

**A Study on the Multi-trip Vehicle Routing Problem with Time Windows and Meal
Break Considerations**

San-Nah Sze

A thesis submitted in partial fulfillment of the requirements for the degree of Doctor of
Philosophy

Discipline of Operations Management and Econometrics

Business School

University of Sydney

March 2011

Statement of Originality

This is to certify that to the best of my knowledge, the content of this thesis is my own work. This thesis has not been submitted for any degree or other purposes.

I certify that the intellectual content of this thesis is the product of my own work and that all the assistance received in preparing this thesis and sources have been acknowledged.

Abstract

Chapter 1: Introduction

1.1. Introduction	1
1.2. Vehicle Routing Problem with Time Windows (VRPTW)	2
1.3. Multi-trip Vehicle Routing and Scheduling Problems with Time Windows (MTVRSPTW)	4
1.3.1 MTVRSTW Formulation	5
1.4. Multi-trip Vehicle Routing and Scheduling Problem with Time Windows and meal break consideration (MTVRSPTW-MB)	5
1.4.1 Case Study	6
1.5. Purpose	7
1.6. Thesis Structure	8

Chapter 2: Problem Description: definitions and mathematical formulation

2.1. Introduction	10
2.2. Problem Formulation	12
2.2.1 Notation	14
2.2.1.1 Sets	14
2.2.1.2 Parameter	15
2.2.1.3 Decision variables	15

2.3. Mathematical Modelling	16
2.3.1 General Model	16
2.3.1.1 Sub-graph	17
2.3.1.2 Main-graph	25
2.3.2 Synchronisation of loading teams (Model B)	25
2.4. Problem Complexity	26

Chapter 3: Relaxed-MTVRSTW Formulation

3.1. Introduction	28
3.2. Model Formulation and Description	28
3.3. Column Generation	31
3.4. Performance Analysis	34
3.5. Conclusion	36

Chapter 4: Pre-processing Data Algorithm

4.1. Introduction	37
4.2. Time window reduction	39
4.3. Performance Analysis and Discussion	42
4.4. Conclusion	44

Chapter 5: A MTVRSPTW with Meal Break Consideration

5.1. Introduction	45
5.2. Problem Definition	46

5.2.1 Insertion Algorithm	46
5.3. Performance Analysis	51
5.4. Conclusion	54

Chapter 6: A MTVRSPTW with Meal Break Consideration and Workforce Synchronisation

6.1. Introduction	55
6.2. Two-Stage Scheduling Heuristic (TSH)	55
6.2.1 Stage I	55
6.2.2 Synchronisation of Service Teams	61
6.2.3 Stage II	62
6.3. Performance Analysis	62
6.3.1 Case Study Analysis	62
6.3.2 Synchronisation of Loading Teams Relaxed	64
6.3.3 Meal Break Sensitivity	65
6.3.4 Analysis of the Relaxed-MTVRSTW	66
6.4. Conclusion	67

Chapter 7: Numerical Analysis

7.1. Introduction	68
7.2. Case study	68
7.3. Computational Experiments	70
7.3.1 Description of the Test Problems	71

7.3.2 Managerial Settings	71
7.4. Computational Results	72
7.4.1 Analysis on Demand Size	74
7.4.2 Analysis on Demand Distribution	74
7.4.3 Analysis on Demand Time Windows	75
7.4.4 Analysis on Travelling Trip Setting	75
7.4.5 Analysis on Meal Break Allocation	80
7.4.6 Analysis on Working Shift	82
7.4.7 Analysis on Meal Break Duration	85
7.4.8 Discussion of Case Study and Experiment Test	88
7.5. Managerial analysis	89
7.5.1 Working shift sensitivity study	90
7.5.2 Total labour hours sensitivity study	93
7.5.3 Demand Distributions Sensitivity Study	93
7.6. Conclusion	97
Chapter 8: Discussion & Conclusion	
8.1. Conclusion	98
8.2. Our Contribution	99
8.3. Future Perspectives	101
References	103
