Vince Cakic, Sydney Medical School (2013)

both assisted with locating many complaints during vacation placements.

To tilt at windmills: “To tilt at windmills” is a venerable English idiom meaning to pursue an unrealistic, impractical, or impossible goal, or to battle imaginary enemies. In current usage, “tilting at windmills” carries connotations of engaging in a noble but unrealistic (usually wildly unrealistic) effort, an endeavour which may garner the admiration of onlookers but which usually strikes other people as delusional. <http://www.word-detective.com/2009/03/tilting-at-windmills/>

Note to readers. In January 2012, I commenced building the collection found below of ever-growing claims made about health problems in humans and animals that wind farm opponents attribute to exposure to wind turbines. All the claims below are referenced to their web sources, mostly websites of opponents of wind farms and submissions they have made to governments.

It was originally housed on my website at the University of Sydney, until a malware “bot” virus destroyed the site in April 2014.

Opponents of wind turbines have reacted badly to this list which had been downloaded many thousands of times from its previous location. They argue that by publishing it and regularly updating it with new claims, I am thereby “ridiculing” people who say they are ill.

This is a peculiar claim which suggests that those who actively publicise these alleged problems want to walk on both sides of the street: on the one hand, they continue to publicise particular symptoms and diseases because they wish to promote awareness about the harms they believe are being caused. They then say that it is disgraceful that all such complaints should be placed together here, because ... well ... it invites ridicule to see almost every conceivable health problem being attributed to wind turbines, especially because in regions like Europe, turbines are very common in many nations.

This list is simply a compendium of all claims made by others: it is not a list that I have somehow “made up”.

I will be updating this list four times a year from now on. If you are aware of any extra claims, please send them with hyperlinks to simon.chapman@sydney.edu.au

When you read the list below, you may ask whether you can recall any account of any threat to humanity which poses a greater threat. Old Testament accounts of pestilences and plagues seem mild compared to the effects attributed to wind turbines. How can this be so? Here, the words of Sarah Laurie from Australia’s Waubra Foundation need no comment:

“The Waubra Foundation have focused most of our attention on the issue of infrasound and low frequency noise, however there may well be other toxic agents involved, which some researchers have identified are present in these environments, including EMF, ground borne vibrations, and rapid fluctuations in barometric pressure, sufficient to explode bats lungs and **at times with sufficient energy to perceptibly rock stationary cars even further than a kilometer away from the nearest wind turbine.**”

Sarah Laurie <http://docs.wind-watch.org/Laurie-Collector.pdf>

Laurie also believes that wind turbines can make people’s lips vibrate “as from a distance of 10km away” <http://reneweconomy.com.au/2012/bad-day-in-court-for-anti-wind-campaigner-sarah-laurie>

An October 2012 submission by the Tharpaland International Retreat Centre in Scotland (a Buddhist centre) to an Australian Senate Committee convened by Victorian DLP Senator John Madigan, spelled out the full extent of the apocalypse that threatens any nation embracing wind power:

- A decline in general public health and well-being, including a major increase in cancer, heart disease and immune-deficiency related diseases, entailing illness, suicide and violent crime, adding a further burden on the health system.
- A decline in standards throughout the educational system, due to a degeneration of learning ability, which depends upon the ability to develop concentration.
- The main economic sector within the Scottish economy – tourism - could be wiped out.
- Spiritual centres and communities could be forced to close and disperse

I do not believe I have ever read a more comprehensive and all-inclusive statement than this of the alleged perils of wind farms to the very fabric of a nation.

The List

	DATE	HEALTH PROBLEM	QUOTE	SOURCE
1.	2012-05-25	Accelerated ageing Human Other	My wife and I have aged over five years in the past two years.	National Wind Watch
2.	2012-04-17	ADHD, aggravated Human Psychiatric	with Autism and Attention Deficit Disorder or Attention Deficit Hyperactivity Disorder (ADD/ADHD) are particularly vulnerable to the negative effects of intrusive noise.	Quixote's Last Stand
3.	2010-07-01	Aggression Cattle Behavioural	the cattle became very aggressive at times	WindVOICe (Wind Vigilance for Ontario Communities)
4.	2012-05-25	Alcohol abuse Human Psychiatric	After the wind turbine started, she said, "I witnessed his decline, with his worsening irritability, anger, drinking, and severe depression, and he again became difficult to live with."	National Wind Watch
5.	2010-07-01	Allergy-like sensations Human Immunological	nasal cavity felt like I had allergies, but no mucus	WindVOICe (Wind Vigilance for Ontario Communities)
6.	2011-11-04	Anger Human Psychiatric	Rage attacks occurred in some individuals and sudden attacks of nonconvulsive mental defects were... caused by low frequency vibrations...	National Wind Watch
7.	2011-07-25	Angina pectoris Human Cardiovascular	She experiences "cardiac rhythm disorders... high blood pressure... angina pectoris, palpitations..."	North American Platform Against Wind Power

8.	2010-07-01	Appetite loss Human Constitutional	Last year in March 2008 for one week I suffered nasty headaches, I had no appetite and could not sleep.	WindVOICe (Wind Vigilance for Ontario Communities)
9.	2012-04-22	Arthritis, aggravated Human Inflammatory	... Inflammatory conditions like arthritis or inflammatory bowel disease, can actually be exacerbated by exposure to the turbines.	Waubra Foundation
10.	2012-03-01	Asthma, aggravated Human Respiratory	Some of the conditions which have been reported... include exacerbations of pre-existing but stable inflammatory conditions such as arthritis, lupus, and asthma.	Waubra Foundation
11.	2012-04-17	Autism, aggravated Human Development	Children with Autism and Attention Deficit Disorder or Attention Deficit Hyperactivity Disorder (ADD/ADHD) are particularly vulnerable to the negative effects of intrusive noise.	Quixote's Last Stand
12.	2012-07-09	Aversive learning Human Neurocognitive	Balance related neural signals affect a variety of brain functions, including... aversive learning.	Senator Chris Back
13.	2012-11-26	Back pain Human Musculoskeletal	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage II is moderate and occurs after 4-10 years of exposure. It causes chest pain, definite mood swings, back pain, fatigue, fungal, viral and parasitic skin infections, inflammation of stomach lining, pain on urination and blood in urine, conjunctivitis, and allergies.	Killerculture.com
14.	2013 undated	Balance disturbance Human Vestibulo-auditory	"Residents have also noticed quite marked rapid fluctuations in air pressure when outside, especially within 1 – 2km of operating wind turbines, sufficient to knock them off their feet or bring some men to their knees when out working in their paddock, and have been reported by farmers to perceptibly rock stationary cars."	Waubra Foundation
15.	2012-05-10	Bees, threatened extinction Insects Mortality	Wind farms started to drastically increase during 2004 and 2005. Oddly enough this is the same time that massive amounts of honey bees started to be reported missing. The airborne sounds and vibrations put	PaigeMclellansBlog

			off by wind turbines mess with the bees communications and also their ability to navigate. As wind turbines spread so do their effect on bees. We cannot allow bees to go extinct as they are a unique and valuable species.	
16.	2012-08-12	Behavioural changes Dog Behavioural	She [dog] started losing muscle tone, lying in front of heater with paws over ears, and gnawing on pebbles and could not jump any more.	Ill Wind Reporting
17.	2010-07-01	Behavioural problems Human Psychiatric	I feel both my children are "different" in their behaviour - two happy, well behaved children have become irritable and unreasonable w/tempers and agitation	WindVOICe (Wind Vigilance for Ontario Communities)
18.	2012-04-22	Behavioural problems Horse Behavioural	Symptoms that the Ontario report cites include... horses exhibiting behavior and handling issues.	East County Magazine
19.	2012-03-28	Behavioural problems Sheep Behavioural	[Sheep are] very sensitive to noise and to disturbance. This will impact their ability to go where they're used to going.	ABC 10 News
20.	2012-09-08	Benzodiazepine abuse Human Psychiatric	So how come I can't sleep in my own house any more? How come sometimes I'm having to take 15 Valium tablets a day?	Daily Mail
21.	2011-11-04	Birth defects, crossed beaks Chicken Reproduction	... Abnormalities in farm animals near current large wind turbines, [include] chickens that are hatching with crossed beaks and other abnormalities.	National Wind Watch
22.	2010-06-18	Birth defects, missing eyeballs and tails Cattle Reproduction	Cows suffer spontaneous abortion, problems calving, birth defects such as missing eyeballs and tails - all since the wind turbines.	Better Plan, Wisconsin
23.	2012-04-21	Birth defects, sheep Sheep Reproduction	... A spike in sheep deformities...	The Australian
24.	2012-03-07	Blurred vision Human Ophthalmologic	The symptoms of Wind Turbine Syndrome include classic symptoms of vestibular disturbance... [including] ...blurred vision...	Wind Turbine Syndrome

25.	2011-11-04	Bowel cancer Human Cancer	[Someone may] get a cancer in the lung or bowel. Few doctors today would make the connection with the wind farm.	National Wind Watch
26.	2012-04-22	Bowels, loss of Human Gastrointestinal	"Transmission of long wave-length sound creates biophysical effects, nausea, loss of bowels, disorientation, vomiting, potential organ damage or death may occur," the report found.	East County Magazine
27.	2012-03-01	Brain pathology Human Neurological	Other relevant pathologies noted by that group include brain pathology and lung ciliary function disturbances.	Waubra Foundation
28.	2015-08-12	Brain development Human Neurological	"the development of the brain [in infants] doesn't happen"	Alan Jones (Sky TV)
29.	2011-11-04	Brain tumours Human Cancer	Unusual malignant tumours were seen in the lungs, colon and brain... [and were caused by] low frequency vibrations.	National Wind Watch
30.	2012-03-01	Brain-Derived Neurotrophic Factor, reduced Human Neurological	[There exist] connections between chronically elevated cortisol and decreased Brain Derived Neurotrophic Factor (BDNF).	Waubra Foundation
31.	none stated	Breast pain Human Musculoskeletal	Many of the subjects reported the development of acute physical symptoms including... breast pain.	Tharpaland International Retreat Centre
32.	2012-05-25	Breathing difficulty Human Respiratory	Waking at night with labored breathing and a pounding chest are common occurrences.	National Wind Watch
33.	2012-11-26	Bronchitis Human Respiratory	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage I is mild and occurs after 1-4 years of exposure. It causes slight mood swings, indigestion and heartburn, mouth/throat infections, and bronchitis.	Killerculture.com
34.	2012-05-24	Bruxism Human Musculoskeletal	I have tension and feel stress in my body. My dentist says I am grinding my teeth more intensely.	Falmouth Board of Health
35.	2012-04-22	Cardiac arrhythmias	Vibroacoustic disease (VAD)... can cause permanent tissue and organ damage as well as cardiac	East County Magazine

		Human Cardiovascular	arrhythmias, hypertension and more.	
36.	2012-09-08	Cataracts Human Ophthalmologic	[The resident], a diabetic since the age of 19, found her blood glucose levels rocketing – forcing her to take more insulin and causing her to develop a cataract, she says.	Daily Mail
37.	2010-07-01	Chest pain Human Respiratory	When I began having chest pains I did go to my doctor.	WindVOICe (Wind Vigilance for Ontario Communities)
38.	2013-10-22	Chest pain Human Respiratory	“We are offering a meditation centre for people to come to as a retreat. How can we do this when there are huge wind turbines in the neighbourhood whirling away?” said Diane Chen, property development and special projects manager for Cham Shan Temple. “We believe in energy. This is upsetting the Chi of the whole place.”	Peterborough Examiner (Canada)
39.	none stated	Cognitive dysfunction Human Psychiatric	The reported psychological symptoms include decreased quality of life, stress, anxiety, depression, cognitive dysfunction, anger, grief, and a sense of injustice.	Society for Wind Vigilance
40.	2010-07-01	Cold sores (herpes) Human Immunological	[Health complaints listed] Family physician Bp and cold sores ordered double Bp meds, sleeping pills, antiviral and antibiotics, purchase Bp cuff and blood work.	WindVOICe (Wind Vigilance for Ontario Communities)
41.	2014-11-21	Collagen, destruction Human Endocrine	Destruction of collagen	Australian Industrial Wind Turbine Awareness Network
42.	2011-11-04	Collagen, excess Human Endocrine	A characteristic finding is the production of excess collagen in the absence of an inflammatory response.	National Wind Watch
43.	2011-11-04	Colon cancer Human Cancer	Unusual malignant tumours were seen in the lungs, colon and brain... [and were caused by] low frequency vibrations.	National Wind Watch
44.	2012-09-24	Concentration problems Human Neurocognitive	Closely monitor growth... in children, with particular focus on... memory and concentration; especially if there is any regression once wind turbines have commenced operating.	Waubra Foundation

45.	2012-06-29	Confidence loss Human Psychiatric	Subjects also reported ... loss of self-confidence, effects similar to depression, effects similar to mania, irritability and anger, heightened emotionality and crying.	Dumfries and Galloway Standard
46.	2012-05-02	Confusion Human Neurocognitive	...His family started to display unusual symptoms which they had never experienced before -- difficulty sleeping, headaches, exhaustion, nausea, heart palpitations, confusion, speech problems...	Wind Turbine Syndrome
47.	2011-07-18	Conjunctival mucosa, haemorrhages Human Haematological	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
48.	2011-07-18	Conjunctivitis Human Infection	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage II is moderate and occurs after 4-10 years of exposure. It causes chest pain, definite mood swings, back pain, fatigue, fungal, viral and parasitic skin infections, inflammation of stomach lining, pain on urination and blood in urine, conjunctivitis, and allergies.	Killerculture.com
49.	2012-06-29	Crying Human Psychiatric	Subjects also reported ... loss of self-confidence, effects similar to depression, effects similar to mania, irritability and anger, heightened emotionality and crying.	Dumfries and Galloway Standard
50.	2012-05-10	Dancing, cattle defects Cattle disturbed behavior	Cattle have been videotaped "dancing" or lifting hooves repetitively from being shocked by electrical voltage in the ground	East County Magazine
51.	2012-04-22	Death, cattle Cattle Mortality	Cows are dying... going down, pretty much lifeless... 19 died or had to be put down, I lost 30 calves so far.	East County Magazine
52.	2011-11-04	Deaths, many (from "unusual" cancers)	These extensive studies report numerous serious illnesses and, yes, many deaths, mainly from unusual	Wind Watch

		Human Mortality	cancers.	
53.	2013-11-18	Deaths, emus Emu Mortality	“When we watched the birds in here die, when we started with 27 and ended up with seven, when we had to watch them die every day, I said to Davey, 'We can't do it anymore. We know we are doing the best because we know they're going to go somewhere they're not going to be abused by turbines.”	CBC News, Nova Scotia
54.	2012-04-22	Deaths, unexplained (goats) Goat Mortality	Unexplained mass die-offs of livestock have occurred near some wind farms. In New Zealand, 400 goats dropped dead.	East County Magazine
55.	2009-03-29	Deaths, unexplained (worms) Worms Mortality	Last fall the earth worms hundreds of them were on top of the gravel and on top of the cement in the morning when we saw them they were dead	Wind Vigilance for Ontario Communities
56.	2012-10-22	Decreased weight gain Cattle Development	Reduced calving percentages, decreased weight gains, agitated and stressed livestock... in conflict with my ethical farming practices	Australian Department of the Senate
57.	2012-12-11	Delayed metamorphosis (crabs) Crab Development	Metamorphosis appeared to be delayed... by at least 18 hours when subjected to turbine sounds.	PLoS ONE
58.	2012-03-01	Dental infection Human Dental	[Chronically elevated cortisol levels due to wind turbines may cause] ... increased infections (e.g. noticeably increased dental infections).	Waubra Foundation
59.	2013-11-22	Dental injuries Human Dental	Neil and Elizabeth Andersen, who live about a quarter of a mile from the turbines, said they caused “continuous insomnia, headaches, psychological disturbances, dental injuries, and other forms of malaise”	Stop These Things
60.	none stated	Depression Human Psychiatric	The reported psychological symptoms include decreased quality of life, stress, anxiety, depression, cognitive dysfunction, anger, grief, and a sense of injustice.	Society for Wind Vigilance

61.	2006-01-01	Diabetes Human Endocrine	Two diseases we seldom associate with electromagnetic hypersensitivity are diabetes and multiple sclerosis.	Electromagnetic Biology and Medicine
62.	2012-09-08	Diabetes, aggravated Human Endocrine	[The resident], a diabetic since the age of 19, found her blood glucose levels rocketing – forcing her to take more insulin and causing her to develop a cataract, she says.	Daily Mail
63.	2010-07-01	Diarrhoea Human Gastrointestinal	[Healthy complaints listed] Stomach felt full, air hurt, rapid weight loss 170 to 125lb over 3 months and loose stools, more extremely exhausted, not as patient, get angry fast.	WindVOICe (Wind Vigilance for Ontario Communities)
64.	2011-07-18	Digestive mucosa, haemorrhages Human Gastrointestinal	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
65.	2013-06-18	Disorientation in echidnas Echidna disorientation	Poor old echidnas seem to do much more work these days with much larger areas dug up than prior to the wind farm I'm guessing they could pin point the location of their food source much more accurately back then.	Stop These Things
66.	2012-05-10	Dolphin, porpoise deaths, beaching Dolphins deaths, beaching	In Germany, a dozen dead porpoises washed ashore near the site of a newly completed wind farm and authorities did not rule out the wind facility as potential causes. Some have suggested that the beaching of 130 dolphins at Cape Cod may be related to wind turbine facilities nearby.	East County Magazine
67.	2012-11-22	Dream disturbances Human Psychiatric	Violent and disturbing dreams in adults and children, which can happen repeatedly over the same night.	Waubra Foundation
68.	2012-01-30	Dry eyes Human	My family and I have suffered... dry eyes... strange travelling rashes that doctors are unable to diagnose...	My Next Door Neighbour Is A Wind Turbine

		Ophthalmologic	lack of sex drive...	
69.	2012-06-29	Dry retching Human Gastrointestinal	They say [symptoms] included: pain in the head and chest, heart palpitations, dizziness, dry retching, anger, heightened emotions and crying.	Dumfries and Galloway Standard
70.	2011-07-18	Duodenal ulcers Human Gastrointestinal	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
71.	2010-06-18	Dysmenorrhoea Human Reproduction	According to scientific literature, low frequency vibration could result in... menstrual irregularities.	Better Plan, Wisconsin
72.	2010-07-01	Ear pain Human Vestibulo- auditory	[Health complaints listed] Your memory is just not what it used to be; heavy painful chest; heart pounding unusual bloody noses.	Wind Vigilance for Ontario Communities
73.	2012-09-26	Ear pain Species unspecified Vestibulo- auditory	Even the pets are affected while in the home - losing hair, sore ears - but not when away from the home.	Wind Turbine Syndrome
74.	2009-03-29	Ear problems Dog Vestibulo- auditory	house dogs always sleeping, ear problems, itching all the time.	Wind Vigilance for Ontario Communities
75.	2012-05-24	Ear popping Human Vestibulo- auditory	Most times I do not hear audible sound loud enough to wake me. When I wake, I often experience feelings of pressure and ear popping and pain.	Falmouth Board of Health
76.	2010-07-01	Eardrum perforation Human Vestibulo- auditory	[Parent reporting effects on child] His eardrum burst.	Wind Vigilance for Ontario Communities

77.	2011-07-30	Ears bleeding Human Vestibulo-auditory	Living near a wind farm produces an astounding range of acoustic effects, including ... bleeding ears and noses...	Green Left
78.	2012-03-28	Egg abnormalities Chicken Reproduction	Of the few eggs I did get, most had NO yolk and the shells were like jelly.	Wind Turbine Syndrome
79.	2012-04-22	Electric shock Cattle Other	Symptoms that the Ontario report cites include... dairy cows shocked through milking machines...	East County Magazine
80.	2012-06-29	Emotionality Human Psychiatric	They say [symptoms] included: pain in the head and chest, heart palpitations, dizziness, dry retching, anger, heightened emotions and crying.	Dumfries and Galloway Standard
81.	2013-02-20	Epilepsy Dog Neurological	Irene believes the rapid flashing effect caused by intensive sunlight flickering through the rotating blades is triggering the [dog's] seizures.	East Kilbride News
82.	2011-11-04	Epilepsy, adult-onset Human Neurological	Diseases [due to low frequency vibrations] such as Type I diabetes and epilepsy developing late in life were also found...	National Wind Watch
83.	2012-05-02	Exhaustion Human Constitutional	Meanwhile, Mr Kermond and his family started to display unusual symptoms which they had never experienced before—difficulty sleeping, headaches, exhaustion...	Wind Turbine Syndrome
84.	2012-09-24	Exploding lungs Bat Respiratory	...Rapid fluctuations in barometric pressure, sufficient to explode bats lungs.	Wabura Foundation
85.	2012-05-25	Eye discharge Human Ophthalmologic	"I began having eye discharge, eye irritability and headaches, which have worsened with time." When she has traveled, she said her eye problems cleared up.	National Wind Watch
86.	2012-05-24	Eye, burst blood vessels Human Ophthalmologic	I have had several cases of waking to burst blood vessels in my eye for no apparent reason other than a bad turbine night.	Falmouth Board of Health
87.	2014-11-04	Eyeballs, sore Human Mental health	The residents, in their affidavits, report health effects including ... sore eyeballs ...	Environment, Resources and Development Court of South Australia

88.	2012-05-24	Eyes, sunken Human Ophthalmologic	[Health complaints listed] I have aged about 10 years in the last 2. My hair is falling out and gray. My eyes sunk in...	Falmouth Board of Health
89.	2012-04-22	Eyes, watery Human Ophthalmologic	Symptoms include sleeplessness, higher blood pressure, heart palpitations, itching, ringing and pain in the ears, watery eyes, chest pressure, difficulty breathing and more...	East County Magazine
90.	2011-07-18	Eyes, decrease in visual acuity Human Ophthalmologic	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
91.	2010-07-01	Family discord Human Psychosocial	We were very irritable. We had loud angry arguments.	Wind Vigilance for Ontario Communities
92.	2010-10-23	Fatigue Human Constitutional	Physical harm and adverse health effects, including ... extreme fatigue, diminished ability to concentrate, nausea and other physiological cognitive effects.	Huron Daily Tribune
93.	2011-07-18	Fever Human Immunological	I used to live near a wind farm and it made me SICK with headaches and fever.	Daily Mail
94.	2010-07-01	Fibromyalgia, aggravated Human Musculoskeletal	So now I am researching ways of regaining some of my health again although the hyperthyroid, diabetes, scleroderma, fibromyalgia conditions continue.	Wind Vigilance for Ontario Communities
95.	2012-09-06	Foot sores Human Musculoskeletal	Sores on feet that would not heal until you moved out of your home.	Health Canada
96.	2014-11-04	Forgetfulness Human Neurological	The residents, in their affidavits, report health effects including ... forgetfulness...	Environment, Resources and Development Court of South Australia
97.	2012-09-06	Formication Human	The sensation of your skin crawling or being bitten by bugs.	Health Canada

		Dermatological		
98.	2014-11-04	Frustration Human Mental health	The residents, in their affidavits, report health effects including ... frustration ...	Environment, Resources and Development Court of South Australia
99.	2011-07-18	Fungal skin infection Human Dermatological	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage II is moderate and occurs after 4-10 years of exposure. It causes chest pain, definite mood swings, back pain, fatigue, fungal, viral and parasitic skin infections, inflammation of stomach lining, pain on urination and blood in urine, conjunctivitis, and allergies.	Killerculture.com
100.	2012-07-09	Gastric ulcer, perforation Sheep Gastrointestinal	I have been presented with the autopsy results on 12 week old lambs with perforated ulcers of their stomachs and intestines.	WA Senator Chris Back
101.		Genocide, near Human Mortality	Wind turbines are toxic to our health ... nothing short of criminal bordering on genocide	David Mortimer
102.	2014-11-04	Glands, swollen Human Endocrine	The residents, in their affidavits, report health effects including ... swollen glands ...	Environment, Resources and Development Court of South Australia
103.	2012-07-09	Groundwater contamination Water Pollution	Wind turbines also can be responsible for stray voltage and groundwater contamination...	The Guardian
104.	2012-03-14	Haemorrhaging of adrenal glands Cattle Reproduction	... Farmers are doing their own autopsies on dead livestock and finding haemorrhaging of the adrenal glands in newborn calves...	Waubra Foundation
105.	2014-08-10	Haemorrhaging, internal Hares Mortality	"incredible number" of dead hares may have succumbed to "internal haemorrhaging and death" as a result of the turbines.	Sunday Express (Scotland)
106.	2011-07-18	Haemorrhoids Human Cardiovascular	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and	Killerculture.com

			conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	
107.	2013-03-20	Hallucinations Human Psychaitric	I was having hallucinations that I was dead or hitting deer on the road.	Ontario Wind Resistance
108.	2012-09-26	Hair loss Species unspecified Other	Even the pets are affected while in the home - losing hair, sore ears - but not when away from the home.	Wind Turbine Syndrome
109.	2012-05-24	Hair loss/greying Human Other	I have aged about 10 years in the last 2. My hair is falling out and gray. My eyes sunk in...	Falmouth Board of Health
110.	none stated	Headache Human Constitutional	Some of the reported physiological symptoms include headaches, heart palpitations, excessive tiredness, tinnitus, hearing problems, stress, sleep disturbance, and migraines.	Wind Vigilance
111.	2012-09-24	Hearing, unprecedented ability Human Vestibulo-auditoryl	Where does the problem [being able to sense a wind turbine] stop? This is a difficult question to answer. On two occasions when the ILFN nuisance was at its worst, I travelled out west. On one occasion I discovered that it appeared to have dissipated at Wee Jasper, 70km away from the closest turbines. On another occasion, and by far the worst of all days, the problem had dissipated when arriving at Young about 100km from the closest turbines." "Truly these figures appear subjective, outrageous, and for most, impossible to believe. However, I am reporting my findings that have taken hours and days to determine. I'm not just plucking figures out of the air.	George Papadopoulos (Australia)
112.	2012-08-15	Hearing loss Human Vestibulo-auditory	Such effects [accelerated hearing loss] may be small and may take 30-40 years to become apparent.	Cochlear Fluids Research Facility

113.	2012-06-29	Heart attack Human Cardiovascular	The onset of these conditions corresponds directly with the operation of wind turbines: ... heart attacks (including Tako Tsubo episodes)...	Waubra Foundation
114.	2012-04-22	Heart palpitations Human Cardiovascular	Symptoms include sleeplessness, higher blood pressure, heart palpitations, itching, ringing and pain in the ears, watery eyes, chest pressure, difficulty breathing and more...	East County Magazine
115.	2012-09-24	Heart valve, pathology Human Cardiovascular	Long-term wind turbine [exposure] in Northern Germany [is linked with] serious heart valve structural tissue problems.	Waubra Foundation
116.	2012-05-24	Heartbeat fluttering Human Cardiovascular	[Health complaints listed] Those symptoms for me are... frequent startling, sometimes fluttering heartbeat and panicky feelings.	Falmouth Board of Health
117.	2012-11-26	Heartburn Human Gastrointestinal	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage I is mild and occurs after 1-4 years of exposure. It causes slight mood swings, indigestion and heartburn, mouth/throat infections, and bronchitis.	Killerculture.com
118.	2009-03-29	Hip pain Human musculoskeletal	very painful left hip	Wind Vigilance for Ontario Communities
119.	2012-03-01	Hippocampal atrophy Human Neurological	[Chronically elevated cortisol levels due to wind turbines may cause] ... decreased size of the hippocampus, which in humans has been associated with depression.	Waubra Foundation
120.	2012-06-29	Hyperacusis Human Vestibulo-auditory	The onset of these conditions corresponds directly with the operation of wind turbines: ... tinnitus, and hyperacusis.	Waubra Foundation
121.	2012-06-29	Hypertensive crisis Human Cardiovascular	The onset of these conditions corresponds directly with the operation of wind turbines: ... acute hypertensive crises...	Waubra Foundation
122.	2012-07-19	Hyperthyroidism Human	Numerous residents have been forced to leave their homes, she said, citing symptoms that include... hyperthyroidism.	East County Magazine

		Endocrine		
123.	none stated	Immunodeficiency Human Immunological	A decline in general public health and well-being, including a major increase in cancer, heart disease and immune-deficiency related diseases	Tharpaland International Retreat Centre
124.	2012-10-19	Increased deaths Bats Mortality	... Most bats die from collisions with moving blades of turbines, or non-contact depressurization injuries (barotrauma) associated with passing close to moving blades.	PLoS ONE
125.	2012-04-29	Increased local temperature Climate Temperature change	Large windfarms can increase local night time temperatures by fanning warmer air onto the ground.	The Guardian
126.	2010-07-01	Indigestion Human Gastrointestinal	I experience digestive problems, and an upset stomach after almost every meal which will last anywhere from a few hours to days.	Wind Vigilance for Ontario Communities
127.	2010-06-18	Infertility Human Reproduction	Based on the reports out of the wind farms, there could be far worse reproductive consequences... [such as] infertility... as a result of wind energy.	Better Plan, Wisconsin
128.	2012-03-28	Infertility Chicken Reproduction	One after the other, my chickens stopped laying eggs.	Wind Turbine Syndrome
129.	2014-09-30	Infertility Sheep & cattle Reproduction	They will make sheep and cattle sterile	Canberra Times
130.	2012-03-20	Inflammatory bowel disease Human Gastrointestinal	Markedly elevated nighttime salivary cortisol, and elevated serum cortisol are being reported in some residents exposed to operating wind turbines (US and Ontario), as are exacerbations of various inflammatory disorders such as various forms of arthritis, asthma, inflammatory bowel diseases, and diseases such as Lupus or SLE.	Wind Turbine Syndrome
131.	2012-04-22	Intellectual delay Human Development	Research has found that intrusive noises adversely affect children's cardiovascular systems, memory, language development and ability to learn...	East County Magazine

132.	2013-10-05	Internal organs, growth stunting Human, puppies Development	the low frequency noise from an operating wind tower stunts the growth of the internal organs of children and puppies	LimaOhio.com
133.	2010-07-01	Internal pulsations Human Musculoskeletal	5-7 Hz can cause chest pains, 4-10 Hz abdominal pains, and 4-9 Hz a general feeling of discomfort.	Calvin Martin
134.	none stated	Ischaemic heart disease Human Cardiovascular	Stress and sleep deprivation are well known risk factors for increased morbidity including ... ischemic heart disease.	Wind Turbine Syndrome
135.	2009-03-29	Itching Dog Dermatological	house dogs always sleeping, ear problems, itching all the time.	Wind Vigilance for Ontario Communities
136.	2010-07-01	Joint and muscle pain Human Musculoskeletal	I feel tired all the time and my muscles and joints are sore and I feel achy all the time.	Wind Vigilance for Ontario Communities
137.	2011-07-25	Kidney damage Human Urinary	She experiences "cardiac rhythm disorders, sleep deprivation, high blood pressure, kidney damage..."	North American Platform Against Wind Power
138.	2011-11-04	Leaving soil near turbines (worms) Earthworm Behavioural	... Seagulls have learned that the worms have all been driven away and that in that area the farmer's plough [near wind turbines] will not bring breakfast to the surface.	National Wind Watch
139.	2009-03-29	Legs, sore Human Musculoskeletal	Legs sore all the time	Wind Vigilance for Ontario Communities
140.	2012-05-02	Lethargy Human Constitutional	Put this together with headache, vomiting, vertigo, lethargy, the pulsing sensation and the burning pain felt within the body...	Wind Turbine Syndrome
141.	2012-04-22	Leukaemia Human Cancer	There is an association of pediatric leukemia and lymphoma with prolonged exposure [to stray voltage linked to wind turbines].	East County Magazine
142.	2011-02-10	Lip vibration, at 10km Human Other	Various people have described symptoms where they have described either chest or lip vibration, the lip vibrations have been described to me as from a distance of 10 kilometers away..	Waubra Foundation

143.	2012-01-30	Loss of libido Human Psychiatric	My family and I have suffered... dry eyes... strange travelling rashes that doctors are unable to diagnose... lack of sex drive...	My Next Door Neighbour Is A Wind Turbine
144.	2009-03-07	Lower respiratory tract infections Human Respiratory	Seven subjects had unusual or prolonged lower respiratory infections during exposure...	Wind Turbine Syndrome
145.	2011-11-04	Lung cancer Human Cancer	Unusual malignant tumours were seen in the lungs, colon and brain... [and were caused by] low frequency vibrations.	National Wind Watch
146.	2012-03-01	Lung ciliary factor disturbance Human Respiratory	Other relevant pathologies noted by that group include brain pathology and lung ciliary function disturbances.	Waubra Foundation
147.	2012-03-01	Lupus, aggravated Human Immunological	Some of the conditions which have been reported... include exacerbations of preexisting but stable... inflammatory conditions such as arthritis, lupus, and asthma.	Waubra Foundation
148.	2012-04-22	Lymphoma Human Cancer	There is an association of pediatric leukemia and lymphoma with prolonged exposure [to stray voltage linked to wind turbines].	East County Magazine
149.	2012-06-29	Mania-like symptoms Human Psychiatric	Subjects also reported ... loss of self-confidence, effects similar to depression, effects similar to mania, irritability and anger, heightened emotionality and crying.	Dumfries and Galloway Standard
150.	2012-06-29	Memory loss Human Neurocognitive	The onset of these conditions corresponds directly with the operation of wind turbines: ... development of irreversible memory dysfunction...	Waubra Foundation
151.	2011-07-18	Memory loss, short-term Human Neurocognitive	When one moves from wakefulness into sleep, the transfer of information from short-term memory to long-term memory stops and is the last to be restored on awakening.	Environmental Review Tribunal, Ontario
152.	2011-06-08	Meniere's disease, aggravated Human Vestibulo-auditory	I'd not been ill for about five months but as soon as the turbines started I was sick for two weeks and have had to take the medication.	North Devon Gazette

153.	2012-05-24	Migraine Human Neurological	Living too close to wind turbines can cause heart disease, tinnitus, vertigo, panic attacks, migraines and sleep deprivation, according to groundbreaking research to be published later this year by an American doctor.	The Independent
154.	2011-07-18	Mood swings Human Psychiatric	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage I is mild and occurs after 1-4 years of exposure. It causes slight mood swings, indigestion and heartburn, mouth/throat infections, and bronchitis.	Killerculture.com
155.	2010-07-01	Motor paralysis Human Neurological	[Health complaints listed] Severe trembling with right hand and foot, people think I am drunk when in town, due to some paralysis on right side.	Wind Vigilance for Ontario Communities
156.	2011-07-25	Mouth ulcer Human Dermatological	She experiences "cardiac rhythm disorders, ... ear pressure, and VAD [vibroacoustic disease] ulcers in the mouth."	North American Platform Against Wind Power
157.	2006-01-01	Multiple sclerosis Human Neurological	One teacher in the Wisconsin school that was filtered had been diagnosed with multiple sclerosis.	Electromagnetic Biology and Medicine
158.	2012-05-02	Muscle hypotonia Dog Neurological	[The owner's dog] lost muscle tone and seemed stressed and depressed and continually scratched at his ears until they bled.	Wind Turbine Syndrome
159.	2011-07-18	Muscle pain, intense Human Musculoskeletal	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
160.	2010-07-01	Muscle twitches Human Musculoskeletal	[Health complaints listed] Sharp knife like pain in muscles, twitching in skeletal muscles and around eyes.	Wind Vigilance for Ontario Communities

161.	2011-09-21	Nausea Human Constitutional	A southwestern Ontario family... claims they have suffered vertigo, nausea and sleep disruption caused by the Kent Breeze wind farm.	National Wind Watch
162.	2010-07-01	Nerve pain Human Neurological	[Health complaint listed] Nerve pain from the left ear to jaw.	Wind Vigilance for Ontario Communities
163.	2012-05-24	Nerve twitching Human Neurological	... These machines [wind turbines] constantly grind and have a negative effect on one's nerves. When at the house I find that my nerves are constantly on edge.	Falmouth Board of Health
164.	2004-11-03	Nervousness Human PsychiatricThese machines [wind turbines] constantly grind and have a negative effect on one's nerves. When at the house I find that my nerves are constantly on edge.	Wisconsin Independent Citizens Opposing Wind Turbine Sites
165.	2011-07-18	Neurological disturbances Human Neurological	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage III is severe and occurs with over 10 years of exposure to LFN. It causes psychiatric disturbances, hemorrhages of nasal, digestive and conjunctive mucosa, nose bleeds, varicose veins and hemorrhoids, duodenal ulcers, spastic colitis, decrease in visual acuity, headaches, severe joint pain, intense muscular pain, and neurological disturbances.	Killerculture.com
166.	2012-05-03	Night sweats Human Constitutional	They found sleep almost impossible; they couldn't concentrate; they had night sweats, headaches, palpitations, heart trouble.	The Australian
167.	2012-09-24	Night terrors Human Psychiatric	Some of the problems identified... in younger children with exposure to the wind turbines... include... night terrors.	Waubra Foundation
168.	none stated	Nocturia Human Urinary	Some people are finding that they need to get up to the toilet a lot more at night, again correlating to specific wind directions.	Waubra Foundation
169.	2012-03-28	Noise pollution Air Pollution	The proposed wind farm would ruin the pristine beauty of the area, damage air quality and increase noise levels.	10 News, ABC
170.	2011-11-04	Non-convulsive mental defects Human Neurological	Rage attacks occurred in some individuals and sudden attacks of nonconvulsive mental defects were... caused by low frequency vibrations...	National Wind Watch

171.	2011-07-25	Non-hodgkins lymphoma Human Immunological	And for some months [I have suffered from] a follicular non-Hodgkin's lymphoma in my mucous membranes.	North American Platform Against Wind Power
172.	2010-07-01	Nosebleed Human Dermatological	[Health complaints listed] Bloody noses; ears itchy and ringing.	Wind Vigilance for Ontario Communities
173.	2011-07-27	Pacemaker interference Human Cardiovascular	The thinking is the electromagnetic field generated by wind farms could shut down my [pacemaker].	The Daily Telegraph
174.	2010-11-05	Panic attacks Human Psychiatric	She observed that two-thirds of her test group—14 of 21—presented "disturbing symptoms" such as the need to flee, difficulty breathing, and panic.	Wellington Times
175.	2011-07-18	Parasitic skin infection Human Dermatological	People living near .., wind turbines have been shown to suffer from VAD as a result of their exposure to the noise ..Stage II is moderate and occurs after 4-10 years of exposure. It causes chest pain, definite mood swings, back pain, fatigue, fungal, viral and parasitic skin infections, inflammation of stomach lining, pain on urination and blood in urine, conjunctivitis, and allergies.	Killerculture.com
