 Jerusalem (Sam)
 Block E3

My building is fairly central in my city block with all streets and pedestrian walkways running into it. There is also a clearway towards the back to allow the delivery of alcohol and supplies straight to the bar area. It is a sturdy brick built traditional building to blend into the Jerusalem landscape whilst offering an exciting and lively scene for the city's youth. The inside of the building has many split levels and hidden seating areas and also provides for the local community with a function centre for bar mitzvahs and the like. The thick materials that the building is made from holds true to Jewish tradition whilst also providing noise cancellation and bringing a different vibe to Jerusalem's newest nightclub.
