

# Know your 'insides'

Hello!

*My name is Natasa. I am a scientist and I live in Sydney, Australia :)*

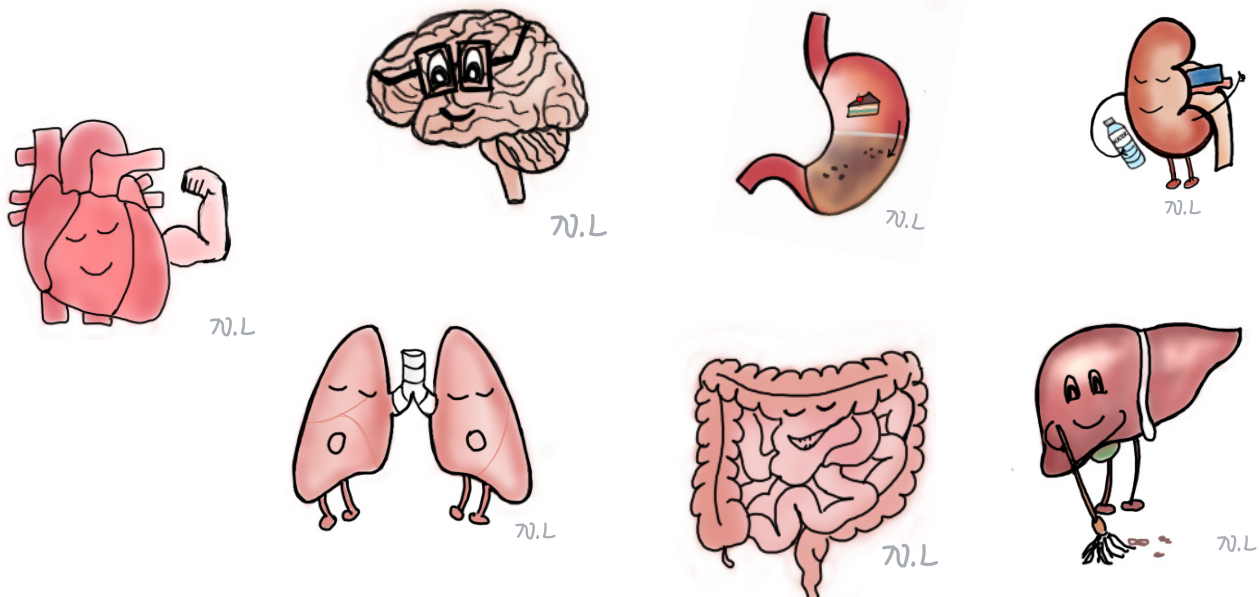

*I love studying and teaching about the human body.  
Inside our body we have organs.*

*Organs are important because they do special jobs that help keep us healthy.*

*Let's do some of fun activities to help us learn more about them.*

**Activity 1: Where are they inside the body?**

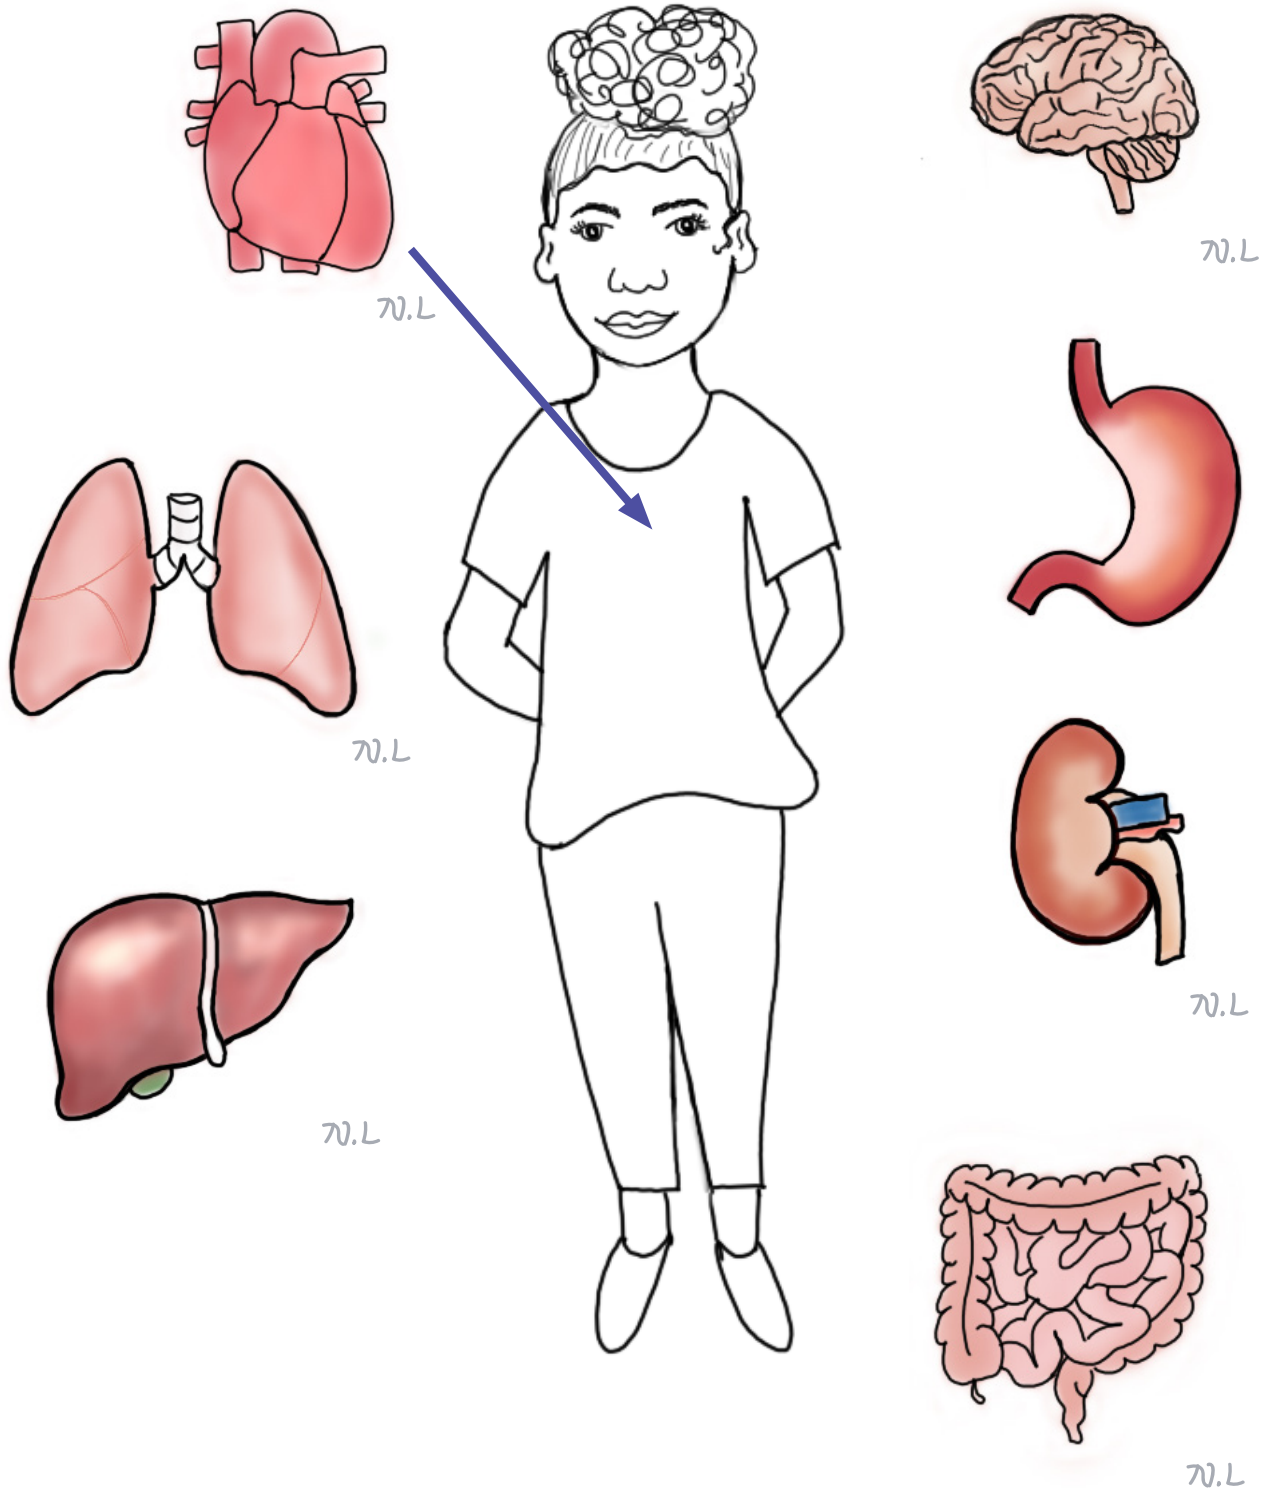

**Activity 2: What do they do?**

# Know your 'insides'

Activity 1: Draw arrows to where you think each organ is inside the body. Use the first example as a guide.

Example

# Know your 'insides'

Instructions: Draw arrows to where you think each organ is inside the body. Use the first example as a guide.

Example

# Know your 'insides'

Activity 2: Fill in the table with the answers you think are correct from the list of possible answers.

Organs	Options: Lungs, heart, stomach, kidney, intestines, brain and liver.	Options: Breathing; digest/break down food, pump blood; thinking & feeling; cleans blood; gets rid of water; absorbs/sucks up food & water.
	What am I? Brain	What do I do? Thinking & feeling
