Tokyo Domee Zoo is designed on the concept of amalgamation of nature and human being. The design of the zoo is modern and different with the traditional zoo. The function is not only for people’s relaxation but also for the protection of the nature. People can relax in the garden and release the stress from the daily life, at the same time, the zoo enable people thinking the coexist of human and nature.
TOKYO DOMED ZOO

Section 1:200

GROUND FLOOR PLAN
A Japanese type garden is designed on the ground floor. A path connects the ferry station and entrance. Reception and marine animals are on this floor.

SECOND FLOOR PLAN
Amphibians section is on this floor and you can find the restroom here as well.

THIRD FLOOR PLAN
Third floor is terrestrial animals section. The interesting design of this floor is a unique frame and trees inserted into the building.

FORTH FLOOR PLAN
This floor is a restaurant for the visitor and there are many plants and a waterfall running through the room and flow into the garden.

TOP FLOOR PLAN
Top floor is designed as an open space for watching the avifaunas flying in the dome.
