Results are based on two-sided tests. For each significant pair, the key of the category with the smaller column proportion appears in the category with the larger column proportion.

- a. This category is not used in comparisons because its column proportion is equal to zero or one.  
b. This category is not used in comparisons because the sum of case weights is less than two.  
c. Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.
