Gender and Codemixing in Hong Kong

Kwok-Lan Jamie, Wong

A thesis submitted to the Faculty of Arts in partial fulfilment of the requirement for the Bachelor of Arts (Honours) Degree in the Department of Linguistics The University of Sydney

November 2004
ACKNOWLEDGEMENT
First and foremost, I am grateful to my supervisor, Dr Ahmar Mahboob, for his patient
guidance, invaluable help and enlightening suggestions during the course of my research
project. His enthusiasm and serious attitude towards the academic research has greatly
influenced me to work hard for my project.

I would like to extend my heartfelt gratitude to my mentor, Dr Toni Borowsky for her
consideration and necessary guidance.

Appreciation is expressed to Prof. James Martin, coordinator of Honours Program for his
invaluable and enriching advice during Honours seminars.

The friendship I enjoyed with my fellow undergraduate students, Aidan, Fiona and Simon has
been an unforgettable one. We shared many good laughs together apart from giving each
other much needed encouragement and assistance in our work.

My final thanks go to my parents and friends, whose love, encouragement, and support
throughout the honour program helped me get through difficult times and achieve academic
success.
