Juvenile Detention Centre

This Juvenile Detention centre has been designed with a focus on rehabilitation rather than punishment. The primary focus of the centre is to get involved youth back on track rather than continuously punishing them, pushing them further and further into a cycle of criminal activity.

Designed to be comforting rather than oppressive the centre has large spaces and high light penetration. Taking advantage of its hilltop position, the centre offers a panoramic view of the surrounding area. Additionally, the design encourages interaction and socialization, providing areas for group activities and individual growth.

The centre is equipped with workshops and outdoor areas where youth are encouraged with plenty of space dedicated to productive outlets such as the wood shop, rooftop garden and gym area.
