

# MOK CHON HONG 309013070 (I9)

The proposal is made at Stockholm, Sweden. This is an aged care center. The main idea for this proposal is to provide a warm and lovely home to the old folks who don't have a home to go and a family to depend on. In order to eliminate loneliness and to create love for the old people who has lost love from their family, this building has a secondary function of being a child care center. With the presence of new life source running through the building, the old folks home will not be a place for the old man only to end thier precious lives but a place for them to meet new lives.
