HOME FALLS AND ACCIDENTS SCREENING TOOL (HOME FAST)

INSTRUCTIONS: PLEASE CIRCLE RESPONSES AS EITHER: YES, NO OR NOT APPLICABLE (N/A)
SCORE ONE POINT FOR EACH “NO” RESPONSE. OVERALL SCORE IS OUT OF 25.

1. Are walkways free of cords and other clutter?
   YES   NO
   Definition: no cords or clutter across or encroaching on walkways/doorways. Includes furniture and other items that obstruct doorways or hallways, items behind doors preventing doors opening fully, raised thresholds in doorways.
   Comments: ..................................................
   ..............................................................
   ..............................................................

2. Are floor coverings in good condition?
   YES   NO
   Definition: carpets/mats lie flat/no tears/not threadbare/no cracked or missing tiles – including stair coverings.
   Comments: ..................................................
   ..............................................................
   ..............................................................

3. Are floor surfaces non slip?
   YES   NO
   Definition: score "no" if lino or tiles are in the kitchen, bathroom or laundry, in addition to any polished floors or tiled/lino surfaces elsewhere. Can only score "yes" if, in addition to other rooms, the kitchen, bathroom and laundry have non slip or slip resistant floor surfaces.
   Comments: ..................................................
   ..............................................................
   ..............................................................

4. Are loose mats securely fixed to the floor?
   YES   NO
   Definition: mats have effective slip resistant backing/are taped or nailed to the floor.
   Comments: ..................................................
   ..............................................................
   ..............................................................

5. Can the person get in and out of bed easily and safely?
   YES   NO
   Definition: bed is of adequate height and firmness. No need to pull self up on bedside furniture etc.
   Comments: ..................................................
   ..............................................................
   ..............................................................

6. Can the person get up from their lounge chair easily?
   YES   NO
   Definition: chair is of adequate height, chair arms are accessible to push up from, seat cushion is not too soft or deep.
   Comments: ..................................................
   ..............................................................
   ..............................................................
7. Are all the lights bright enough for the person to see clearly?

   YES   NO

   Definition: total wattage per room from globes to be more than 75w, or fluorescent lighting, and no shadows thrown across rooms, no excess glare.

   Comments: .............................................. .............................................. ..............................................

8. Can the person switch a light on easily from their bed?

   YES   NO

   Definition: person does not have to get out of bed to switch a light on at night – has a flashlight or bedside lamp, or adequate night lighting to the toilet.

   Comments: .............................................. .............................................. ..............................................

9. Are the outside paths, steps and entrances well lit at night?

   YES   NO

   N/A (no outside step, path, or entrance, ie: door opens straight onto footpath)

   Definition: lights exist over back and front doors, globes at least 75w, walkways used exposed to light –including communal lobbies.

   Comments: .............................................. .............................................. ..............................................

10. Is the person able to get on and off the toilet easily and safely?

    YES   NO

    N/A (person uses commode constantly)

    Definition: toilet is of adequate height, person does not need to hold onto sink/towel rail/toilet roll holder to get up, rail exists beside toilet if needed.

    Comments: .............................................. .............................................. ..............................................

11. Is the person able to get in and out of the bath easily and safely?

    YES   NO

    N/A (no bath in home, or bath never used)

    Definition: person is able to step over the edge of the bath without risk, and can lower themselves into the bath and get up again without needing to grab onto furniture (or uses bath board or stands to use a shower over the bath without risk).

    Comments: .............................................. .............................................. ..............................................

12. Is the person able to walk in and out of the shower recess easily and safely?

    YES   NO

    N/A (no shower in home)

    Definition: person can step over shower hob, or screen tracks without risk and without having to hold onto anything for support.

<tbody>
<tr>
<td>Is there an accessible/sturdy grab rail/s in the shower or beside the bath?</td>
<td></td>
<td></td>
<td>Definition: Rails that are fixed securely to the wall, that are not towel rails, and that can be reached without leaning enough to lose balance. Comments:</td>
</tr>
<tr>
<td>Are slip resistant mats / strips used in the bath/bathroom/shower recess?</td>
<td></td>
<td></td>
<td>Definition: Well maintained slip resistant rubber mats, or non-slip strips secured in the base of the bath or shower recess. Comments:</td>
</tr>
<tr>
<td>Is the toilet in close proximity to the bedroom?</td>
<td></td>
<td></td>
<td>Definition: Toilet is no more than two doorways away from the bedroom (including the bedroom door) – does not involve going outside or unlocking doors to reach it. Comments:</td>
</tr>
<tr>
<td>Can the person easily reach items in the kitchen that are used regularly without climbing bending or upsetting his or her balance?</td>
<td></td>
<td></td>
<td>Definition: cupboards are accessible between shoulder and knee height – no chairs or stepladders are required to reach things. Comments:</td>
</tr>
<tr>
<td>Can the person carry meals easily and safely from the kitchen to the dining area?</td>
<td></td>
<td></td>
<td>Definition: meals can be carried safely, or transported using a trolley to wherever the person usually eats. Comments:</td>
</tr>
<tr>
<td>Do the indoor steps/stairs have an accessible/sturdy grab rail extending along the full length of the steps/stairs?</td>
<td></td>
<td></td>
<td>Definition: grab rail must be easily gripped, firmly fixed, sufficiently robust and available for the full length of the steps or stairs. Comments:</td>
</tr>
<tr>
<td>Do the outdoor steps/stairs have an accessible/sturdy grab rail extending along the full length of the steps/stairs?</td>
<td></td>
<td></td>
<td>Definition: Steps = more than two consecutive steps (changes in floor level). Grab rail must be easily gripped, firmly fixed, sufficiently robust and available for the full length of the steps or stairs. Comments:</td>
</tr>
</tbody>
</table>
20. Can the person easily and safely go up and down the steps/stairs inside or outside the house?

YES  NO
N/A (No steps/stairs exist)

Definition: steps are not too high, too narrow or too uneven for feet to be firmly placed on the steps (indoors and outdoors), person is not likely to become tired or breathless using steps/stairs, and has no medical factors likely to impact on safety on stairs, e.g. foot drop, loss of sensation in feet, impaired control of movement etc.

Comments: ..........................................................
..........................................................
..........................................................

21. Are the edges of the steps/stairs (both inside and outside the house) easily identified?

YES  NO
N/A (No steps/stairs exist)

Definition: no patterned floor coverings, tiles or painted areas which could obscure the edge of the step, and there is adequate lighting of steps/stairs.

Comments: ..........................................................
..........................................................
..........................................................

22. Can the person use the entrance door/s safely and easily?

YES  NO

Definition: locks and bolts can be used without bending or over-reaching, there is a landing so the person does not have to balance on steps to open the door and/or screen door.

Comments: ..........................................................
..........................................................
..........................................................

23. Are paths around the house in good repair, and free of clutter?

YES  NO
N/A (no garden, path or yard exists)

Definition: no cracked/loose pathways, overgrowing plants/weeds, overhanging trees, garden hoses encroaching on walkways.

Comments: ..........................................................
..........................................................
..........................................................

24. Is the person currently wearing well fitting slippers or shoes?

YES  NO

Definition: Supportive, firmly fitting shoes with low heels and non-slip soles. Slippers must also support the foot in a good position. No shoes scores "no".

Comments: ..........................................................
..........................................................
..........................................................

25. If there are pets – can the person care for them without bending or being at risk of falling over?

YES  NO
N/A (there are no pets/animals)

Definition: pets = any animals that the person has responsibility for. To score "yes" person does not have to feed pets when they are jumping up or getting under foot, person does not have to bend to the floor to refill bowls/dish or clean pets, and pets do not require a lot of exercise.
