

A7

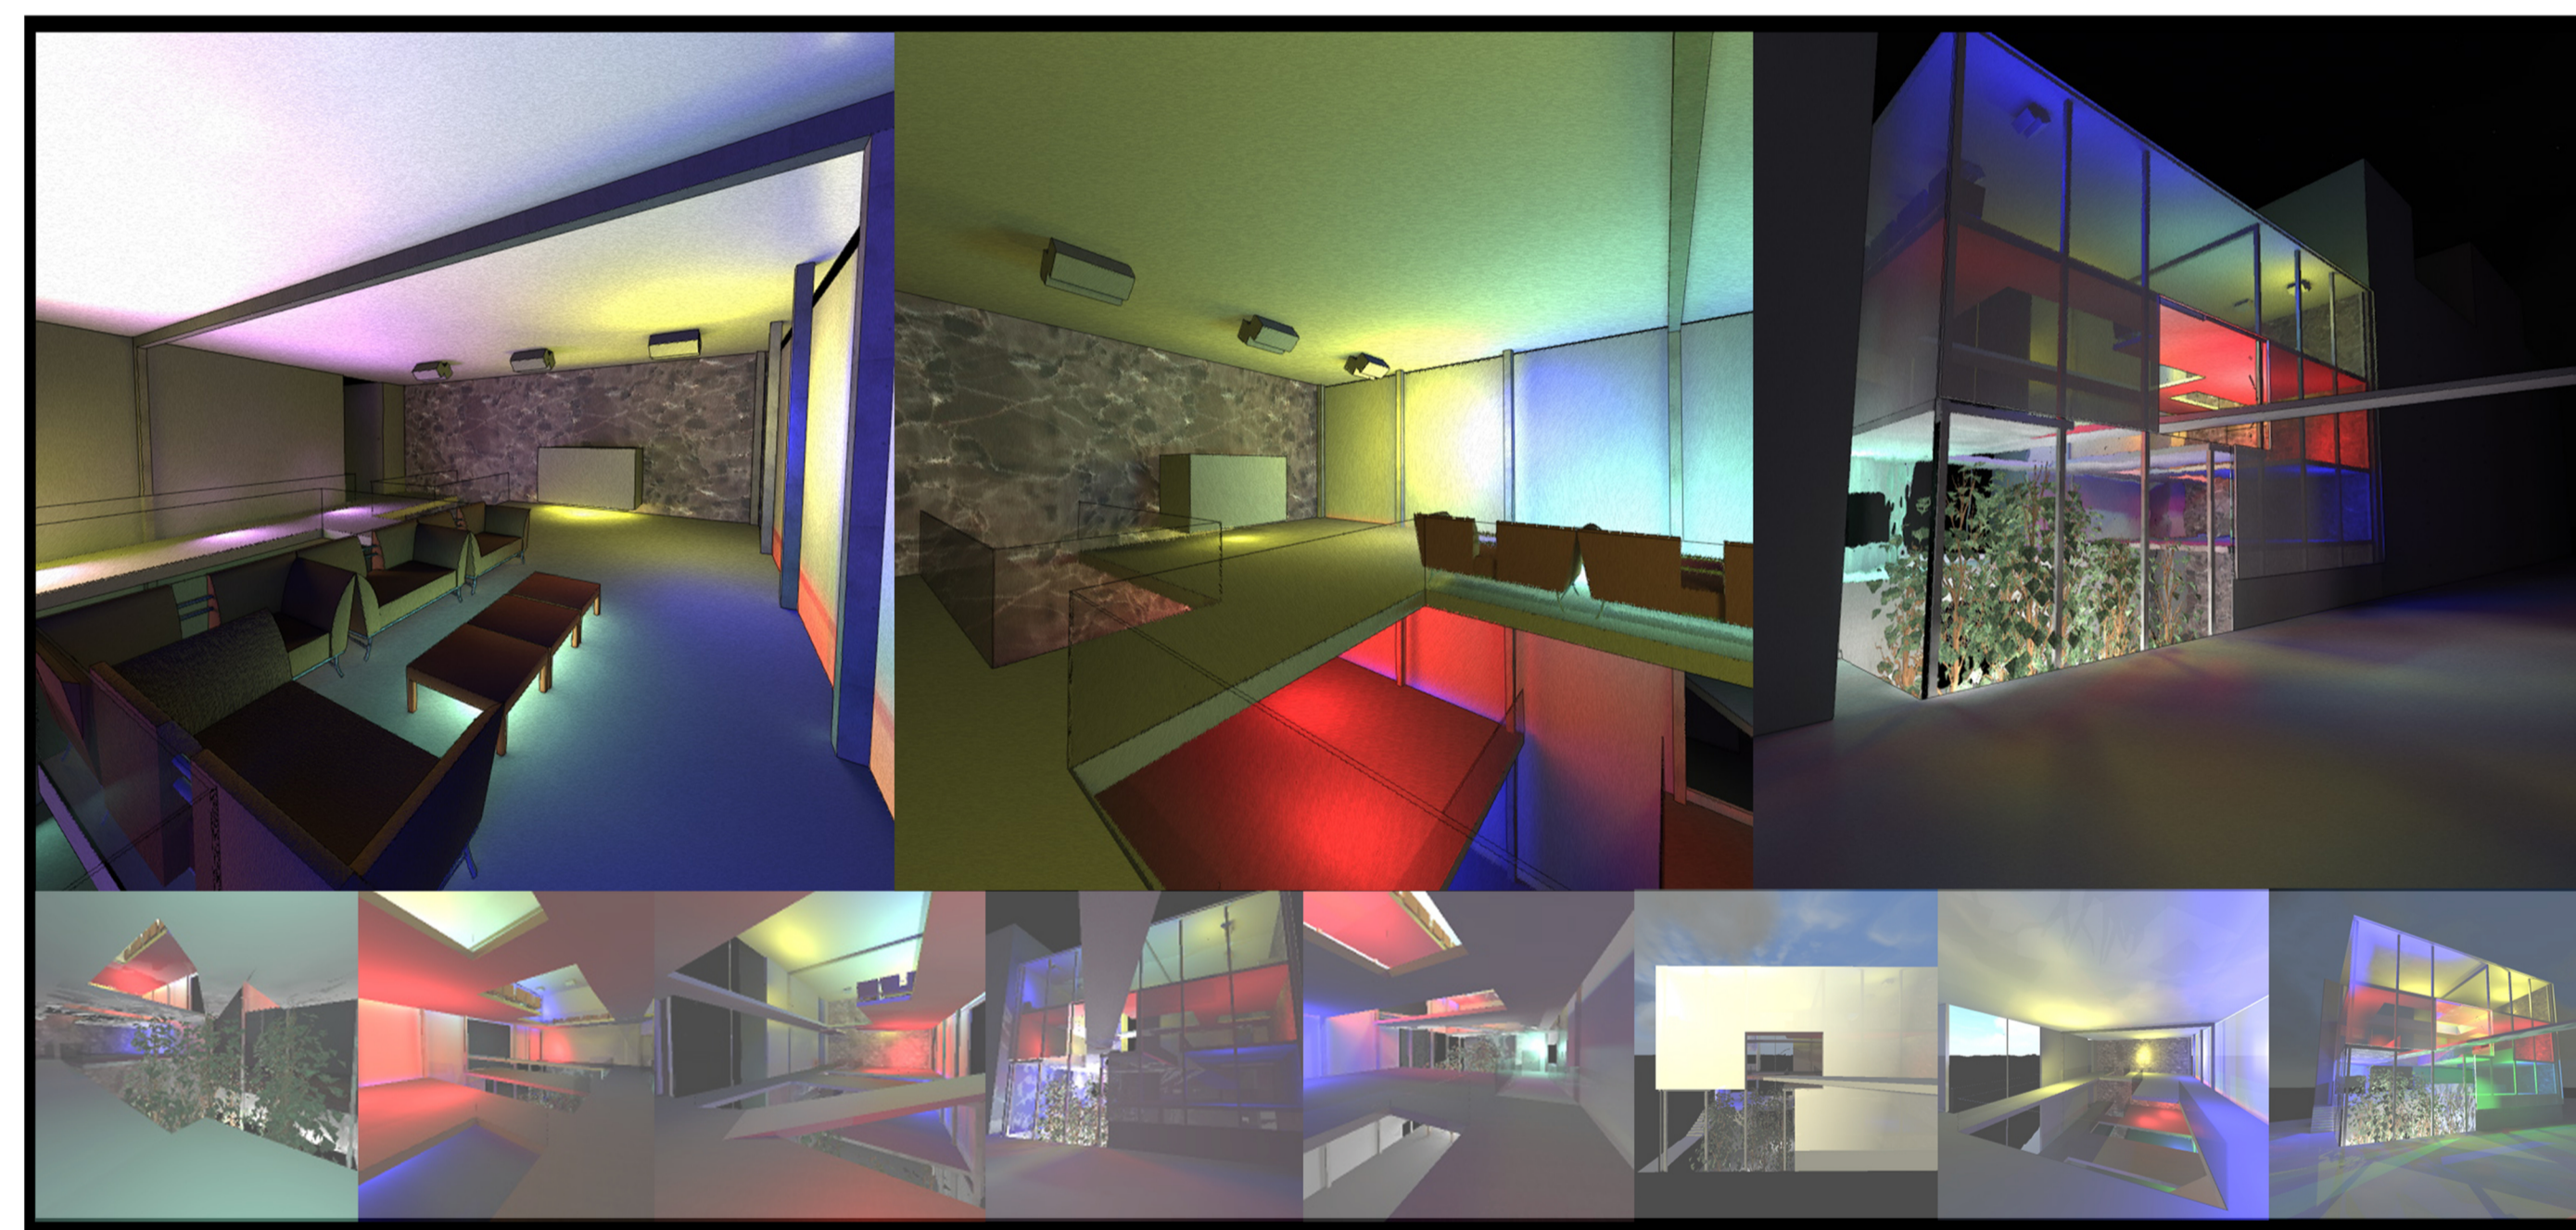

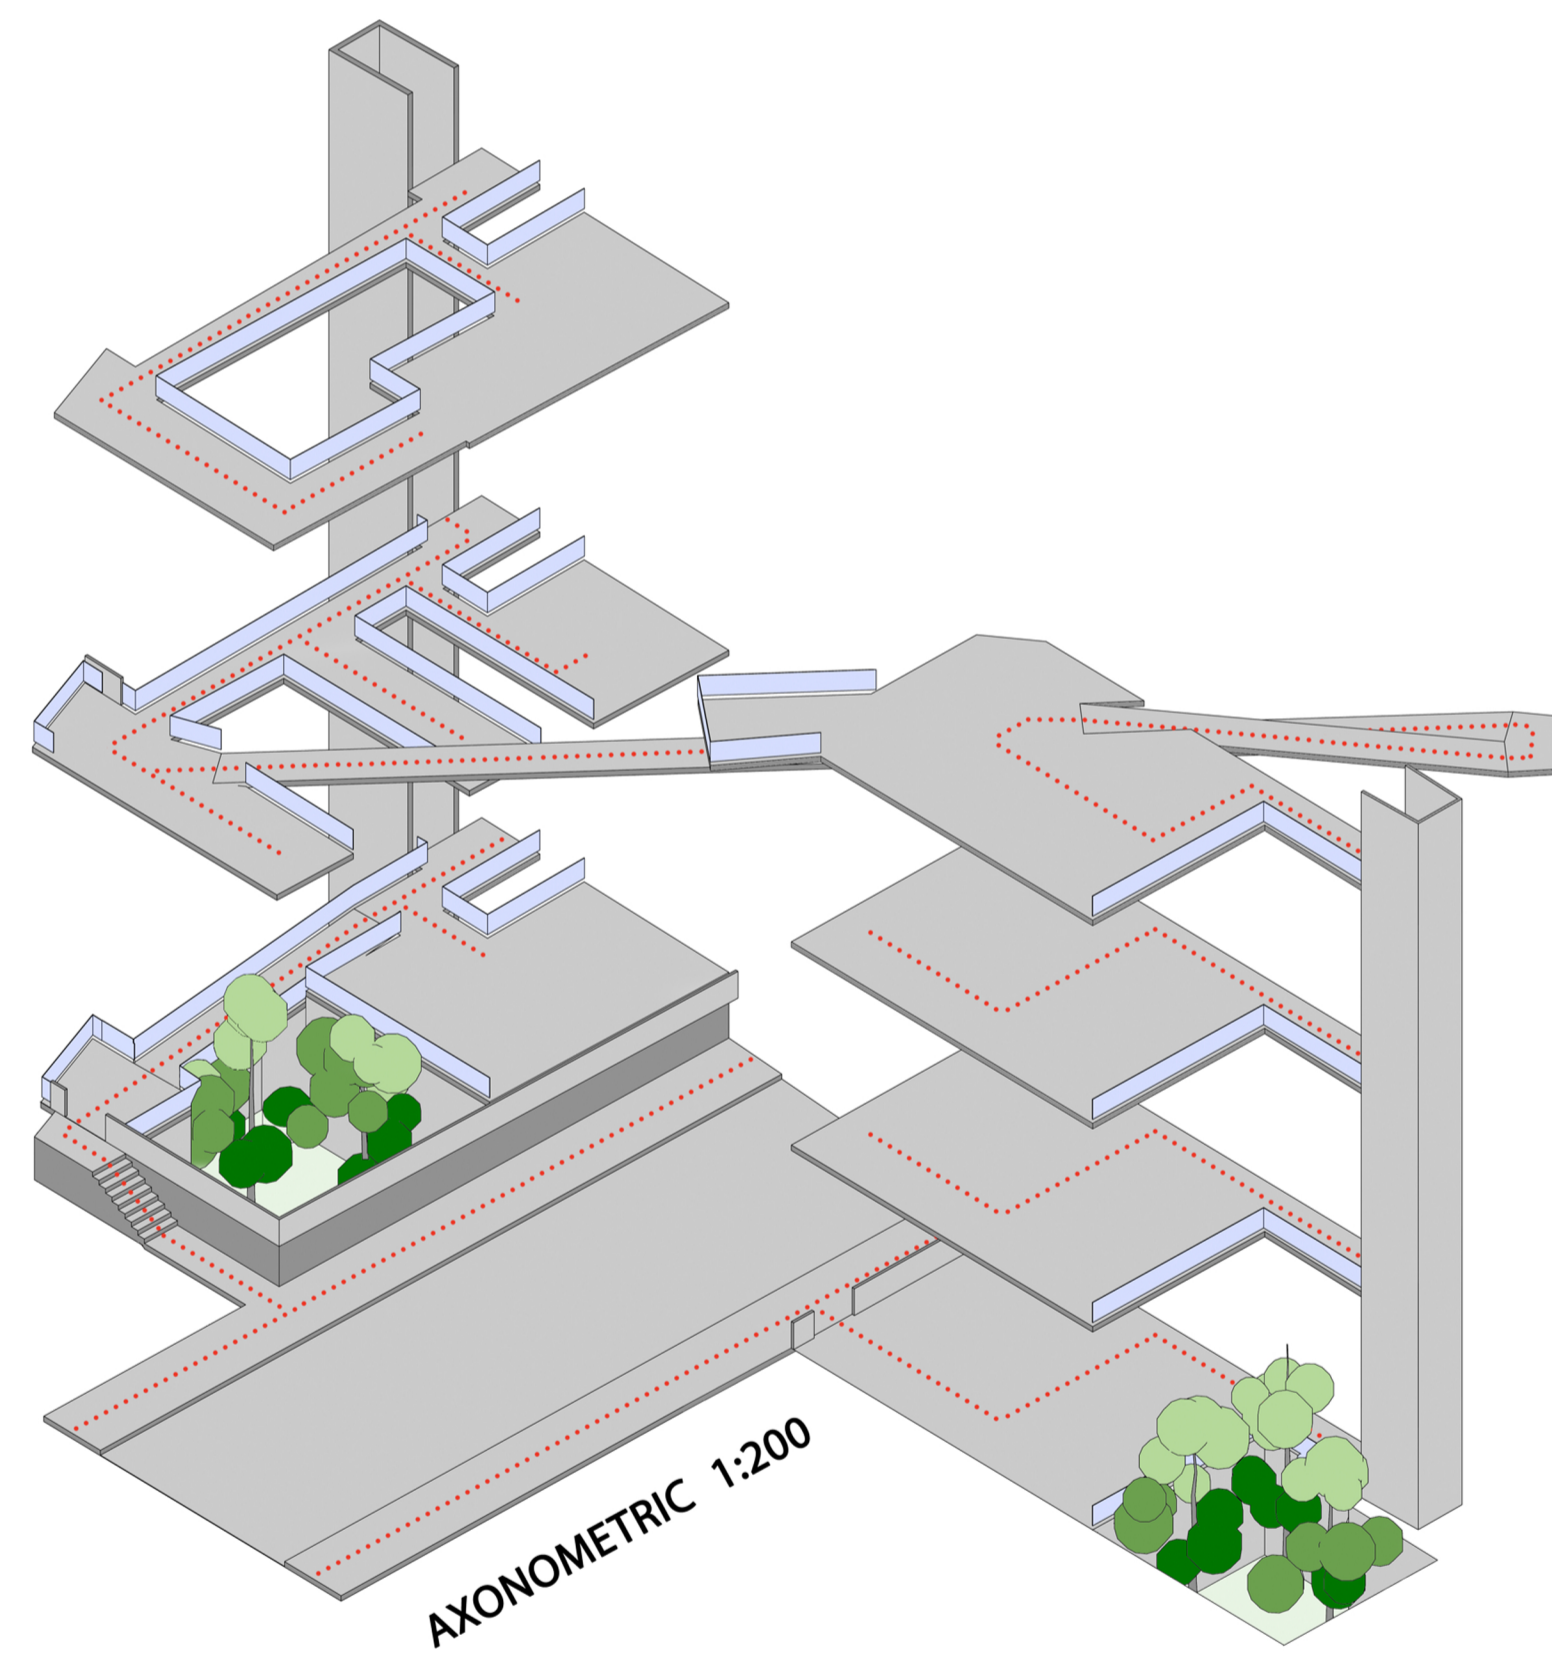

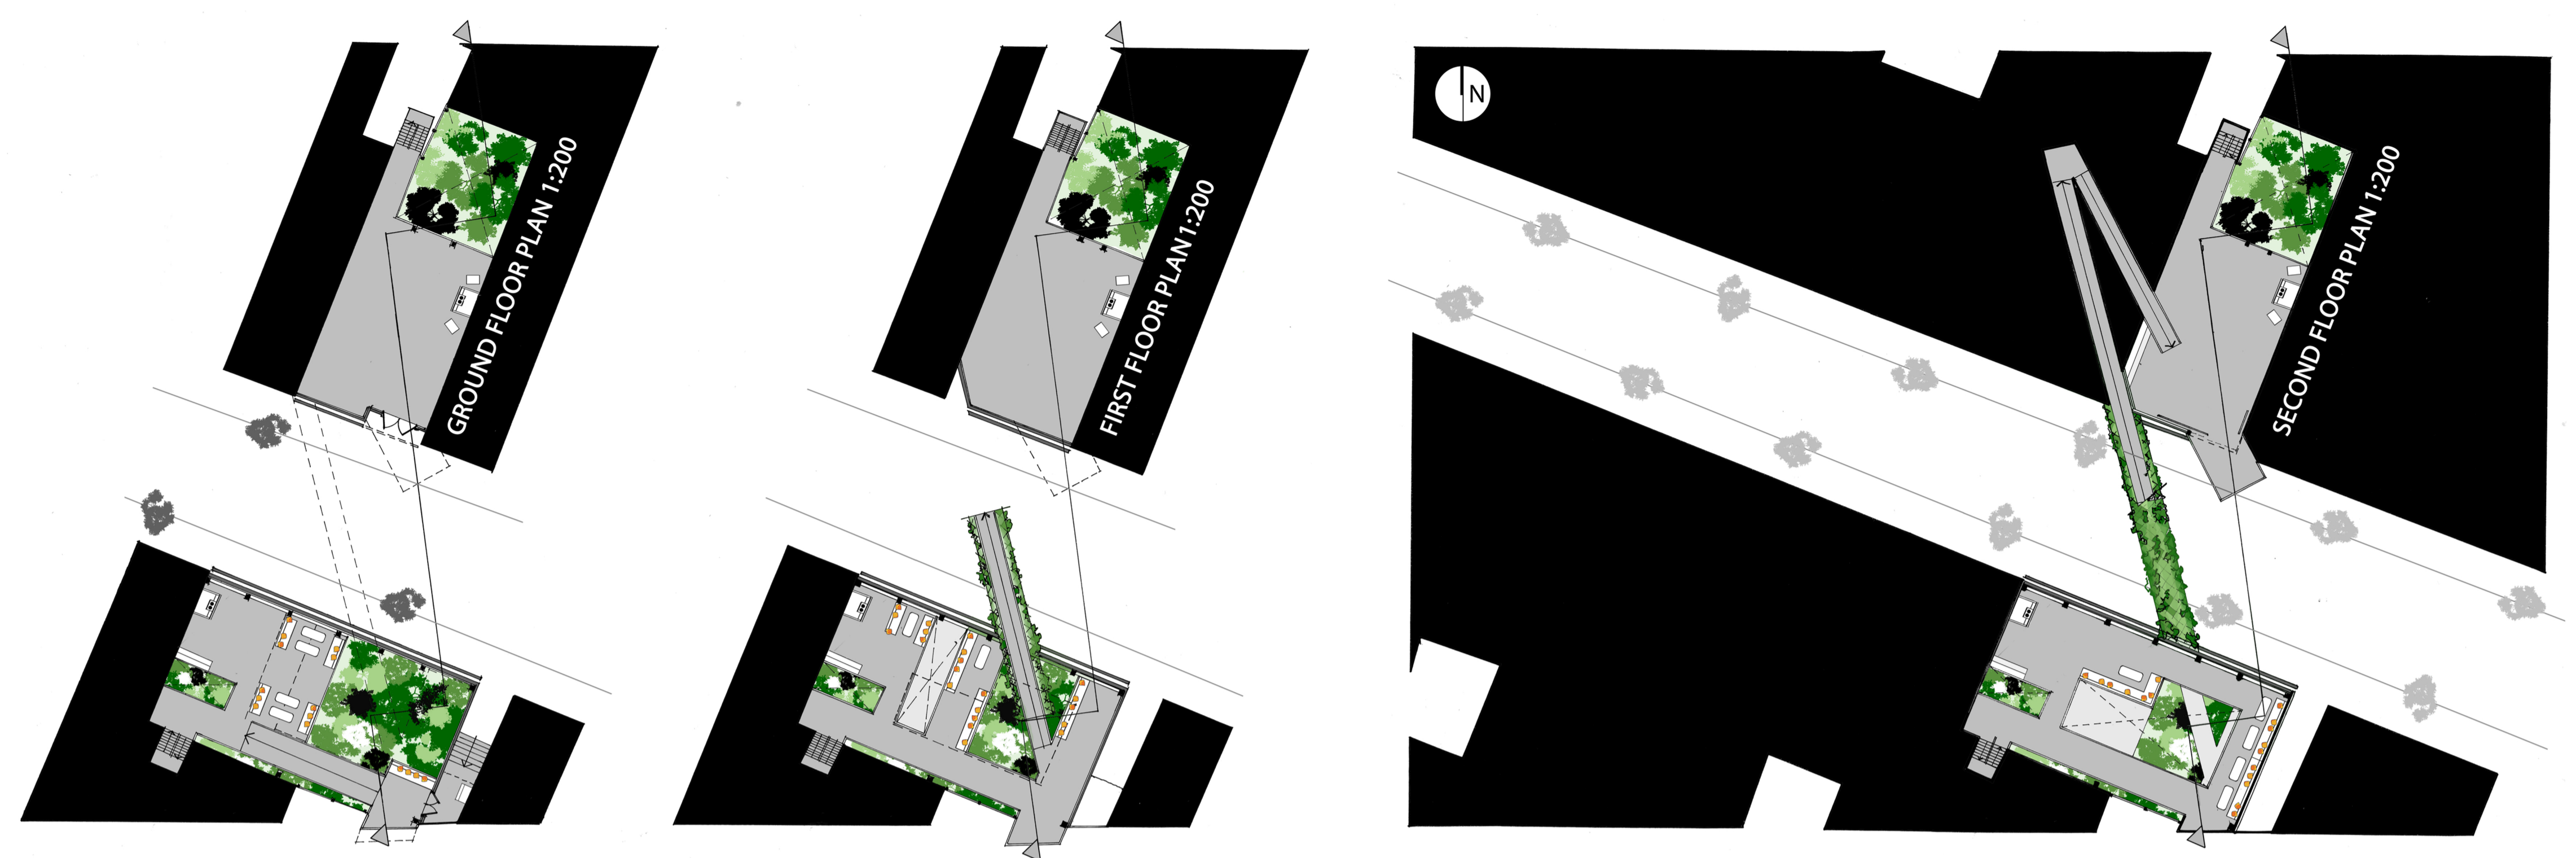

The essence of Madrid revolves around the **COMMUNITY**, siestas and fiestas, giving Madrid its own individual character. These unique characteristics influence everything impinge on **ARCHITECTURE, MUSIC,** and ultimately **LIFE.**

A flourishing oasis in the form of a lounge/nightclub in the middle of the city draws the neighbourhood as well as lone travelers seeking for a taste of the 'real' Madrid.

My design focuses on the idea of **GREEN ARCHITECTURE** in the heart and soul of a bustling city. This contrasting of two architectures collides with the old and the new giving birth to a new building. The **JOURNEY** through the club emulates the intricacy of the archaic **WINDING STREETS** of Madrid, each telling a story no other than its own.

The club has amalgamated all these concepts bringing the people together not just in a place but a space which shows off the **ESSENCE OF MADRID.**
