

Location Plan 1:10000

ENHANCEMENT OF CULTURAL PARIS Based on the idea of inversion such as the Pompidou centre and the underground Montréal city, Paris's Art Warehouse takes on both underground and overground space. It is created for designers and artists especially in a culturally artistic city to accommodate work area, a sanctuary in their own right underground, whilst the bridge like exhibition space is open to the public to view while enjoying a café experience with extraordinary views overlooking the vast boulevard below and into the distance.
