergraduate degree courses, and with the relevant Faculty Resolutions.

Bachelor degrees in the Faculty of Agriculture, Food and Natural Resources

Bachelor of Agricultural Economics

Bachelor of Animal Science

Bachelor of Horticultural Science

Bachelor of Land and Water Science

Bachelor of Resource Economics

Bachelor of Science in Agriculture

Requirements for the degree at Pass level

2. To qualify for the award of the degree at pass level students must:

· complete successfully units of study giving credit for a total of 192 credit points; and

· satisfy the requirements of all other By-Laws, Rules and Resolutions of the University.

Requirements for the degree at Honours level

To qualify for the award of the degree at Honours level, students must complete the pass level requirements at the honours level published in the Faculty resolutions relating to the course.

(See Resolutions of the Faculty relating to the Bachelor degrees in the Faculty of Agriculture, Food and Natural Resources in this section, following the Postgraduate Resolutions.)

Master of Science in Agriculture, Master of Agricultural Economics, Master of Agriculture

1. A candidate for the degree of Master of Science in Agriculture or for the degree of Master of Agricultural Economics shall proceed by research and submission of a thesis and a candidate for the degree of Master of Agriculture shall proceed by coursework.

2. (1) A candidate for the degree of Master of Science in Agriculture shall proceed to the degree in the Sciences Discipline.

(2) A candidate for the degree of Master of Agricultural Economics shall proceed in the Agricultural and Resource Economics Discipline.

(3) A candidate for the degree of Master of Agriculture shall proceed in the Discipline in the Faculty or in an interdisciplinary program approved by the Faculty.

Admission to candidature

3. (1) The Faculty of Agriculture, Food and Natural Resources may admit to candidature for the degree of Master in the Faculty a graduate of The University of Sydney who has completed units of study acceptable to the Faculty.

(2) On the recommendation of the Faculty, the Academic Board may admit to candidature in accordance with chapter 10 of the by-laws a person who has, in the opinion of the Faculty, qualifications equivalent to those required of a graduate of The University of Sydney.

4. The Faculty may require a person admitted as a candidate for the degree of Master of Science in Agriculture or the degree of Master of Agricultural Economics to serve a period of probation for not more than one year and to complete such work during the period as it may prescribe, and at the completion of the period, the Faculty shall review the candidature and the work completed, and may confirm or terminate the candidature. If the Faculty confirms the candidature, it shall be deemed to have commenced at the beginning of the period of probation.

Periods of candidature

5. (1) The minimum period of candidature for a full-time candidate for the degree of Master of Science in Agriculture or the degree of Master of Agricultural Economics shall be two years, except in the case of a candidate who holds the degree of Bachelor of the Faculty with first- or second-class Honours or another qualification accepted by the Faculty as equivalent, for whom the minimum period shall be one year.

(2) The period of candidature for a full-time candidate for the degree of Master of Agriculture shall be one year.

(3) The maximum period of full-time candidature for the degree of Master of Science in Agriculture or the degree of Master of Agricultural Economics shall be three years, but the Faculty may, in special circumstances, extend a candidature.

(4) The Faculty shall determine the minimum and maximum periods of candidature for part-time candidates on a pro-rata basis.

(5) The Faculty may deem time spent or work done for another research degree of The University of Sydney to be time spent or work done for the degree of Master of Science in Agriculture or the degree of Master of Agricultural Economics if the candidate has ceased to be a candidate for the other degree, and the Faculty may reduce the minimum and maximum periods of candidature accordingly.

Appointment of supervisor

8. Regulations

6. The Faculty shall appoint a member of the full-time academic or research staff of the Discipline in which a candidate for the degree of Master of Science in Agriculture or the degree of Master of Agricultural Economics is proceeding to be the candidate's supervisor. The Faculty may also appoint an associate supervisor of the candidate who may be a member of the academic or research staff of the University, an Honorary Research Associate, or a person with appropriate qualifications in another institution or organisation.

Coursework to be completed

7. A candidate proceeding by coursework shall complete units of study prescribed by the Faculty to a total value of 48 credit points from units of study approved from time to time by the Faculty.

Progress

8. (1) Each candidate shall report regularly to the Faculty on his or her progress towards completing the requirements for the degree.

(2) The Faculty shall consider the report of each candidate and may, if it considers that a candidate has not made satisfactory progress towards completing the requirements for the degree, terminate the candidature.

(3) The Faculty may accept a candidate's results in coursework examinations in place of reports from the candidate.

Lodgement of thesis

9. (1) Not earlier than the end of the minimum period of candidature, each candidate proceeding by research and thesis shall lodge with the Registrar three copies of a thesis embodying the results of an original investigation carried out by the candidate.

(2) The candidate shall state in the thesis, generally in a preface and specifically in notes, the sources from which the information was derived, the extent to which the candidate has made use of the work of others, and the portion of the thesis the candidate claims to be original.

(3) The thesis shall be accompanied by a certificate from the candidate's supervisor stating whether, in the supervisor's opinion, the form of presentation of the thesis is satisfactory.

Examination

10. The Faculty shall appoint at least two examiners for a thesis, one of whom shall be external to the University.

Result of candidature

11. The Faculty shall determine the result of the candidature after it has considered:

(a) the reports of the examiners of the thesis or the results of the examinations completed by a candidate proceeding by coursework, and

(b) a recommendation on the result of the candidature from the Leader of the Discipline in which the candidate is proceeding.

Award of the degree

12. The degree of Master of Agriculture may be awarded in the following subject areas and the testamur for the degree shall specify the subject area:

- (a) Agricultural Chemistry
- (b) Agricultural Economics
- (c) Agricultural Entomology
- (d) Agricultural Genetics
- (e) Agronomy
- (f) Animal Science
- (g) Biometry
- (h) Cereal Chemistry
- (i) Cereal Science
- (j) Horticultural Science
- (k) Microbiology
- (l) Plant Breeding
- (m) Plant Pathology
- (n) Plant Protection
- (o) Soil Conservation
- (p) Soil Contamination
- (q) Soil Science
- (r) Turf Management.

Graduate Diplomas

1. Candidates for the graduate diplomas shall proceed by coursework.

2. (1) A candidate for the Graduate Diploma in Agricultural Science shall proceed in the Sciences Discipline.

(2) A candidate for the Graduate Diploma in Agricultural Economics shall proceed in the Agricultural and Resource Economics Discipline.

Admission to candidature

3. (1) The Faculty of Agriculture, Food and Natural Resources may admit to candidature for a graduate diploma in the Faculty a graduate

of The University of Sydney who has completed units of study acceptable to the Faculty.

(2) On the recommendation of the Faculty, the Academic Board may admit to candidature in accordance with chapter 10 of the by-laws a person who has, in the opinion of the Faculty, qualifications equivalent to those required of a graduate of The University of Sydney.

4. The Faculty may require a person admitted to candidature to serve a period of probation for not more than one year and to complete such work during the period as it may prescribe, and at the completion of the period, the Faculty shall review the candidature and the work completed, and may confirm or terminate the candidature. If the Faculty confirms the candidature, it shall be deemed to have commenced at the beginning of the period of probation.

Periods of candidature

5. (1) The period of candidature for a full-time candidate for a graduate diploma shall be one year.

(2) The Faculty shall determine the minimum and maximum periods of candidature for part-time candidates on a pro-rata basis.

(3) The Faculty may deem time spent or coursework completed for a degree or another diploma of The University of Sydney to be time spent or coursework completed for a diploma in the Faculty if the candidate has ceased to be a candidate for the degree or the other diploma, and the Faculty may reduce the period of candidature accordingly.

Progress

6. (1) Each candidate shall report regularly to the Faculty on his or her progress towards completing the requirements for the graduate diploma.

(2) The Faculty shall consider the report of each candidate and may, if it considers that a candidate has not made satisfactory progress towards completing the requirements for the graduate diploma, terminate the candidature.

(3) The Faculty may accept a candidate's results in coursework examinations in place of reports from the candidate.

Result of candidature

7. The Faculty shall determine the result of the candidature after it has considered:

- (a) the results of the examinations completed by a candidate, and
- (b) a recommendation on the result of the candidature from the Leader of the Discipline in which the candidate is proceeding.

Award of the graduate diploma

8. The Graduate Diploma in Agricultural Science shall be awarded in the following subject areas and the testamur for the diploma shall specify the subject area:

- (a) Agricultural Chemistry
- (b) Agricultural Entomology
- (c) Agricultural Genetics
- (d) Agronomy
- (e) Animal Science
- (f) Biometry
- (g) Horticultural Science
- (h) Microbiology
- (i) Plant Pathology
- (j) Plant Protection
- (k) Soil Science
- (l) Turf Management.

Resolutions of the Faculty – Postgraduate candidatures

Eligibility for admission

1. An applicant for admission to candidature for a research degree shall:

- (a) hold a degree of Bachelor of the Faculty with First or Second Class Honours or equivalent of The University of Sydney; or
- (b) for the Master of Agricultural Economics or Master of Science in Agriculture, hold a degree of Bachelor of the Faculty with a Credit or above in the Fourth Year in the field in which the candidate is proceeding; or
- (c) have completed courses in another faculty or institution, these courses being deemed by the Faculty to be equivalent.

2. Demonstrated research ability will be considered when determining eligibility; applicants proposing to proceed primarily by research and thesis should provide evidence such as publications in scientific journals.

3. A research topic, which is satisfactory in terms of research interests, resources and availability of supervision within the discipline,

must be agreed upon between the applicant and the relevant Discipline Leader.

4. An applicant for admission to candidature for the degree of Master of Agriculture by coursework or the Graduate Diploma in Agricultural Economics or the Graduate Diploma in Agricultural Science, both by coursework, shall have a bachelor's degree of The University of Sydney, or equivalent, and have demonstrated an adequate ability for the subject area to be studied.

5. Applicants may be required to provide evidence of adequate financial resources for personal support and compulsory fees during candidature. They may be required to demonstrate to the satisfaction of the Faculty a proficiency in the English language adequate to undertake the proposed candidature.

Availability

6. The number of students admitted may be limited and will be determined by:

- (a) availability of resources, including space, library, equipment and computing facilities, and
- (b) availability of adequate and appropriate supervision, including both the supervision of research candidatures and where appropriate the coordination of coursework programs.

7. In considering an application for admission to candidature the Faculty will take account of resource limitations and will select in preference applicants who are most meritorious in terms of sections 1-4 above.

Control of candidature

8. (i) Each candidate for the MAgrEc or MScAgr degree shall pursue his or her course of advanced study and research wholly under the control of the Faculty.

(ii) Where a candidate is employed by an institution other than the University, the Faculty may require a statement by that employer acknowledging that the candidature will be under the control of the Faculty.

Part-time candidature by research

9. (i) The Faculty may permit candidates to enrol in part-time candidature provided they supply a satisfactorily detailed plan of their proposed program and attend at the University for such consultation with the supervisor and participate in such faculty activities as are required by the Discipline Leader.

(ii) The Faculty may permit part-time candidates for the MAgrEc or the MScAgr degree admitted under the provisions of chapter 10 of the by-laws to complete the investigation elsewhere, after two years have been spent in this or equivalent candidature within the University.

(iii) Candidates admitted to part-time candidature are expected to devote a minimum of 20 hours per week (or equivalent) to their candidature.

(iv) Research assistants or associate lecturers in the University shall enrol part-time unless they can demonstrate to the satisfaction of the Faculty that they have sufficient time to pursue full-time candidature. Coursework to be completed

10. A candidate proceeding by coursework shall satisfactorily complete such coursework as the Faculty on the advice of the Discipline Leader may prescribe. Coursework, including any prescribed research project, will be chosen from the tables of units of study attached to these resolutions. A result of PCON may not be counted towards the award of a degree or the graduate diploma.

(a) For the MAgr degree, 48 credit points of coursework must be completed including 8 to 24 credit points of any prescribed research project.

(b) For the GradDipAgrEc, 48 credit points of coursework must be completed including 8 or 16 credit points of any prescribed research project.

(c) For the GradDipAgrSc, 48 credit points of coursework must be completed including 8 to 24 credit points of a research project. Credit for previous studies

11. The Board of Postgraduate Studies (Board) may grant credit:

(a) towards MAgr candidature for coursework completed in graduate diploma candidature in this Faculty;

(b) for up to 12 credit points of unspecified coursework towards MAgr candidature for units of study completed in another faculty of this University or of other tertiary institutions;

(c) for up to 8 credit points of unspecified coursework towards graduate diploma candidature for units of study completed in another faculty of this University or of other tertiary institutions; provided that:

(i) no unit of study for which credit is granted has been a basis for the award of any other degree or diploma;

(ii) the unit or units were passed at a level of competence or with such additional assessment or other requirements as may be determined by the Board in each case;

(iii) the unit or units were completed within six years immediately preceding the commencement of candidature for the MAgr degree or the graduate diploma.

Form of a thesis

12.(1) A thesis may be bound for submission in either a temporary or a permanent form.

(2) Temporary binding must be strong enough to withstand ordinary handling and postage. The preferred form of binding is the 'Perfect Binding' system; ring-back or spiral binding is not permitted.

(3) The cover of a temporarily bound thesis must have a label with the candidate's name, name of the degree, the title of the thesis and the year of submission.

(4) The requirements for permanent binding are set out in the Statutes and Regulations in the Academic Board's resolutions for binding of PhD theses.

(5) Following examination, and emendation if necessary, at least one copy of a thesis (the Rare Book Library copy) must be bound in permanent form on archive paper.

(6) If emendations are required, all copies of a thesis which are to remain available within the University must be emended.

Result of candidature

13.(1) The Board of Postgraduate Studies awards, or for the PhD degree recommends the award of, the degree or graduate diploma whenever:

(a) the examiners have recommended without reservation that the degree be awarded and the Discipline Leader concurs; or

(b) all of the examiners have recommended that the degree be awarded or awarded subject to emendations to all copies of the thesis which are to remain available within the University and the Discipline Leader concurs; or

(c) the Board of Postgraduate Studies unanimously accepts a recommendation from the Discipline Leader to award or award subject to emendations despite reservations expressed by one or more of the examiners; or

(d) the coursework results are satisfactory and the Discipline Leader recommends the award of the degree or graduate diploma.

(2) The Board of Postgraduate Studies may permit an unsuccessful candidate to prepare for re-examination if, in its opinion, the candidate's work is of sufficient merit to warrant this concession and the Discipline Leader has so recommended.

Satisfactory progress

14.(1) A candidate proceeding by research and thesis shall lodge a progress report annually with the Registrar.

(2) The Board of Postgraduate Studies may require a candidate proceeding by coursework to show good cause why he or she should be allowed to re-enrol in a unit of study which has been twice failed or discontinued to count as failure.

Preliminary requirements

15. When an applicant is not qualified for admission to a Master's degree by research, the Faculty may require satisfactory completion of a preliminary examination before admission to candidature can be granted. In such a case a candidate may be enrolled in a Master's Preliminary program which shall consist of such coursework or other requirements as the Faculty may determine.

Delegation

16. In these resolutions:

(1) Faculty delegates its responsibility to the Board of Postgraduate Studies.

(2) The Board of Postgraduate Studies delegates the following responsibilities to the Dean who in turn delegates them to the Associate Dean (Postgraduate): approval of:

(a) award of the degree of Doctor of Philosophy under conditions approved by the University's Committee for Graduate Studies

(b) award of the Master of Agriculture degree and the Graduate Diplomas in Agricultural Science and Agricultural Economics

(c) award of the Master of Science in Agriculture and Master of Agricultural Economics degrees when there is no apparent reason for debate at the Board

(d) appointment of examiners

(e) admission to candidature

(f) supervisory arrangements

(g) variation of candidature

(h) extension of candidature

(i) completion of candidature away from the University

(j) suspension of candidature

(k) approval of continuance following receipt of annual progress reports.

Completion of course

Except by permission of the Dean, no student shall be allowed to sit for any examination unless the requirements specified by the Faculty have been completed. The Dean may call upon any student who has

8. Regulations

been absent from more than 10 per cent of classes in any semester to show cause for such absence. Students who fail to show sufficient cause are excluded from admission to examinations. No excuse for absence from lectures, demonstration or practical work shall be received unless tendered in writing to the Faculty Office within one week after attendance is resumed.

Enrolment regulations

Discontinuation of enrolment and readmission after discontinuation - postgraduate

All Faculties, Colleges, Boards of Studies and Graduate Schools - all candidates

1. A candidate will be presumed to have discontinued enrolment in a unit of study, degree or diploma from the date of application to the Faculty, College, Board of Studies or Graduate School concerned, unless evidence is produced (i) that the discontinuation occurred at an earlier date, and (ii) that there was good reason why the application could not be made at the earlier time.

2. A candidate who at any time discontinues enrolment from a degree or diploma shall not be entitled to re-enrol in that degree or diploma unless the candidate is readmitted to candidature for that degree or diploma.

3. Subject to subsections (i) and (ii) of section 1, candidates may not discontinue enrolment in a unit of study after the end of classes in that unit, unless the degree or diploma regulations permit otherwise.

4. The Dean, Pro-Dean or an Associate Dean of a Faculty, Director or Deputy Director of a College, a Chairperson of a Board of Studies or a Chairperson of a Graduate School may act on behalf of that Faculty, College, Board of Studies or Graduate School in the administration of these resolutions.

Candidates proceeding mainly by coursework

Withdrawal from March Semester units of study

5. A candidate for a degree or diploma who discontinues enrolment in a Semester 1 unit of study on or before 31 March in that year, shall be recorded as withdrawn from that unit.

Withdrawal from July Semester units of study

6. A candidate for a degree or diploma who discontinues enrolment in a Semester 2 unit of study on or before 31 August in that year, shall be recorded as withdrawn from that unit.

Discontinuation

7. A candidate for a degree or diploma who discontinues enrolment in a unit of study after the withdrawal period but before the end of classes in that unit, shall be recorded as 'Discontinued - Not to count as failure' in that unit, unless the degree or diploma resolutions permit otherwise.

Candidates proceeding mainly by thesis

Withdrawal

8. A candidate who discontinues enrolment in a unit of study or degree before 31 March or 31 August, shall be recorded as having withdrawn from that unit or degree.

Discontinuation

9. A candidate who discontinues enrolment in a unit of study or degree after 31 March or 31 August, shall be recorded as 'Discontinued - Not to count as failure'.

Board of Postgraduate Studies

Pursuant to the resolutions of Senate the Faculty appoints the following Board of Postgraduate Studies:

Dean

Associate Dean (Postgraduate)

Professors

Discipline Leaders (or nominees)

A representative appointed by the Dean of the Faculty of Veterinary Science

Two elect representatives of the Faculty of Agriculture, Food and Natural Resources.

Resolutions of the Faculty relating to bachelor degrees in the Faculty of Agriculture, Food and Natural Resources

These Resolutions must be read in conjunction with The University of Sydney (Coursework Rule) Rule 2000, which sets out the requirements for all coursework courses, and with the relevant Resolutions of the Senate.

Section 1

1. To qualify for a degree, candidates must complete units of study making a total of 192 credit points and Professional Experience specified for individual degree courses. In a full-time program the normal load will be 48 credit points in each year for 4 years. The degree program must be completed within 10 calendar years of the first enrolment or readmission without credit. If a candidate is admitted or readmitted with credit, the Faculty will determine a reduced time limit for completion of the degree.

2. The following units of study shall be completed for degrees offered by the Faculty.

Restrictions on units

A candidate may choose elective units of study for which there is no prerequisite unit of study or for which the prerequisite/ corequisite has been satisfied, provided that the timetable permits attendance at all scheduled classes.

(a) A candidate for the degree of Bachelor of Agricultural Economics shall complete the following units of study:

Unit of study	
<i>Year 1</i>	
AGEC 1001	Agricultural Economics 1A
AGEC 1002	Agricultural Economics 1B
ECMT 1010	Business and Economic Statistics A
ECMT 1020	Business and Economic Statistics B
ECON 1002	Introductory Macroeconomics
ECON 1001	Introductory Microeconomics
and 12 credit points from Table 1 attached to these resolutions.	
<i>Year 2</i>	
AGEC 2005	Applied Commodity Modelling 2
AGEC 2001	Commodity Price Analysis 2
AGEC 2003	Production Economics 2
ECON 2002	Intermediate Macroeconomics
ECON 2001	Intermediate Microeconomics
and a minimum of 12 credit points from Tables 1 or 2 attached to these resolutions.	
<i>Year 3</i>	
AGEC 3001	Agribusiness Management 3
AGEC 3002	Agricultural and Resource Policy 3
AGEC 3004	Research Methods 3
ECON 3XXX	two level 3000 Economics units (options)
(8 credit points each)	
and a minimum of 12 credit points from Table 2 attached to these resolutions.	

Year 4	
AGEC 4010	Contemporary Issues 4A
AGEC 4011	Contemporary Issues 4B
AGEC 4012	Research Project 4A1
AGEC 4013	Research Project 4A2
and a minimum of 24 credit points from	
AGEC 4009	Agricultural Finance and Risk Management 4
AGEC 4003	Applied International Trade 4
AGEC 4004	Applied Marketing 4
AGEC 4037	Benefit Cost Analysis 4
AGEC 4005	Environmental and Resource Economics
AGEC 4035	Environmental Economics 4
AGEC 4033	Minerals and Energy Economics 4
AGEC 4008	Quantitative Planning Methods 4
AGEC 4007	Special Topics in Agricultural & Resource Economics 4
AGEC 4036	Water Economics 4

Table 1: Units which may be taken in Year 1 and/or Year 2 of the BAgREc degree

Unit of study		Credit points
No more than 24 credit points from this table may count towards the degree.

(g) Table 6: Credit points of the units of study listed in Resolution 2. The prerequisite/corequisite/assumed knowledge and special conditions are set out in the summary Table of units of study published in the Faculty Handbook. A student who enrolls in accordance with these resolutions, in a unit or units of study prescribed for a degree other than that in which the student is enrolled, shall satisfy the prerequisite, corequisites and other requirements prescribed for such units of study.

Unit of study		Credit points

3. Variations permitted to the requirements specified in Resolution 2 include:

(i) Talented students

Some variation in units of study required for completion of the degree may be approved by the Dean for exceptionally talented students.

(ii) Summer School

Units of study completed at the University of Sydney Summer School which correspond to units of study in the Table of Undergraduate Units of Study (Resolution 2(g) Table 6) may be credited towards the course requirements

(iii) Cross-institutional enrolment

Provided that permission has been obtained in advance, the Dean may permit a student to complete a unit of study at another institution and have that unit credited to his/her course requirements provided that either

(a) the unit of study content is material not taught in any corresponding unit of study in the University, or

(b) the student is unable for good reason to attend a corresponding unit of study at the University.

(iv) Additional units

A student may enrol in units of study additional to the requirements in an academic year, only with the permission of the Dean.

(v) Timetable clashes

A student must obtain written permission of the Discipline Leader(s) concerned, and the permission of the Dean, all of whom may impose conditions of attendance, to enrol in units of study which have timetable clashes.

(vi) Restriction on enrolment

A student must obtain the written permission of the Dean to enrol in level 3000 units of study unless he/she has successfully completed all required level 1000 units of study and has successfully completed or is concurrently enrolled in compulsory level 2000 units of study.

(vii) Credit Transfer

(a) Graduates or students in other faculties or other degrees within the Faculty or of other institutions who are admitted to candidature

8. Regulations

for the degree of Bachelor may be granted credit for units of study required for the various degrees of the Faculty as specified in Resolution 2, as the Dean on behalf of the Faculty may determine, up to a maximum value of 96 credit points.

(b) The Dean may approve credit for a maximum of 36 unspecified credit points for units of study successfully completed elsewhere, but not comparable to units listed in Resolution 2, as part of the 96 credit point maximum credit transfer permitted.

Section 2

4. Assessment policy

(i) Assessment methods for units of study offered in the Faculty will be included in unit details in the Faculty Handbook and made available to students enrolled in the units at the beginning of the semester.

(ii) Examinations

(a) Completion of unit of study

A student who has been absent from more than 10 per cent of classes in a unit may be deemed to have failed to complete the requirements specified by the Faculty for the unit and may be excluded by the Dean from admission to examinations in that unit.

(b) Further Testing

A Discipline Leader may arrange for further testing of students in addition to scheduled assessments and examinations, in accordance with Academic Board policy.

Further tests for the BAgEc, BAnimSc, BHortSc, BLWSc, BResEc and BScAgr degrees

1. Further tests may be awarded where the candidate has been prevented by sufficient and duly certified illness or misadventure from completing the assessment for a unit of study. The full range of common result grades is available for these candidates.

2. Further tests may be awarded in a unit of study where the examiner requires further evidence to reach a final assessment of a candidate who has failed a unit of study and whose performance is borderline (eg a final mark in the range 45-49%). The highest grade of award available is Pass.

3. Where possible and practicable, all further tests will be administered and results finalised no later than 2 weeks after the end of the examination period.

4. The Discipline Leader is responsible for the awarding, timetabling and conduct of further tests, which may take such form as the Discipline Leader directs. Students in a unit of study must be given notice of the proposed date for conducting further tests no later than the date of publication of the final University Examinations Timetable.

5. Individual students granted a further test should wherever possible be given at least three days' prior notice. A candidate who is absent from a further test without sufficient reason will be deemed to have failed the test.

6. In respect to the notification of students referred to in sections 4 and 5, students will be deemed to have been notified by the Discipline Leader as a result of the posting of information by the due date on one or more noticeboards as advised by the Discipline Leader concerned and posting an email to the students' official University email address(es).

7. It is the responsibility of the student to provide written evidence of illness or misadventure to the appropriate Discipline Leader as soon as possible and practicable and in any case before the close of the relevant examination period. Where such evidence is not presented in time for the student to be offered a further test on the

advertised date, the evidence will only be considered by the Discipline Leader where there is sufficient reason why it has not been presented by that date.

Honours

5. (i) First Class or Second Class Honours, Division One or Division Two may be awarded at graduation.

(ii) First Class Honours candidates whose work is of sufficient merit, in the opinion of the Faculty Committee to Award Prizes, Honours and the University Medal, shall receive a bronze medal.

(iii) Award of honours at graduation

1. Honours are awarded in Agriculture and not in an individual subject.

2. Details of the Fourth Year work and determination of marks for Fourth Year are the responsibility of the Discipline Leader and sections concerned.

3. All candidates who have completed an independent research project as part of the final year degree program are formally eligible to be considered for honours. Except with the special permission of the Faculty, honours shall not be awarded to any candidate for the degree of Bachelor of Science in Agriculture, Bachelor of Animal Science, Bachelor of Horticultural Science, Bachelor of Land and Water Science, Bachelor of Agricultural Economics or Bachelor of Resource Economics unless the candidate has completed the course in the minimum time. Notwithstanding the previous condition, candidates who complete the first three years of the course in four years, and who by virtue of their weighted average marks would otherwise qualify for the award of honours, will be so considered. Such candidates may however be disadvantaged in terms of honours grading and ranking.

4. (1) For the BAgEc and BResEc degrees. For the assessment of an aggregate mark for the award of honours at the end of the Fourth Year:

(a) Each of the units of study at level 2 and level 3 provided for in the resolutions shall be weighted according to credit point value and a weighted average mark (WAM) obtained. Each of the units of study at level 4 provided for in the resolutions shall be weighted according to credit point value and a weighted average mark (WAM) obtained.

(b) The overall aggregate honours mark shall be the average of the level 2/3 WAM and the level 4 WAM.

(2) For the BScAgr, BAnimSc, BHortSc and BLWSc degrees. For the determination of the overall honours mark for the award of honours at the end of the Fourth Year:

(a) Each of the units of study provided for in the resolutions in Second and Third Years shall be weighted according to credit point value and a weighted average mark (WAM) obtained.

(b) The overall honours mark shall be the average of the Second and Third Year WAM and the Fourth Year mark.

5. In computing the aggregate marks of students, the mark achieved on the occasion of the first attempt at a unit of study shall be the mark used.

6. (1) For the BAgEc and BResEc degrees. For the award of a particular level of honours a candidate, except in special circumstances, must obtain the relevant minimum aggregate honours mark and the minimum WAM in Second and Third Year units of study set out in the following table:

Level of honours (under review)	Minimum overall honours mark	Minimum WAM Years 2/3
First Class	75	70
Second Class, Division 1	70	65
Second Class, Division 2	65	62

In the event of a recommendation for the award of honours that departs from these standards, it shall be incumbent upon the Discipline Leader and section concerned to make out a substantial case for such a departure. Admissible grounds for departure would include medical disability or misadventure early in the course, and the existence of consistently lower standards of grading in units of study undertaken outside the Faculty of Agriculture, Food and Natural Resources.

(2) For the BScAgr, BAnimSc, BHortSc and BLWSc degrees. For the award of a particular level of honours, a candidate, except in special circumstances, must obtain the relevant minimum marks as set out in the following table:

Level of honours (under review)	Minimum overall honours mark	Minimum WAM Year 4	Minimum WAM Years 2/3
First Class	75	75	70
Second Class, Division 1	66	70	63
Second Class, Division 2	61	65	58

In the event of a recommendation for honours that departs from these standards, it shall be incumbent upon the Discipline Leader and section concerned to make a substantial case for such a departure.

7. The CAPHUM shall be responsible for the award of the university medal and the award of honours. Achievement of the minimum standards referred to elsewhere in these resolutions is not in itself sufficient justification for these awards.

8. (1) (under review) For the BAgEc and BResEc degree, a university medal may be awarded, on the recommendation of the Agricultural and Resource Economics Discipline Leader, to a student who has a Level 4 WAM of at least 85, an aggregate Honours mark of at least 80 and a Second/ Third Year WAM of at least 75.

(2) (under review) For the BScAgr, BAnimSc, BHortSc and BLWSc degrees, a university medal may be awarded, on the recommendation of the Discipline Leader or the Animal Science Coordinator for the BAnimSc Sc, to a student who has a Level 4 WAM of at least 85, an overall honours mark of at least 80 and a Second/Third Year WAM of at least 75.

6. Suspension, withdrawal and discontinuation, re-enrolment and satisfactory progress

(i) Suspension of candidature

A student, who has enrolled for the degree and who wishes to suspend candidature for more than two semesters, must seek approval of the Dean, who, where appropriate, may consult Discipline Leaders concerned and having considered advice, may determine any conditions for re-enrolment. A student, who has not obtained written permission to suspend candidature for more than two semesters, will be required to apply for re-admission in accordance with procedures determined by the Dean.

(ii) Withdrawal and Discontinuation of enrolment

(a) Withdrawal from Semester 1 units of study

A candidate for a degree of Bachelor who discontinues enrolment in a March Semester unit of study on or before 31 March in that year shall be recorded as having withdrawn from that unit.

(b) Withdrawal from Semester 2 units of study

A candidate for a degree of Bachelor who discontinues enrolment in a July Semester unit of study on or before 31 August in that year shall be recorded as having withdrawn from that unit.

(c) Discontinuation

A student who wishes to discontinue enrolment in a course or a unit of study must apply to the Dean or the Dean's nominee.

(1) Discontinued - Not to count as failure

A candidate for the degree of bachelor who discontinues enrolment in a unit of study after the relevant withdrawal period and up to the last day of the seventh week of teaching in a one semester unit of study, shall be recorded as Discontinued - Not to count as failure (DNF).

(2) Discontinued - Fail

A candidate for the degree of bachelor who discontinues enrolment in a unit of study after the last day of the seventh week of teaching in a one semester unit of study, shall be recorded as Discontinued - Fail (DF).

(3) The Dean, Pro-Dean or an Associate Dean of the Faculty may determine that a discontinuation of enrolment should be recorded as 'Discontinued - Not to count as failure' on the grounds of serious ill-health or misadventure.

(iii) Re-enrolment after an absence

A student who wishes to re-enrol after an absence must contact the Dean in writing no less than six weeks prior to the commencement of the semester to allow administrative processes to be carried out.

(iv) Satisfactory Progress - Exclusion and Re-admission

There are certain circumstances in which a student may be asked to show good cause why he/she should be permitted to repeat any previously attempted study, if, in the opinion of the Faculty Exclusions and Re-admission Committee, he/she has not made satisfactory progress towards fulfilling the requirements of the degree or the unit. Satisfactory progress cannot be defined in all cases in advance but a student who has -

(a) twice failed (F), or discontinued enrolment to count as a failure (DF), any unit of study as defined in Resolution 2 relating to the Bachelor degrees of the Faculty or

(b) failed more than sixty per cent of the credit points for which enrolled in any four successive semesters, shall be deemed not to have made satisfactory progress.

In cases where the Faculty permits the re-enrolment of a student in whose progress has been deemed unsatisfactory, the Faculty may require the completion of specified units of study in a specified time, and if the student does not comply with these conditions the student may again be called upon to show good cause why he/she should be allowed to re-enrol in the Faculty of Agriculture, Food and Natural Resources.

It is not possible to define in advance all the reasons that constitute 'good cause' but serious ill health, or misadventure properly attested, will be considered. In addition your general record, for example in other courses, would be taken into account. In particular if you were transferring from another faculty your record in your previous faculty would be considered. Not usually acceptable as good cause are such matters as demands of employers, pressure of employment, time devoted to non-university activities and so on, except as they may be relevant to any serious ill health or misadventure.

7. Professional experience and Faculty excursions

Students are required to undertake professional experience in University vacations as an integral and essential part of their overall training in the degrees of Bachelor of Agricultural Economics, Bachelor of Horticultural Science, Bachelor of Land and Water Science, Bachelor of Resource Economics and Bachelor of Science in Agriculture.

The aims of professional experience are to:

1. Familiarise students with agricultural, horticultural or natural resource industries;

2. Provide the opportunity to experience agricultural and horticultural production and natural resource management across a range of environments and managerial systems;

3. Provide experience with business organisations involved in finance, marketing, research and development and other aspects of the rural industries;

4. Train students to collect, collate, analyse and report.

BAgEc, BLWSc and BScAgr

1. Candidates must complete a minimum of 60 days of professional experience. Each component of the experience must be approved on behalf of the Dean before credit is granted. A minimum of 30 days must be completed as on-farm experience with the minimum on any enterprise being 10 days.

A maximum of 10 days may be credited on property which is owned by the candidate's parents or the University.

In addition, candidates must complete a minimum of 30 days 'graduate placement' (minimum 15 days at any one enterprise).

Graduate placement is non-farm experience, typically with organisations with whom graduates find employment eg NSW Department of Primary Industries, finance organisations, experiencing the kind of work they will find as a graduate.

2. It is a requirement that on-farm experience includes:

(a) experience in 2 different regions (and not adjacent shires)

(b) experience in 2 rural enterprises

A significant proportion of this 30 day on-farm component should be completed before non-farm professional experience is undertaken. The farms concerned must be commercial farms not hobby farms. Commercial farms are defined as those having a gross income of at least \$25 000.

3. A separate Professional Experience report must be submitted following each visit to a farm or organisation. Credit is subject to a satisfactory and timely report. Late reports normally are not credited. Time penalties are applied to resubmitted and incomplete reports.

A senior report must be completed on a commercial farm. (A maximum of 3 'General Reports' can be credited.)

4. In addition to the 60 days minimum professional experience, students must attend one of the North Western, Central or South Western New South Wales excursions arranged by the Faculty and may attend each one.

5. Final year students wishing to graduate must complete all practical work requirements by 14 January of the year of graduation. Reports from graduands submitted after 14 January will not be marked until the July semester.

BHortSc

As for the BAgEc, BLWSc, BScAgr, except that:

1. A minimum of 30 days professional experience must be completed in horticultural production industries (on-farm).

2. It is a requirement that the experience in horticultural production industries include a minimum of 10 days in at least 2 industries in at least 2 climatic regions as defined below. A significant proportion of this 30 day on-farm component should be completed before non-farm professional experience is undertaken. The farms concerned must be commercial farms not hobby farms. Commercial farms are defined as those having a gross income of at least \$25 000.

The horticultural industries are classified into 4 groups for professional experience:

· Fruit and Nut

· Vegetables

· Ornamentals (including nursery stock, cut flower and turf production)

· Amenity (including parks, gardens and streetscape establishment and maintenance and landscape horticulture).

8. Regulations

The Australian regions are listed in the back of the Professional Experience Book except that for BHortSc students the coastal region (Zone 1) is subdivided along the southern boundary of Kempsey Shire.

BResEc

As for the BAgEc, BLWSc, BScAgr, except that:

1. Students must complete at least 2 'field-work' experience placements. These placements must be with firms or organisations involved in natural resources and each must be in a different industry (eg, farming, forestry, fishing, mining, energy, water harvesting or use, national parks). 'Field-work' here means working with the resource system in situ, not managing or working in relation to it remotely.
2. At least one field-work placement will normally be completed before the commencement of the second academic year. At least two field-work placements and a minimum of 40 days of professional experience will normally be completed before commencement of the third academic year.
3. Students must complete a minimum of 20 days on one or more placements in professional activities gaining experience of management or economic analysis of natural resources relevant to BResEc graduates.
4. Sufficient placements to accrue 60 days professional experience should be completed before the commencement of the final semester of the student's course of study.
5. A maximum of 10 days may be credited for a natural resources enterprise which is owned or operated by the candidate's parents or by the University.

Faculty excursions

All students must attend at least one Faculty NSW excursion.

The excursions are normally held each year as follows:

- (a) First Year - at Easter, from Easter Monday, - to the Macquarie Valley in the Central West
- (b) South West Excursion - in the 2nd semester mid-semester break (the end of September, just before the October long weekend).
- (c) North West Excursion - during Orientation Week.

The Faculty arranges all local transport, food and accommodation.

Students are required to meet reasonable living costs.

University of Sydney (Coursework) Rule 2000 (as amended)

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

Approved by: Senate on 4 December 2000

Date of effect: 1 January 2001

Latest amendment approved by: Senate on 3 December 2001

Date of effect: 1 January 2002

Preliminary

Rules relating to Coursework Award Courses

Division 1 Award course requirements, credit points and assessment

Division 2 Enrolment

Division 3 Credit, cross-institutional study and their upper limits

Division 4 Progression

Division 5 Discontinuation of enrolment and suspension of candidature

Division 6 Unsatisfactory progress and exclusion

Division 7 Exceptional circumstances

Division 8 Award of degrees, diplomas and certificates

Division 9 Transitional provisions

PRELIMINARY

1. Commencement and purpose of Rule

1. This Rule is made by the Senate pursuant to section 37(1) of the University of Sydney Act 1989 for the purposes of the University of Sydney By-law 1999.
2. This Rule comes into force on 1 January 2001.
3. This Rule governs all coursework award courses in the University. It is to be read in conjunction with the University of Sydney (Amendment Act) Rule 1999 and the Resolutions of the Senate and the faculty resolutions relating to each award course in that faculty.

RULES RELATING TO COURSEWORK AWARD COURSES

1. Definitions

In this Rule:

award course means a formally approved program of study which can lead to an academic award granted by the University.

coursework means an award course not designated as a research award course. While the program of study in a coursework award course may include a component of original, supervised research, other forms of instruction and learning normally will be dominant. All undergraduate award courses are coursework award courses;

credit means advanced standing based on previous attainment in another award course at the University or at another institution. The advanced standing is expressed as credit points granted towards the award course. Credit may be granted as specific credit or non-specific credit.

Specific credit means the recognition of previously completed studies as directly equivalent to units of study.

Non-specific credit means a 'block credit' for a specified number of credit points at a particular level. These credit points may be in a particular subject area but are not linked to a specific unit of study;

credit points mean a measure of value indicating the contribution each unit of study provides towards meeting award course completion requirements stated as a total credit point value;

dean means the dean of a faculty or the director or principal of an academic college or the chairperson of a board of studies;

degree means a degree at the level of bachelor or master for the purpose of this Rule;

embedded courses/programs means award courses in the graduate certificate / graduate diploma / master's degree by coursework sequence which allow unit of study credit points to count in more than one of the awards;

faculty means a faculty, college board, a board of studies or the Australian Graduate School of Management Limited as established in each case by its constitution and in these Rules refers to the faculty or faculties responsible for the award course concerned;

major means a defined program of study, generally comprising specified units of study from later stages of the award course;

minor means a defined program of study, generally comprising units of study from later stages of the award course and requiring a smaller number of credit points than a major;

postgraduate award course means an award course leading to the award of a graduate certificate, graduate diploma, degree of master or a doctorate. Normally, a postgraduate award course requires the prior completion of a relevant undergraduate degree or diploma.

research award course means an award course in which students undertake and report systematic, creative work in order to increase the stock of knowledge. The research award courses offered by the University are: higher doctorate, Doctor of Philosophy, doctorates by research and advanced coursework, and certain degrees of master designated as research degrees. The systematic, creative component of a research award course must comprise at least 66% of the overall award course requirements;

stream means a defined program of study within an award course, which requires the completion of a program of study specified by the award course rules for the particular stream, in addition to the core program specified by award course rules for the award course.

student means a person enrolled as a candidate for a course;

testamur means a certificate of award provided to a graduate, usually at a graduation ceremony;

transcript or **academic transcript** means a printed statement setting out a student's academic record at the University;

unit of study means the smallest stand-alone component of a student's award course that is recordable on a student's transcript. Units of study have an integer credit point value, normally in the range 3-24;

undergraduate award course means an award course leading to the award of an associate diploma, diploma, advanced diploma or degree of bachelor.

2. Authorities and responsibilities

1. Authorities and responsibilities for the functions set out in this Rule are also defined in the document Academic Delegations of Authority. The latter document sets out the mechanisms by which a person who has delegated authority may appoint an agent to perform a particular function.
2. The procedures for consideration of, and deadlines for submission of, proposals for new and amended award courses will be determined by the Academic Board.

Division 1: Award course requirements, credit points and assessment

3. Award course requirements

- (1) To qualify for the award of a degree, diploma or certificate, a student must:

(a) complete the award course requirements specified by the Senate for the award of the degree, diploma or certificate concerned;

- (b) complete any other award course requirements specified by the Academic Board on the recommendation of the faculty and published in the faculty resolutions relating to the award course;
- (c) complete any other award course requirements specified by the faculty in accordance with its delegated authority and published in the faculty resolutions relating to the award course; and
- (d) satisfy the requirements of all other relevant by-laws, rules and resolutions of the University.

4. Units of study and credit points

- (1) (a) A unit of study comprises the forms of teaching and learning approved by a faculty. Where the unit of study is being provided specifically for an award course which is the responsibility of another faculty, that faculty must also provide approval.
- (b) Any faculty considering the inclusion of a unit of study in the tables of units available for an award course for which it is responsible may review the forms of teaching and learning of that unit, may consult with the approving faculty about aspects of that unit and may specify additional conditions with respect to inclusion of that unit of study.
- (2) A student completes a unit of study if the student:
 - (a) participates in the learning experiences provided for the unit of study;
 - (b) meets the standards required by the University for academic honesty;
 - (c) meets all examination, assessment and attendance requirements for the unit of study; and
 - (d) passes the required assessments for the unit of study.
- (3) Each unit of study is assigned a specified number of credit points by the faculty responsible for the unit of study.
- (4) The total number of credit points required for completion of an award course will be as specified in the Senate resolutions relating to the award course.
- (5) The total number of credit points required for completion of award courses in an approved combined award course will be specified in the Senate or faculty resolutions relating to the award course.
- (6) A student may, under special circumstances, and in accordance with faculty resolutions, be permitted by the relevant dean to undertake a unit or units of study other than those specified in the faculty resolutions relating to the award course and have that unit or those units of study counted towards fulfilling the requirements of the award course in which the student is enrolled.

5. Unit of study assessment

- 1. A student who completes a unit of study will normally be awarded grades of high distinction, distinction, credit or pass, in accordance with policies established by the Academic Board. The grades high distinction, distinction and credit indicate work of a standard higher than that required for a pass.
- 2. A student who completes a unit of study for which only a pass/fail result is available will be recorded as having satisfied requirements.
- 3. In determining the results of a student in any unit of study, the whole of the student's work in the unit of study may be taken into account.
- 4. Examination and assessment in the University are conducted in accordance with the policies and directions of the Academic Board.

6. Attendance

- 1. A faculty has authority to specify the attendance requirements for courses or units of study in that faculty. A faculty must take into account any University policies concerning modes of attendance, equity and disabled access.
- 2. A faculty has authority to specify the circumstances under which a student who does not satisfy attendance requirements may be deemed not to have completed a unit of study or an award course.

Division 2: Enrolment

7. Enrolment restrictions

- (1) A student who has completed a unit of study towards the requirements of an award course may not re-enrol in that unit of study, except as permitted by faculty resolution or with the written permission of the dean. A student permitted to re-enrol

may receive a higher or lower grade, but not additional credit points.

- (2) Except as provided in sub-section (1), a student may not enrol in any unit of study which overlaps substantially in content with a unit that has already been completed or for which credit or exemption has been granted towards the award course requirements.
- (3) A student may not enrol in units of study additional to award course requirements without first obtaining permission from the relevant dean.
- (4) Except as prescribed in faculty resolutions or with the permission of the relevant dean:
 - (a) a student enrolled in an undergraduate course may not enrol in units of study with a total value of more than 32 credit points in any one semester, or 16 credit points in the summer session; and
 - (b) a student enrolled in a postgraduate award course may not enrol in units of study with a total value of more than 24 credit points in any one semester, or 12 credit points in the summer session.

Division 3: Credit, cross-institutional study and their upper limits

8. Credit for previous studies

- (1) Students may be granted credit on the basis of previous studies.
- (2) Notwithstanding any credit granted on the basis of work completed or prior learning in another award course at the University of Sydney or in another institution, in order to qualify for an award a student must:
 - (a) for undergraduate award courses, complete a minimum of the equivalent of two full-time semesters of the award course at the University; and
 - (b) for postgraduate award courses, complete at least fifty percent of the requirements prescribed for the award course at the University. These requirements may be varied where the work was completed as part of an embedded program at the University or as part of an award course approved by the University in an approved conjoint venture with another institution.
- (3) The credit granted on the basis of work completed at an institution other than a university normally should not exceed one third of the overall award course requirements.
- (4) A faculty has authority to establish embedded academic sequences in closely related graduate certificate, graduate diploma and master's degree award courses. In such embedded sequences, a student may be granted credit for all or some of the units of study completed in one award of the sequence towards any other award in the sequence, irrespective of whether or not the award has been conferred.
- (5) In an award course offered as part of an approved conjoint venture the provisions for the granting of credit are prescribed in the Resolutions of the Senate and the faculty resolutions relating to that award course.

9. Cross-institutional study

- 1. The relevant dean may permit a student to complete a unit or units of study at another university or institution and have that unit or those units of study credited to the student's award course.
- 2. The relevant dean has authority to determine any conditions applying to cross-institutional study.

Division 4: Progression

10. Repeating a unit of study

- (1) A student who repeats a unit of study shall, unless granted exemption by the relevant dean:
 - (a) participate in the learning experiences provided for the unit of study; and
 - (b) meet all examination, assessment and attendance requirements for the unit of study.
- (2) A student who presents for re-assessment in any unit of study is not eligible for any prize or scholarship awarded in connection with that unit of study without the permission of the relevant dean.

11. Time limits

A student must complete all the requirements for an award course within ten calendar years or any lesser period if specified by Resolution of the Senate or the faculty.

Division 5: Discontinuation of enrolment and suspension of candidature

12. Discontinuation of enrolment

(1) A student who wishes to discontinue enrolment in an award course or a unit of study must apply to the relevant dean and will be presumed to have discontinued enrolment from the date of that application, unless evidence is produced showing:

- (a) that the discontinuation occurred at an earlier date; and
- (b) that there was good reason why the application could not be made at the earlier time.

(2) A student who discontinues enrolment during the first year of enrolment in an award course may not re-enrol in that award course unless:

- (a) the relevant dean has granted prior permission to re-enrol; or
- (b) the student is reselected for admission to candidature for that course.

(3) No student may discontinue enrolment in an award course or unit of study after the end of classes in that award course or unit of study, unless he or she produces evidence that:

- (a) the discontinuation occurred at an earlier date; and
- (b) there was good reason why the application could not be made at the earlier time.

(4) A discontinuation of enrolment may be recorded as *Withdrawn (W)* or *Discontinued Not To Count As Failure (DNF)* where that discontinuation occurs within the time-frames specified by the University and published by the faculty, or where the student meets other conditions as specified by the relevant faculty.

13. Suspension of candidature

1. A student must be enrolled in each semester in which he or she is actively completing the requirements for the award course. A student who wishes to suspend candidature must first obtain approval from the relevant dean.
2. The candidature of a student who has not re-enrolled and who has not obtained approval from the dean for suspension will be deemed to have lapsed.
3. A student whose candidature has lapsed must apply for re-admission in accordance with procedures determined by the relevant faculty.
4. A student who enrolls after suspending candidature shall complete the requirements for the award course under such conditions as determined by the dean.

Division 6: Unsatisfactory progress and exclusion

14. Satisfactory progress

A faculty has authority to determine what constitutes satisfactory progress for all students enrolled in award courses in that faculty, in accordance with the policies and directions of the Academic Board.

15. Requirement to show good cause

1. For the purposes of this Rule, good cause means circumstances beyond the reasonable control of a student, which may include serious ill health or misadventure, but does not include demands of employers, pressure of employment or time devoted to non-University activities, unless these are relevant to serious ill health or misadventure. In all cases the onus is on the student to provide the University with satisfactory evidence to establish good cause. The University may take into account relevant aspects of a student's record in other courses or units of study within the University and relevant aspects of academic studies at other institutions provided that the student presents this information to the University.

2. The relevant dean may require a student who has not made satisfactory progress to show good cause why he or she should be allowed to re-enrol.
3. The dean will permit a student who has shown good cause to re-enrol.

16. Exclusion for failure to show good cause

The dean may, where good cause has not been established:

- (1) exclude the student from the relevant course; or
- (2) permit the student to re-enrol in the relevant award course subject to restrictions on units of study, which may include, but are not restricted to:

- (a) completion of a unit or units of study within a specified time;
- (b) exclusion from a unit or units of study, provided that the dean must first consult the head of the department responsible for the unit or units of study; and
- (c) specification of the earliest date upon which a student may re-enrol in a unit or units of study.

17. Applying for re-admission after exclusion

1. A student who has been excluded from an award course or from a unit or units of study may apply to the relevant dean for readmission to the award course or re-enrolment in the unit or units of study concerned after at least 4 semesters, and that dean may readmit the student to the award course or permit the student to re-enrol in the unit or units of study concerned.
2. With the written approval of the relevant dean, a student who has been excluded may be given credit for any work completed elsewhere in the University or in another university during a period of exclusion.

18. Appeals against exclusion

(1) In this Rule a reference to the Appeals Committee is a reference to the Senate Student Appeals Committee (Exclusions and Readmissions).

(2) (a) (i) A student who has been excluded in accordance with this Rule may appeal to the Appeals Committee.

(ii) A student who has applied for readmission to an award course or re-enrolment in a unit of study after a period of exclusion, and who is refused readmission or re-enrolment may also apply to the Appeals Committee.

(b) The Appeals Committee shall comprise:

- (i) 3 *ex officio* members (the Chancellor, the Deputy Chancellor and the Vice-Chancellor and Principal);
- (ii) the Chair and Deputy Chairs of the Academic Board;
- (iii) 2 student Fellows; and
- (iv) up to 4 other Fellows.

(c) The Appeals Committee may meet as one or more sub-committees providing that each sub-committee shall include at least 1 member of each of the categories of:

- (i) *ex officio* member;
- (ii) Chair or Deputy Chair of the Academic Board;
- (iii) student Fellow; and
- (iv) other Fellows.

(d) Three members shall constitute a quorum for a meeting of the Appeals Committee or a sub-committee.

(e) The Appeals Committee and its sub-committees have authority to hear and determine all such appeals and must report its decision to the Senate annually.

(f) The Appeals Committee or a sub-committee may uphold or disallow any appeal and, at its discretion, may determine the earliest date within a maximum of four semesters at which a student who has been excluded shall be permitted to apply to re-enrol.

(g) No appeal shall be determined without granting the student the opportunity to appear in person before the Appeals Committee or sub-committee considering the appeal. A student so appearing may be accompanied by a friend or adviser.

(h) The Appeals Committee or sub-committee may hear the relevant dean but that dean may only be present at those stages at which the student is permitted to be present. Similarly, the dean is entitled to be present when the Committee or sub-committee hears the student.

(i) If, due notice having been given, a student fails to attend a meeting of the Appeals Committee or sub-committee scheduled to consider that student's appeal, the Appeals Committee or sub-committee, at its discretion, may defer consideration of the appeal or may proceed to determine the appeal.

(j) A student who has been excluded in accordance with these resolutions and has lodged a timely appeal against that exclusion may re-

enrol pending determination of that appeal if it has not been determined by the commencement of classes in the next appropriate semester.

Division 7: Exceptional circumstances

19. Variation of award course requirements in exceptional circumstances

The relevant dean may vary any requirement for a particular student enrolled in an award course in that faculty where, in the opinion of the dean, exceptional circumstances exist.

Division 8: Award of degrees, diplomas and certificates

20. Classes of award

1. Undergraduate diplomas may be awarded in five grades – pass, pass with merit, pass with distinction, pass with high distinction or honours.
2. Degrees of bachelor may be awarded in two grades – pass or honours.
3. Graduate diplomas and graduate certificates may be awarded in one grade only – pass.
4. Degrees of master by coursework may be awarded three grades – pass, pass with merit or honours.

21. Award of the degree of bachelor with honours

(1) The award of honours is reserved to indicate special proficiency. The basis on which a student may qualify for the award of honours in a particular award course is specified in the faculty resolutions relating to the course.

(2) Each faculty shall publish the grading systems and criteria for the award of honours in that faculty.

(3) Classes which may be used for the award of honours are:

First Class

Second Class/Division 1

Second Class/Division 2

Third Class.

(4) With respect to award courses which include an additional honours year:

- (a) a student may not graduate with the pass degree while enrolled in the honours year;
- (b) on the recommendation of the head of the department concerned, a dean may permit a student who has been awarded the pass degree at a recognised tertiary institution to enrol in the honours year in that faculty;
- (c) faculties may prescribe the conditions under which a student may enrol part-time in the honours year;
- (d) a student who fails or discontinues the honours year may not re-enrol in it, except with the approval of the dean.

22. University Medal

An honours bachelor's degree student with an outstanding academic record throughout the award course may be eligible for the award of a University medal, in accordance with Academic Board policy and the requirements of the faculty resolutions relating to the award course concerned.

23. Award of the degree of master with honours or merit

The award of honours or pass with merit is reserved to indicate special proficiency or particular pathways to completion. The basis on which a student may qualify for the award of honours or the award with merit in a particular degree is specified in the faculty resolutions relating to that degree.

24. Transcripts and testamurs

1. A student who has completed an award course or a unit of study at the University will receive an academic transcript upon application and payment of any charges required.
2. Testamurs may indicate streams or majors or both as specified in the relevant faculty resolutions.

Division 9: Transitional provisions

25. Application of this Rule during transition

This Rule applies to all candidates for degrees, diplomas and certificates who commence candidature after 1 January 2001. Candidates who commenced candidature prior to this date may choose to proceed in accordance with the resolutions of the Senate in force at the time they enrolled, except that the faculty may determine specific conditions for any student who has re-enrolled in an award course after a period of suspension.

General University information

The following information is a printed version of the information available through Handbooks Online, on the University of Sydney web site. Please visit "<http://www.usyd.edu.au/handbooks/>" for the most current handbooks information.

See also the Glossary for administrative information relating to particular terms.

Accommodation Service

The Accommodation Service helps students find off-campus accommodation. The service maintains an extensive database of accommodation close to the Camperdown and Darlington Campus or within easy access via public transport. Currently enrolled students can access the database online through the MyUni student portal, or the accommodation website (<http://www.usyd.edu.au/accom>).

Admissions Office

The Admissions Office, located in the Student Centre, is responsible for overseeing the distribution of offers to undergraduate applicants through the Universities Admission Centre (UAC). They can advise prospective local undergraduate students on admission requirements. Postgraduate students should contact the appropriate faculty. If you are an Australian citizen or a permanent resident but have qualifications from a non-Australian institution phone (02) 9351 4118 for more information. For enquiries regarding special admissions (including mature-age entry) phone (02) 9351 3615. Applicants without Australian citizenship or permanent residency should contact the International Office (see International Student Centre entry).

Applying for a course

Local applicants for undergraduate courses and programs of study

For the purpose of admission and enrolment 'local applicant' refers to citizens and permanent residents of Australia and citizens of New Zealand. If you are in this group and wish to apply for admission into an undergraduate course, you would generally apply through the Universities Admissions Centre (UAC). The deadline for application is the last working day of September in the year before enrolment. Go to the UAC website for more information.

Note that some faculties, such as Pharmacy, the Sydney Conservatorium of Music and Sydney College of the Arts, have additional application procedures.

Local applicants for postgraduate courses and programs of study

For the purpose of admission and enrolment 'local applicant' refers to citizens and permanent residents of Australia and citizens of New Zealand. Application is direct to the faculty which offers the course that you are interested in. Application forms for postgraduate coursework, postgraduate research and the Master's qualifying or

preliminary program and for non-award postgraduate study can be found at the student centre website (<http://www.usyd.edu.au/su/studentcentre/applications/applications.html>).

Please note that some faculties use their own specially tailored application forms for admission into their courses. Please contact the relevant faculty.

International applicants for all course types (undergraduate and postgraduate)

'International applicants' refers to all applicants other than Australian citizens, Australian permanent residents and citizens of New Zealand. In the majority of cases international applicants apply for admission through the University's International Office (IO) (see International Student Centre entry). All the information international applicants need, including application forms, is available from the IO website (<http://www.usyd.edu.au/io>).

Assessment

For assessment matters refer to the relevant department or school.

Careers Centre

The Careers Centre provides careers information and advice, and help in finding course-related employment both while you're studying and when you commence your career.

Careers Centre
Ground Floor, Mackie Building, K01

Fax: (02) 9351 4869
Email: admissions@records.usyd.edu.au

Centre for Continuing Education

The Centre for Continuing Education offers a wide range of short courses for special interest, university preparation and professional development. Subject areas include: history and culture, creative arts, social sciences, languages, IT, business and overseas study tours. Courses are open to everyone.

The centre relocated at the end of 2004. Please refer to the centre's website for up-to-date contact details, or phone the existing general enquiry number (02) 9351 4789 for redirection.

The Co-op Bookshop

The Co-op Bookshop is a one-stop bookshop for:

- textbooks;
- general books;
- course notes;
- reference books; and
- software at academic prices.

Lifetime membership costs \$25.00 and gives a 10 per cent discount on purchases (conditions apply).

Counselling Service

The Counselling Service aims to help students fulfil their academic, individual and social goals through professional counselling. Counselling is free and confidential. The service provides short-term, problem-focused counselling to promote psychological wellbeing and to help students develop effective and realistic coping strategies. The service runs a program of workshops during each semester. For details of workshops, activities and online resources provided by the service see the website (<http://www.usyd.edu.au/counsel>).

Enrolment and pre-enrolment

Students entering first year

Details of enrolment procedures will be sent to you with your UAC offer of enrolment. Enrolment takes place at a specific time and date, usually during the last week of January, depending on your surname and the faculty in which you are enrolling. You must attend the University in person or else nominate somebody in writing to act on your behalf. On enrolment day you pay the compulsory fees for joining the Student Union, the Students' Representative Council and sporting bodies. You also nominate your preferred payment option, either 'up front' or deferred, for your Higher Contribution Scheme (HECS) liability. You will also choose your first-year units of study, so it's important to consult the appropriate faculty handbook before enrolling.

All other students

A pre-enrolment package is sent to all enrolled students in late September and contains instructions on the procedure for pre-enrolment.

Environmental Policy

The University of Sydney's Environmental Policy promotes sustainable resource and product use; and encourages the practice of environmental stewardship by staff and students. The policy is supported by the University wide Sustainable Campus Program.

Enquiries can be directed to the Manager, Environmental Strategies 93512063.janet.broadly@usyd.edu.au or go to www.usyd.edu.au/fmo (<http://www.usyd.edu.au/fmo>) and click on 'Sustainable Campus'.

Examinations

The Examinations and Exclusions Office looks after the majority of examination arrangements and student progression. Some faculties, such as the Sydney Conservatorium of Music, make all examination arrangements for the units of study that they offer.

Examinations and Exclusions Office
Student Centre

Financial Assistance Office

The University of Sydney has a number of loan and bursary funds to assist students experiencing financial difficulties. Loan assistance is available for undergraduate and postgraduate students enrolled in degree and diploma courses at the University. The assistance is not intended to provide the principle means of support but to help enrolled students in financial need with expenses such as housing bonds and rent; phone and electricity bills; medical expenses; buying textbooks and course equipment. Loans are interest free and are repayable usually within one year. Bursaries may be awarded depending on financial need and academic merit and are usually only available to local full-time undergraduate students. For details of types of assistance and online resources provided by the service see the website (http://www.usyd.edu.au/fin_assist).

Freedom of information

The University of Sydney falls within the jurisdiction of the *NSW Freedom of Information Act, 1989*. The act:

- requires information concerning documents held by the University to be made available to the public;
- enables a member of the public to obtain access to documents held by the University; and
- enables a member of the public to ensure that records held by the University concerning his or her personal affairs are not incomplete, incorrect, out of date or misleading.

(Note that a 'member of the public' includes staff and students of the University)

It is a requirement of the act that applications be processed and a determination made within a specified time period, generally 21 days. Determinations are made by the University's Registrar.

While application may be made to access University documents, some may not be released in accordance with particular exemptions provided by the act. There are review and appeal mechanisms which apply when access has been refused.

The University is required to report to the public on its freedom of information (FOI) activities on a regular basis. The two reports produced are the *Statement of Affairs* and the *Summary of Affairs*. The *Statement of Affairs* contains information about the University, its structure, function and the kinds of documents held. The *Summary of Affairs* identifies the University's policy documents and provides information on how to make an application for access to University documents.

Further information and copies of the current reports may be found at www.usyd.edu.au/arms/foi (<http://www.usyd.edu.au/arms/foi>).

Graduations Office

The Graduations Office is responsible for organising graduation ceremonies and informing students of their graduation arrangements.

Student Centre
Carslaw Building, F07
The University of Sydney
NSW 2006 Australia

Phone: (02) 9351 3199, (02) 9351 4009
Protocol: (02) 9351 4612
Fax: (02) 9351 5072

(Grievances) appeals

You may consider that a decision affecting your candidature for a degree or other activities at the University has not taken into account all relevant matters.

In some cases the by-laws or resolutions of the Senate (see the University Calendar) provide for a right of appeal against particular decisions; for example, there is provision for appeal against academic decisions, disciplinary decisions and exclusion after failure.

A document outlining the current procedures for appeals against academic decisions is available at the Student Centre, at the SRC, and on the University's policy online website (<http://www.usyd.edu.au/policy>) (click on 'Study at the University', then click on 'Appeals' – see the Academic Board and Senate resolutions).

For assistance or advice regarding an appeal contact:

Students' Representative Council
Level 1, Wentworth Building, G01
The University of Sydney
NSW 2006 Australia

Phone: (02) 9660 5222

HECS and Fees Office

Student Centre
Ground Floor, Carslaw Building, F07
The University of Sydney
NSW 2006 Australia

Phone: (02) 9351 5659, (02) 9351 5062, (02) 9351 2086
Fax: (02) 9351 5081

Information Technology Services (ITS)

Information Technology Services oversees the University's computing infrastructure. Students can contact ITS either through the ITS Helpdesk or through the University Access Labs (<http://www.usyd.edu.au/su/is/labs>). The access labs on the Camperdown and Darlinghurst Campus are located in:

- Fisher Library (Level 2);
- Carslaw Building (Room 201);
- Education Building (Room 232);
- Christopher Brennan Building (Room 232);
- Engineering Link Building (Room 222); and
- Pharmacy and Bank Building (Room 510).

Other labs are available at the Law, Orange, Westmead and Cumberland campuses.

The labs allow students free access to computers including: office and desktop publishing software and storage; at-cost Internet access; printing facilities and the opportunity to host their own website.

Each student is supplied with an account, called a 'Unikey' (extro) account, which allows access to a number of services including:

- free email (www-mail.usyd.edu.au (<http://www.usyd.edu.au/about/publication/pub/calendar.shtml>));
- access to the Internet from home or residential colleges (www.helpdesk.usyd.edu.au/services.html);
- online course material (www.groucho.ucc.usyd.edu.au:9000/webct/public/home.pl);
- student facilities via the MyUni student portal (<http://my-uni.usyd.edu.au>), including exam results, enrolment and variations and timetabling; and
- free courses in basic computing (such as MS Office; basic html and photoshop) that are run by Access Lab staff in the week following orientation week. To register contact the Access Lab Supervisor on 02 9351 6870.

International Student Centre

The International Student Centre consists of the International Office (IO), the International Student Services Unit (ISSU) and the Study Abroad and Exchange Office. The IO provides assistance with application, admission and enrolment procedures and administers scholarships for international students. The ISSU provides a wide range of international student support services including orientation and assistance with finding accommodation for new arrivals and psychological counselling and welfare advice for international students and their families. The Study Abroad and Exchange unit assists both domestic and international students who wish to enrol for study abroad or exchange programs.

Koori Centre and Yooroang Garang

The Koori Centre provides programs, services and facilities to encourage and support the involvement of Aboriginal and Torres Strait Islander people in all aspects of tertiary education at the University of Sydney. The centre provides tutorial assistance, access to computers, an Indigenous research library, study rooms, an orientation program at the beginning of the year and assistance in study and learning skills. In particular the Koori Centre aims to increase the successful participation of Aboriginal and Torres Strait Islander people in undergraduate and postgraduate degrees, develop the teaching of Aboriginal Studies, conduct research in the field of Aboriginal education, and establish working ties with schools and communities.

Close collaboration is also maintained with Yooroang Garang: School of Indigenous Health Studies in the Faculty of Health Sciences at the University's Cumberland Campus. Yooroang Garang provides advice, assistance and academic support for Indigenous students in the faculty, as well as preparatory undergraduate and postgraduate courses.

Language Centre

The Language Centre provides multimedia teaching rooms for Faculty of Arts courses. Technical support for teaching staff is available on site. Student self-access facilities for curriculum materials, access to multilingual satellite television broadcasts and a broadcast copying service are also provided by the centre. The centre maintains a resource collection of multimedia language materials in over 140 languages and has three language laboratories, four audiovisual classrooms, two access computer labs and one student audiovisual study room.

Learning Centre

The Learning Centre helps students develop the generic learning and communication skills that are necessary for university study and beyond. The centre is committed to helping students achieve their academic potential throughout their undergraduate and postgraduate studies. The centre's program includes a wide range of workshops on study skills, academic reading and writing, oral communication skills and postgraduate writing and research skills. Other services include an individual learning program, a special program for international students, faculty-based workshops, computer-based learning resources, publications of learning resources and library facilities. For details of programs, activities and online resources provided by the centre see the website (<http://www.usyd.edu.au/lc>).

Library

The University of Sydney Library, the largest academic library in the Southern Hemisphere, is a network of 20 libraries located on nine campuses. The Library website provides access to services and resources, anywhere at anytime. The locations, opening hours and subject specialities of the libraries are listed on the website.

Over five million items are available via the Library catalogue, including more than 40,000 electronic journals and 270,000 electronic books. Past exam papers are also available online. Enrolled students are entitled to borrow from any of the University Libraries. More information is available on the website.

Reading list items are available via the reserve service. Increasingly, reading list material is becoming available in electronic form. For details see the reserve service website.

Library staff are always available to support students in their studies. 'Ask a Librarian' in person, by email, or by using an online chat service.

A specialist librarian is available for all discipline areas and will provide training in finding high quality information. Courses cover a range of skills including research methodology, database searching, effective use of the Internet and the use of reference management software. See the subject contact page.

Library facilities include individual and group study spaces, computers, printers, multimedia equipment, photocopiers and adaptive technologies. Check the 'Libraries' link on the home page to find out about services and facilities in specific libraries.

The *Client Service Charter* describes the Library's commitment to supporting students' learning, including those with special needs. See the *Client Service Charter* online. Your comments and suggestions are always welcome. *University of Sydney Library, F03 University of Sydney NSW 2006 Australia Phone: (02) 9351 2993 (general enquiries) Fax: (02) 9351 2890 (administration), (02) 9351 7278 (renewals) Email: [[loanenq@library.usyd.edu.au|loan-enq@library.usyd.edu.au (loan enquiries), [[reqill@library.usyd.edu.au|reqill@library.usyd.edu.au (inter-library loans) Web: www.library.usyd.edu.au*

Mathematics Learning Centre

The Mathematics Learning Centre assists undergraduate students to develop the mathematical knowledge, skills and confidence that are needed for studying first level mathematics or statistics units at university. The centre runs bridging courses in mathematics at the beginning of the academic year (fees apply). The centre also provides ongoing support to eligible students during the year through individual assistance and small group tutorials. For details of activities and online resources provided by the centre see the website www.usyd.edu.au/mlc.

Web: www.usyd.edu.au/mlc (<http://www.usyd.edu.au/mlc>)

MyUni student portal

Launched in July 2004, the MyUni student portal is the starting point and 'one-stop' environment for students to access all their web-based University information and services. MyUni automatically tailors what a student sees based on their login-in and offers students the option of further personalising content. Most importantly, MyUni allows students to complete tasks online that would previously have required attendance in person. The following are examples of MyUni services and information:

- support services for students in health, counselling, child care, accommodation, employment and wellbeing;
- student administration systems for obtaining exam results, enrolment and variations, timetabling, email services and links to courses and units of study information;
- links to the University's e-learning systems;
- library services;
- notices and student alerts;
- information technology and support services;
- information for international students; and
- Campus maps, with descriptions of cultural, sporting and campus facilities.

Part-time, full-time

Undergraduate students

Undergraduate students are usually considered full-time if they have a HECS weighting of at least 0.375 each semester. Anything under this amount is considered a part-time study load. Note that some faculties have minimum study load requirements for satisfactory progress.

Postgraduate students (coursework)

For postgraduate coursework students part-time or full-time status is determined by credit-point load. Enrolment in units of study which total at least 18 credit points in a semester is classed as full-time. Anything under this amount is a part-time study load. Please note that classes for some coursework programs are held in the evenings (usually 6–9pm).

Postgraduate students (research)

Full-time candidates for research degrees do not keep to the normal semester schedule, instead they work continuously throughout the year with a period of four weeks' recreation leave. There is no strict definition of what constitutes full-time candidature but if you have employment or other commitments that would prevent you from devoting at least the equivalent of a 35-hour working week to your candidature (including attendance at the University for lectures, seminars, practical work and consultation with your supervisor) you should enrol as a part-time candidate. If in doubt you should consult your faculty or supervisor.

International students

Student visa regulations require international students to undertake full-time study. International students on visas other than student visas may be permitted to study part-time.

Privacy

The University is subject to the *NSW Privacy and Personal Information Protection Act 1998* and the *NSW Health Records and Information Privacy Act 2002*. Central to both acts are the sets of information protection principles (IPPs) and health privacy principles which regulate the collection, management, use and disclosure of personal and health information. In compliance with the *Privacy and Personal Information Protection Act* the University developed a *Privacy Management Plan* which includes the *University Privacy Policy*. The *Privacy Management Plan* sets out the IPPs and how they apply to functions and activities carried out by the University. Both the plan and the *University Privacy Policy* were endorsed by the Vice-Chancellor on 28 June 2000.

Further information and a copy of the plan may be found at www.usyd.edu.au/arms/privacy (<http://www.usyd.edu.au/arms/privacy>).

Any questions regarding the *Freedom of Information Act*, the *Privacy and Personal Information Protection Act*, the *Health Records and Information Privacy Act* or the *Privacy Management Plan* should be directed to:

General University information

Web: www.usyd.edu.au/su/studentcentre (<http://www.usyd.edu.au/su/studentcentre>)

Student identity cards

The student identity card functions as a library borrowing card, a transport concession card (when suitably endorsed) and a general identity card. The card must be carried at all times on the grounds of the University and must be shown on demand. Students are required to provide a passport-sized colour photograph of their head and shoulders for lamination on to this card. Free lamination is provided at a range of sites throughout the University during the January/February enrolment/pre-enrolment period. Cards that are not laminated, or do not include a photograph, will be rejected. New identity cards are required for each year of a student's enrolment.

Student Services

The University provides personal, welfare, and academic support services to facilitate your success at University. Many factors can impact on your wellbeing while studying at university and student services can assist you in managing and handling these more effectively. For details of services and online resources provided see the Student Services website (<http://www.usyd.edu.au/stuserv>).

The Sydney Summer School

Most faculties at the University offer units of study from undergraduate degree programs during summer. There are also some units of study available for postgraduate coursework programs from some faculties. As the University uses its entire quota of Commonwealth supported places in first and second semester, these units are full fee-paying for both local and international students and enrolment is entirely voluntary. However, Summer School units enable students to accelerate their degree progress, make up for a failed unit or fit in a unit which otherwise would not suit their timetables. New students may also gain a head start by completing subjects before they commence their degrees. Units start at various times from late November and run for up to six weeks (followed by an examination week). Notice of the units available is on the Summer School website and is usually circulated to students with their results notices. A smaller Winter School is also run from the Summer School office. It commences on 4 July and runs for up to three weeks (followed by an examination week). It offers mainly postgraduate and a few undergraduate units of study. Information can be found on the Summer School website.

Timetabling unit

The Timetabling Unit in the Student Centre is responsible for producing students' class and tutorial timetables. Semester 1 timetables are available from the Wednesday of O Week on the Student Centre website (<http://www.usyd.edu.au/su/studentcentre>).

The Sydney Conservatorium of Music operates produces its own complete timetable for all teaching that it delivers. The timetable is available on enrolment at the Conservatorium.

University Health Service

The University Health Service provides full general practitioner services and emergency medical care to all members of the University community. Medical centres on the Camperdown and Darlington Campuses offer general practitioners, physiotherapy and some specialist services.

BLO	Business Liaison Office
BOTPLS	Bridging for Overseas Trained Professionals Loans Scheme

C	
CAF	Cost Adjustment Factor
CAUT	Committee for Advancement of University Teaching
CDP	Capital Development Program
CEP	Country Education Profile
CEQ	Course Experience Questionnaire
CFO	Chief Financial Officer
CHASS	College of Humanities and Social Sciences
CHESSN	Commonwealth Higher Education System Student Number
CHS	College of Health Sciences
CIO	Chief Information Officer
COE	Confirmation of Enrolment
CPSU	Community and Public Sector Union
CRC	Cooperative Research Centre
CREO	Centre for Regional Education, Orange
CRICOS	Commonwealth Register of Institutions and Courses for Overseas Students
CRRI	Centre for Rural and Regional Innovation

CSIRO	Commonwealth Scientific and Industrial Research Organisation
CST	College of Sciences and Technology
CULT	Combined Universities Language Test
CUTSD	Committee for University Teaching and Staff Development

D	
DAC	Data Audit Committee
DEST	Commonwealth Department of Education, Science and Training
DET	NSW Department of Education and Training
D-IRD	Discovery-Indigenous Researchers Development Program
DVC	Deputy Vice-Chancellor

E	
EB	Enterprise Bargaining
EFTSU	Equivalent Full-Time Student Unit
EFTSL	Equivalent Full-Time Student Load
EIP	Evaluations and Investigations Program
ELICOS	English Language Intensive Course of Study
EMU	Electron Microscope Unit
ESOS Act	Education Services for Overseas Student Act

F	
FFT	Fractional Full Time (Equivalent Staff)
FlexSIS	Flexible Student Information System
FHS	Faculty of Health Sciences
FMO	Facilities Management Office
FOS	Field of Study
FTE	Full Time Equivalent (Staff)
FRM	Faculty of Rural Management

G	
GATS	General Agreement on Trade in Services
GCCA	Graduate Careers Council of Australia
GDS	Graduate Destination Survey
GPOF	General Purpose Operating Funds
GSA	Graduate Skills Assessment
GSG	Graduate School of Government
GWSLN	Greater Western Sydney Learning Network

H	
HDR	Higher Degree Research
HECS	Higher Education Contribution Scheme
HEEP	Higher Education Equity Program
HEFA	Higher Education Funding Act 1988
HEIMS	Higher Education Information Management System
HEIP	Higher Education Innovation Programme (DEST)
HELP	Higher Education Loan Programme
HEO	Higher Education Officer
HEP	Higher Education Provider
HERDC	Higher Education Research Data Collection
HESA	Higher Education Support Act
HOD	Head of Department

I	
IAF	Institutional Assessment Framework (This is a new name for what was previously the DEST Profile process.)
IAS	Institute of Advanced Studies
ICT	Information and Communication Technology
ICTR	Information and Communication Technology Resources
IELTS	International English Language Testing Scheme
IGS	Institutional Grants Scheme (DEST)
IO	International Office
IP	Intellectual Property
IPRS	International Postgraduate Research Scholarships

Glossary

This glossary describes terminology in use at the University of Sydney.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

A

AAM - Annual Average Mark

The average mark over all units of study attempted in a given academic year (equivalent to the calendar year).

The formula for this calculation is:

$$\text{AAM} = \frac{\sum (\text{marks} \times \text{creditPointValue})}{\sum (\text{creditPointValue})}$$

(sums over all UoS's completed in the selected period)

Where the mark is the actual mark obtained by the student for the unit of study, or in the case of a failing grade with no mark - 0. Pass/Fail assessed subjects and credit transfer subjects (from another institution) are excluded from these calculations; however, the marks from all attempts at a unit of study are included.

Academic Board

The senior academic body within the University. In conjunction with faculties, the Academic Board has responsibility for approving, or recommending to Senate for approval, new or amended courses and units of study and policy relating to the admission and candidature of students. (For further information, see the University Calendar.)

Academic cycle

The program of teaching sessions offered over a year. Currently the cycle runs from the enrolment period for Semester 1 through to the completion of the processing of results at the end of Semester 2. (See also Stage.)

Academic dishonesty

Academic dishonesty occurs when a student presents another person's ideas, findings or written work as his or her own by copying or reproducing them without due acknowledgement of the source and with intent to deceive the examiner. Academic dishonesty also covers recycling, fabrication of data, engaging another person to complete an assessment or cheating in exams. (See also Plagiarism.)

Academic record

The complete academic history of a student at the University. It includes, among other things: personal details; all units of study and courses taken; assessment results (marks and grades); awards and prizes obtained; infringements of progression rules; approvals for variation in course requirements and course leave; thesis and supervision details.

Access to a student's academic record is restricted to authorised University staff and is not released to a third party without the written authorisation of the student. (See also Academic transcript.)

Academic transcript

A printed statement setting out a student's academic record at the University. There are two forms of academic transcript: external and internal. (See also External transcript, Internal transcript.)

Academic year

The current calendar year in which a student is enrolled. (See also Academic cycle, Stage.)

Admission

Governed by the University's admission policy, this is the process for identifying applicants eligible to receive an initial offer of enrolment in a course at the University. Admission to most courses is based on performance in the HSC, with applicants ranked on the basis of their UAI. Other criteria such as a portfolio, interview, audition, or results in standard tests may also be taken into account for certain courses.

Admission basis

The main criteria used by a faculty in assessing an application for admission to a course. The criteria used include, among other things, previous secondary, TAFE or tertiary studies; work experience; special admission; and the Universities Admission Index (UAI).

Admission (deferment)

An applicant who receives an offer of admission to a course may apply to defer enrolment in that course for one semester or one academic cycle.

Admission mode

A classification based on how a student was admitted to a course, for example 'UAC' or 'direct'.

Admission period

The period during which applications for admission to courses are considered.

Admission year

The year the student expects to begin the course (see also Commencement date).

Advanced diplomas

See Award course

Advanced standing

See Credit.

Advisor

A member of academic staff appointed in an advisory role for some postgraduate coursework students. (See also Associate supervisor, Instrumental supervisor/teacher, Research supervisor, Supervision.)

Aegrotat

In exceptional circumstances involving serious illness or death of a student prior to completion of their course, the award of aegrotat and posthumous degrees and diplomas may be conferred.

Alumni Sidneienses

A searchable database of graduates of the University from 1857 to 30 years prior to the current year.

Annual Progress Report

A form which is used to monitor a research student's progress each year. The form provides for comments by the student, the supervisor, the head of the department and the dean (or their nominee). The completed form is attached to the student's official file.

Appeals

Students may lodge an appeal against academic or disciplinary decisions. An academic appeal (e.g. against exclusion) is managed by the Student Centre - Exclusions Office while it is under consideration and a record of the outcome of the appeal will be retained.

Assessment

The process of measuring the performance of students in units of study and courses. Performance may be assessed by examinations, essays, laboratory projects, assignments, theses, treatises or dissertations. (See also Result processing, Result processing schedule.)

Formative assessment

Formative assessment is used principally to provide students with feedback on their progress in learning. It reinforces successful learning, and is an opportunity for students to expose the limitations in their knowledge and understanding.

Summative assessment

Summative assessment is used to certify competence, or to arrange students in a rank order of merit. It certifies the attainment of a standard, and is used as the basis for progression to the next part of a program, or to graduation.

Associate supervisor

A person who is appointed in addition to the supervisor of a research student, who can provide the day-to-day contact with the candidate or provide particular expertise or additional experience in supervision. (See also Advisor, Instrumental supervisor/teacher, Research supervisor, Supervision.)

Assumed knowledge

For some units of study, a student is assumed to have passed a relevant subject at the HSC and this is called assumed knowledge. While students are generally advised against taking a unit of study for which they do not have the assumed knowledge, they are not prevented from enrolling in the unit of study. (See also Prerequisite.)

Attendance pattern

Attendance pattern is classified as full-time, part-time or external, this is dependant on the student's mode of attendance and the student load.

Attendance mode

A Department of Education, Science and Technology (DEST) classification defining the manner in which a student is undertaking a course, i.e. internal, external, mixed or offshore.

Australian Graduate School of Management (AGSM)

A joint venture with the University of New South Wales. The AGSM is derived from the Graduate School of Business at the University of Sydney and the then AGSM at the University of New South Wales.

Australian Qualifications Framework (AQF)

The framework for recognition and endorsement of qualifications established by the Ministerial Council on Education, Employment, Training and Youth Affairs (MCEETYA).

AUSTUDY

Austudy provides financial help to students who are aged 25 years or more who meet the required criteria, and is undertaking an approved full-time course at an approved institution. (See also Youth Allowance.)

Automated Results Transfer System (ARTS)

This system was developed by the Australasian Conference of Tertiary Admissions Centres (ACTAC) to allow the electronic academic record of a student to be accessed, via an admission centre, by tertiary institutions.

Award Course

(See Course)

B**Bachelor's degree**

The highest undergraduate award offered at the University. A bachelor's degree course normally requires three or four years of full-time study or the part-time equivalent. (See also Award course)

Barrier

An instruction placed on a student's record that prevents the student from re-enrolling or graduating. (See also Deadlines (fees), Suppression of results).

Board of Studies

An academic body which supervises a course or courses, and which is similar to a faculty except that it is headed by a chair rather than a dean and does not supervise PhD candidates.

Bursaries

Financial award made to a student, based primarily on need. (See also Scholarships).

C**Cadigal Program**

A program, named in recognition of the Aboriginal people of the land on which the University is located, designed to increase the successful participation of Aboriginal and Torres Strait Islander people in degree courses in all faculties at the University of Sydney.

Campus

The grounds on which the University is situated. There are eleven campuses of the University of Sydney:

- Burren Street (Institute for International Health, Institute of Transport Studies)
- Camperdown and Darlington (formerly known as Main Campus)
- Camden (Agriculture and Veterinary Science)
- Conservatorium (Sydney Conservatorium of Music)
- Cumberland (Health Sciences)
- Mallett Street (Nursing)
- Orange (Faculty of Rural Management and Centre for Regional Education)
- Rozelle (Sydney College of the Arts)
- St James (Law)
- Surry Hills (Dentistry).

Cancellation

Where enrolment is cancelled for non-payment of fees.

Candidature

Candidature commences when a student is admitted to a course of study leading to the award of a degree, diploma or certificate. There are maximum periods and in some cases minimum periods of candidature depending on the award course and whether the candidate is a full time or part time student.

Census date

The date at which a student's enrolment, load and HECS liability are finalised before this information is reported to DEST. (see also HECS)

Ceremony

See Graduation ceremony.

Chancellor

The non-executive head of the University. An honorary position, the Chancellor presides over meetings of the University's governing body, the Senate, and important ceremonial occasions such as graduations.

Clinical Experience

Students undertake clinical placements in a professional environment as part of their course requirements. Many require University approved supervision. In order to undertake clinical placements a student may be required to fulfil additional requirements.

College of Health Sciences

Consists of the Faculties of Dentistry; Health Sciences; Medicine; Nursing; and Pharmacy.

College of Humanities and Social Sciences (CHASS)

Consists of the Faculties of Arts; Economics and Business; Education; Law; the Sydney College of the Arts; and the Sydney Conservatorium of Music.

College of Sciences and Technology (CST)

Consists of the Faculties of Agriculture, Food and Natural Resources; Architecture; Engineering; Rural Management; Science; and Veterinary Science.

Combined course

A course which leads to two awards. For example the Arts/Law course leads to the separate awards of Bachelor of Arts and Bachelor of Laws.

Combined degree

A combined degree is a single program with a single set of course resolutions leading to the award of two degrees (unless otherwise specified in the resolutions). (See also Combined course.)

Commencement date

The date a student commences candidature.

Compulsory subscriptions

Each enrolled student is liable to pay annual (or semester) subscriptions, as determined by the Senate, to the student organisations at the University. There are different organisations for undergraduate and postgraduate students.

The student organisations are specific to different campuses. The organisations at campuses other than Camperdown and Darlington include: the Conservatorium Student Association, the Cumberland Student Guild, the Orange Agricultural College Student Association and the Student Association of Sydney College of the Arts. (See also Compulsory subscription exemption, Joining fee, Life membership.)

Compulsory subscription exemption

Students of a certain age or those with disabilities or medical conditions may be exempt from the subscription to the sports body.

Conscientious objectors to the payment of subscriptions to unions of any kind may apply to the Registrar for exemption. The Registrar may permit such a student to make the payment to the Jean Foley Bursary Fund instead. (See also Compulsory subscriptions.)

Confirmation of Enrolment form (COE)

This form is issued to each student after enrolment, showing the course and the units of study in which the student is enrolled, together with the credit point value of the units of study and the HECS weights. Until all fees are paid, it is issued provisionally.

A new confirmation of enrolment form is produced every time a student's enrolment is varied.

Conjoint ventures

Two or more institutions co-operate to provide a unit or course of study to postgraduate coursework students. Arrangements exist between individual departments at the University of Sydney and individual departments at the University of New South Wales (UNSW) and the University of Technology Sydney (UTS), whereby students enrolled for a degree at one institution complete one or more units of study at the other institution to count towards the award program at their 'home' institution.

Continuing professional education

A process which provides a number of programs of continuing education courses for professionals as they move through their career. These programs are presently administered by the Centre for Continuing Education and a number of departments and foundations across the University. This process supports the whole of life learning concept and involves the maintenance of a long term relationship between the student and the University.

Convocation

The body comprising all graduates of the University.

Core unit of study

A unit of study that is compulsory for a particular course or subject area. (See also Unit of study.)

Co-requisite

A unit of study which must be taken in the same semester or year as a given unit of study (unless it has already been completed). These are determined by the faculty or board of studies concerned, published in the faculty handbook and shown in FlexSIS. (See also Prerequisite, Waiver.)

Cotutelle scheme

Agreement between the University and any overseas university for joint supervision and examination of a PhD student as part of an ongoing co-operative research collaboration. If successful, the student receives a doctorate from both universities with each testamur acknowledging the circumstances under which the award was made.

Course

An undertaking of study at the University of Sydney

Award course

A formal course of study that will see attainment of a recognised award.

Award courses are approved by Senate, on the recommendation of the Academic Board. The University broadly classifies courses as undergraduate, postgraduate coursework or postgraduate research. (See also Bachelor's degree, Course rules, Diploma, Doctorate, Major, Master's degree, Minor, PhD, Stream.)

Non-award course

Studies undertaken by students who are not seeking an award from the University. (See also Cross-institutional enrolment.)

Coursework

An award course not designated as a research award course. While the program of study in a coursework award course may include a component of original, supervised, other forms of instruction and learning normally will be dominant.

Research

A course in which at least 66% of the overall course requirements involve students in undertaking supervised research, leading to the production of a thesis or other piece of written or creative work, over a prescribed period of time.

Course alias

A unique five character alpha-numeric code which identifies a University course.

Course code

See Course alias.

Course enrolment status

A student's enrolment status in a course is either 'enrolled' or 'not enrolled'. 'Not enrolled' reasons include: cancelled; suspended; under examination; or terminated. (See also Cancellation, Candidature, Course leave, Enrolment, Enrolment variation, Terminated, Under examination.)

Course leave

Students are permitted to apply for a period away from their course without losing their place. Course leave is formally approved by the supervising faculty for a minimum of one semester. Students on leave are regarded as having an active candidature, but they are not entitled to a student card. At undergraduate level, leave is not counted towards the total length of the course. Students who are absent from study without approved leave may be discontinued and may be required to formally reapply for admission. (See also Progression.)

Course rules

Rules which govern the allowable enrolment of a student in a course. Course rules may be expressed in terms of types of units of study taken, length of study, and credit points accumulated, e.g. a candidate may not enrol in units of study having a total value of more than 32 credit points per semester. Course rules also govern the requirements for the award of the course, e.g. a candidate must have completed a minimum of 144 credit points. (See also Award course, Co-requisite, Pre-requisite.)

Course suspension

See Course leave.

Course transfer

A transfer occurs when a student changes from one course in the University to another course in the University without the requirement for an application and selection process (e.g. from a PhD to a Master's program in the same faculty).

Credit

The recognition of previous studies successfully completed at this University, or another university or tertiary institution recognised by the University of Sydney, as contributing to the requirements of the course to which the applicant requesting such recognition has been admitted. Credit may be granted as specified credit or non-specified credit.

Specified credit

The recognition of previously completed studies as directly equivalent to units of study.

Non-specified credit

A 'block credit' for a specified number of credit points at a particular level. These credit points may be in a particular subject area but are not linked to a specific unit of study. (See also AAM - Annual Average Mark, Waiver, Weighted Average Mark (WAM).)

Credit points

The value of the contribution each unit of study provides towards meeting course completion requirements. Each unit of study will have a credit point value assigned to it. The total number of credit points required for completion of award courses will be specified in the Senate Resolutions relevant to the award course.

Cross-institutional enrolment

An enrolment in units of study at one university to count towards an award course at another university. Cross-institutional enrolments incur a HECS liability or tuition fee charge at the institution at which the unit of study is being undertaken. Students pay compulsory subscriptions to one university only (usually their home university,

i.e. the university which will award their degree). (See also Non-award course).

D

The Data Audit Committee's role is to oversee the integrity and accuracy of the course and unit of study data as strategic University data. It also advises the Academic Board on suggested policy changes related to course and unit of study data. A sub-committee of the VCAC Enrolment Working Party, it is chaired by the Registrar, with membership including the deans, the Student Centre, FlexSIS and the Planning Support Office.

Deadlines (enrolment variations)

See Enrolment variation.

Deadlines (fees)

The University has deadlines for the payment of fees (e.g. HECS, compulsory subscriptions, course fees). Students who do not pay fees by these deadlines may have their enrolment cancelled or they may have a barrier placed on the release of their record. (See also Barrier, Cancellation.)

Dean

The head of a faculty, or the principal or director of a college (such as the Sydney Conservatorium of Music or the Sydney College of Arts).

Dean's certificate

A statement from the Dean certifying that all requirements, including fieldwork and practical work, have been met and that the student is eligible to graduate. Not all faculties use Dean's Certificates. In faculties that do, qualified students have 'Dean's Certificate' noted on their academic record.

Deferment (Deferral)

See Admission (deferment), Course leave.

Degree

See also Award course, Bachelor's degree.

Delivery mode

Indicates how students receive the instruction for a unit of study. The delivery mode must be recorded for each unit as distinct from the attendance mode of the student, i.e. an internal student may take one or more units by distance mode and an external student may attend campus for one or more units.

Distance Education

Where subject matter is delivered in a more flexible manner, such as correspondence notes, and student may only attend campus if required. (See also Extended Semester, Distance Education, International - Off shore)

Intensive on campus

Core content is delivered with support learning in an intensive (one or more days) format on campus. Participation is usually compulsory. Previously this may have been called residential, block mode, or weekend workshop.

On Campus (Normal)

Attendance of scheduled lectures, tutorials etc at a campus of the University.

Department

See School.

Department of Education, Science and Training (DEST)

The Commonwealth Government department responsible for higher education.

Differential HECS

See Higher Education Contribution Scheme (HECS).

Diploma

The award granted following successful completion of diploma course requirements. A diploma course usually requires less study than a degree course. (See also Award course.)

Direct admissions

For some courses, applications may be made directly to the University. Applications are received by faculties or the International Office, and considered by the relevant department or faculty body. Decisions are recorded and letters are forwarded to applicants advising them of the outcome. (See also Admission, UAC.)

Disability information

Students may inform the University of any temporary or permanent disability which affects their life as a student. Disability information is recorded but it is only available to particular authorised users because of its sensitive nature.

Disciplinary action

Undertaken as the result of academic or other misconduct, e.g. plagiarism, cheating, security infringement, criminal activity.

Discipline

A defined area of study, for example, chemistry, physics, economics.

Discipline group

A DEST code used to classify units of study in terms of the subject matter being taught or being researched.

Discontinuation (course)

See Enrolment variation.

Discontinuation (unit of study)

See Enrolment variation.

Dissertation

A written exposition of a topic which may include original argument substantiated by reference to acknowledged authorities. It is a required unit of study for some postgraduate award courses in the faculties of Architecture and Law.

Distance Education

Where a student does not attend campus on a daily basis for a given course or Unit of Study. (See also Delivery mode, Extended Semester.)

Doctorate

A high-level postgraduate award. A doctorate course normally involves research and coursework; the candidate submits a thesis that is an original contribution to the field of study. Entry to a doctorate course often requires completion of a master's degree course. Note that the doctorate course is not available in all departments at the University. (See also Award course, PhD.)

Domestic Student

A student who is not an international student (see also Local Student)

Double degree

A double degree is a program where students are permitted by participating faculties (and/or by specific resolutions within a single award) to transfer between courses in order to complete two awards.

Downgrade

Where a student enrolled in a PhD reverts to a Master's by Research, either on the recommendation of the University on the basis that the research they are undertaking is not at an appropriate level for a PhD; or at the student's own request, for personal or academic reasons.

E

Equivalent Full-Time Student Unit (EFTSU)

The equivalent full-time student unit (EFTSU) is a measure of student load based on the workload for a student undertaking a full year of study in a particular course. A student is then recorded as having generated 1 EFTSU. (See also Load, Stage)

Equivalent Full-Time Student Load (EFTSL)

The equivalent full-time student load (EFTSL) for a year. It is a measure, in respect of a course of study, of the study load for a year of a student undertaking that course of study on a full-time basis. (effective 1 January, 2005)

Embedded courses

Award courses in the Graduate Certificate, Graduate Diploma and Master's degree by coursework sequence which allow unit of study credit points to count in more than one of the awards, e.g. the Graduate Certificate in Information Technology, Graduate Diploma in Information Technology and Master of Information Technology.

Enrolment

A student enrolls in a course by registering with the supervising faculty in the units of study to be taken in the coming year, semester or session.

Commencing

An enrolment is classified as commencing if a student has enrolled in a particular degree or diploma for the first time.

Continuing

Students already in a course at the University re-enrol each year or semester. Most continuing students are required to pre-enrol. (See also Pre-enrolment.)

Enrolment list

A list of all currently enrolled students in a particular unit of study. (See also Unit of study.)

Enrolment status

See Course enrolment status.

Enrolment variation

Students may vary their enrolment at the beginning of each semester. Each faculty determines its deadlines for variations, but HECS liability depends on the HECS census date. (See also HECS.)

Examination

A set of questions or exercises evaluating on a given subject given by a department or faculty. (See Examination period, Assessment.)

Examination period

The time set each semester for the conduct of formal examinations.

Examiner (coursework)

The person assessing either the written/oral examination, coursework assignments, presentations, etc of a student or group of students.

Exchange student

Either a student of the University of Sydney who is participating in a formally agreed program involving study at an overseas university or an overseas student who is studying here on the same basis. The International Office provides administrative support for some exchanges.

Exclusion

A faculty may ask a student whose academic progress is considered to be unsatisfactory to 'show good cause' why the student should be allowed to re-enrol. If the faculty deems the student's explanation unsatisfactory, or if the student does not provide an explanation, the student may be excluded either from a unit of study or from a course or faculty. An excluded student may apply to the faculty for permission to re-enrol. Normally, at least two years must have elapsed before such an application would be considered.

University policy relating to exclusion is set out in the University Calendar. (See also Progression, Senate appeals.)

Exemption

A decision made at a sub-unit of study level to allow a student to complete a unit of study without also completing all the prescribed components of coursework and/or assessment. (See also Credit, Waiver.)

Expulsion

The ultimate penalty of disciplinary action is to expel the student from the University. The effect of expulsion is:

- the student is not allowed to be admitted or to re-enrol in any course at the University;
- the student does not receive their results;
- the student is not allowed to graduate; and
- the student does not receive a transcript or testamur.

Extended semester

A distance-learning student may be allowed more time to complete a module or program if circumstances beyond the student's control, e.g. drought, flood or illness, affect the student's ability to complete the module or program in the specified time. (See also Distance Education.)

External

See Attendance mode, Distance Education.

External transcript

A certified statement of a student's academic record printed on official University security paper. It includes the student's name, any credit granted, all courses the student was enrolled in and the final course result and all units of study attempted within each course to-

gether with the result. It also acknowledges prizes the student has received. Marks can be included or omitted, as required. (See also Academic transcript, Internal transcript.)

F**Faculty**

A formal part of the University's academic governance structure, consisting mainly of academic staff members and headed by a dean, which is responsible for all matters concerning the award courses that it supervises. Usually, a faculty office administers the faculty and student or staff inquiries related to its courses. The University Calendar sets out the constitution of each of the University's faculties. (See also Board of studies, Supervising faculty.)

Fee-paying students

Students who pay tuition fees to the University and are not liable for HECS.

Flexible learning

See Delivery mode, Distance Education.

Flexible Start Date

Full fee-paying distance students are not restricted to the same enrolment time frames as campus-based or HECS students.

Flexible Student Information System (FlexSIS)

The computer-based Flexible Student Information System at the University of Sydney. FlexSIS holds details of courses and units of study being offered by the University and the complete academic records of all students enrolled at the University.

Formative assessment

See Assessment.

Full-time student

See also Attendance Pattern, EFTSU.

G**Grade**

The outcome for a unit of study linked with a mark range. For example, a mark in the range 85-100 attracts the grade 'high distinction' ('HD'). (See also Mark.)

Grade	Description	Comment
HD	High distinction	a mark of 85-100
D	Distinction	a mark of 75-84
CR	Credit	a mark of 65-74
P	Pass	a mark of 50-64
R	Satisfied requirements	This is used in pass/fail only outcomes.
UCN	Unit of study continuing	Used at the end of semester for units of study that have been approved to extend into a following semester. This will automatically flag that no final result is required until the end of the last semester of the unit of study.
PCON	Pass (concessional)	A mark of 46-49. Use of this grade is restricted to those courses that allow for a concessional pass of some kind to be awarded. A student may re-enrol in a unit of study for which the result was PCON. Each faculty will determine and state in its course regulations what proportion, if any, may count - e.g., 'no more than one sixth of the total credit points for a course can be made up from PCON results'.
F	Fail	A mark of 0-49. This grade may be used for students with marks of 46-49 in those faculties which do not use PCON.
AF	Absent fail	Includes non-submission of compulsory work (or non-attendance at compulsory labs, etc) as well as failure to attend an examination.
W	Withdrawn	Not recorded on an external transcript. This is the result that obtains where a student applies to discontinue a unit of study by the HECS census date (i.e. within the first four weeks of enrolment).

Abbreviations and glossary

DNF	Discontinued - not to count as failure	Recorded on external transcript. This result applies automatically where a student discontinues after the HECS Census Date but before the end of the seventh week of the semester (or before half of the unit of study has run, in the case of units of study which are not semester-length). A faculty may determine that the result of DNF is warranted after this date if the student has made out a special case based on illness or misadventure.
INC	Incomplete	This result is used when examiners have grounds (such as illness or misadventure) for seeking further information or for considering additional work from the student before confirming the final result. Except in special cases approved by the Academic Board, this result will be converted to a normal permanent passing or failing grade either: by the dean at the review of examination results conducted pursuant to section 2 (4) of the Academic Board policy 'Examinations and Assessment Procedures'; or automatically to an AF grade by the third week of the immediately subsequent academic session. Deans are authorised to approve the extension of a MINC grade for individual students having a valid reason for their incomplete status.
UCN	Incomplete	A MINC or INC grade is converted, on the advice of the dean, to UCN when all or many students in a unit of study have not completed the requirements of the unit. The students may be engaged in practicum or clinical placements, or in programs extending beyond the end of semester (e.g. Honours).

Graduand

A student who has completed all the requirements for an award course but has not yet graduated. (See also Graduation, Potential graduand.)

Graduate

A person who holds an award from a recognised tertiary institution. (See also Graduand, Graduation.)

Graduate Certificate

See Award course.

Graduate Diploma

See Award course.

Graduation

The formal conferring of awards either at a ceremony or in absentia. (See also In absentia, Potential graduand.)

Graduation Ceremony

A ceremony where the Chancellor confers awards upon graduands.

Group work

Means a formally established project to be conducted by a number of students in common, resulting in a single piece of assessment or a number of associated pieces of assessment. (See also Legitimate cooperation)

H

Head of Department (HOD)

The head of the academic unit which has responsibility for the relevant unit of study, or equivalent program leader.

Higher Doctorates

See Award course.

HECS (Higher Education Contribution Scheme)

All students, unless they qualify for an exemption, are obliged to contribute towards the cost of their education under the Higher Education Contribution Scheme. These contributions are determined annually by the Commonwealth Government. This scheme will cease in its current form from 1 January, 2005

Honorary degrees

A degree *honoris causa* (translated from the Latin as 'for the purpose of honouring') is conferred on a person whom the University wishes

to honour. Long-standing full-time members of the University's academic staff who are not graduates of the University may be considered by Senate, upon their retirement, for admission ad eundem gradum, to an appropriate degree of the University.

Honours

Some degrees may be completed 'with Honours'. This may involve either the completion of a separate Honours year or additional work in the later years of the course or meritorious achievement over all years of the course. Honours are awarded in a class (Class I, Class II – which may have two divisions or, Class III).

NSW Higher School Certificate (HSC)

The NSW Higher School Certificate (HSC), which is normally completed at the end of year 12 of secondary school. The UAI (Universities Admission Index) is a rank out of 100 that is computed from a student's performance in the HSC.

I

In absentia

Latin for 'in the absence of'. Awards are conferred in absentia when graduands do not, or cannot, attend the graduation ceremony scheduled for them. Those who have graduated in absentia may later request that they be presented to the Chancellor at a graduation ceremony. (See also Graduation.)

Instrumental supervisor / teacher

All students at the Sydney Conservatorium of Music and BMus students on the Camperdown Campus have an instrumental teacher appointed. (See also Advisor, Associate supervisor, Research supervisor, Supervision.)

Internal Mode

See Attendance mode.

Internal transcript

A record of a student's academic record for the University's own internal use. It includes the student's name, student identifier (SID), address, all courses in which the student was enrolled and the final course result, and all units of study attempted within each course together with the unit of study result. (See also Academic transcript, External transcript.)

International student

Any student who is not an Australian or New Zealand citizen or a permanent resident of Australia is an international student. An international student is required to hold a visa that allows study in Australia and may be liable for international tuition fees

Fee paying

A private International Student who is liable to pay tuition fees for their studies with the University.

Fee Paying - Outgoing Exchange

An international fee-paying student undertaking short term study at a recognised overseas institution with which the University has a student exchange agreement. Exchange study counts towards the student's University of Sydney award and students remain enrolled in their University of Sydney course during the period of exchange.

International - Cross Institutional

An international fee paying student undertaking non-award study at the University on a cross-institutional basis. They are liable to pay fees for the study they undertake at the University, but there is no compliance reporting requirement, which rest with their 'home' institution.

International - Sponsored

A private International Student who are fully sponsored for their tuition; their sponsorship may also cover Overseas Health Cover and Compulsory Subscriptions.

Offshore Studies

International offshore students undertake their program of study at one of the University's offshore campuses and hence do not enter Australia; therefore they do not require a visa. They are distinct from international students who are on outbound exchange programs as they never enter Australia during their program of study.

Short Course

An international fee-paying student undertaking a short course with the University of Sydney comprising such programs as international development programs, executive training or study visits. The study undertaken by these students is non award and generally a student visa is not required.

Sponsored Award

An international student sponsored by the Australian government, undertaking a program of study at the University. Currently Australian Development Scholarships holders, funded by AusAID, are the only students in this category. These students are fully sponsored for their tuition and other costs such as travel and health cover, and are paid a stipend.

Study Abroad

An international student who is undertaking short-term study at the University under the Study Abroad scheme. Study Abroad students must have completed at least one year of study towards a degree at a recognised institution in their home country and are continuing towards the degree of their home institution.

(See also Local student, Student type.)

J**Joining fee**

Students enrolling for the first time pay a joining fee in addition to the standard subscription for the University of Sydney Union or equivalent student organisation. (See also Compulsory subscription.)

L**Leave**

See Course leave.

Legitimate co-operation

Any constructive educational and intellectual practice that aims to facilitate optimal learning outcomes through interaction between students. (See also Group work.)

Life membership

Under some circumstances (e.g. after five full-time years of enrolments and contributions) students may be granted life membership of various organisations. This means they are exempt from paying yearly fees. (See also Compulsory subscriptions.)

Load

The sum of the weights of all the units of study in which a student is enrolled. The weight is determined by the proportion of a full year's work represented by the unit of study in the degree or diploma for which the student is a candidate. Student load is measured in terms of Equivalent Full-Time Student Units (EFTSU). (See also Equivalent Full-Time Student Units (EFTSU).)

Local student

Either an Australian or New Zealand citizen or Australian permanent resident. New Zealand citizens are required to pay their Higher Education Contribution Scheme (HECS) fees upfront. (See also Domestic student, HECS, International student.)

M**Major**

A field of study, chosen by a student, to represent their principal interest this would consist of specified units of study from later stages of the award course. Students select and transfer between majors by virtue of their selection of units of study. One or more majors may be awarded upon the graduands assessment of study. (See also Award course, Minor, Stream.)

Major Timetable Clash

The term used when a student attempts to enrol in units of study which have so much overlap in the teaching times that it has been decided that students must not enrol in the units simultaneously.

Mark

An integer (rounded if necessary) from 0 to 100 indicating a student's performance in a unit of study. (See also Grade.)

Master's degree

A postgraduate award. Master's degree courses may be offered by coursework, research only or a combination of coursework and research. Entry to the course often requires completion of an Honours year at an undergraduate level. (See also Award course.)

Method of candidature

A course is either a research course or a coursework course and so the methods of candidature are 'research' and 'coursework'. (See also Course - Coursework, Course - Research.)

Minor

Studies undertaken to support a Major. Requiring a smaller number of credit points than a major students select and transfer between minors (and majors) by virtue of their selection of units of study. One or more minors may be awarded upon the graduand's assessment of study. (See also Award course, Major, Stream.)

Mixed Mode

See Attendance mode.

Mutually exclusive units of study

See Prohibited combinations of units of study.

N**Non-award course** (see Course)**Non-standard session**

A teaching session other than the standard February and August sessions - e.g. Summer School, in which units of study are delivered and assessed in an intensive mode during January. (See also Semester, Session.)

O**Orientation Week**

Orientation or 'O Week', takes place in the week before lectures begin in Semester 1. During O Week, students can join various

clubs, societies and organisations, register for courses with departments and take part in activities provided by the University of Sydney Union.

P

Part-time student

See Attendance Mode, Attendance Pattern, Equivalent Full-Time Student Units (EFTSU).

Permanent home address

The address used for all official University correspondence with a student, both inside and outside of semester time (e.g. during semester breaks), unless the student provides a different overridden by semester address for use during the semester. (See also Semester address.)

PhD

The Doctor of Philosophy (PhD) and other doctorate awards are the highest awards available at the University. A PhD course is normally purely research-based; the candidate submits a thesis that is an original contribution to the field of study. (See also Award course, Doctorate.)

Plagiarism

Presenting another person's ideas, findings or work as one's own by copying or reproducing them without the acknowledgement of the source. (See also Academic dishonesty.)

Postgraduate

A term used to describe a course leading to an award such as graduate diploma, a master's degree or PhD which usually requires prior completion of a relevant undergraduate degree (or diploma) course. A 'postgraduate' is a student enrolled in such a course. (See also Course – Coursework, Course - Research)

Postgraduate Education Loans Scheme (PELS)

An interest-free loans facility for eligible students who are enrolled in fee-paying, postgraduate non-research courses. It is similar to the deferred payment arrangements available under the Higher Education Contribution Scheme (HECS). This scheme will cease in this manner from 1 January, 2005, and will be replaced by the FEE-HELP scheme.

Potential graduand

A student who has been identified as being eligible to graduate on the satisfactory completion of their current studies. (See also Graduand, Graduation.)

Pre-enrolment

Pre-enrolment - also known as provisional re-enrolment - takes place in October, when students indicate their choice of unit of study enrolment for the following year. After results are approved, pre-enrolment students are regarded as enrolled in those units of study for which they are qualified. Their status is 'enrolled' and remains so provided they pay any money owing and comply with other requirements by the due date. Students who do not successfully pre-enrol in their units of study for the next regular session are required to attend the University on set dates during the January/February enrolment period. (See also Enrolment.)

Prerequisite

A unit of study that is required to be successfully completed before another unit of study can be attempted. Pre-requisites can be mandatory (compulsory) or advisory. (See also Assumed knowledge, Co-requisite, Waiver, Qualifier.)

Prizes

Awarded in recognition of outstanding performance, academic achievement or service to the community or University.

Probationary candidature

A student who is enrolled in a postgraduate course on probation for a period of time up to one year. The head of department is required to consider the candidate's progress during the period of probation and make a recommendation for normal candidature or otherwise to the faculty.

Professional Practice

Students undertake placement in a professional practice as a part of their course requirements. May require University approved supervision. Professional placements are located in a wide range of professional practices environments, and may not require additional criteria to be fulfilled.

Progression

Satisfactory progression is satisfying all course and faculty rules (normally assessed on an annual basis) to enable the completion of the chosen award within the (maximum) completion time allowed. (See also Exclusion.)

Prohibited Combinations of units of study

When two or more units of study contain a sufficient overlap of content, enrolment in any one such unit prohibits enrolment in any other identified unit. (See also Unit of Study.)

Provisional re-enrolment

See Pre-enrolment.

Q

Qualification

An academic attainment recognised by the University.

Qualifier

A mandatory (compulsory) pre-requisite unit of study which must have a grade of Pass or better. (See also Assumed knowledge, Co-requisite, Pre-requisite, Waiver.)

R

Recycling

The submission for assessment of one's own work, or of work which substantially the same, which has previously been counted towards the satisfactory completion of another unit of study, and credited towards a university degree, and where the examiner has not been informed that the student has already received credit for that work.

Registration

In addition to enrolling with the faculty in units of study, students must register with the department responsible for teaching each unit. This is normally done during Orientation Week. Note that unlike enrolment, registration is not a formal record of units attempted by the student.

Research course

See Course - research.

Research supervisor

A supervisor is appointed to each student undertaking a research postgraduate degree. The supervisor will be a full-time member of the academic staff or a person external to the University recognised for their association with the clinical teaching or the research work of the University. A research supervisor is commonly referred to as a supervisor. (See also Advisor, Associate supervisor, Instrumental supervisor/teacher, Supervision.)

Result processing

Refers to the processing of assessment results for units of study. For each unit of study, departments tabulate results for all assessment activities and assign preliminary results. (See also Assessment, Formative assessment, Examination period, Summative assessment)

Result processing schedule

The result processing schedule will be determined for each academic cycle. All departments and faculties are expected to comply with this schedule. (See also Assessment, Examination period, Result processing.)

Result

The official statement of a student's performance in each unit of study attempted as recorded on the academic transcript, usually expressed as a mark and grade. (See also Grade, Mark.)

Research Training Scheme (RTS)

The RTS provides Commonwealth-funded higher degree by research (HDR) students with an 'entitlement' to a HECS exemption for the duration of an accredited HDR course, up to a maximum period of four years' full-time equivalent study for a Doctorate by research and two years' full-time equivalent study for a Masters by research.

S**Scholarships**

Financial or other form of support made available to enable students to further their studies. (See also Bursaries)

School

A school or academic unit shall encourage and facilitate teaching, scholarship and research and coordinate the teaching and examining duties of members of staff in the subjects or courses of study with which it is concerned.

Semester

A half-yearly teaching session whose dates are determined by the Academic Board. Normally all undergraduate sessions will conform to the semesters approved by the Academic Board. Any offering of an undergraduate unit not conforming to the semester dates (non-standard session) must be given special permission by the Academic Board. (See also Session, Non-standard session.)

Semester address

The address to which all official University correspondence is sent during semester time, if it is different to the permanent address.

Senate

The governing body of the University. (See the University Calendar for more details of its charter and powers.)

Senate appeals

Senate appeals are held for those students who, after being excluded by a faculty from a course, appeal to the Senate for readmission. While any student may appeal to the Senate against an academic decision, such an appeal will normally be heard only after the student has exhausted all other avenues, i.e. the department, faculty, board of study and - in the case of postgraduates -, the Committee for Graduate Studies. (See also Exclusion.)

Session

Any period of time during which a unit of study is taught. A session differs from a semester in that it need not be a six-month teaching period, but it cannot be longer than six months. Each session maps to either Semester 1 or 2 for DEST reporting purposes. Session offerings are approved by the relevant dean, taking into account all the necessary resources, including teaching space and staffing. The Academic Board must approve variation to the normal session pattern. (See also Semester, Non-standard session.)

Session address

See Semester address.

Short Course

A fee paying student undertaking a short course with the University of Sydney comprising professional development, executive training etc. The study undertaken by these students is a non-award course.

Show Cause

See Progression, Exclusion

Special consideration

Candidates who suffer serious illness or misadventure which may affect performance in any assessment, may request that they be given special consideration in relation to the determination of their results.

Sponsorship

Financial support of a student by a company or government body.

Stage

A normal full time course of study taken in a year. (See also Course Rules, EFTSU, Progression)

Stream

A defined award course, which requires the completion of set units of study as specified by the course rules for the particular stream, in addition to the core program specified by the course rules. A stream will appear with the award course name on testamurs, e.g. Bachelor of Engineering in Civil Engineering (Construction Management). (See also Award course, Major, Minor.)

Student

Student means a person enrolled as a candidate for an award course or unit of study.

Student Identifier (SID)

A 9-digit number which uniquely identifies a student at the University.

Student ID Card

All students who enrol are issued with an identification card. The card includes the student's name, SID, the course code, a library borrower's bar code and a passport-style photo. The card identifies the student as eligible to attend classes and must be displayed at formal examinations. It must be presented to secure student concessions and to borrow books from all sections of the University Library.

Student Progress Rate (SPR)

A calculation which measures the rate at which load undertaken is passed annually in each award program.

Student type

Student type identifies whether a student is local or international and the type of study the student is undertaking. (See also International student, Domestic student, Exchange Student.)

Study Abroad Program

A scheme administered by the International Office which allows international students who are not part of an exchange program to take units of study at the University of Sydney, but not towards an award program. In most cases the units of study taken here are credited towards an award at their home institution. (See also Exchange student.)

Subject Area

A unit of study may be associated with one or more subject areas. The subject area can be used to define prerequisite and course rules, e.g. the unit of study 'History of Momoyama and Edo Art' may

Abbreviations and glossary

count towards the requirements for the subject areas 'Art History and Theory' and 'Asian Studies'.

Summative assessment

See Assessment.

Summer School

See Sydney Summer School.

Supervising Faculty

The faculty which has the responsibility for managing the academic administration of a particular course, i.e. the interpretation and administration of course rules, approving students' enrolments and variations to enrolments. Normally the supervising faculty is the faculty offering the course. However, in the case of combined courses, one of the two faculties involved will usually be designated the supervising faculty. Further, in the case where one course is jointly offered by two or more faculties (e.g. the Liberal Studies course), a joint committee may make academic decisions about candidature and the student may be assigned a supervising faculty for administration.

Supervision

Refers to a one-to-one relationship between a student and a nominated member of the academic staff or a person specifically appointed to the role. (See also Advisor, Associate supervisor, Instrumental supervisor/teacher, Research supervisor.)

Suppression of results

Results for a particular student can be suppressed by the University when the student has an outstanding debt to the University; or the student is facing disciplinary action. A student may also request a suppression for personal reasons.

Suspension

See Course leave.

Sydney Summer School

A program of accelerated, intensive study running for approximately 6 weeks during January and February each year. Both undergraduate and postgraduate units are offered. Summer School provides an opportunity for students at Sydney and other universities to catch up on needed units of study, to accelerate completion of a course or to undertake a unit that is outside their award course. All units attract full fees and enrolled students are also liable for compulsory subscriptions. Some fee-waiver scholarships are available.

T

Teaching department

See School.

Teaching End Date

Official finish date of formal timetabled classes.

Teaching Start Date

Official commencement date of formal timetabled classes

Terminated

Term used when a student's candidature has been officially closed because they are not able to complete the Course requirements. (See also Candidature.)

Testamur

A certificate of award provided to a graduand, usually at a graduation ceremony. The Award conferred will be displayed along with other appropriate detail.

Thesis

A major work that is the product of an extended period of supervised independent research. (See also Course - Research.)

Timetable

The schedule of lectures, tutorials, laboratories and other academic activities that a student must attend.

Transcript

See Academic transcript.

Transfer

See Course transfer.

Tuition fees

Tuition fees may be charged to students in designated tuition fee-paying courses. Students who pay fees are not liable for HECS.

U

Universities Admissions Centre (UAC)

The UAC receives and processes applications for admission to undergraduate courses at recognised universities in NSW and the ACT. Most commencing, local undergraduate students at the University apply through the UAC.

Universities Admission Index (UAI)

A measure of overall academic achievement in the HSC that assists universities in ranking applicants for university selection. The UAI is based on the aggregate of scaled marks in ten units of the HSC, and is a number between 0.00 and 100.00 with increments of 0.05.

Under Examination

Indicates that a research student has submitted their written work (thesis) for assessment, and is awaiting the finalisation of the examiners' outcome and recommendation.

Undergraduate

A term used to describe both a course leading to a diploma or bachelor's degree and a student enrolled in such a course.

Unit of study

Unit of study or unit means a stand-alone component of an award course. Each unit of study is the responsibility of a department. (See also Prohibited Combinations of Unit of Study.)

Unit of study enrolment status

The enrolment status indicates whether the student is still actively attending the unit of study (i.e. currently enrolled) or is no longer enrolled. (See also Discontinuation or Cancellation.)

Unit of study level

Units of study are divided into Junior, Intermediate, Senior, Honours, Year 5, and Year 6. Most majors consist of 32 Senior credit points in a subject area (either 3000 level units of study or a mix of 2000 and 3000 level units of study).

University

Unless otherwise indicated, University in this document refers to the University of Sydney.

University Medal

A faculty may recommend the award of a University Medal to a student qualified for the award of an undergraduate Honours degree (or some master's degrees), whose academic performance is judged to be outstanding.

Upgrade

Where a student enrolled in a Master's by research course is undertaking research at such a standard that either the University recommends that the student upgrade their degree to a PhD, or the student seeks to upgrade to a PhD and this is supported by the University.

USYDnet

The University of Sydney's intranet system. It provides access to other services such as directories (maps, staff and student, organisations), a calendar of events (to which staff and students can submit entries), and a software download area.

V**Variation of enrolment**

See Enrolment variation.

Vice-Chancellor and Principal

The chief executive officer of the University, responsible for its leadership and management. The Vice-Chancellor and Principal is head of both academic and administrative divisions.

W**Waiver**

In a prescribed course, a faculty may waive the pre-requisite or co-requisite requirement for a unit of study or the course rules for a particular student. Unlike credit, waivers do not involve a reduction in the number of credit points required for a course. (See also Credit, Exemption.)

Winter School

An intensive session offered by the University during the mid-year break

Weighted Average Mark (WAM)

This mark uses the unit of study credit point value in conjunction with an agreed "weight". The formula for this calculation is:

$$(\text{mark} * \text{credit_pt_value} * \text{level weight}) / (\text{credit_pt_value} * \text{level weight})$$

(sums over all UoS completed in the selected period)

The mark is the actual mark obtained by the student for the unit of study, or in the case of a failing grade with no mark – 0. Pass/Fail assessed subjects and credit transfer subjects (from another institution) are excluded from these calculations; however, the marks from all attempts at a unit of study are included. (Effective from 1 January 2004.)

In addition, faculties may adopt other average mark formulae for specific progression or entry requirements. If such a formula is not specified in the faculty resolutions, the formula outlined above is used. (See also WAM Weight)

WAM Weight

A weight assigned to each unit of study to assist in the calculation of WAMs.

Y**Year of First Enrolment (YFE)**

The year in which a student first enrolls at the University. (See also Commencement date.)

Youth Allowance

Youth Allowance is payable to a full-time student or trainee aged 16–24 years of age who is enrolled at an approved institution such as a school, college, TAFE or university, and undertaking at least 15 hours a week face-to-face contact.
