Alternative Places of Detention exhibition at Law Library

Associate Professor Carolyn McKay's thought-provoking exhibition "*The APOD Solution*" is now showing at Herbert Smith Freehills Law Library.

Through LED neon signs and AI-generated imagery, this installation explores the complex use of hotels as immigration detention facilities. Associate Professor McKay, both a Sydney Law School academic and accomplished artist, brings a unique perspective to this contemporary issue.

Stop by during library hours to experience this compelling intersection of law and art. For more info, [visit our news article on this exhibition](#).
