Light Orchid Pavilion - Jerusalem E4

A temporary and mobile pavilion for the annual Israel Spring Arts Festival situated in Jerusalem’s Old City.

The pavilion provides seating and shade during the day and transforms into a bar, meeting place and source of illumination by night that hosts cultural events associated with the festival.

Concept / Design
Inspired by the wild orchids that flourish in the hillsides of Jerusalem during spring, the pavilion creates a public space that allows the different communities of Jerusalem’s Old City to engage and interact with each other. It is a catalyst for communication, working to remove barriers and trigger change.
