	Not in the segment group									

Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

a. This category is not used in comparisons because its column proportion is equal to zero or one.

b. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

c. Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

QZ11. Which one of the following options best reflects the combined income over a year (per annum) of everyone in your household, before tax or anything else is taken out? Please include pensions and allowances from all sources. - Other	C	A C		C	A C		C	A C	
QZ12. And which of the following broad categories represents the approximate dollar value of all your investable assets? That is shares, debentures, managed investments, rollovers, superannuation, investment properties, term deposits, savings accounts, annu									

Results are based on two-sided tests assuming equal variances. For each significant pair, the key of the smaller category appears in the category with the larger mean.

a. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

b. Cell counts in some subtables are not integers. They were rounded to the nearest integers before performing pairwise comparisons.
