This is a primary school in Dubrovnik. It has three levels. The school is not big but it has everything, like the sports area, dining hall, library... The school is located in a special area so I designed it to be V SHAPE, the students can get lots of sunshine in the most area in the building. The school has three entrances, the one which is near the spiral stairs is a special door, it is convenient to go through the building, saves people's time~
